Unrolling New Wall Papers

From England, from France, from all over the world come the new Wall Papers.

I carry so many patterns of the finest sort that the people are becoming aware that to "see it all" they must come here. It doesn't follow that a lot of money must be expended to secure a delightful and harmonious effect for a room. It's all in the head-work—the planning.

LADYSMITH HEMMED IN.

Four Boer Divisions in a Semi-Circle About the Town.

BIG GUNS ARE POSTED.

Joubert in Supreme Command of the Concentrated Forces and a Great Battle Seems Imminent.

WHITE IN GRAVE DANGER.

Ladysmith, Oct. 29.—Boers are gradually closing in around Ladysmith. They have mounted two big guns on Tinta Ingoni, forty-five hundred yards from the British camp. An attack is expected. A number of resident civilians have been ordered to leave town under penalty of arrest.

Lieutenant Mielckjohn, of the Gordon Highlanders, who was wounded at Landslaagte, is improving after the amputation of an arm.

WAR BALLOON IN USE.

London, Oct. 29.—The Daily Mail's Pietermaritzburg (Natal) correspondent has just cabled:

"Patrols from Ladysmith report there are four large Boer camps within a radius of ten miles extending in a semi-circle northeast of town.

"Evidently the enemy is contracting all his forces. Commandant General Joubert is in supreme command.

"One Boer laager has a Red Cross tent posted in a conspicuous position.

"The British had several skirmishes with the enemy today.

"Railway communication with Ladysmith is still intact. At Colenso a couple of Basutos were arrested for putting boulders on the railway. They confessed they had done this by order of the Transvaal authorities.

"A war balloon, very small and light, is now in use and the full position of the Boer guns has been ascertained.

"Heavy rains have flooded Tugela river, which will prove an effectual barrier to the Boers proceeding southward. The remaining bridges are strongly guarded."

LONDON ON ANXIOUS SEAT.

London, Oct. 29.—The position at Ladysmith, without being alarming, is sufficiently dangerous to excite anxiety. Evidently the Boers are trying to repeat their Dundee tactics. It is roughly estimated they have seventeen thousand men, against twelve thousand British. General Sir George Stewart White has the better artillery, but it is of lesser range.

The delay in the Boer attack is reported to be due to the non-arrival of Commandant General Joubert's column. Everything is now considered, hinges upon General White's resource and judgment. Nothing is known regarding the progress of the defensive works for the protection of Ladysmith.

The censorship is more active than ever. According to The Daily Chronicle's correspondent the "new regulations limit the number of words allowed for a press message to one-fourth the number allowable before."

KRUGER AT THE FRONT.

The two guns the Boers have mounted are powerful weapons, the ones used in shelling Dundee, and it is a matter of considerable surprise how they manage to transport such heavy pieces.

Again it is rumored that President Kruger accompanied General Joubert to the front in a splendidly fitted traveling wagon.

The Standard's correspondent at Ladysmith, telegraphing Saturday, sends the statement that the Boers have captured fifteen hundred mules, a loss that must seriously inconvenience the British transportation service. An attempt of the Boers to cut the railway at Pieters, he says, was frustrated by British cavalry.

DUNDEE STORES LOOTED.

The later accounts of the first battle and the evacuation of Dundee do not give these affairs a rosier hue. Owing to the shelling of Glencoe camp the telegraphers were compelled to decamp with numerous unforwarded dispatches. When the Boers entered Dundee they indulged in a general looting of the stores, but apparently did not otherwise molest the populace.

In the first battle the Boers captured a Maxim of the Eighteenth hussars, but only after the crew, with one exception, had been disabled. The survivor effectually damaged the gun. Only two officers of the staff of General Symons came off without a wound.

According to the latest reports from Cape Town General Joubert has joined hands with the Free State forces, and there has been some outpost fighting; also that President Kruger has arrived at Glencoe.

ROYAL GUARDS TO GO.

The Household Guards, it is announced, have received orders for a composite regiment for South Africa, including the First Life Guard quartered at Windsor and detachments of the Second Life Guards and Royal Horse Guards.

The Standard voices the general anxiety regarding Sir George White's position by remarking upon the adaptability of the able strategy of the Boers for which they have hitherto not been given credit. It says: "Their strategy is so well planned that it is impossible to doubt that it is the product of some

officer trained in the best European school of war."

BRUSH WITH THE BOERS.

Pietermaritzburg, Oct. 29.—It is officially announced that the British troops who left Ladysmith Friday to meet the enemy returned yesterday after a slight brush, the Boers retiring on Elands-laagte.

Disquieting rumors are current regarding the Umvoti country, but the official reports say all is quiet there.

LOOKS FOR DECISIVE BATTLE.

Paris, Oct. 29.—An interview is published here today with Dr. Leyds, representative of the South African Republic in Europe, at Brussels, who expressed the belief that the decisive battle of the war would occur at Ladysmith. Dr. Leyds further said that the Transvaal had negotiations pending with France and Germany for the laying of a cable to the continent, which were about to terminate successfully when the war broke out.

TO MOBILIZE CRUISERS.

TWENTY-NINE TO BE ASSEMBLED, IT IS REPORTED.

London, Oct. 29.—It is reported this evening from Plymouth that the admiralty is about to mobilize twenty-nine cruisers.

RECRUITING GERMANS.

ENGLAND ENGAGING UNDER OFFICERS AT \$100 PER MONTH.

Berlin, Oct. 29.—It is reported from both Hamburg and Metz that British recruiting officers are busy engaging German under officers for service in South Africa, offering £20 a month.

DISSENSIONS IN THE FREE STATE.

LONDON HEARS THAT PRESIDENT STEYN MAY BE DEPOSED.

London, Oct. 29.—According to a dispatch from Cape Town rumors of dissension at Bloemfontein, capital of the Orange Free State, have reached Cape Town. It is said a movement is on foot to depose President Steyn and install Mr. Fraser as president.

RED CROSS AID FOR THE BOERS.

GERMAN DETACHMENT HAS TENDERED ITS SERVICES.

Pretoria, via Lorenzo Marques, Oct. 29.—The German consul has notified the Transvaal government that the German Red Cross society has offered the Transvaal a full detachment. The government will accept the offer.

The German corps, which suffered severely in the fighting at Elandslaagte, is being reorganized and filled up to its original strength of six hundred, Captain Van Aldiebill commanding.

BRITISH WOUNDED WELL TREATED.

CHIEF MEDICAL OFFICER AT GLENCOE THANKS PRETORIA.

Durban, Oct. 29.—It is officially announced that Major Donegan, chief medical officer at Glencoe, has wired to the Transvaal state for secretary, Mr. Reitz, at Pretoria, an expression of thanks on behalf of all the British officers and men in the hospital at Glencoe for the extreme kindness shown them by the Boer officers and men. The announcement adds that the wounded are doing well and none of the officers are likely to die.

LOSSES OF THE BURGHERS.

CASUALTIES TO DATE SET DOWN AS NEARLY \$00.

Cape Town, Oct. 29.—A dispatch to The South African News from Pretoria says the Boer loss at Elandslaagte was thirty-six killed and sixty-four wounded. According to a dispatch to The Cape Times from Ladysmith, the natives say the Boer losses at Bellfontein last Tuesday were at least eighty killed and 150 wounded.

The same correspondent says small Boer raiding parties are in the field among the villages and several farms have been looted, also that the rains continue and the volunteer camp is almost flooded.

The following official data was made public today regarding the recent fighting near Dundee: "The Boer losses during Friday's engagement at Talani hill are estimated at five hundred in killed and wounded."

CAPTURE OF THE HUSSARS.

CAPTAIN HARDY DETAILS THE FIGHT OF THE GALLANT PARTY.

Durban, Oct. 28.—[Delayed in transmission.]—The following is the official account of the capture of the squadron of the Eighteenth hussars by the Boers as given by Captain Hardy:

"After the battle at Glencoe three squadrons of the Eighteenth hussars, with a Maxim, a company of the Dublin fusiliers and a detachment of the mounted infantry, moved down towards San Spruit. On reaching the open the British forces were shelled by the enemy. Colonel Moeller then led the men round Talani hill, across the Vantsdrift road, and we captured several Boers and saw Boer ambulances retiring.

"Then, with squadron B of the hussars, the Maxim and the mounted infantry, he crossed the Dundee-Vryheid railway and approached a strong force of the enemy, who opened a hot fire, wounding Lieutenant Lachlan. Our cavalry retreated across Vantsdrift, the Boers pressing on. Colonel Moeller held the ridge for some time, but on the enemy enveloping his right, fell back. Finally he reformed on a ridge on the north, which was held for some time."

While Captain Hardy was attending Lieutenant Crun, who had been wounded, Moeller's force retired, apparently intending to return to camp around the city, and was not seen afterwards.

TODAY'S WEATHER.

Washington, Oct. 29.—The following is the weather bureau's forecast for Upper Michigan: Fair Monday and Tuesday; light variable winds.

SORTIE AT MAFEKING.

British Encounter the Enemy Three Miles to the North.

DRIVEN BACK BY BOERS.

Latter Now Control the Waterworks, but It Is Said There Are Ample Supplies in Town.

GUNS TOSsing IN SHELLS.

Cape Town, Oct. 29.—A dispatch from Mafeking, dated the 23d, says: "A bombardment of the city was commenced by the Boers this morning from a range of two and a half miles by a battery of three Krupp guns, respectively throwing seven, nine and twelve-pound explosive shells.

"At the beginning the marksmanship was erratic, but ultimately the Boer gunners got the range and sent a number of shells into the town. Comparatively little damage has been done. The ammunition used by the Boers apparently is inferior in quality. There have been no casualties.

"The British returned only one shot, which, being well directed, disabled one of the enemy's guns.

"After three hours the Boers sent an envoy to ask if the town was prepared to surrender. Colonel Baden-Powell replied in the negative, but the shelling was not resumed."

BRITISH LEADER WOUNDED.

A later dispatch from Mafeking, dated the 24th, says:

"The Boers are in possession of the water works and have cut off the supply. This occasions no anxiety, however, because ample supplies are available in the tanks and wells.

"During a sortie this evening the British encountered the enemy three miles off to the north. The Boers had apparently been warned and returned our fire in earnest with a well handled machine gun.

"As our men had no intention of pressing the attack, they retired immediately. Commander Sidney Webb was severely wounded and fell behind during the fight, but afterward he was rescued by Trooper Stevens.

"The conduct of our men was splendid. The enemy's loss was not ascertained."

PLENTY FOOD AT KIMBERLEY.

London, Oct. 30.—This morning there is no fresh news from the western frontier. The mines are still working at Kimberley, where there are provisions enough to last nine months.

Cecil Rhodes has mounted and fully equipped a town guard of four hundred men at a cost of £15,000.

HEAVY LOSSES AT PHILADELPHIA.

PROPERTY WORTH NEARLY \$300,000 IS DESTROYED BY FIRE.

Philadelphia, Oct. 29.—The triangular block bounded by Canal and Second streets and Germantown avenue was almost totally destroyed by fire today, entailing the loss of \$150,000, partially insured. The Chicago Merchandise company, warehouse, and Davis Bros., railroad spikes, were the principal losers.

Yesterday the D. M. Osborne Farm Implement company's plant and the W. S. Cooper Brass works adjoining were destroyed by fire, causing a loss of \$140,000. The Osborne company's loss was \$100,000.

INDIANA TOWN SCORCHED.

Goshen, Ind., Oct. 29.—The business portion of Wakarusa, nine miles west, burned this morning causing the loss of \$60,000, partially insured. Nineteen business firms suffered.

KILLED BY NIGHT WATCHMAN.

LATE VOLUNTEER CAUGHT BURGLARIZING AN ILLINOIS STORE.

Lincoln, Ills., Oct. 29.—John Petter, a recently discharged private of the Thirty-ninth volunteers and a native of Oakland, Cal., was shot and instantly killed by a night watchman while trying, with two companions, to break into a general store at Beason early this morning. The coroner's jury exonerated the watchman.

NEW TREATY WITH SPAIN.

ONE PENDING THAT WILL COMPLETELY RESTORE RELATIONS.

Washington, Oct. 29.—An understanding has been reached by which it is expected negotiations will be opened soon at Madrid for a new treaty between the United States and Spain. This will be the last step toward completely restoring friendly relations between the two countries.

BRAND-NEW REVOLUTION.

GENERAL HERMANDEZ HAS STARTED IT IN VENEZUELA.

Caracas, Venezuela, Oct. 29.—General Hernandez has had a rupture with the government, and he left early this morning for Ocumara to start a new revolution. He has a force of two thousand men. All the Liberals are supporting General Castro. The situation is extremely critical.

NEW COPPER RANGE OFFICIALS.

BATCH OF THEM JUST APPOINTED—NEW ROAD NOTES.

W. J. Souder, of the Des Moines, Northern & Western railroad until its recent absorption by the St. Paul, has been appointed auditor of the Copper Range.

Fre W. Taylor is the cashier in the general offices. George W. Taylor, from the Wisconsin & Michigan, is the master mechanic of the new road.

The steamer began loading cars in the cut beyond the Atlantic mill Friday, and as soon as the fill is completed near the site of the new freight house or is far enough along so that the track can be straightened there, the unloading of the gravel trains by the train shovel will be commenced, and it is expected that this point will be reached today.

H. Grant, who has charge of the grading of the new road for the contractors, C. L. Loss & Co., has the grading finished up to the beaver dam about eight miles on the Houghton side of the Winona mine, and is so far ahead of the steel gang that he can easily finish the grading of the remainder of the line before they overhaul him.

Copper Country Department

MORE PIPE TO GO IN. SEWER SYSTEM TO BE EXTENDED IN WEST HOUGHTON.

Houghton keeps piling on the sewer work, and besides authorizing Contract- or Peter to order the pipe for an extension of the trunk sewer east from Hubbell avenue to the eastern boundary of the village, a distance of several blocks, for which eighteen-inch pipe will be used, the council has decided to put in seven hundred feet of ten-inch sewer in West Houghton, starting from the Albin street sewer and extending up South street to Fourth and then on eastwardly to a point beyond Third street, the village itself doing the work.

D. M. Scott, the Laurium sewer engineer, laid out the work Thursday and it is now under way.

DICKINSON COUNTY'S CHARGE. INSANE MAN BROWN A RESIDENT OF IRON MOUNTAIN.

Sheriff Lean returned Saturday from his trip to Iron Mountain, where he went to ascertain something, if possible, about the crazy man, Brown, from the Arcadian, now confined in the county jail. He was fortunate in discovering that Brown had resided in Iron Mountain ten years, which effectually settles the responsibility of the Michigan officials in the matter, as well as the fact that as an inmate of Newberry he will be charged to Dickinson county and not to Houghton. Brown will undoubtedly be taken to Newberry at once, as he is sadly in need of skilled care and treatment.

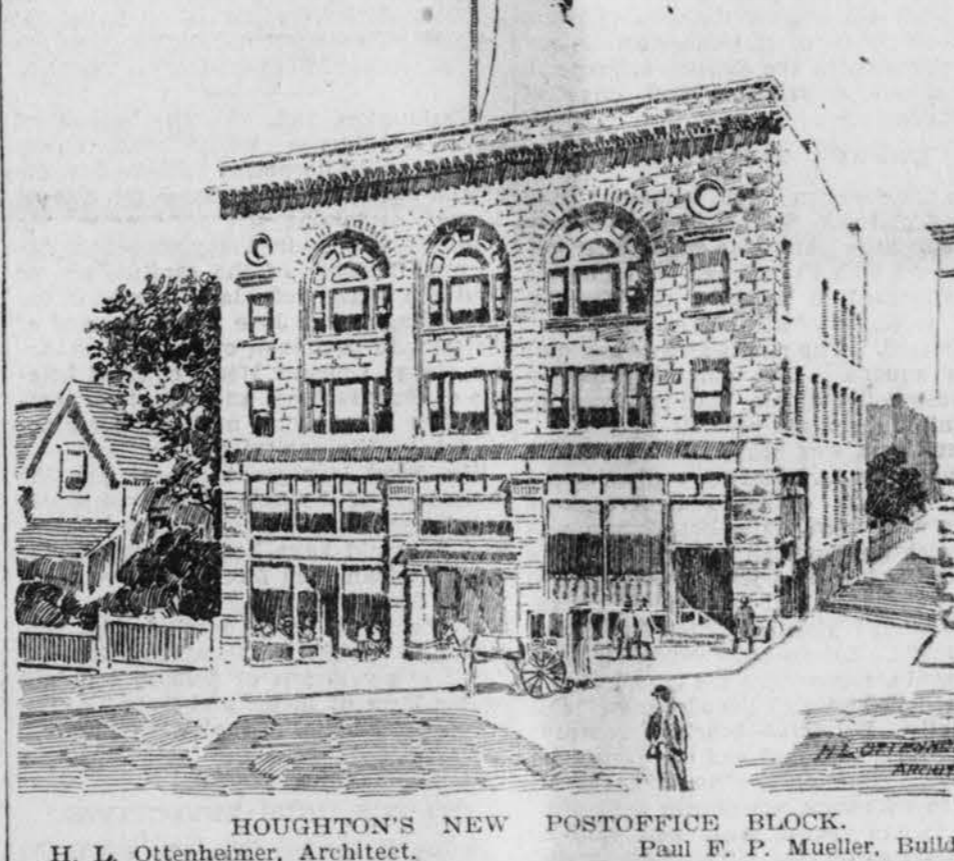

HOUGHTON'S NEW POSTOFFICE. DESCRIPTION OF THIS HANDSOME BLOCK—TO COST ABOUT \$30,000.

The new Houghton postoffice building, of which a cut given in this issue, is to be 65 by 60 feet deep, with a basement under the entire building. The block will be built of Portage Entry sandstone, the main treatment of which will be rock face, the trimmings only to be tooth-chiseled. The main portions of the building will be ornamented in relief in handsome carving. The store fronts will be of plate glass and iron.

The structure is divided on the first story into two stores, one of which will be used for the postoffice and the other, which is already rented, for mercantile purposes. The north end of the building is so arranged that there will be an enclosed story, which will make admirable offices. The building is finely situated, owing to the fact that it is free on all sides, thus affording the very best service for light and air. The entire second story is divided into suites of offices, while the third story is arranged for and will probably be used as a hall, either for private or public uses, and will have a ceiling sixteen feet high, which will afford a splendid chance for handsome decorative treatment.

The public portions of the building, such as the main entrance, vestibule, hall, etc., will be finished most elaborately with marbles, tile and mosaics, and all the treatment throughout will be of hardwood. The building will be heated by steam from Jas. R. Dee's central heating plant on Sheldon street. This building will make a very notable improvement in addition to the other many new buildings which have been erected this summer. The owner is Jas. R. Dee, president of the Houghton Landlord's club, to which position he is justly entitled. The building will cost in the neighborhood of \$30,000, and it is expected that it will be ready for occupancy by January first.

The plans were drawn by H. L. Ottenheimer of Chicago and Houghton, while the building is being erected by Paul F. Mueller of Chicago.

HOUGHTON'S NEW POSTOFFICE BLOCK. H. L. Ottenheimer, Architect. Paul F. P. Mueller, Builder.

but nine miles, the branch leaving the main line at the first crossing, at Schoch's barn, and following the high land, passing through Mercer's farm and, thence easterly, crossing both the Flint and Fire Steel rivers. The Herald says it knows for a certainty that the Michigan people have secured more than a mile of lake frontage at the point which will be tapped by the new St. Paul branch, and says it is a splendid site, the elevation and depth of water being all that could be desired. When seen in connection with the stamp mill matter, Superintendent Brady of the Michigan was non-committal, but that this piece of road will be built. The Herald takes for granted and is willing to wager a new hat that both the Adventure and Michigan stamp mills will be accommodated by it and, later on, the National, Fire Steel and other mines' mills along the line of this road." The proposed branch will traverse a splendid timber belt and agricultural territory, and from the very outset will bring in revenue, supplying logs for the McMillan saw mill which will be in full operation at Ontonagon by the time the road is ready. Independent of the prospect of handling the stamp mill traffic, the new line will tap a rich virgin territory and will probably become one of the best-paying branch roads of the entire C. M. & St. Paul system, says the Herald.

OPERATIONS AT VICTORIA. Of the Ontonagon county properties, the Mass, Victoria, Adventure and Michigan are rapidly proving themselves to be valuable copper mines. The Mass has already shipped some copper and it is believed that the Victoria and Michigan could also ship a good lot of it had it the same transportation facilities. These two mines have made no effort as yet to take out mineral, all the copper mined being taken out in the course of development work only. The Mass having been doing active development work for nearly eight months and the Victoria about one month. The Mass, as stated a few days ago, has sold about 18,000 pounds of copper and has a few thousand pounds on hand, while the Victoria has about 12,000 pounds on hand and is adding to the amount every day, the lack of proper transportation facilities rendering an advantageous sale impractical at present. However the South Shore road has its grading on the

There's Nothing Like it. Uneeda Jinjer Wayfer. But You'll Like it.

new branch completed to within five miles of the mine, and the line will not doubt be completed to and across the Victoria property as soon as spring opens. At the mine twenty-seven new dwelling houses have been built, as well as a boarding house, barns, shaft and engine houses, and a modern plant of heavy mining machinery has been installed. The old workings have been unwatered, cleaned out and straightened, and active development work is now on with vigor. Power drills are being used in sinking the old shafts deeper and drifting on the vein, which is now open and from which more copper is now coming than from any other mine on the Ontonagon range, according to the amount of ground broken, and a north and south crosscut has been started to cut and open every vein which crosses the property. The old wagon road to Rockland, which was almost impassable, has been repaired and is now in splendid condition, while a new road is cut out to the falls in the Ontonagon river, on the south side of the Victoria property, where preparations are now being made to install a power plant which will not only furnish the mine with all needed power but also bring in a good revenue by selling power to others. At the lowest stage of water in a dry season there is water enough to develop 5,000 horsepower at these falls. With such a power, besides its mineral output, the Victoria ought to be able to pay dividends when other mines in the district cannot pay expenses.

PROSPECTS OF THE MENOTA. A. C. Bishop of Detroit is in Houghton on his return from the Menota property, in Keweenaw county. He says that in his opinion there is no doubt but that the Kearsarge, the most persistent of all the copperbearing lodes, extends across their property and that three miles west of them the Delaware people are now sinking upon it. He states, though, that he believes the company will decide to first pay attention to its copper ore proposition, and that he shall recommend an extension of the tunnel started on the property in the early '70s clear through the mountain to find, if possible, the mother lode from which he believes the smaller veins and fissures are sprung. In 1873 Mr. Bishop says that he stepped on a vein which was twenty-four feet wide, but he thinks the vein where its branches come together will be found still larger. Thirty-seven pounds of the ore picked up from the old dumps in midwinter some months ago by Mr. Bishop's son, at a time when there is a certainty that no section could have been made, ran nearly 60 per cent in copper. On his return to Detroit Tuesday Mr. Bishop will formulate his report to the other stockholders in the old property, and it may be some time thereafter before a decision as to the proper course to pursue is arrived at.

STOCK BOOM ON THE TAPIS. Aneut the copper situation, the manager of the Chicago branch of one of the largest brokerage houses of Boston writes as Lake friend: "The copper market in London has showed a little advance over the last few days, and it seems to us that copper stocks in general are about as low as they will go. Of course, we do not refer to the new propositions which are as yet non-producing, as these propositions have now resolved themselves into the question of whether they are copper or merely holes in the ground. On the other hand, the good dividend-paying mines, also those which are producing and have not paid dividends, we think a reasonably safe purchase. The strength which is now apparent in the New York market we think will be a very short time reflect itself in the copper market. The banks, which have until now absolutely refused to loan on 'coppers,' are now beginning to loan on some of them, and it will probably be only a short time before money on copper stocks will be as easy as it was during the boom."

Such a positive opinion from such a source carries some weight and tends to show which way the tide is setting. It is given here as a grain of comfort to some of the Lake holders who bought copper stocks at prices far above their present value.

WOLVERINE AND MOHAWK. The Wolverine is now netting \$40,000 a month. The time is coming, and is not very far distant, when the Wolverine, instead of making 230 tons of copper a month at a cost a trifle under 8 cents, will be producing from 320 to 350 tons of copper a month, at a cost close to if not a little less than 7 cents a pound. In other words, the Wolverine is one of those mines, which, if copper should go to 11c, a pound, could pay good money on the investment, Mohawk being on the same lode and showing the same richness of ground, should in time be able to do fully as well in regard to the price at which it will lay down copper, and from its more extensive territory it should be able to make from two to three times the production per month.—Mr. Jenkins, of Paine, Webber & Co., in an interview with the Boston Financial News a few days ago on his return from the Lake.

COPPER MISCELLANY. It is estimated that it will take at least a year to restore the Besshi mine—the Calumet & Hecla of Japan—to a condition where production can again be

prosecuted, owing to the complete devastation wrought by the recent flood and the drowning of nearly all the skilled miners, 600 lives having been lost in the workings. The property is in the province of Iyo, in Shikoku island, and the production last year amounted to 7,000,000 Kin—4,200 metric tons—of fine copper.

At the Wyandot property, the diamond drill, which was discovered by the result of the first hole put down to have been set almost over the Winona lode, has been moved back 465 feet and a new hole will be started today which should cut the lode at a depth of several hundred feet.

The machinery for "C" shaft at the Michigan mine was received the other day at Rockland and is now being unloaded preparatory to at once setting it up.

This year's copper production in Arizona will be about 140,000,000 pounds, it is stated. In 1933 it amounted to 43,000,000 pounds, showing an immense increase in latter years.

The laying of rail on the road connecting the Isle Royale with the South Shore tracks is now in progress, the curve forming the connection being already in.

VAST FIELD UNDER DEVELOPMENT. OVER TEN MILLION DOLLARS EXPENDED THIS SEASON IN OPENING NEW MINES IN THIS REGION.

The season, which has been one of unparalleled activity in the Lake Superior copper district, is proving all too short for the work projected. Although more has been accomplished since the spring break-up than has ever been performed in the two most active years of the past, the full amount of work planned is far from finished. This is due to a variety of causes, chief among which have been the impossibility of securing an adequate supply of labor and the inability of the new mines to secure material and machinery on time, the latter trouble being due to the general activity in business which has crowded every factory in the country to the limit of its capacity.

BIG MONTHLY PAY-ROLLS. Despite the inability of the promoters to carry out their full program, eight to ten millions of dollars have been expended this season in development work, beside the enormous sums paid out by the established mines in the regular course of business, the payroll of the Calumet & Hecla alone exceeding a third of a million per month, winter and summer. Perhaps the most important work of the year is the building of the Copper Range railroad now nearing completion. For fifty years it has been known that there were rich deposits of copper between Houghton and Greenland, but until now it has been impossible to develop mines because of the lack of rail facilities. A number of mines are being opened in the district named this year, but the initial work has been undertaken in each case solely because of the assurance that rail connections would be afforded before the mines become producers.

Despite the enormous profits of copper mining in this district—amounting in the case of the largest mine to nearly a million dollars per month—the industry is one which requires the most favorable conditions to guarantee success. The enormous quantity of rock mined and stamped daily and the great number of employees required at the producing mines, ranging from over 300 in the case of the smallest to upwards of 5,000 on the rolls of the Calumet & Hecla, render it imperative that the mines be given the benefit of the very best machinery, the most modern methods and the lowest priced transportation.

QUINCY'S GREAT RECORD. The Quincy mine will this season net about \$1,500,000 in addition to expending another half million on betterments, showing a total mining profit of little short of two millions of dollars. The Quincy is the richest amygdaloid mine in the district and ranks second only to the Calumet & Hecla as a money-maker, yet the percentage of refined copper taken from the Quincy is but 1 1/2—thirty pounds of copper to the ton of rock stamped. Of this amount about four-tenths of 1 per cent is found as mass and barrel copper, while but 1.1 per cent is secured from the stamp rock—at eighteen cents per pound \$3.96 per ton. This is a figure which would be scorned by western miners of gold and silver, yet it returns millions in the Lake copper district, solely because the mines are operated upon a truly colossal scale and with every advantage afforded by the ingenuity of man and the employment of unlimited capital.

In the case of the Quincy, which is the richest amygdaloid mine of the district, nearly a third of the rock broken is discarded as too lean to be worth stamping, while enormous stretches of lode rock are left standing underground as not worth stamping. Bearing in mind the case of the Quincy, it will be understood why rail connection is absolutely essential to the development of the mineral district lying to the southward of Houghton.

The Copper Range company is both a mining and a railroad corporation, own-

(Continued on Page Seven.)

ILLINOIS HOLDS MICHIGAN DOWN.

Ann Arbor Able to Score But Five Points in the Game at Champaign.

YALE IS SHUT OUT BY COLUMBIA AT NEW YORK.

PRINCETON, TOO, IS VANQUISHED; CORNELL THE VICTOR.

Pennsylvania Ties With Chicago. Harvard Defeats the Indians and the Bush Medics Allow Wisconsin to Win by 11 Only to 0.

SURPRISES ON THE GRIDIRON SATURDAY

- Columbia, 5; Yale, 0. Cornell, 5; Princeton, 0. Harvard, 22; Carlisle, 10. Chicago, 5; Pennsylvania, 5. Michigan, 5; Illinois, 0. Wisconsin, 11; Rush, 0. Minnesota, 5; Grinnell, 5. Beloit, 11; Lawrence, 0. Ohio, 6; Oberlin, 0. Sacred Heart, 42; Madison, 0. Marinette, 16; Menominee, 0. Ironwood, 24; Ashland, 0. Escanaba, 17; Ishpeming, 0.

Champaign, Ills., Oct. 29.—Michigan and Illinois battled for supremacy yesterday and the former won by a score of 5 to 0.

Hefflinger of Yale was chosen referee and Brown of Cornell, umpire. Thirty minute halves were played. Neither scored in the first half. Michigan succeeded in scoring a touchdown within five minutes of the end of the last half, but missed goal. Michigan's weight won the game, which was hard fought from start to finish. Illinois blocked Michigan's punts five times.

Michigan's greatest gains were made through the center. There were no long runs. The ball was sawed continuously up and down the field, both goals being in danger throughout the game. In the first half Illinois could do nothing against the visitors' defensive playing, being unable to advance the ball the required five yards in three trials at one time.

Michigan gained on almost every exchange of punts, but its line proved weaker than expected. Illinois' defense playing was excellent, and Michigan was never able to hold the pigskin for any length of time. The game was the most hotly contested one ever played on Illinois' field.

HARVARD DEFEATS CARLISLE.

RED-SKINS DROP A GAME TO THE COLLEGE CHAMPIONS.

Cambridge, Mass., Oct. 29.—While Harvard had no difficulty in disposing of the famous Carlisle Indian eleven yesterday afternoon on Soldiers' field, the Crimson players were unable to keep little Hudson from kicking his customary goal from the field and a wretched muff by Gierach early in the game, followed by a quick pick-up by Redwater, who ran fifty yards for a touchdown, gave the visitors five more points, making the final score 22 to 0.

There was bad fumbling by the Harvard backs at times and during the latter part of the game, the Indians, discovering a weak spot in the Crimson line, hammered there for steady gains until the line was reached. After two downs without result Hudson drove the ball between the goal posts.

The little Indian quarterback, however, did not have all the kicking honors to himself, for Burnett made a fine goal from a place kick on the Indians' fifty-yard line and Hallowell's punting was almost as good as Houghton's last year.

The Harvard eleven played with a snap and dash that carried the 12,000 people almost off their feet with enthusiasm. Scarcely a Harvard man was injured during the entire game. On the other hand a number of the Indians were badly battered. Wheelock was carried from the field and is still in a serious condition. His injury apparently resulted from a blow about the head.

CHICAGO TIES PENNSY.

ERROR OF CAPTAIN KENNEDY LOST THE MAROONS THE GAME.

Chicago, Oct. 29.—The football eleven of the University of Pennsylvania barely escaped defeat at the hands of the University of Chicago eleven Saturday in a game that for desperate playing has seldom been equaled in the West. The final score was a tie, both sides scoring a touchdown in the second half and neither kicking a goal, leaving the total score 5 to 5.

Five times the Chicago eleven had opportunities to score, twice by place kicks with the ball in a favorite position and three times getting the pigskin inside of the Pennsylvania five-yard line. But only once were the Maroons able to get the ball over the goal line, and that was when defeat seemed almost a certainty.

Poor leadership on the part of Captain Kennedy of Chicago in attempting to send Slaker through the Pennsylvania left guard lost the ball for Chicago on downs when it was within two yards of the goal line in the second half; and when, finally, a few moments later, Wellington was pushed over for the tying touchdown, the Chicago captain missed an easy goal. It was his attempt at a place kick, too, that ultimately resulted in the Pennsylvania score, Kennedy dropping the ball when tackled.

and Pennsylvania securing it on Chicago's forty-eight-yard line. Pennsylvania's big guards tore the Maroon line to pieces, and Davidson was finally pushed over.

Chicago's all-round play was superior to that of the Quakers. The latter were utterly unable to get around the Maroons' ends, and in the first half were frequently held for downs even when using the dreaded guards back play. In the second half, however, the awful hammering told severely on the Chicago forwards; and during the series of plays which resulted in Pennsylvania's touchdown, they were played off their feet. Most of the time during the second half the ball was within Pennsylvania's territory, and only the fiercest kind of playing by the well-nigh exhausted Quakers saved them from defeat.

Notwithstanding rain had been falling steadily since Thursday morning Marshall field was in fair condition. A crowd of fully 5,000 enthusiasts witnessed the struggle.

SONS OF ELI VANQUISHED.

COLUMBIA WALLOPS YALE IN A FIERCELY FIGHTED BATTLE.

New York, Oct. 29.—At Manhattan field Saturday in a game that was fiercely contested throughout, the football eleven of Columbia defeated that of Yale by the score of 5 to 0.

In addition to this Columbia carried the ball across Yale's line two more times in the same half, neither of which was allowed as a score because of some technicality. The referee classed the latter play as a touchback and gave Yale a full kick from her twenty-five yard line. This was of no avail, however, as Weeks carried the ball over again for a touchdown on the first line-up after this kick.

It was a beautiful run of about forty-five yards in which Weeks dodged several of the Yale players, including Captain McBride, and carried the ball squarely between the goal posts. Wilson made a poor try at an easy goal and the score was Columbia, 5; Yale, 0. This ended the game with the ball in the middle of the field.

The weather certainly favored the spectators much more than the players, and that the men were able to last such a rapid game on such a sultry day speaks well for the physical condition of all. There were probably 5,000 people present, the Columbia colors yred-minuting, but the dark blue of Yale was sparsely distributed throughout the grandstand.

TIGERS DOWNED AT ITHACA.

PRINCETON LOSES TO CORNELL 5 TO 0 IS THE SCORE.

Ithaca, N. Y., Oct. 29.—In one of the finest football battles that Cornell has ever waged against an opposing eleven, she wrested victory from Princeton yesterday on Percy field by a score of 5 to 0.

Throughout the two twenty-minute halves, which were repeatedly interrupted by various players succumbing to the strain of the fierce work, the teams struggled with the odds slightly in favor of Cornell. Princeton was outplayed both in defensive and offensive work, and as the game progressed Cornell seemed to let out a great reserve force, which was productive of telling good.

In punting, which was resorted to freely by both elevens, Captain Starbuck held out well and toward the latter part of the contest, he was outpunting Wheeler. In catching punts for runs or kicking, Walbridge and Young excelled and seldom lost even a yard on a fumble. Princeton, on the contrary, was weak in this respect.

The great feature of the game was Young's goal from the field which won the contest for Cornell. It was made in the last few minutes of play just at the time when it looked as if the game would be a tie. The attendance was 8,000.

FATAL GAME IN WISCONSIN.

MEMBER OF THE LA CROSSE TEAM IS BADLY INJURED.

La Crosse, Wis., Oct. 29.—Herbert Cole, a sophomore of the La Crosse High school, aged eighteen, probably was fatally injured in a football game Saturday afternoon at Winona. His skull was fractured and doctors have pronounced his case hopeless. The game resulted: Winona Normal, 23; La Crosse High school, 5.

TRIBUTE TO DEAD COMMANDER.

THREE REGIMENTS ESCORT THE REMAINS OF GEN. HENRY TO THE TRAIN FOR WASHINGTON.

New York, Oct. 29.—The largest and most impressive military funeral parade since the death of General William T. Sherman took place this morning, when the body of General Guy V. Henry was removed from the late residence to a train and conveyed to Washington, where interment will be made at Arlington cemetery. The services were conducted by Rev. John Huske, of the St. Thomas Protestant Episcopal church. The immediate family relatives and most intimate friends were present at the house services. While the services were being conducted, three National Guard regiments—the Seventh, Sixty-ninth and Seventy-first—aggregating twenty-two hundred men, marched down Madison avenue and took positions in readiness for the parade, which escorted the casket containing the remains to the ferry at Twenty-third street. General George Moore Smith, brigade commander of the Fifth brigade, of which the three regiments represented belong, was at the head of the line with his entire staff.

STOLE PUBLIC FUNDS.

MISSOURI EX-COUNTY TREASURER TO DON THE STRIPES.

Nevada, Mo., Oct. 29.—Ex-County Treasurer Frank F. Parker was today found guilty of embezzling \$26,000 of the county funds and sentenced to three years and six months in the penitentiary.

ILLINOIS DOCTOR SENTENCED.

Peoria, Ills., 29.—The jury in the case of Dr. Belle Howard today returned a verdict of guilty and the prisoner was sentenced to seven years in the penitentiary. Dr. Howard was tried for performing a criminal operation on Etta Binkly, who was employed as a stenographer in the Patee bicycle factory, resulting in her death. Patee was sentenced to three years as an accessory before the fact.

QUICK VICTORY FOR FITZSIMMONS.

Ex-Champion of the Squared Circle Shows Up in Old-Time Form at Chicago.

ONE MINUTE ENOUGH FOR JEFF THORNE OF ENGLAND.

GROTESQUE RING BATTLE IS PULLED OFF AT PARIS.

"Jerry" Driscoll, the British Naval Pugilist, is Defeated by Charlemont, the French Top-Notcher, a Kick Ending an Unfair Encounter.

EASY ONE FOR THE CORNISHMAN.

Chicago, Oct. 29.—Jeff Thorne of England was knocked out by Bob Fitzsimmons in one minute of fighting at Tattersall's last night.

Thorne evidently was much afraid of Fitz, did not land a single blow and only made one light attempt to lead with his left, the blow falling short by several inches.

After Thorne was counted out, Fitz picked him up bodily and carried him to his corner. Thorne was like a dead man for twelve minutes, when he partially regained consciousness and was helped from the ring. The blow was a short arm jolt on the jaw, delivered at close range.

Fitz appeared several pounds overweight, but fought with all of his old time vigor. His feinting was extremely rapid and his blows shot in so fast that Thorne never had a chance to evade more than one.

Thorne was beaten at the start. He had no confidence when he put up his hands and every blow landed by Fitz made him more apprehensive than before. Once he ducked when Fitz was five feet away from him, with no intention of striking at him.

FRENCH CHAMPION WON.

ENGLISHMAN "KNOCKED" OUT BY A KICK IN A BRUTAL PUGILISTIC FIGHT AT PARIS.

Paris, Oct. 29.—The fight for 25,000 francs between Charlemont, the French champion, and "Jerry" Driscoll, former champion of the British navy, Saturday afternoon, resulted in a victory for the former.

There was a great crowd present and the fighting was very hot for six rounds. In the seventh round Driscoll was knocked out by a smashing kick on the leg, the Frenchman being allowed to use his feet in accordance with the French custom. The seats sold as high as \$40 each.

UNFAIR TREATMENT.

The Englishmen who witnessed the fight declare it was most grotesquely unfair from beginning to end. The umpires were both Frenchmen. The match was supposed to be under the Queensberry rules, but "kicking in the groin" was barred. The ring was five and half yards square. The contest consisted of two-minute rounds, with intervals of one minute and ten seconds.

Charlemont was heavy and fat. Driscoll was light and sinewy. Charlemont wore walking shoes and five-ounce gloves were used. The Frenchman was no match for Driscoll, who pounded his opponent's face to a jelly and finally got him in chancery; but he immediately released him, crying out, "He has bitten my lip." Driscoll, however, tackled him again, whereupon the crowd jeered and booed him and nobody knew why. Finally Driscoll, hearing someone shout "time," stopped and the umpire increased. One of the umpires threatened to withdraw, whereupon a Frenchman in the crowd arose and said he would act as umpire. This led to a discussion lasting four minutes, giving Charlemont, who was groggy, time to recover for the second round, during which Charlemont was again punished and the round was stopped before the time had expired, Charlemont being out of breath.

ROWDY SCENES IN THE RING.

Rowdy disputes lasted during the interval, until Charlemont was ready for the third round, in which Driscoll drew blood and landed on the Frenchman's wind, sending Charlemont reeling time and again until the round was unfairly called. The fourth, fifth, sixth and seventh rounds were repetitions of the foregoing, though Charlemont succeeded in getting in a few kicks.

In the eighth round Driscoll was knocked out by a smashing kick on the groin, the Frenchman being allowed to use his feet. Driscoll appealed to the spectators against this foul hit and then doubled in agony and was carried out of the ring. A joyful yell of "Vive la France" came from the crowd and a number of people rushed into the ring and took Charlemont in their arms and kissed him and proclaimed him the victor.

The fight lasted an hour. Charlemont took the 25,000 francs.

TWO WESTERN MINERS KILLED.

FATAL ACCIDENT AT A CRIPPLE CREEK (COLO.) PROPERTY.

Cripple Creek, Oct. 29.—William Van Why and John Lambert, miners, were killed Saturday in the Joe Dandy mine. As they were being hoisted the cable broke, dropping them to the bottom of the shaft.

YOUNG STILL ADVANCING.

NOW NEAR CABANATUAN. TO THE NORTH, WHERE THE FILIPINOS ARE MASSES IN FORCE.

Manila, Oct. 30.—General Young, with infantry, is advancing upon Cabanatuan under difficulties. The country is furrowed with rivers and deep ravines, the bridges over which have been destroyed. The mud is deep, the rations are short and the transportation supplies have been delayed by low water and the poor condition of the roads. There are sufficient stores, however, to keep the brigade. The insurgents for a long time have lived off the country, impoverishing it. The American horses are not yet accustomed to the native grass, and a long bullock train has left San Fernando carrying hay for the cavalry. Spaniards report the insurgents in strong force at Cabanatuan.

LAKE GUNBOAT AGROUND.

The gunboat Laguna de Bay has dispersed a force of rebels who were engaged in constructing trenches beyond Santa Rosa. The boat was fired upon by a party of insurgents bearing a white flag. She is now aground.

Numbers of Chinese are coming to Angeles from Tarlac, paying the insurgents for the privilege. It is reported Aguinaldo and the Filipino congress are still at Tarlac.

There are about 500 insurgents before Angeles. They have been quiet for the past week. Two thousand rebels are at Bamban, five miles to the north.

General Bates has been recalled from San Fernando and ordered to sail for the southern islands as soon as possible.

OTIS REPORTS SKIRMISHES.

Washington, Oct. 29.—The war department last evening received the following dispatch from General Otis: "Young struck insurgents at Santa Rosa, north of San Isidro, yesterday, driving them; captured some of their property. Casualties, two killed, one wounded."

"Evans, Sixth infantry, struck robber band at Negros on the 27th inst.; killed ten, wounding many, capturing twenty prisoners."

"Simons, Sixth infantry, struck a small band and dispersed them, killing three. No casualties."

SILVER ORE FROM MANILA.

Custer, S. D., Oct. 29.—Captain McClelland, First South Dakota volunteers, has brought back from the Philippines some silver ore, and he says the natives say there is a large amount of it not ten miles from Manila. The ore has been assayed and runs 1,400 ounces. Black Hills miners are much interested and may send McClelland back to prospect.

KANSAS LEAVE FOR HOME.

San Francisco, Oct. 29.—The Twentieth Kansas Volunteers, who were mustered out of the service yesterday, left for home today.

SPANIARDS IN SAD PLIGHT.

SANTIAGO WAR HISTORY NOT BEFORE KNOWN MADE PUBLIC IN THE SUPREME COURT'S DECISION ACQUITTING GEN. TORAL.

Washington, Oct. 29.—The bureau of naval intelligence today made public an interesting document published in the official organ of the minister for war at Madrid containing the sentence of the supreme council in the proceedings instituted because of the capitulation of Santiago. The defendants named in the proceedings were Jose Toral, general of division, in command of the Fourth Army corps; General Mesa, chief of brigade of Guantanamo, and six other commanders of outlying military posts included in the capitulation.

The court lays great stress upon the importance of the American naval forces and declares that without their co-operation it would have been impossible for the American land forces to have compelled the surrender of Santiago. The sentence of the court concludes by vindicting General Toral, stating he had "used every means of defense required by the laws of honor and duty." The other defendants are also exonerated, having acted under the instructions of their commanding general.

NAVY'S GUNS EFFECTIVE.

Before it reaches this conclusion, the court goes into a brief but comprehensive history of the whole Cuban campaign from the Spanish standpoint, the various reverses met from time to time being cited in explanation of the final surrender of the city, which is pointed out as inevitable from the time the American squadron blocked the harbor. The new fact is brought out that during the bombardment of Santiago on May 31 the Colon aided the batteries of Morro, Socapa Punta and Gorda. Of the bombardment by the American squadron on June 6, the court says: "One chief and eight men were killed and two chiefs, five officers and fifty-six men wounded." This is a larger casualty list than heretofore credited to that bombardment.

Coming down to the fight at El Caney the court declares that half the officers engaged were either killed or wounded. Of the general engagement on July 1 it is said that over five hundred men and fifty general chiefs and officers were killed or wounded. Following the losses at San Juan and El Caney the court declares that the water supply was cut off, and that the military force surviving was entirely inadequate to defend the city. The total force is placed officially at seven thousand infantry and one thousand guerrillas.

FOOD AND POWDER SHORT.

Of the garrison stores the court says that they surrendered all that was left—a million cartridges. These could not have lasted more than two attacks. The provisions in the city at the time of the surrender consisted only of rice, salt, oil, coffee, sugar and brandy, and of these only ten days' supply remained. There were over seventeen hundred sick in the hospitals. The court orders an investigation to determine the responsibility for the insufficient war materials and food at Santiago.

GREAT STEEL PLANT ON TAPIS AT BOSTON.

Syndicate of Capitalists Looking for a Site on the Harbor at the Hub.

PROPOSED TO USE ORES FROM SPAIN AND CUBA.

RETURN CARGOES OF GRAIN TO CHEAPEN THE TRANSPORTATION.

Scheme Contemplates the Establishment of Blast Furnaces, Rolling Mills and the Like That Will Give Employment to Several Thousand Men.

INVESTMENT OF MILLIONS PLANNED.

Boston, Oct. 29.—In connection with the development of the water front of Boston harbor and the channels leading in from the ocean there is an inquiry for a large area, not less than 2,000,000 feet of land and flats in East Boston, for the purpose of establishing blast furnaces, rolling mills and a general iron and steel plant for the manufacture of enormous quantities of iron and steel, employing several thousand men.

This inquiry comes from a syndicate about to be formed, embracing English, American and Spanish capital, and has for its object the importation of Bessemer ores from Cuba and from Spain, mainly from the latter, to Boston, and the manufacture of pig iron and iron and steel products therefrom.

TRANSPORTATION PROBLEM.

At first this may seem somewhat chimerical, but let it be borne in mind that iron ore is very cheap on the coast of Spain, and that already England takes 5,000,000 tons per annum of this Spanish ore for the supply of her great iron works. The average price of this Spanish ore delivered on board the vessel is \$12.20 per ton, and it can be delivered in any quantities.

The important problem is to secure cheap transportation and economical conditions for working the ores at some point on the American coast. It has been demonstrated that Boston presents more favorable conditions than any other port for this enterprise. First, it has a vast area of water front yet undeveloped. The next important factor is that of cheap freight, and the capitalists connected with this enterprise are said to have demonstrated that tramp steamers can be chartered ordinarily at \$4 per ton each trip, say wheat to Spain and iron ore back to Boston.

Taking the average cost of freights on grain to Europe, they would equal \$2.50 per ton; hence, the return freight of iron ore would cost only \$1.50 per ton. This added to the cost of iron ore in Spain would make the cost of Bessemer ore delivered in Boston \$2.70 per ton, to which should be added 30 cents duty, making the total cost \$3 per ton. It should be borne in mind, however, that for any iron ore, steel or the products thereof exported from Boston 90 per cent rebate is allowed by the government on the duties levied.

GRAIN ELEVATORS NEEDED.

This immense industry could only be developed under conditions carrying terminal facilities in close proximity to grain elevators of some great trunk line from the West, like the New York Central, Canadian Pacific, or Boston & Albany railroad, from the fact that the success of the enterprise depends upon loading grain under the best facilities and then bringing a return cargo of ore, which shall be delivered in close proximity to the grain elevators of the trunk lines which are to furnish the return cargo.

All these facilities Boston will furnish, when its docks are fully developed, to a higher degree than any other port on the Atlantic coast. This land can now be bought at lower rates than the same can be purchased in New York or New Jersey. Port charges are less in Boston than in New York. The trunk lines of railroad can secure such terminal facilities as would afford opportunities for building many grain elevators and thus assist in the development of the great iron industries in Boston, a consummation which would add to the industrial importance and wealth of this city.

Large quantities of iron ore of the highest quality can be secured in Cuba for delivery in Boston. But the important question of return freights, thus reducing the cost of freight on the iron ore, is absent in Cuba, whereas it is present in Spain by reason of the fact of the large shipments of grain to European ports and Spain as well. This year Spain is a large importer of wheat, and every year imports some wheat.

The proposed enterprise contemplates, first, the building of blast furnaces and furnishing of pig iron and steel blooms. The Boston iron industry would have a very great advantage in the cost of freight over Pittsburgh on the 400,000 tons or over of pig iron which are used in New England. Again, it will be readily seen that, for all export trade or business in this section, rolling mills, structural steel works and bridge works in Boston would have an advantage over Pittsburgh in the cost of freight from that point to the seaboard.

BETTER THAN LAKE ORE.

No better iron ore is used in this country than can be secured from Spain at the above rates, which are said to be as low as Michigan or Wisconsin ores can be laid down in Pittsburgh. Boston would possess under the above favorable conditions, great advantages in the shape of shippers for the construction of steel and iron vessels. Ship building has, for many years, been a leading factor in East Boston, and it would not be surprising if a resurrection in this industry came about through the establishment of immense iron works on the harbor.

The present enterprise, which is being considered by capitalists, and for which extensive plans have been made, requires an area at the commencement, of some 2,000,000 feet of land. Later on the requirements would be double that amount.

The question of fuel for this proposed blast furnace and rolling mills is easily solved by securing a supply of fuel gas from Henry M. Whitney's great works in Everett, only about two miles distant. A pipe line between Everett and East Boston water front would furnish the cheapest fuel known to the yards, and one especially adapted for reducing iron.

ROYAL Baking Powder. Made from pure cream of tartar. Safeguards the food against alum. Alum baking powders are the greatest menaces to health of the present day.

CARNEGIE AFTER FUEL.

SECURES AN OPTION ON A BIG PENNSYLVANIA COAL TRACT.

Pittsburg, Oct. 29.—It is announced that interests allied with the Pittsburg, Bessemer & Lake Erie road, the Carnegie ore road, have secured options on 25,000 acres of coal property in Washington county. The intention is to extend the Bessemer road to the coal territory and to secure coal freight for the ore cars from the Northwest. These cars are now being returned empty. Judge G. H. Reed, president of the Bessemer road, will apply for a charter next month for the National Mining company, with a nominal capital of \$1,000,000, which may be increased by the directors after consulting the incorporators. This will supply the coal traffic for the railway and it is expected operations will begin at an early date.

BIG SHIPS FOR JIM HILL.

TWO LARGER THAN THE OCEANIC ORDERED FOR PACIFIC TRADE.

Duluth, Minn., Oct. 29.—J. J. Hill has contracted in England for the construction of two immense steel steamships for the trans-Pacific trade between Seattle and Japan. It is stated a Clyde firm has the contract, and that the ships will be monsters, forty-six feet longer than the new Oceanic, of the Atlantic. Each will be 750 feet long and 20,000 tons burden. They cannot be in service until late in 1901, and if the Pacific trade continues to expand they will not be out of place there. These two are but the first of a large fleet.

VERDICT FOR THE RAILROADS.

BLACKLISTING SUIT OF JOSEPH O'DAY FAILS AT CHICAGO.

Chicago, Oct. 29.—A verdict of "not guilty" was returned Saturday by the jury in the suit of Joseph O'Day for \$50,000 damages against the Chicago & Northwestern Railway company and the Wabash Railway company for alleged blacklisting. The specific charges were that through an agreement between the general managers of the various railroads throughout the country O'Day and others who had participated in the American Railway union strike in 1894 had been refused employment unless they could secure permission of the road by which they were last employed.

MERGENTHALER IS DEAD.

MAN WHO INVENTED THIS PAPER'S TYPE-SETTING MACHINE.

Baltimore, Oct. 29.—Ottmar Mergenthaler, the man who forever fixed his name and fame by the invention of the wonderful linotype type-setting machine which bears his name, died here Saturday of consumption.

Mr. Mergenthaler was forty-five years old, and a native of Wurttemberg, Germany. While he was still a boy he was apprentice to a watchmaker, but he did not settle out his time, owing to his desire to escape military service in the German army.

When he landed in Baltimore his entire capital was only \$30. Going to Washington the young immigrant got work in the machine shop of his uncle, and it was there that he originated and perfected the machine that has revolutionized the printing business.

The invention was somewhat slow in being generally adopted, but Mergenthaler lived to see the product of his genius in universal use. A syndicate headed by Whitehead Reid exploited the patents.

The first linotype machine was built by Mr. Mergenthaler in 1877. This, however, was not a success. Experiments were tried and each year a better machine was built, but in 1881 it looked as if the whole machine was a dismal failure and Mr. Mergenthaler and his partner had a dispute, and the former sold out his interests for \$60.

In 1894 Mr. Mergenthaler began the manufacture of a new machine which was practically the same as that in use now. For years after this other typographic companies fought the inventor until his funds were exhausted. Mr. Mergenthaler died practically a poor man, having spent most of his money in attempting to defend his patents.

It is the Mergenthaler type-setting machine that is used in The Mining Journal office, and on the machine which he invented is this morning set the type that announces his death. The Mining Journal was the first newspaper in this upper country to use the Mergenthaler machine.

Parties have stolen our labels, style of package, and tell the slick that "our" tea is just like Rocky Mountain Tea. They would ruin your health for a little added profit. Beware! The Stafford Drug Co.

No one would ever be bothered with constipation if everyone knew how naturally and quickly Burdock Blood Bitters regulates the stomach and bowels.

BEARS CAUGHT SHORT

BANK STATEMENT IS FAVORABLE, CONTRARY TO EXPECTATIONS, AND STOCKS ADVANCE.

New York, Oct. 29.—Trading on the stock exchange was fairly active and well diversified at the opening Saturday, but changes in prices were small. A number of the coal and steel stocks were inclined to heaviness, but there was support in Federal Steel. The trading element attacked values on the anxiety over the bank statement and the lack of support evident in the metal stocks. Not much impression was made in the railroad stocks, which were generally neglected. Steel & Wire and Tin Plate and Tennessee Coal fell 1 1/2 and Sugar, Canada Southern and American Ice, Pullman, Third Avenue and Leather preferred a point. Toward 11 o'clock Leather common was lifted to 25 1/2 on enormous trading. This steadied the list which rallied sharply in spots.

The market rallied in a quiet way before the bank statement appeared. Sugar, Steel & Wire, Leather preferred and other minor stocks having come back a point or over. The unexpected increase in surplus reserves of the banks threw the market into violent activity and there was eager bidding all through the list, Sugar, Tobacco, Brooklyn Transit,

Manhattan, Steel & Wire, Southern Railway preferred, Louisville, Missouri Pacific and some others rose strongly a point or over above Friday night. Free realizing met the advance at all strong points and pressed prices downward again, the reaction reaching a point in some instances. Prices rallied again in spots. National Steel rising suddenly to 50. The market closed feverishly, but strong at near the top level, with net gains throughout. Sales of stock for the day were 254,562 shares.

Closing quotations are:

BANK STATEMENT.

Following is the weekly bank statement: Surplus reserve, increase, \$1,597,450; loans, decrease, \$4,766,900; specie, increase, \$662,600; legal tenders, decrease, \$750,000; deposits, decrease, \$6,740,208; circulation, increase, \$88,000. The banks now hold \$3,038,525 in excess of the legal requirements.

WHEAT AGAIN DOWN TO 70.

THAT CEREAL WEAK SATURDAY, WITH OTHER LINES STRONGER.

Chicago, Oct. 29.—There was little in the news Saturday from which the friends of wheat could exact more comfort, and the market opened weak. Trade was dull, although the selling pressure was in excess of the demand, and with the exception of a slight rally during the early trading on buying by shippers owing to an improved demand, the market pursued a downward course. Cables were lower and the receipts at Chicago for the week exceeded the shipments by 1,000,000 bushels. The indications were for a liberal increase in the visible supply, while reports from the winter wheat belt were highly favorable.

Corn was irregular and active. The market opened easy in sympathy with wheat, but became strong on generous country buying owing to wet weather and light receipts. Shippers were also heavy buyers. December opened 1/4c lower, at 31 1/2c, eased off, and advanced to 31 1/2c.

A good cash demand and scattered buying by elevator interests steadied oats. December ruled a shade higher, at 22 1/2c.

The leading futures ranged as follows:

—December Wheat—				
Opening.	Highest.	Lowest.	Closing.	
70 1/4 @ 3/4	70 3/4	69 3/4 @ 3/4	70	

December Corn—				
Opening.	Highest.	Lowest.	Closing.	
31 1/2	31 1/2	31 1/2	31 1/2	

Receipts and Shipments.

Receipts—Flour, 19,000 barrels; wheat,

154,000 bushels; corn, 354,000; oats, 290,000 bushels.

QUALITY AND NEWS.

Fame and Excellence are Determining Factors in Successful Development.

One of the Important Functions of High-Class Newspapers.

In presenting interesting phases of scientific and economic problems, high-class newspapers frequently give information of as great value in their advertising columns as in those devoted to the publication of the principal events of the day; and when the fame of a product is extended beyond its natural limits into foreign lands, and a large demand created throughout Great Britain and her colonies and the principal sea-ports and cities of Europe, Asia and Africa, it becomes a pleasant duty to note the fact and to tell of the points of excellence on which so great a success is based. We refer to the now world-famed laxative remedy, Syrup of Figs, the product of the California Fig Syrup company. The merits of this well-known excellent laxative were first made known to the world through the medical journals and newspapers of the United States; and is one of the distinct achievements of the press. It is now well known that Syrup of Figs is an ethical proprietary remedy, approved by the most eminent physicians everywhere, because it is simple and effective, yet pleasant to the taste and acceptable to the system, and not only prompt in its beneficial effects, but also wholly free from any unpleasant after-effects. It is frequently referred to as the remedy of the healthy, because it is used by people who enjoy good health and who live well and feel well and are well informed on all subjects generally, including laxatives. In order to get its beneficial effects, it is necessary to get the genuine Syrup of Figs, which is manufactured by the California Fig Syrup Co. only.

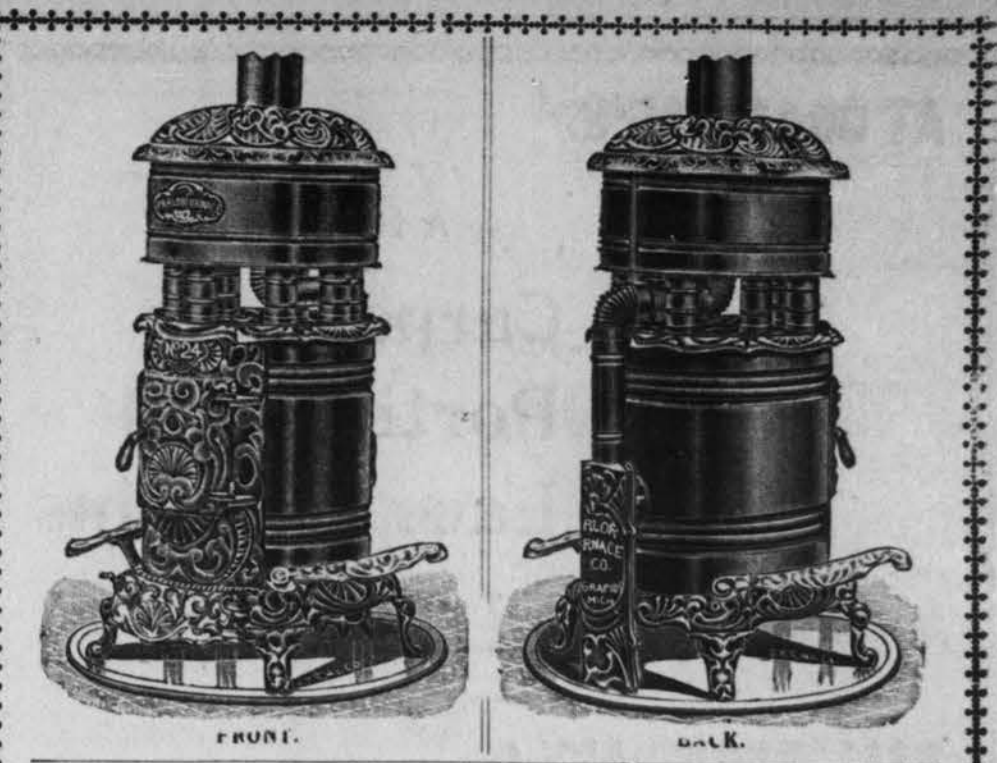

Brings the bloom of youth to the faded cheeks. Drives away headache, indigestion, constipation, makes health beautiful womanhood. Rocky Mountain Tea. The Stafford Drug company.

Doctor Z. Vadhais has offices in the Fred block, corner Front and Washington street. A visit is solicited. (10-29-11)

Have you seen the Aetna's new policy? It is the best and safest investment in the market. F. H. Van denboom, general agent. (10-27-11)

"If you scour the world you will never find a remedy equal to One Minute Cough cure," says Editor Fackler of the Micanopy, Fla. "Hustler." It cured his family of LaGrippe and saves thousands from pneumonia, bronchitis, croup and all throat and lung troubles. The Stafford Drug Co.

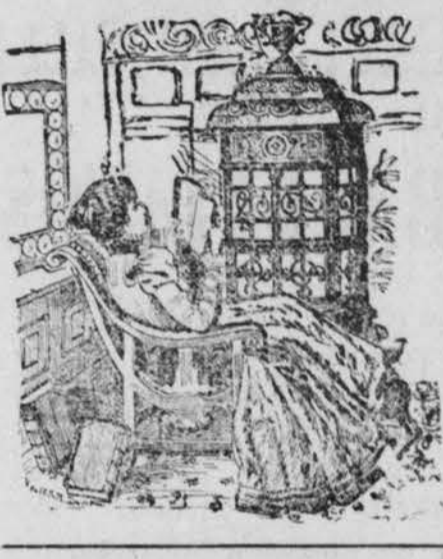

The "Plow Boy Preacher," Rev. J. Kirkman, Belle Rive, Ill., says, "After suffering bronchial or lung trouble for ten years, I was cured by One Minute Cough Cure. It is all that is claimed for it and more." It cures coughs, colds, grippe and all throat and lung troubles. The Stafford Drug Co.

Parlor Furnace.

THE ONLY AIR-TIGHT HEATING STOVE that can not explode, or make creosote. Takes cold air from the floor. Fifty per cent. less fuel required to produce same amount of heat than with any other stove. Creates and maintains a circulation in the room where used. No smoke, dust or flame escapes when door is opened. The most economical and satisfactory heater made. An ornament to any room. For sale by

149-151 W. Washington St. **The Marquette Hardware Co.**

A HAPPY WIFE

makes a happy home for all the members of her household, so make her happy by sending home one of our new style and handsome Gariand parlor stoves, that will cheer up the rooms and save worry, fuel and temper at the same time. "A word to the wise is sufficient." We are selling them cheap considering the prices of iron and labor.

OPERABLOCK DRY GOODS HOUSE

BOYS' UNDERWEAR.

TAKE NOTE.

Our Boys' Underwear at 25cts per garment, any size, is the wonder of all who have seen them. They are worthy of your inspection.

NEW BLANKETS.

Our assortment of New Blankets is unequalled. Look at them.

LADIES' FLEECE-LINED UNDERWEAR.

Our Ladies' Fleece-Lined Underwear at 25cts per garment is the best value to be found in this or any other market. Examine them; it will pay you.

JACKETS.

We wish to emphasize this statement. We show you as good a Jacket in all-wool Kersey at \$7.98 as you will find at \$10.00. It is made in black and Navy only. It is lined throughout and cannot be duplicated.

OUTING FLANNEL.

We open this, Monday, Morning an elegant line of choice new patterns in dark and light Outing Flannels.

In making room for our large fall purchases we have found it necessary to cull out of our original stock many small pieces of goods, which we have made into Remnants and marked them at prices to close quickly. We shall place these Remnants on sale Tuesday morning. They include goods from all departments.

A SILK BARGAIN.

We offer this morning the best value in Waist Silk ever shown. It is one of the latest patterns woven and comes in ten shadings; a Silk sold everywhere for \$1.25 per yard; sale price this morning, 75c.

COTTONS.

Cottons have advanced in prices materially this season. We own a large quantity of ready-made Sheets and Pillow Cases at the old price, and are offering them at very low prices, both in Hemstitched and Plain Hemmed. We carry them in Pequot Mills, Boston Mill, Lockwood and Pepperell, both bleached and brown.

AT BRAASTAD'S.

A New Line of

Carpets, Portiers and Lace Curtains

for the fall trade. The goods are going fast and you will do well to call at once.

FALL GOODS ARE IN

and winter novelties are being received. If you would be properly fortified against inclement weather call on.

F. Braastad & Co.,
ISHPEMING, MICH. Cor. Cleveland Ave. and Second St.

LAST DAYS! LAST CHANCE! LAST CALL!
FOR THE SPECIAL SALE OF

NEW SCALE KIMBALL PIANOS

The number we have sold is a marvel. But there is hope for you if you move quick. We had only bargains when we opened. The last instrument will be a bargain. If you expect to buy within five years, don't delay another hour. We have not asked retail prices. We offer only Pianos as fine in every way as unlimited money and the highest skilled experts can produce, at much less than the Chicago price, delivered in your parlor with hand-polished wood stool, silk scarf, and three months' lessons by the best piano teacher in Ishpeming, on practically two years' time.

Long winter evenings are at hand. With a Kimball Piano in the house, the family will gather around the fireside and with music, song and good cheer home will be a place of pleasure and delight. All on payments of from \$8 to \$25 cash and from \$3 to \$10 a month.

Don't let this chance get away. This is our last call.

Yours respectfully,
A. E. WHITNEY, Gen'l Agent,
Robbins Bldg., Opp. Nat'l Bank.

P. S. Our fine Estey Organ \$35, \$3 a month. Elegant Mason & Hamlin \$45, \$4 a month. Large nearly new oak \$400 Everett up-right piano less than half price, \$8 a month. Open evenings.

**After a Six Weeks' Visit
In Eastern Markets**

Mrs. M. J. Taylor, Miss I. Kelly's sister, has returned to show Ishpeming ladies the latest things in Fall Millinery. Miss I. Kelly leaves shortly to inspect the latest novelties. Their customers will get fine service. Their fall lines are unexcelled. Grand Opening will be held some time next week.

MISS I. KELLY,
MAIN STREET.

Ishpeming and Vicinity.

MET ITS WATERLOO.

HIGH SCHOOL TEAM LOSES TO ESCANABA BY A SCORE OF 17 TO 0.

For the first time this season the local high school football team tasted the bitterness of defeat Saturday. Escanaba won the all-important game handily, making three touchdowns while Ishpeming was unable to score. The victory was decisive, yet it is claimed that the local team was not as badly outclassed as the score would indicate.

Disastrous fumbling was Ishpeming's undoing. In the fifty minutes of play the ball was in Escanaba's possession four-fifths of the time. Ishpeming had it less than ten minutes. The fumbling was the worst the home team has shown in any game played this season. It all occurred at critical periods in the game. Once the ball was lost on Escanaba's three-yard line, when it appeared certain that the local team would score. The chance was lost, however, and Escanaba soon got the ball out from its line.

Escanaba used line plays to advance the ball. They were well executed and it was easy to see that the men were well coached. When Ishpeming was fortunate enough to hold the ball for a couple of successive plays it was advanced toward Escanaba's goal with good speed. Once Randall made a 55-yard run and thrice Donovan passed Escanaba's fullback only to be tackled from behind.

Escanaba got one touchdown in the first half and two in the second. Two goals were kicked, netting the 17 points. The local players admit that Escanaba has a great team and say nothing that detracts from the credit of its victory. At the same time the Ishpeming boys deplore the yellow fumbling that cost them so dearly, and which has never marked the work of the team in previous contests.

The explanation lies in the fact that Quarterback Dawson got in the game Saturday the first time since his injury early in the week. In the practice games before the Escanaba contest Captain Gourdeau handled the ball. His method of playing the position differs from Dawson's. He hands the ball to the runner while Dawson throws it. The change in the men disconcerted the team and was largely accountable for its poor record it made in Saturday's game.

The men are not discouraged. A reverse following a long series of victories does not dishearten them. They are still sure and remember with satisfaction that a second game with the victorious team is scheduled to come off at Union park. With a chance to retrieve their temporarily fallen fortunes in view, it is taken for granted that the park will witness some warm practice games during the next two weeks.

OTHER TRACKS TO BE SHIFTED.

THE CLEVELAND CLIFFS COMPANY FINDS IT NECESSARY TO MOVE A ROADBED.

Contractor A. McDonnell, who is now engaged in laying a spur of the L. S. & I. railroad around the big hills to the south of the Pittsburg & Lake Angeline mines to equip that company so its lake tracks, which threaten the workings of the Lake mines, may be taken up, will do a similar piece of work for the Cleveland Cliffs company. Surveys have shown that the present road bed across the lake bottom has a tendency to sink. It was thought that the underground workings of the Lake mines might be endangered, so the tracks will be taken up as soon as the new spur is put in commission.

The new spur will be laid in a route which will insure the safety of the workings of the mines and no more trouble similar to that now encountered will be experienced. The work for the Cleveland Cliffs company will be done during the next few months. Construction on the Lake Angeline & Pittsburg contract is proceeding nicely. The spur will be about a mile in length when completed. The work has been somewhat handicapped by scarcity of men. A large part of it consists of excavating in the side of hills.

When the Cleveland Lake mine has its new connection the workings under the old Lake Angeline bottom will be safer than they have been for several seasons, and it is probable that no alterations in their surface arrangements will be required in years.

ISHPEMING IN BRIEF.

D. F. Morgan was about the city Saturday.

Ed. Carney and Case Downing spent Saturday and Sunday out at Camp Nims on a hunting trip.

President William G. Mather, of the Cleveland Cliffs company, is in the city on a business mission.

The Mather cottage is being improved by an addition and other changes. It occupies the finest residence site in the city.

The school board has several lots opposite the old school building for sale. The locations are good and the lots should be disposed of quickly.

Florence Curran, who has been at Wetmore for some time, will return to Negaunee the first of November. He will resume his position as pianist in Trombley's orchestra.

The Truan block on Main street will be sold at Marquette from the steps of the court house on a judgment granted Sam Collins by the supreme court. Sam's claim amounts to a little more than \$300.

Clifford's orchestra will furnish music for the Firemen's Thanksgiving eve ball. Souvenirs will be given those attending the function. The supper will be served in the Nelson House. A fine menu will be prepared.

The White Spear Medicine company concluded a two weeks engagement here Saturday night. It pulls out for Muskegon, where a long stay will be made. Many people have been entertained during the engagement by the artists of the company.

There will be a meeting of the Alumni association at the high school assembly room this evening. Some important business will be considered and a large attendance of the members is desired. The project of giving a dance will come up for consideration.

GOES TO SEE THE BIG FIGHT.

"Parson" Joe Pope leaves tomorrow morning for New York, where he will take in the fistie battle between James Jeffries, champion of the world, and Tom Sharkey, the clever sailor lad who aspires to the highest honors in the pugilistic arena. The fight will be pulled off in the Lenox club and it promises to be a battle royal. Joe will have a fine trip, and not a too costly one, as a number of the sporting gentry here are standing part of his expenses in the hope that he will be able to arrange a fistie exhibition between some of the big men in the games to be given here next summer. Joe goes to New York with this purpose in view and will endeavor to get a mill for Ishpeming which will draw thousands of people to the city. None of the big men of the fistie arena have ever kicked up the dust in northern Michigan and it would undoubtedly be a paying venture to arrange a contest for this city, which is central to several sections of the peninsula. Joe will also take in the several preliminary fights. Altogether it will be a great trip for him.

DANCING CLUB FORMED.

A meeting was held Friday night to organize a dancing club which will serve to enliven the coming winter months. A. W. Meyers was selected chairman of the meeting and steps were taken to perfect the organization of the club. A committee was appointed to get after members. There will be a series of eight hops, and two swell dances will be given on a couple of the big holidays. The fee for membership will cover the eight hops, the big dances being extras. The membership fee will be collected in advance and the club will have a good business manager, which will insure its success. The gentlemen who have the formation of the club in hand expect that it will be quite a feature in social circles during the coming winter.

NO MISAPPREHENSION.

J. D. West, of The Peninsula Record, complains that he has been misrepresented in these columns in regard to the sale of his paper. Not at all, Mr. West. The Mining Journal published nothing that was not warranted by the actual facts. The transfer of the Record is simply a matter of days. There was nothing secret about the transaction and the news of the deal was generally known before it was given publicity in these columns. There is nothing criminal about selling a newspaper—and where all this fuss about a simple business transaction?

MUD CAUSES TROUBLE.

During the past few days work in the southwest portion of the Cleveland Lake mine has been at a standstill as a result of an inflow of mud from the Angeline lake bottom. The level was filled and shipments from that section of the mine stopped. Two electric motors were caught. The tie-up in the southwest part of the mine will last several days and ore shipments will be somewhat curtailed by it. Trouble from the mud is experienced constantly, and it is all but impossible to guard against it.

TO CURE LA GRIPPE IN TWO DAYS—Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Who Does Not Envy That Man

who is perfectly at ease with himself and the rest of the world? If his coat crowded his back, his trousers pulled his leg or his vest squeezed him or persisted in twisting him around, he wouldn't be so easy. Details and fit go a long way towards putting confidence in a man. That's our long suit. We look to details.

Canda Street, (9-11-14-15) The Fashionable Tailor.

SUPERSTITIONS OF THIEVES.

Happenings That Are Regarded by Crooks as Omens of Bad Luck.

Professional criminals have many superstitions. Not one in one hundred will commit a theft of any daring on a Friday, or on the 13th of the month. In support of this superstition almost any old-time crook will cite the instance of Charles McLaughlin, alias McLain, an expert hotel sneak and all-round thief who worked in New York city in the early '70s. In 1872 he, a pal named Howard and two other thieves, planned to rob an office in Brooklyn. The only date on which the job could be done with profit and safety was on June 13. On that day the cashier's money drawer would be full and the office force would be small. All the crooks regarded the date dubiously and would have selected another with less prospect of success but for the expostulation of McLaughlin. So the raid was made on the day originally determined upon. It proved a disastrous failure. All the men were caught except McLaughlin, who escaped through a window. Those who were captured were sent to prison for seven years each. McLaughlin never had any good luck after that. He was caught in the Westminster hotel, New York, loaded with plunder, and was sentenced on a Friday, the 13th of the month.

Thieves can tell many anecdotes to prove that Fridays and the 13th of the month are days set aside for ban. For instance they will tell you how Dan Kelly, a bank burglar, who worked in and around Louisville, Ky., in the early '80s, was killed on the 13th of December while robbing a safe in a small town, and how his partner was struck by lightning while making his escape.

Crooks in general avoid black cats and blind dogs. It is regarded as a challenge to disaster and misfortune to kill either. If a thief on his way to commit a theft sees a black cat or is followed by a dog he will probably abandon the job for the time being. If a black cat runs in front of him he will quit work for a week. In 1882, Frank McCormack, James Leonard, Tom Freemont and Mike Duffy, safe blowers who were making their headquarters in Buffalo, went to Lockport one night to rob a safe in the office of a flouring mill which stood close to the Central railway tracks. It was an ideal spot for a burglary, because the noise of passing trains would deaden the sounds made while drilling and blowing open the safe. The quartet were passing through the railway yards about 2 o'clock when a black cat darted across the track's hot two yards ahead of them and stopping in the shadow of a switch house hid himself. All the men stopped. "You can count me out," said Duffy to Leonard.

"You going to let that cat scare you?" asked Leonard.

"That's just what I am," Duffy retorted.

McCormack and Freemont stayed with Leonard. The trio got into the place and had just blown the door off the safe when they were surprised by two men fully armed. Freemont and Leonard were dangerously injured. They and McCormack were sentenced to six years in Auburn prison. Leonard told the story as he related to a Buffalo detective present at the trial.

Most crooks lose their money at some sort of gaming. A thief, especially a house breaker, believes in working while his luck is good. For instance, he will often leave a game he is winning to go out and commit a robbery, believing that good luck will continue to attend him. When he loses and is compelled to go out and rob he is nervous, feeling that his ill luck will continue. If a burglar can touch a hunchback, he is confident that his lucky star will rise immediately.

Once inside a house there are many things which are ominous to the susceptible house breaker. For instance, the sobbing of a child is looked upon as a forerunner of discovery, and many burglars will immediately depart on hearing such a noise. Another thing which is regarded as a bad sign is to get in a room where a clock stops. If it stopped before the thief sees it, no notice is taken; but if it stops while he is in the room he will make haste to get out. Burglar Tom, who twenty years ago was an expert, had great faith in the clock stopping sign and he relates this story: "I got into a house in Montreal one time, and was going through a man's trousers pockets when a small clock in the room stopped. I went on with my search and was about finished when a man in the bed beside me said 'Hands up.' He had a gun and it was pointed at me. I surrendered and did seven years in prison for burglary, first degree."

Pickpockets have a superstition of their own. They believe that to pick the pocket of a one-armed man is followed by bad luck of some sort. They sometimes believe that a run of the hardest kind of luck will fall the thief who robs a blind man.—New York Sun.

LEROY LEWIS, M. D.,
"Dictated to M." Superintendent.
Sold at all first class cafes and by druggists.

RHEUMATISM CURED IN A DAY.

"Mystic Cure" for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. 75 cents. Sold by Frank Pentill, druggist, Marquette. (10-10-11)

To Cure a Cold in One Day.
Take Warner's White Wine of Tar Syrup, the best cough remedy on earth. 25 and 50 cents.

SPUR TO CASCADE MINES. NORTHWESTERN RAILROAD WILL BUILD ONE TO THREE IN THAT VICINITY.

A corps of Chicago & Northwestern railroad surveyors is looking over the country near Cascade preparatory to laying out the route for a spur which it is proposed to extend to the Loraine and Allen mines and the Jones explorations. It will be about a mile and a half in length, but with the side tracks two miles of track will be laid. There is no doubt that the extension will be made. It is not known yet whether the work will be pushed this fall. This will depend on the report of the survey but it is thought that the spur will be completed so as to be available in the spring. Senator Alexander Maitland, who controls the Allen mine, interested himself in having the spur put in. The Allen was explored about three years ago by Nick Laughlin, Captain Joe Broad and other parties. A body of lean ore was found and considerable work was done by these parties, but they finally dropped it. The property then came into the possession of Mr. Maitland, who has done some exploring there the past summer. The results were sufficiently encouraging to make a railroad connection highly desirable.

The Loraine, the second mine reached by the spur, is also looking very well. This property is being developed by Corigan, McKinney & Co. of Cleveland, with Frank Koob as captain. The prospect for this property warrants the railroad company in giving a railroad connection. The two mines have agreed to ship 25,000 tons of ore over the Northwestern road next year. The Jones explorations can be given a connection without loss of time whenever developments there render it advisable. Work is being pushed there and the parties interested think they will be able to ship ore next season. The decision of the Northwestern people to build a spur is most important, as it will greatly further the development of what is considered a very promising field for the opening of valuable mines.

KILLED IN A RUNAWAY. Word was received here Saturday morning of the death of John Moe of Swaney. He was killed in a runaway accident Friday afternoon. The remains of the unfortunate man were brought to Negaunee yesterday and were interred in the afternoon under the direction of the Scandinavian society, of which he was a member. He was well known here and a large number were present at the funeral. Moe has been at Swaney for some time. Lately he had kept bar in the Princeton saloon for Harry Pentecost and Charles Johnson of Negaunee. He was going for a load of beer when the runaway occurred. Details of his death could not be obtained Saturday.

SECURES ANOTHER PROPERTY. The American Steel & Wire Company is going to try its luck on Section 12. Through Joe Sellwood of Duluth this concern has obtained an option on the lands which have been partially explored by J. G. Adams and son in the past few months. The option does not have any connection with the work being done by the Jackson Iron company. It covers lands in another part of the section. It is proposed to thoroughly explore these lands. The results of the Jackson work has been encouraging and Mr. Sellwood thinks the prospect on other sections of the same tract are favorable. It is understood that the work will be started immediately and pushed hard with steel wire.

CHICAGO AND MILWAUKEE. The very best of service via THE NORTHWESTERN LINE.

DOES IT PAY TO BUY CHEAP? A cheap remedy for coughs and colds is all right, but you want something that will relieve and cure the more severe and dangerous results of throat and lung troubles. What shall you do? Go to a warmer and more regular climate? Yes, if possible; if not possible for you, then in either case take the only remedy that has been introduced in all civilized countries with success in severe throat and lung troubles, "Boschee's German Syrup." It not only heals and stimulates the tissues to destroy the germ disease, but allays inflammation, causes easy expectoration, gives a good night's rest and cures the patient. Try one bottle. Recommended many years by all druggists in the world. Sample bottles at the Stafford Drug company.

COPPER COUNTRY NEWS.

(Continued from Page Three.)

ing 11,000 acres of land in the heart of the mineral range and having several new shafts sinking, all of which are showing copper in prodigious quantity. The railroad is being built and equipped on the New York Central style, and when completed will be able to haul rock at very low figures, yet earn a profit for its owners. The importance of the line to the district and especially to that portion known locally as the South range cannot well be overestimated.

QUICKSAND STRUCK. TROUBLE ENCOUNTERED AT SOUTH SIDE SPRING NO. TWO.

The trench to drain the ground about the second and larger of the two springs bought from the South Side Mining company last summer by the village of Houghton, preparatory to putting in the masonry necessary to confine the water and conduct it into the mains, has struck quicksand and consequently the progress made now is slow because only a few men can work at a time.

"I wish to express my thanks to the manufacturers of Chamberlain's Colic, Cholera and Diarrhoea Remedy, for having put on the market such a wonderful medicine," says W. W. Massingill of Beaumont, Texas. There are many thousands of mothers whose children have been saved from attacks of dysentery and cholera infantum who must also feel thankful. It is for sale by The Stafford Drug Company.

COPPERDOM BREVITIES. H. L. Ottenheimer came up from Chicago yesterday.

Otto Beehler of L'Anse was a Portage Lake visitor yesterday.

The marble baseboards are being placed in the new Board of Trade at Houghton.

Miss Messner, after a four weeks visit with Houghton friends, returned to Newtonville yesterday.

H. F. Nickerson, of I. E. Swift & Co., Ishpeming, went down to Ishpeming for a few days yesterday.

Mr. and Mrs. Hixson, parents of Bert Hixson, in Siller's store, left for Marquette yesterday after a short visit in Houghton.

James Sinclair, superintendent for Hinkley & Powers, the Houghton High school contractors, made a Sunday visit to his home in Marquette.

Mrs. Emil Zerbel of Houghton left for Marquette Saturday, having been called down by the serious illness of her mother, Mrs. King of that city.

The steamship Kate Butteroni unloaded 300 barrels of oil Friday evening at the warehouse of Carroll's foundry, Houghton, for the National Oil company.

Mr. and Mrs. D. T. Covert, formerly of the New Northwestern, Hancock, left Saturday for their old home in Owosso, lower Michigan, where they will resume their residence.

E. T. Bolton, of the Shailer & Schlegel company, returned hurriedly from Chicago Sunday and it is inferred that his company has further work in sight in the copper country.

J. A. Smith, of the Michigan Granitoid Pavement company, has the new ten-foot walk in front of the Sheldon-Culver block well under way, part of it being already surfaced.

Ernest Bollman, the Calumet capitalist, and Ben Wieder of Hancock returned Sunday from their two weeks' trip to the big Bolman farm near Rapid City, S. D., the Black Hills and the famous Bad Lands.

Nearly \$1,000 are to be expended in procuring new furniture and fittings for the county offices, mainly in the headquarters of the treasurer and register of deeds. The circuit judge's room is also to be refurnished.

A fine cow belonging to W. H. McCurdy died in the street near the court house at Houghton Friday night, and it is supposed that the animal was poisoned, although there is no clue to the guilty party or parties.

Lillian Helmet, who has been attending her mother, now convalescing at Houghton from a very severe attack of typhoid fever, left yesterday for Marquette, where she was called by the serious illness of her grandmother, Mrs. King.

E. W. Delf, agent of the South Shore road at Calumet, went down after his children Saturday evening, who have been staying with his mother at Marquette while Mr. Delf and his wife have been "camping out" waiting for their new house near the depot to be completed.

H. W. Robinson, of the Wyandotte mine, came in Friday evening and went down to Baraga for his wife, who accompanied him back to the mine yesterday. Mr. Robinson is a son of O. B. Robinson, now in charge of the Foley mine, in the Rainy Lake district, and is the supply clerk of the Wyandotte.

The tugs Merrick and Hebard and the Harlem got away all right from Carroll's dock at 6:30 o'clock Saturday morning and went down to the Entry, where, however, they laid all day because of a threatened northwester. At 10:45 that night the run down the lakes was resumed, with very favorable prospects for weather.

Dr. F. C. Runge, Jr., will occupy offices with Drs. Burdon & Mason in the Mason building, at Houghton, until the Copper Range offices on the opposite side of the hall are vacated through the completion of the new Copper Range depot and office building, when he will open his dental parlors there. His furniture is already arriving.

Siller Bros. placed in their new store in the Murphy block, Houghton, yesterday a consignment of fancy wall cases and stove furniture received from Wolf, Sayer & Heller of Chicago. The case placed nearest the door, a handsome piece of oak with cupboard bottom and canopy top, supported on four oak pillars, will be used for bottled goods and is a beauty.

Mary Anderson, employed as a domestic at the residence of Mr. Case, superintendent of the Lake Superior Smelting works at Ripley, is suffering from severe burns sustained through the overturning of a pan of boiling lard on the kitchen range. Mr. Case heard her

screams as her dress caught fire and his prompt response and efforts in smothering the flames with a piece of carpet alone saved her life.

Alex Colombe was discharged by Justice Brand Saturday as a result of the adjourned examination on the charge of selling a team which belonged to his father, the complaint upon which he was brought back from Duluth.

RUSSIAN CAVALRY. In Case of War It Would Play an Important Part.

It seems impossible to doubt that in the event of a conflict between the forces of the Dual and Triple Alliances, a conflict which in the opinion of many, is sooner or later inevitable, the cavalry of Russia would play a role of the first magnitude, by virtue not only of its numerical superiority over the combined cavalries of Germany and Austria-Hungary, to which it would be opposed, but also owing to the unique organization, training and methods of action which differentiate it from the cavalry of any of the great neighboring powers, not less than from that of Russia's ally, France, according to the British Admiralty and House Guards Gazette.

To begin with, Russia is a country extremely rich in horses, the number of which has been estimated by Colonel Soukhotine at 20,000,000, of which at least 1,000,000 are saddle horses fit for the purposes of war, while the authorities of "La Cavalerie Russe," basing his calculations on official returns of 1,078 squadrons and 160,000 horses in the army, shows that the cavalry of Russia would, on mobilization, exceed the combined cavalries of Austria-Hungary and Germany by 25,000 men. The France Militaire also, which has devoted considerable attention to the subject, avers that it is not owing to the consciousness of this numerical advantage alone that the Russian cavalry feels itself to have a crushing superiority over all possible adversaries. It has boldly entered upon an entirely new path as regards organization and military training, there being now left in that huge body of mounted troops, if we include the twelve regiments of the Guard, only two types of cavalryman—the dragoon and the Cossack. As regards the former, to whom it is more and more sought to assimilate the Cossack, the ideal steadily kept in view is to make him an equally efficient fighter, whether mounted or dismounted, in the shock action of the charging horseman as in the fire action of the combatants on foot.

This dual role, only reluctantly accepted by cavalry in other armies, is one for which the Russian is fitted in nature and by the traditions of his race; but the new organizations has, for all that, been scathingly attacked by German and Austrian—especially by German—military writers, whose contention is that a tool intended for two quite different purposes is good for neither and that for cavalry fighting on foot can never be other than exceptional and abnormal. To arguments of this kind the Russians reply that their cavalry, as cavalry, is fully equal to that of any other power, while at the same time, owing to its peculiar organization and training, it is equal, when fighting on foot, to the performance of special tasks with which German or other cavalry would be unable to grapple. It is asserted that this advantage, joined to their numerical superiority, would enable the Russian cavalry to score important successes against any hostile cavalry, at all events in the early stages of operations following mobilization. It is generally admitted, according to the authorities whom we have cited above, that Russia could put in the field 155,000 cavalry to the 112,000 of Germany and Austria-Hungary combined.

GRAFTON LODGE REJOICES.

Saturday It Celebrated the Thirty-First Anniversary of Founding of the Workmen.

MADE THE OCCASION FOR INITIATING A CLASS OF FORTY.

Ancient Order of United Workmen the Pioneer of All American Fraternal Societies—Deputy Grand Master Hollings Speaks.

MEMBERSHIP OF LODGE IN INCREASED.

Saturday was the thirty-first anniversary of the founding of the pioneer of all American fraternal societies, the Ancient Order of United Workmen. The occasion was made one for celebration by Grafton lodge No. 111.

It was not only an occasion of a jubilation among the members, but it marked at the same time a substantial addition to the membership of the lodge. Forty out of a class of forty-seven which was secured here last week, largely through the work of Deputy Grand Master F. C. Hollings, were initiated.

After the initiation, the old members of the lodge and their new brethren sat down together at the banquet table and enjoyed a bounteous feast, followed by a smoker. Several members of the lodge contributed to an enjoyable musical program. There were also several addresses. The principal address was made by Deputy Grand Master Hollings, who spoke in part as follows:

"My Brethren—it has been truthfully said that fraternity never cast a shadow upon a home, never wounded a human heart, and never wronged a human soul. Fraternity is never deaf to the cry of the needy, never blind to the wants of the deserving, and its broad and noble heart ever responds to call back the erring, to aid the distressed, to rebuild the human race.

"Thirty-one years ago today, the foundation of a noble edifice was laid in Meadville, Pa., by John Jordan Upchurch and several other men in the ordinary, common walks of life. The title given was A. O. U. W., Ancient Order of United Workmen. The coming of that order has enlarged the usefulness of mankind. It had a large share in progress of civilization. The A. O. U. W. was the pioneer of fraternal beneficiary orders on this continent. It was the magnet that drew the mind of the masses to the protection of their homes. From its first introduction it has been honest, true and faithful in the performance of its duties. Every promise has been fulfilled and today, after thirty-one years of progressive advancement, it stands as a living monument for the great cause of humanity, the brightest jewel in the diadem of fraternal orders, and one of the moral levers of the Nineteenth century. Its banner floats proudly in the van of all the fraternal orders in the land. Under its broad folds are numbered over half a million members. Its contingent fund amounts to millions of dollars, thereby placing the entire order to the back of every certificate for the fulfillment of its obligations.

"The coming of the A. O. U. W. was the signal for the formation of numerous similar societies, which later formed into a fraternal congress, the report of which shows membership in the forty-six orders represented in the congress at the close of the year 1898 of 2,185,586; of these there were 122,613 social members. The amount of protection in force at the close of 1898 was \$3,620,261,200, and the amount of benefits distributed during the year was \$32,213,868.02 at an annual cost of about \$9.35 per \$1,000 of protection. The A. O. U. W.'s share in this distribution during the past year was \$7,678,346.75, which means about \$22,000 per day, \$2,000 per hour or 24 cents every second. It has paid out to its beneficiaries during the past thirty-one years, in round numbers, \$95,000,000, and more than \$5,000,000 in addition has been contributed to charity. The Star of Hope has shed its rays into many places, and the A. O. U. W.'s protection has passed the threshold of 52,000 homes. Thousands of burdened lives have been made lighter, and thousands of gloomy homes have been made brighter by the virtue of the opportunities presented through the medium of fraternal orders.

"And my brethren, we are here tonight to celebrate the thirty-first anniversary of the good and noble order that was founded by John Jordan Upchurch and his co-laborers, and we thank God that their works have lived to bless mankind."

CABLE IS LAID.

Supt. George D. Sherman Returns and Tells How It Was Done.

George D. Sherman, superintendent for the Michigan Telephone company in

EARNED, NOT BOUGHT.

Such is the Reputation of "The Little Conqueror" in Marquette.

How hard it often is to earn and maintain a good reputation and how easy it is to lose one. As with a man's reputation, so it is with other things of life. Some things achieve a reputation which stays with them. They are founded on intrinsic value. They face the public backed up by honesty, and work their way quietly but thoroughly. Marquette people want no better proof of the merit than is contained in the following experience of a citizen:

Mr. C. Young, of 127 East Michigan street, painter and decorator, says: "I had such pains through my back and loins at times that I could scarcely keep at my work. The kidney secretions became affected, were highly colored, unnatural, irregular and deposited a heavy dark sediment. I could not rest comfortably at night, lay awake for hours at a time, and was rarely able to secure more than three or four hours sleep during a night. I saw Doan's Kidney Pills advertised, procured them at the Stafford Drug Co.'s store, and began to use them. I felt relief almost at once. They relieved the irritated condition of my nerves. I was able to enjoy a good night's rest, and arose in the morning feeling strengthened and refreshed."

Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S. Sent by mail on receipt of price by Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S. Remember the name, Doan's, and take no other.

the upper peninsula, is back from St. Ignace, where he spent last week supervising the laying of the company's cable across the straits of Mackinac.

Mr. Sherman says the job was a great success. The cable was laid from a lighter towed by two tugs. The six miles of cable required to reach across the straits was coiled on the lighter and paid out as the tugs towed it over. The slow part of the work was at the starting and landing, particularly the latter. After the lighter was well under way the cable was paid out at the rate of a mile in twenty minutes.

The route followed by the telephone company in laying its cable is not that which is used by the Western Union Telegraph company. That company uses the shortest route but it is over a rocky bottom, where these jams in the spring grind the life out of the cable. Of course, once the insulation is cut and the water can touch the wires the cable is worthless. The telephone company took charts of government surveys which show the character of the bottom and mapped out a route for its cable the entire distance over sand and clay. The expectation is that when the ice jams come in the spring the only effect will be to imbed the cable into the bottom. That done the cable will be practically indestructible, whereas the Western Union company has had to lay three cables in the past twelve years.

The greatest difficulty which was experienced was in landing the cable on this side of the straits. The water approaching the upper peninsula side is so shallow that the lighter could not be brought nearer than a thousand feet to shore. A landing was effected by tying a rope to the end of the cable, then taking the rope ashore in a boat and having a crew of men haul the cable in. As the cable weighs seven pounds to the foot it was a hard tug for the twenty-four men who pulled on the landing ropes.

On either side of the straits where the cable comes ashore it passes through a box of tar, so that at no place is it subject to the alternate action of both water and air. Every possible precaution has been taken to keep the insulation from rotting and becoming worthless.

Superintendent Sherman says the company is fast securing the 500 men for whom it advertised a short time ago. Some of them are being picked up in the upper peninsula and most of them are coming across from the lower part of the state where times are not so good nor jobs so plenty. The company has a man stationed at St. Ignace who is doing nothing else but hire men as they land from the boats and organizing them into crews. The number so far secured is about 400. The superintendent declines to hazard an opinion as to the time when the line will be completed to Marquette.

GREAT BIG FIRE.

Blaze in Fraternity Block Might Easily Have Developed Into One.

A fire was discovered in the Fraternity block last evening about supper time which might easily have become a big blaze and resulted in a large loss, running into thousands of dollars. Had it broken out later the fire would not have been discovered in the way it was. As it is the damage to the building is light.

The fire broke out in the closet under the stairs leading from the second floor to the lodge room. This closet is the place where the janitor keeps the brooms, mops and other articles in his cleaning outfit.

How the fire could have caught there is a mystery unless it was set, and there is one strong circumstance pointing to the inference that the blaze was of incendiary origin. The firemen say when they first entered the closet the odor of oil was very distinct and there is a story that an oil can was discovered there.

The blaze was discovered by Fred Heppner. He was in his store below when he thought he detected smoke. He began to investigate and loomed high and low for the fire, but did not locate it till the ceiling above him began to get brown. Then an alarm was turned in and the department promptly responded.

The fire was confined principally to the closet in which it originated, and the stairway leading to the third floor. The water which was poured onto the fire here went down onto the lower floor and drenched the back part of Fred Heppner's store. This is the principal cause of his damage, which he estimates at about \$75. He is protected by insurance. The loss on the building, which is the property of the Odd Fellows Building and Loan association, will also be light. It is fully insured.

IMPROVEMENT NOTED.

Tone of the Copper Market Was a Little Better Saturday.

Saturday's copper market showed a slight improvement over what prevailed the earlier part of the week. Paine, Webber & Co. in their daily letter to the local branch said:

"Boston, Oct. 29.—Copper stocks opened quiet and have remained so throughout the morning; prices, however, have generally been steady to strong. In the early hours New York showed some weakness but as soon as the bank statement came out in which the reserve showed an increase of \$1,500,000, instead of a decrease as had been expected, prices began to harden and the market became active and strong. Don't forget the fact that good copper stocks are selling at prices below what they are worth and that we are going to see a change for the better. Let cats and dogs alone for the present at least and buy good copper stocks. Watch Osceola, Parrot, Wolverine, Boston & Montana, Quincy, Copper Range, Baltic, etc. They are going to show big money. Sales of active coppers Friday: Adventure, 323; Arcadian, 790; Arnold, 50; Baltic, 300; Bingham, 555; Bonanza, 100; Calumet & Hecla, 15; Butte & Boston, 6; Centennial, 50; Cochita, 700; Copper Range, 400; Franklin, 194; Mass, 50; Michigan, 25; Mohawk, 87 1/2 Old Colony, 375; Osceola, 258; Parrot, 620; Quincy, 10; Rhode Island, 50; Santa Fe, 400; Tamarack, 150; Trimountain, 276; United States Mining, 2,100; Utah, 135; Washington, 250; Winona, 250; Wolverine, 285."

KINDERGARTENS.

Division of Opinion on School Board Regarding the System.

The school board held a meeting Saturday afternoon but did not settle the kindergarten question. This will come up at a meeting to be held this afternoon when the full board is expected to be present. However, enough was said at

Saturday's meeting to show that there is a division of sentiment on the board and that the project, at least in its proposed form, will not have smooth sailing.

The board has as another feature of its afternoon session two troublesome contractors' bills. One grows out of a dispute between a contractor and an employee as to wages. The employee claims to have been paid at the rate of \$2 a day while the contractor's bill to the board calls for \$2.50 a day for the same man.

SAD DEATH.

Bessie Spencer, a Beloved and Popular Young Girl, Passes Away.

Bessie Spencer, youngest daughter of Mr. and Mrs. L. M. Spencer, died of typhoid fever at her parents' home on North Front street, early Saturday morning. The funeral was held from there yesterday afternoon, Park cemetery being the place of interment.

Few deaths have occurred in the city which have been the cause of such general grief as this one. The deceased was only sixteen years of age and was a most lovable and sweet dispositioned girl. These traits had endeared her to everyone who knew her. Among her schoolmates she was a favorite. Her death leaves a gap in their ranks which can hardly be filled.

The affection in which she was borne of the floral tributes. There was a profusion of cut flowers besides a number of beautiful designs, noticeable among them being a piece presented by her classmates in the eleventh grade of the public schools, and another one given by the Elks.

HORSES ARE OFF.

Postponed Racing Matinee at the Fair Grounds This Afternoon.

The races, which were to have been held at the fair grounds Friday afternoon, will take place this afternoon, the first heat being called at 2 o'clock.

Two match races are on the program. The first, for a purse of \$200, will be between Nellie R., owned by Robert French, and Maud S., owned by George W. Shaw. The second will be for a purse of \$100 and will be between Joe, owned by William Fassbender, and Sallie D., owned by August Jacobs of Ishpeming. Dr. O. G. Youngquist's horse, Bermuda Prince, was to have been nothing in this second race against Joe but was withdrawn.

Saturday and Sunday's good weather has dried up the track and put it in first class condition for the race. The horse owners guarantee a good sport and are looking to see a nice crowd.

THAT JOYFUL FEELING

With the exhilarating sense of renewed health and strength and internal cleanliness, which follows the use of Syrup of Figs, is unknown to the few who have not progressed beyond the old-time medicines and the cheap substitutes sometimes offered but never accepted by the well-informed. Buy the genuine Manufactured by the California Fig Syrup Co.

THE IMPORTANT FEATURE---

Millinery.

We say important feature, yet that is hardly emphatic enough, for as a matter of fact, this section is the most important feature of the store just at this time. Forethought is on this matter. To guide

that thought and, finally, to fix it on this handsome equipment of headgear, is the mission of this message. This store is prepared to demonstrate to your entire satisfaction that for **Style**, for **Beauty**, for **Worth** of material, and **Price** modesty these items are worthy of all the emphases that we can give them.

All This Week

we shall continue to sell ready-to-wear Hats at prices which put all competitors in the shade. We will also trim to order hats to suit your own taste. We employ expert trimmers, and can please the most fastidious.

Just received: The latest in Turbans, Walking Hats, Fancy Feathers, Trimming Materials, and Ornaments.

Visit Our Millinery Department and Get Satisfaction. **Louis Grabower, Mgr.**
