Issued daily except on Sundays, Contains Associated Press dispatches and is especially devoted to Upper Peninsula interests.

SUBSCRIPTION RATES: Per month, by carrier, \$1.00 Per year, by mail, \$10.00

MARQUETTE, MICH., AUGUST 19.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

NOT A SAFE ISSUE.

The Democratic leaders are said to be very hopeful of finding a winning issue for the great campaign of next year in opposition to the expansion policy of the administration...

In a recent utterance Bryan has intimated his willingness to subordinate the cause of silver to this new issue, while, on the other hand, prominent gold Democrats, such as Croker, have reached the point where they are willing to consider the possibility of giving their hearty support to Bryan...

But the change has its risks. In the first place, the government is only doing what it cannot avoid doing in Cuba, Porto Rico and the Philippine islands. The party that arrays itself against the administration on its policy in this respect, in the belief that the people of the United States will back it in the endeavor to gain power because they disapprove of the effort being made to establish stable government in the islands...

Then, too, the war in the Philippines is very likely to be successfully closed before the political campaign of next year in the United States opens, in which case the anti-imperialists would find that their plans were frustrated completely before they had time to attempt putting them in execution.

They had better stick to silver, at least until after the result of the fall campaign in the Philippines is known.

OUR INVASION OF ENGLAND.

American workmen and American methods are doing what Napoleon the Armada and all continental Europe have been unable to do—they are invading England, and doing it successfully, aptly remarks the Atlanta Constitution.

Tom and Albert Johnson, the noted street car men, are back of the undertaking and they propose to build a line from London to Brighton and carry passengers for one-twentieth of the present cost. In speaking of the matter, Albert Johnson said: "In London all the street railroads are owned by the city. They are, however, leased to corporations which run them as far behind the times as London is old."

Love of novelty is not a marked characteristic of English character; but it is to be hoped that the American capitalists will be able to pierce the British armor of conservatism and introduce the people of London to the seductive pleasures of a "trolley ride."

LAKE MOVEMENT OF ORE.

Concerning the lake shipments of iron ore, the Iron Trade Review has this in its number for the current week:

Whatever may prove to be the fact as to the proportion of ore stockpiles at Lake Superior mines moved in the first three months of navigation, there appears to have been no slackening in the first half of August from the July pace of ore shipments. This week there is a bunching of vessels at lower lake ports and some delay has resulted, but this is only temporary.

cents a ton advance has been settled at 1 1/2 cents, making the rate now 12 1/2 cents and no discrimination is to be made against untrimmed ore. Shippers are not acting as though they believed that the falling off in stockpile shipments in September and later August will be greatly felt when the grain movement of September begins.

THE IRON MARKET.

Prices for iron and steel have shown hardly any change during the week, but supplies continue to be short and orders for immediate delivery are not readily filled.

The New York Metal Market is advised by its Philadelphia correspondent as follows regarding the situation:

In regard to the immediate outlook, there is nothing in sight but scarcity of material, a heavy demand and firm prices. A very considerable business has been doing during the week and a good deal more is under negotiation.

UPPER PENINSULA NEWS.

Ex-Governor W. H. Upham of Marshfield, Wis., it is said will put in lumber camps in Isle Royale to cut at least 10,000,000 feet this winter and will build a large sawmill there in the spring.

The new factory of the D. Clint Prescott company, Menominee, was operated for the first time Wednesday. The machinery is all in place and everything works to perfection.

It is barely possible that Menominee tent No. 2, K. O. T. M., and Green Bay tent, also of Menominee, will be consolidated. A special review of Green Bay tent will be held Sept. 7, when action will be taken.

Hon. T. F. Shepard has returned to Bay City from Mackinaw, where he went to represent the village in condemnation proceedings brought by the government to secure a portion of the old Fort park, owned by the village, for a site for a new lighthouse.

The bicycle ordinance, which compels cyclists to carry a headlight after sundown, received a solar plexus blow Monday night when Mayor Peter C. Keller was arrested for violating its provisions.

Hamilton Clark of Chauncey, Ga., says he suffered with itching piles twenty years before trying DeWitt's Witch Hazel Salve, two boxes of which completely cured him.

BATHS, BATHS, BATHS.

Turkish and Russian, salt and electric, for gentlemen; massage treatments a specialty; also chiroprody. Frank Keough, masseur. St. Luke's hospital; hours, 8 a. m. to 9 p. m.

For four years Mr. Zingsheim suffered with piles but now his suffering has entirely vanished and he has gained twenty-five pounds.

John F. Zingsheim, Esq., of No. 9 Lark Street, Amsterdam, N. Y., writes:

"I was afflicted with piles for four years brought on by heavy lifting. My suffering was extreme and the piles gradually increased in size notwithstanding the fact that I tried many different kinds of treatment."

"After becoming physically incapacitated and unable to work at all, and after much hesitation I wrote to you. I am very happy to state that your advice has done me great good."

"I thank you most heartily for what you did for me. All suffering has entirely vanished and I have gained about twenty-five pounds in weight."

"Piles is a disease that is usually treated locally with ointments which are well enough in their way but do not touch the cause."

"This is where Dr. Pierce's medicines excel—they cure the cause of disease and of necessity the disease itself disappears."

"The first is produced by Dr. Pierce's Pleasant Pellets. Two little 'Pellets'—about twice the size of a pin head—are a dose."

"Dr. Pierce's Golden Medical Discovery cools and purifies the blood and acts as a general tonic to the whole digestive system, neutralizing and eradicating all poisonous, irritating matter."

"The patient who takes these two remedies will not only find his piles cured but will soon discover that his general health is greatly improved."

"Dr. Pierce's Pellets cure biliousness."

NOT A LUMBER ROOM!

The Century Dictionary and Cyclopaedia is not a lumber room from which to draw dusty old fragments—it is a clean-cut, up-to-date work of reference made on a new plan. It is an entirely new work from beginning to end, and is on original lines.

It cuts loose from their aims and methods, and boldly attempts which has never been essayed hitherto—namely, a work equally full along every line of knowledge—history, botany, biography, zoology, electricity, etymology, geography, machinery, law, theology, medicine, and so on.

It condenses all information, whether previously scattered through a multitude of different books or never in any book, into one work, which answers the questions and meets the need of every man, whatever his occupation.

It answers every question which any man, whether scholar or ordinary individual, may ask of it. All the information in The Century Dictionary and Cyclopaedia is distributed under a large number of headings, so that each item in this great storehouse is far more accessible than in works in which a different system is employed.

Instead of having to search through a long article anatomy, covering, perhaps, a score or more of pages, to find about a part of the body, as the liver or the pupil of the eye, you turn directly to the word in question, and there find what you are after.

If you want to know about one of Shakspeare's plays, such as "Macbeth" or "Othello," look directly under its title. In most other works of reference you have to hunt through an account of Shakspeare's life to get information about his plays, and after your trouble you will often find that no such information is given.

If you want to know what the "Peace Congress" was, look under Congress, and not under the United States. If you wish to know who wrote "Sartor Resartus" (perhaps you have forgotten the author), or what such an odd name means, look the name itself up—you will find it at once.

If you want to know about the Treaty of London, the Treaty of Berlin, or the Treaty of Paris, you do not need to search through the histories of England or Prussia or France—turn directly to the word Treaty—you will find these and many other treaties described there.

If you want to know the meaning of a resultant tone, you need not search through a long article on music—turn directly to resultant—you will find what you want there.

If you do not understand what is meant by 'the fluctuation of a point in a Stock Exchange transaction, in this country of Great Britain, or of a point in Coffee or in Oil, you do not have to search through an article on brokerage—you need only turn to the word point. There you will find a point in a stock exchange transaction in this country means one dollar, and in Great Britain one pound; that a point in coffee is a hundredth part of a cent; that a point in oil is one cent.

This same system of arrangement has been observed throughout the entire work, so that it is in reality a work of universal and ready reference.

IMPORTANT OFFER TO JOURNAL READERS.

By an arrangement with the Century Company, the publishers of this great work, The Milwaukee Sentinel is forming a co-operative Century Club, through which it offers The Century Dictionary and Cyclopaedia in its final and completed form at the lowest wholesale price and on easy terms of payment.

The number of sets to be placed in this final allotment, which is being made through the columns of The Mining Journal, will be rather limited. There is a great demand for the work, and it is evident that persons who have already secured the work appreciate the value of the work so much that they insist upon their friends getting it.

The Century Dictionary and Cyclopaedia.

HOW TO PROCEED. The Sentinel regrets that every one who desires The Century cannot get it at the special club prices. This, however, is impossible, as there are only a few sets to place in the Northern Peninsula. Those who are interested in the offer should write without delay. The publishers have supplied a number of copies of a handsome illustrated pamphlet descriptive of the work. It contains sample pages, maps and illustrations. It will be sent free of charge as long as any sets remain for distribution. Inquiries should use the adjoining information request.

Cut This Out and Mail It Today. To The Mining Journal, Marquette. Please have sent to me illustrated pamphlet of The Century Dictionary and Cyclopaedia, with fuller information regarding your Century Club, which is open to citizens of the Northern Peninsula, and whose members secure the work at special club prices, and on small monthly payments. Name, Occupation, Address.

The Milwaukee Sentinel.
