Farmers Convention Gets Into Terrific Uproar Over Third Party Movement.

REPORT OF CREDENTIALS COM MITTEE RAISES ROW.

Abusive Epithets and Charges of Treachery Exchanged and a Free Fight Seemed Certain

COMPANIES THREATEN TO CLOSE DOWN THE MINES.

General Strike Is Now Feared-Belief That the Militia Will Have to Be Called Out.

GOGEBIC RANGE TROUBLES. Bessemer, Feb. 23.-- [Special].-

Eight hundred timbermen of the Ashland, Aurora, Norrie, East Norrie and Pabst mines at Ironwood are on a strike. They demand an additional 25 cents which the companies will not yield. It is probable that the result will be a general strike, covering the Hisses and cries of derision drowned Gogebic and Penokee ranges. The companies say that if the strikers persist much longer the mines will be closed down. Trouble is apprehended and the militia may be called out.

CLEVELAND delivered a very sensible speech to the Ann Arbor students Monday, and he had the good judgment to abstain from any allusion to the political issues of the day in the course of it. It must have been hard for the ex-presipreviously. He must have great command over his "pheelinks."

THERE is quite a strike on among the imbermen employed in several of the largest mines of the Gogebic range. The men think they are not getting pay enough for their work. The time would not appear to auspicious for the inauguration of a strike to secure an advance in wages as the outlook for the ore trade is not as bright as it might be, or as it was a few weeks ago, but we presume the strikers understand what they are about. Men always do when they go out on a strike.

Mesaba iron range in Minnesota that bids fair to eclipse that which Burton and Moore engineered on the Gogebic range some years ago with such disassirous results to so many who put their money into the stocks of Gogebic iron properties exploited on the market by that pair of audacious speculators and the staff of assistants that they succeeded in gathering around them. The Duluth papers are full of statistics and predictions concerning the marvelous deposits alleged to be already proved up on the new range, and the stories they tell and figures they present stagger belief. A number of the Duluth News before us devotes a page and a half to a "write-up" of the range and the properties on which exploratory work has been done, the tenor of which may be inferred from this extract:

Bees Carry Toilet Cases The tongue of the hive bee is a most elaborate structure, admirably fitted for helping to pump up nectar. The wax producing organs of the bee are certain glands on the underside of the abdomen which are surmounted by thin plates, on which the wax is deposited in flakes, like miniature fish scales. It is taken from these plates by a pair of shears or pose and formed between two joints of the hind legs.

It is passed to the mouth, where it is chewed and rendered plastic by the jaws. The hind legs have many beautiful structures and modifications fitted for gathering pollen and cleansing the bee, while on the front legs there is a regular comb and brush, admirably adapted for cleaning the attennæ or feelers, which are very delicate and important sense organs.-Boston Tran-

There is no investment which is more safe and none which is more profitable than that made in well located property in a growing and progressive city. This is especially true when the transactions in real estate are free from reckless speculation. The present condition of the real estate market in Detroit is one of steady demand for well located lots for business, manufacturing and residence purposes. The east side is rapidly expanding and attracting the attention of investors in real estate and purchases are being made daily. J. S. Visger, the enterprising real estate dealer offers a golden opportunity for investmts of little or much, from \$100 up. Mr Visger conducts his business on a somewhat different plan from the ordinary real estate operators. At present he is offering several magnificent sub-divisions fully platted, streets all laid out. Complete abstracts brought down to date, furnished with each and every lot and offers any portion of his property in parcels to purchasers at acreage prices, thus enabling investors to immediately begin realizing a handsome profit. I dedire to impress on the minds of purchasers that I do not sell at retail, but at wholesale only. I can satisfy any purchaser that he can realize from \$50 to \$100 on each lot at once at retail prices. This is a chance of a lifetime for any one having money bearing small interest, to make a positive investment in real estate which will net him a handsome profit. It will be money in your pocket to give this your immediate attention, Any information pertaining to this or other real estate will be cheerfully furnished y JOSEPH S. VISGER.

part to objects along the beach.

The explanation of the undertow is simple. The approaching waves have a velocity depending upon the strength of the wind. So have the receding ones, but this is due to gravity and depends upon the angle of inclination of the beach. The breakers, therefore, with their greater velocity, run over the top of the waves, while the receding water keeps below.

SENATORS SKIP PRAYERS.

senators were not very punctual in \$30,000. The two hundred and fifty their attendance for not one-fourth of guests, most of whom were at dinner the whole number were present when the opening prayer was offered and the journal of last Friday read.

The resolution heretofore offered by Mr. Platt for an investigation by the committee on territories into the resources, social and other conditions, laws, etc., of Alaska, was taken from the calendar and agreed to.

The calendar was then taken up and bills were disposed of as follows:

joint resolution concerning mining debris in California, passed; ap propriating \$100,000 for a public building at Bismarck, N. D., passed; to fix compensation of keepers and crews of life-saving stations, passed. Under this bill keepers of life-saving stations —except stations known as houses of refuge—are to be pail \$600 per year aud members of the crews of stations are to be paid \$65 per month during the time the stations are manned.

The senate bill for an international bimetallic agreement was next taken up and Mr. Stewart made some remarks upon it but as the the morning hour had already expired it went over with-out action. The bill to prevent the adulteration and misbranding of food and drugs was then taken up as the uniformation of which they have only finished business and Mr. Paddock, who recently obtained. is in charge of it, made some brief re marks in its support. Mr. Bates and Mr. Coke spoke against the bill Without action the senate went into executive session and soon adjourned.

Black Cats to Become Plentiful. With regard to the Consolidated Black Cat company, which is going to breed black cats by the "thousand" on an island in the Pacific and make (so the projectors say) "millions" by the industry, I am of course very glad to think that maid servants and other ladies who ride in omnibuses and tram cars will soon be provided with handsome and fairly inodorous fur garments at reasonable rates, but I tremble when I think of the effect likely to be produced upon the canned meat trade. Canned rabbit curried (it is very difficult to eat it otherwise cooked) is now a very favorite luxury in middle class homes. How a Gold Discovery Was Made.

Mr. James F. Wardner, of Fairhaven, tells a singular story of how the gold quartz in Okanogan county, which is now being worked as the Little Falls and Red Jacket mines, was found. "On Sept. 18 last," he says, "two prospectors, Redmond and Herrick, were out hunting and prospecting, and they had with them a bird dog named Skookum. They were working through the Salmon river basin when they came over a hill and looked down into a little ravine with a brook running through the bottom. They saw in a bush overhanging the brook a pheasant, at which one of the men shot. The bird fell into the water and the dog Skookum started after it. As he scrambled back with it-in his mouth his paw pulled down some soft green moss from the rock at the side of the stream. The prospectors noticed that the stone showed white under the moss. They made an examination and found it to be gold bearing quartz. They followed the lead and located the two claims.

"Well, I had been for some time looking for that sort of ore, and so on my recent trip to Okanogan I bonded the two claims, and with them included the black dog Skookum. We are now going to take possession and arrange for development."—New York Post.

On the corner of one of the business treets of the city the other morning a shoeblack had just finished polishing the shoes of a well dressed and gentle appearing man. The latter was unfortunate in having a deformity which compelled him to wear a shoe on one of his feet with an exceedingly thick sole, thus endeavoring to make up mechanically for what nature had denied him. "How nauch shall I pay you?" he asked

of the boy.

"Five cents, sir."

"Oh, but you should have more than five cents for polishing my shoes," said the gentleman, tapping the thick sole significantly with his cane. "No, sir," said the boy; "five cents is enough. I don't want to make no money

A Novel Patric. A foreign textile journal records the invention of a new kind of looped fabric which has a novel and beautiful effect, with a durability never before attained. The peculiarity about it is that worked is used for the thread forming the figure of the design and alpaca or mohair for the threads torming the ground of the design. The contrast between the lustrous and beautiful threads of the mohair and of the worsted, it is said, forms an effect that is strikingly novel.

NO Impurities in Royal Baking Powder.

It is the only baking powder yet found by chemical analysis to be free from all impurities and absolutely pure. This perfect purity results from the exclusive use of cream of tartar specially refined and prepared by patent processes which totally remove all the tartrate of lime. The cost of this chemically pure cream of tartar is much greater than any other, and it is used in no baking powder except the "Royal."

Dr. Edward G. Love, formerly analytical chemist for the U. S. Government, who made the analyses for the New York State Board of Health in their investigation of baking powders, says of the purity and wholesomeness of the "Royal":

"I find the Royal Baking Powder composed of pur and wholesome ingredients. It is a cream of tarta powder, and does not contain either alum or phosphates or other injurious substance.

(Late U. S. Gov't Chemist) "E. G. LOVE, PH. D."

Prof. Love's tests, and the recent official tests by the United States and Canadian Governments, show the Royal Baking Powder to be superior to all others in strength and leavening power.

> One of Colonel Ingersoll's Stories. They tell a story of Mrs. Jones, of Chicago, who visited Rome and while there was shown some of the great marble masterpieces of the world, among others the Apollo Belvidere. They pointed it out to her as being the most perfect form of man that had ever been conceived by the brain of an artist, and the old woman walked all around it, looked at it from every point of view, and she says:

That's the Apollo Belvidere, is it?" "Yes."

HE WAS SURPRISED.

On Monday evening at 8 o'clock as Alderman Beerling was about leaving his home to go down town to transact the song was concluded, Professor Crim's orchestra immediately played two selections giving Mr. Beerling no chance to even ask what was the meaning of the intrusion.

Rav. J. A. Nelson, pastor of the Swedish Methodist church, then ad-dressed Mr. Beerling with a few well hosen remarks, upon the conclusion of which he resented him with an elegant silver tea set. Mr. Beerling said that he was thankful for the handsome token and that he was never so taken by surprise in the course of his life. It was Mr. Beerling's fiftieth birthday and and was one that that gentleman will have occasion to remember for many years to come. A lunch of coffee, cake aud fruit was served, after which the evening was spent in listening to music by Crim's orchestra, songs by various ladies and gentleman and in social games until the hour of midnight, when ome of Mr. Beerling.

The Way It Blew on the Lake. A party of vachtsmen were becalmed out on Lake Ontarie Sunday afternoon, and while waiting for a breeze the time

was occupied in spinning yarns. There were two or three old salts on board, and they did all the spinning, while the younger and less experienced tars sat and smoked and listened. Finally one of the old salts took his pipe from between his teeth long enough to draw breath, and said:

"You fellows give me a pain talking about big storms. Why, I was out in a storm in the summer of '69 that was so much bigger than any that you have ever seen that they are like cat's paws compared to it."

Then he stopped and began industriously to draw upon his pipe again.

"Tell us about it," said the young fellows in chorus.

"It was in the month of July in the year 1869, and I was out on the lake in a yacht of mine," he said, after pausing long enough to fill his pipe afresh and light it, "and the wind began to get pretty fresh. I paid but little attention Judge W. P. Raley, who had quite a severe attack of grip has recovered and is attending to business. "I gave orders to take in sail, but before the men could lay hands on a rope a big puff came and away went the sails into ribbons. There we were out in the middle of the lake with no sails, and the situation began to look desperate. How we were going to get in I did not know, but the very storm itself furnished us a way and we rode safely to shore."

Here he stopped and began to smoke "How did you get in?" asked the

They cut his shoe off and made him as comfortable as possible until Drs. Dawson and Northrop arrived. They found the foot in such shape that they immediately advised the removal of the injured man to the hospital. It is feared that amputation will be found necessary, as the bones of the foot seems badly crushed near the ankle. Leitch showed good nerve for during his ride to his boarding house he pulled away at his pipe as imperturbably as ever, only holding his leg with his hands so to his boarding house he pulled away at his pipe as imperturbably as ever, only holding his leg with his hands so that the crushed foot could swing outside of the cutter. Garnisheeing Advertisers

Attorney John R. Rood and Mr. Night Call-Charles Merrygold, business manaager for Dr. Speer & Co., took a little business trip up to Ishpeming yesterday -and thereby hangs a tale. Some time ago a Chicago firm placed in Mr. Rocd's hands a bill against the Ishpeming Daily Press with instructions to collect it. The bill was for \$45 and finding no other way to collect it Mr. Rood decided to garnishee the firms advertising in the Press. As Dr. Speer & Co. are liberal advertisers he tackled them first. The papers were returnable before Jus-

The papers were returnable before Justice Gunderson at Ispeming yesterday.

On Monday, a legal holiday and with all banks closed, Mr. Rood received from Mr. H. J. Stevens a check for the amount of the claim. But anybody can write checks and the attorney was too sharp to neglect his proceedings before he knew that the check was worth something. Early yesterday he telephoned the bank on which the check

was drawn and received the reply, "No funds." Accordingly he visited Ishpeming with Mr. Merrygold and after presenting the check in person at the bank and again being told that Mr. Stevens had no funds there, he dropped in on Justice Gunderson at the appointed hour and, as Mr. Stevens did not appear, was given judgment by default for the amount of money in Mr. Merrygold's hands due the Press, Merrygold's hands due the Press \$15.38, less 89 costs. The heavy costs left only \$6.38 to apply on the account of \$45, so Mr. Rood is out gunning for more advertisers who owe the Press. It's pretty hard to discover such a person now-a-days, but Quinn will probably be the next one on the list.

has ever visited Marquette. This fact should call out a large attendance, esshould call out a large attendance, especially since the recital is a benefit for Marquette's popular manager, Mr. W. A. Ross, in connection with the placing on the opera house stage of the magnificent Decker Bros.' grand piano just received from New York by Mr. Ross. The fee is owned in large part by Marguette parties, Judge Williams being one of the owners. This will give greater variety to the entertainment and the vocal numbers will be a treat in themselves, as the names looks as if the company had a first-class hand
