Several of the merchants are complaining to headquarters about the passenger and freight service of the DSS&A railway. Prominent land companies, owners of several mines are preparing a list of complaints from those operating their properties to forward to headquarters of the railway company. The Delay, Short Steam and Antiquated is going to get its hair pulled if it don't do business in a business like way. The service was wretched last summer and all the mines will take a particular pleasure in describing their complaints. If the road intends to carry all the passengers and ore it will have to make a decided improvement in the methods lately been employed.
