Mr. Cannon (Ills) said that the resolution was simply a proposition that under the rules, the house should proceed at once to consider a bill of great interest to the country. The minority could offer every amendment to the bill that they could under the general rules. The minority, which was now clamoring for free coinage, had held the house in the forty-ninth and fiftieth congresses but had passed no bill for free gresses but had passed no bill for free coinage. The largest are a yard square and the designs are conventionalizations of still life done in bold lines. Venetian cotton, Italian satin and grass linen make inexpensive and very excellent coverings, and the needle work is done in crewels or flax. The newest are round and have two fitted pieces at top and bottom which are laced together over a puff of satin or soft silk. Monograms and crests, mottoes and conventionalized floral patterns form the embroideries. Japanese stuffs are

much in demand for their fabrication. Queen Anne darning makes an admirable background for a design, but used without a diaper pattern is not effective as a filling. There is a fancy for appliquing squares of linen to plain satin pillowslips, previously or-namented with a dragon, convolvulus of lotus in Kensington work. Then, too, great elegance of taste is shown in the use of artists' silk, in which the printed figure or pattern is raised by an outline of bullion. Cushions like the melon rolls for chair backs are most useful, made alike on both sides of some prett figured silk .- S. S. E. M. in Chicago Herald.

NOTED AT NEGAUNEE.

The National Educational Association's Annual Meeting at St. Paul in July.

Booked For a Week-Happily Wedded Wednesday-Other Interesting News Notes and Personal Pointers.

The National Educational Association.

The annual session of this association will be held this year at St. Paul, the dates being from July 8 to 11. Under date of June second Prof. F. D. Davis, of this city, who is in charge of the upper Michigan department of the association, has sent out a circular letter to the teachers of the upper peninsula, announcing an excursion from Marquette to St. Paul for the benefit of those teachers wishing to attend the convensity.

Dissolution of Co-Partnership.

The co-partnership heretotore existing between the undersigned, doing business under the firm name of Penglase, Allen & Co., has this day been dissolved by mutual consent. The business will be carried on by Robert Penglase and William J. Allen, under the firm name of Penglase & Allen, who will settle all accounts against the late firm. teachers wishing to attend the convention. A Wagner Palace sleeping car has been engaged and will be attached to the "Duluth Limited" on the South Shore road, at Marquette, Monday evening, July 7th. The car will arrive n Duluth Tuesday morning and the day will be spent in visiting points of interest, the train for St. Faul leaving about noon. The car will be sidetracked at St. Paul for the use of the party at the convention, thus avoiding the annoyance and extra expense of patronizing overcrowded hotels. On CHEMICAL ASSAY OFFICE the return trip the car will be attached to the regular train leaving St. Paul at 1 P. M. Friday and will arrive here on and membership to the association \$2, making the total cost for the trip, exclusive of board at restaurants or ho tels for from \$1 to \$2 per day, \$22. This may, however, be reduced to \$20 by two persons occupying one berth. The car will accommodate but 40 persons and those who have not already secured places in it should do so at once, addressing all communications to Supt. F. D. Davis, Negaunce.

The Taverniers.

The Tavernier combination, which is booked for a week at the opera house s not receiving the support which the merit of the troupe deserves. The company is presenting some of the lat est and best theatrical works in a creditable manner and should receive bet ter support than it does from the pub-

lic. The admisson is low, and each buyer of a ticket receives a numbered check that will entitle him to a chance in the award of an easy chair and the parlor suit which is now on exhibition at Wollner & Elliott's.

Happily Wedded.

Mr. John Manning and Miss Isabella Murray, both of this city, were married Wednesday morning at the residence of the bride's parents by Rev. Father Eis. The groom has for many years been a valued and trusted employe in N. Laughlin's merchantile establishment and is a young man of sterling qualities who commands the respect of all who know him. The bride is a most estimable young lady and an points west, over through and who is held in high esteem by her large cal travel. Features of superior train service circle of friends. The newly wedded couple left for Dayton, Ohio, where Vestibuled Sleepers they will spend several weeks. That their wedded life may be one of continued happiness and prosperity is the wish of the MINING JOURNAL.

STONE'S BREAD KNEADER.

A HOUSEHOLD IMPLEMENT OF A NEWCLASSAND ADEVICEOF ACKNOWLEDGED MERIT.

PATENTED BY D. G. STONE, NEGAUNEE, MICHIGAN OCT. 22, 1889.

is thought that all necessary required bave been met, and that it is a cleanly process. Kneading bread with the hands how ever clean they may be, is not a very cleanly process, especially in warm weather, when the hands perspire freely. Effete matters from the system are removed by the perspiration, and while the hands are in the bread the perspiration goes into it, to form a part of the staff of life. If the person who makes the bread is diseased, poisonous matters and diseased products may be incorporated into the bread. The process of baking the bread undoubtedly would destroy all disease germs, but still it is not pleasant to think that the bread we eat may contain such substances as are the doof and a block supported by trunseat may contain such substances as are thought that all necessary requires.

Block is construction, and while the hands how with the least of trouble in its cleaning and care, and at a price within the limit of a modest expenditure.

It is obvious, however, that with the kneader in use tired Mary might, without violating culinary proprieties, call on willing John or youthful Ned to share with her the fatigue incident to baking day, while the absolute cleanling on willing John or youthful Ned to share with her the fatigue incident to be producted with a central vertical bearings.

Machines have been devised and put in the perspiration and general utility, will make bread automatically, and it is possible that an operator of good muscular development might prefer to man operator of the limit of a modest expenditure.

Referring to the illustration, to one and the care of the intervence of the intervence of the present with the language of the present with the hands as possible that an operator of good muscular development might prefer to man out a support of the present w

dough, the principle of mechanism in wogue being that of a rotating skeleton frame work of bars or blades of irregular forms, whereby the ingredients composing the dough should be subjected to a stirring and beating action by reason of the violent movements of the frame throughout the mass of many companies throughout the mass of many companies. Upon the norizonal name movement. Upon the norizonal name movement. Upon the norizonal name is placed a circular table having a central aperature to receive the vertical study, and which table being removable is designed to be used as a bread board, and, as such, in the process of examine longer than the process of t members throughout the mass of ma- shaping loaves for the oven.

As a motor, steam or equivalent power would ordinarily be employed, through manual power could be profitably utilized to a certain extent. Any attempts at applying this principle of agitation to the mixing and kneading of doubt in family bread making, by bring.

To one side of the table is secured a removable hook adapted to engage one edge of a bread pan placed thereon, and the opposing edge of the table has a similar hook, provided with a turn buckle by means of which the pan may be secured in place.

PHYSICIAN writing to an eastern journal in condemnation of the common practice of kneading bread with the hands, supports his objection by the following reasons:

Kneading with the hands is generally practiced by cooks, and it is thought that bread, in order to be good, requires prolonged kneading. If the hands are clean it is thought that all necessary requirements have been met, and that it is a cleanly process. Kneading bread with the hands however clean they may be, isnot a very clean only of narts as that its merits shall

bles of carbonic acid gas resultant from the fermentative action of the yeast, which bubbles have become entangled in the glutinous mass, and to distribute them evenly throughout the material, it follows that the more thorough the kneading the more uniformly light and porous should be the bread.

The lightness of the completed loaf depending on the success attained in holding these bubbles of gas at proper expansion till such time as that their cellular enclosing walls of gluten and starch should have become stiffened by agitation to the mixing and kneading of dough in family bread making, by bringing it advantageously within the scope of hand power or limit of material, as found in the average family kitchen, seems to have proved futile and image and the central block in the vertical frame.

FRAUD COMMITTED BY MAIL.

Charge Against L. H. Linn, of La Crosse-His Big Correspondence.

LA CROSSE, June 4.-L. H. Linn, of this city, was arrested to-day the on order of Inspectors Pulcifer and Cummings charged with using the mails for purposes of fraud under the name of L. H. Linn & Co. He had advertised widely for agents and received letters from every state in the union, for some time past averaging lifteen to forty let-ters per day. His plan was to estabters per day. His plan was to estab-lish correspondents as agents for a soap and perfumery manufactory and to furnish a sample case for \$5. The soap was bought here in town, the perfumery was cheap stuff, and the whole outfit cost about fifty cents. Very few attempted to can-vass with the outfit and if they did they seen found they got no orders. His ensoon found they got no orders. His en-tire office outlit consisted of an immense lot of correspondence, a box of soap and a few bottles of cheap per-fumery. The whole lot was not worth \$5. A new scheme he has just started wanted and applications are being made. San Francisco, Cal., June 5.—Advices by steamer to-day state that the war against the savages in Fermosa is being conducted in a desultory manner. The Chinese troops have suffered several severe repulses, and are unable to make any progress in the subjugation of the country. It is believed that the troops in North Fermosa have lost heavily both from the attacks of the enemy and from diseases.

Boy Drowned While Swimming. MILWAUKEE, June 5 .- Five or

mall boys of ages ranging from 10 to small boys of ages ranging from 10 to 15 years went swimming in Kinni-kinnic river near the Chicago & North-western railway bridge this forenoon. George Murphy, aged 12, whose father, Phillip H. Murphy, is a plumber at No. 284 Reed street, was more daring than any of the others. He attempted to swim both ways across the river, which is wide at this point. He crossed the first time but when about in the middle of the murky stream on the return trip the foolhardy boy threw up his hands wildly, uttered a yell and sank. The other boys, who went to the rescue of their playmate, were horror-stricken to find that he had sunk for the first and less time. His body was not and last time. His body was not

the Clothes? We hear that some woman said of Pearline-"it's the greatest thing I

ever saw for easy washing and cleaning, in fact it does so much I'm afraid of it," She recalls the old saying,

"too good to be true. How absurd to suppose that the universal popularity of Pearline is due to anything but wonderful merit.

How absurd to suppose that millions of women would use PEARLINE year after year if it hurt

the hands or clothing. How absurd to suppose that any sane man would risk

a fortune in advertising an article which would not stand the most severe (and women are critical) tests. That's just what PEARLINE will stand—test it for

easy work-quality of work-for saving time and labor

—wear and tear—economy—test it any way you will—but test it. You'll find PEARLINE irresistible. Peddlers and some unscrupulous grocers are offering Beware imitations which they claim to be Pearline, or "the same as Pearline." IT'S FALSE—they are not, and besides are dangerous.

Night or Day Calls. 153 Washington street.

P. E. DUNN, County Clerk.

The average school girl rises only in time to eat a hurried breakfast and reach school at 9. The girls under 12, who are not the ones that break down, are not too dignified to romp at recess, and in that way they fill their lungs with fresh air every day Those above 12 or 13 rarely have a breath of outside air from 9 till 2 in the afternoon. They Shore, is inspecting the western portion of eat their luncheons curled up in heaps, in comfortable corners, if they can find them. They take little exercise, except in a few A solitary lunch of cold or "warmed over" ood on reaching home is followed usually by in hour or two of study, instead of by a sk walk or other exercise. There is more study after supper, ambitious girls studying late into the evening.

If there is any well established physiologi-

cal fact, it is that girls in their teens need an abundance of sleep, and sleep before midnight, if possible. The teachers must give a tain amount of home work to their pupils in order to keep them up to the grade, more is the pity; but since that is a necessity, the fathers and mothers at home should make everything else bend to that and health, ere is no one thing that is so necessary and but might be so easily secured, if fir mness were exercised, as a long night of sleep for the fast growing brain and the girlish frames that are rapidly assuming the proportions of maturity -Christian Register.

Girls, Stay in the Country.

I have heard country girls talk of coming to the city for employment, giving as one Well, that is just what they will not get; the woman of business is not a woman of leisure, and she has no time for society. She will find more social life in her own home, even if she be a worker, than she could ever have in the city, and there is no lonesomeness more absolute than the loneliness of a stranger in a crowd. Salaries are not large enough to permit of much relaxation in the way of entertainments, and after the day's work is over one is too tired to go in search of enjoyment.-Herald of Health.

Not only may a woman buy gloves with pockets in the left hand one sufficiently large to hold a few coins for car fare, but if she is a mother she may buy six button kids for a way store and asked the clerk if they were gloves made to order. The clerk said no, that they kept six button kid gloves for children said, "is marked "0 0." "-New York Letter.

The woman whom I admire most, the wonan who is the most useful being in creation,

is the old maid. She helps one and all in the household, father, mother, brothers, sisters. I know many who have deliberately chosen to be old maids. They are artistic, they are scholarly and useful. I know one of them in this city who is now 90 years old. She has a lovely character. When young she might have married into high European aristocracy, but she would not part with her father, her brother or her sister. She always thought it her duty to remain an old maid and look

Kennedy's Clothing Store Burglarized What the Merchants Have to Say to Wednesday Night-On the Gold Range-Base Ball Talk.

The Meeting of the Common Council-Theatrical Doings-Other Pieces of Hematite City Information.

A Little Burglary The clothing store of Ed. Kennedy

was entered Wednesday night some time between midnight and morning and the till rifled. But a small amount of change was taken, however, though some clothing and underwear was also taken. The total loss to Mr. Kennedy was less than \$50. From the circumstances surrounding

the affair it is thought that the work was done by amateurs, and by parties that had been in the store a number of times, and were well acquainted with the disposition of goods, etc. There has been no clue discovered to the identity of the party or parties who rified the store and till. On the Gold Range.

The new machinery is being set up at the Ropes, but the Huntington mill to Prof. Ropes, but the Huntington mill to Prof. Ropes, but the Huntington mill to Prof. Ropes. will not be in shape for operation till about the end of the month.

At the Michigan the force of miners employed is being increased as fast as good miners can be secured. There will be some carpenter work to do also in a short time. Matters will be pushed at the mine, as there will be no true economy in working but a small force Some men have been set at work on the Superior, next to the Michigan, and assays of rock taken out by them give favorable returns.

Base Ball Talk

"Pride goeth before a fall," and the Marquette ball club took a tumble Wednesday afternoon, at which time the Ishpeming team took occasion to administer a little needed chastisement to the boys by the lake front. It is but a foretaste of what will come later on. The next league game will be played here between the Houghton and home teams on Sunday next. The expected opposition to Sunday ball games has not assumed a head yet, but will probably come to a focus after the next

game. The association is firm in the position it has taken, and does not propose to be dictated to as to when, where and how it shall play its games Those who do not desire to attend its games, can stay away, and they will not be interfered with, neither will they be allowed to interfere with the business of the association. Dobyns, the new catcher, played his

first game with the home team at Marquette Wednesday afternoon, and did good work. Sullivan, who will take center field, has arrived, and will prob ably be put in next Sunday, as the Houghton club has agreed not to kick it it is done. Arrangements are now being made

for a number of exhibition games, as the demand for ball playing is strong and is but partially supplied by the league games.

None of the old amateur clubs of the city have been heard from this spring, gh several clubs composed of juve nile players have come to the front.

Common Council. There was a regular meeting of th common council held on Wednesday evening last, at which a great deal of reserve the right to reject routine work was waded through. The usual bunch of bills was audited, petitions read and referred to the proper committees, and extensions of water mains and sidewalks ordered.

A city surveyor was elected, in the person of Mr. E. F. Bradt, the chemist and surveyor of the Lake Angeline Iron company. The sewer question was brought up, and a lengthy resolution was offered and passed relative to the matter, but as the resolution or : summary of it, could not be obtained of the recorder yesterday readers of the MINING JOURNAL will have to wait for it another day.

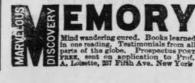

It was also decided to hold open the time for bidding on the construction of an addition to the fire engine house until the time of the next regular meet ing of the council.

Theatrical Notes.

"The Taverniers" will play a week a the city opera house, begining next Monday evening, and opening the season with "Fanchon." The company contains a number of good actors, and has a repertoire of standard plays, such as should draw well. At Marquette the company played to a good business and will doubtless do the same here, unless Mr. D'Arcy is allowed to take off his muzzle. Reserved seats can be had at Tillson's.

To-night Keene will play Richard III at Marquette. A special train will bring back the Ishpeming people who go to Marquette to see the eminent tragedian, at a round trip fare of only fifty cents. Further particulars can be had at the South Shore depot, upon application, by those who desire to go to Marquette this evening.

back, exclaiming:

"Holloa, Oscar, d'you know every time I see you you get fatter and fatter?"

"I don't know who you are," replied the apostle of astheticism, looking down from his advantage of several inches, "but every time I see you you get ruder and ruder."

Needless to say the too friendly acquaintance vanished abashed into the crowd.

"Is it, indeed?" replied he, with an agree able smile and holding his ground. "Then what a pity you don't teach him better manners!"—London Letter.

Paid for His Popularity. The late Dr. Cook, of Haddington, after ssisting the late Dr. Forsyth, of Morham, at a communion service, repaired as usual to the manse. While in the enjoy-ment of a little social intercourse the minister of Morham-which, by the way, is one of the smallest parishes in Scotland-

"Doctor, you must be a very popular man
in the parish."
"Ay," replied the doctor; "how's that?"
"Why," rejoined the other, "our usual

Gordon Locates Eden.

The general was very talkative one evening, explaining to us his pet theory, viz., that the Seychelles islands, which are situated to the northeast of Madagascar, are the site of the garden of Eden! He gave many reasons for thinking so—one being that there was a tree found there that is not to be found in any other part of the world. This, he is confident, is the "forbidden tree." It is called the Coco-de-Mer, or "nut of the sea," and has many peculiarities. The nut is shaped like a heart, but with its husk taken off it is like a man's body from the chest to the knees. To raise a tree, he explained, a nut is laid on the ground and covered with leaves. By and by a shoot comes out and runs along the ground, and when about twelve feet long it takes root. The root is in the form of a bulb four feet in diameter. The tree itself grows to the height of 100 feet, and is only about nine inches thick. It is 47 years old before it bears fruit, and its nuts grow seven in a bunch, from the end of the extended arm, each weighing perman's weight! It must indeed be a wonderful tree.—Contemporary Review.

Art in the Hand.

The peculiar character of the hand is so earnestly considered by the artist that he places it in a good light and natural position with no less care than he gives to the head of his sitter. To give a phlegmatic hand to a clever and active person, or a nervous, in-tellectual hand to a lazy one, would destroy the value of the portrait. This is instanced very finely in Bonnat's portrait of John Tay-lor Johnson, and in St. Gaudens' recently finished statue of Abraham Lincoln, in both of which works the treatment of the hands is in the highest degree westerly and suggestive of the personality of the original.—Cor. Oil That Is Superior to Lard.

For human food olive and cottonseed oils are far superior to lard, or to any other ani-mal fat. Olive oil has held that rank in the estimation of scientists and medical men from estimation of scientists and medical men from the earliest period of recorded history. It is only of late years that analyses by chemists, experiments in diet by eminent physicians, and practical use by skillful housekeepers have combined to demoustrate that in every respect and for all uses the oil of the cotton-seed is equal to that of the olive.—Manufac-turers' Record turers' Record.

Ball of Electric Fire.

The electric storm that passed over the city yesterday played some pranks uncommon in this latitude. It gave William Hicks, the grocer at 327 Washington street, an experience he will not soon forget. A ball of electric fire came in over his telephone wires and exploded in the room, fortunately injuring no one but giving the several persons present considerable of a scare. "When the storm came up", said Mr. Hicks to a MINING JOURNAL reporter, "I was about my store as usual. As it grew more violent and the flashes of lightning became more and more frequent I thought I had better ground the telephone. I walked over to the instrument and put in the plug. I had just stepped away across the store when there came a blinding flash and a ball of fire appeared in the room about 3 feet, apparently, from the instrument and right over the counter. In an instant it burst with a deafening crash, partially stunning me and some others."

"The whole thing was over so quick I didn't have time to be scared until afterwards. The ball of fire seemed about the size of a half peck measure. It just hung there for a second and then burst as I told you. The light was almost white or a very pale yellow and as it burst I seemed to see blue flames dancing before my closed eyes. I tell you it was an awful looking thing and I wasn't anxious for any closer acquaintance. I am very glad no one was hurt. Nothing was damaged unless maybe it was the telephone. I haven't

tried that yet." While it rained more or less all day the heaviest downpour was after 4 o'clock. Sergeant Dent's guage shows that up to 7 o'clock 1-3 inches of water fell. The curious can figure out how much water that is to an acre covered

AMONG MY FINE LINE OF PERFUMES.

F. H. DESJARDINS,

127 Washington Street, Marquette.

Thursday, May 8,

The immense stock of the celebrated clothing maaufacturers, Austrian, Wise & Co., of Chicago, was sold at a great sacrifice, owing to the death of Mr Austrian. I attended this great sale while in the east and purchased goods for 50 cents on the dollar. This clothing is unexcelled for quality and workmanship. Having secured a bargain I intend to give you a chance to share the benefit of my good fortune. Come, and you will go away convinced that it pays to deal with us.
