### Finished

T. H. Hamilton, to dock contractor, has finished the great extension to No. 3 ore pier and it stands today one of the finest pieces of work on the lake. Some of the new pockets have been in use for several weeks and give the greatest satisfaction, the new hoisting apparatus for the chutes working like a charm and making a great saving in time over the old method. The extension to No. 1 dock will probably be finished by the end of the month.
