## SHARP REPORT OF A PISTOL

### Suddenly Startles Pedestrians on a Crowded Thoroughfare in Montreal, Canada.

### EUGENE COWLES, OF CLEVELAND, SHOT BY HIS WIFE'S BROTHER

### Cowles Attempts to Shoot His Wife, But is Himself Perforated—Story of Events Leading to the Tragedy.

### THE COWLES MURDER.

MONTREAL, June 8.—This afternoon at 4 o'clock, in broad daylight, on one of the principal streets of Montreal, a tragedy was enacted that has thrown the city into a paroxysm of excitement. St. Catharic street was crowded with pedestrians, as is usual at that hour. Suddenly they saw a flash, a puff of smoke and heard a pistol shot. A woman screamed, a cab was brought to a standstill and a woman alighted. In it were still two men, one with a smoking revolver in his hand, the other unconscious, and his blood soaking into the rugs of the carriage. The wounded man was Eugene H. Cowles, of Cleveland, Ohio, son of Edwin Cowles, late editor of the Leader. His assailant was E. C. Hale, of the same city, and the woman was Cowles' wife. There were a few hurried words and Hale ordered the cabman to drive to the general hospital. The lady reentered the carriage, which started for a hospital, a distance of half a mile. A bystander

### TELEPHONED FOR AN AMBULANCE

and it met the party, but its services were not required. On arriving at the hospital Dr. Kirkpatrick, the medical superintendent, had the wounded man conveyed to a private ward and Dr. Fenwick, one of the attending physicians, was called. There was a close examination and a hurried consultation and the result was announced to the eager crowd that there was no immediate danger. The ball had entered the right side of the neck and after piercing the right jaw bone emerged through the cheek on the opposite side. When it became known that there was no immediate danger an inquiry into the facts of the case was begun. The party with Sergeant Frye, who had accompanied them from St. Catharic street, proceeded to the Central police station. Sergeant Watson was on duty and received them. Hale briefly related

### THE STORY OF THE SHOOTING

and gave himself up on the charge of shooting with intent to kill. He took a brief leave of his friends and was then shown to the cell he was to occupy. There were now on the scene Mrs. Cowles, Mrs. Bolton, her sister-in-law, Judge J. E. Ingersoll, of Cleveland, as Mrs. Cowles' legal adviser, and Mr. D. McGibbon, Q. C., of Montreal. The events which led to the shooting, briefly told, are as follows: Mr. Cowles and his wife had separated. Mrs. Cowles had begun proceedings for a divorce and had been given possession of their little daughter pending the decision of the trial. Mr. Cowles was in business in Lockport, N. Y., but owing to his health started on a trip through the west. On the way he stopped off in Cleveland to visit his mother. His little daughter, who was stopping with her mother, was permitted to visit her father at his mother's house. He took her in charge and went to the station accompanied by his sister. Without his sister's knowledge he

### BOARDED A TRAIN

standing at the station. This train ran only to Conneaut. There he got a horse and drove twenty-eight miles to Girard, Pa., to be out of the state. From there he took a train to Buffalo and was next located at the Welland Hotel, St. Catharic. There he was met by Sheriff Sawyer, who had a long interview with him, lasting nearly a day. On Thursday Cowles took a boat for Toronto, about an hour's sail. He had previously said that he was willing to have an interview with his wife, but would talk with no one else. His object was to obtain an additional allowance. Four months ago on the death of his father, he was cut off with an allowance of \$800. Previous to this he had been living, it is said, at a rapid rate and made two

### VISITS TO EUROPE

in company with a woman of questionable character. On Monday last an application was made for a divorce by Mrs. Cowles on the ground of adultery. Cowles admitted his guilt to the sheriff, naming persons and places; but he affirmed that his wife had condoned the offense. On Thursday Cowles left for Montreal. A pursuing party, composed of Mrs. Cowles, Mrs. Bolton, Judge Ingersoll, C. C. Hale and officers reached Toronto the same evening. An interview was arranged. The party reached here this morning and stopped at the Windsor Hotel. Cowles had left the Windsor and had gone to St. Lawrence Hall, where he registered as Mr. Wilson and child and had breakfast. After breakfast he took the child to a convent and gave instructions that she was not to be given up without a written order from him. He then returned to the hotel

### WITHOUT THE CHILD

ready for the interview with his wife. Cowles insisted that only his wife should be present at the interview, but her brother would not consent and he accompanied them in the cab for a drive. The interview was in progress when Cowles made a movement as if to draw a revolver, when Hale anticipated him with the result stated. An order was procured from Judge Douglas to the sisters of the convent instructing them to produce the child, but they refused. The court will issue an official mandamus and a

guardian will be appointed. Hale will appear in the police court to-morrow to answer the charge against him. Much sympathy is felt for Hale and Mrs. Cowles, as it is believed Cowles intended to kill his wife. Eugene Cowles is a son of the late editor of the Cleveland Leader and Mrs. Cowles before her marriage was a Miss Hale, daughter of a wealthy Cleveland banker.

### Eight Men Drowned.

BOSTON, June 8.—About 6 A. M. a party of eight men started for a fishing excursion in a sail boat. When they were about one mile from Thompson Island, in Dorchester Bay, the boat was struck by a squall and capsized. All but one were swimmers, but instead of trying to swim ashore they tried to climb on the boat, which was so heavily ballasted that their weight would force her beneath the surface, leaving them struggling in the water. In this manner the strength of the men was exhausted and they sank one by one, until but one was left. The survivor, lifting him above the surface. He floated in an unconscious condition for some time when the boat was seen from shore and he was taken ashore and resuscitated.

### EXPRESS MESSENGER SKIPPED.

### Northern Pacific Express Robbed by Masked Men in North Dakota

### The Express Messenger Hides the Money in His Car and Takes to His Heels. Passengers Not Molested.

ST. PAUL, Minn., June 8.—The Northern Pacific east-bound passenger train, which arrived here to-night, was robbed by masked men near West Salem, N. D., last night, two miles west of Salem. The engineer and fireman were surprised by two masked men climbing over the tender, who at the point of revolvers ordered them to stop the train. The order was obeyed. The express messenger, hearing the shots fired forward and suspecting something, hid \$6,000, locked the small safe, put out the lights and ran back to Salem. The mail car was first tackled by the robbers. Only one mail agent was in the car and he immediately obeyed orders by turning over the mail matter. A number of

### REGISTERED LETTERS WERE RIFLED

and then the two robbers turned their attention to the express car. This they found deserted, much to their chagrin, and mistaking the firemen for the express messenger they ordered him at the point of pistols to open the safe. He protested that he knew nothing about it, and finally convinced the robbers that he was the fireman. Then the train backed to New Salem and finally came on east. The express messenger remained incognito and got on the train as it left New Salem. The passengers were not touched. One put his head out of the window during the delay, but was told to get his head back and a bullet whizzed past his head, a reminder that orders had better be obeyed. A posse of men, with the sheriff, mounted and armed, left Mandan early this morning on a special train for

### THE SCENE OF THE ROBBERY.

The robbers compelled Engineer Kilmarkin to break in the door of the postal car. Only two masked men were seen at a time and suspicious are rife that only two were engaged in the robbery. During the controversy in the mail car the mask fell from the face of one man reported to be of medium height and build, light hair and with several days' growth of light beard. The district around New Salem is peopled by quiet, law abiding settlers and it is presumed to be the work of people unknown in that part of the country.

### Fatal End of a Debauch.

CHICAGO, June 8.—James Johnson, outstretched in a drunken stupor on a saloon floor, was stumbled upon and accidentally stabbed to death this morning by Walker Jacobson, who, scarcely less stupid from drink, was resisting the whisky enfeebled efforts of the proprietor, Michael Dallo, to forcibly clear the saloon. Johnson, Jacobson and Dallo had been all night in the place dice throwing and drinking prior to the fatal thrust. All three were too sodden to realize Johnson's danger and he bled to death on the saloon floor from lack of attention.

### Burglars Start a Conflagration.

BLOOMINGTON, Ill., June 8.—Burglars blew open a safe in Brown's bank at Catsforth this morning. The building caught fire and seventeen store buildings, comprising the main block, were burned. A fireman named Prater was badly hurt. The bank vaults contained \$15,000 and it has not yet been ascertained whether this is missing. The total loss is \$90,000.

### News From Mexico.

CITY OF MEXICO, June 8.—The Official Gazette, referring to the California filibustering, says that the government of the United States has undertaken to investigate the matter and to guard the frontier.

English capitalists are here trying to obtain concession for a large smelting works near Monterey.

### The Columbus Strike.

COLUMBUS O., June 8.—No cars were run on the street railways to-day. The strikers are quiet and determined. The company announces that it will start the cars to-morrow morning. In anticipation of trouble the mayor has issued a proclamation counseling good order and assuring people of protection to life and property.

## THE CAUCUS SILVER BILL.

### A Motion to Recommit is Lost and The Substitute Bill is Agreed To.

### INTEREST IN THE QUESTION NOW TRANSFERRED TO THE SENATE.

### The House Bill To Be Substituted For The Measure Now Pending In The Senate. Congressional Forecast.

### WASHINGTON NEWS.

WASHINGTON, June 7.—Before the beginning of the debate on the silver bill in the house, at the request of Mr. Payson, of Illinois, Mr. Conger, of Iowa, in charge of the bill, modified his substitute so as to provide that treasury notes issued in pursuance of the bill shall be legal tender in payment of all debts, public and private striking out the word, "Except where others were expressly stipulated in the substitute." Payson said that he realized the substitute would in substance pass this body and it would be done in obedience to a public sentiment which he believed to be universal in favor of a larger use of silver as a money metal. The time for voting on the silver bill began at 3 o'clock, and after disposing of several important amendments the question was on the adoption of the substitute agreed upon in caucus, pending which Mr. Bland moved to recommit to the committee with instructions to report the free coinage bill. On this motion the yeas and nays were ordered and the roll call began at 3:10. It was defeated, yeas 116, nays 140. A vote was taken immediately upon the adoption of the substitute bill and it was passed, yeas 135, nays 119.

### CONGRESSIONAL FORECAST.

WASHINGTON, June 8.—The interest that centered in the proceedings of the house last week will be transferred this week to the senate. The discussion of the silver question will be resumed to-morrow, the bill that was passed by the house Saturday being substituted for the pending measure on the senate calendar. This will facilitate the disposition of the matter. It is believed that a vote on the bill will be reached before the end of the week. It is also believed that the bill as it shall pass the senate will provide for the purchase of four and one-half million ounces of silver monthly, the certificates to be issued in payment thereof.

### TO BE LEGAL TENDER

for all debts, and to be redeemable in lawful money. Senator Vest has given notice that he will ask the senate, some day this week, to take up the bills on the calendar in regard to transportation of cattle and beef products, but he will probably give way to the silver debate if it shall continue during the week. The legislative appropriation bill will be reported to the senate early in the week and Senator Allison, chairman of the committee, says he expects to have it passed before the week ends. Eulogies on the late Representative Wilber, New York, will be delivered Thursday, and Saturday will be devoted to "unobjectionable" bills on the calendar. In comparison with preceding weeks the forecast of business to come before the house this week is lacking in general interest. Several

### APPROPRIATION BILLS

are on the calendar and it is the intention to dispose of these with expedition in order to avoid embarrassment to the public service by delayed appropriations at the beginning of the next fiscal year. To-morrow the District committee will have the floor to bring up matters of local interest. There are a number of senate bills, mostly of a private nature, now on the speaker's table, and it is probable that a day will be allotted for their disposition. The public buildings committee is also making strenuous efforts to secure another special order to rescue the batch of bills hung up on Mr. Turpin's last and effective point, "No quorum." There is

### SPECIAL URGENCY IN THIS CASE

as the sundry civil appropriation bill, which contains the appropriations for public buildings, is to be reported next week and it is necessary that these delayed bills be passed if they are to be followed by an appropriation. The commerce committee has also applied for an evening session during the week. As yet none of these applications has received the attention of the committee on rules, but a meeting is to be held early in the week, when the exact order of business may be determined.

### Unfortunate Killing.

WASHINGTON, June 8.—William Powell, a colored man, lay dead this morning near the wall of a lodging house opposite one of the entrances to the Soldiers' Home in this city. Curled up in one arm was a small terrier, and standing guard over the body of the dead man was a large hound. His faithful companion had been an unwitting cause of his death. Tramp dogs have infested the grounds of the Soldiers' Home lately, and orders were issued to shoot them. John Dolan, an old veteran who acts as watchman at one of the entrances, was awakened about 1 o'clock this morning by the noise of dogs and securing an old navy revolver, fired it in the direction of the noise, which immediately ceased. Dolan went to bed again and slept until awakened by a passer-by, who called his attention to the dead body outside his window. The bullet had entered the throat and death must have been instantaneous. Powell's wife was a domestic in the lodge where Dolan slept and he had come there to see her, when the noise of one of his dogs awakened the old watchman. A coroner's jury to-day acquitted Dolan.

MARQUETTE, MICH., JUNE 9  
Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The News states that the Newberry furnace produced 1,962 tons of pig iron last month and 438 tons for the week ending May 31st.

The Mirror will put its array of advertisements against that of any other paper in the upper peninsula—or in our whole queen commonwealth, for the matter of that—*Escanaba Mirror*, Saturday, June 7th.

The "array" consists of scant twenty-five columns, in comparison with over thirty-two and a half columns in the DAILY MINING JOURNAL of same date, while over two columns of ads were crowded out by reading matter, the plate matter used in the *Mirror* proving conclusively that such was not the case with it. Want to do any more "pitting"?

The record of the Sault canal for May surpasses that of any other month since the canal was built. The number of passages was 1,644, registered tonnage 1,333,678 tons, freight 1,294,696 tons. Daily average number of passages 53, daily registered freight tonnage 43,667 tons. The passages exceed any previous month, since the locks were started, by 37 vessels and registered tonnage exceeds by 190,176 tons. Freight by 8,607 tons. Considering the low stage of water, on account of which no vessel could carry a full load, the showing is beyond expectation. The water is now increasing in depth and vessels can load almost to 15 feet. It is thought that full 15 feet will be had in a few days.

The recent disgraceful escapade of the students at Harvard when, in celebration of the victory over Yale, they painted the statue of the founder a brilliant red and destroyed several thousand dollars worth of college property, has given the Boston papers their chance and they are now getting even with the president of the institution, Dr. Eliot, for his Philadelphia remarks derogatory to newspaper reporters. An idea of what he said can be gathered from the following editorial paragraph in the *Globe*, which makes the account even:

President Eliot has some very nice young men in his college, and evidently they are going to be a great credit to Harvard and to Mr. Eliot's training when they get out into the world. Mr. Eliot is the gentleman who was so anxious that his graduates should not go into newspaper offices and mix with reportorial "bummers, drunkards and thieves." Nevertheless, it looks as if quite a number of Mr. Eliot's young men might have their morals and manners vastly improved by association with the average newspaper reporter.

**ORE FREIGHTS.**  
The Cleveland *Marine Review* says of the situation:  
Rates on iron ore are \$1.30 from Ashland, \$1.10 from Marquette and 85 cents from Escanaba. One of the daily papers published outside of Cleveland, said a few days ago: "There is reason to believe that single trip ore charters are being made as low as 80 cents per gross ton. The freight market is reported dull and weak." It is true that less than a dozen Escanaba loads have been offered on the market in three weeks past, and contract boats are delayed in getting loads while shippers are straining every effort to give them employment even with a loss of time. Still, the disposition is not to force down and it cannot be taken for granted that rates are being cut because there is nothing doing. The ore freight market has always had its peculiarities. When the ore is not offering it is not to be had at any price. The same is true of the situation at Marquette, but the Gogebic range is showing all the increase in ore shipments this season and the demand for rail carriers from that point has been very fair for several days at \$1.30. With any increase in down freights from Chicago or Escanaba—and there are some signs of a little improvement in that direction—a large fleet of vessels would go that way, as large cargoes and fair freights up on coal would result in better profits for big boats, than are now realized in the Lake Superior trade.

**THE ORE MARKET.**  
The Cleveland *Iron Trade Review* thus speaks of the ore situation, having to defend itself from almost the entire Lake Superior press, an undertaking which proves quite difficult in the present case:  
The reports under this head which, during the past two or three weeks, have appeared in these columns, seem to have given rise to a great deal of criticism in the Lake Superior country. Some of the opinions advanced go to the extent of charging inconsistency for "first giving utterance to the prediction that the 1890 output would be 9,000,000 tons," and then "suddenly lowering the prediction to 7,000,000." As a matter of fact, no 9,000,000 output was ever predicted in these columns, any more than a 7,000,000 ton output. Six months ago, the very large and unexpected sales—if, indeed, they presaged anything at all—indicated a considerable increase in the 1890 output over that of last year. The state of the market warranted dealers and producers in expecting an increase in the current season of 25 per

cent, and voicing these opinions and expectations, without any home-made additions, these statements were sent abroad as being the opinions of the iron ore dealers. A little later a retrograde movement set in which lasted for five months or more and it is not to be wondered that the dealers in iron ore underwent a change of opinion as to the business of the year. A local firm of men, doing the largest business on the chain of lakes, is authority for the statement of two weeks ago that, "unless the daily receipts between this (that) date and July 1 should be very considerably augmented, the total receipts of 1890 will fall below those of 1889." Well, July is still four weeks off and there is no good reason for modifying the above opinion. There is so far an increase over last year's shipments of 300,000 tons, but the peculiarity of this increase is remarkable, in this, that it all comes from the Gogebic region, while there is no increase in the shipments from any of the three older regions. Whether or not this increase of shipment in Gogebic ore is due to the easier handling of hematites, remains to be seen. Nobody denies the fact that some mines have been unable to get into their stock piles to the extent of shipping facilities, and it may be set down unless some 800,000 tons of non-Bessemer ores, yet unsold, find an early market; that tonnage will not be brought down, whether it is mined or not. The docks are now overcrowded with ore, and the rail shipments seem to make little impression upon this vast accumulation. The month of July will tell the tale as to the business of the current season. Very little has occurred in the market, during the week in the way of ore sales, but the Republic Iron company has purchased the West Republic mine, into which the Republic ore dips. The price was \$5 per share, and of the 20,000 shares all but a hundred changed hands. The demand for Bessemer ore is good, but sales are still backward.

**CHARACTER IN THE HAIR.**  
How to Read People by the Color and Quantity of Their Tresses.  
Just at present there seems to be a good deal of ingenuity displayed in trying to read people's character by outward signs. The face, the hands, the walk and the mustache have all been commented upon, and now some clever individual has drawn up rules by which we may tell a person's character by the hair.  
Black hair which is absolutely without any wave or curl, and which lies in lank, lifeless masses, shows a melancholy disposition; a black beard which grows sparsely also gives the same indication. Black hair which is wavy and curling, and very thick, shows force of affection and a certain ardor in love matters; and so also does a thick and crisp textured black beard and mustache. The lank, thin and uncurling black hair is one of the signatures of Saturn; the crisp, curling and thickly growing black hair is the combination of Venus and Saturn. The united influence of these two planets on a life gives force of character; thus people with the crisp, dark hair get the ardor combined with prudence, which produces success in life.  
Chestnut hair of a soft and silky texture, and not very thick, gives romance of character. This is not the sort of hair which is ever seen on very commonplace, realistic persons. This tint of hair, crisp or curling, and growing thickly on the head, and with a thickly growing beard, also of crisp or wavy texture, shows joviality and hospitality, and both women and men of this coloring are fond of society, have a good deal of "go" in them, and an immense amount of confidence in themselves. Avaricious people never have hair of this coloring.  
Golden hair of a soft, pale gold, without undulation, shows gentleness and tenderness, but no force of character. Men having this sort of hair are somewhat effeminate in their tastes, and are wanting in energy and decision. Both men and women having this hair, possess like sort of hair are incapable of strong affection; they are attracted by the opposite sex, but they are more given to having a series of small interests than one strong love. If the hair is found in combination with golden colored eyes, it is indicative of coquetry in the nature; if with pale blue eyes, we have languor and caprice—a sentimental but inconsistent person.  
Bright golden hair of a rich, deep color, and of a crisp and wavy texture, growing thickly on the head and somewhat low on the brow, show an ardent, poetic and artistic temperament. It is the signature of Apollo—the sun. Such people are generally fond of music, painting or poetry. Both men and women having this sort of hair are intuitive in their judgments; they do not reason about things, they feel them; they are a little quick of temper, and are easily ruffled, but they are quickly appeased; they are gay, and interest themselves in art, even if they are not artists themselves.  
Persons with red hair are ardent and vivacious, especially if with it they have hazel eyes, in which case they have a bright and quick intelligence. They have a great deal of natural facility for study and good memories. Red hair with blue eyes shows the same warmth of character, but not so much intelligence; and if with blue eyes and red hair the eyebrows and eyelashes are white—as is often the case—it is an indication of a weak and capricious nature.  
People with red brown hair, which is very thick, and redder over the ears and at the temples and in the beard than on the head, are courageous and hot tempered. This kind of hair (unless the other indications in the face are widely different), shows activity and energy in all things. It augments the indications of force and power given by other features, and in part this sort of hair gives sense of color in painters, force of language and eloquence in poets, and power in musical composition.  
Hair of that colorless, fair color, or ash colored, denotes persons of an indolent and dreamy temperament. Persons with this sort of hair, in combination with large blue gray eyes, with fair, long but straight eyelashes, and very slightly defined eyebrows of the same blonde color, and white, soft skin are capricious, languid, imaginative and somewhat melancholy. Women having this sort of coloring of skin and hair are romantic and devoted in a resigned but not active spirit; that is, they are more generous in words than in deeds, for they are incapable of exertion, and still less perseverance.  
Persons with soft long hair of a dark brown, so dark as to be almost black, yet not that blue black which is essentially melancholy, are affectionate, gentle and loving. Their first instinct is always good and kind. They like society, and while not quite so indolent as those having soft, ash colored hair, they are still lovers of repose and comfort. People with this sort, brown hair are very open to the impressions of beauty, and they absorb noise, discords and quarrels of all sorts. Men with this sort of hair, like those with pale golden hair, are somewhat effeminate.—*American Hairdresser.*

**SITUATION IN COPPER.**  
This interesting communication on the copper market situation is received: To the Financial Editor of the *Transcript*:  
An impression seems to prevail that the present price of lake copper is high, whereas the fact is that copper has ruled much higher in the past, and only in recent years has a low price prevailed. To show this plainly I have prepared the following table, showing the prices of lake ingot copper during June for the past twenty years:

June, 1870.....30 cents	June, 1880.....18 cents
" 1871.....34 "	" 1881.....18 "
" 1872.....34 "	" 1882.....18 "
" 1873.....31 "	" 1883.....15 1/2 "
" 1874.....34 1/2 "	" 1884.....14 1/2 "
" 1875.....33 "	" 1885.....14 1/2 "
" 1876.....33 "	" 1886.....14 1/2 "
" 1877.....19 1/2 "	" 1887.....10 1/2 "
" 1878.....16 1/2 "	" 1888.....16 1/2 "
" 1879.....16 1/2 "	" 1889.....12 "

The present price of lake ingot is 15 1/2 cents spot, and 15 1/2 cents for futures. The position of copper is therefore strong, and the present price is not high. During the month of May the visible supply decreased 8,100 tons, or at only 2,000 pounds to the ton, 16,200,000 pounds. This is at the rate of 96,200 tons or 192,400,000 pounds for the year. In short, consumption all over the world is ahead of production, and prices under such conditions surely will advance further. The advantage to Boston interests will be very great, for all of the copper producing producing companies will reap rich profits.

**HERBERT RADCLIFFE.**  
Comment—It seems to us that the point which Mr. Radcliffe makes can be emphasized even more strongly by giving the average of June prices of lake copper for twenty years past. This average was just eighteen cents per pound, or 8 1/2 cents per pound more than current quotations of June, 1890. One other point touched upon has caused considerable comment, namely the reported figures of decrease in visible supply for May. The first cable dispatch gave it as 8,100 tons; later advices say 4,769 tons. It is explained by some who are interested that the larger figures are correct, including grand total reduction in the world's supply, while the smaller number represents depreciation in stocks in England, France and about there. Whether this be so or not, the depreciation of 4,769 tons, equal to 9,538,000 or 10,682,560 pounds, according as the tons are short or long, is a grand record for a single month—grand for producing copper companies and for investors and traders in their shares. It is the largest reduction in visible supply of any month for a year, unless memory be at fault, and as an indication of the prevailing tendency in the copper market is highly important. While consumption of copper continues at such a rate as to reduce accumulated stocks of the metal by something like ten million pounds in a single month, there can be no question of the solidity of the situation.—*Boston Transcript.*

**Glass Eyes.**  
A German paper makes the astounding statement that more than 2,000,000 glass eyes are made every year in Germany and Switzerland, while one French house manufactures 300,000 of them annually. The pupil is made of colored glass, and sometimes red lines are painted on the inner surface to simulate the veins. The largest number of these eyes are bought by laborers who are exposed to fire, and are consequently liable to lose an eye. An artificial eye rarely lasts more than five years, as the secretions of the lacrimal glands cloud the surface of the glass. Dr. Magnus has pointed out that the expression of the eyes is almost solely due to the movement of the upper eyelids; and this is the reason that we may see a man with a glass eye a hundred times before we discover his infirmity.

**Note How Your Friend Laughs.**  
It is a well known and easily demonstrated scientific fact that different people sound different vowels when laughing, from which fact a close observer has drawn the following conclusions: People who laugh in A (pronounced as ah) are frank, honest and fond of noise and excitement, though they are often of a versatile and fickle disposition. Laughter in E (pronounced as ay) is peculiar to phlegmatic and melancholy persons. Those who laugh in I (pronounced as ee) are children or simple minded, obliging, affectionate, timid and undecided people. To laugh in O indicates generosity and daring. Avoid if possible all those who laugh in U, as they are wholly avoid of principle.—*St. Louis Republic.*

**The Raising of Dates.**  
The date bears well in southern California, Arizona and New Mexico, and it is only a question of time when its cultivation will become a great industry in this country. The tree is a very beautiful one, with bluish green leaves, all growing from a single stem, with a central bud at the point of the leaves' outgrowing, where hang great clusters of the yellow dates, as sweet as honey to the taste. The date needs very peculiar conditions for its growth. The soil must be rich and very moist about the roots of the tree, while the air must be exceedingly dry.—*Philadelphia Record.*

TALK OF THE TOWN

The first chute on the new No. 4 dock was swung in place Saturday. Trout seekers were reasonably numerous along the neighboring streams yesterday.

Power of the Solar Heat.

A Russian scientist has during the last year been making a series of observations with the object of ascertaining the number of calories which the sun puts at our disposal. The result of these experiments is that 63 1/2 per cent. of the solar heat is absorbed by the atmosphere, and only 36 1/2 per cent. reaches the soil.

**ON SATURDAY AND SUNDAY.**

**Houghton's Victories at Negaunee and Ishpeming Much Improve Her Position in League Race.**

**OPERA HOUSE DIRECTORS LET CONTRACT FOR EXCAVATING.**

**Precedents For Aldermanic Pay—Keene's Fine Presentation of "Richelieu"**  
General City News.

**Standing of the Clubs.**  
The standing of the respective teams of the Upper Peninsula league to-day is as follows:

Teams.	Played.	Won.	Lost.	Percent
Calumet.....	4	4	0	1.000
Houghton.....	4	2	1	.667
Hancock.....	2	1	1	.500
Ishpeming.....	4	2	2	.500
Marquette.....	1	0	1	.000
Negaunee.....	4	0	4	.000

The event of the week has been the tour of the Houghton team through the iron country. Rain prevented the game here but the copper country lads were victorious at Negaunee and Ishpeming, raising them from fifth to second place. The kicking of the Hancock lost them the game at Calumet Saturday and dropped them into third place. Ishpeming's defeat yesterday set her team down to fourth place. That Negaunee gave Houghton a harder pull than did Ishpeming is one of the surprises of the week.

The postponed game with Houghton will not be played to-day as first announced. Houghton did not care to play off the game now unless she could put in her new pitcher. Marquette was willing to allow this but Hancock insisted that the ten-day rule be strictly observed.

**Excavating Contract Let.**  
The directors of the Opera House company at their meeting Saturday let the contract for excavating the cellars and foundation trenches of the new building to Burgh & Hetting at \$1,000. Work will begin at once and be pushed as rapidly as possible.

Architect Charlton made a report of his recent trip of inspection of theater buildings. He looked over opera houses at Bay City, Detroit, Chicago and Elgin, Ill. In the first and last named towns he found excellent theaters of about the same size as the one proposed here and gathered many useful ideas from the various structures of the larger cities. He will proceed with the plans at once and finish them as soon as possible. When they are completed bids for the building will be asked for. Ere long Marquette will have the finest temple of musical and dramatic art to be found north of Milwaukee and Bay City. Some new subscriptions have come in and the directors are confident that all the stock will be taken up before the building is completed.

**Precedents for Aldermanic Pay.**  
To show the antiquity of the practice, alleged by Alderman Palmer to be unlawful, of paying aldermen and others \$3 or more per day for services as inspectors of election and registration, a MINING JOURNAL reporter has made some researches in the city records. From them but a number of instances of amounts received have been taken. They show that the practice has been, from the earliest days of city, to pay at least \$3 per day for these services. In some cases it would appear that \$4 was paid, the records in most instances not showing the number of days but simply reading "for services as inspectors of election and registration." The instances quoted below are some taken at random and are simply gathered to show the practice under various administrations. They are as follows:

**In Mayor Stafford's term:**

F. M. Moore.....	\$ 3.00
J. M. Wilkinson.....	3.00
J. E. Tobin.....	3.00

**In Mayor Ely's terms:**

T. T. Hurley.....	15.00
J. G. O'Keefe.....	15.00
B. Neidhardt.....	12.00
P. C. Parkinson.....	12.00
J. M. Wilkinson.....	9.00
T. E. Cook.....	8.00
James Atfield.....	8.00
A. R. Harlow.....	4.00
E. Fraser.....	4.00
L. C. Palmer.....	4.00

**In Mayor Swineford's terms:**

F. S. Ferris.....	\$ 8.00
R. S. McGill.....	8.00
James Atfield.....	12.00
Thomas Flanagan.....	4.00
Sydney E. Church.....	9.00

**In Mayor Pickands' term:**

John Scotte (clerk).....	\$ 6.00
James Oakes (services).....	7.50
H. Gregory (clerk).....	6.00
L. C. Palmer.....	85, allowed 1.50
Michael Ralph.....	\$7.50, allowed 3.50
J. G. O'Keefe (two aldermen voting "no").....	4.25
I. N. Wilson.....	3.00
A. P. Swineford.....	4.25
F. Mullaly.....	7.50
William Wyckoff.....	4.25
A. C. Thiel (clerk).....	3.00

The last five bills and a large number of others were referred to the committee of police claims and grievances, which seems to have recommended the payment of the amounts originally claimed. Alderman Swineford voted against the report.

**In Mayor Moore's term:**

Charles Babcock.....	\$3 00
H. D. Lyons.....	6 00
H. M. Noble (clerk).....	8 00
W. H. Green (clerk).....	7 50
John McNamara.....	4 50
A. P. Swineford.....	4 25
Thomas Smith.....	9 00

**In Mayor Pendill's terms:**

R. C. Wetmore.....	\$3 00
J. G. O'Keefe.....	8 00
W. H. Greene.....	8 00
John Cary (clerk).....	4 50
John Connors.....	\$7 50, allowed 6 00

Thomas Smith..... 9 50  
L. C. Palmer (clerk)..... 3 00  
In Mayor Coles' term:  
John F. Mack..... \$ 6.00  
L. P. Crary..... 6.00  
Gard Maynard..... 6.00  
Jacob Fael (5 days)..... 15.00  
C. D. Blanchard (2 days)..... 6.00  
In Mayor Wheeler's term:  
J. F. Mack (1 day)..... 3.00  
John Connors (services)..... 7.50  
Charles D. Blanchard (1 1/2 days)..... 4.50  
Sidney Adams (1 1/2 days)..... 4.50  
W. A. Ross, (clerk)..... 4.50  
During the terms of Mayors Spear, Thurber, Nester and Clark the practice remained the same, of allowing \$3 for each day and generally \$3 more for the night work of vote-canvassing after election. The action above recorded, in Mayor Pickands' term, would seem to show that some question was raised over these bills then. During Mayor Thurber's term the legality of these bills was questioned but nothing was done about them. No question was raised during Mayor Nester's administration nor during Mayor Clark's two years, save at his last meeting the past spring, when Alderman Pendill first questioned the legality of these bills.

The foregoing resume of the records shows that the aldermen have abundance of precedent for these bills, and as said before, acquits them of any shadow of accusation of intentional transgression of legal technicalities. Meanwhile Mayor Longyear has referred the bills to the city attorney for consideration and will doubtless be governed by what Mr. Hill, after thorough search, shall find to be the exact law in the case.

**Keene as "Richelieu."**  
Of the beautiful performance of "Richelieu" given by Mr. Keene and company at the Casino Saturday night it is impossible to speak in too high praise. Mr. Keene's magnificent work in the leading role was most ably supported by the "Baradas" of Mr. Leacock, the "Mauprat" of Mr. Humphrey, the "Joseph" of Mr. Gaston, the "Francois" of Mr. Lawrence and the "Julie" of Miss Shannon and the minor parts were all well taken. Bulwer's masterpiece has seldom received a finer interpretation. "Booth never did it better" was the verdict of a gentleman present who has frequently seen that renowned actor in the part.

It is truly regrettable that the attendance at these two performances, the best that Marquette has ever seen, was not larger. The total receipts for the two nights were only \$540. With a guarantee of \$500 and 60 per cent over that amount, this leaves Mr. Ross but \$16 for his share. Consequently he loses money on the enterprise. This is exceedingly discouraging to Mr. Ross, who is sincerely desirous of bringing first-class attractions here. This small attendance is the reverse of creditable to the intelligence and culture of Marquette. The audience Saturday night was appreciative and enthusiastic, and applause and curtain calls were frequent, but the attendance should have been much larger.

**This Week's Amusements.**  
"Forget Me Not" is the bill for the opening of the Ida Van Cortland engagement to-night. The repertory for the remainder of the week will be "The New Magdalene," "Pygmalion and Galatea," "A Dangerous Woman," "Romeo and Juliet," and "Dens and Palaces," in the order named. Arrangements have been made to mount these plays in a style never surpassed in this city. Another feature which will enhance the pleasure of each performance will be the magnificent costuming. Miss Van Cortland's wardrobe is characterized by beauty, elegance and good taste, and that of her supporting company is no less admirable. The lovers of refined amusement should accord to Miss Van Cortland a hearty reception; for it may be safely said that no more excellent actress has ever appeared here.

**Mixture in Beer.**  
The agents of the Gettleman brewery down at Newberry seem to be trying to appropriate the reputation of Meeske & Hoch and the Upper Peninsula Brewing company of this city. In recent issues of the Newberry papers appears an advertisement calling attention to "Gettleman's Beer, manufactured by the Upper Peninsula Brewing Co." In connection with this appears the following personal:  
A. Gettleman, of Marquette, was in town Tuesday. Mr. Gettleman is one of the principal stockholders in the U. P. Brewing Co., of Marquette, who manufacture the famous Gettleman beer. Read their ad. in another column.  
There is no "A. Gettleman" in Marquette. There is a Gettleman brewery in Milwaukee. It would appear that either the Newberry paper must be very badly mixed, both in its advertising and news columns, or that some one is trying to purloin the well-earned reputation of the Upper Peninsula Brewing company.

**BUCKLEN'S ARNICA SALVE.**  
The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price, 25 cents per box. For sale by H. H. Stafford & Son.  
**Forced to Leave Home.**  
Over sixty people were forced to leave their homes yesterday to call at their druggists for a free trial package of Lane's Family Medicine. If your blood is bad, your liver and kidneys out of order, if you are constipated and have headaches and an unsightly complexion, don't fail to call at any druggist to-day for a free sample of this grand remedy. The ladies praise it. Everyone likes it. Large-size package 50 cents.
