For His New Position

On Sunday Mr. L. S. Glasier will leave Marquette to begin the duties of his new position as train despatcher on the MIS&W, with headquarters at Ashland. Mr. Glasier is no stranger to the duties of such a position, his long and faithful service on the MREO testifies to that, while the fact that he never had an accident on the road due to any negligence on his part gives him a record to be proud of. In his new position, Mr. Glasier will have a much greater chance for promotion and it will be the earnest wish of his many friends in this city and along the line of the MREO* that he will have the greatest possible measure of success at Ashland and that the promotion which usually attends success may in his case come early and often.
