Pulse Beats.

Put a finger on your pulse. Do you feel the throbbing beats come strong and regular, or are they weak and uncertain? A weak pulse means a weak heart and retarded circulation of the blood. It means stomach trouble, indigestion, pain in left side, dizzy spells, shortness of breath, palpitation, fainting or sinking spells and breaking down of the entire system. If your heart is weak and your pulse irregular begin at once to guard against the coming breakdown by taking

Heart Cure,

The Great Heart and Blood Tonic.

"I had much pain about the heart, palpitation and irregular pulse, and for nearly three months had to be propped up in bed to keep from smothering. I had frequent sinking spells when it seemed as though my heart had stopped beating entirely and the heart had stopped beating entirely and the most heroic measures were necessary to revive me. I had no appetite for food and lost flesh rapidly. Seeing that my doctors were doing me no good I took the advice of an old friend and began taking Dr. Miles' Heart Cure. The good effects were so apparent that I kept on with it, and I am satisfied that I owe my restoration to that valuable remedy."
