Railroad Notes

All trains at the Marquette depot now carry cards showing their destinations. The scheme should be put in practice at the Sault, for hardly a train pulls out from there without one or two chumps on board who suppose that they were taken by the Soo line, which for the present is using the terminal facilities of the DSS&A. They persist in taking the wrong train in spite of the efforts of the train men to enlighten them and are bounced regularly a mile or two out.
