

# THE DAILY MINING JOURNAL.

NUMBER 2598.

MARQUETTE, MICH., THURSDAY MORNING, OCTOBER 20, 1892.

PRICE FIVE CENTS.

## "WELL-BRED" STATIONERY.

"The good breeding and good taste of a lady—such abused word—are subtly yet conspicuously shown in the stationery she uses."

It may seem strange to speak of stationery as "well-bred" but we take the liberty to employ the phrase as a compact one to designate the kind of writing materials used by well bred people in their correspondence.

We have just received a full line of Hard & Pike's correct styles in paper and envelopes. The prices vary but it is all "well-bred."

H. H. Stafford, Son & Co.

## WE HAVE INAUGURATED A 3-DAY SALE SYSTEM.

For THURSDAY, FRIDAY and SATURDAY, Oct. 20, 21 and 22.

25c. Whisk Brooms 15c. .90c. Wash Tubs, 65c.  
50c. Glass Oil Cans, 25c. 3.50 Wringers 2.50.  
1.25 Wash Tubs, 75c. No. 2 Pearl Top Chimney, 8c.

## THOMPSON & RUSSELL'S Bazaar.

## TERRA-COTTA AND WHITE.

Chicago's Municipal Colors Are Used With Fine Effect in Decorations.

## AND THE STARS AND STRIPES ARE EVERYWHERE.

People Coming in by Dozens of Train-Loads to Take Part in the Festivities.

## CHICAGO ALL IN BLOOM.

CHICAGO, Oct. 19.—For three days Chicago is to be given over to pageantry and pleasure and the indications are that the attending ceremonies, formal and informal, official and unofficial, will be witnessed by nearly a half a million people from abroad. Elaborate arrangements have been made to give the ceremonies of dedication that official character which should attend an enterprise of such international importance and the World's Fair city is attired in a costume of many colors. From every important edifice in Chicago, from every point and pinnacle, from every balcony and window are suspended the colors that have been invoked for the adornment of this occasion. The stars and stripes naturally predominate but the colors of all nations mingle in producing the grand aggregate result. The municipal colors of Chicago, a new fad called into being by the supposed exigency of the occasion, are seen on every hand and although now and then some representative merchant may be found who has omitted to suspend the stars and stripes over his portal the triangular banner of terra cotta and white is never wanting to attest his municipal pride.

Most of the decorations that adorn the great buildings of Chicago display considerable taste and the variety is such that the observer is spared that monotony so frequently attending occasions of profuse ornamentation. The city hall makes a pleasing appearance, with its vast pillars completely enveloped in the inexhaustible terra cotta and the municipal coat of arms suspended at the main entrance, crowned above by the shield of the United States. The emerald green that finds a place in the flags flying from the balconies and windows is a delicate compliment to the aldermen. The post-office is a representative structure that presents a wealth of ornamentation but in the decorations here the stars and stripes and the varied colors of that national emblem play the most conspicuous part. Portraits of Columbus are seen everywhere and for the first time since the national convention the familiar features of political leaders are obscured.

The prominent people already in the city are ex-President Hayes; Vice-President Morton; the justices of the supreme court of the United States; General Schofield; Cardinal Gibbons and the papal legate, Archbishop Satolli; Governors McKinley of Ohio, Barkley of Connecticut, Russell of Massachusetts, Markham of California, Muir of Washington, Brown of Rhode Island, Rount of Colorado, Burleigh of Maine, Fifer of Illinois, Reynolds of Delaware, Knapp of Alaska, Francis of Missouri, Tuttle of New Hampshire, Holt of North Carolina, Abbott of New Jersey, Merriam of Minnesota, Chase of Indiana, Burke of North Dakota, Boyd of Nebraska. Ex-Governor Campbell of Ohio, Admiral Belknap, Congressman Springer, Senator Cullom, Senator Brice, George W. Childs, Col. Elliott F. Shepard and various other well known Americans are also already in the city. The following cabinet officers and their families arrived late this afternoon: Secretary J. W. Foster and wife, Secretary Charles Foster, wife and daughter; Secretary S. B. Elkins and Miss Elkins; Secretary John W. Noble and family; Secretary Noble and Mrs. Noble; Attorney-General and Mrs. Miller; Secretary Rusk and Mrs. Rusk; Secretary Tracy, Mrs. Wilmerding and Miss Alice Wilmerding; Assistant-Secretary Soley and Mrs. Soley.

Among the members of the foreign diplomatic corps from Washington are the following: Mexico—Mr. Romero, Mrs. Romero and Mr. Plaza; Great Britain—Hon. Michael R. Herbert and Mr. Arthur Robert Peel; Corea—Mr. Ye Cha Hun; Hawaii—Mr. Mott Smith; China—Messrs. Yung Kwang Yu and Yung Kwai; Peru—Dr. Peiro Selgar, Dr. Jose Yrigayan and Mr. Manuel Guerra; France—Mr. Paul Desprez; Germany—Baron Clement von Rottler, Lieut. Albrecht Hesse and Lieut. Kurt von Mitzau-Besscher; Costa Rica—Mr. Barado Calvo; Argentine Republic—Mr. Curranza; Chile—Mr. Anibal Cruz.

It is estimated this evening that in the great civic parade tomorrow at least 100,000 men will be in line, under the direction of General Stockton and General Miles. The procession will include all the distinguished guests in the city, police mounted and afoot, the city officials and hundreds of societies. The men will march in the double-rank, twenty-file formation and it is estimated that the parade will be five hours passing a given point.

The railroads today were nearly swamped in the tremendous rush of people from all over the country. The extra trains were counted only in dozens. From every passenger depot in Chicago people poured in floods and for a time after the arrival of every train the sidewalks in the vicinity of the depots were impassable. Many of the trains arriving were much longer than usual, extra cars having to be added to them to accommodate the passengers, and every seat in all of them was occupied. The number arriving in the early part of the day was nothing compared to this evening and what it will be the next three days to come.

## MAY PASS A MINER LAW.

Democrats Only Show to Save Anything in Wisconsin.

MADISON, Wis., Oct. 19.—There are threats by the democratic members of the legislature to pass at this special session a law similar to the Miner law of Michigan, providing for the choice of presidential electors by congressional districts. Some of the principal democrats were consulted today relative to the rumor and they say they do not think the legislature can pass such an act under the call made by Governor Peck. The fact that the supreme court of the United States sustained the constitutionality of the Miner Law has encouraged them to make the threat however. They confess there is a probability of their losing the electoral vote of the state unless they make some such move as that mentioned. Some of them have seriously thought of requesting the governor to make a new call and include this matter therein but Senator Vilas, Attorney-General O'Connor and others say they had not heard of it. The committee on apportionment is busily engaged in mapping out a bill but has not reached a point where it can present any thing tangible to the legislature.

## MELLER'S AWFUL CRIME.

Lived With His Murdered Wife's Decaying Corpse for Weeks.

LONDON, Oct. 19.—The body of a woman horribly mutilated, badly decayed and partly devoured by rats was found in the cellar of a house near Oldham today. It proved to be that of Mrs. Joseph Meller, wife of the occupant of the house, and he was at once placed under arrest. The body had evidently lain in the cellar for weeks and all the time Meller had lived there. When the discovery was made Meller was at work digging a hole beneath the kitchen floor, which he had torn up, supposedly a grave in which to bury the body. The odor throughout the house was awful. He has recently told several stories to account for his wife's absence, informing two or three persons that she had gone to nurse her mother who was sick. Mrs. Meller was last seen alive September 3. She and her husband had frequent quarrels about a young woman with whom Mrs. Meller said her husband was too familiar. Meller today asked permission to see the young woman but the police refused.

## LET THEM FIGHT AWAY.

Perhaps They Will Kill Each Other and End It.

LEBANON, Ky., Oct. 19.—Terror reigns on Scott's Ridge in the southwest part of this county and a desperate battle is expected at any moment between the Skippys and their friends and the Underwoods, Buleys and Skaggss on the other. Each side numbers about twenty-five men all heavily armed and ready for the fray. Both sides have out their pickets and travel through the mountain sections has been entirely suspended. The officers of the law are powerless to do anything and are afraid to venture among the warring factions. The present trouble dates back several weeks ago at which time "Shake" Shipp's wife was outraged in Taylor county near Ball Hollow, by three men Shipp's sworn out warrant charging Buley, Skaggss and Underwood with the crime. They had a preliminary hearing at Campbellsville and were released. Shipp's lived near Ball Hollow and he was at once notified to leave or his life would pay the penalty. Shipp's left Ball Hollow and settled near the house of his brother, Bob Shipp's, in this county.

## SENDING OUT SPEAKERS.

Minister Lincoln Will Make Three Speeches in Indiana.

NEW YORK, Oct. 19.—The closing days of the campaign at republican national headquarters are very busy. Mr. Hahn, in charge of the speakers' bureau, was overwhelmed with callers today. Among them was Chauncey M. Depew, who called to make arrangements for his western trip. Mr. Whitelaw Reid and Mr. Depew will address a meeting at Indianapolis on the 26th. Minister Robert T. Lincoln, who likewise called on Mr. Hahn, was assigned to make three speeches in Indiana next week, dates to be arranged by the state committee. Mr. Hahn has plans for one or two meetings for Reid in New Jersey and two or three in Connecticut after which the candidate for vice-president will give his time to the canvass of New York. Mr. Blaine has not yet visited chairman Carter at his up-town bureau. He is, however, kept well informed about what is going on there.

## ASSAULTED BY STRIKERS.

Several Cowardly Waylayings on the Sidewalks of Homestead.

HOMESTEAD, Pa., Oct. 19.—The rapid discharge of a revolver about 2 o'clock this morning on Fourth avenue aroused the people. John Mechling, a non-union man, was found afterwards on the sidewalk bleeding from a wound in the head. He had a revolver in his hand and stated that he had been assaulted on his way home by two men, one of whom knocked him down with a club. Though stunned, Mechling drew a revolver and fired. The men ran away on the second shot, though neither was hit.

Logan Jones, inspector in the 119-inch mill, was knocked down and his head cut by a blow from behind as he was on his way home from the mill about 1 o'clock this morning. Two other non-unionists were assaulted during the night. There was no change in general wage situation this morning.

## Throne of Afghanistan.

LONDON, Oct. 19.—The Standard's Berlin correspondent says: "It is reported that the ameer of Afghanistan will take his illegitimate son to Jullabai to seek General Roberts' support of his accession to the throne in the belief that English influence will overcome the objections of his subjects."

## FIRED FOR GOOD CAUSE.

No Politics in the Removal of Associate Justice Anderson of Utah.

## CORRUPT PRACTICES CHARGED BY INFERENCE.

What Solicitor-General Aldrich Has to Say About the Removal of a Utah Judge.

## SHOULD PUBLISH THE FACTS.

WASHINGTON, Oct. 19.—Judge T. J. Anderson, whose resignation as associate justice of the supreme court of Utah was handed to the attorney-general on Monday, is indignant at the administration. He says that his resignation was forced and that the real reason for it was that he is a democrat. Solicitor-General Aldrich said this afternoon that if Judge Anderson requested that he presumed the attorney-general would consent to the publication of the letters written by the judge as well as other matters reflecting upon his character, now on file in this department.

"I will add," said Mr. Aldrich, "that if there was ever a case in history which called for the prompt retirement of a judicial officer that case, in my opinion, is Judge Anderson's and any attempt to give it a political character cannot be successful, as such charges are wholly without foundation."

## BORDEN MURDER SUSPECT.

John Woods Arrested at Richmond on Apparently Slight Grounds.

RICHMOND, Va., Oct. 19.—A good-looking and intelligent young man claiming to be named John Woods, who came here about two weeks ago, has been arrested on suspicion of having been in some way connected with the Borden murder. When asked where he was at the time of the tragedy he said that he was probably in Jersey City or Newark or Philadelphia. He stated that he knew Lizzie Borden by reason of having seen her on the streets of Fall River twice and again in church but that he never spoke to her. Wood, however, told the officers who arrested him that he knew the girl well and that he and she were good friends. The popcorn man for whom he worked states that the prisoner told him that he (Wood) had taken Lizzie Borden out to the theater and to church a number of times. When first questioned as to how long he had lived in Fall River the accused replied only four months, two years ago. He afterwards admitted that he resided there the first half of this year, leaving there about the first of July. When he first lived in the place, before the crime was committed, he was, according to his statement, in the employ of James Marshall, a hat manufacturer. He admits that he once went under a different name.

## FORD FROZE HIM OUT.

Milton R. Wood's Plaint to the Wayne Circuit Court.

DETROIT, Oct. 19.—Milton R. Wood, member of the chemical firm of John R. Ford & Co., at Wyandotte, Mich., today petitioned the Wayne circuit court to dissolve the partnership and appoint a receiver for the firm. In his bill of complaint Wood alleges that October 16, 1889, he entered into an agreement with J. B. Ford, Edward Ford, E. L. Ford and J. B. Ford, Jr., of Creighton, Pa., by the terms of which the Fords were to put \$180,000 into a corporation against certain patents for the manufacture of alkalies and other chemicals owned by Wood. He was to manage the concern and receive \$2,400 salary the first year, which was to be increased by stages to \$7,000 in the fifth year. Wood claims that he did all that was required of him under the contract but nevertheless John B. Ford asked him to sign a notice of dissolution of partnership. When he refused to do this Wood says he was locked out and another manager put in his place.

## BRIGGS AND HIS HERESIES.

Everlasting Case Now Up Before the New York Synod.

ALBANY, N. Y., Oct. 19.—The Presbyterian synod convened this morning, Moderator Parsons presiding. The reports on the work of the past year were submitted from the different presbyteries, as well as reports from the several committees. The moderator then announced members of the judicial committee which is to pass on the complaint of Dr. Briggs. The complaint of Dr. Briggs will not come up in the synod until it has been passed upon by the judicial committee. The judicial committee met after the noon recess and took up the appeals of Dr. Briggs and Dr. McLeod. The latter's appeal was referred to a sub-committee of three.

## IN FIGURATIVE LANGUAGE.

Senator Aldrich Talks on the Tariff at Philadelphia.

PHILADELPHIA, Oct. 19.—Senator Aldrich of Rhode Island spoke here tonight at the Academy of Music before a large audience. Mr. Aldrich's speech was entirely devoted to the subject of the tariff and benefits of a protective policy over a tariff for revenue only. Throughout it bristled with figures which the Rhode Island senator used in support of his views.

## Forecast of the Weather.

WASHINGTON, Oct. 19.—8 P. M.—The weather bureau reports the following as its forecast for the next 24 hours: For upper Michigan: Fair; slightly warmer; southwest winds.

First National Bank of Marquette

G. C. BITTNER & CO., Toledo, O.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED). Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to Upper Peninsula interests.

SUBSCRIPTION RATES: Per year, by carrier, \$10.00 Per month, by carrier, \$1.00 Per year, by mail, \$8.00

ADVERTISING RATES reasonable, and furnished on application.

MARQUETTE, MICH., OCTOBER, 20.

Entered as mailmatter of the second class in the postoffice at Marquette, Mich.

SHIPMENTS of iron ore to date this season aggregate 6,861,630 tons. This is in excess of the shipments at the corresponding date last year, when the shipments footed up only 5,060,860 tons.

BETWEEN 6,000 and 8,000 tons of Mesabara ore will be shipped to Ohio and Pennsylvania furnaces this season for test runs to determine how the ore will work in the furnace and its quality. It will come from the Mountain Iron mine. The railroad is now in to that mine and the first ore will be shipped over it this week.

MR. JOCHIM, the Marquette county candidate on the republican state ticket, is making a splendid canvass for the entire ticket and is winning votes for it every day. The nominee for state treasurer, Mr. Hambliter, is doing effective work also. If the lower peninsula candidates for state offices are working as energetically and effectively as are the two taken from this peninsula there can be little doubt of the result in the state in November.

MR. FINN is in the copper country this week straightening out his fences in that section, where they are said to have got into a shockingly demoralized condition in consequence of recent elemental disturbances caused by his breath. Mr. Finn sets the air in motion altogether too much for the good of his candidacy and his party. The democrats would be voted ahead in this district if they had muzzled him after having nominated him.

A CAMPAIGN document is being circulated among the farmers which asks them to remember when they go to the polls this year that they are in the habit of hitching a taxed horse to a taxed wagon by means of a taxed harness, and driving to town, where they buy this, that and the other thing which is taxed. The document omits to say, however, that the wagon now costs \$50 instead of \$125, as it did a few years ago; that the lumber it brings back from town costs \$12, where then it cost \$30; that it is put together with nails costing \$2.75 a keg, instead of \$7; that it is painted with paint costing \$7 per 100 pounds, instead of \$11, and mixed with linsed-oil costing 45 cents a gallon, where then it cost \$1.

BURKE COCKRAN expresses the opinion that in national politics and in all questions affecting the American people the voters of Irish birth are essentially and emphatically American citizens. This is equivalent to saying that all Irish-Americans in the coming election will vote the republican ticket.—Grand Rapids Eagle.

In which case the Irish-Americans would be better citizens of the United States than Americans who can run their lineage back to Plymouth Rock. very many of whom are now working with the democrats. If we get a fair share of the citizens of Irish birth and descent to vote the republican ticket it will be all that can be expected. The MINING JOURNAL is not aware of any rule that applies to that class of voters which does not apply with equal force to any and all other classes.

MR. W. G. HARDY, a mining expert employed to investigate and report on the tin mines in the Black Hills region, tells the Minneapolis Tribune that there is now on the dumps at the mines being opened there "60,000 tons of tin, enough to supply the whole world for two years." The statement "would seem beyond credibility," remarks that paper, "were it not that the manufacture of tin requires only 5 per cent of tin to 95 per cent of steel." Mr. Hardy gave the Tribune these facts about the Dakota tin mines, which are commended to the attention of the "tin plate liars" who have so much to say just now about the impossibility of creating a tin plate industry in this country because we "haven't got the tin."

The Harney Peak Tin Mining and Manufacturing company has something like 800 claims. Two of these have been developed sufficiently to show that they are practically inexhaustible. The ore runs as high as \$7 per cent tin, and it is a well known fact that 2 per cent ore can be profitably worked. The mines are unquestionably the richest in the world. The tin company has already expended \$3,500,000, and is now building reduction works. At present the ore has to be shipped for reduction. When the plant is completed it will be equal to the production of all the tin consumed in the world, which is about 25,000 tons annually. The tin mines of Cornwall and Wales are rapidly becoming exhausted and it will not be long till the old world buys its tin in the Black Hills.

THE Engineering and Mining Journal has this report on copper in its last issue:

At the end of last week copper experienced a rather heavy advance, as after a few transactions had been closed at 11 1/2 cents, the Catmet declined to sell below 12 cents, while some of the other companies refused less than 11 3/4 cents, at which prices only small quantities could be had. A sale of nearly 1,000 tons for export also had been closed at 11 1/2 cents, sufficient proof of the good prices now paid abroad for fine copper. The demand on the Lake companies certainly has been large and they are quite busy filling contracts already in hand. Consumers also report a much better state

of trade, but complain somewhat of the prices realized for the manufactured article. Casting copper has profited to the same extent as Lake and no good brand can be obtained below 10 1/2 cents. For furnace material quite a good demand exists, and Arizona pig copper containing 95 per cent is held rather above market value, at 10 3/4 cents generally, but the little that is for sale commands this price owing to the lack of larger supplies. The reports from England show that trade there has been rather better of late. From India there has been a noticeable good demand, and the firmer tendency in silver has greatly accelerated business. For wire there is a very large demand.

The American consul at Bradford, England, which is the center of the worsted industry in that country, has been making some investigations into the rate of wages paid weavers there and finds that the best average falls under \$3 per week. Before the McKinley tariff went into effect the manufacturers were making a profit of 15 to 20 per cent, but they are not doing so well since. It will be noticed that the weavers were not getting enough in that free trade country to give them a decent living though the manufacturers of worsted goods were making a larger average profit than industrial enterprises in this country can show.

The explanation of this is found in the fact that with us the workman is too well-to-do and independent to be at the mercy of his employer, as he is in free trade England, hence the American manufacturer must pay better wages and be content with lighter profits. Nevertheless the democrats are asking the workmen of the country to assist them in establishing the English system here. They would be great fools to do it. Many of them had a chance to test that system thoroughly before they came here to get away from it, and they will not be likely to vote to set it up here now. The democrats are trying to delude the labor vote into supporting free trade, but they will get little aid and comfort in that quarter this year. They stand on a platform of absolute hostility to the interests of the wage-earners and the latter are intelligent enough to perceive this and wise enough to use their ballots for their own protection.

Signaling by Balloon. A series of interesting experiments was conducted the other night at Stanford Bridge Grounds, London, with balloon and apparatus invented and improved by Mr. Eric Bruce for use in military signaling at night over intervening woods and hills. Within the balloon are hung on a small swinging ladder six incandescent lamps, connected by insulated cable with a battery on the ground, worked that night at twenty-four voltages and giving sixty candle power of illumination. By ready manipulation of the battery at the instrument the operator flashes on the translucent sides of the balloon the signals of the Morse or any code, and these can be easily read at a distance of six miles.

The balloon used was a small one of eighteen feet diameter, containing 1,000 feet of gas, and was held by cable at a height of about 300 feet. The strong wind prevailing rendered the position of the balloon unsteady and unobtain, but the signals were nevertheless read by military experts, and were answered from a station on land. The experiments were witnessed by Prince Edward of Saxe-Weimar, by military attaches of the Chinese and other embassies and a number of scientific men. The experiments were varied by hanging the lamps outside below the neck of the balloon and flashing direct. The illuminated balloon when a few feet above ground gives a beautiful light, and can be utilized when required for executing work at night.—London News.

Ionized the Wrong Englishman. The Hotel Del Monte at Monterey, Cal., is stirred up over an ludicrous mistake by which a prosaic English merchant was ionized as Robert Buchanan, poet and dramatist.

The Briton arrived at the hotel three days ago with two friends. He registered in a fine, literary hand, and as he bore a strong resemblance to the author several ladies declared he must be the author of "The Shadow of the Sword." So several ladies desired him to write his autograph in their albums with some poetical sentiment. He received all their flattery complacently, but grinding out poetry for them kept him up all night and the result was something to shake confidence in their idol.

The next day he was the center of an admiring group. His companions became suspicious and asked the hotel clerk why so much attention was paid their friend. They were amazed when they learned the true reason, because they declared their friend had never heard of Buchanan. They broke the news gently to him, but his conceit received a great shock. All three packed and left before disclosures came.—Cor. Chicago Herald.

THE GREATEST STRIKE. Among the great strikes that of Dr. Miles in discovering his New Heart Cure has proven itself to be one of the most important in the world. The tin company has already expended \$3,500,000, and is now building reduction works. At present the ore has to be shipped for reduction. When the plant is completed it will be equal to the production of all the tin consumed in the world, which is about 25,000 tons annually. The tin mines of Cornwall and Wales are rapidly becoming exhausted and it will not be long till the old world buys its tin in the Black Hills.

Swallows at Sea.

Two days after leaving Port Said, Egypt, we had some very unsettled weather. Looking southward I observed what appeared to be a small black cloud rising and coming steadily toward our steamer. When I looked again a few minutes later, instead of seeing the cloud I saw some hundreds of swallows. They flew around our steamer several times, as though undecided whether to stay until the storm passed. At last, just before dark, several of them alighted on the stay of our main funnel, which was soon one black mass of birds. The rain came down in torrents, and it was pitiful to see those frail creatures struggling with the wind and rain.

Those of them that could not find a roosting place soon commenced to fall on deck quite helplessly. I picked up all those that fell on the bridge deck and lodged them in the chartroom. Those birds that fell on the foredeck were sheltered in the forecastle by the crew. The next day came in bright and clear, with a light westerly breeze, and all the swallows took flight just at sunrise, flying in a northwesterly direction. The captive birds were soon set free, and they followed in the wake of the others. I may say that all the birds we had were able to fly except one, and it died during the day. Several dead ones were found on the decks at daylight. These birds had beautiful plumage, and I fancy they looked rather smaller than the swallows I have seen in England. The captive birds had golden brown feathers just above and below the beak, and white breast; back, black feathers with a bluish tinge; wings and tail brown, and four white spots across.—New Castle Chronicle.

The Coincident Curse of Gold. The goldseekers of both America and Australia have a singular but well grounded superstition that the discoverers of hidden treasures are sure to meet with violent deaths. The original proprietors of between thirty-five and forty of the most prosperous gold and silver mines in this country are known to have come to just such ends. Out of the forty or less twelve were shot or stabbed to death in saloon or other broils, five committed suicide, three were engulfed by landslides, five turned murderers or robbers and were caught and executed in various ways, one fell into a boiling spring and had the flesh literally stewed from his bones, while the others have disappeared and no one knows what ever became of them.

George H. Fryer, once the millionaire proprietor of the Fryer Hill mine, committed suicide in Denver after spending the last nickel between himself and starvation. The discoverer of the great Standard mine, in California, was caught and swallowed up in an avalanche; Colonel Story was killed by Indians; William Fairweather, of the famous Alder Gulch mine, died with the "frenzied horrors" after a continuous two years' debauch. "Farrell of Meadow Lake" died with a terrible disease in a San Francisco hospital. The owner of that great mine, the Homestake, became a highwayman and was shot while robbing a stage coach. John Homer tried the same route that Fryer we. "Doughnut Bill," "Ninemile Clarke," "Old Eureka" and many others were killed in saloons.—St. Louis Republic.

Finest Carpets in the World. I mean to make a pilgrimage to Fontainebleau in order to see two wonderful carpets which have been transferred to the palace by the president's orders, and which are said to be the most superb articles of the kind in the world. They were ordered by Napoleon III at the Gobelin manufactory in 1868. They are of colossal dimensions, one being nearly thirty feet square, while the other is eleven yards long and ten yards wide.

It took ten years to complete them, and once finished their extraordinary size caused them to be packed away in the storehouse of Les Gobelins, whence they were not extracted even to be exhibited at the exhibitions of 1878 and 1889. They are the finest articles of the kind that have been produced for the French government since Louis XIV ordered "ninety-three carpets for ceremonies and festivals" to be manufactured at La Savonnerie for the great ballrooms and reception rooms of the Louvre and of Versailles.

The smaller of the two, which has a yellow ground, is set down in the inventory as being worth \$40,000, the larger, the ground of which is black, being estimated at \$50,000, though the real value of each is stated to be at least double.—Paris Letter.

How Sir Gavan Duffy Looked. Mrs. Carlyle, in her "Journal," thus describes Sir Charles Gavan Duffy as he looked in 1844 during a visit he paid to "the sage of Chelsea." "Mr. Duffy quite took my husband's fancy, and mine also to a certain extent. With the coarsest of human faces, decidedly as like a horse's as a man's, he is one of the people that I should not get to think beautiful."

Sir Charles Gavan Duffy himself tells this story: An artist named Crowley painted his portrait and bestowed on him a dreamy poetic face which might have passed for Shelley's. The portrait was shown to Daniel O'Connell by the artist in presence of Duffy. "Is not that very like Duffy," said Crowley. "Yes," said O'Connell, looking from the portrait to the original. "I wish Duffy was very like that."—London Star.

Digging Earthworms. A man tells how to get earthworms without digging for them. Take a strong stick four or five feet long and sharp at one end and go to some locality, such as the back of a barn, where the worms are sure to be plentiful. Drive a stick four or five inches into the ground with a hammer or stone and then begin to twist it with a rotary motion. Every few minutes hit the top a rap to drive the point farther into the ground and keep on twisting. In five minutes the worms will begin crawling out of their holes, and all you have to do is to pick them up and put them in your can.—St. Louis Globe-Democrat.

Wells-Stone Mercantile Co.

First National Bank.

Negaunee, Mich. CASH CAPITAL, \$50,000. SURPLUS, 20,000. President—A. MAITLAND. Vice President—J. B. MAAS. Cashier—T. C. YATES.

WINTER & SUESS' Vegetables, Lettuce, Radishes, etc. Also Agents for PILLSBURY'S BEST FLOUR.

Fresh and Salt Meat. Call and get some of Corde's Bros' Blue Label Canned Goods. Also Fickinger's California Canned Fruit.

AMERICAN FAMILY SOAP. Best for General Household Use. Military Road Lands Belonging to the Estate of James C. Ayer.

174,000 Acres for Sale or Lease. 200,000,000 Feet of Pine. Hemlock, Cedar, Poplar, Hard and Soft Wood for Charcoal and Cordwood.

GREEN SEAL CIGARS. Made, Sold and Smoked in 1890. Popular Goods, Popular Price. Best 10 Cents, 3 for 25 Cents, Cigar on Earth.

G. MARTINI, Red Jacket, Mich., and G. C. LORANGER, Ashland, Wis., Wholesale Agents for Upper Peninsula.

Coal--Wood Hay, Grain, Feed, Petoskey Lime, Brick. Mich. and N. Y. Col Plaster. Buffalo and Louisville cement.

F. B. SPEAR. JOHN LINDQUIST, Contractor and Stone Mason. Estimates furnished on stone and brick work, also all kinds of building.

\$100 A MONTH Salary, or commission. We want a good, reliable man in every town as our permanent local agent, to sell our pure Tea, Coffee, Spices and Baking Powders.

NEGAUNEE AND VICINITY.

The Kirkpatrick Party Arrive Home From Their European Tour.

Had Some Fun and Paid for It—Another Democratic Meeting Announced.

RETURNED FROM EUROPE.

Mr. and Mrs. Joseph Kirkpatrick, of Palmer, arrived home yesterday afternoon from a three months sojourn in Europe. They were accompanied by Mrs. Clark Kirkpatrick, whose husband went to New York to meet them as they landed.

Were too Frisky. Marshal Paul gathered in a couple of festive fellows Tuesday evening for creating mild panics wherever they went. They spent that night in the city jail and were yesterday brought forth to answer to the charge of being drunk and disorderly.

This Will be Democratic. S. D. Clay of Grand Rapids will speak at McDonald's Opera house either Friday or Saturday evening in support of the democratic "idea."

Will Not Stop Here. The splendid scenic production of Monte Cristo, which will be given in Marquette and Ishpeming in a week or so, has given Negaunee the go-by and will show in Ishpeming only.

LOCAL LAONICS. M. A. Gibbs of the Iron Cliffs company has left on a business trip to Chicago.

F. H. Begole, J. H. Thomas and S. H. Holley of Marquette were visitors in Negaunee yesterday.

Fire companies Nos. 1 and 2 held their regular meeting at their respective quarters last evening.

The Sons of St. George will organize a U. R. S. K. order tomorrow evening with about twenty members.

Rev. Strong of the Case street Methodist church is spending a few days partridge hunting near Swanzy.

Rev. J. A. Brodien of the Bethany Lutheran church left yesterday for Republic where he will attend the monthly session of the mission societies, of which he is a member.

The funeral of Erik Viski, the miner who was killed by a fall of rock at the Grand Rapids mine Tuesday afternoon, took place yesterday from his boarding house at the corner of Pioneer avenue and Peck street.

The wiring of McDonald's Opera house has been completed and the whole place is now finely lighted by incandescent lamps. The improvement is very great and will be appreciated by those who attend the next performance there.

Fully twelve hundred school children will take part in the Columbus Day exercises tomorrow in front of the high school building on Case street. They will make a fine appearance and an interesting program is promised by Superintendent Davis, who has the affair in charge.

The suit against the American Mining company before Justices Verran and Cary, instituted by about eighty of its employees for unpaid wages, was adjourned until November 3rd.

A party of Negaunee's business men, consisting of Alexander Maitland, T. C. Yates, Hon. J. Q. Adams, Captain Samuel Mitchell and C. G. Griffey, left on the C. & N. W. railway for Chicago, where they will witness the dedicatory exercises at the World's Fair grounds. They will be absent for about a week.

Supt. F. D. Davis of the public schools states that the procession of school children who are to participate in the Columbus day exercises, will start from the high school building on Case street at 10 o'clock sharp. The full program of the school exercises will appear in this column tomorrow morning.

One of the boilers being used in pumping out the Pendill shaft was disabled early yesterday morning and as a last resort the work of laying steam pipes from the brewery boilers to supply the pump with steam was begun.

It is hoped that when this has been done there will be no further delay in pumping the water out of the shaft. Mr. Nelson, the diver from Marquette, did not come to Negaunee yesterday as the water had not been sufficiently lowered to permit of his going down to search for the body, which has now been in the shaft for five days. It is expected that he will be able to go down today.

Bad to Travel in Neglige.

During a very hot night three Austrian cavalry officers were on a train which sped from Pesth to Vienna. As they had a compartment for themselves they sought to travel as comfortably as possible. First coats and vests disappeared, then collars and cuffs and so on until nothing remained on their bodies except night clothing.

Whether the bartender was too sleepy or the officer too slow, to the despair of the latter and his comrades the train set in motion when he was at the door of the restaurant. The two other officers had first a hearty laugh and then pitied him for the condition he was in. But their comrade was not of the anxious kind.

When he made his appearance among his comrades they were much astonished, and one of them said: "Why, when we saw you left behind we threw your garments out of the window in the hope that you would get them!" Nothing could be done but telegraph to the other station to have some one pick up the garments and forward them by the next train.

Mr. Hoe's Library. Gotham boasts of a host of literary connoisseurs, who spend fortunes with liberality in the struggle to secure the gems of literary workmanship. The appearance of any particular treasure from the printing press brings them forward in animated rivalry for its possession.

Mr. Hoe's cultivated taste as a collector is proved by the comprehensive scope of this magnificent collection. It is rich in old manuscripts, contains some of the rarest of missals and choice examples of the Gutenberg press and a varied group of incunabula, or specimens of the presses of the first century of presswork.

A Half a Chance Man. How many men have succeeded in life to whom not a single circumstance was kind? How often we hear people say of some worthless fellow, "Ah, well, he never had half a chance!"

Take Thomas Ball, the sculptor, for instance. He was but twelve years old when his father died. The poor widow—Thomas' mother, young herself, and far from strong—had five young children. There was no more school for Thomas after his father's death.

He had little instruction, even in his art, and he never had that little until after he had earned the money to pay for it. But—he succeeded.—Youth's Companion.

A Tidy Little Romance. He was a handsome, rosy cheeked old broker. She applied for a position as typewriter. And she was plump as a partridge and pretty as a picture.

"Will you give me your name?" he inquired kindly, after a few preliminary questions. She blushed. He was blind. "I'd rather take yours, sir," she said with a cute little smile.

A Farmer's Idea. A farmer and his wife who had been doing Central park stopped at the Fifth avenue entrance as they came out and turned for a last look. "Nice, isn't it?" said the wife. "Partly darned fine, and no mistake," he heartily replied.

Three Hours Too Soon. The clock in a workshop at Lewiston, Me., stopped at 12 o'clock at night. At 9 o'clock the next forenoon one of the workmen, who had had a light breakfast and was hungry, looked at the clock and saw to his delight that the hour and minute hands pointed to 12.

A Gigantic Vase. An English firm of potters have produced the largest vase in the world. It is of china, its chief feature being a globe representing the world, which is supported on a pedestal and surrounded by mythological figures.

OVERWORKED CLERK.

This Will Greatly Interest You.

A young hard-working clerk broke down in health and strength from over work and overstrain upon the nerves. Through nervous weakness he fell into discouragement, because wife, mother and sister were dependent upon him.

The same applies to thousands of overworked clerks, mechanics and others who see themselves growing thin in flesh, pale and sallow, and find themselves losing their physical strength and strong nerve. They grow weak, nervous, tire easily, have dull-feeling head, backache, kidney and liver complaint, wake tired mornings, lose their appetite, become constipated, feel miserable, old. They are rapidly breaking down and should use immediately the great nerve strengthener and blood invigorator, Dr. Greene's Nervura blood and nerve remedy.

It is purely vegetable and harmless. Druggists, \$1.00. "I feel it my duty to write what wonderful benefits I have received from Dr. Greene's Nervura blood and nerve remedy. I had nervous prostration and dyspepsia terribly. I took Dr. Greene's Nervura blood and nerve remedy, and before I had taken two bottles I could sleep and eat and felt like a new man. I took three bottles in all and call myself a well man. Should I again get in that nervous state, I shall know what to take to make me well again. I would recommend to all who suffer from nervous prostration to take this wonderful remedy, for it is a sure cure. Barney Wilson, Champlaine, Clinton county, N. Y."

Dr. Greene, the discoverer of this wonderful remedy, is the successful specialist in curing all forms of nervous and chronic diseases, 35 W. 14th street, New York, and can be consulted free, personally or by letter. Call or write him about your case, or send for symptom blank to fill out, and a letter fully explaining your disease, giving advice, etc., will be returned free.

Don't commit suicide on account of your "incurable" blood disease. The sensible thing for you to do is take Ayer's Sarsaparil. If that fails, why, then—keep on trying, and it will not fail. The benefit may be retarded. A fair and persistent trial of this medicine never fails, when the directions are followed.

A person is prematurely old when baldness occurs before the forty-fifth year. Use Hall's Hair Restorer to keep the scalp healthy and prevent baldness.

Chamberlain's Eye and Skin Ointment. A certain cure for Chronic Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Prairie Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. It is put up in 25 and 50 cent boxes. For sale by H. H. Stafford, Son & Co.

ROYAL BAKING POWDER Absolutely Pure. A cream of tartar baking powder. Highest of all in leavening strength.—[Largest U. S. Government Food Report. ROYAL BAKING POWDER CO., 100 Wall St., N. Y.]

NOTICE. The annual meeting of the Marquette County Agricultural Society will be held at the office of the Board of Trade on Wednesday, October 20th, at 3 P. M. for the purpose of selecting three directors for three years, and a president, treasurer and secretary for one year, and such other business as may properly come before said meeting.

DR. W. H. KIRK, OFFICE 112 Wisconsin Street, MILWAUKEE, WIS. ALL DISEASES OF MEN'S URETHRA. Specialties in all the stages thoroughly eradicated from the system without the use of mercury. Gonorrhoea and gleet cured and promptly cured. Stricture and various special urological diseases. Young and middle-aged men and women suffering from nervous debility, general weakness, and permanent cure guaranteed. Also the treatment of contagious venereal diseases. Send for a free literature. Price 10 cents. In plain envelopes.

A Pleasant Reflection

—the fact that easy washing has been made safe. Until Pearline came, it was dangerous. Pearline takes away the danger as it takes away the work. There is no scouring and scrubbing, to wear things out; there is no trouble in keeping things clean. Pearline is better than soap. With soap, you need hard work; for easy work, you need Pearline.

Beware Peddlers and some unscrupulous grocers will tell you, "this is as good as" or "the same as Pearline." IT'S FALSE—Pearline is never peddled, if your grocer sends you an imitation, be honest—send it back.

GOOD CITIZEN SOLDIERS.

General Schofield Also Has Words of Praise for the State Troops.

THEY SHOULD HAVE THE NEW RIFLES AT ONCE.

Various Sensible Suggestions Regarding Sea-Coast Defenses and Sundry Other Army Matters Made.

CONDITION OF THE ARMY.

WASHINGTON, Oct. 19.—"Domestic violence in some of the states has rendered necessary the use of the military in support of the civil authorities," says General Schofield in his report.

In regard to small arms and field artillery the report states that when the troops are furnished with the new magazine rifles they will be as well equipped as any troops in the world.

A substantial beginning has been made in the fortification and armament of the sea coasts of the United States as well as in the construction of a new navy worthy of a great and prosperous country.

On account of its great importance in connection with naval operations and as a place of refuge for mercantile marine provision has already been made out of the current appropriations to reorganize Key West, Fla.

General Schofield renews his former recommendations for the passage of the three battalion measure, now pending before congress. He also recommends that the establishment of an artillery reserve in sea-coast states and considerable increase in the pay of non-commissioned officers.

SWIFT CITY OF PARIS.

Ocean Greyhound Beats Her Own Record for Fast Time.

NEW YORK, Oct. 19.—The log of the City of Paris, which arrived here early this morning, shows the passage from Queenstown to have been made in 5 days, 14 hours 24 minutes, the distance traversed being 2,782 miles.

BILLING STRIKERS' PLACES.

Fifty-Five Operators Leave for Gulf, Colorado & Santa Fe.

St. Louis, Oct. 19.—Twenty-two telegraph operators arrived in St. Louis this morning from Chicago enroute to Kansas City in response to advertisements printed in the papers of that city offering railroad operators permanent employment.

CRUSHED BY A CAVE-IN.

Fourteen Workmen Caught in a Hamburg Sewer Trench.

HAMBURG, Oct. 19.—A large sewer in course of construction caved in this morning, burying fourteen workmen. The accident occurred without any warning whatever and the men at work in the sewer had no opportunity to escape.

fellows workmen but their efforts are greatly hampered by the heavy timbers that lie in every direction in the fallen earth and rock.

After the rescuing party had removed a large quantity of earth and the many pieces of the broken boards and timbers they found that the planking intended to support the sides of the sewer in falling had formed a shelter for the men underneath.

CRUSHED BY THE CARS.

Boston Traveller Accidentally Killed at Medicine Hat, Man.

WINNIPEG, Man., Oct. 19.—A terrible accident occurred at Medicine Hat station on the Canadian Pacific railway late last night. As the train was pulling into the depot a passenger named Ernest O'Malley in alighting fell and was thrown against the wheels, which passed over his body, disemboweling him.

MINERVA FURNACE RESUMES.

One Hundred Men Go to Work Making Pig Iron.

MILWAUKEE, Oct. 19.—The Minerva blast furnace on Kinnikinnick avenue has been blown in and the first cast of iron was made this morning. The fires were lighted Monday morning and the cast this morning, which occurred at 9:30 o'clock, consisted of twenty-two tons.

RAN OVER A CHILD.

Little Boy Playing On Track Has His Legs Cut Off.

IRON MOUNTAIN, Oct. 19.—Clifford Little, aged 6 years, was run over by a switch engine in the Milwaukee & Northern railway yards today. Both legs were cut off below the knee.

Stricken on the Street.

CHICAGO, Oct. 19.—A. S. Mason, president and general manager of the Kansas City & Missouri River Transportation company of Kansas City, was stricken with paralysis while walking down State street this evening.

Killed in a Carouse.

WINNIPEG, Man., Oct. 19.—John Wagner of the Carney House, Emerson, Man., was shot by Nellie Dunn, keeper of a house of ill-fame, while he and others were trying to break in the door of the house.

Mrs. Harrison's Condition.

WASHINGTON, Oct. 19.—Mrs. Harrison is no worse today than she was yesterday. Nervous symptoms, however, have been more pronounced than usual during the past three or four days.

Why He Was Eccentric.

Once upon a time I came under the banner of British eccentrics. I paid a visit to Crete, a Turkish island by the Levant, and, not finding the hotel of the capital to my mind, with the aid of some kindly intermediaries, I hired a house in the country, and went thither to take up my abode alone.

One of Twain's Stories.

Here is a story Mark Twain recently told an English interviewer who wanted to learn all about American humor: "A clergyman in New York was requested by a man to come over to Brooklyn to officiate at his wife's funeral.

"Rather awkwardly, he sat down in a dead silence. Presently he arose again, and the same thing took place. A third time he arose, and the same thing occurred. 'But what is the delay?' he whispered back; 'why are you not ready?'

Where Wild Bananas Are Found. Are there no varieties of bananas wild? Yes, some have been found in Ceylon, Cochinchina and the Philippines.

An Unfailing Sign. "How do you distinguish the members of the Four Hundred?" "By their long purses and their long cars."—New York Epoch.

THAT TAX-REBATE CLAUSE.

Acting-Secretary Spaulding on the Effects of Mr. Nester's Score-Crow.

GIVES US BETTER CHANCE IN FOREIGN MARKETS.

And So Furnishes More Work for American Labor Without Injuring the Home Market.

IRON ORE AND THE TARIFF.

WASHINGTON, Oct. 19.—Acting Secretary Spaulding has written a letter to the editor of a paper in the Michigan iron mining district in response to recent criticisms on the draw-back privileges of the tariff act.

"While the tariff law provides for the establishment of bonded smelting warehouses it is evident from the fact that no iron ore is treated in such warehouses that no special inducements are offered by the privilege which lead to the use of foreign instead of domestic ores.

"This seems to meet the complaint which is made against the alleged discrimination in favor of foreign iron ore.

"The drawback law operates for the benefit of those manufacturers who make articles for exportation. Certain foreign metals may in some cases be advantageously used in the process of making such articles. If the manufacturer was forced to pay duty upon such materials he could not compete with his rivals in those countries where such materials are produced.

He closes his letter with a long list of articles of iron and steel, now exported with benefit of drawback, and says the list is receiving constant accessions.

CHICAGO MARKETS.

CHICAGO, Oct. 19.—A drop in the price of wheat to the lowest point yet reached on the crop and lower than known for many years was partly a result today of the World's Fair dedication.

Wheat Quotations.

Table with columns: Opening, High, Low, Closing. Rows for Oct., Dec., May.

Cash quotations were as follows: Flour, slow prices nominally unchanged. Winter patents, \$3.70@4.00; winter straights, \$3.30@3.50; spring patents, \$3.75@4.00; spring straights, \$3.00@3.50; bakers, \$2.50@3.00.

Cattle, Hogs and Sheep.

CHICAGO, Oct. 19.—Prices at the stock yards ranged as follows: CATTLE—Receipts, 18,000; shipments, 5,000; market about steady; best natives, \$5.00@5.65; others, \$3.90@4.90; stockers, \$1.75@2.00; Texans, \$2.05@2.80; cows, \$1.45@2.00.

Sheep—Receipts, 10,000; shipments, 3,000; market steady, closing strong; stockers, \$4.25@4.75; ewes, \$3.85@4.50; mixed, \$4.25@4.80; wethers, \$5.00@5.50; lambs, \$4.00@5.65.

METAL PRICES.

NEW YORK, Oct. 19.—Pig iron, quiet, steady; American, \$13.00@15.50; Copper, steady; lake, 113@11.75.

COPPER STOCKS.

BOSTON, Oct. 19.—Closing prices of copper mining stocks were as follows: Allouez, \$ 1.00; Atlantic, 10.50; Boston & Montana, 36.50; Butte & Boston, 9.75; Calumet & Hecla, 290.00; Centennial and packers, 9.25; Franklin, 14.25; Kearsage, 12.25; Osceola, 36.00; Santa Fe, 10; Tamarack, 100.00.

GRABOWER CENTER OF ATTRACTION FOR: Cloak Buyers! Do you want a stylish cloak for a small amount, come to GRABOWER'S. Our New Stock of Ladies', Misses' and Children's Cloaks are all sellers. THE ENTIRE CLOAK DEPARTMENT is brimfull of bargains. REMEMBER There is no house in Upper Michigan that can or will compete with us. We Have the Goods, We Have the Prices. A call will convince you of values we offer. ALWAYS THE CHEAPEST. Louis Grabower, Leading Dry Goods, Carpet, Millinery and Shoe House.

Reportorial Shrewdness.

A certain newspaper reporter assigned to investigate the case of a young woman at a hotel said to be in a trance represented himself as a doctor so that he would be allowed to see the victim.

An Unfortunate Politician.

The politest man in New Jersey came to grief because of his politeness at Newark, N. J., on Saturday. He was seized with a desire to sneeze while riding in an electric car.

Badges for the Campaign.

"Three-fourths of all the campaign badges with which the country is supplied are manufactured in Providence," said a dealer. "All the best of them are made in that city by manufacturers of cheap jewelry."

Common Sense in Bicycle Riding.

Regarding pneumatic tires, the editor of the cycling department in Outing says: "There is no doubt about it but that a better air valve must be devised, made with an airtight cap which cannot be detached."

Grandma's Cure for Dandruff.

"We often scoff at the ancient grand-mother remedies," said an old town physician the other day in conversation with a patient, "but our forefathers used to get a power of comfort from them, nevertheless, and cheaply too. Science has progressed wonderfully, of course, and we are much better off on the whole now than were our sires, but we forget a great many of the little things. Now I notice that you are troubled with dandruff, and I'll wager that you have spent many dollars on different alleged cures, and you are worse off now than when you commenced. Let me give you a 'grandmother' prescription that never fails. Go to a drug store and buy five cents' worth of salts of tartar. Dissolve half of it in warm water and wash the head thoroughly. Repeat this at intervals of three months for a year, and you won't be annoyed with dandruff any more."—New York Recorder.

Humanity Runs in Streaks.

Peculiar humanity runs in streaks. On certain days you will notice a surprising number of tall people. Sometimes it's the cross eyed people. On other occasions the noticeably short persons have their innings. Then one day somebody equally observant will say, "What a remarkable array of the crippled, the lame, the maimed, the dwarfed, the generally deformed there are out today!"

Dislikes Elevators.

It is a peculiarity of Mr. Clarence A. Seward, president of the Union club, that he will never ride on the elevated road. He prefers the conservative street car, and when the street cars are not running he walks. Mr. Seward also has an aversion to passenger elevators in tall buildings.

A New Method of Annealing Small Pieces of Steel.

A new method of annealing small pieces of steel is to heat them as slowly as possible, and when at a red heat put them between two pieces of dry board and screw them up in a vise. The steel burns into the boards, which, coming together, form an air tight charcoal bed. When cool the steel is found to be thoroughly annealed.

Some have so charming a manner as to lead you to think that you are, for them, the only person of interest in the world. Observation of their way with others may make you modify your opinion of the manner which once seemed so charming.

Andrew Carnegie has the short, thick-set figure that characterized Grant, Meisner and many other notable "little" men. He wears a full gray beard, and his eyes are gray and kindly.

Above 4,000 feet the population of America, which is confined of course to the Cordilleran region, is almost entirely engaged in the pursuit of mining, and the greater part of it is located in Colorado, New Mexico, Nevada and California.

FALL AND WINTER SEASON

# TWELVE FIRST PRIZES

GENEVA, Switzerland.  
 F. G. SMITH, Sons & Co.,  
 GENTLEMEN:—You are hereby appointed my agent for the state of Michigan for the E. KOEHN WATCH CO., formerly the Ekegren watch. I beg to submit herewith a table showing the rates of the chronometers of my make which were priced at the last competition of the Geneva Astronomical Observatory. At this competition 48 rewards were awarded to 15 different manufacturers, and from that number I obtained 12 for my own part amongst which one of the three series prizes delivered to the firm whose watches had the best running rate. Knowing how much interest you take in the progress of watch making, I take pleasure in informing you of these excellent results and remain, dear sir,  
 Yours Respectfully,  
 E. KOEHN.

### Card From F. G. SMITH, Sons & Co

Mr. Kohen was for ten years and more the American representative and member of the firm of Patek, Philippe & Co., watch makers, and since succeeding the old firm of Ekegren & Co., has secured the services of a number of the best employees of Patek, Philippe & Co., which guarantees a watch equal to any made in the world. These watches are made in the latest styles and have our own guarantee of being the best timepieces in the American market today.  
 F. G. SMITH, SONS & CO.,  
 Sole Agents, Detroit.  
 Correspondence Solicited.

#### PORT LIST.

Arrived—Wm. Chisholm.  
 Cleared—Otego, Monticello, Montmonecy, Buffalo; H. B. Tuttle, Queen City, Ashtabula; Wm. Chisholm, Cleveland.  
 Passed up—Idaho.

#### REPORTORIAL PENCILINGS.

A. Thurtell leaves for Chicago and lower Michigan today.

All the grocery stores in the city will be closed all day Friday.

Don't forget to order your groceries today. All the stores will be closed tomorrow.

Marquette, also, has its "Boss Jacobs," but he isn't a member of its common council, thank heaven!

Miss Mand Bush returned yesterday from Duluth from a visit to her brother, Millard, who is head salesman in a leading grocery house of that city.

C. O. Peterson of Des Moines, Iowa, will address the Scandinavian republicans of Marquette at the rink next Wednesday evening, speaking in Swedish.

A telegram was received here yesterday morning from Mrs. H. G. Warne announcing that her father had died the previous night at Lansing. No particulars were given.

The prayer meeting and Bible class at the Baptist church will be held Friday evening. The change of date is on account of the session here of the W. C. T. U. convention.

When somebody "bones" you for an order for groceries to be furnished from abroad let your answer be a decisive and emphatic "No." That is the only sure way to avoid getting fooled.

Miss Frances Griffin of Alabama will address the W. C. T. U. convention and the people of Marquette generally at the Baptist church this evening. Miss Griffin is a very bright and entertaining speaker and all are cordially invited to hear her.

The Marquette Chautauqua circle held its first regular meeting of the year 1892-93 in the lecture room of the Methodist church last evening. The course this year is a very interesting one and the circle ought to have a large number of readers.

Mr. George Southard, representing a Grand Rapids house, was in the city. He is an old friend of the MINE JOURNAL's managing editor and spent an hour or so with the "old man" talking over the latter's record in the Fountain City, presumably.

There is no law to prevent Mr. Jacobs from building a street railway from anywhere he pleases to anywhere else that he desires to go with it. It pleases the MINE JOURNAL to see that worthy and energetic citizen putting his surplus into home enterprises. More power to him!

A. M. Flagg, who was at one time employed as a writer on the MINE JOURNAL, is about to open a law office at Superior. Mr. Flagg is a gold-cure graduate and has got to be quite a man of life since he left Marquette, and his acquaintances here will be pleased to learn that he is still on the turf and with bettered prospects for the future.

Every street in this city belongs to all the people. No citizen has any more right in or control over the street in front of his dwelling or place of business than any other citizen. It might be well for some of the people who are talking so loudly about their streets in connection with the street railway matter to remember this. They are assuming that they have a certain proprietary interest in something that belongs to the whole people and which the city council, acting for all the people, has sole control of for all purposes.

The firm of Shaw Brothers, which has done business on Lake Street opposite the freight depot for a couple of years, has been dissolved. Thomas C. Shaw retiring. The business will be continued by George W. Shaw, who will give the same attention to the wants of his patrons as heretofore, the business having always been in his charge, and who looks for a continuance of the favor shown the old firm by the public since it was established.

When Mayor Adams was asked to take some stock in the Opera House enterprise he sneeringly remarked that he would "wait until he could get it at 25 cents on the dollar." That's the way he has made his money. He has got more enterprising men than he take the risk, and when they have got into difficulties through their public-spiritedness, he has been on hand to rake in their property "at fifty cents on the dollar." He is trying to put the street railway company in the hole now so that he can gather it in at his fixed rate for Marquette investments. Isn't he a "dandy" to have for mayor!

Several from here have gone to Chicago to attend the exercises there tomorrow when the World's Fair buildings and grounds are to be formally dedicated to the purpose for which they will be used next year. They may not all get in, for the ceremonies can only be witnessed by those who are bidden to behold them, but the MINE JOURNAL will be represented on the inside, thanks to the genial president of the World's Fair commission.

The MINE JOURNAL is not the official paper and doesn't care to be ever again, but it proposes to keep the people of Marquette advised as to what the mayor and common council are doing just the same. It will do this as part of its contract with the whole people of the city to give them all the news, and that without fear or favor.

It is not criticizing any official of the city for the sake of being critical, and would prefer not to have anything harsh to say of the "powers that be," but when men in authority use their positions to advance personal interests or gratify personal grudges they can depend on hearing from the people's own paper every time.

There is a rumor that the democrats will have a meeting here Friday evening, which will be addressed by a gentleman from Grand Rapids named Clay, but the MINE JOURNAL isn't

sure about it, the democrats here not having any definite information concerning it so far as its reporters could learn last evening. Tim Nester is out of town and when Tim is absent there doesn't appear to be any democrat here who is willing to tell the MINE JOURNAL much about what the party is about or where it is "at."

Every fine day during the past summer the street railway has carried hundreds—on some days thousands—of the people of this city to Presque Isle, Marquette's beautiful public park. How many of these could have visited it if it had not been for the facilities afforded them by the street railway? Only such as have their own conveyances or could afford to hire carriages. The street railway is the greatest convenience that home enterprise has ever given the people of the city, and yet the mayor and a couple of members of the common council, with the city attorney as their legal adviser, are devoting their time and energy for the time being to devising ways and means for crippling the street railway company and preventing it from extending its lines in the city. How do the people like the kind of service those city officers are giving them in this matter?

One of the Woes of Summer. A young clerk in a Wall street bank, while out to luncheon, met another during the torrid period around noon and halted him with the words:

"Hello, Charley. Hot as a certain place with the lid on, ain't it? You look deliciously flabby. Let me take your photograph."

He drew a tiny camera from his coat pocket and aimed it at Charley, who tried feebly to dodge it.

"I don't wan' ner pho'graf," pleaded he.

"Hold on, now; this is the very latest in kodaks." So saying he pressed the button and a stream of water about the size of the little finger spurted into the other's face and—"did the rest."

The ghastly little infernal machine which so many practical jokers are going to buy and amuse their friends with have just been brought out on the routes of Twenty-third and Fourteenth streets and lower Broadway by the ever blooming, the man who basketed serenely and contentedly in 95 degs., and who congealed not even when the mercury drops out through the bottom of the thermometer.

It is a pretty little machine, a perfect miniature camera, not of the kodak box style, but of the real accordion build.

It is filled with water or any other fluid the fiend may select, such as ink or cologne, through a little trap at the back, and when loaded and operated vigorously will send a stream fully five feet.

If there is to be any remedy for the use of this innocent little machine, or antidote will prevent its spread, that antidote must be a large, two handed club, jagged and knotted at the end.—New York Herald.

Big Taxpayers in New York City. The Astors are not the largest taxpayers in the city, as is often asserted. This year they will pay taxes on \$31,000,000, while the Vanderbilts will pay on \$30,400,000. The Vanderbilt assessment is largely increased by the New York Central and Hudson River railroad property inside the city limits, and therefore open to the gaze of the argus eyed tax man. The next heavy taxpayers are: The Consolidated Gas company, \$23,000,000; Mr. Gould's Manhattan Elevated railroad, \$20,000,000; the R. and O. Goelst estate, \$6,670,000; Lorillard family, \$6,550,000; Equitable Life Insurance company, \$6,000,000, and so on up to 129 separate individuals, estates, and firms that own one-eighth of the entire city of New York; the elevated railroads above New York and the subways beneath New York.

This gathering in and gobbling up, so to speak, is not the pleasant phase of this topic by any means, but it is one that we cannot ignore. And in all likelihood it is one that some day in the not very dim and distant future may require serious consideration. The simple everyday desire and attempt of one man to get possession of and distribute the wealth which some other fellow has, does not seem to meet the requirements of the case.—John A. Cockerill in New York Recorder.

Summer Fiction. An encouraging sign of the times is the marked decrease in the consumption of that noxious literary product known as "summer fiction." During the past few seasons bookstalls and trainboys have flattered in our faces hundreds of paper covered novels, differing mainly in the degree of their worthlessness, but, according to their own statement, generally in the sixth or seventh edition. A casual examination served to show that these stories were either erotic or wildly sensational, or both, to a nauseating degree, and it seemed hardly possible that so many intelligent men and women would lower themselves to the depths of such nastiness.

This summer the tide has turned, so the leading dealers tell us, and the demand is now for low priced editions of standard works, while the style of story formerly so popular has fallen flat on the market. As an indication of returning good sense and improved literary taste this fact is worthy of rejoicing. When a people has learned that it can be amused without degrading itself it has passed a dangerous spot in the road of experience.—Concord Monitor.

PROVED TO BE THE BEST. Tested and proved by over thirty years' use in all parts of the world, Allcock's Porous Plasters have the endorsement of the highest medical and chemical authorities and millions of grateful patients who have been cured of distressing ailments voluntarily testify to their merits.

Allcock's Porous Plasters are purely vegetable. They are mild but effective, sure and quick in their action, absolutely harmless.

Beware of imitations, and do not be deceived by misrepresentation. Ask for Allcock's and let no solicitation or expansion induce you to accept a substitute.

Have you tried the Palace Restaurant? They serve meals to order at all hours of the day or night. Everything fresh and clean. Give it a call, and you will be sure to come again. Basement of Greenwald block.  
 (10-12-14)

### How the Greeks Combed Their Hair.

In Greece, during the heroic ages, men wore their hair and beards long, which so disgusted the cleanly and clean faced Egyptians that, if we are to credit Herodotus, no one of either sex of the latter nationality would on any account kiss the lips of a Greek, make use of his knife, his spit and cauldron, or taste the meat of an animal which had been slaughtered by his hand. It must not be inferred from this that the Greeks, in the early days of their being, were altogether barbarians; but they were certainly not so civilized—not so well acquainted with the arts of peace and war—as the Egyptians until long after they had made their mark in history.

The love of the beautiful was there, no doubt; but it had not yet manifested itself and raised the social character of the people. It required the softening and humanizing influence, and intercourse with more liberal races, such as the Egyptians and Phoenicians, to one or the other of whom they were indebted for much that they possessed. It would seem that, in the matter of personal adornment, they derived the beginnings from the Egyptians, and that they improved upon these beginnings as their own sense of the fitness of things developed into a passion for the beautiful. Their arrangement of the hair they and their women carried eventually to the highest point of artistic excellence.—Gentleman's Magazine.

Cured by a Doctor's Bill. A westerner at one of the prominent up town hotels was feeling restless and ill one hot evening and rang for a doctor. The latter was in the same house. He called at his patient's room and diagnosed the case as simple insomnia, and gave a couple of powders and retired. The doctor called the next morning to see how the patient (whom he correctly judged to be a man of means) was getting on. During the day he saw him incidentally three or four times. The bill was twenty-five dollars. Five dollars a visit from a doctor living on the same floor with him in the same house was something that nearly caused the westerner to faint. But the bill had one effect—it made him a well man, he says. He wouldn't risk getting another such.—New York Herald.

Some land in Paris has been sold at the rate of \$2,000,000 per acre; some in London for what would net \$5,000,000 per acre, and some in New York for a sum equal to \$8,000,000 per acre.

Great Sacrifice Sale OF FINE WOOLENS.

Neuberger Is Going Out of Business.

The whole stock of fine imported woollens in his merchant tailoring department is now offered for sale by the yard and pattern. Now ladies and gentlemen is your chance to buy patterns for suits, overcoats, cloaks and sacks, at one-half their value as these goods must be closed out by Jan. 1, '93. "First come, first served" with the choicest patterns for a good winter suit.  
 (10-20-14)

A REMEDY FOR THE GRIPPE COUGH. A remedy recommended for patients afflicted with the grippe is Kemps' Balsam, which is especially adapted to diseases of the throat and lungs. Do not wait for the first symptoms of the disease, but get a bottle and keep it on hand for use the moment it is needed. If neglected the grippe has a tendency to bring on pneumonia. All druggists sell the Balsam.

DISOLUTION OF PARTNERSHIP. Notice is hereby given that the partnership heretofore existing between Thomas C. Shaw and George W. Shaw under the firm name of Shaw Brothers, has been dissolved by mutual consent. The business will be hereafter conducted by George W. Shaw, who assumes all liabilities of the late firm, and to whom all accounts owing it are payable.  
 GEORGE W. SHAW,  
 THOMAS C. SHAW.

Parties indebted to the late firm of Shaw Brothers are requested to call and settle at once as I am desirous of closing up the old business as soon as possible. Thanking the patrons of the old firm for the favors shown I solicit a continuance of the same and will endeavor to merit it by fair dealing and prompt attention to orders.  
 (10-20-14) GEORGE W. SHAW.

ISHPEMING'S COUNCIL.

Work That It Did at the Regular Session This Week

COLUMBUS DAY OBSERVANCE IN ISHPEMING.

A Wedding for Next Week—Did Missionary Work at Republic—Bob Frazer Tonight.

THE COUNCIL MEETING.

A regular meeting of the common council was held Tuesday evening at the council chamber. Mayor Osborn presided and a full board of aldermen was present with the exception of Alderman Trebilcock and Anderson.

Alderman Persons, from the committee on finance, offered a resolution recommending that the street lighting fund, and that the police and sinking funds be consolidated with the contingent fund. The resolution was adopted.

Alderman Malloy, from the committee on claims and accounts, reported favorably on bills referred to that committee at the previous meeting and recommended that the same be paid.

Alderman Johnston, chairman of the sewer committee, asked for further time to report on the petition of M. Dee, which was granted. Mr. Johnston then offered a resolution recommending that a meeting of the common council and board of assessors be held at the council chamber at 7:30 P. M. November 10th, to review the assessment roll of sewer district No. 2, which was adopted.

Alderman Beerling, from the street committee, asked for further time to report on the petition of the Negaunee & Ishpeming Street Railway company relative to erecting poles in the city on which to run electric light wires; also on that of B. W. Wright and others asking that an arc lamp be placed at the intersection of Lake and Kaedl streets, and in the matter of placing a lamp at the corner of Third and Superior streets.

The petition of Mr. Perkett, asking that he be allowed to erect a small building at the city square for the sale of pop corn, was denied on recommendation of the street committee.

Alderman Fitzpatrick, from the purchasing committee, reported that his committee had decided to order coal for the winter from local dealers; that he had ordered seven ballot boxes for the city, and that the coats and hats for the firemen, which were ordered some time ago, had not yet arrived.

Alderman Routhier, from the building committee, reported that a telephone had been placed in No. 4 house home. Mr. Routhier then offered an amendment to the ordinance relative to the construction of wooden buildings within the fire limits of the city which provided that sheds not over twelve feet high, and of the same length and width, be allowed to be built.

The reports of Justice Kennedy, Chief of Police Peterson and the poundmaster for the month of September, with bills from Mr. Kennedy for services rendered, amounting to \$9, and one from Mr. Peterson for board of prisoners, amounting to \$13.02, were read and on motion referred to the committee on police.

There being no further business, the council adjourned.

Comes Here for His Bride.

On Wednesday evening next, the 26th inst., at 7 o'clock, Rev. Carl Almen of Iron Mountain and Miss Lydia Wahlman of Ishpeming will be united in marriage at the Swedish Lutheran church in this city by Rev. J. F. Borg, the pastor. Mr. Almen is the pastor of the Swedish Lutheran church at Iron Mountain, and is universally esteemed in that community. Miss Wahlman is the daughter of Mr. and Mrs. John Wahlman, and is accomplished and amiable young lady who has a multitude of friends in Ishpeming.

Columbia Day Program.

The program for the Columbian Day celebration by St. John's parochial schools has been completed. A high mass will be celebrated at 9 o'clock at St. John's church. The children of the school will be present and will occupy the middle aisle. Each child will carry the American flag. The sermon by Father Keul will be from the text, "Give Praise to God for the Excellent Land He Hath Given Thee," Deut.

XII. X. At the close of the mass the choir will sing the "Te Deum."

The program for the observance exercises at the City opera house in the afternoon, commencing at 3 o'clock, is as follows:

- Song, "Flag of the Free".....Class Recitation, "On: and On".....Class Tableau, "Star Spangled Banner".....Class Song, "Claim of Nations".....Misses E. Dompierre, M. Ames, N. Cooney, Recitation, "The American Flag".....Nellie McDonough.

Those who attend the opera house tomorrow afternoon are assured of witnessing a pleasing and appropriate entertainment. The address by Father Keul will be a grand tribute to the character of Columbus, and a review of what his discovery of this continent has done for humanity from the standpoint of a true American citizen and an ardent believer in the Great Republic.

Columbus Anniversary Entertainment. The entertainment at the City Opera house tomorrow evening in honor of the discovery of America, by the Ishpeming Temple of Honor and Temperance No. 19 promises to be a pleasing affair. The committees in charge of entertainment are doing some tall hustling in procuring the best local talent to take part. There will be addresses by Rev. T. J. Josiva, Rev. R. Hancock and Mr. Henry Hosking, in addition to the regular musical program. The admission will be 35 cents for adults and 15 cents for children. The entertainment will commence at 7:30, and all are cordially invited to be present.

Spoke at Republic.

On Tuesday evening Messrs. J. Sandberg and Geo. Tucker were at Republic, where they addressed a large assemblage of voters on the political issues. The meeting was held at the town hall and Mr. Sandberg spoke in Swedish, while Mr. Tucker addressed the meeting in English. The gentlemen claim that the boys at that burg are enthusiastic, and apparently enjoyed the speeches very much.

The Eloquent "Bob."

Don't fail to hear Mr. Robert E. Frazer at the City opera house tonight on the issues of the present campaign. Mr. Frazer is a convincing and entertaining speaker and is well posted on the great questions now before the people. The meeting will be of interest to all classes. The Harrison and Reid (Lee) club will be present and will render vocal music to enliven the occasion.

ISHPEMING IN BRIEF

Hon. Bob Frazer at the City Opera house tonight. E. Skoglund left yesterday on a business trip to Ironwood, where he expects to remain a few days.

S. Johnson & Co. are having a number of signs painted on the front and side walls of their store building. The new crusher at the Fire Centre gold mine is now in place and was started up for the first time on Tuesday. It worked well.

The contractors, Nichols & Hooper, are preparing to make a start on the sewer works at Waters. West's new building on South Main street.

Ishpeming has been looking unusually lively the last few days, due to the mines paying off, and also the number of lumbermen that are coming to town.

The leading prima donna of the Calhoun Opera company is Miss Marie Bell, late of the Carlton Opera company, who is considered "one of the finest" in the business.

A cow that was recently run into the city pound will be sold at auction to the highest bidder Saturday morning at 9 o'clock. The animal is red, with a white face and white stripes under her jaw. Should the owner "catch on" it might be well for him to consult the poundmaster.

Tomorrow being a legal holiday, the banks will not be open for business. The stores will most likely be closed also, at least the majority of the merchants are in favor of it. The day should be observed by everyone, and there should not be a moment's hesitation in the matter of closing business houses.

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75c.

TOO MUCH OF A RISK.

It is not unusual for colds contracted in the fall to hang on all winter. In such cases catarrh or chronic bronchitis are almost sure to result. A fifty cent bottle of Chamberlain's Cough Remedy will cure any cold. Can you afford to risk so much for so small an amount? This remedy is intended especially for bad colds and croup and can always be depended upon. For sale by H. H. Stafford Son & Co. Druggists.

How Indians Use Ants.

The grip of an ant's jaw is retained even after the body has been bitten off and nothing but the head remains. This knowledge is possessed by a certain tribe of Indians in Brazil, who put the ants to a very peculiar use. When an Indian gets a gash cut in his hand, instead of having his hand sewed together, as physicians do in this country, he procures five or six large black ants, and, holding their heads near the gash, they bring their jaws together in biting the flesh, and thus pull the two sides of the gash together. Then the Indian pinches off the bodies of the ants and leaves the heads clinging to the flesh, which is held together until the gash is perfectly healed.—Boston Courier.

The Economy of the Egyptians.

A curious illustration of the domestic economy of the Egyptians has been met with in the unwinning of the bandages of the mummies. Although whole wreaths of fine cloth have been most frequently used, in other cases the bandages are fragmentary, and have seams, darns and patches. Old napkins are used, old skirts, pieces of something that may have been a shirt; and once a piece of cloth was found with an armhole in it, with seam and gusset and band finely stitched by fingers themselves long since crumbled and their dust blown to the four winds.—Harper's Bazar.

A Railroad on the Tops of Trees.

California enjoys the distinction of having the only railroad that runs on the tops of trees. This peculiar piece of engineering is in Sonoma county, between Clipper Mills and Stuart Point, where the railroad crosses a deep ravine, in the center of which are two huge redwood trees, side by side. These giants have been sawed off seventy-five feet above the bed of the creek, and the timbers and ties are laid on these tall stumps. This natural tree bridge is considered to be equal in safety to a bridge built on the most scientific principles.—Chicago Tribune.

WILL BE GIVEN AWAY.

Our enterprising druggists, H. H. Stafford, Son & Co., who carry the finest stock of drugs, perfumeries, toilet articles, brushes, sponges, etc., are giving away a large number of trial bottles of Dr. Miles' celebrated Restorative Nervine. They guarantee it to cure headache, dizziness, nervous prostration, sleeplessness, the ill effects of spirits, tobacco, coffee, etc. Druggists say it is the greatest seller they ever knew, and is universally satisfactory. They also guarantee Dr. Miles' New Heart Cure in all cases of nervous or organic heart disease, palpitation, pain in side, smothering, etc. Fine book on "Nervous and Heart Diseases" free.

RIVERSIDE IRON COMPANY.

SALE OF DELINQUENT STOCK.

The stockholders owning the following described certificates of stock in the above mentioned company having failed to pay an assessment of one dollar per share levied July 14th, 1892; payable, July 15th, 1892, after having been notified in the manner prescribed by law. Now therefore the stock of the said delinquent stockholders will be sold to pay the assessment, with interest and expense of said sale at public vendue to the highest bidder at the house of the secretary of said company in the town of Republic, Mich., on Saturday, October 15th, at 10:30 A. M.

Table with columns: NO OF CERTIFICATE, SHRS, CERTIFICATE, SHRS. Lists various stock certificates and shares.

By order of the Board of Directors, J. O. ST. CLAIR, Secretary and Treasurer. REPUBLIC, Mich., Sept. 12, 1892.

VERTIGO.

Persons apparently in good health are often troubled with "swimming in the head," nausea and vomiting often follow. It results from a deranged state of the digestive organs and constipation. This unpleasant and often dangerous condition will be cured by

Mineral Range R. R. PASSENGER TIME TABLE. In Effect Sunday, August, 28th, 1892. CENTRAL STANDARD TIME.

Table with columns for stations (P.M., A.M., A.M., A.M., A.M., P.M.) and times for various routes like Houghton, Hancock, Swedetown, Franklin, Boston, Highway, Osceola, Lake Junc., Calumet, Red Jacket.

DAILY. \*Daily except Sunday. S Denotes regular stops. I stops only on signal. R. H. BRELSFORD, Gen. Fr't and Pass. Agt.

TWO FIRES IN ONE NIGHT.

Calumet Had an Experience in the Small Hours of Wednesday Morning.

BARN DESTROYED AND DWELLING HOUSE GUTTED.

Red Jacket and Lake Linden Will Hold Columbian Day Exercises-Miscellaneous News Notes.

[All communications for copper country department intended for publication should be addressed to A. F. Ester, Houghton.]

CALUMET. Two fire alarms were turned in within six hours on Wednesday morning. The first was from Caledonia street and a hay barn containing nearly twenty tons of hay owned by Peter Gustafson was entirely destroyed. The cause of the fire is unknown and the loss, about \$500, is a severe one to the owner. The fire started about midnight. The second alarm was from Scott street, New-town. A two-family frame dwelling took fire and the inside of it was destroyed. The house was occupied by John Schominski and Mrs. John Sullivan. The latter formerly owned the house, which is on ground leased from the Calumet & Hecla company. Mrs. Sullivan's husband has been out west for several years and last May she sold the house to James Glasou but before he could pay her the money was garnished by her creditors and then she made up her mind she would remain in the house until she got ready to go west, which was to be yesterday morning.

Owing to Col. F. B. Lyon having been ordered on the governor's staff for duty at the World's Fair dedication a change has been made in the command of the Columbian procession here tomorrow. Capt. Will A. Childs will command the first and Mr. Henry A. Fiege will command the fourth division.

RED JACKET. The grand Columbian parade will start at 10:30 o'clock at the corner of Fifth and Pine street and move south to Hospital street, east to the Methodist church, east on Church street to Rockland street, south on Rockland to the Mineral Range depot, west on Depot street to Mine street, up Mine street to the Red Jacket road and from there to the Red Jacket Opera House.

Peter Lisoway, who was accidentally shot in the office of McClure's livery stable, is now out of danger and will soon be able to walk.

S. F. Miller, traveling passenger agent of the Chicago & Northwestern, is hustling through the copper country this week.

Thomas and Henry Harris left Wednesday noon for Chicago, a change of climate being prescribed for them.

LAKE LINDEN. The Columbian celebration tomorrow promises to be a good one. Special services will be held in the Catholic churches at 8:30 and 10 o'clock. The procession will form at the school house. The parade will consist of the school children, fire department and various societies under the marshaling of Mr. Henry Fisher, assisted by Messrs. John McKinnon, W. H. Mills, Charles Beauchamp and Richard Cuddeby. In case of unfavorable weather the exercises will be held in the opera house.

Mrs. J. B. Knopler left yesterday for Des Moines, Ia., to join her husband, who is state superintendent of public instruction.

Joseph Williams, leader of the band, is laid up with the typhoid fever.

Rev. N. H. Martin speaks on "Crimes and Criminals" at the school hall Sunday afternoon.

"Brother Dan" and J. Kehoe's horse "Chaup K." will trot for \$250 a side at the Driving Park tomorrow.

SOUTH LAKE LINDEN. Garret Stock of Detroit, a former resident of this place, will be married Tuesday to Miss Johanna Quirk of Lake Linden.

HOUGHTON. At the adjourned annual meeting of the board of supervisors held Wednesday all members were present. The regular routine business was taken up and the various committees appointed to examine the county officers' reports handed in their reports which were accepted and ordered placed on file.

The adjourned term of the circuit court of Houghton county will convene on Thursday, November 10, instead of December 12 as previously announced. The Mining Journal acknowledges receipt of very nice invitation from Portage lodge, A. O. U. W., to its fifth anniversary ball at the Armory tomorrow evening.

The item concerning the death of John Hanley, killed by riding up in a skip last Thursday morning, should have read, "at the Atlantic mine" instead of "at the Allouez mine."

HEATH IN OLD AGE. Edward Collinson, Queens, N. Y., says: "I commenced using Brandreth's Pills over fifty-five years ago. I first bought them in London, and have continued using them since I came to this country in 1838. I am now over seventy-five years old, hale and hearty, and attribute my wonderful health to the persistent use of Brandreth's Pills. Occasionally I have a bad cold or severe attack of rheumatism, indigestion or biliousness, but four or five doses of Brandreth's Pills always cure me. Whenever my children have been sick with scarlet fever, measles, acid stomach, disordered digestion or constiveness, a few doses of Brandreth's Pills restored their health at once."

Indigestion! Miserable! Take BEECHAM'S PILLS.

ANNUAL CONVENTION, W. C. T. U. Marquette, Oct. 18th, 19th and 20th, 1892. To AGENTS:—For the above occasion you are hereby authorized to issue to delegates excursion tickets to Marquette and return at rate of fare and a third for the round trip.

Sell tickets October 17th to 19th, inclusive, and make them good for return passage until October 22nd, inclusive. C. B. HIBBARD, General Passenger Agent.

Refreshing! Nourishing! Wholesome!

Imported Hops and Highest Grade of Malt are only used in brewing the Superior Stock, Export and Ulmer Beer. They are the PUREST in the market.

JOS. BOSH & CO. TORCH LAKE BREWERY. Lake Linden Mich. Telephone Connection.

Bacteria Killed by Electricity. The disease producing bacteria may be killed by a current of electricity, as has been shown by experiments with bottles of water containing them. By passing the current from a battery through a loop of wire suspended in the water it was found that a small voltage was sufficient to deprive the most active bacteria of life. The consumption of bacteria died under two and a quarter volts, while other more hardy species could not survive more than three volts and a half.

Unfortunately, this electrical method would be too expensive and troublesome for the householder to pursue. It is suggested, therefore, that cities or water companies shall perform the entire task, delivering the water to consumers in a condition guaranteed harmless. According to the plan proposed the killing of the microbes is to be accomplished at the reservoir. Nothing could be easier than to apply the energy of a battery by a current at one place in the supply pipes as to kill with absolute certainty every microbe that passed through in the flowing water.

A dynamo with a capacity of 1,000 volts would do the work perfectly for the biggest possible pipe, slaying all the bacteria going through and rendering innocuous all the millions of gallons daily that a metropolis consumes. All that is necessary is that a length of the pipe shall be made of insulated material, and through holes in its sides will be inserted wires representing the poles of the battery—positive on one side and negative on the other. Set the dynamo going, and the current springs through the water, filling it with powerful electric waves necessarily fatal to all living organisms floating in the stream.—New York Telegram.

A Poor Man on Tax Days. City Counselor Will C. Marshall had a big case just before he went into his office, and while it was pending he had to present a heavy bond for his client to the court. The client brought him a friend, who told Marshall he was worth \$100,000 in unincumbered real estate. At the proper time Marshall brought him before the court and put him on the stand.

"How much are you worth?" he asked him. The bondsman hesitated and began to wriggle uneasily in his chair. "Oh, well, you're worth \$100,000 in real estate, I suppose," said Marshall.

"Good gracious, no! Not half of that," exclaimed the witness. "I guess I am worth about \$20,000." Marshall was astonished beyond measure, and had to ask the indulgence of the court while he sought another bondsman. Meeting his man outside the court room afterward, he asked him warmly what he meant by such contradictory statements.

"I am worth \$100,000," said the man coolly, "but you don't suppose I'm fool enough to declare it in court? I've been reporting \$20,000 to the assessor straight along, and they'd be after me for back taxes if I told how much I was worth on the stand. I didn't know you was going to put me on the stand or I should have warned you."—St. Louis Post-Dispatch.

Climate and Morals. The world is tolerably well mapped out as to diseases. The colored charts show us where we may most probably dwell with malaria, with consumption or with general debility. We study, also, the adaptability of plants to different climatic conditions. But our knowledge of the relation of man to climate is still far from scientific—that is to say, of the influence of climate upon character and conduct. To come to a detail, what, for instance, do we know of the effect of climate upon veracity. There are portions of the earth's surface where the inhabitants regard truth as a luxury seldom to be indulged in; in others the mind seems rather inclined to truthfulness.

Whether the difference is owing to race or climate our observations do not yet enable us to determine. There is a popular notion that the habit of prevarication goes along with warmth, or with a debilitating atmosphere, and that cold is a tonic, a sort of stimulant for truthfulness. We indeed have in the phrase "the cold truth" a recognition of this. We say that the northern latitudes nurse the rugged virtue of veracity.—Charles Dudley Warner in Harper's.

The Secret of Good Mountain Climbing. The secret of the climbing of the hunters is that they trust their feet as much as their hands. To plant their nailed shoe is all they ask in any place. They go steadily, but slowly, and rest often, so as to avoid climbing when exhausted or breathless. A tired or winded man will tumble, slip and be in danger where he would pass easily when fresh. The apprentice in this particular hunt finds the greatest difficulty in crossing a chaos. A chaos is a steep slope covered with blocks of stone ranging from a hundred pounds to many tons.

There are ugly holes, big and little, between them. Their edges are generally sharp. To the rapid passer, as he looks down at his feet, they appear, without exception, very sharp. In addition, some of them are "wobblers." The duffer passed several unpleasant quarters of an hour in following the hunter, excited by the proximity of game, over these places, and will always carry on his leg a souvenir of one of them.—Paul van Dyke in Scribner's.

THE ANNA RIVER BRICK CO.

Manufacturers and Dealers in COMMON, BRICK and STOCK, MOULDED. Any design of Moulded Brick made to order. YARDS—Anna River Trestles, Alger Co., Lake Superior, Mich., on D. S. S. & A. R'y.

Foster) MANUFACTURER OF FOSTER'S Patent Artificial Limbs, Trusses, Supporters and Apparatuses for all kinds of Deformities, Crutches, Elastic Stockings, Suspensory Bandages, Shoulder Braces and Metallic furnishing for Artificial Limbs.

29 and 31 Grand River Avenue. DETROIT, MICH.

Lake Shore Iron Works, MARQUETTE, MICH. Manufacturers

Mining, Milling, Stone Quarry and General Machinery. We are prepared to do all kinds of Jobwork and Repairs Promptly. WINZE HOISTS.

BICE & SONS, (Successors to Bice, Pendill & Co.)

Marquette, Mich. Dry kiln capacity five thousand feet per day. Largest factory in Northern Michigan. Over 28,000 square feet of floor room used. Sash, Doors, Blinds, brackets, turning, counters, scroll work, mo' finish, store finish, fine stair work, etc.

DR. SPEER & CO. SPECIALISTS IN NERVOUS AND CHRONIC DISEASES.

Main office at 146 Washington St. (Mining Journal building) Marquette, Mich. Branch office at Saginaw Mich., and West Superior, Wis. The physician in charge of the office is a graduate of the Medical Department of Harvard University.

YOUNG MEN Who may be suffering from the effect of youthful follies or indiscretions will do well to avail themselves of this chance.

DR. SPEER & CO. Will guarantee a perfect cure in all cases of weakness or private disease of any kind or character they undertake or forfeit \$250. They will therefore say to the unfortunate sufferers who may read this notice that you are treading on dangerous ground when you longer delay in seeking the proper remedies for your complaint. Then for the first time you will realize what negligence means. Our success in such cases can be best understood when we will positively declare that over 100,000 have been treated by us in different parts of the world. Call and get the benefit of our experience.

MIDDLE-AGED MEN. There are many of the age of 30 to 50 who are troubled with too frequent evacuation of the bladder, often accompanied by a slight smarting sensation and weakening the system in a manner which the patient cannot account for. On times small particles of albumen will appear or the color be of a thin or milky hue, again changing to a dark and torpid appearance. There are many who die of this difficulty ignorant of the cause which is the second stage of weakness.

LADIES Finding it not convenient to call at the office can be treated by mail by sending a full description of their case.

DR. SPEER & CO. Will guarantee a perfect cure in all such cases and a healthy restoration of the organs. Examination and advice free to all. Remember the place, 146 West Washington Street, Marquette. P. S.—See our testimonials in the different papers from well-known people.

—HERE IS EVIDENCE.—REMARKABLE SUCCESS. I. James Stewart, of Marquette, have been unable to work for some time on account of epilepsy, which caused mental depression and great weakness; in fact perfectly unfitted me for any business. I got no relief until I tried Dr. Speer & Co. After two months' treatment I am surprised at the result. I have had no fits since. I sleep well, and arise in the morning refreshed, instead of feeling more tired than when I went to bed. I cannot recommend Dr. Speer & Co. too highly for what they have done for me.

JAMES STEWART, Marquette, Mich.

**FACTS FAIRLY STATED.**

**What the Street Railway Company Is Doing and How the Mayor Is Endeavoring to Harass It.**

**A PRESENTATION OF THE CASE THAT CONCERNS THE PEOPLE.**

**The Mayor in the Role of an Obstructionist Seeking to Prevent an Extension of the Street Railway Line.**

**THE INWARDNESS OF IT.**

It is doubtful if many of the people of this city understand the "inwardness" of the movement promoted and directed by Mayor Adams to compel the street railway company to surrender certain of its rights under the franchise granted that company by a previous council of the city; hence the MINING JOURNAL deems it well to place the facts before the public in order that all may judge understandingly of the position taken by the company and the motive by which the mayor and a few malcontents are actuated in their opposition to the plans of the company for an extension of its lines.

The company is composed of citizens of Marquette, who in June, 1890, applied to the council for and obtained a franchise for the purpose of building a street railway in the city. The franchise granted was carefully considered at the time by the common council and the city attorney, and due care was taken to protect the rights of the people of Marquette in every respect. It was a much less liberal franchise than the one that had been previously granted to Mr. Nester for the same purpose, and which was held by him for a couple of years before it was revoked for non-performance by the council of that year, a short time before the franchise held by the present company was granted to the original incorporators.

Under that franchise the company has expended about \$85,000 in the construction and equipment of the road, and has operated its line at an actual loss to date, owing to the fact that the line as built does not give it a profitable business for more than three months during the summer, and that its earnings during the summer months are more than eaten up by the cost of operating the line during the balance of the year.

The MINING JOURNAL's readers are aware that since the company started to build and equip its road the country has passed through a period of serious financial stringency, during which it was impossible to enlist capital in such ventures. This has greatly hampered the company in its plans for extending its line to the residence sections of the city and getting in a position that would enable it to do a fairly profitable business for the twelve months of the year.

But it has assessed its stockholders right along to meet the deficit, and has kept the line in operation save for a short interval last winter when, by permission of the council, it ceased to run cars, substituting therefor another method of carrying people who wished to avail themselves of the accommodation it afforded the public at the stipulated price for the service.

Now the company has perfected arrangements for the money needed to extend its line into the more thickly populated portion of the city and has purchased the material and begun the work of construction under its franchise. It has kept faith with the city in every essential particular, even where doing this involved heavy loss, and now asks only to be permitted to proceed under the rights secured to it by its franchise to make itself a greater convenience to the people than it has hitherto been, and which its incorporators and the council of 1890 designed it should be when the one applied for and the other granted the franchise by virtue of the provisions of which it has the right to build and operate a line in all parts of the city save and except on one street where it is expressly denied the privilege of building in the franchise granted it as stated above.

No sooner had the company announced its purpose of making this extension than Mayor Adams began to bestir himself to throw obstacles in its way. He went around among the people on the line of the proposed extension, seeking to enlist them in opposition to having the road built on their streets; he busied himself in getting up sentiment against the company on the ground that its franchise gave it dangerous rights and privileges; he went about with a stick jabbing it into the street between the company's tracks endeavoring to find spots where the macadam had not been put back as it should have been when the line was constructed; and he kept the city attorney at work looking for flaws in the franchise that could be taken advantage of in the assault that he proposed to make on a laudable enterprise into which several of his fellow-citizens had put their money more in the hope of helping the growth of the city than with any expectation that they were going to realize a large profit out of the undertaking.

He succeeded in getting from the council authority to proceed by injunction against the company to restrain it from building the proposed extension, but he has not yet taken action under the power thus granted him. He found that the company was not to be bulldozed by a meddlesome busy-body, even though that individual happens for a time to be chief executive of the city. He found that popular sentiment was not with him, and also that the majority of the aldermen are not disposed to back him in his effort to harass and cripple the railroad company. And then he began to temporize, with the conference meeting of Tuesday evening as a result. He got down from his high horse, and was willing to "ease up" on the company if it would consent to allow certain amendments to its franchise to be made, which would destroy its value and place the company at the mercy of just such meddlers as he for all time to come whenever such a man as he might happen to be elected mayor.

His overtures were rejected. The company asks nothing but its rights, and feels that the people of Marquette and the majority of their representatives in the council will back it in the

full and free exercise of these so long as it lives up to its contract with the city.

The MINING JOURNAL has not hitherto had much to say concerning the contention, for it has had faith in the good sense of the members of the council and felt that they could be relied on to sit down hard on the mayor when that became necessary for the protection of the company in the lawful and equitable exercise of its rights and privileges under the franchise granted it by the city. But the time has come when it is proper to place the facts before the people and let them understand how the accident at the head of the municipal government is acting in the matter and the motive by which he is inspired in his efforts to embarrass the street railway company.

His object is to make a little cheap capital for himself by limiting the rights of the company under the franchise that it holds from the city and then telling the people that he did this for their protection. The council that granted the franchise and the mayor who signed it were not derelict in their duty to the city when through their action the street railway company was put in possession of this franchise. Several of the members of the present council were members of the council of that year. They were as loyal to the interests of the city then as they are now and as capable of seeing that they were protected. It is an insult to these men and to those who were their associates in the council of 1890 to assume that they did not sufficiently scrutinize the franchise then granted the company, or were then incapable of understanding its full force and effect. The present council owes it to both itself and its predecessor to resent that insult by inviting the mayor to give his attention to his legitimate business and refrain from annoying a corporation which has expended a large amount of money here in launching and conducting an enterprise that is of inestimable benefit to the city.

Mayor Adams will not make much campaign capital for next spring by his interference with the company in the legitimate exercise of its vested rights. He will have to find some other means of rendering his administration notable and sending his name "sounding down the aisles of time" as the greatest mayor Marquette ever had. Thus far his administration has been conspicuous only through what it hasn't accomplished. He has no longer the support of the best men in the council; he never had the confidence and respect of the people, and unless he makes a turn that cannot now be foreseen and does something to redeem himself he will be remembered only as the most meddlesome, inefficient and undignified chief executive that has ever held down the mayor's chair in this city.

**W. C. T. U. Convention.**

The Twelfth district convention of the Women's Christian Temperance Union continued yesterday with unabated interest. The morning was devoted to reports of counties and unions, and good progress was shown in all quarters. The afternoon was given to reports of superintendents of various departments. Mrs. Wadsworth reported on "Sabbath Observance," Mrs. Anderson on "Sunday School work," Mrs. Northmore on "Work Among Foreigners," Dr. Conners on "Scientific Temperance Instruction," Mrs. Austin on "Flower Mission" and Mrs. Verran on "Juvenile Work." The afternoon session concluded with a children's meeting.

The evening session was set down for a "Y" evening. In the dialect of this organization "Y" and "Ys" refers to the Young Women's Christian Temperance union and its members. This is an auxiliary or branch of the big "white-ribbon" society. After Scripture reading by Miss Maggie McKinnon and prayer by Rev. Joseph Frazer of the Methodist church and an organ solo by Mrs. Brown Miss Tillie G. Roberts Ishpeming read a paper, by Miss Mattie Dwyer of Republic, who could not be present, on "How to Help our President," containing a number of practical suggestions toward the work of the society. Then came a solo by Miss Hodgkins of Ishpeming and a recitation by Miss Maggie Anderson of Calumet after which Mrs. Walker of this city read a paper on "Pelsarte," which Miss McInish illustrated with a number of poses and movements. Miss Muhlenbach of Calumet read a paper on "How to Improve the Work the Coming Year." Miss Helen Cowden of this city gave a very pleasing violin solo, accompanied by Miss Lundstrom. Mrs. Law presented a very handsome silken banner to the Young Women's union which has shown the largest percentage of gains in the past year. It has not yet been ascertained just which union is entitled to the banner but that is a detail which will be attended to later on. A chorus of "Ys" then sang "Our Badge" and Rev. Mr. Waterman pronounced the benediction.

Three sessions will be held today, closing the work of the convention. At the morning and afternoon meetings further reports will be heard from the superintendents of departments, including "Press," Mrs. A. M. Tutin; "Literature," Mrs. Molly; "Jail and Prison Work," Mrs. Austin; "Lumbermen," Mrs. Nunn; "Evangelists," Mrs. Waterman. Officers for the ensuing year will be elected at the morning session.

This evening Miss Frances Griffin of Alabama will deliver an address, subject not yet announced. Mrs. Griffin is said to be a very pleasing speaker and the general public is cordially invited to hear her. In fact all of the sessions are public and all who care to attend, men or women, will be welcome.

**Columbus Day Program.**

Columbus Day and the dedication of the World's Columbian Exposition tomorrow will be celebrated with a parade and exercises at the Casino in the morning. There will also be exercises at the High school, and the Ely school buildings and special services will be held at St. Peter's cathedral and St. Jean Baptiste church.

The arrangements for the parade have largely been made by this St. Jean Baptiste society, which has the honor of inaugurating the movement for a celebration of the day other than that held in the schools, and Mr. J. B. Neault of that society has very properly been named for marshal of the day.

The Knights of the Maccabees, Union St. Joseph, Scandia and Polish societies have signified their intention of turning out. Other civic societies have the matter under consideration and will decide today or tonight.

The parade will form on Superior street and the line of march will be west to Third, south to Rock, east to Front, north to Bidge, east to Pine, north to Arch, west to Third, south to Washington, east to Front, south to Main and east to the Casino. The order of the parade will be as follows:

- Marshal of the Day.
- Marquette City Band.
- Civic Societies.
- School Children.
- Mayor and Speakers.
- Citizens in carriages.

The parade will move from Superior street at 8:30 o'clock. The school children will fall in at the High school and the Casino will be reached by 9:30 o'clock. At the Casino Mayor Adams will preside and the order of exercises will be as follows:

- "America," chorus of 300 children, accompanied by the Marquette City band.
- Address—Mayor Adams.
- "Star Spangled Banner," chorus, and band.
- Address—Hon. F. O. Clark.
- "Columbia," chorus and band.
- Address—Mr. J. A. Vannier.
- "Hail Columbia," chorus and band.

The principal address will be that of Hon. F. O. Clark, on the event which the day marks. Mayor Adams and Mr. Vannier will speak but briefly and the exercises will all be finished inside of an hour.

After the exercises at the Casino the St. Jean Baptiste society and such other societies as care to join with it will proceed to the church of St. Jean Baptiste on Washington street where special services, a solemn mass and "Te Deum," will be held.

Pontifical high mass will be celebrated at St. Paul's cathedral at 9 o'clock tomorrow morning by Bishop Vertin, assisted by several other priests of the city. The children of St. Joseph's academy will occupy seats in the front of the body of the church.

The children of the city schools above the sixth grade will furnish the music for the exercises at the Casino tomorrow morning and a chorus of 300 has been drilled by Miss Davis for that purpose. After the program at the Casino appropriate exercises will be held by the upper grades at the High school building, beginning at 10:30 o'clock. The primary grades will hold exercises at the Ely building, beginning at 9:30 o'clock.

It is to be hoped, for the credit of the city, that citizens generally will bestir themselves today and do something in the way of decoration of business buildings and residences for tomorrow. The day is the anniversary of the discovery of the new world by Christopher Columbus, from which discovery resulted in time these United States of America. It has been well said that this nation is in itself the greatest monument and memorial to the intrepid Genoese mariner. Hence this anniversary is one in which every patriotic American should and must feel the most profound interest.

**Grocers Will Close.**

The grocers of the city all agreed yesterday to close their stores from this (Thursday) evening until Saturday morning, taking a holiday Friday in honor of Columbus day and of the dedication of the World's Columbian Exposition at Chicago. Not a grocery store will be open Friday and all should remember this and make their purchases today. It is quite probable that most other lines of business will be closed on Friday for the whole or a part of the day. No concerted arrangement has yet been made as far as can be learned but it is likely that the dry goods, clothing and shoe stores will also be closed.

A liber discount in merchant tailoring department.

The famous Burt shoe, \$4.75 at Neuberger's.

Hanan shoes going at \$4.00 at Neuberger's.

**M. E. ASIRE, Real Estate and Loan Agent**

Property bought and sold; houses rented and rents collected non-residents and all other business pertaining to Real Estate promptly attended to.

Coles' New Block, Cor. Third and Bluff Sts. Marquette, Mich.

There is no one instrument, unless, indeed, it be a large pipe organ, capable of the variety of effects that are obtainable on the Aeolian. Unlike the pipe organ, however, the Aeolian is adapted to all classes of music; overtures and symphonies can be rendered on it with all the softness and delicacy of the flute and violin and cello, and all the snap and brilliancy of the piano. See and hear them at Conklin's.
