Saturday

A Smash Up

Negaunee - An ore train and a work train on the DSS&A came together at the east switch at Eagle Mills Saturday. The speed of the train had been slackened so that the shock was not a heavy one and the damage was slight. The pilots were knocked off but neither engine left the rails. The track was blocked for a couple of hours and passenger trains were run over the M&W. Several of the ore train runs were thrown out in consequence and trains were running Sunday to make up for it.
