Frank Hayler bounced away from my friend, I lift my hat to you; metthe telephone and flung himself in his chair, muttering maledictions on the heads of all ladies or otherwise who would insist upon calling or worrying the life out of a busy editor, on what they were pleased to term important business.

That was the third time during the norning that he had been rung up on some utterly frivilous pretext, and he was angry. But his anger was intensified as the telephone bell began to ring again. He threw down his pen in despair, and rushed to the instrument, shouting at the top of his voice: "What is it?"

"Very sorry, sir; lady won't go away. Says she must see you. She's waiting." "Let her wait," was Frank's angry rejoinder. "No," he added, almost immediately. "Show her up."

equality of all before the law. THE MINING JOURNAL says this to its

clerical friend, and the same statement is intended to be used as a nerve tonic prescription for the benefit of all whose overwrought imagination sees probable disaster in the issue. There never was

a time in the history of this country when our republic was less in danger from the machinations of evil-minded politicians than it is now. There never was a time when they were better equipped to maintain a safe representative government.

If there is impending disaster its causes lie much deeper than politicians or politics, in the ordinary acceptation of those terms. That there is something sapping the vitality of our political system there seems to be no doubt. Specialty. It is that something that the people are probing after and sooner or later they will find it and root it out. The po-

The Democrats of Houghton county, in convention assembled, heartily ratify and Telephone connections. endorse the platform of the national Democratic convention, held at Chicago in July, and pledge our honest, earnest and most hearty endeavor to secure the election of the nominees of that convention, William J. Bryan and Arthur Sewall. We insist that the platform adopted at Chicago is the essence and substance of our political salvation and that it is thoroughly Demo-cratic and purely American, and with its enforcement relief will come to the toiling masses and it will advance the general prosperity of our country.

Chairmen of the various township committees were appointed, and T. D. and ability. Ryan was re-elected chairman of the county committee. The meeting, which was harmonious in every respect, adjourned after giving three cheers for Bryan and Sewall. The Quincy band furnished the music.

The game of football Saturday between the Michigan Mining school and the Ishpeming High school football teams at the Mining school park at Houghton was won by Houghton-10 to 6-after a pretty contest. Ishpeming won the toss and took the ball. They kicked to Houghton's twentyfive-yard line, which was followed by a series of rushes and end plays, carry ing the ball to Ishpeming's twenty five-yard line. Ishpeming then got the ball on downs and by a pretty criss-LAND COMMISSIONER. cross carried it to Houghton's five-yard line; the referee, however, called the players back to the middle of the field, MARQUETTE, MICH. claiming that Ishpeming ran out of

bounds. The Houghton's got the ball on downs and carried it to within one yard of Ishpeming's goal, where a stubborn resistance lost them the ball and downs. Short rushes brought the ball to Ishpeming's fifteen-yard line, and by another pretty criss-cross play Johnson ran the entire length of the field, scoring the first touchdown for Ishpeming. Ishpeming failed to kick a goal.

The second half opened with a kickoff for Houghton. By good rushing and a good run by Harris, aided by excellent interference, Houghton scored a touchdown within five minutes and kicked ; a goal. A second touchdown was made by Carpenter of Houghton, but they failed to kick a goal. When time was called the ball was in the middle of the field. The average weight in favor of

Houghton is said to have been twenty pounds to a man. Ishpeming excelled in the science of the game, but could Urinary Diseases not overcome the difference in weight. The features of the game on the Mining School side were the running of Harris and the general play of Parker and Haas, and for Ishpeming the playing of Barber, Wright, McCarthey and Johnson, the latter's work never being excelled here.

The Ishpemings are an exceptionally gentlemanly lot of boys and their future visits will be heartily welcomed.

A merchant noticed, in the progress of years, that each successive bookkeeper gradually lost his health and finally died of consumption, however vigorous and robust he was on entering his service. At length it occurred to him that the little rear room where the books were kept opened in a back yard so surrounded by high walls that no sunshine came into it from one year's end to another. An upper room, well lighted, was immediately prepared, and his clerks had uniform good health ever

A familiar case to general readers is derived from medical works, where an entire family became ill, and all remedies seemed to fail of their usual results, when accidentally a window glass of the family room was broken, in cold weather. It was not repaired, and forthwith there was a marked improvement in the health of the inmates. The physician at once traced the connection, discontinued his medicines, and oris a well-known example, she having dered that the window pane should not

A French lady became ill. The most eminent physicians of her time were called in, but failed to restore her. At length Dupuytren, the Napoleon of physics, was consulted. > From these facts, which cannot be disputed, the most common mind should conclude that cellars and rooms on the northern side of buildings, or apartments into which the sun does not immediately shine, should never be occupied as family rooms or chambers, or as libraries or studies. Such apartments are only fit for purposes which never require persons to remain in them over a few minutes at a time. And every intelligent and humane parent will arrange that the living-room and the bedrooms shall be the most commodious, lightest and brightest apartments in his dwelling.

THE BEST FAMILY MEDICINE She Has Ever Known. Words of Praise from a New York Lady for AYER'S PILLS

"I would like to add my testimony to that of others who have used Ayer's Pills, and to say that I have taken them for many years, and always derived the best results from their use. For stomach and liver troubles, and for the cure of headache caused by these derangements, Ayer's Pills cannot be equaled.

When my friends ask me what is the best remedy for disorders of the stomach, liver, or bowels, my invariable answer is, Ayer's Pills. Taken in season, they will break up a cold, prevent la grippe, check fever, and regulate the digestive organs. They are easy to take, and are, indeed, the best all-round family medicine I have ever known."-Mrs. MAY JOHNSON, 368 Rider Avenue, New York City.

It pleases us when our com petitors madvertantly advertise our business. We have never paid a physician a percentage on his prescriptions-no reputable physician or druggist would be a party to any such arrangement. If physicians have a preference as to where their prescriptions are prepared you may be sure there is a good reason for it. It does not interest our customers as to how large or small our expenses may be. The only important question to them is, can they get what they ask for at a reasonable price and be treated with civility. Our constantly increasing business goes to show that our customers are satisfied. And we are in better shape than ever to cater to the wants, at

LOVE LIGHTENS LABOR.

Advantages Country People Have Over Their City Brothers.

The countryman has, if he be wise enough to perceive it, good reason to count himself a luckier person altogether than he whose work is done in town. For the latter, says Black and White, unless he be exceeding well off, there are few pleasures easily obtainable in the intervals of toil. Food and sleep are excellent in their way, but they are necessities, and they are usual. ly taken under such circumstances as to have nothing of the character of luxuries. The countryman is luckier than this. It may be that his toil is tiring and that his wage is a small one, but he labors in such a way that he always gets the fullest enjoyment out of reed pens, ink, paper and sand, with a this rest, and when he pauses to take ruling-board with strings across at reghis midday meal it is under conditions that would make a perfect holiday for be lined is pressed. ONE OF THE GREAT SUCCESSES OF THE DAY.

During a recent interview with the man-ufacturers of "Battle Ax" Plug Tobacco they said they had been amply repaid for the enormous amount of money which they have spent for newspaper advertising by a wonderful increase of business. They claim that they have had an excellent opportunity to test the advantage of newspaper advertising, because ever since they started, manufacturers of other brands of plug tobacco who have for years made enormous profits by giving to the consumers a small piece of tobacco no better than "Battle Ax," immediately recognized the fact that on account of the superior quality and liberal sized piece of "Battle Ax," their businesses were in great danger of being curtailed. In their endeavor to prevent this they waged bitter war against the manufacturers of "Battle Ax" and re-sorted to methods of all kinds which seem questionable to business men who possess high sense of honor and fair dealing. Notwithstanding all this handicap, the manufacturers of "Battle Ax," through the medium of their newspaper advertise-ments, were able to tell the consumers of the high grade and fine quality of "Battle Ax" and the great economy derived from using it, until today "Battle Ax" is pronounced by all the greatest success on the market and more pounds of it are sold than of any other brand of plug tobacco. So much for newspaper advertising. (10-5)

AMERICAN CAGE BIRDS.

Facts Worth Knowing If You Observe Them.

In a state of nature small birds flit about and sing only during daylight, and they always retire to rest at sundown. You must look out for this if down. You must look out for this if you keep your birds in cages. They trict; and we hereby unanimously agree do not understand that they had better upon the said Hon. Henry W. Seymour as keep silent after the lamps are lighted. They instinctively keep on singing, as if it were still daylight. The immediate effect of this is that the birds become over-fatigued; they are apt to

moult, grow thin, suffer from exhaustion, and quickly perish. The cage should be removed to a darkened room at nightfall, or, if this is not convenient, cover up the cage with a dark cloth before lighting the lamps. In covering the cage care should be taken so to arrange the cloth that the bird can have plenty of air. In removing birds from one room to another it is important to see that there is no change in temperature. If removed to a different temperature there is a strong chance

that they will begin to moult, which generally leads to something serious. Remember that nature supplies a coat to suit heat or cold in which her creatures are placed, and that sudden and

frequent changes in temperature are a severe tax upon a bird's vitality.

The object in the construction of a bird's cage should be to furnish plenty of light and air, and the oage should alto have a night covering of dark cloth, which should cover the top of the cage and extend half-way down the sides, as many birds are likely to take cold.--Harper's Round Table.

Robert Blemhuber of Marquette was nominated for senator by acclamation. The nominee was escorted to the platform and requested to make a speech. Mr. Blemhuber responded by ways be kept perfectly clean. DANGER IN ROENTGEN RAYS. Penalties for One Who Looks at His

Skeleton A warning has been voiced by one of the leading English medical journals in regard to the too frequent use of the Roentgen ray apparatus.

It is interesting, no doubt, says the Philadelphia Ledger, to obtain a series of photographs of one's own skeleton, but if this is to be at the expense of such trifles as one hair and one's finger nails, it hardly seems worth the cost. One electrical engineer, who has often demonstrated the beauty of his own to deliver the best finger bones by placing one of his hands within the radius of the searching rays, that hand, while Sidney Rowland, who is one of the leading experimenters in this direction, mentions several cases of similar character in the structural changes that occur in the hair, and so forth, of those who have been frequently shadowgraphed by this method. market price. derstood. One curious suggestion has already been made. It is a well-known superstition, and one which has existed for generations, that people who sleep in the direction of the moon have their reason more or less seriously affected. Now it is said that these ultra violet rays exist in the moonlight, and hence a popular superstition may be founded upon scientific fact.

The smoke continued to roll over the city and a lurid glow showed itself near afternoon but information came in meagerly. In the early evening the report came that Norton's lumber camp was in danger, quite surrounded by fire, and that serious difficulty would be experienced in getting the horses out. Fortunately the wind changed and the camp was put out of danger, probably for the night. The fire has not grown any since the middle of the afternoon but seemed up till a late hour last night to be holding its own. Every child, she says, should be given a chance to talk. If children are not repressed, but are allowed to voice their ideas they will have no dif-ficulty when they are older in finding words to express themselves in. She said that when she told a story for the entertainment of a child she always exacted the promise that it would tell the story to someone else. She did this because the repetition of the story would help it to acquire facility of expression. Mrs. Treat's talk, while along the idea of the kindergarten theory advanced ideas that were of practical use to teachers of all grades, even up to the highschool, and to parents as well. At

The first is that every child should have suitable companionship, and the second is that it should be supplied with what kindergartners call "organized mater-ial." This is playthings in the nature ial." This is playthings in the nature of kindergarten gifts, all of which are intended to draw out the child and develope its mind at the same time it is being amused.

From these two lines of thought she unfolded the ideas of the new education. She explained the kindergarten theory that all children are naturally good, and that bad children are those who have been injured either by their environment or otherwise.

Following this theory she holds that children should be taught and governed along positive, not negative lines. They should be led to do the right, not forbidden to do the wrong. Teachers and parents, she says, should drop the use of the words "don't" and "no" in the

reproving sense. If a child is doing something in school it should not do turn its attention to something it should do. If a boy is restless and apparently unable to re-strain himself and is disturbing the pupils send him on a small errand and give him a chance to relax himself.
