Preparing for the Railroad

Ishpeming:- Mills and Dishno, of Ishpeming, are moving a number of houses, including the post office, a store and several dwellings in the village of Champion. The buildings are being moved to make room for the main track and spurs, turn table, depot and warehouse of the M&N, which is now being built parallel with the track of the DSS&A for a quarter of a mile or more before reaching the terminus. The depots of the two roads will be so close to each other that they will be practically one, and close connections will be made by passenger trains after the M&N reaches Champion.
