A Living Dynamo. A correspondent in New London, Conn., sends out this remarkable story: George Rood, of Westerly, R. I., was struck by lightning, and after recovering consciousness it was found that his body was full of electricity. He is now able to sit up, but his body is so highly charged when the hands touch they can be sep-

arated only by the most violent rubbing. His feet are in the same condition, and he has to be careful to keep them apart. A person touching him receives a slight shock, and if he touches a watch he mag netizes it completely. Many people visit him to witness the curious manifestation of electricity's wonderful power.

A Gallant Arab's Queer Exploit. Lord Charles Beresford, one of the

popular heroes of the British navy, is fortunate in his opportunities. A little while ago he was appointed to the command of the ironclad Undaunted, and at the end of last month he found himself off Jaffa. A westerly gale sprang up, and the French cruiser Seignelay, caught without any steam, dragged her anchors and was driven on to a sandbank, where she was in danger of going to pieces. Although she drew nearly nineteen feet of water, she was driven into shoal

water only ten feet deep. Nobody supposed that she could be saved, but Beresford worked his own ship as closely in shore as he dared, got out his steel hawsers and chain cables, set all his men to work, and with the assistance of the French sailors managed to float her without serious damage.

WHAT CURED YOU?

Mr. B. P. McAllister, of Harrisburg, Ky., writes: "Having been a terrible sufferer from catarrh, and being now sound and well, the question often put to me is,"What cured you?" In answer to this often put question I feel it my duty to state that Swift's Specific (S. S. S.) is the medicine. I am such a true believer in the efficacy of Swift's Specific (S. S. S.) that I can honestly and conscientiously recommend it to any one suffering from catarrh. Have recommended it to many, and am happy to say that those whom I have induced to use it can bear me out in this statement. I also believe that it will cure any case of catarrh if taken according to directions."

After considerable discussion the following were presented:

"Resolved: That we consider it the enforcement of Sunday laws closing

"Resolved: That we deem it the manifest duty of every temperance man to discountenance any candidate for public office who declares himself or is known to be committed to the upport of the liquor interest."

These resolutions were adopted with but a very few votes in the negative. The sentiment of the convention seemed to be against legislative prohibition but it was not deemed wise or expedient to so declare in a resolution.

Indianapolis, Ind., was selected as the place of holding the next annual convention. After electing a full set of officers the convention adjourned without date.

Photographing the Dead.

It appears that a somewhat morbid custom exists among the Viennese of having the dead bodies of children and other persons dear to them photographed, and for this purpose the corpse used to be taken to the photographer's studio. The attention of the sanitary authorities having been drawn to the danger of the dissemination of infectious diseases by this practice, a decree has been issued by the Austrian minister of the interior absolutely forbidding the photographing of corpses in studios open to the public, and the photographing of bodies of persons who have died of any infectious disease by professional photographers, even in private houses.

Exception is made of cases in which such photographs may be required for police or medico-legal purposes. In the case of persons who have died of noninfectious disease, the corpse may be photographed at the private residence of the deceased, subject to the approval and on the responsibility of the medical official whose duty it is to verify deaths. This ordinance came into force on April 1.—British Medical Journal.

A Waterspout in the Gulf.

About 5 o'clock yesterday morning a waterspout measuring nearly 150 feet in diameter made its appearance in the gulf, off the southeast coast. It was moving in a northwesterly direction toward the bay and was increasing in volume as it proceeded. It was seen by several fishermen and the occupants of a number of small craft who were in its course and narrowly escaped being drowned.

Those who witnessed this nautical phenomenon state that it whirled with a zigzag motion and sent upward a sparkling shower of spray which fell in torrents into the angry waves. It was first seen shortly after the light rain which had appeared.-Galveston News.

Indian Relics.

George Debord, who lives three miles from Elijay, was in our office Thursday and showed us some rare relics which his son lately plowed up. He first plowed up some half decayed bones, which indicated an Indian grave. He found at the head three tin cups, nearly consumed with rust, at the feet an old fashioned black bottle; at the breast he found several dozen pure silver ornaments, made in the crude style of the natives, consisting of a finger ring, ornamented with a shield, a beautiful pair of ear bobs, a heart with a pin attached, besides several other fantastically shaped and round ornaments, having pins attached. He also found an iron tomahawk and several glass and stone beads. -Elijay (Ga.) Courier.

Spies on a Foreign Minister.

"I was surprised to see a United States detective dogging the heels of the Argentine minister on Broadway," said a Washington visitor. "But it is privately known that complaints have been made to the state department that the Argentine people are engaged in furnishing supplies to the Chilian revolu-tionists. Hence this lookout, I suppose, that has been put upon the representative of the Argentine republic in this country. I happen to know the detective, otherwise the shadowing would probably never have been noticed."-

Human Remains in a Silver Vein. A report comes from Leadville of the discovery of an arrow head, made of tempered copper, and of a number of human bones in the Rocky Point mines, near Gilman, Colo. The relics were disclosed 460 feet beneath the surface of the earth, imbedded in a vein of silver bearing ore. More than one hundred dolfars' worth of ore clung to the bones when they were removed from the mine Here is a puzzler for the geologists.

Nitrogen as an Anæsthetic.

The use of nitrogen as an anæsthetic was recently successfully tried in England. Nine patients took the gas, and in every case the result was the production of complete anæsthesia. The pulse was first full and throbbing, then feeble, In the advanced stage the respiration was deep and rapid, and there was lividity of the surface, the pupils were dilated, and there was more or less jactitation of the limbs.-New York Times.

Freaks of Paralysis

Simon Gormley, of Crab Orchard, Ky., was two years ago smitten with paralysis. He regained his physical health, but was unable to speak a word. A few days ago, while watching a game of ball, he received another stroke, which threw him into violent convulsions. He was put to bed, and the next day astonished everybody by sitting up and talking. He has regained his voice but has lost his recollection of all events during the past two years. It is believed he will recover.-Exchange.

SEWERAGE SYSTEM OUTLINED. Thinking that the people of Ishpemng may wish to know something of the plans and course to be followed in putting in the sewerage system, the MIN-ING JOURNAL takes pleasure in presenting a brief but comprehensive outline of this important work as planned by Sanitary Engineer Williams. The trunk sewer will begin at Carp River, running through private property to the interroad; thence along Division street to Lake street, Front street to Third street, Third street to Cleveland avenue, Cleveland avenue to Third street and Third street to the alley between Ridge and Spring streets. This will furnish an outfall for the sewerage and storm water of all of the settled parts of the city and will enable the old box drain, through the business part of town, to be done away with.

The rock excavation at Carp River will start below the dam at Deer Lake, with grade seventy-two above datum, The channel is to be forty feet wide, rising to a grade of seventy-five feet above datum at the upper end of the rock section. This, it is estimated, will carry the flood volume of the river with a depth of from four to five feet, the amount of rock excavation involved being about as follows: At dam, 1,350 cubic yards; at highway bridge 1,209 cubic yards; at railroad bridge, 1,418 cubic yards; at upper rapids, 3,663 cubic yard, total, 7,640 cubic yards.

The district to be drained comprises about 1,400 acres, and to do it properly will require 3,400 feet of 78-inch sewer, 1,500 feet of 72-inch sewer, 1,100 feet of 66-inch sewer, forty-four catch basins and fourteen manholes. The entire squeezing the hands of his many out July 11th, and since that time a good deal of work at Carp River has been done. The report of Supt. Harrison shows that during the month of July 500 cubic yards of earth and 1500 cubic vards of earth and 1500 cubic wards of earth and 1500 cub cost of the work is estimated at \$60,000. Mr. Williams' report was made out July 11th, and since that time a George nel is going aheadrapidly. The cut at the dam is entirely completed and the bed The pedro party given last even of the river from the dam to the highway bride is lowered to the proper grade. Work at the upper cut is very difficult, but good headway is being says that all surveys and profiles of each street in the city have been platted and finished and forwarded to Mr. Williams at Chicago. Bids for doing the work will be advertised for very soon and as much of the work will be done this year as may be possible.

The committee strongly recommended that the work be done according to the plans prepared; and, after considerable discussion, in which nearly all the aldermen participated, the report was accepted and the committee's recommendations adopted. The sentiment in favor of continuing the work begun on a sewerage system was general and gives evidence that the common council reealizes its import-

The features were Pedroes' great fielding, three put-outs and two assists.

Adams' fine work in the same garden. VALUABLE IMPROVEMENTS.

Morkin's batting and Ganns' splendid work behind the bat, his fine throwing nailing every man who tried to steal second and catching two men off bases.

A Big Crop.

A very peculiar contest was on hearing at the U. S. land office yesterday. It seems that 1865 William Papin, a The Marquettes kicked, the Ishpem- fisherman, located on section 33, 54-32, north of Portage Entry. The land was terday afternoon and still the game covered by a selection by the M. H. & went on even in a pouring rain, nine O. R. R. as indemnity and and was full innings being played. The ground was wet and the ball wetter; the pitchers could do nothing, every man in both Mauger settled on the land and the many responses to the land and the teams getting a hit, and the error col-umns tells how the fielders found the ties and Papin.

sphere. The game opened by Tanner being hit by Stellberger; Cull got a hit and stole second and then the two runs are in on Maister's fumble of Bath. came in on Meister's fumble of Rathbun's hit and Wilbur's sacrifice to Adams. Craft struck out, Pedroes hit for a base and then Houseman went out from Meister to Morkin. A base on balls, a two-bagger and two singles with five errors by the Marquettes sent substanstiated.

Today's Great Game.

The Upper Peninsula Business colgot an assist by a great throw to the home plate to eatch Tray while Meister was caught off second by Ganss and done for by Cull and Rathbun. The last half of the inning was where the rain play came in and there was bushels of it Marquette 6, Ishpeming 11.

The fifth and sixth invites were the second. The following is the batting order of the Y. M. C. A. team: Spencer, c; Sarman, 2nd b; Fitzgerald, Spence lege nine and the Y. M. C. A. team of it Marquette 6, Ishpeming 11.

The fifth and sixth innings were barren of results for both clubs, the fea- | 1 f; Clarke, 3d b; Donovan, f e; Maney,
