Washington, May 8 .- The house 1voted most of today to consideration of various private bills recommended from the committee on claims. Ten bills were passed, the most important being one to remit the penalties imposed by the government on the Union Iron works of San Francisco, builders of the monitor Monterey, for her failure to make contract speed.

Before the consideration of these bills was entered upon, the house disapproved of the action of the ways and means committee in reporting against the Tawney resolution calling upon the secretary of the treasury for information regarding the materials used in the manufacture of oleomargarine which is on file in the internal revenue office. The majority of the committee contended that this information could not b furnished under the Revised Statutes. that it would betray trade secrets, but the resolution was adopted. This is preliminary to the reopening of the fight for the Grout bill in the committee on agriculture.
