A STATUE OF TILDEN.

Representative Cummings Introduces a Bill to Erect One in The Capitol at Washington

AND TO INSCRIBE IT "TWENTIETH PRESIDENT OF THE UNITED STATES."

"Elected But Not Seated"—Mr. Sweeney Makes a Sarcastic Inquiry—Plumb's Seal Fisheries Bill.

THE HOUSE.

WASHINGTON, Jan. 13.—Many bills for public buildings were introduced. Among other bills introduced were the following: By Mr. Anderson, of Kansas, to declare the duties, enforce the obligations and regulate the services of the railroad companies as carriers of interstate commerce; by Mr. Bliss, of Michigan, for the maintenance of an Indian industrial school in Michigan; by Mr. Carey, of Wyoming, for an Indian industrial school on the Wind river reservation; by Mr. Cummings, of New York, a joint resolution for the erection of a statue to the memory of the late Samuel J. Tilden as follows:

Resolved, that there be appropriated from the treasury of the United States the sum of \$50,000 to erect a bronze statue of the late Samuel J. Tilden, to be placed in the center of the rotunda of the capitol; that on a tablet at the front of the base of said statue there shall be conspicuously engraved the words "Samuel J. Tilden, Twentieth president of the United States, elected but not seated." (Applause on the democratic side.) That on the right side of the monument shall be engraved the date of the birth, election and death of each president and that on the opposite side shall be engraved an eagle with a snake in its talons and under these words, "For the Rights of the People."

Resolved, That the president of the United States, the chief justice of the supreme court, the president of the senate and the speaker of the house of representatives be authorized to superintend the expenditure of money and that a copy of these resolutions with the names and titles of said dignitaries be engraved on the rear of the statue.

Mr. Sweeney (Iowa) inquired whether the gentleman expected the inscriptions to be in cipher. [Applause on the republican side.] The house then proceeded to committee of the whole, Mr. Burrows of Michigan in the chair, to consider the bill to provide for town site entry lands in Oklahoma. Without action the committee rose and the house adjourned.

WASHINGTON NEWS.

WASHINGTON, Jan. 13.—Proclamation to open the Dakota Sioux reservation has been prepared and will be issued sometime this week. It will add to the public domain about 11,000,000 acres of land.

PLUMB'S SEAL FISHERIES BILL.

WASHINGTON, Jan. 13.—Senator Plumb to-day introduced a bill to repeal so much of the act of July 1, 1870, as authorizes the leasing of the rights to engage in taking fur seals from the islands of St. Paul and St. George, Alaska. The bill provides that all authority heretofore conferred upon the secretary of the treasury to lease the rights of the seal fisheries to any company, be repealed, and that the lease existing between the Alaska Commercial company and the government be terminated. The bill requires the secretary to promulgate regulations prohibiting the taking and killing of seals and other bearing animals by any but natives, and prescribing the number to be taken each year. The bill proposes to continue all the other restrictions now in force, but provides that all skins taken hereafter shall be transported annually to San Francisco to be sold there in open market to the highest bidder. All the money derived from these sales is to be paid into the treasury and set apart for the education of the natives of Alaska.

Mr. Dunnell introduced a similar bill in the house. Representative Steward, of Vermont, to-day introduced in the house a bill declaring that no Mormon shall be eligible to vote at any election or hold civil office in the territories of the United States or be naturalized as a citizen of the United States or settle upon any public land. Voters are required to make oath that they do not belong to the Mormon church as a preliminary to the exercising of the right of suffrage.

A joint resolution was introduced in the house to-day by Representatives Chipman, of Michigan, directs the secretary of war to cause a survey and estimate of the expense to be made of the cost of the construction of a basin for the anchorage and turning of vessels in the river Rouge in the state of Michigan between the mouth of the river and the bridge of the Michigan Central railroad across the same.

THE SENATE.

WASHINGTON, Jan. 13.—The bill to authorize a railroad bridge across the Missouri river between the county of Daughass, or Sarpy in Nebraska, and the county of Pottawatomie, in Iowa, was amended and passed. Mr. Plumb then addressed the senate at great length in favor of his resolution respecting the lease of the seal fisheries in Alaska. Senator Mitchell introduced a bill prohibiting the coming of the Chinese into the United States whether subjects of the Chinese empire or otherwise. Those who are now within the limits of the United States and who may hereafter leave and attempt to return are excluded.

Waived Examination.

New York, Jan. 13.—Major W Hancock Clark, the member of the Southern club who was arrested last evening on the charge of firing three shots at Mr. William Randolph, a fellow member, waived examination in the Jefferson market police court to-day. His counsel said he was willing that the case should go to the grand jury. The major gave a fresh bond this afternoon.

SOMETHING IN THE WOOD-PILE.

The Story Concerning the Forged Notes of Richard Brown Not all Told.

TOLEDO, Ohio, Jan. 13.—The story of the two forged notes on Richard Brown, the well-known iron man of Youngstown and Cleveland, contained in the Associated Press dispatches last night, first called public attention here to the matter. Joseph Lamb, the payee of one of the alleged forged notes, is cashier of the United States Express company here, which office he has held for twenty years. He says Miss Blythe, the payee of the other forged note, is a distant relative of his, living in Cleveland, who, a year ago, made arrangements with him whereby he was to take charge of certain property to which she had fallen heir and of which certain parties wished to defraud her. The property, valued at \$25,000, came to her in some way through her sister, who, she alleged, was the first wife of Richard Brown, of the firm of Cleveland & Brown, of Cleveland. The money was partly given in consideration of the care she gave to an imbecile child of Mr. Brown's first wife, which she (Miss Blythe) nursed and reared. Mr. Lamb agreed to assist Miss Blythe, with the result that she got him "in a box," so to speak. Lamb has not been arrested. He has been engaged to-day endeavoring to get his wife to mortgage their homestead, which is in her name, in order to secure the banks. The tide of popular feeling so far is with Lamb, under the idea that he has been made a victim. It is evident, however, that the whole story is not yet out.

THE IOWA ASSEMBLY.

The Republicans Have a Small Majority in Both Branches—The Senatorial Question.

DES MOINES, Ia., Jan. 13.—The twenty-third general assembly convened to-day. The city is crowded with politicians interested in the initial movements of the session, which, apart from the fact that a United States senator will be elected, promises for many reasons to be a peculiarly exciting one. The composition of the senate is twenty-eight republicans, twenty democrats, one union labor, and one independent, the latter, Senator Barnett, being in harmony with the republicans except on the question of prohibition. The membership of the house comprises fifty republicans, forty-five democrats, four independents, and one union labor. The independents, who came from republican districts, are expected to work with the republicans long enough to enable the latter to elect the speaker and organize the house. All interest and excitement this morning centers on the election of officers for the senate and house, and, this being out of the way, the senatorial fight will commence in earnest.

CONSIGNED TO THE TOMB.

The Body of The Late Congressman Kelly Interred at Philadelphia.

PHILADELPHIA, Jan. 13.—The remains of the Hon. Wm. D. Kelley were to-day consigned to the tomb. There was little show or display, quiet being insisted upon by the members of the dead man's family. At the residence of Mrs. F. Odell Horstman, a daughter of the deceased statesman, where the body lay, but few persons were admitted and they only the immediate relatives, a few close friends and the congressional committee appointed to attend the funeral. There were services at the First Unitarian church. Upon the conclusion of the services the funeral procession took its journey to Laurel Hill cemetery where the interment took place.

AN ENTHUSIASTIC RECEPTION

Given Cardinal Gibbons by People of all Denominations in Charleston, S. C.

CHARLESTON, S. C., Jan. 13.—The people of denominations, the white, the colored, the rich and the poor, joined together to-day in doing honor to Cardinal Gibbons, who journeyed from Baltimore to officiate at the laying of the corner stone of the new cathedral. The reception, which was of a semi-public character, took place in the City Hall, the use of which was granted by the mayor and council. For hours a steady stream of people poured through the building. The presentations were made by Bishop Northrop, the cardinal giving each visitor a hand-shake and a smile. To-morrow his eminence, accompanied by Father Leeson, his provincial, leaves for New Orleans. He will be escorted a portion of the journey by a large delegation of priests and laymen.

Mrs. Link Still Lives.

AMSTERDAM, Jan. 13.—Mrs. Thomas Link, the wife of the Tribes Hill hotel proprietor, whose throat was cut by her husband Saturday night, is still alive, but no hopes of her recovery are entertained. This morning Mrs. Link's aged mother, who is heartbroken over the tragedy attempted to commit suicide by hanging herself in an out-building. She was about to place the rope around her neck when she was discovered by people from the hotel. The coroner is holding an inquest over the body of Link, who killed himself after cutting his wife's throat.

Murder or Accident.

PIETSBURG, Pa., Jan. 13.—A special from Gladys Fork, W. Va., says: Claud Galaspal, aged 17, was killed Saturday by C. L. Louk, a 13-year-old lad. Galaspal, Louk and another boy were out hunting when Louk's gun was discharged, the contents entering Galaspal's back, killing him instantly. The load also took effect in the head of the third boy, rendering him insane. Various theories have been advanced regarding the shooting. Some assert that it was done intentionally, as young Galaspal claimed before he died; others think it was an accident.

ANARCHIST SENSATION.

A New York Detective Tells a Most Sensational Story.

A Band of Sixty-Two Anarchists Pledged to Burn New York and Brooklyn and Then To Suicide.

NEW YORK, Jan. 13.—Interviews with Detective Miller are published this morning, in which he asserts that within ten days nineteen anarchists have committed suicide. He believes that other anarchists will end their lives in the same way. Detective Miller has been working on a case where anarchists are supposed to have formed a gang of fire-bugs in Brooklyn. The principal witness was a Long Island City socialist who had come on from Chicago just after the hanging of Spies, Parsons, Engel and Fischer. This man told Detective Miller that there was an organized gang of fire-bugs whose object was to burn the cities of New York and Brooklyn. He also said that after these two cities had been burned it had been arranged that the entire gang, numbering about sixty-two men, should at a certain time commit suicide.

LEAVING BEHIND CONFESSIONS

of their crimes. It was agreed, this man said, among the sixty-two members of the gang, that all should die martyrs to their cause. Detective Miller had a good case worked up against nine of the anarchists, when a private detective, employed by a New York firm, planned the arrest of the informer. The latter heard of the proposed arrest and escaped to Germany. According to Detective Miller, the sixty-two anarchists who had planned the burning of the two cities were members of the Chicago section of the socialist Arbeiter, but upon coming east they joined the New York section, whose headquarters are on East Fourth street. Nineteen members of the band resided in Brooklyn and

THE BAND HELD SESSIONS

every Monday afternoon in a saloon in New York, not even admitting other socialists into their secrets. The detective says that two weeks ago he received a letter which said that the Brooklyn members of the gang had become disgusted with the slowness of their New York brethren, and, believing the cause to have been lost, had resolved on suicide. Franklin, who killed himself, wife and child, in Brooklyn is believed to be the first who carried out the agreement of self-slaughter. John Herbi also killed himself. He left a letter saying he intended killing his family, but did not like to see them die like dogs. Peter Dittmuler is still another Brooklyn suicide among the anarchists and the detective declares that all told nineteen of them have sought death within ten days.

The Investigation Comes Later.

NEW LONDON, Conn., Jan. 13.—President Clarke, of the Norwich line, arrived on shore from the stranded steamer City of Worcester about 10:30 o'clock last night. He said to a reporter: "The steamer City was on a bed of small stones. She is broken on the port side, low down, for a distance of fifty feet forward and amidships. The rupture is now more than six inches wide. The water is in the second and third compartments and making its way a little into the fourth compartment." When asked if he commended Captain Ward from blame, President Clarke replied: "I would not like to say until I have made some investigations. About all we could do to-day was to remove the passengers and cargo and make arrangements to get the vessel off the rocks. An investigation into the cause of and responsibility for the accident comes later."

The tug Merritt returned at 7:45 this evening from the steamer City of Worcester. She reports a very heavy sea and that it is impossible to get alongside. She sent a life boat to the steamer, but only one of the crew dared come to the tug. The steamer has settled since morning, and should the present sea hold out forty-eight hours it is doubtful if she can ever be floated.

New Blow at Bucket Shops.

CHICAGO, Jan. 13.—The board of trade aimed a new blow at the bucket shops in its annual meeting to-day. It authorized the directors to cut off quotations at discretion. The matter caused a lengthy and heated debate, but the final action was practically unanimous. It was done at the instance of the board's new president, W. T. Baker, who was inaugurated to-day.

The Woburn Strikers Satisfied.

WOBURN, Mass., Jan. 13.—The whistles in most of the leather factories of Woburn blew at 7 A. M. this morning and about one-fourth of the recent strikers went to work. More will go in as leather is advanced and ready for them and by Wednesday or Thursday all will be at work.

Discloses Stupendous Frauds.

CHICAGO, Jan. 13.—The examination into the assets of K. Deimel & Bros., the insolvent furniture dealers, discloses peculiar affairs, which Attorney Mayor designates as "stupendous frauds." Altogether about \$1,200,000 worth of assets are discovered, making the total assets about \$200,000, but the liabilities have also increased and are now supposed to be \$500,000 instead of \$300,000 as was first estimated. It is claimed that the firm has been practically insolvent since last July and continued to purchase goods on which it borrowed money and for which it never paid.

Ten Deaths From Grip.

CHICAGO, Jan. 13.—The Evening News reports ten deaths in Chicago within the past 24 hours from influenza and complications resulting from that malady.

A VETERAN.

I was wounded in the leg at the battle of Stone River, Dec. 31st, 1862. My blood was poisoned from the effects of the wound, and the leg swelled to double its natural size, and remained so for many years. The poison extended to my whole system, and I suffered a thousand deaths. Nothing did me any good until I took Swift's Specific, which took the poison out of my system, and enabled me to feel myself a man again. S. S. S. is the remedy for blood poison.

JOHN CONWAY, London, O.
Treatise on Blood and Skin Diseases mailed free.

HIRD POINT
You should read the CHICAGO DAILY NEWS because it is an independent newspaper. There are two sides to every political question, and the DAILY NEWS gives them both with equal fairness. A party organ magnifies one side and dwarfs the other. No sensible man wants to be misled with this fashion. The time has gone by when American citizens expect to inherit their political opinions. They want to make their own—and to do this they want a paper to tell them the truth, regardless of their own personal preferences. If you are an honest man, independent and self-reliant in thought, read an honest and independent newspaper—read THE CHICAGO DAILY NEWS.

Remember—its circulation is 250,000 a day—over a million a week—and it costs by mail 25 cts. a month, four months \$1.00, one cent a day.

MARQUETTE, MICH., JAN. 14.
Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The Cleveland Plaindealer states that the Republic Iron company has just declared a dividend of \$1 a share, this being the fourth of that amount declared by that company since October, or a total of \$4 in all on the business of 1889. Pretty good stock to own, that.

McKINLEY, the Ohio congressman who wanted to be speaker of the house but failed to get the place, is on record as favoring the short working day. Responding to a letter addressed to him by the American Federation of Labor asking where he stands with reference to the enactment of an eight-hour law, he expressed himself unequivocally, saying: "I believe in eight hours constituting a day's work. I have long held this view, and have more than once expressed it by my vote in the House of Representatives."

An eastern inventor claims to have hit on a way of insulating people by which they are rendered proof against injury by the electric current. His process is a secret yet, but he will soon patent it, and proceed to make millions out of it by rendering persons who have occasion to work around electric wires impervious to the deadly current. It is stated that he took a five hundred volt current right off the dynamo the other day, to show the value of his insulation, and that he sustained no injury whatever—didn't feel it, in fact. It will be hoped that his invention is all that he claims for it. It is just what we have been waiting for.

A TRADE exchange that has been looking into the matter says that the future of the prices of iron and steel in this country will depend largely on whether England will be able to place any considerable quantity of these metals on the American market at prices to meet the ruling quotations here, and that it is more than doubtful that England or any other foreign country can do this, during the current year at least. In England the stocks of iron and steel are unusually light at present, while quotations rule well up to those now obtaining here, and the same is true of Germany and Belgium. This being the case, there would seem to be very little danger of a break in prices during 1890, if the general strength of business continues. It is great luck for us that the demand abroad has improved so opportunely, or we might now be threatened with an influx of iron and steel from England that would have a depressing effect on prices.

It is generally believed that work on the Panama canal has been dropped because the enterprise has been entirely given up by its projectors and those who furnished the funds for what has already been accomplished on the wonderful ditch, but a correspondent of the New York Post informs that paper that this is not the case. He says that although construction work is at an end for the present, large forces of workmen are constantly engaged in painting the machinery and doing what is needful for its protection. A large portion of the plant of the canal is well housed in sheds, where it is safe enough, and roofs have been erected over excavators and other heavy machinery where it stood when work was discontinued. So far as could be seen, careful attention has been paid to the preservation of the minor parts of all machinery, and the condition of the plant seems to be exceptionally good when the nature of the climate is considered. A commission of engineers will visit the isthmus during the month of December, whose first duty will be to take an inventory of the entire equipment of the company, and then to consider once more the threadbare question as to the practicability of completing the work for any reasonable sum of money.

GEN. GREELY, who has charge of the weather bureau, accounts for the recent warm weather upon the theory that terrible storms raging in the northern latitudes have drawn the warm currents all away from the south and southeast. The passage of the currents to the northward to supply the demand for caloric has produced a sort of December summer in this section which has destroyed the business of our furriers, and damaged the prospects of all our merchants, who have not been able to dispose of their winter stocks. It has helped nobody in particular save the poor people, who have not been forced to buy coal and clothing for an inclement season. What we would like to have the gentleman in charge of the weather bureau explain is, what is likely to happen when these warm currents start back to the part of the country they came from, after having shaken hands with the icicles of the boreal regions. Will there be a demand for ulsters and overshoes along toward spring?—N. Y. World.

The World's concluding query is answered by the change in temperature that has taken place since that paper fired it at the manager of the weather bureau. Those warm currents must

have scurried back to their regular abiding place in a hurry, pursued by the boreal blasts that have coursed across the country within the past few days. Greeley's explanation of the unusually mild weather that prevailed during the earlier portion of the winter would appear to have been pretty near right.

NEW ALIGNMENTS ON THE TARIFF.
In the whirligig of time, observes the Age of Steel, many changes occur in the economic doctrines of persons and sections. Abundant proof of this fact is afforded by the examinations now being conducted by the ways and means committee in the interest of a new tariff bill. At these hearings the curious spectacle is presented of New England asking for more free trade than she has, and particularly for free trade in iron ore, coal and raw materials generally; while the south, which would have made protection to its industries impossible under the constitution of the confederacy, is now the most zealous champion of it. It is all strange—strange, indeed.

But there are reasons why, of course, public opinion may reverse itself on almost any question; it is only necessary to inquire carefully to discover these in any given case. New England, for instance, wants cheap, untaxed coal and raw materials, because she is an importer and consumer of these and an exporter of manufactured goods. The south, very wisely, demands through such representatives as General Imboden, Judge Bowling, Representative McComas and Messrs. Hitchins, Sloane, Fackin and others, that the duties on coal and iron be left as they are. In their continuance she sees the opportunity to develop her marvelous young industries perfectly and with the utmost dispatch. Protection enables her iron to enter eastern and western markets upon comparatively easy terms of competition, whereas the opposite policy would introduce a formidable, if not ruinous, competition from abroad. It is not Ohio or Pennsylvania, but English, iron which the south has most reason to fear at the north, and even in her ports, through reductions in the tariff. All that is clear enough to the new, energetic, modern business communities of that section.

Having a Hobby.
A hobby is a companion in loneliness and a resource in distress, a meeting ground for a congenial spirit who also has a hobby—perhaps your own—over which to fraternize; and really, when I begin to sing the praises of this valuable possession, it is hard to know where to stop. It is a good thing to become possessed of a hobby when you are young. You can acquire an immense amount of knowledge in almost any walk of life, and you can form an idea of the great varieties there are among the wild flowers, and the wonders and beauties of these seem endless.

In interest, too, how much will you find in geology, conchology, entomology, physiology. Or, if sciences do not attract you, is there no charm in needlework if you are a woman, carpentering if you are a man, or gardening and many other things? Amateur photography is taken up equally by both sexes, and is often carried to great perfection. The selection of your special attraction must depend upon yourself, and if no one science or pursuit in particular seems to possess a charm for you, I should make acquaintance practically with one or two, and you may find that the charm is there after all—Quiver.

Interviewing.
Interviewing is an application of, and is justified by, the axiom that the shortest distance between two given points is in a straight line. Newspapers are published to furnish information. Information doesn't seek them; they have to seek it. Interviewing is just as necessary to get "news" as it is to get "views." Interviewing began with the publication of the first newspaper. But it took newspaper publishers some time to find out that the public is about as much interested in what people of note think about what is going on as in what is going on. They are only just finding this out in England.

There is a good deal of nonsense written about perscription by the interviewer. If a man doesn't want to be interviewed, all he has to do is to say "no" and stick to it, and that settles it. There are many people who like to see their opinions in print, but they don't wish to have it appear that they seek publicity for them. Even the most conceited and egotistical of men desire a reputation for modesty. I once traveled fifty miles to interview an ex-governor who had requested that a reporter be sent to interview him. But the interview was not preface by the statement that "ex-Governor" sent for a reporter to interview him." On the contrary, it was preceded by the observation that the reporter had sought ex-Governor—and that he "reluctantly consented" to give his views, etc. There is a good deal of humbug in this world, and a reporter sees rather more of it than most people. But, of course, the sort of notoriety seekers above referred to constitute but a small minority of those who get interviewed.—Cor. Epoch.

Sure Cure for La Grippe.
It has been demonstrated beyond doubt that change of scenes and climate is the best preventive and surest cure for the prevailing disease, and that those residing in cold climates are benefited by going to a warmer, and those of a warmer should go to a colder. Therefore those in the Superior country who wish to escape the malady should go south or southwest. But in order to realize all the benefits and escape unscathed you must go via the Milwaukee & Northern R. R. en route in application to any ticket agent or E. P. Wilbur, T. P. A., 306 Front st., room 7, Marquette. (1-11)

CAN SUPPLY OUR OWN DEMAND.

The Output of Iron and Steel for 1890 Promises to be Fully Up to the Requirements of the Country.

American Manufacturer: The tenth edition of Swank's Directory of the Iron and Steel Works of the United States, just issued, furnishes the data for arriving at an accurate estimate of the possibilities of the United States for the production of iron and steel in 1890. This most admirable volume, which more than sustains the reputation of the previous issues, is complete for this purpose, with the exception of data concerning fuel, limestone and ore, which properly were not included in its scope.

There is no possibility of any shortage in flux. The deposits of limestone in the country are sufficient to supply any possible demand that can be made upon them.

As to fuel: Here, also, there is but little probability of any shortage. With the spring the number of ovens in the Connelville region will be largely increased. The ovens on the upper Monongahela in West Virginia, a thousand of which are now in course of construction, and quite a number of which are completed and ready to begin burning, will be ready to send their product of more than a thousand tons a day to the furnaces. The only section in which there is any probability of a shortage is the South. In Alabama the local supply will be insufficient to meet the demand of the furnaces. For a while this can be supplemented from the Pocahontas region, but unless there is a very large increase in the number of ovens in that district, with the demand for coke from the Virginia furnaces that are already built or under construction, the Pocahontas region will have but little coke to spare for the South.

As to iron ore: Here, also, it is probable that the demands on the furnaces will be readily met. The output of Lake Superior will be largely increased. The same is true of the production of New York state, while railroads are being built and mines opened up in Virginia that will largely add to the output of that state, furnishing, probably, not only ore sufficient to supply the local furnaces, but present information would indicate that considerable quantities of ore will be sent north. We know of one negotiation that is in progress for the supply of 200 tons of ore a day to come north. In Alabama, also, there are indications that the output of ore will be largely increased, and almost all ore-producing sections of the country that furnish ore only for local furnaces will increase their output during 1890. So, on the whole, it is fair to assume that there will be no shortage of ores.

According to Mr. Swank's directory, the total capacity of the completed blast furnaces of the country, which was virtually the capacity on the first day of January, 1890, was 11,573,351 gross tons. Twenty-seven other furnaces are reported as building, and, in addition to this, we know of seven others that will, in all probability, be built in 1890. These new furnaces are chiefly modern furnaces, with very large capacity. Two of them, H and I, of the Edgar Thomson, will have a capacity of 1,641,077 gross tons a year. Two others, those of the Monongahela Furnace company at McKeesport, will have an annual capacity of 142,857 gross tons. Another, the Isabella, will have an annual capacity of from 71,828 to 80,357 gross tons.

Some of the Virginia furnaces which are under construction, and which will be ready to begin burning in the first day of January, 1890, will have a capacity of 44,642 gross tons. We think it would be fair to estimate that the added capacities of the furnaces under construction in the United States on the first of January, 1890, will add to the capacity of the country fully a million tons. This is an under-estimate, probably. While production is never equal to capacity, we think that these figures fully justify the belief that, while there may be temporary shortages in given sections, it will be possible to produce in the United States in 1890 sufficient pig iron to answer the demands of our own works without depending upon other sources of supply.

In finished iron the annual net capacity of the rolling mills in the country was 9,215,000 tons. The net capacity of our Bessemer converters, of which there were 88, was 5,600,000 tons, to which should be added the capacity of the Clapp-Griffith converters, of which there were 14 in 1889, and the capacity of which was 200,000, and also the annual capacity of the Robert Bessemer converters, of which there were 11 completed and 3 building, with 123,000 tons, bringing up the total capacity for the production of pig iron to 5,925,000 tons.

There were, in addition to this, 116 completed open-hearth furnaces, 23 building and 2 nearly completed, with an annual capacity of 1,300,000 net tons. This gives a total capacity of steel ingots, outside of crucible ingots, of 7,125,000 tons. The total production of these ingots in 1888 was but 3,164,536 tons; the capacity in 1889 was not far from 5,000,000 tons. This would indicate an increase in 1890 of about 40 per cent, and as this increase in capacity is all new construction, it is probable that the actual increase would be even more than the apparent.

It would seem from the above, therefore, that there should be no difficulty in the country procuring in 1890 all of the iron and steel that it will need. As stated above, there may be temporary shortages in certain grades of iron or steel, or in certain sections, but we think it will be found that these shortages will come more from an accumulation of stocks in the hands of consumers who wish to anticipate their wants rather than from any actual shortage in production, and while shortages may cause temporary inconvenience and result in advance in prices, they will not be permanent, and will soon right themselves.

SAVED FROM CONSUMPTION.
Several physicians predicted that Mr. Asa B. Kowley, Druggist, of Chicago, would soon have consumption, caused by an aggravated case of Catarrh. Customers finally induced him to try Clarke's Extract of Flax (Papillon) Catarrh Cure. He says: "The result was unprecedented. I commenced to get well after the first application and it now, after a few weeks, entirely cured." He will do the same for you. Price \$1.00. Try Clarke's Flax Soap for the Skin and you will use no other. 25 cents. All of Clarke's Flax remedies are for sale by H. H. Stafford & Son, Marquette Mich.

WORK OF THE TORNADO.

Eleven Persons Killed and Fifty-Three Others Injured at the City of Clinton, Kentucky.

A HALF A HUNDRED HOUSES LEVELED AT THE SAME PLACE.

The Storm General Throughout the Country. The Wind Reaches a Frightful Velocity—Great Damage to Property.

SUNDAY'S TORNADO.

CAIRO, Ill., Jan. 13.—The tornado last night struck the east side of the city of Clinton, Ky., demolishing fifty-five houses, killing eleven people and wounding fifty-three. The killed are: J. A. Rhodes and two children; Mrs. William Bone; Barnett Bone; Walton Nance; John W. Goddie; an infant; an infant of Judge E. C. Hodge's and one other not identified.

IT BLEW SLIGHTLY.

ROCHESTER, N. Y., Jan. 13.—A hurricane prevails here. The wind is said to have reached the velocity of 75 miles an hour. Many buildings here have been partially demolished and several persons injured. George Welter was struck on the head by a falling chimney and killed. George Seward, an express wagon driver, was kicked in the head by his horse, which had been blown down by the wind. He fell and the horse rolled on him causing internal injuries from which he may die. The south wall was blown out of the Joslyn block on State street, falling and crushing a frame building. No one was injured. The roof of the Genesee brewery malt house, a part of the roof of Curtis Bros., canning factory and a part of the spire of St. John's church were blown off. There were many narrow escapes.

SEVEREST GALE OF THE YEAR.

CANTON, Ohio, Jan. 13.—Today's storm was the severest this year. The thermometer fell 30 degrees during the day and the wind blew a gale. Signs all over the town were blown down, gates were carried away and chimneys were demolished. The 80-foot pole erected by the democrats during the Cleveland campaign was blown over, the end going through a saloon roof and smashing things inside. It narrowly missed passers by.

OIL DERICKS BLOW DOWN.

BUTLER, Pa., Jan. 13.—The strong wind which prevailed this morning blew down a large number of oil derricks in various fields. The wires of the united pipe lines are down and communication with some of the districts is shut off.

BLOWN FROM THE TRACK.

MONTREAL, Jan. 13.—A dispatch from St. Helaire says a local train on the Grand Trunk railway from Actonville for Montreal was blown from the track today. The conductor, brakeman, mail clerk and three passengers were seriously injured and several other persons were slightly hurt.

GOT THE TAIL END.

OIL CITY, Pa., Jan. 13.—The tail end of the cyclone struck this section early this morning, doing great damage to property. At least one-fourth of the oil derricks in this neighborhood are destroyed. The telephone companies are also heavy losers. Nearly all their lines are down. There was no outside telephone communications until after 2 P. M.

CHURCH STEEPLE BLOWN DOWN.

PIESBOTT, Ont., Jan. 13.—The spire of the Presbyterian church here was blown down by the fierce gale which prevailed today. A large number of telegraph poles and other property was destroyed.

VIOLENT GALES.

WASHINGTON, Jan. 13.—Violent gales, accompanied by snow, prevailed over the lower lake region today. The following maximum velocities were reported: 30 to 45 miles on Lake Erie and Lake Michigan; 48 miles at Oswego; 60 miles at Rochester; 84 miles at Buffalo. The temperature has fallen 30 to 40 degrees lower in the lake region, and 20 to 30 in the Ohio valley. A cold wave is extending over the west gulf states, where the temperature has fallen from 10 to 20 degrees.

LOSS OF LIFE SMALL.

NEW YORK, Jan. 13.—Reports from nearly all of the New England states give accounts of the cyclone, last night and today. The damage is very great but the loss of life is very small. There were hundreds of incidents of narrow escapes.

Heathensh Barbarity.

NEW YORK, Jan. 13.—This morning passers-by were startled to see the dead body of a Chinaman with little or no clothing on lying in a gutter on Dovers street. The man had been left there early by a number of his countrymen to die. He had been ailing for some time and when it was found that his last hour was near the heathens thought they had better get rid of him. In consequence the unfortunate celestial died from exposure or rather his death was thereby hastened. The police arrested a number of Chinamen whom they found at the dead man's lodging house. All they could ascertain about the man was that he was a sailor. No one seemed to know his name.

Froze to Death.

KINGSTON, Ont., Jan. 13.—Gunner Stevenson, of Battery B, attempted to cross to the American side in an open boat during a blinding snow storm. He lost his way and was frozen to death in the bottom of the boat.

A Munitent Reward.

COLUMBIA, S. C., Jan. 13.—Governor Richardson today offered a reward of \$500 for the apprehension of David Ready, white, the perpetrator of the latest outrage in Barnwell county, on the 8th inst.

Lawrence Barrett's Condition.

BOSTON, Mass., Jan. 13.—Lawrence Barrett, the actor, has nearly recovered from the effects of the recent surgical operation performed on his throat. He will leave soon with his family for southern France. Rest and change, it is believed, will bring back his old-time strength and health.

STRUCK A BOX CAR.

A Passenger Train on the Ohio Road Wrecked. Engineer and Fireman Badly Hurt.

LIMA, Ohio, Jan. 13.—The south-bound passenger train No. 1 of the Cincinnati, Hamilton & Dayton railroad at 2 o'clock this morning ran into a box car at Milton station, north of this city, throwing the engine into the ditch on its side and piling the baggage and express car on top of it. Two passenger coaches were also derailed but the passengers escaped with a few bruises. Engineer John Herbes, who lives here, was caught under the engine and the hot water and steam from the broken pipes poured on him. When extricated the flesh on his legs was parboiled. Fireman Fred Herald was thrown from the cab clear out of the wreck and was seriously hurt. Both were brought here and are resting comfortably. Express Messenger J. N. Hoffman, of Toledo, had a shoulder dislocated and was badly bruised and cut. He was taken to his home in Toledo. The box car was blown from a siding to the main track by the wind. The engineer saw it and reversed his engine but could not stop in time. The tornado which prevailed here during the night did great damage to the oil fields, blowing down hundreds of derricks. Several buildings were unroofed, but no loss of life is reported.

MURPHY IS CHAMPION.

He Knocks Weir Out in the Fourteenth Round. Sullivan's Last Fight.

SAN FRANCISCO, Jan. 13.—The fight to a finish between Ike Weir, the "Bel-fast Spider," the feather-weight champion of the world, and Billy Murphy, the feather-weight champion of Australia, for a purse of \$2,350 took place at the California Athletic club rooms to-night. Before the fight, President Fulda announced that John L. Sullivan had agreed with an accredited representative of the club on the purse for which he would meet Peter Jackson in the last fight of his life. The amount is \$15,000 and Jackson has accepted the terms. By an unanimous vote the club announced its approval of the proposition and empowered the directors to make the match. The Weir-Murphy fight was a game one from start to finish. Weir was knocked out in the fourteenth round.

MUST TICKLE 'THE WETS.'

South Dakota Wanted Water But at one Place Too Much is Being Furnished.

WONSOCKETT, S. D., Jan. 13.—The artesian well here burst forth a six-inch column of sand and water today. The workmen abandoned their tools to escape and the engine was half buried. The lower parts of the town are flooded and hundreds of tons of sand fill all the low places. Five hundred dollars worth of unfinished water mains are full and a freeze-up will burst them. The roaring of the well can be heard blocks away and its force is increasing every hour. The column of water is twenty feet high. Over 7,000 gallons are flowing every minute and the pressure is 300 pounds to the inch. Great excitement prevails. No power can control the well at present.

More Whitecap Outrages.

INDIANAPOLIS, Ind., Jan. 13.—A Special to the Sentinel from Crothersville says yesterday morning at 1 o'clock a party of thirty masked men broke open the door of the house occupied by Andy Slate, a well-to-do farmer, pulled him from his bed, and demanded to know why he had disobeyed the orders given him to leave the country. He said he had done nothing for which he should leave. Thereupon one of the Whitecaps fired a revolver at him, the ball passing through his body, inflicting a horrible and fatal wound. The murderer then left, going to the house of John Warner, whom they pulled from his bed and gave a severe whipping. The cause for the outrage is unknown.

An Unfortunate Accident.

HUNTINGTON, W. Va., Jan. 13.—Rev. J. W. Johnson, of the M. E. church of this city, died at the parsonage yesterday morning from injuries received while passing through the ceremonies of the Royal Arch degree in the Huntington chapter Friday evening Mr. Johnson was accidentally precipitated from a slight elevation and sustained injuries which caused his death. No blame attaches to anyone for the unfortunate accident.

Suicide or Accident.

SPRINGFIELD, Ill., Jan. 13.—This afternoon Emil Miller, the 13-year-old son of A. G. Miller, a prominent citizen of Springfield, shot himself through the head, dying instantly. It is supposed to be a case of suicide, although the family claim that the shooting was accidental.

Two Section Men Instantly Killed.

FORT WAYNE, Ind., Jan. 13.—Last night after the limited express, going east, on the Pennsylvania road, passed Wheeler station, two brothers, Henry and Martin Reamus, employed on the road as section hands, started to run a hand car to Hobart and were run down by a locomotive that was running backward. Both were instantly killed. They leave large families.

A Cosy Blaze.

FORT MADISON, Ia., Jan. 13.—A cosy blaze occurred here at noon yesterday. The clothing and boot and shoe stock of J. G. Schwartz, worth \$50,000, was completely destroyed by fire and water.

Forecast of the Weather.

WASHINGTON, Jan. 13.—The signal service notes the following as its forecast for the next twenty-four hours: For Wisconsin and Michigan: Fair; lower temperature, Tuesday morning; followed by warmer weather; easterly winds.

Daisies Full Bloom.

LEXINGTON, Va., Jan. 13.—The remarkable weather here for weeks past has put all fruit trees in bloom, and wild and cultivated plants are blossoming in great profusion. The fields are full of daisies in full bloom. The temperature ranges from 79 to 90.

And the Frogs Sing.

BEDFORD, Ind., Jan. 13.—Vegetation is as far advanced here at present as it generally is in April. Crabapple trees are in bloom and frogs were singing last night.

TWENTY-THREE AND SIXTY.

A Big Breach of Promise Case Begun in New York.

The Plaintiff is Young and Beautiful, the Defendant Old and Married—Famous Lawyers on Each Side.

NEW YORK, Jan. 13.—A breach of promise of marriage case in which the damages are put down at \$100,000 began before Judge Ingraham in the supreme court today. The plaintiff is Miss Caroline J. Cammerer, 23 years old, the daughter of Robert Cammerer, of Philadelphia, and she is very handsome. Her interests are looked after by Daniel Dougherty. The defendant, Clemens Muller, is a retired real estate dealer, a man of family, and lives on Sixty-first street near Third avenue. He is about 60 years old and a prominent member of the Liederkranz society. Colonel Robert G. Ingersoll is his counsel. The plaintiff claims that she was born in moderate circumstances. At the age of 10 years she developed great musical talent and studied music and languages abroad. She met the defendant in Philadelphia in October '85 for the first time. When she came to New York he met her on her arrival and escorted her to the house of a friend. They went to various places of amusement and frequently went out walking together. During a ramble in Central park he proposed to her. Referring to the difference in their ages, he said:

HIS HEART WAS STILL YOUNG,

and that he had an income of \$18,000 a year, and would keep her in luxury. She gave him no decision then but on the 17th of December, 1885, in Philadelphia, he again proposed and she accepted him. Afterward she learned that he had a wife in the insane asylum. In answer to her demand for an explanation he said he would get a divorce and later he and his counsel assured her father that a divorce had been obtained in Indiana. She offered to release him from the engagement but he went to Philadelphia and she accepted her to become his wife more ardently than ever. In July '86 at Rhinebeck he introduced her as his betrothed and soon afterward they came to New York to make purchases for the wedding. He urged her to hasten the ceremony. She became ill, and when she recovered he proposed a mock marriage, which she indignantly refused. He never returned to see her since then though he wrote several times. These are the allegations of the plaintiff. The defendant denies them in toto.

Disappeared in the Storm.

ATCHISON, Kan., Jan. 13.—Henry Schook, a carpenter, temporarily deranged, tore the clothes from his body and left his bedroom and disappeared in the storm last night. A search for him proved futile. It is supposed that he perished in the storm and that his body is buried in a snow drift. He took a very large dose of medicine, which, it is thought, caused his derangement.

Struck a Fallen Tree.

PERU, Ind., Jan. 13.—The fast north-bound Chicago express on the Lake Erie & Western railway, struck a fallen tree at 4 o'clock this morning near Wagner's Station. The engine and chair car were derailed, and the baggage and express cars were thrown into the ditch. The messengers and the baggage men were somewhat bruised but all others escaped, uninjured. That the accident was not more serious is remarkable. The train was making up lost time. The damage is heavy.

An Italian Uses a Stiletto.

IRON MOUNTAIN, Jan. 13.—[Special.]—In a quarrel last night between a party of Italians, Don Quilo cut Creolo Capalino in the head with a stiletto. Capalino cannot recover.

'Mickey' Signs With the League.

HOLYOKE, Mass., Jan. 13.—'Mickey' Welch, the noted base ball pitcher, returned from New York tonight having signed a three year contract with the New York league club at the alleged salary of \$4,000.

Blown From Her Moorings.

DETROIT, Mich., Jan. 13.—The steamer Ossifrage, which is in winter quarters at this port, was torn from her moorings during last night's gale and was blown up the river to Belle Isle, where she stranded. She will probably be got off without damage.

CHICAGO MARKETS.

CHICAGO, Jan. 13.—The leading wheat futures ranged as follows:

	Open	High	Low	Close
No. 2 Jan.	77	77	77	77
Feb.	75 1/2	75 1/2	75 1/2	75 1/2
May.	82	82	81 3/4	82

Cash quotations were as follows: Flour, quiet and unchanged. No. 2 spring wheat, 64 1/4c; No. 3 spring wheat, 64 1/4c; No. 2 red, 76 1/2c; No. 2, 76c.

CHICAGO, Jan. 13.—The Drovers' Journal reports as follows: CATTLE—Receipts, 20,000; shipments, 3,000; market 10c lower; beefs, \$4.50@4.90; steers, \$3.00@4.25; stockers and feeders, \$2.25@3.15; Texans, \$1.00@4.00. HORSES—Receipts, 25,000; shipments, 2,000; market strong, 5 to 10c higher; mixed, \$3.55@3.80; heavy, \$3.55@3.80; light, \$3.55@3.80; skips, \$5.00@5.50. SHEEP—Receipts, 7,000; shipments, 2,000; market strong, 10c higher; natives, \$3.00@3.75; western corn fed, \$4.25@5.15; Texans, \$3.50@4.25.

* COPPER MARKET.

NEW YORK, Jan. 13.—Copper, dull, unchanged; lake, January 14.50.

OIL QUOTATIONS.

OIL CITY, Pa., Jan. 13.—Opened, \$1.04 1/2; highest, \$1.04 1/2; lowest, \$1.04 1/2; closed, \$1.04 1/2.

MINING STOCKS.

BOSTON, Jan. 13.—Alouez Mining company (new), \$1.50; Calumet & Hecla, \$25.00; Franklin, \$17.50; Huron, \$4.00; Osceola, \$26.75; Pewabic, \$8.00; Quincy \$72.00; Santa Fe, \$1.40; Tananack, \$160.00.

A NARROW ESCAPE.

Account of the Burning of the British Bark "British Monarch."

NEW BEDFORD, Mass., Jan. 13.—A letter has been received in this city from Captain Howland of the whaling bark Canton, dated at sea December 5th, and postmarked Capetown, in which he gives an account of the loss by fire of the bark British Monarch, 1262 tons, from Liverpool bound from Hamburg to Sidney with a general cargo. Captain Howland says: "I am on the way to Capetown, Cape of Good Hope with a part of the crew of the bark British Monarch. On November 29th, at 4 P. M. the crew of that vessel discovered the ship was on fire. They immediately tried to get at the tons of dynamite near the fire, intending to throw it overboard and start the ship for the Cape of Good Hope. But they could not get at the dynamite on account of the smoke. They then got the boats ready for an eight days' run, it being 600 miles from Cape Town. The boats put off from the ship about 9 P. M., intending to remain about until the next morning, but at 1 A. M. the fire reached the dynamite and it exploded with terrific force. Next morning nothing of the huge iron vessel was visible except a few pieces of the spars and decks. The second mate's boat separated from the rest and nothing has been seen of it since. The two boats contained Captain William Marrow, First Officer David Welsh and fourteen others." Captain Howland, although it was in the middle of the whaling season, started for Capetown with the rescued men.

GENERAL FOREIGN BUDGET.

The Portuguese Ministry Resigns. Great Excitement at Lisbon.

The Belgians Take Senator Morgan's Negro Emigration Talk Seriously—The Condition of the King of Spain.

PORTUGAL.

LISBON, Jan. 13.—The cabinet has resigned. Senator Pimental, the liberal-conservative leader, voted with the minority at the meeting of the council when the demands of England were acceded to. The minority was in favor of evacuating the Shire district, but opposed the other demands made by England, unless that country submitted the dispute to arbitration forthwith. There is much excitement in the city. Crowds paraded the streets last night crying "Viva Pinto" and "Viva Portugal."

BELGIUM.

BRUSSELS, Jan. 13.—The proposition to settle in the upper Congo country a colony of negroes from the United States meets with much favor here. It is thought that this would greatly facilitate the peaceful introduction of the ideas and methods of the industry and commerce of the civilized countries. King Leopold and all the Belgian merchants concerned in the African trade favor the scheme.

FRANCE.

MARSEILLES, Jan. 13.—The crew of a French steamer at this port maltreated a German sailor who had been sent ashore to lighten the hawser of his steamer because of a coming storm. Complaints of the affair were made to the French officers, but no attention was paid to them, and the German consul has complained about the matter to the authorities at Berlin.

LATER.—The German consul has settled with the French steamship company whose employes beat a German sailor. The company pays the sailor a small indemnity.

GERMANY.

BERLIN, Jan. 13.—Herr Von Lovtzw, president of the Reichstag, reported to that body today that the emperor yesterday in receiving the presidential bureau said it afforded him great pleasure and satisfaction that the general political situation appeared to fully assure the world's peace. He also announced that his majesty said it was in order to preserve peace it was necessary that Germany, in view of her geographical position, should not fail to maintain her military armaments in the highest state of efficiency and incessantly provide for the army and navy.

HUNGARY.

PESTH, Jan. 13.—The body of a prostitute was today found at Gruenne, near Presburg, with the throat cut and otherwise mutilated. The crime resembles those committed recently in the Whitechapel district of London.

In the lower house of the Hungarian diet today, Herr Baross, minister or public works, stated that the government had given extensive orders for the construction of war vessels so that when the work of removing the iron gates in the Danube is completed Hungary will have a river fleet to represent her. In regard to the rumors that Russia is trying to establish her authority on the lower Danube, Herr Baross said that the government is prepared to protect its interests there.

ENGLAND.

LONDON, Jan. 13.—The Globe declares that the reports that Lord Salisbury will dissolve parliament early in the coming summer are pure inventions. The paper asserts that the idea has not even been mentioned. Attorney-General Webster and Dr. Barnardo are prostrated with influenza. The trial began today of Claude Marks and Sidney Wolfe, joint proprietors of the Mining Record, and Mr. Marx, of the Financial Times, who were indicted for blackmail growing out of an attempt by the accused to obtain money for the suppression of articles affecting a gold mining company. The attorney-general declared that the prisoners practically said: "Unless you buy us we will publish articles in the Mining Record that will damage your property."

SPAIN.

MADRID, Jan. 13.—Alfonso's condition continues to improve and his restoration to perfect health is now considered certain.

Girls' High School Burned.

SAN FRANCISCO, Jan. 13.—The girls' high school was burned to the ground last night. The loss is \$30,000.

The annual meeting of the stockholders of the Peninsular Gold Mining Co. will be held at the office of the company, No. 8 Butler Block, Detroit, Michigan, at 10 o'clock a. m., on Tuesday, the twenty-first day of January, 1910. A board of directors will be elected, and such other business transacted as may properly be presented at said meeting. **FRED T. MOLAN**, Secretary. 72-2092

THE GODDESS OF LIBERTY RECOMMENDS **FINE LINE CRACKERS.** Orders Filled on Short Notice. HER SUBJECTS AT MARQUETTE —To Trade With— **DELF, THE BAKER.** AN OPEN LETTER. From a Well-Known Druggist. "Positive" Cure for Stomach Troubles.

To Whom It May Concern: In the summer of 1908 I was first afflicted with that most dreaded disease, dyspepsia, and for over a year I suffered terribly at times, and I mean to state I tried every so-called remedy in my power, without finding relief. Having been in the drug business since 1881, I determined to buy myself if I lay in the power of medicine. Two years ago I succeeded in discovering the true cause. Until I had given ample time for possibility of doubt, however, I kept my secret almost to myself, putting up the medicine for only a few of my sorely troubled friends, every one of whom was cured. I now know the medicine to be a positive cure. My discovery may do humanity all possible good. It will be known as "Brooks' Positive Dyspepsia, Liver and Kidney Cure," which is guaranteed to cure all ailments of the stomach, liver and kidneys. I have a number of testimonials which afflicted parties may be interested in. **R. BROOKS**, 416 Cass Ave., East Saginaw, Mich. Sold by all Druggists. \$1.00 a bottle; 3 bottles \$2.50.

F. H. W. BAILEY, Taxidermist. BIRDS and ANIMALS mounted to order. Deer Heads a specialty. MARQUETTE, Mich.

An Open Circuit.

By some unfortunate circumstance, the half-night circuit was opened somewhere along the line yesterday, and the portion of the city that it lights was consequently left in darkness last night. The defect will be located to-day and remedied.

The mishap was particularly unfortunate last night as the sidewalks and streets were in so bad a condition that good illumination was very necessary.

Outstripping Competitors.

The American Manufacturer, of Pittsburgh, Pa., has the following account of the year's work done by the Westinghouse Electric Co. This is the company whose system has been employed in the incandescent electric lighting of Marquette.

The year which has just closed has been the most eventful in the history of the Westinghouse Electric company. The business done during the year 1889 surpassed anything ever hoped for.

The company now has 256 central stations distributed throughout the country and abroad, which are fitted up with Westinghouse alternating current apparatus. The contracts for 134 central stations were secured during last year, making the business of that period exceed the combined amount of the previous years since the organization of the company in 1886.

These 134 central stations represent an aggregate capacity of 234,350 incandescent lamps. This does not include the various increases which were also contracted for by various companies already established.

To show the enormous growth of the concern, the following comparative facts may be interesting:

In January, 1889, the company employed 650 men in their works on Garrison alley, Pittsburgh, Pa. During this year, however, many improvements were necessitated, and to-day the company employs 1,300 men in Pittsburgh alone. A new building of five stories was built during the year for the detail department, a pottery and a laboratory. In the detail department the alternating current meters are made. The production of that article has increased 400 per cent during the year. In the pottery, which, by the way, is a complete factory, switches, cut-outs and other devices are made. The laboratory has been fitted up with all those requisites which make a place of that kind perfect, and the Westinghouse laboratory is now considered by those who have visited it, the finest and most complete in the country.

The machine shop has been repeatedly enlarged to meet the demand made upon it by the increasing number of contracts. Several new engines were put into the building, and a new battery of boilers, consisting of two Babcock and Wilcox boilers, 500 horse-power each.

The lamp factory of the company was removed during the year to New York, to give more room to the converter department.

In March, 1889, the company started in the arc lighting business by absorbing the Waterhouse Electric and Manufacturing company, of Hartford, Conn. This gave a fresh impetus to that business, and the number of Waterhouse machines sold since then has been large.

During the year the company also established a branch in London, England, for the purpose of taking care of the European business, and the accounts received from there are very promising.

TALK OF THE TOWN.

An infant son of D. C. Mulvihill died yesterday. The funeral will be held at 2 p. m. to-day.

In one department of the public schools, enrolling 81 pupils, only 13 were present yesterday. Bad weather and la grippe.

The co-partnership of G. H. Weller and J. B. Taylor does not include the hotel business. It only covers the Summit House bar.

The annual meeting of the Young Men's Christian Association was called to order last evening and, at the request of the committee on nominations, adjourned for two weeks.

Iron Port says it cannot name the style of the new city building Escanaba will erect next summer, but it looks pretty. Mr. R. A. Parker has christened it Charlottesque.

The base ball folks should profit by last year's experience and begin early their plans for the coming season's sports. Valuable experience was about all last season yielded, and that should not be allowed to go to waste.

The Mining Journal has a letter from Charles McIntyre wherein he speaks of a jolly Christmas dinner with a settlement of half a dozen ex-Marquette citizens who are ranching on the McKinzie river in Oregon.

The plans of the new ice house for the Lake Superior Ice Co. have been completed by Architect Charlton and will be at once submitted to contractors for estimates. According to design, the building will be 34x130 feet, and 24 feet from sill to plate.

Sheriff Adams' boarders did noble service yesterday. The snow plow had scratched over the walks around the court house square and left them in such shape that something had to be done to render them passable; so Sam Bennetts called out the boys and, by dint of hard shoveling, the walks were cleared.

In the matter of city buildings, Marquette is falling to the tail end of the procession. Escanaba has already accepted a handsome design for a city building, a design for a magnificent structure will soon be submitted to the Ishpeming council, and Negaunee is getting there with both feet. Marquette seems content with two or three antiquated structures. But that can be endured in the interest of economy if the county will build a respectable court house and some enterprising citizen or aggregation of citizens will erect that much-needed opera house.

A Pocket Mirror Free to Smokers of TANSILLS PUNCH 5¢

PERSONAL MOVEMENTS.

Mr. H. Muehall left yesterday for Detroit on railroad business.

Lieut. Col. Edward Ellis, of the 2nd Regt. M. S. T., is in the city.

Mr. William Coach, the Baraga lumber man, is looking after business interests here.

General Freight Agent William Orr returned yesterday from an extended eastern trip.

AT THE HOTELS.
HOTEL MARQUETTE.—Wm Coach, Baraga; J. A. Rice, Joel Schoenberg, Chicago; J. I. Pasco, Humboldt; Geo. H. Orr, Manistique; J. McIntyre, Munising.

NEW CLIFTON.—A. C. Noble, Ashland; Chas. E. Taft, Washington, D. C.; F. Colan, Chicago; E. D. Egan, Grand Rapids; George Craig, Chassel; Frank Anderson, Detroit; T. Dorelan and wife, Pequaing; J. Jones, New Mexico; H. E. Soper, Detroit.

The Baltimore Leaves Cramp's Yard.
PHILADELPHIA, Jan. 13.—The United States cruiser Baltimore left Cramp's shipyard this morning for Baltimore. The crew is composed of picked sailors from the different vessels of the navy, many of them being survivors of the ill-fated Trenton, which was lost at Samoa.

Better Than a Cat.
The barn owl, when she has young, brings to her nest a mouse about every twelve minutes, and, as she is actively employed both at evening and at dawn, and as male and female hunt, forty mice a day is the lowest computation we can make. How soft is the plumage of the owl, and how noiseless her flight? Watch her as she floats past the ivy top, down by the ricks, and silently over the old wood; then away over the meadows, through the open door and out of the loop-hole of the barn, round the lichened tower and along the course of the brook. Presently she returns to her four downy young, with a mouse in one claw and a vole in the other, soon to be ripped up, torn and eaten by the greedy, snapping imps. The young and eggs are found in the same nest. If you could see the midday sista of these birds, climb up into some haymow. There in an angle of the beam you will see their owlish sneering and blinking while their great round eyes, their feet and beak, and how noiseless her flight! Watch her as she floats past the ivy top, down by the ricks, and silently over the old wood; then away over the meadows, through the open door and out of the loop-hole of the barn, round the lichened tower and along the course of the brook. Presently she returns to her four downy young, with a mouse in one claw and a vole in the other, soon to be ripped up, torn and eaten by the greedy, snapping imps. The young and eggs are found in the same nest. If you could see the midday sista of these birds, climb up into some haymow. There in an angle of the beam you will see their owlish sneering and blinking while their great round eyes, their feet and beak, and how noiseless her flight! Watch her as she floats past the ivy top, down by the ricks, and silently over the old wood; then away over the meadows, through the open door and out of the loop-hole of the barn, round the lichened tower and along the course of the brook. The young and eggs are found in the same nest. If you could see the midday sista of these birds, climb up into some haymow. There in an angle of the beam you will see their owlish sneering and blinking while their great round eyes, their feet and beak, and how noiseless her flight! Watch her as she floats past the ivy top, down by the ricks, and silently over the old wood; then away over the meadows, through the open door and out of the loop-hole of the barn, round the lichened tower and along the course of the brook. Presently she returns to her four downy young, with a mouse in one claw and a vole in the other, soon to be ripped up, torn and eaten by the greedy, snapping imps. The young and eggs are found in the same nest. If you could see the midday sista of these birds, climb up into some haymow. There in an angle of the beam you will see their owlish sneering and blinking while their great round eyes, their feet and beak, and how noiseless her flight! Watch her as she floats past the ivy top, down by the ricks, and silently over the old wood; then away over the meadows, through the open door and out of the loop-hole of the barn, round the lichened tower and along the course of the brook. Cleveland Iron Mining Co. stock wanted.

More Snow.

Another blizzard struck this neck o'woods Sunday and it kept right on raging all yesterday. The railroads were embarrassed considerably by the storm. The Milwaukee passenger on the Northwestern, due to leave here at 6:24, did not get out until almost 8 o'clock, and then was able to get away from the depot only with the assistance of a double header and a pusher. The morning freight on that road came down from Republic nearly on time, with a light train, but the engine was covered from top to bottom with snow and ice. The Northwestern mail from the south did not get here until nearly three o'clock, having lost nearly all the time it was behind north of Oconto. The South Shore trains, with the exception of the Boston limited, which was three hours late, and the west-bound Houghton express, which was seven hours behind, were but slightly off their schedule time. But few freights were run on the South Shore.

In the city the authorities put men at work on the street crossings, and by noon the streets were in pretty good condition. Outside of town, though, the roads are in very bad shape, and it will be several days before they are fairly passable.

Was Acquitted.

Ishpeiming people have watched with considerable interest the developments in the case of Dolph Gabourie, under arrest at Escanaba charged with assaulting a man with intent to do great bodily harm, from the fact that Gabourie had made this place his home for several years. His trial took place at Escanaba Saturday, and the result was as nearly every one expected—an acquittal. The arrest of Gabourie was in consequence of the death of a lumberman named Jones, whose demise was caused indirectly by a blow from Gabourie's fist. Jones was abusive to Gabourie, and the latter struck him in the nose. Jones bled profusely from that organ, and instead of placing the man on his face he was put on his back. He was so drunk that he could not help himself, and was soon strangled by the flow of blood. Gabourie was arrested and bound over to the January term of court, when he had his trial, with the result as above stated.

KNOCKED OUT—Prices have been knocked out on Overcoats and Pea Jackets at L. W. ATKINS & CO'S.

SOLD OUT—The bulk of our Overcoats are sold but we have splendid values left that must go. L. W. ATKINS & CO.

CLEANED OUT—We are nearly cleaned out of Mufflers, but those handsome ones remaining will be sold very cheap. L. W. ATKINS & CO.

Sleeping Car Accommodations

AN ISHPEMING BURGLAR.

He Entered a House Saturday Night But Didn't Secure Much Swag.

Good Move by the C. & N. W. Railway—Quite A Plenty of Snow—Gaborie Acquitted.

Burglars Again.

Mr. O. B. Robinson's house was entered Sunday night by a burglar, but his mission was a fruitless one. Access to the house was gained through a rear window. The thief selected a good coat, and was evidently about to continue his search when he was frightened by some noise. He made a hurried exit through one of the front doors, leaving the coat behind. The inmates of the house knew nothing of the occurrence until morning. Then Mr. Robinson endeavored to track the man, but the path was so badly drifted and so many people had passed over the road that he was forced to give it up. The fellow is probably the same one who entered a couple of houses a month ago, and very likely is some promising local amateur. Householders will do well to lock their doors and windows securely, for the chap who made Mr. Robinson a visit Sunday night is still with us.

Air Brakes on Ore Cars.

From the Escanaba Mirror it is learned that the local management of the Chicago & Northwestern road has decided to equip all of its twenty-ton ore cars with air brakes. The appliance has been put on 20 cars already and the balance will be equipped as rapidly as possible. The work is being done in the shops there, under the supervision of Master Mechanic Clark. The idea is a good one, and the brakes will undoubtedly pay for themselves in a short time in the gain in speed of ore trains and in preventing wrecks. While the small, one-truck cars were in general use, air brakes could not be used. There are usually sixty-five of these cars in a train, and with so many hose couplings to make it would not be practicable to use air brakes. From 25 to 30 double-truck cars constitute a train, and there is no doubt that the scheme will work to the entire satisfaction of the road. The trains can be run much faster, and with less danger, for a loaded ore train is an unwieldy thing to stop with hand brakes.

Dissolution of Co-Partnership.

Notice is given that the co-partnership heretofore existing between C. Merryweather and James Lucks under the firm name of James Lucks & Co., is this day dissolved by mutual consent. C. Merryweather retiring. James Lucks will continue the business, receiving all dues and assuming all liabilities. C. MERRYWEATHER, JAMES LUCKS, Ishpeiming, Mich., January 2, 1890. 9-6-11

DETROIT, MICH. MANUFACTURERS OF

VERTICAL AND HORIZONTAL ENGINES, SHAFTING, PULLEYS AND HANGERS.

BOILERS OF ANY DESCRIPTION, CASTINGS & FITTINGS OF ALL KINDS.

SEND FOR CIRCULARS.

Satisfaction guaranteed. Correspondence solicited. C. J. O'HARA, General Manager.

ISHPEMING IN BRIEF.

The number of children sick in this city is surprising.

A boy was seriously hurt at the Cleveland location Sunday.

The Ishpeiming steam laundry is doing a rushing business now.

The convention of the Scandinavian Benevolent lodge delegation was held here yesterday.

One of the most prominent members of the Shin Fane club has the "grip." He says that as soon as he gets the pass-word he will be fully initiated.

Mr. Thoney, of the bottling work company, has just recovered from an attack of La Grippe. He expects to have the establishment running in a week or so.

Mr. Thomas Mack returned yesterday from Detroit, bringing with him a fine enlarged portrait of Bishop Vertin, which the firm for which he is agent executed.

It may be fun to be a railroad engineer in the summer, but the position loses its charm in the winter. If you don't believe it just look at some of the engines as they come in. The engineers and fireman, as well as the locomotives, are covered with snow, and many times the men are wet through to the skin. Just see them shovel the snow out of the cab when they stop, and you'll be convinced that their pathway is not strewn with roses when the line is strewn with snow-drifts.

GOT OUT—We have gotten out special inducements on seasonable goods that must be sold. L. W. ATKINS & CO.

KICKED OUT—The bottom will be kicked clean out of some lines of goods that we do not want to inventory. L. W. ATKINS & CO.

Prepare for Winter Buy your Storm Sash from C. J. BYRNS. 11-18-11

Ishpeiming business Notices.

ALL subscriptions to the DAILY MINING JOURNAL, in Ishpeiming must be paid to the authorized representative of the company, Fred Dougherty. Carriers are not authorized to collect subscriptions.

WANTED—A janitor for the A. O. U. W. hall. Applications may be made to the undersigned, or to R. McSwain. Full information as to rights the hall is occupied, etc., furnished on application. A. W. GIBBS, Recorder Ishpeiming Lodge, No. 113, A. O. U. W. [2-13-11]

FOR RENT—Three furnished rooms. Apply to "W. MINING JOURNAL" office. 10-1

FOR RENT—A five-room cottage on North Oak street. Apply at MINING JOURNAL office, or to GUS LAYLLE, Corner Market. 11-29-11

FLANNELS and heavy winter goods cheap at S. Johnson and Co's. 9-6-11

SHOES at Donahoe's. 9-6-11

PEA JACKETS, at Donahoe's. 9-6-11

UNDERWEAR suitable for the season, a big stock at low prices, just received at Donahoe's. Call and see their stock before paying higher prices for inferior goods. 9-6-11

BEST GROCERIES, at Donahoe's. 9-6-11

BEEF, mutton, pork and poultry bought at S. Johnson & Co's meat market, North Second street goes further than what other dealers sell: full weight, superior quality and low prices. 9-6-11

CLOTHING, cheap now, at S. Johnson & Co's, corner Bank and Second streets. Pea jackets, just the thing for wearing in cold weather, at very low prices. 9-6-11

Dissolution of Co-Partnership.

Notice is given that the co-partnership heretofore existing between C. Merryweather and James Lucks under the firm name of James Lucks & Co., is this day dissolved by mutual consent. C. Merryweather retiring. James Lucks will continue the business, receiving all dues and assuming all liabilities. C. MERRYWEATHER, JAMES LUCKS, Ishpeiming, Mich., January 2, 1890. 9-6-11

How Labor Day Originated.

In the spring of 1882, General Secretary P. J. McGuire, of the United Brotherhood of Carpenters, first originated the observance of a distinct and new holiday—with parade and picnic—to be known as "Labor Day." He brought the idea to several labor men and then to the Central Labor union of New York, and got them to adopt it. The first Monday in September, 1882, was agreed upon as the day for the first public observance of "Labor Day." The first attempt was deemed to be so successful by the Central Labor union that it decided to celebrate the first Monday in September every year as labor's holiday. The plan was then introduced to an annual convention of the American Federation of Labor, and by the general assembly of the Knights of Labor. The idea met with favor in other cities and states, and the labor organizations in them observed the day in various ways—by parades, festivals, excursions, or meetings, and have continued to do so.—Carpenter.

A Long Felt Want.

Able Editor—Want a position, eh? Do you understand the tariff question? Applicant—Um—to tell the truth, I don't know anything about the tariff. "Are you familiar with international law?" "No; can't say I am." "Have you followed up the various African and polar explorations, and have you all the localities at your finger ends, so that you could write column after column on the subject without exhausting yourself?" "I never took any interest in such things." "Are you thoroughly familiar with English, French, German and Russian politics?" "Don't know anything about European squabbles and don't want to." "Young man, take that desk there. I shouldn't wonder if you could make a paper that sensible people would like to read."—New York Weekly.

About Brain Wear.

It is very desirable to have what quietness is possible during brain work, and the necessity for proper ventilation as a means of maintaining mental energy is well known. It might lessen brain wear in many offices if electric lighting were substituted for gas illumination. Good digestion is essential to continued work with good lasting power. Late rising and a hurried breakfast, a still more hurried luncheon and rush back to work, followed at the conclusion of the day by a heavy meal when the man is wearied, often tend to exhaustion, as much as the unavoidable pressure of business. A more rational refreshment after heavy brain work is to partake of light refreshment and then rest for half an hour before dinner; thus the power of digestion and social enjoyment are restored to the man.—British Medical Journal.

FOR WANT OF BREATH.

A poor city babe lay dying one day On a ragged and dirty cot. Lay quietly gasping its life away In a basement squalid and hot; O God! for a sniff of cool, sweet air— Just one for the child and its mother; For the heart that bleeds so helplessly there, And the babe that must lie there and smother.

The farmer's boy is a cheerful sight As he sits on the floor in the sun; How he dobles his fist in mimic delight. How lusty his grief and fun! Oh! full of life all day is the breeze From the fields of the farmer coming. For it dangles awhile 'mid leafy trees, And awhile where bees were humming.

The fisherman's boy is at play on the sand— How sturdy and plump he grows! There is strength in the grip of his chubby hand, And his lips are as red as a rose. Oh! sweet are the breezes born at sea, And cradled in white foam flowers. Sweetly cool, when waves are like grass on a lea, Cool and keen when a temperate lass.

The babe in the tenement house is dead. With nose but its mother to weep; Then lay it to rest in that narrow bed Where the sleepers breathe not in their sleep. Oh! breezes that waft me will always, If ashore or where sea sent is flying, There are thousands of poor city babes today That are smothering, fainting, dying. —Chicago Herald.

Gloves in Early Times.

Gloves date back to a very remote period, the ancients not being strangers to their use, and by the eleventh century they were universally worn.

In a tomb in Egypt a pair of striped linen mittens were found that had been worn by a lady. Xenophanes alludes to the Persians wearing gloves, and gives it as a proof of their effeminacy; and Homer describes Laertes at work in his garden wearing gloves, to secure him from the thorns. The Romans were severely upbraided by the philosophers for wearing gloves, but these reproaches had no effect in diminishing their use—they were too convenient and comfortable to be lashed out of being by the tongue of philosophy. They do not appear to have been worn in England until the beginning of the eleventh century, and were of German manufacture.

In the course of time, a great deal of ornamentation was used on the gloves in England. The effigies of Henry II and Richard I had gloves adorned with precious stones, and real gloves ornamented with jewels were found upon the hands of King John and Edward I, when their tombs were opened during the last century. Gloves were even ornamented with crests and armorial bearings. The ecclesiastical were always richly adorned.

They were made of silk or linen, embroidered and jeweled. A pair preserved at New College, Oxford, are of red silk, with the sacred monogram surrounded by a glory, and embroidered in gold on the backs. Pope Boniface VIII had gloves of white silk embroidered very beautifully and studded with pearls.

About the year 1690 leather gloves appeared. They were embroidered, adorned with pearls and gems and trimmed with lace. Perfumed gloves, too, made their appearance and were very popular with the ladies. We are told that Queen Mary Tudor had a pair of "wrote gloves" sent to her by a Mrs. Wheeler. The college tenants of Oxford had perfumed gloves presented to them, as well as distinguished guests. The custom went down after the reign of Charles I.—Montreal Star.

The Shah of Persia.

At the visit of the shah of Persia to Waddesden manor, the country seat of Baron Ferdinand von Rothschild, he inspected the treasures and antiquities of the baron, but was pleased most with a jewel set mantle clock, which is a veritable work of art. The central figure of this clock is that of an elephant, which when the clock is wound, begins to wig his golden tail, move his jeweled trunk, shake his large ears and turn a small diamond eye; then upon the lotos flowers, a form of jewels, at his feet, begin to open, a procession passes by, and from under the enameled leaves of the bushes snakes and other reptiles crawl out. The shah was exceedingly charmed with this costly toy, which had constantly to be wound again for his delectation, and his bewilderment demonstrated that the illustrations shahian shah were indeed to all the treasures owned by Rothschild. Artifices had finally to be resorted to to attract his attention to other things, for fear he might express a desire to possess it.—Jewelers' Circular.

How Labor Day Originated.

In the spring of 1882, General Secretary P. J. McGuire, of the United Brotherhood of Carpenters, first originated the observance of a distinct and new holiday—with parade and picnic—to be known as "Labor Day." He brought the idea to several labor men and then to the Central Labor union of New York, and got them to adopt it. The first Monday in September, 1882, was agreed upon as the day for the first public observance of "Labor Day." The first attempt was deemed to be so successful by the Central Labor union that it decided to celebrate the first Monday in September every year as labor's holiday. The plan was then introduced to an annual convention of the American Federation of Labor, and by the general assembly of the Knights of Labor. The idea met with favor in other cities and states, and the labor organizations in them observed the day in various ways—by parades, festivals, excursions, or meetings, and have continued to do so.—Carpenter.

A Long Felt Want.

Able Editor—Want a position, eh? Do you understand the tariff question? Applicant—Um—to tell the truth, I don't know anything about the tariff. "Are you familiar with international law?" "No; can't say I am." "Have you followed up the various African and polar explorations, and have you all the localities at your finger ends, so that you could write column after column on the subject without exhausting yourself?" "I never took any interest in such things." "Are you thoroughly familiar with English, French, German and Russian politics?" "Don't know anything about European squabbles and don't want to." "Young man, take that desk there. I shouldn't wonder if you could make a paper that sensible people would like to read."—New York Weekly.

About Brain Wear.

It is very desirable to have what quietness is possible during brain work, and the necessity for proper ventilation as a means of maintaining mental energy is well known. It might lessen brain wear in many offices if electric lighting were substituted for gas illumination. Good digestion is essential to continued work with good lasting power. Late rising and a hurried breakfast, a still more hurried luncheon and rush back to work, followed at the conclusion of the day by a heavy meal when the man is wearied, often tend to exhaustion, as much as the unavoidable pressure of business. A more rational refreshment after heavy brain work is to partake of light refreshment and then rest for half an hour before dinner; thus the power of digestion and social enjoyment are restored to the man.—British Medical Journal.

How Labor Day Originated.

In the spring of 1882, General Secretary P. J. McGuire, of the United Brotherhood of Carpenters, first originated the observance of a distinct and new holiday—with parade and picnic—to be known as "Labor Day." He brought the idea to several labor men and then to the Central Labor union of New York, and got them to adopt it. The first Monday in September, 1882, was agreed upon as the day for the first public observance of "Labor Day." The first attempt was deemed to be so successful by the Central Labor union that it decided to celebrate the first Monday in September every year as labor's holiday. The plan was then introduced to an annual convention of the American Federation of Labor, and by the general assembly of the Knights of Labor. The idea met with favor in other cities and states, and the labor organizations in them observed the day in various ways—by parades, festivals, excursions, or meetings, and have continued to do so.—Carpenter.

LIFE SAVING STATION.

Plans Prepared and Contracts to be Let in March for the Marquette Station.

FISHERMEN REPORT POOR LUCK FOR THE SEASON JUST CLOSED.

A Lake Superior Zephyr—Simply Meeting the "Soo Rates"—Married—Born. Died Among Strangers.

Marquette Life Saving Station.

A letter has just been received from Washington which removes all doubt about the erection of a life saving station at Marquette. The matter has been quiet so long that it seemed to have received a final quietus, although an appropriation has been made for the buildings. The letter referred to is signed by Albert M. Read, chief clerk of the life saving service, and is addressed to Mr. J. M. Wilkinson, chairman of the board of water and fire commissioners. Mr. Read says: "Arrangements are being rapidly perfected for the erection of a life saving station at Marquette and we hope to advertise for proposals for constructing the necessary buildings some time in March. The plans and specifications are nearly ready and permission has been obtained from the lighthouse board to occupy the desired land on its reservation, provided the rights granted by the leases of your board are not interfered with or are satisfactorily adjusted. Such an adjustment as to the dock, is now the only thing needed."

The letter enclosed a blank form of conveyance and the board of water and fire commissioners will hold a meeting soon to execute the conveyance in accordance with the plans of the life saving service as indicated by the tracing which also accompanied the letter.

The tracing is a blue-print of a plat showing the positions which the service desires to occupy. By this print it appears that the site selected for the boat house and launching ways is inside and adjoining the breakwater at the west end of the inlet cribs and about 35 feet south of the pump house. The dwelling will be erected near the west end of the lighthouse reservation at the foot of Arch street, and midway between that and the light house will be a lookout tower, upon an elevation which rises 32 feet above the mean water level and commands a clear view of the lake and shore in all directions.

An important object is gained by the location of the launching ways inside the breakwater. The crew will thereby be enabled to get their boats under good headway before striking a heavy sea.

Fisherman's Luck.

The fishing season has practically closed. The reporter is informed that a gang of nets belonging to Goodwin, is still in the vicinity of Grand Island and that the tug Ethel J. will make an effort to find it as soon as the weather permits, if ice does not form too soon. The Ethel J. made one long trip last Saturday and succeeded in finding a gang that had been lost for several weeks. The haul amounted to 1600 pounds, much of which, however, had to be rejected.

The tugs City of Marquette and Rose ceased operations nearly two weeks ago.

Fishermen report a very poor season so far as the supply was concerned. Markets were strong, but the catch was much smaller than that of the preceding season, which, in turn, was not so good as the season before. Fishes are social creatures and move in immense schools. They change their feeding grounds almost every season, and a certain locality may swarm with fishes throughout one season and be deserted the next. Local fishermen have an idea that the fog whistle tends to drive the finny creatures far out into the lake. They also attribute the scarcity in this vicinity largely to the fishing operations near Grand Marais two years ago at which time the schools were apparently headed westward from the foot of the lake.

Most of the season's work was done in the neighborhood of Grand Island and several gangs were set near Standard Rock. Very little fishing was done near port for the reason that there was little to get. Lake trout comprised about two-thirds of the season's catch.

Typical Lake Superior Weather.

Lake Superior people are seldom deprived of the weather that is their just due in each season. The heavy winter storms may not appear early, but they are quite certain to arrive before winter has ended.

The storm of yesterday morning was a typical Lake Superior winter storm. The wind blew a gale from the northwest and carried blinding clouds of snow. The temperature was not uncomfortably low. During the eight hours duration of the storm, the average depth of the snow was increased at least one foot.

Trains were delayed on all roads in this region. But for time lost in waiting for connections, the passenger trains on the D., S. S. & A., with two exceptions, would have made their

schedule time. The first exception was the Boston limited, due at 8:05 A. M., but arriving 3 hours behind time. The Houghton passenger was stalled at Bruce and had to run back for another engine. It entered Houghton an hour late. The Houghton express was held at Mackinaw City for Michigan Central connections and did not arrive here until 9:30 P. M. The Detroit express did not wait for M. & N. and C. & N. W. connections, and arrived here on time. The Duluth express and Marquette passenger were likewise on time.

In the city, the drifts were not deep enough to effect a serious blockade. The snowplow service was practically worthless. It devolves upon the street committee to see that this service is properly performed hereafter or take the contract from Mr. Largeness and give it to some one who can do the work, at a higher figure, if necessary.

Not Interested in It.

There is a current impression among the general public that the Duluth, South Shore & Atlantic is engaged in a rate war with the Chicago-St. Paul lines. The South Shore has no active interest in that contest which was initiated by the Chicago-St. Paul lines and the Minneapolis, Sault Ste. Marie & Atlantic.

The South Shore road has no concern in the fight further than to meet the rates established by the other Soo line. It has done that and will continue to meet every cut made by the latter road.

Tally One More.

Mike Day, one of the squarest, fairest and ablest of the Marquette league nine, has made another "tally" and the "umpire" declares him "safe on home base." It was a "close decision" because Mike tried to "slide in" unobserved, but the attempt was discovered in time and the proud runner is receiving the plaudits of the spectators in the grand stand.

Michael Day and Miss Anna Oakes were married yesterday morning by Rev. Father Langan, at St. Peter's cathedral. Miss Oakes is a granddaughter of James McRae, the well-known head blacksmith at the Iron Bay works.

Births.

A daughter was born to Mr. and Mrs. Napoleon Constant last Saturday.

The radiant smile which illuminated the features of Conductor Dan Loftus last Sunday, indicated the existence of some special felicity. Investigation showed that it was due to the arrival of a baby boy on Sunday morning. All are doing well.

The Father is Heard From.

The relatives of young Bancroft, who died of typhoid fever at the Emergency hospital last week, have at last been located. A telegram has been received from his father at Guelph, Ontario, asking that the remains be held for him as he will arrive here soon.

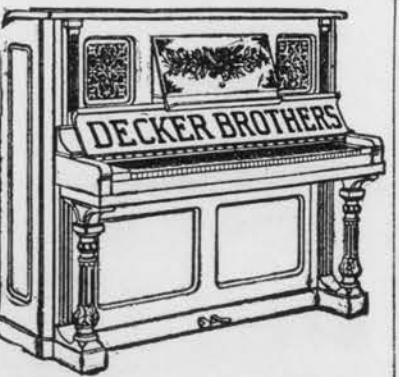

The telegram was received too late to prevent the interment, the body having been buried here last Saturday. It will be raised, however, and committed to the change of the young man's father as soon as he claims it in person.

M. S. Bancroft was 23 years old and was, during the fore part of last season, the cook on the tug Goodman, and during the last six weeks of his season's work he, did the same service on the tug Adams. When he fell ill he was taken to the marine department of the Emergency hospital, and as soon as it was known that death was near, efforts were made to find his relatives; but without success, until as above stated. His rational moments during illness were few and no definite information about his friends could be obtained from him.

Oysters.

For only 25 cents a can at Steele & Lohdell's.

For Green Bay, Take the Milwaukee & Northern railroad.

AS STRICTLY FIRST-CLASS, these Pianos are UNQUESTIONABLY the LOWEST-PRICED Instruments in the World—QUALITY CONSIDERED. They are conceded by other piano manufacturers to be the MOST CAREFULLY and CONSCIENTIOUSLY MADE of any instrument manufactured in this country; and are justly celebrated for QUALITY of TONE, PERFECTION IN ACTION and KEEPING IN TUNE. "The Sleeping Fox Catches No Poultry."

It is often the case that the backward boy will, when the opportunity presents itself, far outstrip those whose earlier advantages have been far superior. The UPPER PENINSULA BUSINESS COLLEGE offers to all such young men this opportunity. It gives them a Thorough Business Education, then aids them in securing a position in the business world, where true worth will secure to them a proper compensation.

Come to our office and talk the matter over with us. We can aid you if you will but give us the opportunity.

Catalogue on application.
