Shoes Are Underwear.

Now Is Your Time

to give careful thought to underwear of all descriptions, and the underwear that is of great importance in these days of cold, damp fall weather is shoes. It's a new name to give it, but the application is correct. When it comes to this class of underwear, we are in it for anything you need in a first-class up-to-date shoe of the latest style, cut and make, at a price fully within the reach of your pocket book. We aim to put on your feet the class of goods that will prove a walking advertisement for our establishment, for we fully realize that a well-pleased customer is sure to bring us others. For \$3.50 we can give you all that you can desire in this kind of underwear. Investigate and see.

SPECIAL PRICES . . .

## SEAL EXPERTS AGREE.

Reach a Unanimous Conclusion Concerning Condition of Bering Sea Herd.

QUESTION OF STRICTER REGULATIONS, HOWEVER, POSTPONED.

Canadians Urged That All Matters at Issue Be Bunched for Settlement by a Commission, Which Plan Is Yet to Be Acted on by the U. S.

SATISFACTORY ADJUSTMENT IS NEAR.

Washington, Nov. 16.—The Bering sea meeting in which representatives of Great Britain, Canada and the United States participated closed tonight, when the seal experts made a unanimous report concerning the condition of the seal herds and the diplomatic representatives reached an understanding by which they hope at a later date to effect the final adjustment not only of the Bering sea question but the other pending border controversies. For the present, however, no final action is taken as to the suspension of pelagic sealing. The Canadians urged that the other questions be embraced in any plan of settlement and suggested an international commission to accomplish this end. This proposition was fully discussed and an agreement reached that the Canadian officials put their views in writing after returning to Ottawa and submit them to the authorities here. All parties concerned say the outlook is favorable to a satisfactory adjustment.

The unanimous agreement of the experts brings the governments together for the first time on all facts relating to seals. This agreement was reached after a pains-taking comparison of notes, and the results are announced in an official statement by General Foster as follows:

"The delegates to the fur seal conference have agreed unanimously on certain propositions touching the fur seal herds of Bering sea. The report contains sixteen propositions, which are briefly epitomized as follows: "That the Pribylof herd has declined in numbers from 1884 to 1897; that the number was formerly three to five times that which now exists; that the death rate among the pups is great; that the number of breeding females in 1896 and 1897 was between 130,000 to 160,000; that the decrease from 1896 to 1897 was notable; though its extent could not be definitely determined; that pelagic sealers respect the limitations of the law; that pelagic sealing involves indiscriminate killing, so that the catch at sea contains a marked excess of females; that fur seals, being polygamous, a large number of males may be killed in similar numbers without checking an increase in the herd; that a small number of females, less than the annual increment of breeders, might be taken without producing an actual decrease; that pelagic sealing has of late fallen off in a greater ratio than has the herd, thus producing a tendency toward equilibrium in number; that in estimating the future conditions of the herd there must be taken into consideration the reduction in the number of surviving pups caused by the pelagic catches of 1894-96; that the herd is in danger of actual extermination so long as its haunts on land are protected and the protected zone maintained; that both land and sea killing now yield considerable profit either to leasees or to pelagic sealers themselves.

"The delegates signing the agreement are Charles Symner Hamlin, David Starr Jordan, D'Arcy Wentworth Thompson and James Melville Macoun."

Following the agreement of the experts the diplomatic officials assembled to discuss the larger question of putting an end to pelagic sealing and settling other border controversies. General Foster's power having been materially enlarged since the coming of the Canadian officials, for as a result of the long and friendly talk between Sir Wilfrid and Secretary Sherman the latter had written the Canadian premier stating the president had empowered General Foster to treat on the various border questions which Sir Wilfrid had called to the attention of Mr. Sherman and with the co-operation of the British government, to conclude treaties covering these subjects, this gave the meeting broad significance.

The session began about 4 o'clock this afternoon and lasted until 7 tonight. During these three hours the entire range of border affairs was discussed. Primarily the purpose of the meeting was to secure an agreement on the Bering sea question. The Canadians made it clear, however, they wished any plan of settlement to take a broader scope than the one subject of Bering sea and embrace the many sources of friction along the border. In this connection the plan for an international commission was discussed at great length. The Canadians felt that a commission afforded the best means of reconciling all the differences and opening the way to reciprocity.

The discussion was of a most friendly nature throughout and no sharp differences were allowed to crop out. It was felt, however, the plan for a commission was too large a question for immediate determination. The final understanding was reached therefore that the Canadian proposition should be reduced in writing as the basis for further negotiations. This closed the conference and the officials said their farewells, expressing satisfaction at the cordial feeling which had characterized the meetings of the last ten days. Sir Wilfrid and Sir Louis leave tomorrow for Ottawa.

**Crooked State Officers in Court.**

Pierre, S. D., Nov. 16.—The embezzlement cases against the state officers were called in the circuit court today. The demurrers filed in all three cases were overruled and pleas of not guilty entered. The cases will come up for hearing some time this week.

## SLAUGHTERS THOUSANDS OF NATIVES.

Chief Samory Razes the Capital of a Neighboring King in the Niger Country.

Paris, Nov. 16.—A special to The Journal brings serious news from the Niger region of West Africa. In order to punish the inhabitants of the town of Kong, capital of the kingdom of Kong, in the Mandingo region of upper Guinea, for their refusal to supply his troops with provisions, Chief Samory razed the town and massacred several thousand natives.

For several weeks the French newspapers have been calling upon the government to send a punitive expedition against Chief Samory, who on Aug. 2 last surprised a French detachment of native troops sent to occupy the territory, which he had offered to evacuate. Two French officers and forty-four men were killed. If the report as published by The Journal is confirmed the French government will be forced to send an expedition against Chief Samory.

IT WAS A CANARD.

Turkey Has Not Yet Accepted the Demands of Austria.

London, Nov. 16.—It now appears that the statements made yesterday from Vienna that the Turkish government, in reply to the demands of Baron de Calice, Austria-Hungarian ambassador to the porte, had agreed to salute the Austrian flag after dismissing the vail of Adana and the maussarif of Mersina for indignities offered an Austrian, Brazzafoll, was premature. The porte has not yet yielded to the Austrian demands. Dispatches from Vienna announce up to midnight Tuesday no intimation of having received notice of the intention of Turkey to salute the flag. If however the Austrian demands are not complied with by noon Thursday, Baron de Calice will leave Constantinople and Austrian warships will bombard Mersina.

HUNDREDS OF MEN MADE IDLE.

Mine Fire at Aspen, Colo., Causes Abandonment of Fifty Miles of Workings.

Aspen, Colo., Nov. 16.—Although the management of the Smuggler mine, which has been on fire since Sunday, express every confidence of their ability to control the situation within a short time, and they claim that material progress has been made the last twenty-four hours, the outlook as viewed by the people of the camp is anything but cheering. Today not a mine on Smuggler mountain was being worked except under the most disadvantageous circumstances. Over six hundred men are idle and many others will be laid off the next few days unless the fire is extinguished. In all fully fifty miles of workings are abandoned. There have been no fatalities as yet, but there have been scores of narrow escapes, of which some were miraculous.

GOVERNOR ENTERS THE GAME.

Militia to Protect the Remaining Spicer Murderers from Lynchers.

Bismarck, N. D., Nov. 16.—Adjutant General Miller of the state militia received today from Governor Briggs telegraphic advice authorizing him to take whatever steps are deemed necessary in protecting the remaining two prisoners concerned in the Spicer tragedy by calling out whatever militia he may choose. Their cases will be passed upon by the court Nov. 29. There was a rumor this morning that had the men not been removed from jail there would have been a desperate effort to lynch them last night by a mob that is reported to have been on the road to this city for that purpose.

WARRANTS OUT FOR THEM.

Officials of the Failed People's Savings Bank of Lansing Facing Penitentiary.

Mason, Mich., Nov. 16.—Warrants were today issued for the arrest of the officers of the defunct People's Savings bank of Lansing. Charles H. Osband, cashier, is charged with making false entries in the books with intent to deceive the bank's officers and the banking commissioner. Director Charles Brown and Christian Breisch will be arrested for perjury, it being alleged they did not own in good faith the amount of stock required by law for the qualification of directors.

ROBERT M. SIEELE DEAD.

A Well-Known Capitalist and Father of Michigan's Treasurer.

St. Johns, Mich., Nov. 16.—Robert M. Steele, well-known capitalist and railway promoter, is dead. Mr. Steele was the father of State Treasurer Steele and was considered one of the wealthiest men in central Michigan until two years ago, when his financial affairs became involved and he was forced to make an assignment.

Burned to Death.

Plattsburg, N. Y., Nov. 16.—Mrs. Terrell, aged seventy, and her nephew Edward Mason, aged fifty, were burned to death near Peru last night by upsetting a kerosene lamp.

Eufaula, Ala., Nov. 16.—The home of Louis Brown burned today and his three half-grown children were burned to death. The parents were absent and had locked the children in the house.

Killed on a Railroad Crossing.

La Crosse, Wis., Nov. 16.—Miss Naom Melville, assistant principal in the public schools at Bangor, while riding in a carriage this afternoon with Miss Jennie Tromble was struck on a crossing by the locomotive of a freight train. She died from her injuries shortly afterward. Her home was at Davenport, Ia. Miss Tromble was seriously hurt.

Today's Weather Prediction.

Washington, Nov. 16.—The following is the forecast for Upper Michigan for tomorrow: Fair, slightly warmer; light northerly winds becoming variable.

Dies of Heart Failure.

New York, Nov. 16.—William Ellwood, a well-known actor who has been leading man in several prominent companies, died here today from heart failure.

## BIG LEGAL FIGHT IN SIGHT

Will of the Late Banker Ketcham of Chicago to Be Contested.

BROTHER HINTS THE DECEASED WAS MENTALLY UNSOUND.

Also Contended That He Was Unduly Influenced in Drawing the Document, by Which the Widow Is Made Sole Heir to the Estate.

CORONER'S INQUEST POSTPONED.

Chicago, Nov. 16.—The coroner's inquest into the death of John B. Ketcham has been postponed to Friday to give the chemist time to finish his analysis. The remains were taken to Toledo tonight for interment. Mrs. Ketcham did not accompany them and it is doubtful if she attends the funeral, as she is nearly prostrated physically. Within half a dozen days the will of the late clubman will be filed for probate, and it is intimated that the contest which this step will undoubtedly produce may lead to one of the hardest legal battles ever waged in the courts, though the stakes are not so high as they have been in more notable cases. The evidence adduced at the coroner's inquest on the remains of Mr. Ketcham will figure to a great extent in determining the final disposition of the property of the deceased. George Ketcham evinced great disinclination in his evidence today to admit that the dead man had a lawful wife living at the time of death. He hinted that his brother had shown some weakness of mind, and upon this latter point it is probable that the greatest fight will be waged upon the will when the latter document is produced. Efforts are to be made to show, it is stated, that Mr. Ketcham was unduly influenced at the time of drawing his will, two weeks ago, by the terms of which his whole property was given to Mrs. Ketcham or Wallace.

BIG GUNS FOR COAST DEFENSE.

Pennsylvania Steel Plants Working Night and Day on Hurry Orders.

Philadelphia, Nov. 16.—The big Midvale Steel works and the plant of the Southwark Foundry & Machine company have been working an increased force night and day for several months, Sundays included, and from the present outlook will continue to do so for several more months, with no shutdown at either for the holiday vacation. This state of affairs has caused considerable comment among the inhabitants of Tioga and Nicoletown, and it has just leaked out that the unusual exertion at both the big works is due to hurried orders of the government for an increase of armament, and that Captain T. A. Lyle, U. S. A., is supervising the inspection department. The order placed with the Midvale Steel works is for fifty 10-inch disappearing guns and ten 12-inch mortars. One of the big guns included in this contract is a 10-inch wire gun which will weigh thirty tons, and is expected to hurl a 600-pound shell with a muzzle velocity of 688 feet per second. The greatest length of this gun is 37 1/2 feet, and it will be employed in coast defense. The Southwark company has a contract with the war department for ten 10-inch disappearing gun carriages and ten 12-inch mortar carriages. The company has completed several of the carriages and delivered them to the government, as has the Midvale plant several of the big guns.

AFTER BRAZIL NOV.

Germany Demands Satisfaction for an Insult to One of Its Subjects.

Berlin, Nov. 16.—The German consul at Desterro, capital of the state of Santa Catharina, has demanded of the Brazilian government an indemnity and the punishment of those guilty of outraging a German teacher named Roth at Palhoca. Not only the radical but the clerical journals are of the opinion that the conflict with the republic of Hayti and the attack on missionaries in China will be used to influence German public feeling in favor of extensive naval plans. The various journals, meanwhile, continue to urge the government to take prompt action for reparation in Hayti.

Polish Catholic Bishop for America.

Buffalo, Nov. 16.—Apolinary Karwowski, who is a conspicuous figure in the affairs of the Polish Independent Catholic church, today received a cable message from Anton Koelowski, dated Wiesbaden, Germany, as follows: "I was consecrated as bishop for the Polish Independent Catholics of North America last Sunday. I leave for America at once." "That means that at last the Poles in this country will have a bishop of their own," said Mr. Karwowski. "Some would not give us one before we left that church, and now we Independents will have one."

Joseph's Heavy Sentence.

Boston, Nov. 16.—Joseph A. Iasigi, formerly Turkish consul in this city, who was arrested in New York last summer, charged with the embezzlement of large sums from trust funds held by him and who was recently found guilty in the Suffolk county superior court, was today sentenced to serve a term of not more than eighteen nor less than fourteen years in state's prison, with one day solitary confinement and the rest of the term at hard labor.

Cattle Quarantined at Ra'sed.

Topeka, Kas., Nov. 16.—The quarantine in Kansas on cattle from the South was lifted today, and according to Taylor Riddle, chairman of the state livestock committee, it will bring the biggest influx of cattle for years. He said: "I consider it a conservative estimate to say that thirty thousand Texas cattle and twenty thousand more from Arkansas, Mississippi and western Tennessee will be shipped into Kansas before Dec. 1."

MUNYON'S RHEUMATISM. Rheumatism there is guaranteed to be absolutely harmless, and a strong tonic building up the weak and debilitated.

# Copper Country Department

ANOTHER QUACK SKIPS.  
CHARGED WITH HIGHWAY ROBBERY.  
Keweenaw County Finally Develops a Criminal Case.

Dr. Burghel of Calumet has quietly departed for other fields and there are a few who would like to learn his present postoffice address. The doctor is one of the great number of "cure all" quacks by which this community has been infested the past season. In this connection it may be stated that thousands upon thousands of dollars have been taken from the working people of this county by ruthless impostors, while it is very doubtful if a more capable and representative lot of physicians are to be found in any county in the state than Houghton county possesses. The quack receives his fee in advance and more later on if the sucker can be worked for more, so his system of book-keeping is simple, while the local physician gets his money "perhaps." Berghehl advertised extensively in the Calumet Finnish paper and soon had hundreds of his readers persuaded that they were subject to ills they had never previously dreamed of. Calumet offered a better field for him than would the Klondike for a coal dealer, and business came to the doctor faster than he could attend to it. Berghehl's advertisement came under the notice of C. J. Sorsen, a student at Rush Medical College, Chicago, who wrote an article to the Finnish paper in which he exposed Berghehl and killed his goose, as most of his patients realized they had not been sick while the fee that really were again sought the advice of reputable physicians. Of course this will not deter other "doctors" from coming to the copper country and relieving its people of the possession of their dollars, for there is much truth in the saying "there's a sucker born every minute."

## HE WOULDN'T PAY ALIMONY.

So Andrew Aho is Given Ninety Days in Jail to Think About It.  
Andrew Aho, a carpenter employed at the Franklin, Jr., was brought before Judge Haire yesterday morning for refusing to pay alimony to his divorced wife. Aho believes that the law relating to alimony is radically wrong and stated rather forcibly that he would not contribute a cent to his divorced wife, whereupon the judge sentenced him to sixty days in the county jail. This does not seem to have deterred Aho, who said he would prefer to pay alimony, but he was shut off by being informed his sentence was changed to ninety days, with the additional information that the judge would be on hand to again discuss the matter at the end of that period.

## AMONG MINE MATTERS.

Although an assessment of \$1 per share has been called by the Humboldt Mining company, no exploratory work will be conducted on the property before spring. The property is in charge of Superintendent Clark of the Arnold and it is understood orders have been placed for three new boilers, two for the Arnold and one for the Humboldt. The first incline shaft on the ashbed was sunk on the Humboldt property and was well charged with copper. Among a great many it would be no surprise to eventually see a consolidation of the Arnold, Copper, Fetherick and Humboldt properties and the whole worked on a large scale.

## OLD TIME SWEETNESS GONE.

The old fashioned molasses is rapidly disappearing as an article of commerce," said a prominent grocer, "and in its place have come a number of syrups which are more costly and by no means as satisfactory, especially to the little ones, who delight, as we did when we were young, in having 'lasses on their bread. Most of the molasses gone into the distilleries, where it is made into rum, for which notwithstanding the efforts of our temperance workers, the demand is constantly on the increase, especially in the New England states, and for the export trade. The regular drinker of rum will take no other liquor in its place if he can help it. It seems to reach the spot more directly than any other dram."

## THE TRAMMERS' STRIKE.

No change was reported in the trammers' strike at the Atlantic mine yesterday morning. Sheriff Lean and Deputy McNamara spent Monday evening on the premises, but although some threats were made there was no trouble and the precaution may have been a wise one. The strike is confined to the trammers, who number in all 120, every man of whom has quit work to demand an increase of \$5 a month, the discharge of a trammer boss and the removal of other alleged grievances. The strikers are largely Finns, who secured an interpreter from Hancock to present their grievances to the mine owners. It is not believed that the visit of this gentleman to the mine has tended to improve matters, as it is a well established fact that employers prefer dealing with their employees direct in such matters. The miners were at work Monday night and yesterday and the stamp mill continued in operation.

## SOLE BOYS' HOP.

What gives every promise of being one of the most pleasing social events of the season at Calumet is the fifteenth annual party of the Calumet Light Guard at the Armory, Wednesday evening, Nov. 24. The affair is in the hands of competent committees and no pains are being spared to make it a brilliant success. Music will be furnished by the Fifth Infantry band.

## DRAWING BIG HOUSES.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1888.

## PURE BLOOD IS THE FOUNDATION OF HEALTH.

Hood's Sarsaparilla makes the blood pure, rich and nourishing and gives and maintains good health.

## TO CURE A COLD IN ONE DAY.

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. 25c. The genuine has L. B. Q. on each tablet.

# \$700.00 IN GOLD And Other Valuable Presents GIVEN AWAY

TO THOSE WHO SOLVE THE TWO FOLLOWING WELL KNOWN "OLD SAYINGS!"  
The "old sayings" outlined below are familiar to almost every man, woman and child. Each of the words have a dash or dashes where the missing letters should appear, and if you will fill in all the proper letters in the dashes or spaces, it will complete the old sayings selected. FILL IN THE PROPER LETTERS AND WIN A PRIZE!

A B R N H A D I O T W I T T U H  
W N T H C A I A A T I E W L P A

We will give to the first five persons from whom we receive correct answers to the above two old sayings \$50.00 each; to the next five correct answers \$25.00 each; to the next ten correct answers \$10.00 each; to the next twenty-five correct answers \$5.00 each; to the next fifty correct answers a Watch warranted to keep good time; to the next one hundred correct answers \$1.00 each; and to everyone sending in a correct answer so to at least one of the above old sayings, we will give a handsome roller ball pen with garnet center, surrounded by six diamonds. Some jewelers will charge you dollars for a ring like the one we give away for a little less than the price. We give away the roller ball pen and pen nib to any post office in the United States and send same promptly. In order for persons to participate in this contest all answers must be sent by registered mail, in a person living 1000 or even 5000 miles from Chicago will have the same opportunity of winning a prize as those who live near this city, as the date of post marks on the envelope will be taken into consideration, and prizes given accordingly.

Dr. Hobbs Sprague's Kidney Pills and his Little-Liver Pills are given away to every household in the land. To accomplish this end, he has made the above grand offer. CONDITIONS: Every one who wishes to enter this contest must send us with their answer to the above old sayings for a trial of Dr. Hobbs Sprague's Kidney Pills, or 50 cents for a box of his wonderful Little-Liver Pills. The name of the sender must be given in full, and the name of the street and city. The name of the sender must be given in full, and the name of the street and city. The name of the sender must be given in full, and the name of the street and city.

OUR RELIABILITY: We pay nothing for the prize, as they are absolutely given away to more thoroughly interested Dr. Hobbs Sprague's Kidney Pills, or 50 cents for a box of his wonderful Little-Liver Pills. No attention paid to letters unless containing name for Pills. Mention this paper and address. Dept. 67, HOBBS REMEDY CO., 84 Adams St., CHICAGO, ILL.

## .....DIRECTORY OF..... DULUTH MANUFACTURERS AND JOBBERS.

DULUTH is located at the head of the Great Lakes, and is the natural receiving and distributing point for supplies coming from the east for a vast area, comprising several of the richest states and territories of the Great North-west. It is also the natural shipping point for the products of these states and territories. It is, for these reasons, a natural manufacturing and jobbing, as well as shipping center; and this fact explains the creation there of a great manufacturing and jobbing interest while the city is yet in its infancy, in spite of the discrimination against it and in favor of St. Paul and Minneapolis of the old railway systems.

Its growth within recent years has been marvelous, and has been almost entirely due to the advantages its position gives it as a commercial and manufacturing center, though these have as yet been only partially developed. In 1885, it had a population of 18,000. Ten years later, in 1895, its population had increased to 50,000, and it has today a population of not less than 65,000 in spite of the four years of depression which it has experienced in common with the country at large. In 1885 its wholesale business amounted to \$1,200,000, and in 1895, according to the census returns of that year, it had swelled to \$2,000,000, a figure that will be very greatly exceeded by the business its jobbers will do this season, as the volume of trade seeking Duluth from the region naturally tributary to it is expanding with accelerating rapidity as her wholesale houses are increasing their facilities for handling it and are being provided with better transportation service.

Within a very few years it has become the seat of an immense milling industry and is certain to become the greatest flouring center of the world, eclipsing Minneapolis in that respect. Its "Imperial" flouring mill, operated by the Imperial Mill company, is the largest and best equipped flouring mill in the world, and enjoys the distinction of having made the largest output in a single day of any flouring mill in the world. Its average daily capacity is 8,000 barrels of flour. The Imperial brand of flour has already an established place in the trade, and ranks so high for excellence that it sells on its trade mark in every town and city of the country. Several other large mills have been put in at the head of the lake since the Imperial demonstrated that the milling industry has there a location possessing peculiar and valuable advantages, and this is destined to be one of the greatest of Duluth's industries.

The lumbering industry of Duluth in its various branches has grown to be of vast proportions. A very great pine district is easily tributary to that point, and several new ones which make a specialty of working up the finer grades of pine lumber into finished forms have sprung up there within late years, these furnishing employment for a large number of operatives and contributing much to the steady growth and stable prosperity of the city.

Duluth is the commercial center of the Minnesota Iron ranges and the shipping port for the Mesaba, whose mines already rank among the largest producers of Bessemer ore in the world.

It is the greatest distributing point for coal in the country, its coal business having grown to enormous proportions.

It is already a great grain market, and will yet be the greatest in the country, as the finest wheat district in the world is directly tributary to it.

It is developing a packing interest that foreshadows a great future for the city as a packing center. For this industry it enjoys special advantages, which will increase as the country west of it becomes settled and cultivated and the farmers engage more largely in cattle raising.

It is the coming industrial, commercial and manufacturing emporium of the Great North-west—an empire where millions will find homes, and flourishing villages and cities will arise, within the next quarter of a century, and it is already well on the way to the realization of its manifest destiny.

## STONE-ORDEAN-WELLS COM'Y.

(Successors to Wells-Stone Merc. Co., and Stone-Ordean Co.)  
DULUTH, MINN.  
IMPORTERS AND WHOLESALE GROCERS.

The largest, best located and best equipped wholesale grocery house in the northwest.  
HIAWATHA FLOUR—Mr. H. O. McMain, 320 East Arch street, Marquette, is our representative for the Northern Peninsula of Michigan. (7-1-6m)

## A TRANSFORMATION.

He had ceased to call her "Darling,"  
She had ceased to call him "Dear,"  
He has ceased composing sonnets  
To her "little shell-like ear."  
She has ceased to hurry madly  
To the mirror, when he calls;  
He has ceased to buy her chocolates  
And ice cream at concert balls!  
This is not because these lovers  
Have been mixed up in a row—  
No, the simple truth is that they  
Are a married couple now.

## THREE DAYS TO CALIFORNIA.

Via the "Sunset Limited."  
The most beautiful and fastest long distance train in the world. Leaves Chicago and St. Louis, Tuesdays and Saturdays of each week. Before arranging for a trip to Texas, Mexico or California write for full particulars in regard to this magnificently equipped train. It has no peers. The route is the best for all winter travel. No snow; no ice; no high altitudes.  
H. D. AKMSTRONG, T. P. A.,  
7 West Fort street, Detroit.  
Bissell Wilson, T. P. A.,  
111 Adams street, Chicago.  
(10-21-17)

## SUNDAY TRIPS.

To the Queen City of the Upper Peninsula.  
The D. S. S. & A. Ry. have on sale Sunday excursion tickets to Marquette and return at the following very low fares:  
From Eagle Mills.....\$ .30  
" Negaunee...... .50  
" Ishpeming...... .50  
" Humboldt...... .75  
" Republic...... .75  
" Champion...... .75  
" Michigamme...... .75  
" Nestoria...... 1.25  
Tickets are on sale at Nestoria, Michigamme and Champion only for the train due to arrive Marquette 5:40 p. m. Saturdays and are good for return 10:50 a. m. Sunday following.  
At Republic, Humboldt, Ishpeming, Negaunee and Eagle Mills tickets are sold only for the train arriving Marquette 10:20 a. m. and are valid for return on the trains leaving 4:40 p. m. or 10:50 p. m.  
The train which now leaves Marquette at 4:40 p. m. for Republic will make these Sunday trips more popular than ever, as excursionists will be able to spend the entire day in Marquette and reach back there at a reasonable hour the same evening.  
(5-31-0)

GERMANY IS ALARMED.

Exports to the United States Show a Falling Off of 50 Per Cent.

DIMINUTION DUE TO THE DINGLEY TARIFF LAW.

Incidentally it indicates a Heavy Money Loss in Our Revenues—Newspapers of the Empire Urge Increased Import Duties to Retaliate.

GOSSIP FROM NATION'S CAPITAL.

Washington, Nov. 16.—Consul Monaghan, in a report to the state department on Germany's exports to the United States, says: "Germany is alarmed. The exports to the United States are dropping off. Nothing so alarming has appeared in twenty years. America was always the best customer in many lines of manufacture. In the September quarter of 1896 seventeen consular districts sent to the United States goods amounting to \$14,481,000. In the same quarter in 1897 the same districts sent \$1,189,000. The average loss all over the empire is nearly 60 per cent. In many cases this indicates much more than mere money losses to our revenues; it indicates that the diminution in exports from this empire is due to the Dingley bill. The public is told to put little confidence in newspaper reports, even if accurate. Each issue urges an intelligent effort to retain the United States market."

Consul Monaghan quoted from a paper which says that some of the falling off is due to the rush of goods to get ahead of the Dingley law, but adds that Germany must suffer severe losses on account of the tariff bill. Some papers suggest raising import duties to retaliate, especially on sugar.

\$45,000,000 DEFICIT IN FIVE MONTHS.

Treasury Officials, However, Expect a Big Rush of Imports from Now On.

Washington, Nov. 16.—Monday marked the conclusion of the first half of November, and according to a statement of the treasury department the customs receipts for the thirteen working days were \$4,768,723, indicating a total for the month of nine and a half millions. The receipts will probably exceed that figure considerably, as importations of dutiable goods are daily on the increase. The customs receipts for November are likely to equal if they do not exceed the figures of the same month last year. The deficit for the month to date is \$5,768,330 and for the fiscal year to date \$43,772,331. Congress will be brought face to face with a deficit of \$45,000,000 in five months, but the president will be able to present figures showing that the deficit has reached its maximum and will steadily decrease, so that it will be wiped out before July 1.

Certain information has reached the treasury department showing that the United States is rapidly recovering from its period of financial depression and that before the end of the year this country will surely be "out of the woods," not only as regards commercial enterprises, but also in the operations of the treasury.

When the Dingley bill was on the eve of its passage the large importing houses rushed in goods in anticipation of the increased duties. They based their importations on business conditions last spring, and supposed they were securing a year's supply. Since then there has been such a sudden revival of prosperity, and agricultural products have risen in value, that business has jumped in the most unexpected fashion.

The importers believed they had piled up stocks enough to last them until they could secure lower rates under reciprocity treaties, but the business boom in the west has upset all calculations, and they have begun making extensive purchases for immediate importation, as indicated in reports from United States consular agents in Great Britain, France, Germany and Italy.

Bankers in Philadelphia, Boston, and New York say the heavy balance of trade in favor of this country has not been paid for, but exporters have accepted bills of exchange and are now drawing interest from foreign banks. The farmers have received such good prices that the crops have moved themselves, and hence much less money has been needed for this purpose than usual, the result being that exporters are willing to let the money remain abroad, where the interest rates are going upward owing to the constant drain of American exchange. The result will be that before the end of the year there will be a much heavier import movement than had been anticipated even by the friends of the Dingley law.

Claim Valuable Land.

Washington, Nov. 16.—C. E. Holloway of Holland, O., and A. U. Gunn of Maumee, O., are claimants to seven million acres of lands in the Northwest, including the cities of Minneapolis and St. Paul, which they say were granted an ancestor by King George III. They are here making an examination of the records of the land office.

Exonerated of Murder.

Carson, Nev., Nov. 15.—Julian Gulian, the boy who shot and killed United States District Attorney Jones recently, was today exonerated by the grand jury.

Yellow Fever Bulletin.

New Orleans, Nov. 16.—Eleven new cases of yellow fever and two deaths today.

Important Pension Ruling.

Washington, Nov. 16.—Assistant Secretary of the Interior Davis has made what is perhaps the record of the department in handing down four hundred decisions in pension cases today.

SKIPPED TO CANADA.

Defaulting Cashier Willett of the Defunct Leavenworth Bank Is Missing.

CLEANED UP ITS CASH AND THAT OF THE TWO BRANCHES.

President Weathers, Thought to Be His Victim, Agrees to Turn Over All Personal Property—Town, Church and School Funds Tied Up.

DOWNFALL DUE TO SPECULATION.

Warsaw, Ind., Nov. 16.—It is thought that R. H. Willett, the defaulting and fugitive cashier of the Leavenworth National bank, passed through the city last Saturday night. Friday night a stranger entered the White House here and registered as Fred Davis. He exhibited a large roll of bills and told conflicting stories regarding his name and occupation. He left town Saturday morning without getting breakfast and is thought to have headed for Cassopolis, Mich., where he could take the Grand Trunk road for Canada. Willett, who is connected with a wealthy Kentucky family, is said to have left a letter to his wife saying he had gone and would never see her again.

Corydon, Ind., Nov. 16.—Committees representing the depositors of the Crawford county defunct banks met with John H. Weathers, president, today and held a conference. R. C. Arnold of Leavenworth was appointed receiver and an investigation will begin at once. Weathers agreed to turn over all his property to make good the loss as far as possible and to devote his entire time for a year in making collections in the interests of depositors. He left for Leavenworth tonight.

Advices from English say that a friend of Weathers received a note on Saturday asking for protection if he would come back and attempt to straighten out the failure, but the friend telegraphed back not to come unless he wanted to be strung up. There was a report last night that Weathers was coming, and a mob met the train at both Marengo and English with a rope. The men went through the train, and there was talk cursing when they did not find the banker.

People in the various communities in which the banks are situated are tonight much relieved and express confidence in Weathers' ability to settle up matters in a satisfactory manner. The consensus of opinion is that Weathers is innocent of any wrong-doing. Nothing has been heard from Willett since last Wednesday morning.

Telegraphic advices from English, Ind., are to the effect Willett's kinfolk are willing to unite with his grandmother and donate sufficient funds to cover his shortage provided he proves himself not guilty of any intentional wrong-doing and will return. Mrs. Willett, wife of the missing cashier, is almost prostrated with grief, but not dying as has been reported.

The extent of the clean-up made by Willett and Weathers before the three banks at Leavenworth, Marengo and English, Ind., went to the wall is just beginning to be known. In addition to the \$37,000 gone from the Leavenworth bank, \$30,000 from the English bank and \$27,000 from the Marengo branch, it is found that the private obligations of R. W. Willett and his brother-in-law, John Weathers, will amount to \$500,000. Weathers was the president of the three banks and Willett cashier of the Leavenworth concern and vice president of the other two.

To illustrate how completely Willett and Weathers have cleaned up the country it may be mentioned that no less than four weddings which were to have taken place this week at English are indefinitely postponed, the young couples losing all of the money they had intended for wedding expenses. All schools in the county are closed. Cashier Jones of the English bank was also township trustee, and says his money went with the rest.

Weathers is supervising the Presbyterian Sunday school at English, and the church funds are said to have gone with the deposits of the merchants and farmers. There is about \$5,000 in the English bank, but it is hardly a dollar left in the Marengo bank and it is not expected that the entire chain of banks will pay over 8 cents on the dollar. Wholesale houses at Cincinnati, Louisville, Indianapolis, Terre Haute and Richmond are said to have lost for \$150,000, there being great secrecy as to the amount. Several estates valued at from \$10,000 to \$30,000, which the bankers are controlling, are now worth a penny.

Willett was in reality the organizer of the scheme to fleece the people of Crawford county. The two men are under thirty-five years and a few years ago married the wealthy Holcroft sisters at Leavenworth. The bank got hold of about \$50,000 and started the Citizens' bank at Leavenworth. Both were prominent in politics, Willett being a member of the state Democratic committee and Weathers a republican lawyer, who was almost elected judge of that circuit at the last election. Their high position enabled them to float their schemes without question. Willett was the largest stockholder in the water and electric light plants at Leavenworth, operated a stock factory, was a director in the Canton bank in an adjoining county, and with Weathers owned the Crawford County Telephone company. It now appears that Willett had been speculating in sugar stocks and in wheat on the Chicago board of trade.

Building & Loan Convention.

New York, Nov. 16.—The third annual convention of the International League of Building & Loan associations was held here today. The league includes nearly every association of that kind in the United States and Canada. Sixty delegates are present. The secretary's report dealt with the increase in the number of associations and their beneficial effects and their prosperity. Its principal feature was a series of comparisons of building and loan associations with national banks, showing in the main that the associations were the safer institutions.

Kills Wife and Self.

Cushing, Ia., Nov. 15.—L. D. Spiekler, a farmer, today shot and killed his wife, from whom he had separated, and blew out his own brains.

FOREIGN CROP SITUATION.

Agricultural Department's Monthly Review, Compiled from Consular Reports.

Washington, Nov. 16.—The agricultural department today issued its monthly review of the foreign crop situation. Much attention is devoted to the grain crop of Russia, especially wheat, on account of its magnitude as a factor in the European supplies. The review says that all accounts agree in representing the wheat crop as deficient, but as to the extent of the deficiency much difference of opinion exists. After quoting many dispatches painting the crop situation in the various provinces in very black colors, and the statement of our consul at Odessa that this year's crop had proved a failure, the review calls attention to the fact that since the harvest Russia has exported grain "very freely."

The exports of wheat from Russia from Aug. 1 to Oct. 25, says the review, "amounted to 4,153,000 quarters [a quarter is equal to eight bushels], against 2,855,000 quarters in the corresponding period of 1896. These large exports have led commercial papers to withhold their credence from the more pessimistic reports which have been published. That the crop is deficient was admitted, but that the failure was so serious as to reduce the average grain dealers in western Europe believed. Recently, however, some change in attitude is becoming apparent. Stocks at the ports are not increasing in the manner usual for this time of the year, and the opinion is freely expressed that after this month Russia can be relied on for only very moderate shipments. The large stock of wheat kept on hand from the preceding year, coupled with good crops in other countries for the large exports which have taken place."

The preliminary figures from France show a reduction of 25 per cent. below 1896 and 17 per cent. below the average for ten years. As for five years France and Russia have produced 26 per cent. of the world's crop, the review says the shortage of both countries would therefore be sufficient in itself to produce a very sensible effect on the world's supply, independent of the short crops which are reported from Austria-Hungary, the Danubian and Balkan countries.

In Germany rye, which is the principal bread grain of that country, has been officially estimated at 4 per cent. less than last year's crop. As regards the crop now growing in the lower hemisphere, the news continues to be favorable on the whole. The Indian wheat crop has been sown under favorable conditions, and the same in general is true of the grain crops of Europe, and in both India and Europe the weather seems in the main to have been very favorable to the growth of seed.

ON THE CHICAGO BOARD.

Chicago, Nov. 16.—Wheat was without feature and attracted less than ordinary attention, covering 1 cent range, closing at the bottom to 1/4 above and 3/4 below yesterday. The market is true of the British and continental cables coming comparatively firm and the predicted cold wave having materialized. "The Corn Trade News" estimate that the aggregate of production and reserves stocks of two hundred million bushels short of the requirements also had a bullish effect. There was, however, considerable may on sale and the prices weakened. The predictor of a fall and warmer weather has a continued heavy movement in the Northwest; small out-inspection, and a large increase in contract stocks this week combined to create an easier feeling. The country crops of the Northwest were reported in good condition, and large receipts are expected for some time. New York reported foreigner sellers there.

Corn was quiet, within 1/2 cent range, closing at the bottom to 1/4 below and 1/2 above yesterday. The weakness of wheat and colder weather, tending to improve grading, were the chief factors in causing the easy tone. Trade in oats was quiet, within 1/2 cent range, closing at inside figures and 1/2 lower than yesterday. The market sympathized to some extent with other grains, though the news affecting this cereal was mostly bullish.

The leading grain futures ranged as follows:

Table with columns: Opened, Highest, Lowest, Closed. Rows: Wheat, Corn, Oats.

Cash Quotations.

Table with columns: Wheat, Corn, Oats. Rows: No. 2 spring, No. 2 red, No. 2 white, No. 2 white, No. 2 white.

Movement of Grain.

Receipts—Flour, 17,000 barrels; wheat, 37,000 bushels; corn, 50,000 bushels; oats, 75,000 bushels, total, 162,000 bushels.

Shipments—Flour, 6,000 barrels; wheat, 106,000 bushels; corn, 292,000 bushels; oats, 271,000 bushels.

METAL PRICES.

New York, Nov. 16.—Pig iron warrants, quiet; \$6.8 bid, \$7.00 asked. Lake copper, quiet; 10.75c bid, 10.87c asked.

COPPER STOCKS.

Boston, Nov. 16.—The following were the closing prices of copper mining stocks: Allouez, 25.00; Atlantic, 22.50; Boston & Montana, 13.75; Butte & Boston, 20.75; Calumet & Hecla, 45.00; Central, 18.00; Franklin, 18.00; Kearsarge, 17.25; Osceola, 31.50; Quincy, 113.00; Tamara, 129.00; Wolverine, 15.50.

F. M. SACKRIEVE, HOUGHTON, MICH.

Copper Stocks, New York Stocks, Chicago Grain and Provisions, bought, sold and carried on much of the business of F. M. Sackriever, Houghton, Mich.

Stock Growers to Organize.

Denver, Nov. 16.—An official call has been issued for a national convention of stock growers to be held in Denver Jan. 25 to 27. The purpose is to perfect an organization of the National Stock Growers' association and to discuss measures for the improvement and protection of the industry. State and territory breeders' associations, livestock commission exchanges, stock

NEW STATE PROPOSED.

Tammany Will Revive Its Old Scheme of Dividing New York.

BILL READY FOR INTRODUCTION IN THE LEGISLATURE.

Project Contemplates the "Divorce" of Sixteen Counties and Welding Them into One Commonwealth That Will Be Heavily Democratic.

WILL MEET WITH STRONG OPPOSITION.

Washington, Nov. 16.—Advices from New York are to the effect that another effort will be made in the legislature this winter to add another star to the "Six Spangled Banner." In other words, it is again proposed to create a new state by withdrawing sixteen counties from old "Empire" and incorporating them as the "State of Manhattan." And the scheme is said to have originated in the ambitious brain of Richard Croker, who is said to be desirous of extending Tammany's dominion beyond the confines of Greater New York.

The bill providing for this divorce of the sixteen counties will be introduced by Assemblyman Patrick Trainor of the Thirteenth district of this city and a member of Tammany Hall, who last winter presented a similar bill, which, however, did not get beyond the committee room. Chief Croker is said to profess ignorance of the project and Mr. Trainor insists that the idea, and incidentally the bill, is his own, but owing to the importance of the measure, which is one of the most gigantic in the political history of modern times, it is hardly reasonable that the leader does not know of and concur in the big scheme advocated by the sub-lieutenant.

The plan is to create a new Democratic state, and add two sure Democratic United States senators; to secure control of the legislature of what would be the greatest and richest state in the Union; to divide the electoral vote of the pivotal state; to send to the lower house of congress a solid Democratic delegation from the state of Manhattan, and to get absolute legislative control over the second greatest city on earth for the benefit of Tammany Hall.

Other Democratic leaders in the state, it is said, will oppose the bill on the ground that it will be unwise to separate the great commercial and political interests of the Empire state, and, furthermore, they will not assist in making an old rival and antagonist the greatest political power, perhaps, in the country, for his agrardizement would mean their extinguishment politically.

In order to become a law the Trainor bill must be adopted by the legislature and be approved by congress. The sixteen counties which it is proposed shall form the state of Manhattan are New York, Kings, Queens, Richmond, Suffolk, Westchester, Orange, Putnam, Dutchess, Columbia, Ulster, Greene, Rockland, Albany, Rensselaer, and part of Schoharie, with a population of 3,902,250, as compared with 2,631,123 for the forty-four remaining counties.

This would make the new state the second largest in the Union in regard to population, Pennsylvania alone exceeding it. The remaining forty-four counties left to comprise the state of New York would make a state the sixth largest in the Union. The new state would contain a territory of 8,960 square miles, as compared with a territory of 40,493 square miles.

The sixteen counties have twenty-seven out of the fifty senators and more than half of the assemblymen in the legislature under the present apportionment, and twenty out of the thirty-four representatives in congress.

SALISBURY MAKES A SPEECH.

Talks of Home and Foreign Affairs at a Big Meeting of Conservatives.

London, Nov. 16.—The Earl of Cadogan, lord lieutenant of Ireland, was elected president of the National union of the Conservative association at a meeting held today. Resolutions were adopted favoring the establishment of a royal residence in Ireland and its occasional occupation by the queen or a member of the royal family, and demanding counterbalancing duties equal to the sugar bounties paid by foreign countries. A resolution favoring a bounty to assist home wheat growers was defeated.

A great mass meeting was held tonight at which the principal speaker was the Marquis of Salisbury, who seemed in the best of health and who spoke with great animation, saying the situation was "not destitute of elements of apprehension either at home or abroad."

Speaking of foreign affairs, Lord Salisbury denied that the government had yielded to France in the matter of Siam, Tunis or Madagascar. Turning to home affairs, he said the government of London was a question which must be solved, and could only be solved by giving to the other smaller municipal bodies a large part of the duties now performed by the London county council. Dealing with the results of the recent parliamentary by-elections Lord Salisbury attributed the Conservative and Liberal Unionist losses to indifference in their ranks, and he urged the Unionists not to relax vigilance, "as the opposition has all the elements of organization and only lacks a general."

Work of the National Grange.

Harrisburg, Pa., Nov. 16.—The reading of the reports of the state masters was continued at today's session of the National Grange. Aaron Jones of Indiana reported that the grange fire insurance companies of that state are now carrying forty million dollars worth of property, with a saving to

COAL CARS IN THE DITCH.

Train Breaks in Two and Twenty Cars Leave the Track Going Down Grade.

NOT A SINGLE MAN WAS ON THE FLYING RUNAWAYS.

Caboose and One Car Broke Off, Then Twenty More Got Loose-Didn't go Far Enough for a Collision.

FREIGHT WRECK ON THE RAILROAD.

Twenty cars and 200 tons of coal were piled in the ditch yesterday near the poor house.

The South Shore again bore evidence to the truth of the old say that misfortunes never come singly.

Shortly after twelve there is a freight that starts out of here up the road.

Near the bottom of the grade, which goes up by the poor house, the caboose and last car broke away.

Almost at the top of the hill there was another break in the train.

But this did not happen for the velocity of the runaways was so great for them to stick on the track.

Fortunately there was no one on these cars. The engineer and fireman were both on the engine.

Had the twenty cars kept to the track until they reached the caboose and the car which broke off with it.

But this did not happen for the velocity of the runaways was so great for them to stick on the track.

Fortunately there was no one on these cars. The engineer and fireman were both on the engine.

Had the twenty cars kept to the track until they reached the caboose and the car which broke off with it.

yesterday. He is now just ninety-eight but last year's record.

Henry Russell left last night for South Dakota to look after some property he owns.

Deputy Sheriff Cliff Ruprecht came up from Menominee with a man for the branch prison yesterday.

License to wed was yesterday issued by the county clerk to Thomas J. Rule and Mary E. Andrews, both of Ishpeming.

Emile Henna has been elected treasurer of the Society St. Jean Baptiste to fill the vacancy caused by the death of the late treasurer, Joseph Bolduc.

Emil L'Hullier expects to take the posts out of the center of his hall and put in a truss instead.

Mrs. Fred Bureau entertained a small party of friends at cards last evening.

The Aid society of the Presbyterian church will meet with Mrs. Billings on East Arch street at 2 o'clock this afternoon.

Puritan lodge, Columbian League, made arrangements to hold its meetings Saturday night in Fraternity hall.

Marshall Case Downing came down from Ishpeming yesterday with August Erickson and Jack Jaska.

Deputy Sheriff Bennett received news yesterday of the death of his brother John L. Bennett.

Drake completed his famous well near Titusville in 1859, and tapped the great flood of petroleum that has enriched the world.

The first oil well medium to spring into fame was Abram James, of Pleasantville, Pa.

James had faith. He secured a lease of the farm, borrowed money enough to drill a well, and when it was completed, on Feb. 12, 1868, it started off at over 100 barrels a day.

There are only a few freight boats expected here from now on and those which do come will have light loads.

The day when the last boat came in loaded clear to the cabin has passed. It's too easy nowadays to get freight by rail to cause any desperate rush at the end of the season.

Yesterday's bad weather kept the boats in port. The wind blew hard from the west and northwest all day.

The new Liberal government of Canada is rushing work on the St. Lawrence canal.

The survey on the steamer J. C. Pringle shows her damage to be much greater than was at first expected.

The schooner Ben Harrison of her tow will come to \$1,800 or \$2,000. The damage consists of loss to sails, booms, gaffs, line rigging and her cabin furniture.

Weather forecast: Fair and colder; brisk northwest winds.

Yesterday's temperature: 7 a. m., 27 degrees; noon, 25 degrees; 7 p. m., 22 degrees; maximum, 30 degrees; minimum, 22 degrees.

Postoffice Inspector Ralph Bird of Milwaukee is in the city.

John P. Symons of Escanaba was in the city yesterday on business.

F. Wieser of Houghton was down yesterday from the copper country.

W. S. Hill, manager of the tannery, came up from Munising yesterday.

C. H. Chipman of the Soo visited here yesterday with Marquette friends.

C. H. Wellman has opened an insurance and collection agency over Goodspeed's store.

Dear licensees are still in demand. County Clerk Ross issued the 75th one yesterday.

whiskers as long as Father Time's appeared at North Pine Grove in Warren county, Pa., and in a few days located a well on the Wetherby farm.

The well was drilled and it came in dry. The medium held that the spirits were angry, and had moved the oil-producing strata.

At Belmont, N. Y., in the spring of 1886, a farmer named Lellous had a vision in which the spirit of Leonard Willis, a former Belmont citizen, appeared to him and told him that a rich pool of oil was under the Lellous farm.

FASCINATING CALVE.

The Greatest Singer of the Day Acknowledges Her Indebtedness to Paine's Celery Compound.

Emma Calve has attained a success unprecedented in the annals of lyric art. To repeat the story of her triumph is needless.

Her super voice, her fascinating half-oriental dances, her caressing gestures, her black eyes, irresistible mirth, these, and the indescribable something more, make up the dazzling personation by which the artist has made her name famous in every part of the world.

Her marvelous artist temperament has made her a great actress, but this brings its own price, and as great hearts know great griefs, great temptations must know great nervous strain.

Calve's absolute reliance on Paine's celery compound at all such times of low nervous energy appears in the following letter: Boston, Mass., March, 1887.

I am convinced that Paine's celery compound is the greatest nerve strengthener that can be obtained. I can vouch for its wonderful health-giving power.

Every great change for the worse in health is in most cases at once betrayed by a loss of weight and a pinched thinning of the face.

WILL START PUMPING MONDAY.

Work of Unwatering the Cliffs Shafts Will Then be Commenced.

The local officials of the Cleveland-Cliffs company are pushing the improvement work at the Cliffs Shafts mine along with unusual speed with a view to getting the pumps and boilers working next Monday if possible.

Ninety men constituted the working force around the place yesterday. Twenty more will be added today. These latter, however, will not be put on improvement work. They will be put on the stockpiles to load cars with ore. It is the wish of the management to crush about two hundred carloads of the Cliffs Shafts ore before the close of the shipping season. This will clean out the greater part of the ore in stock. The crushers have been idle the past few days but will be started up again today.

There is quite a noticeable change about the property since the reporter's last visit there. All the timbering in the shafts has been finished and pumping can be started at any time so far as the shafts are concerned. The additions to the shaft houses are well under way, the timbering having been completed and the shieves are in position on both buildings. The outside boards and iron covering will soon be put on.

The two ballers to be used in lifting the water are on the ground and ready for use. These will take care of a lot of water when operating steadily and will be a big assistance to the plunger pump. The machinery is practically ready for use.

The big steel smoke stack has been finished and will be put in position today provided the wind is not so strong as to make it prudent to defer raising it. The timbers to do this work were put in place yesterday.

Three of the is boilers being overhauled are now ready for use and the boiler makers are working on the others. It will be three or four weeks at least before all the boilers are ready for service. There is no particular hurry for the last three, however, as the ones overhauled are capable of furnishing all the power required until mining operations are resumed.

The foundation for the ore crushers has been finished but they will not be removed until after the shipping season closes. It will be quite a task to move the crushers and it is quite likely they will not be moved in their new location until about the time work is again in readiness to permit the mining work to go along uninterruptedly.

The dry house is in its new location on the shore of Lake Bancroft immediately north of the engine house.

Some improvement work is being done about the office building. It will likely be necessary to use this before the remodeling of it is begun, as the clerical force at the mine will have to do its work there. The storm windows have been put on and the painters will do some decorating in the more prominent rooms.

The big barn at the Barnum is being overhauled with a view to using it for all of the horses the company will need at the Cliffs Shafts and Cleveland properties. A complete new floor, also a new roof, are being added. Other changes will also be made that will greatly improve the building. Contractor Regstrom is doing the work at the barn.

### To Pay for the Fuel.

The money realized on the production of the "Fanny" play by the Catholic Dramatic club at the Ishpeming Opera House on Thanksgiving night will be used to purchase fuel for the church, convent and parsonage, during the coming winter. The storm is expected that there will be an unusual big crowd out to witness the drama. Then the night selected is one of the best in the year for an entertainment of any kind, as there will be no work at the mines or in the stores and all will have an opportunity to attend. The ladies and gentlemen comprising the cast are well up in their parts, though several more stage rehearsals will be held before Thanksgiving night. The play is a good one and it is safe to say that the performance will be one of the best ever given by the club. The tickets will be sold at fifty cents each and the reserved seats can be procured at Tilson's drug store in ample time without extra charge.

### Preparing for the Wedding.

The relatives and friends of Miss Agnes Johnson of this city and Mr. Seiden White of Chicago, who will be married this evening at the Presbyterian church, are making very extensive preparations for the happy event. The home of the bride's parents is being decorated, also the church. A number of guests will be present from outside. Those who arrived yesterday, besides the groom, were his mother, Mrs. William G. White, and his two sisters, Mrs. L. E. Hildreth and Miss Susan White, all of Evanson, Ill.; Miss Charlotte Foye, William Tilghman and Will J. Engle of Chicago; Rev. John and Mrs. Faville and Mrs. J. F. Johnston of Appleton; Professor Faville of Milwaukee; E. J. McKeon of Ashland; Eli Duvall of Menominee; Mrs. A. J. Rich of Horicon, Wis., and Miss Edna Watson of Marquette. Others are expected here today.

### Called to His Home.

Charles Yates, head linerman with the Marquette County Telephone company here, received a telegram yesterday morning requesting him to come to his home to Newark, O., at once, as his mother was dying. No further particulars were given in the message. Charles left for there on the 6 o'clock train last night. The sad news was quite a shock to him, as he had received a letter from home the previous day advising him that his mother was in unusually good health.

### SOMETHING TO KNOW.

It may be worth something to know that the very best medicine for restoring the tired out nervous system to a healthy vigor is Electric Bitters. This medicine is purely vegetable, acts by giving tone to the nerve centres in the stomach, gently stimulates the Liver and Kidneys, and aids these organs in throwing off impurities in the blood. Electric Bitters improve the appetite, aid digestion, and is pronounced by those who have tried it as the very best blood purifier and nerve tonic. Try it. Sold for 50 cents or \$1.00 per bottle at The Stafford Drug company's drug store.

GIVEN A \$2 RATE.

A Large Attendance from Coppermen at Saturday's Game is Certain.

The manager of the Ishpeming football team yesterday received a letter from the manager of the Mining School team stating that there would be a very large delegation coming to this city next Saturday to witness the game between these two elevens. It is said that there will not be less than one hundred on the train and it would not be surprising if there were almost double that number, as the copper country men are greatly interested in the contest. The rooters from that section will come down prepared to use their voices to the best possible advantage, so that there is certain to be a hot time at the park that afternoon. The game will be played regardless of the weather.

The sale of tickets for the game began yesterday. All the business men are coming to the front to help the boys out by swelling the receipts as much as possible. Some are buying many more tickets than they will use. Men who never took any interest in football got worked up to a high pitch Saturday when they heard how the contest at Milwaukee came out. They are now satisfied that the local team is much stronger than the average aggregation of football players and are gratified with the distinction it has won on the gridiron this season.

Ishpeming people who buy tickets will be requested to wear them, with a piece of blue ribbon attached, at the game. All those who pay the admission price at the gate will also be asked to wear the colors, provided they are with the local team. The hotels have been asked to give the copper country visitors special rates during their stay in the city. They will return home Sunday morning, leaving here at 10 o'clock.

### ISHPEMING IN BRIEF.

The main office at the Ishpeming hospital is being given a fresh coating of paint.

Mrs. S. S. Curry of Ironwood arrived in the city yesterday on a visit to Mrs. D. McViechie.

The temperature dropped to twenty above zero in Ishpeming yesterday. It was easily the coldest day of the season.

Miss Dooley of Chicago, who spent a few weeks here during the summer, arrived in the city yesterday on a visit to Mrs. Ed Delf.

John Lynch, a pioneer resident of this city, has been quite ill the past few days at the home of his daughter, Mrs. Dennis Malloney on Strawberry hill.

Oscar Fosberg and two of his countrymen here engaged in the retail hat business in Escanaba's building on Division street, opposite the school building.

Thomas Scadden of Crystal Falls spent Monday night in the city, leaving yesterday morning for Marquette to take the position in the land office there to which he was recently appointed.

M. J. Brooks, who has had charge of the Ishpeming Beef company's car, making different points up the line, left last night for Chicago, where he will take a better position with the same company. W. G. Calef of Chicago has taken his place.

There was good skating on Lake Bancroft yesterday. Many were out to take advantage of the first opportunity to skate until the wind became too strong. The ice seemed perfectly safe, though many of the local skaters would not risk it. It may be some time yet before there is skating at the Bancroft rink.

The Ishpeming woman who, by mistake, took a package which did not belong to her from the Savings bank in Negaunee Monday, will greatly oblige Miss Ida Laruche, the owner, by leaving it at her place, 219 Cleveland avenue. It was a sweater which the young lady bought at one of the stores in Negaunee.

### Crushed by a Snake.

A huge anaconda on exhibition in a museum at Philadelphia last Sunday severely injured Samuel Masher, the museum watchman, and crushed to death a valuable trick pony.

The pony was tied to a feed box alongside the anaconda's cage. Masher saw the reptile had worked one of the boards of its cage loose and had stretched its tail out a short distance. He pushed the board to, believing the anaconda would pull within its cage again. Instead it wriggled out and wrapped itself several times about Masher. The latter screamed for help and the pony, frightened by the big reptile, began jumping about. This probably saved Masher's life, for the reptile unwound itself from him and completely encircled the pony. Masher fell to the floor unconscious, while the big snake continued to crush the pony until life was extinct.

When a number of the employees reached the scene the snake had begun to unwind itself and appeared to be getting ready for more fight. The men kept aloof until a lasso had been obtained and the anaconda was finally made secure. Several of Masher's ribs were broken and he was removed to a hospital.

Indigestive poisons are the bane of the dyspeptic's life. When sick, see if your sickness is caused by indigestive poisons. If so, take Shaker Digestive Cordial. This is the only certain way of being permanently cured, because it is the only way that gets rid of the poisons. You know that fermented food is poisonous. You know that poison is unhealthy. Shaker Digestive Cordial clears the stomach of fermenting food, and purifies the blood and system of indigestive poisons. It cures indigestion and the diseases that come to it. Headache, dizziness, nausea, stomach-ache, weakness, flatulence, constipation, loss of appetite, irritability, etc. These are a few of the symptoms caused by indigestive poisons, cured by Shaker Digestive Cordial.

At druggists, price 10 cents to \$1.00 per bottle.

### HAMPTON & CO.

schools 741; value of school buildings and lots, \$2,615,057. Paved streets, 235 miles. Boulevard, macadam, 11 miles. Public sewers, 155 miles. Lateral sewers, 276 miles. Electric lighting plant owned by city; arc lights 1,600, incandescent lights 3,500; cost of plant \$729,000. Water works owned by city, supply brought from Lake St. Clair; capacity, 103,000,000 gallons; daily average pumped, 36,000,000 gallons; cost of plant, \$5,762,285. Street railways, 180 miles; operated by electricity. Tax rate \$17.68 per \$1,000 (average). The City Controller estimates that Detroit owns over twenty millions of dollars in parks, water works, public buildings, fire department, etc., and that the value of her property in excess of liabilities is over fifteen millions of dollars.

Detroit stands second in the United States as a port of entry on the border. The district of Vermont is first because of the great number of ports tributary to Burlington. Chicago was first last year. The total trade in imports and exports of Detroit during the last fiscal year was \$14,307,235, as against \$14,140,128 in the fiscal year of 1916. Twelve per cent of the total business of the northern border and lake ports was handled by Detroit, and nearly 1 per cent of the total business of the United States. The total imports of Detroit were valued at \$3,226,463, of which \$2,159,938 were free and \$1,066,525 were dutiable. The total exports were valued at \$11,080,722, of which \$11,002,233 were of domestic origin, and only \$78,489 re-exports of foreign goods. The heavy export business of Detroit is shown by the fact that it handled more than 17 per cent of the exports of the entire series of northern border and lake ports.

The principal exports were cattle, horses, corn, flour, chemicals, bituminous coal, cotton, bicycles, fruit, hides, pig iron, machinery, rails, beef, bacon, hams, pork, lard, dairy products, cheese, clover and timothy seed, lead, tobacco, lumber, furniture, other manufactures of wood, and raw wool. On his recent visit to Detroit, Col. C. A. Green, the well-known implement manufacturer and assistant chief of the Philadelphia Commercial Museum, gave his opinion thus: "During the summer hundreds of manufacturers and other business men have had an opportunity to see how admirably Detroit is situated from a manufacturing point of view. I know of no city in the United States that has more advantages of this kind than Detroit. In my opinion, it is destined to become one of the greatest manufacturing centers in the country. As a residence city, I can pay Detroit no higher compliment than to say that it is a small edition of Philadelphia, which is known as the City of Homes. I thought when I was riding down Woodward avenue that I had never seen a street more beautiful. This is an important consideration to manufacturers, as Philadelphia has shown that working men who own their own homes give better service to their employers."

The rapidly extending electric railroads, diverging east, west and north, have greatly increased Detroit's commercial importance. The city is the business center of a territory inhabited by more than a million people. These figures demonstrate to retail dealers in Michigan that Detroit is the place in which to purchase every article they need. Below will be found the leading commercial, manufacturing and financial establishments of this progressive city. Her hotels are the best in the West. She is the handsomest and cleanest city in the country. It is a pleasure to do business in the Metropolis of our State. Her business men invite the trade of our readers.

SAVED BY QUADRUPLETS. General Gray Had Not the Nerve to Remove a Postmaster. Postmaster E. T. Page of Redwater, Texas, will be retained by this administration, and all because of the birth of quadruplets and twins in his family. Eleven years ago he was given the postoffice, but when General Clarkson became assistant postmaster general in the Wanamaker administration, an effort was made to replace the postmaster with a candidate of the Republican party. Many applications for the place were filed, but Page appealed for retention, citing that his wife had just presented him with bouncing quadruplets and that twice before twins had been born to them. This settled the case. General Clarkson deciding not to remove the incumbent. The case has now come up again, and a number of candidates have sought the place. But Page has again protested that the successful raising of three of the quadruplets and two sets of twins entitled him to some consideration, and sent some photographs of the three surviving quadruplets, now almost young ladies. Assistant Postmaster General Britovost conferred with Postmaster General Gary, and the two decided that there should be no change in that office.

SCROFULA IS THE advertisement of foul blood. It may be entirely driven from the system by the faithful use of Hood's Sarsaparilla, which thoroughly purifies the blood. Hood's Pills are easy to take, easy to operate. Cure Indigestion, biliousness, etc.

In and About Negaunee

MEMORINEE RANGE MINES. A Mining Captain from Vulcan Gives an Encouraging Report of Them.

Captain Curnew, one of the oldest mining men on the Memominee range spent yesterday in Negaunee. He has charge of mining work at the Vulcan mine, which is one of the many properties owned by the Cambria Mining company. This is not the same company which owns the Cambria mine of this city.

Captain Curnew came up here to spend a short time looking over the country and to meet old friends whom he has not seen for years. In talking with the reporter about the mining business on the Memominee range, he said that there has been a big improvement in their condition and prospects during the past year. All the larger mines, with the exception of the Norway, are working more or less. The Vulcan has a force of three hundred men at work and there about four hundred on the pay roll of the Aragon mine at Norway. The strike at the latter mine something over a year ago was a blow which the people of Norway will feel for a long time. Much hardship was endured by the miners during the long period the mine stood idle. The new management seems to be inclined to push work along and the people of the town are hopeful that the Aragon will be wrought with a larger force next season than ever before. The Aragon is a good mine but the ore is of a quality which will be sold at a very low price. This has been a drawback to the management as well as the men, as the wages paid down there have not averaged as well as the men have received on this range.

The captain reports that there are no signs of a resumption of work at the Norway mine. If this mine were started up Norway would be a lively town again. There was a time when over 1,000 men found employment at this mine. The ore is of non-Bessemer and there has been no demand for it since work ceased there.

The Vulcan ore is a little above the non-Bessemer limit, so the company has had no great difficulty disposing of its product. The Vulcan has kept up well during the panic and the people of the little town have much to be thankful for on that account.

Captain Curnew reports that there are no idle men on the Memominee range, but he thinks the mines are working as many men as they care to at this time. He says there is more work than usual being done in the woods down there, and many of the men have given up their jobs at the mines to go into the lumber camps. As a rule the wages paid in the woods are a little better than the men, especially common laborers, earn about the mines. The captain rather expects that next year will be a good one, though he does not look for a boom in the mining business. He does not think that there will be a demand for ore that will send the price very high. He says there are altogether too many mines open and working on Lake Superior to admit of the price of ore going much above the price it now brings. He thinks, therefore, that the wages of miners and laborers will not be much higher than they are now, even though there is an increased output of ore.

LOCAL LAUNDRIES. Dr. Hudson was called down to Turin to attend a sick person yesterday. Mr. and Mrs. L. Vashaw are happy over the arrival of a son at their home.

Some of the awnings over the windows of the local business houses were taken down yesterday and put away for the winter.

Rev. Dr. Todd of Escanaba, who lectured at the Presbyterian church on the life of Robert Burns Monday evening, returned home yesterday morning. The local football enthusiasts will all be at the park next Saturday to see the Mining School and Ishpeming eleven battle for supremacy. A red-hot game is looked for.

A class of about seventy persons will be confirmed a week from next Sunday at St. Paul's church. Rt. Rev. Bishop Vertin will be up from Marquette to conduct the confirmation.

The passenger train on the Chicago & Northwestern line was forty minutes late arriving here yesterday. The Houghton passenger on the South Shore did not wait to connect with it.

Con Curran has returned from Eagle Grove, Ia., where he spent the greater part of the summer running an engine on the Chicago & Northwestern line. He has taken an engine in the local yard.

Martin Ryan of this city, is now running one of the freight trains between Marquette and the copper country, he having recently been transferred from the mixed train between Nestoria and Bessemer.

The "Triby" was taken out of the water at Teal lake and put into winter quarters yesterday. If it continues as cold as it was yesterday it will be but a few days until there will be skating on Teal Lake.

George Sarasin has taken a position as assistant in the Ishpeming office of F. W. Rest & Co. This may not be a steady job, as one of the head men there is ill and George is filling the place of the assistant bookkeeper, who has taken the other man's place in the yards.

TO CURE A COLD IN ONE DAY. Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. 25c. The genuine has L. B. Q. on each tablet.

Mr. J. W. Harris is open to give lessons on the piano, organ and violin in either German or English foundation styles; he also is open to give lessons in Pitman's system of shorthand. Apply at Dr. Cyr's block, or postoffice box 934, Negaunee. (9-13-17)

MANY CAMPS NEAR FLOODWOOD. Considerable Logging Being Done There This Season.

While up near Floodwood deer hunting all last week Mayor Kirkwood observed that there was considerable lumbering going on in that vicinity. He said yesterday that he thought there are at least ten or a dozen camps up here. This is a larger number than has been in there in some years. There is still a great deal of fine timber in that section and there will be work there for some years to come. Mr. Kirkwood and his associates were nicely entertained by Mr. Henderson, the land looker, who is well known in Negaunee. The members of the party enjoyed their outing very much and only regretted that they could not remain in the woods longer.

His honor shot one fine buck, but he did not bring it home. He and Mr. Henderson were driving along when they saw the deer. The mayor fired, and the buck turned and jumped over a fence. Henderson said that the deer had not been struck so they drove on. Four days later one of the men at the camp found the deer lying on the opposite side of the fence. It was a beauty and would tip the scales at nearly two hundred pounds.

A Cheap Party. A union held Monday evening it was decided to charge only thirty-five cents admission to the social dancing party to be given Thursday evening at Cyr's hall. This will also include light refreshments, which will be served by the lady members of the union. There is sure to be a large attendance. The arrangement committee is composed of Ed. Laughlin, George Sorasin and James Curley.

At a special meeting of the Clerks' union held Monday evening it was decided to charge only thirty-five cents admission to the social dancing party to be given Thursday evening at Cyr's hall. This will also include light refreshments, which will be served by the lady members of the union. There is sure to be a large attendance. The arrangement committee is composed of Ed. Laughlin, George Sorasin and James Curley.

**ONE OF THE VERY BEST.**

**So Says Ex-Gov. Swineford of Marquette Land Office in His Last Report.**

**THOMAS SCADDEN ARRIVES TO SUCCEED REGISTER PRIMEAU.**

**Will Take Immediate Charge—Pleased With Marquette but Can't Move His Family Here Yet—Who Succeeds Halsey?**

**NEW HAND IS AT THE HELM.**

When the land office opens for business this morning Thomas Scadden of Crystal Falls will occupy the register's desk.

Hon. Peter Primeau, who was appointed under the last Cleveland administration, and who has held the office for something over four years, performed his last official acts yesterday, and will retire to private life and engage in business.

He has been earnestly hoping for the arrival of his successor for the past several months, and it was cheering news to him when a letter was received at the land office from the new appointee stating that he would arrive Tuesday.

He came and was met at the train yesterday afternoon by Receiver Halsey, who will be his office associate until such time as the patronage distributors can settle with the claimants which one shall get the place.

At present there is nobody looming up very conspicuously for the job, and if it is to be John Jones' for the asking, as was given out some time ago, Mr. Jones has been too busy to drop a line Washington.

Mr. Scadden will enter at once into the active discharge of his duties, as the only way to become familiar with the office is to do the work. Mr. Primeau will remain two or three days to give him pointers.

The new incumbent is a very pleasant gentleman. To a Mining Journal reporter he said yesterday that he was much pleased with the looks of Marquette and thought he should like the city as a place of residence. However, on account of his wife's illness, he will not be able to move his family here at once.

Judging from the last report of ex-Governor Swineford, who as inspector of land offices inspected the local office last summer, the retiring register and the present receiver, who will doubtless follow him before long, have set a high and honorable mark for their successors to attain to in the conduct of the office. Governor Swineford's report was secured from the general land office at Washington, such documents being sent to any one who asks for them.

Marquette people and the friends of the officials all over this district will be interested in reading it. The report is as follows:

Marquette, Mich., June 2, 1897. Hon. Commissioner of General Land Office, Washington, D. C.:

Sir:—I have the honor to respectfully submit the following report on the condition and affairs of the United Land Office at Marquette, Michigan.

The office which embraces a suite of two well lighted rooms on the second floor of the government building is amply supplied with furniture, all of which is in the best possible condition. The officials are both much more than ordinarily competent, as are also the two clerks, both of whom have had long experience in land office work. I doubt if a neater, cleaner, or more correctly kept set of records can be found in any other local office, certainly in none that have thus far come under my inspection.

Both officials and clerks give full time and unlimited attention to the discharge of their respective duties. The business methods pursued are beyond criticism, and the most careful inquiry has failed to disclose a single complaint on any wrong doing or lack of courteous attention towards the patrons of the office on the part of either official.

The records and files are in excellent condition. All entries in the records are neatly and legibly made, while the departmental letters are not only properly briefed and recorded, but so filed as to provide for the utmost convenience of reference thereto. The township plats, though in comparatively good condition, show evidence of more than the usual amount of handling and four books containing 204 sheets need rebinding. I have endorsed with my approval a request for an allowance not to exceed \$15.00 to cover the cost of rebinding, the estimate which I think fair having first obtained from the only book binder in the city.

There is almost constant inquiry at the counter during office hours concerning the status of public lands. All the regulations are strictly observed, all notices required by law are given prompt attention, notice of intention to make final prospect are conspicuously posted in the office, department letters, patents, promptly recorded, and cancellations properly noted on the records.

The receiver daily records all cash receipts and balances, and the detailed monthly statement of unearned fees and unofficial moneys are correctly kept, and all public moneys shown to have been received up to and including May 31, 1897, have been deposited in accordance with instructions contained in circular "M" of Dec. 26, 1896. The advances made to the receiver as special disbursing agent are reported in the designated depository and all disbursements made by check as the law requires.

Altogether I find this one of the very best regulated and best conducted offices of all those which I have thus far examined, and feel that the department will be fortunate if it shall succeed in finding equally as competent, careful and zealous persons to succeed the present officials when the anticipated change of incumbency is made.

Very respectfully,  
A. P. SWINEFORD,  
Inspector.

**MARQUETTE STEAM LAUNDRY AND DYE WORKS.**

Send your overcoats and winter garments to get them cleaned, dyed and pressed and made new. (11-6-1mo)

If you want a load of farmers wood telephone or write to The Cinderella. This service will cost neither you nor the farmer anything. (10-5-1f)

Warning—Persons who suffer from coughs and colds should heed the warnings of danger and save themselves suffering and fatal results by using One Minute Cough Cure. It is an infallible remedy for coughs, colds, croup and all throat and lung troubles. The Stafford Drug Co.

**MARQUETTE MINETTES.**

There was a group of four men sitting at a hotel table the other night. Three of the group were well along with their meal when the fourth one entered and took his seat. They were mutually acquainted.

One of the articles on the bill of fare was fried herring. "Are those herring good?" asked the late comer of the one who was sitting next to him.

"Yes," (picking three or four small bones from his lips) "they are very good."

"Any bones in them?" "Only a few." (The man with the fish was using both hands now and the troublesome little bones seemed even to get tangled with his mustache.) "There is only the back bone" (pick) "and a few dorsal" (pick, pick) "bones. Not enough to speak about."

"Do you know," said the man who had inquired about the fish, "I'll remember this incident against you and tell the story as long as I live."

"You remind me of a man down in Arkansas. He had a neighbor who had sold his farm and was going to move to Louisiana."

"What are you going down there for?" he asked one day, accosting him.

"As he spoke three mosquitos lighted on him, but he killed each one with native expertness."

"Don't you know," he went on, (spat, spat) "that if you go down there" (spat) "the mosquitos will eat you up?"

"Why don't you stay" (spat) "up here" (spat) "where there aren't any" (spat, spat, spat) "mosquitos?"

The visionary man was talking about the possibilities of the upper peninsula, particularly this section of it.

"Do you know," he said, "I expect to live to see the time when potatoes will be shipped out here, millions of bushels every fall, and handled much the same way we now do ore?"

The less visionary man, whom he had buttholed, said in surprise, "Do you?" The proposition was too remarkable to be boring.

"Yes sir," went on the potato enthusiast. "This Lake Superior country has a latent wealth in her soil that exceeds the millions of dollars worth of metals in her rocks."

"We may not pay less attention to our iron and copper mines, but we will pay more attention to the growing of potatoes, and an industry will develop which will offer a paying investment for large capital and employment for thousands of men. The potato industry will do more to build up Marquette than ore shipping has ever done."

"We are in a potato basin here, you might say we are in a bowlful of potatoes. They can't be beat for quality. The upper peninsula can supply the United States if not the world."

"It costs too much to get them out," said the visionary man's victim, who was by this time beginning to tire of the subject. "You might grow them but you could never get them on the market at a price that would leave you a profit. It costs too much to handle them."

"Possibly it does, the way they are handled today," replied the visionary "but at the time I speak of potatoes will be sent to Chicago, Buffalo, Cleveland, Detroit, to every city on the lake. They will go a boat load at a time, and they will be loaded from potato docks, poured into a vessel from pockets, down chutes, much the same way ore is handled now."

At the mention of potato docks the practical man left his visionary comrade, jeering at the idea as he went.

But who knows which of the two is the far-seeing, practical man? There are people here who remember when ore was taken aboard boats in wheel barrows, and there are doubtless lots of them who then would have jeered the idea that the time would ever come when there would be great docks here from which a 2,500 ton boat could be loaded in two hours.

**Thanksgiving Eve Dance.** There will be a big Thanksgiving eve dance given here a week from tonight by the Hibernians.

It is to be the sixth annual ball of Division No. 4, and the members will exert themselves to the utmost to make the affair a big success.

In order to accommodate the large crowd they expect the dance will be held in the rink. Music will be furnished by Muhlbaur's orchestra. Supper will be served by the Ladies' Auxiliary to the A. O. H. Tickets to the ball will be a dollar.

The affair is in charge of the following committee: Arrangements—Joe Mack, Martin Hogan, John B. O'Neil; floor—M. W. Shea, Ed Brazziel, P. J. McNulty, John Healy and Thomas J. Corbett.

Miss E. Bosworth, Fashionable Dressmaking Parlors, 138 Fisher street. (10-14-1f)

Apples, green and ripe tomatoes and other garden and farm products—butter, cream, milk, also eggs—all home products of choicest character, at The Cinderella. Use either telephone freely at any time. Deliveries will hereafter be made in the morning as well as the afternoon from (10-14-1f)

**THE CINDERELLA.** To Retail Buyers and Consumers: The Cinderella will supply potatoes, apples, cabbage and roots during the winter, giving safe and perfect storage to the same, and delivering as required an order placed now. (10-25-1f) H. A. BURT.
