Attention: Mr. John J. Vitton, Engineer

Gentlemen:

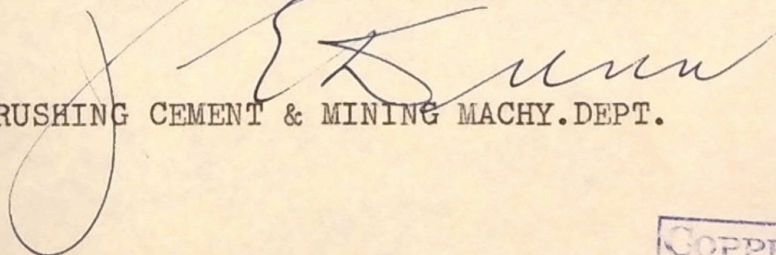

We appreciate receiving your letter of May 21st requesting latest catalog on heavy duty vibrating screens, together with dimension sheets.

We manufacture three heavy duty screens, namely, Ripl-Flo, Style "B", and Style "C" screens. Each screen is designed for special application, depending upon the size of the feed, openings required in the deck, etc.

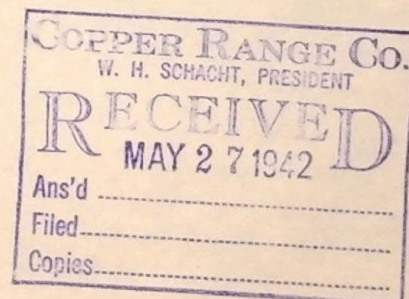

We are accordingly taking the liberty of referring your letter to Mr. Wm. Knight of our Duluth office and would suggest that he get in touch with you to find out your requirements so that proper proposal and dimension drawings may be submitted.

Yours very truly,

ALLIS CHALMERS MANUFACTURING COMPANY

Dear Sir:

We received from Mr. J. E. Dunn, in charge of our Screening Division of the Crushing & Cement Dept. Milwaukee, a copy of your request dated the 21st inst. for catalogue and information on Vibrating Screens.

Also copy of Mr. Dunn's communication of the 25th inst. to you in which I notice that he has sent you information which I feel will be interesting.

For your information wish to state that this Duluth district has sold the largest number of screens over this entire iron mining area than any other concern handling such class of equipment. Our last screen gotten out, namely - Style "C", is handling large tonnage in which some of the chunks weigh as much as a ton and a half, which means some punishment and if you wish we can give you references for your own personal contact.

If you desire to go into the matter with the writer in person I will be glad to call upon you and discuss same.

Yours very truly,

ALLIS CHALMERS MFG. CO.

W. J. Wright
