

# The Mining Journal.

A. P. SWINEFORD, }  
ESTABLISHED IN 1846.

Devoted to the Iron and Industrial Interests of the Country.

{ THREE DOLLARS PER YEAR  
NEW SERIES, VOL. XI, No. 612.

MARQUETTE, LAKE SUPERIOR, MICHIGAN, APRIL 10, 1880.

### CITY AND COUNTY.

THERE was a slight flurry of snow on the 6th, which melted as fast as it fell, however.

Miss Kate Healey, of this city, left for Chicago, on Monday last, to attend the spring openings. She will return in two weeks.

S. W. GOODALE, circuit court stenographer, is sick in Florida, consequently is not present attending to his duties in court.

The schutes for the new pockets in the L'Anse ore pier, forty in number, were shipped from the shops here, last Monday. The improvements being made upon the pier in question will double its capacity.

The steam barge S. E. Sheldon, Capt. Jim Pellett, will be the first boat here this season, in all probability. She, with her consort, was laid up at the Sault last fall, and there is nothing to prevent her making the run to this port now, unless there is more ice in Waiskai bay than there is here.

HENRY A. STONE, a former resident of this city, and a gentleman who will be well and favorably remembered by many Marquette people died, on the 7th inst. at Warren, Pennsylvania. Mr. Stone was at one time engaged at the Collins Furnace, and afterwards owned and operated a saw-mill in that locality.

We have received a very neatly executed and appropriate invitation to attend the silver wedding of Mr. and Mrs. Alfred Meads, at Ontonagon, on the 16th. We regret to say we shall be unable to attend, for obvious reasons; you and your good wife, Alfred, have our best wishes, all the same—and we'll try hard to take in your golden wedding when that comes off.

ALFRED F. MAYNARD was, on Tuesday last, admitted by Judge Williams to practice as an attorney and counselor at law. Fred. is a talented young gentleman, and besides a thorough course of reading in his father's office, graduated with high honors in the law department of the Michigan University. The MINING JOURNAL will miss its guess if Fred. doesn't make a mark for himself as a lawyer.

The captain of the Anna Smith arrived here Saturday last, and will be prepared to leave anchor as soon as there is a prospect of getting through the canal and river. The Smith, together with her consort, the schooner Brightie, were the last vessels to enter this port last fall, coming from Duluth grain laden, and laying up here for the winter. They will most probably be the first vessels to pass through the canal this season.

MAJ. W. E. CLARKE, formerly connected with this paper, we neglected to state last week, has left us to establish a paper of his own at Monistique, Schoolcraft county. He will have the best wishes of the MINING JOURNAL wherever he may go, coupled with the present earnest hope that his first tax list may be twice as long as the moral law, and contain as many "descriptions" as there are words in one Evert's longest sentences.

CAPT. DANIELS, of the little schooner Tom Boy, left the city last Tuesday for Portage Entry, where his vessel was laid up last fall, for the purpose of rigging her out for another campaign among the explosives. She will probably be the first craft to enter Marquette harbor this season. She is chartered to carry powder and high explosives to the copper district and north shore ports, in which business she was engaged all of last summer.

The condition of Lake street near the Lake View Cottages is simply disgraceful. During the whole winter, water from a leaky water pipe on Fisher street has been flooding the sidewalk in that locality, freezing as fast as it ran down, until there is at least three feet of ice over the street and sidewalk. That water pipe ought to be repaired, and the mayor and council ought to have sufficient influence, in the absence of direct authority, over the water board to effect that much to be desired result.

SOME of the laborers on the D., M. & M. R'y quit work last Saturday, came into town and went into the contractors' office, demanding their pay instantly. It is the practice of the contractors to pay their men on the 15th of every month; consequently the paymaster was not prepared to comply with the demand in this instance, and the men refused to leave the office without their money. Considerable loud talk was indulged in, and threatening language used by the strikers, in the office, and on the street in front of it, until an officer was found and quiet restored. The strikers will get their pay when the regular pay day comes around, and not before.

### CINDERS.

Some of the "dearest spots on earth," are aces—when the other fellow holds them.

More men have been wrecked by the waves of a woman's handkerchief than were ever lost at sea.

They're bad enough, now; but what will it be, oh ye gods, when the spring fever strikes them—the loafers, we mean.

Now we can find out who represents Michigan in congress—Mr. Hubbell has sent a copy of the "Congressional Directory."

A fortune awaits the man who will invent a plan whereby an honest day's work can be extracted from an ordinary Marquette loafer.

It isn't always best to hit the "nail square on the head"—it may possibly be a *faux pas*—the nail on the end of your finger, for instance.

The opposition "directors" now hold their meetings alternately on the Everett block and Crowley corners—and they're well attended, too.

Cinders has been doing double duty this week, and hasn't had time to make himself even passably funny—though he's felt that way, all the time.

Crazy says that the next time he reads and comments on any of the "bloody bounts" recorded in the Chicago Times, it will be in private, or not at all.

The wheel of an ore cart passed over the chest of an unfortunate Ne-gamgee girl without injuring her in the least. That's where the padding comes in to some purpose.

Now doth busy bovine improve the midnight hour—Rounding the sidewalks free, Spurring neither tree nor flower—And adding invariably an insult to the injury she leaves behind her.

Cinders' friend, the law student, claims to have found the philosopher's stone—it is to be content with one girl instead of paying his devoirs to half a dozen, all in the same evening.

The spring time has come, gentle parent, the wise and put new and the girls have had another year's growth, and are liable to be much heavier than when compelled to leave off lagging last fall.

There are an even half dozen corner loafers enjoying the genial spring sunshine in this city, who should be transplanted to a more congenial soil. They'd make splendid traps, if not altogether too lazy even for that delightfully indolent vocation.

Certain ladies in the city have often wondered what made a young gentleman of their acquaintance so very low-legged. He satisfied their curiosity the other day, by telling them that it was because his father made him ride a mule around the farm, and he had to shape his legs to meet the exigencies of the attendant circumstances—fit them to the mule like a set of old fashioned hames!

The warm weather will soon re-suscitate the festive and aromatic bed-bug. The keeper of a hotel in the west part of the county says that if he finds those he kept for the entertainment of his guests last summer, frost-killed, he'll import several regiments from Canada to take their place. He's determined that his guests the coming season shall have just as much sport mashing, bugs as heretofore.

Cinders has got hold of a good joke which happened to a couple of candidates at the recent election in Spurr township, Baraga county. It appears that there are just sixteen voters in the township, no more and no less. James H. Alward and James McKeercher, two glorious good fellows, were the opposing candidates for supervisor, and each was certain of eight votes; how to get the ninth, was the rub. Alward thought he would steal a march upon, and at least checkmate his opponent, if he could do no more, by taking his hired man into the township to board long enough before the election to make him a legal voter. They had the noses all counted, and both were certain of success until the ballot box was opened, when to their consternation it was found to contain eight strange ballots, with the name of James McFarland on them for supervisor, and their own names on the tickets for constable! The other nine votes for supervisor were divided between them, and McFarland's poll, being the longest, knocked down the pessimists. Ah, well, it's only a repetition of the lesson older politicians have been taught—there's many a slip between the ballot box and the office you want—or words to that effect.

Why, of course, every person has a right to be heard through these columns, and Cinders most cheerfully gives place to the following:

Mr. Editor if you cant make the raise of any more important items then slandering the poor working men of Marquette you ought to let the press take a weeks recess and procure another reporter in place of the little peacemaker you have slandered men thats far from Marquette Owen O Neil was not in Marquette when you published his name or is not there now but when he returns you may hear from him or either all the rest but Cork or Kerry it would be a very poor Cork or Kerry man that would be better then your pedant reporter Marquette loafers ought to give him a Cowhiding and then he might give them a rest some of ye that belongs to the Press ought to give the free lovers a breeze and let the poor working men be

Mention in your paper the cost of printing this and you will get pay ye would get a breeze from Jerry O Learey but his wife have triplets from M C D

Cinders is rather inclined to the belief that the above is from the aben of one of the opposition "directors," though not signed officially. Treating the matter earnestly for a moment, Cinders rises to remark that he has fought many a hard battle for "the poor workingmen," and is ready to do

so again when the occasion demands it; but he has no sympathy for the lazy loafers who congregate on the street corners, clothed in rags, refusing to work for the wages honest, industrious laboring men are glad to earn for the support of their families. He respects the honest laborer, and would be very sorry indeed to have one of his reporters class one industrious worker with the loafers who obstruct the street corners, and are an eye-sore to the honest working man and the community in general. These loafers should be thankful that they have been subjected to nothing harsher than ridicule—every one of them is more deserving of the penalty the law provides for the worthless vagrant. When one of them assaults a reporter of the MINING JOURNAL, Cinders will endeavor to be around, and if there isn't immediately after one or more vacancies in the ranks of Marquette's pestiferous corner loafers, it will be because the patient threshing machine he carries may happen to be burdened with an impediment of some sort. Cinders is a funny cuss, and can see no possible use for the corner loafer, except as a target for his satire—but he'll make other than newspaper fun for the public, if one of these self-same, good-for-nothing, lazy loafers ever interferes with a reporter of the MINING JOURNAL.

A NEW barber shop has been opened in John Glaser's old stand, at the foot of Superior street, by a deserving gentleman of Gaulish extraction.

Letters advertised at Marquette, March 25, 1880:

Boyd, Thomas, French, E. M.  
Barker, J. Harris, Geo. A.  
Bross, Ryan, Karthai, Jos.  
Carriere, Augustus, Lavertu, John  
Degrate, Ustache, McKay, Hector  
Desnaw, Peter, Tancerville, Alphonse  
Dufresne, Felix, Weissmuller, Frank.

METEOLOGICAL REPORT for the week ending April 8th, 1880:

DAY.	Mean Daily Barometric.	Mean Daily Temperature.	Prevailing direction of wind.	Average velocity of wind.	Weather.
Friday.....	29.92	36	NW	9	Cloudy.
Saturday.....	29.59	28	NW	7	Cloudy.
Sunday.....	29.70	28	NW	6	Cloudy.
Monday.....	30.04	31	N	6	Cloudy.
Tuesday.....	30.18	27	NW	10	Fair.
Wednesday.....	30.35	29	NW	10	Clear.
Thursday.....	30.97	31	E	8	Clear.
Means.....	29.95	31			

Amount of rainfall, or melted snow, during week is .65 inches.

### MARRIED.

EVELAND—PIPER—On Monday evening, April 5th, 1880, at the residence of the bride's uncle, Mr. E. Ferris, this city, by the Rev. Charles Eaton, Mr. Charles M. Eveland and Miss Rose A. Piper.

In this instance the happy groom is a near and dear relative of the MINING JOURNAL—foreman in the news room. May his Piper never pipe other than the sweetest harmonies, and joy and bliss be theirs until on the Eve of that other Land where joy reigns eternal.

CREDITABLE.—Eugene Swift, a worthy mechanic, who has resided in this city many years, was taken sick several weeks ago and has ever since been confined to his home, his life at times being despaired of. The other day the big-hearted employees of the Iron Bay Foundry, prompted by the noblest of impulses, raised among themselves the sum of \$52 in cash, which they presented to Mrs. Swift. There is an example worthy of emulation among the other mechanics of the city, if, indeed, they have hearts that feel for the distress of one of their fellow-workmen, who is no less deserving than he certainly has been unfortunate.

MR. MCKEOWN, chief engineer of the D., M. & M. R'y, returned to the city on Tuesday. He reports that no additional contracts have been let, though the survey and profiles for fifty miles of the line east of that part already under contract have been submitted to the inspection of contractors, and tenders invited. The final survey of the whole line has been completed, and as soon as the profiles are received Mr. McKeown will make another trip to Detroit with a view of letting the contract for the building of the whole of the line east of Sucker Lake. Whether let as a whole, or in sections, the intention is to have the whole of the work under contract not later than May 1st.

VERY considerable repairs are being made to the Cleveland Co's ore pier, including a layer of new plank and a strengthening of the pockets, thus placing it in the best possible condition for the season's business. The railroad pier has likewise been thoroughly repaired, and will be in the best possible condition when navigation opens. The prospects are that both will be taxed to their utmost capacity, in view of which fact the company is enlarging its pier at L'Anse, and will force as much of the product of the more westerly of the mines as possible in that direction. The addition of new rolling stock will enable the railroad management to handle with ease an increased tonnage, provided no difficulty is experienced from lack of dock facilities, and that contingency is not likely to occur.

The philosopher of the Utica Herald, reaches this sensible conclusion: "One of the beauties and charms of an editor's life is his dead-heading on all occasions. No one who has never tasted

of the sweets of that bliss can begin to take in its glory and happiness. He does over \$100 worth of advertising for a railroad, gets a pass for a year, and rides \$25 worth, and he is looked upon as a dead-head or a half-blown dead beat. He "puffs" a concert troupe \$10 worth and gets \$1 in "complimentary" and is thus passed "free." If the hall is crowded he is begrudged the room he occupies, for if his complimentaries were paying tickets the troupe would be so much in pocket. He does more work gratuitously for the town and community than all the rest of the population put together, and gets cursed for it all the time, while in many instances when a man donates a dollar for the 4th of July, base ball or church he is gratefully remembered. Oh, it is a sweet thing to be an editor. He passes "free," you know.

THE circuit court convened on Tuesday last, his honor Judge Williams on the bench. The array of cases to be tried is not very formidable, and the term is not likely to be a very protracted one. The following cases had been disposed of up to noon yesterday:

Christian H. Buhl, et al., vs. Iron Cliffs company; assumed; discontinued.

Louis Reidinger vs. the Marquette Brownstone company; assumed; trial by court; judgment in favor of plaintiff for \$247.77 damages, and costs to be taxed.

Ambrose Bray vs. Wm. C. McComber and Joseph Winter; assumed; trial by court; argued and taken under advisement.

Marquette, Houghton & Ontonagon Co., appellant, vs. Henry M. Atkinson, appellee; trover; trial by court; argued and taken under advisement.

CONSIDERABLE activity prevails at the brownstone quarry just now where about fifty men in all are employed, including those who are engaged in cutting stone for the new engine house at the Cleveland mine. The demand for the product was never better than at present, and the MINING JOURNAL is pleased to know that the business promises to be fairly remunerative this year. Mr. Jacobs, the superintendent, who was so severely injured by a premature blast last fall, has returned from Chicago, where he has been for treatment the past three months, and will resume the management of the quarry. His many friends will be pleased to learn that his injuries were not nearly so bad as they might have been, though bad enough, in all conscience, the sight of one eye having been wholly destroyed. He is fortunate in that skillful treatment resulted in saving one eye, thus enabling him to actively re-engage in business. Indeed, he is just as well fitted for work as ever, though not nearly so handsome as he used to be.

CITY ELECTION.—The election last Monday was the quietest one ever held in the city, within the memory of the oldest inhabitant. With one or two exceptions the successful candidates had no opposition whatever, and there being but one regularly nominated ticket in the field, the consequence was less than half the vote of the city was polled. James P. Pendill was re-elected mayor without opposition; C. H. Call received a unanimous vote for treasurer, as did likewise F. O. Clark for school inspector. J. H. Prineau, Esq., ran as an independent candidate for justice of the peace, against John G. O'Keefe who had been regularly nominated, and polled a fair vote considering all the circumstances, though Mr. O'Keefe was re-elected by a comfortable majority. In the first ward John Conners was elected supervisor by a majority of 23, and had no opposition for alderman. In the second ward James Dwyer was elected supervisor by a majority of 3, and Patrick Mulally had a majority of 4 for alderman.

In the Third ward Jas. Pickands was elected supervisor, and H. D. Lyons re-elected alderman, without opposition.

In the fourth ward Wm. A. Mahan was re-elected supervisor, and W. H. Williams alderman, without opposition. Jacob Dolf, and Robert R. French, candidates for constable, had no opposition to speak of.

ST. PAUL'S CHURCH.—At last this beautiful edifice is free from any and all encumbrance, the Easter offerings having sufficed to wipe out the last cent of the society's indebtedness. This happy state of affairs is largely due to the untiring exertions of the rector, Rev. E. R. Bishop, who, when he took charge of the parish, found it groaning under an indebtedness of nearly \$25,000. This large amount he has succeeded in completely wiping out, and the church stands to-day wholly free from debt, with a small surplus in its treasurer's hands. At the meeting held on the evening of Easter Monday the following officers were elected:

Wardens—Dan. H. Ball, Peter White, Vestrymen—D. H. Merritt, C. H. Call, Jay C. Morse, Wm. L. Wetmore and Samuel Schoch.

At the same meeting it was voted to increase the salary of the rector to the extent of \$900 per annum, addition-

al—a substantial token of appreciation which will receive the approval of every member of St. Paul's society. Long may the good rector be spared to minister to the spiritual wants of the parish for which he has accomplished so much good, and by the people of which he is so truly loved and highly venerated.

A CARD.—The following card has been called out by the oft repeated inquiry as to what disposition had been made of the money collected for the purpose of erecting a monument to the memory of the venerated bishop Baraga, and is to the point, as far as Mr. Sullivan is concerned. The MINING JOURNAL will take this occasion to say that it believes the money, of which that collected by Mr. Sullivan forms only a small part, is in good hands, and will, in good time, be judiciously and honestly applied to the purpose for which it was subscribed. The receipts referred to by Mr. Sullivan are in our possession, and can be seen by any one anxious to corroborate that gentleman's statement, which is as follows:

[To the Editor.] As I have heard of late that there have been inquiries made by different persons as to what disposition had been made of the money collected by me to aid in the erection of the bishop Baraga monument, I feel compelled to make this public statement in order to do myself justice. I have receipts from Father Kenny for \$86—the entire amount collected. I believe it has been turned over to the Rev. J. W. Jacker. Anyone desiring to see those receipts can do so by calling at the office of the MINING JOURNAL.

JOHN E. SULLIVAN.

ONE of the institutions that Marquette is justly proud of is the Iron Bay Foundry, now one of the very liveliest industrial establishments in the country, north of Milwaukee. During the whole of the winter the entire force was employed fourteen hours a day, in the meantime turning out some of the most substantial plants of mining machinery now in operation in the district. During the continuance of the panic these shops were an oasis in the desert of financial and business depression which cast a gloom of despondency over the entire community, the employes always receiving their wages in cash, the proprietor steadily refusing to engage in the order or du-bial system, through which other laboring men in the city were compelled to accept merchandise instead of cash for their labor. The consequence has been that he still retains the services of the men who faithfully wrought at the lathes and drills, in the foundry and at the forges, during the season of financial depression—and, most probably, a more contented set of mechanics cannot be found in any similar establishment in the whole country. A person entering either of the shops, sees faces that he saw, or might have seen, in the same place, a dozen years ago—a fact which speaks louder than words can tell of the good feeling and unity of interest existing between proprietor and employe, to the mutual benefit of both. The observer of these facts is at a loss which to most admire—the faithfulness of employes of many years' standing, or of the employer who, through a just appreciation of their services, and kind and liberal treatment, evokes a similar appreciation on their part. The relation which apparently exist between employer and employe at these works, is something that might be profitably studied by other proprietors as well as their employes. We do not know that the proprietor in question will thank us for these observations, and rather fear the contrary; but we have, nevertheless, neither time nor inclination to draw the plumbago through what has been written.

There are now employed at these works no less than 100 men in the various departments, and within the past month the facilities have been augmented by the addition of new machinery—one 20-inch slotting machine (the largest made), manufactured by Bement & Son, Philadelphia, and two lathes, one with 30-inch swing and 16-foot bed, and the other with 18-inch swing and 6-foot bed. How it will be possible to accommodate any more machinery, should it be needed, without an enlargement of the buildings, will be a problem; the enlargement, however, is a mere question of time; the rapidly growing demand for the interior gear drums, of which Mr. Merritt is the patentee, together with the other machinery turned out at these works, and which is now given the preference by all the largest mines in the district, makes their material enlargement one of the certainties of the near future.

In addition to an elaborate hoisting and pumping plant for the Republic mine, and an equally elaborate hoisting plant for the Cleveland, including five engines, of which mention has already been made, there are now in course of construction 2-4-foot interior gear drums for the Cornell mine one,

small portable engine and hoisting machine for the Champion, two small portables for the Republic, and a plant of pumping machinery for the Lake Angeline, all of which will suffice to keep the present force steadily employed, full time, until the 1st of July, should no other orders be received in the meantime, which last is an altogether improbable contingency. A number of mines the writer could name have made a temporary make-shift of other machinery, simply for the reason that they could not get their orders filled at these works within the time desired, and with the avowed intention of replacing the drums of other makers with Merritt's interior gear machines at the earliest day practicable. In view of these facts the MINING JOURNAL feels justified in predicting an era of unexampled prosperity for the Iron Bay foundry, which prediction can only fail of realization through a sudden and total collapse of the iron trade.

[To the Editor.] Hereunder please find a full statement of moneys received in the diocese of Marquette towards the Irish relief fund, with the receipts and disbursements. A copy hereof will be sent to every pastor to be read on the first Sunday after its receipt, to his people, for the general satisfaction of all concerned:

The Ishpeming mission has carried off the prize with..... \$ 482.00  
Rockland, Ontonagon Co., mission..... 188.25  
Escanaba, Delta Co., mission..... 127.50  
Hancock, Houghton Co., mission..... 112.00  
Republic and Charksburgh..... 68.15  
Marquette, both congregations..... 56.50  
Sault Ste. Marie..... 56.00  
Calumet mission..... 47.50  
Point St. Ignace..... 47.00  
Muneral Range, Quinnesec..... 40.75  
Negaunee mission..... 40.00  
Monomine mission..... 40.00

L'Anse mission..... 29.10  
Fayette, Delta Co., County of..... 15.00  
Torch Lake, Houghton Co..... 15.00  
Michigan, through favor of Mr. Hickey..... 1460  
MacKinnon..... 3.00

Total..... \$1,622.25  
Champion, no returns, having not as yet a resident pastor, Eagle Harbor, no returns yet.  
Of the above were sent through the First National Bank to Bishop Gillyot, Sigo..... \$500.00  
To Archbishop McHale, of Tuam, Mayo..... 300.00  
Through the Citizens Bank of Marquette, to the Archbishop McCabe, of Dublin..... 400.00  
To the nuns of Kennebec, County of Kerry..... 222.25

All respectfully submitted to the many patrons for consideration.

Another diocesan collection, as announced by my circular, will be taken up on the 4th Sunday after Easter, for the benefit of the orphans. We have 37 in the institute, most of them depending upon the diocese for their support; therefore, I hope that the good people will again rise up earnestly in charity, and contribute liberally towards the support of the asylum. No one will miss the dollar thus spent, because it will bring in fruits a hundred-fold to themselves—except they are remiss in their duties, and again let pass another occasion for doing good.

JOHN VERTIN,  
Bishop of Sault Ste. Marie and Marquette, Mich.

REPUBLIC.—Those down-the-road lawyers have set our people crazy. Amateur lawsuits are all the rage, and a whole crop of Websters and Tildens will soon be ready. A school for jurymen is being organized, and pretty soon we will be able to supply the county with enlightened, unprejudiced jurymen. Will be shipped at so much per head, and it is hoped this will be a thriving business during the summer months.

The Republic brass band intends to go ahead of anything in its line the coming summer; that is, if a taste for music, good instruments, assiduous practice, and healthy lungs may count for anything. The boys have shown good judgment by selecting for practice a room situated near a stream of pure, sparkling water, away from the contaminating influence of the city whisky shops. Often of an evening coming up the valley sweet strains may be heard, while around on the rocks above lovers are perched thinking only of paradise. "That old poet who sang, "of a rustic cabin down in a dell," must have been a prophet.

Our teachers all came back on Saturday night, and were met at the depot by a delegation of little ones, all proud of the honor of being permitted to carry a bundle or package, and to walk alongside of teacher. Some larger ones seem to be proud of that honor also. School commenced again on Monday, and judging from the number of children that seem to be wending their way in that direction, about the time of opening, the school must be full.

Election day passed off very quietly, and though there was considerable opposition between democrats and republicans, Mat. Gibson, democrat, carried the day.

A happy event is expected to come off on Wednesday eve., when Miss Gibson will show her many friends how she intends to keep the Ball rolling. Happy they will be, but bawlers must be expected.

At the Kloman the boys are worried over the fact that they can catch no more rabbits, as the new whistle has scared them all away. VENTUS.

# The Menominee Ranger.

C. E. MASON, Editor.] Devoted to the interests of the Menominee Iron Range. [Saturday, April 10, 1880

### ESCANABA.

J. A. BURNS left for Chicago on Sunday.

J. M. MILLAR returned Saturday from Chicago.

MISS MYRTLE HILLER returned Saturday from a week's visit to Marinette.

A NEW sign of the times was to be seen on Ludington street Wednesday morning. It read "Iron Exchange."

WINEGAR, MILLAR & Co. have sold the 4,000 tons of ice, which they put up at Garden Bay, to the Kankakee Ice Co.

Geo. J. SLINING will be engineer of the J. R. Brooks this year. He is busy at the engine, and will have her in shape soon.

SANDY Thomas went to Chicago Monday, to complete the purchase of the tug Green, which he will run between here and Fayette.

RETURNS from four townships show a majority of 102 for the court house tax, with Ford River and the four towns across the bay to be heard from.

A SLIGHT mishap occurred to one of the freight trains going south on Tuesday, one car being derailed, which caused the passenger to be somewhat late.

THE "open lodge" of the Templars on Tuesday evening was well attended, music, speeches, and the usual caterers making the time pass quickly and pleasantly.

D. N. MCKAY this week occupied the store on the corner of Tilden avenue and Ludington street, and adds one more to the list of grocery stores in full blast.

THE boys are down from the woods, the nights are musical, and days are full of life and spirits as the boys. It has been a long time since they permeated the village in such numbers.

THE lamps in the light house are to be changed to kerosene burners. Heretofore lard oil only has been used, kerosene being prohibited in or about the building. Why not use the Brush light?

CHR. OLESON, having placed a residence upon his lot at the foot of the hill, on Ludington street, will soon erect a suitable building immediately adjoining for his tailoring and furnishing business.

HUNDREDS of new ore cars are coming from the shops below. Train No. 9 brought 130 out of Green Bay on Tuesday, the longest train ever over the road, though part were dropped off on the way up.

CAPTAIN Shepard, of the Mary Jarecki, was in town Wednesday to ascertain the prospects of getting into the harbor. The propeller is fitted out at Milwaukee and the crew shipped. The captain returned to Milwaukee the same day.

GENERAL KILPATRICK will lecture in Royce's hall to-night, on Sherman's March to the Sea. Everybody should go and hear something that will be remembered a life time. He is a fine speaker, and can do justice to an interesting subject.

CAPTAINS Winegar, Burns and Brannigan left on Monday for Milwaukee to bring up the tug Drake. She should be well handled with so many experienced officers on board. Whether all are to be in command or not, we have not learned.

THE condition of the streets and alleys should be looked after at once; some of them will shortly make their presence felt, if they are not attended to. It's early yet, but it is well to be in time and avoid the certain consequences of delay.

MARRIED.—On Wednesday, April 7th, by Rev. H. W. Thompson, Mr. Stanley Tyrell and Miss Ruth Bushnell, all of Escanaba.

Also, on the same day, by the same clergyman, Mr. Peter Hanbury and Miss Anna Hanson, both of Stomington.

JOSEPH LARABEE, employed on a wood train, met with a singular accident Thursday of last week. In moving about he fell between the cars, and his arm caught in the coupling, by which he was dragged some distance before the train could be stopped, sustaining several fractures of the wrist and hand. How he escaped death is a profound mystery.

AN entertainment which makes an epoch in the chronicles of Escanaba society, was given by Mrs. E. P. Royce to her lady friends, on Saturday evening. The cards, which read "coffee, 3 to 7 o'clock," brought together a large assemblage of ladies, who enjoyed the music, the rich collation and the flow of soul with the greater zest because of the absence of masculine impedimenta.

JOSEPH VAN STEIN, working for the Kankakee Ice Co., while following a cake of ice up the incline, holding the hook by which it was drawn up, allowed the hook to slip. Seeing the ice about to fall, he jumped to the side of the incline, and, missing his hold upon the stanchion at which he grasped, fell to the dock below, a distance of about 15 feet, the ice following in fragments.

His hand and hip were badly bruised, and he was shaken somewhat by the fall, but his injuries are not dangerous.

DEER have been plenty in the woods west of here, this spring, and the deep, soft snow made it easy to capture them. Whether any were taken or not, we do not know; but it is a terrible temptation to an old woodsman to defy the game law and the Marquette sporting club, when he sees a fine deer hampered in the snow, and within reach of a club. There seems to be a difference of opinion as to the wisdom of the present game law.

THE ball of the No. 12 club Friday evening of last week was, like everything undertaken by these gentlemen, a very pleasant affair. The attendance was not so large as usual, but the lack of numbers was compensated by the determination of all to enjoy themselves to the utmost. The band discoursed most eloquent music, and every one regretted when the moment arrived that closed the last and best of this admirable series of entertainments.

THE manner in which the ice leaves the bay is worthy of study. The singular process by which it becomes "honeycombed," so that, being struck with some heavy body, it separates into a heap of glittering icicles, is calculated to deceive the stranger into a ruinous confidence in its solidity. The ice is often two feet or more in thickness, and yet, by reason of the countless little channels that the surface water has worn through it, has not strength enough to sustain the lightest load.

THERE'S more live stock in Escanaba than was ever before pastured on so bare a common since Noah was a sailor. Breachy critters, too, some of them, and disposed to make a meal of clothes-lines, old pants and other garments hung out to dry, in default of more succulent nourishment. One of them attempted to sup on the bight of a bed quilt the other day, and blighted the hopes of the good housewife, whose happiness was centered in the successful completion of her spring cleansing.

THE body of an unknown man was found in the water near the Dock at Ford river, on Saturday of last week. Deceased was seen in Escanaba the day before, and it is supposed that he walked to Ford River on the ice, and was drowned while endeavoring to get ashore at the dock. He was well dressed, in the garb of a lumberman, and had evidently been but a short time in the water, as his hair and moustache were still neatly dressed, as left by the barber. He had nothing in his pockets, save two boxes of salve, which were probably to be used in dressing an old sore just above his left ankle. Justice Glaser held an inquest which elicited only the above facts.

THE decaying ice has caused the usual number of casualties this spring. George Harris lost a team of mules last week, near Round Island, while trying to reach this place. He had a full load, of some value, which was also lost, and, indeed, he and his companions were fortunate in escaping with their lives. Others, on various parts of the bay have had serious mishaps, and more will probably be heard of, as soon as communication is again open with the other shore. Amable Duroncau lost a horse through the ice near the head of the bay, and we have heard of several who took an involuntary bath by trusting too far the treacherous ice.

THE filling of the ice houses this spring has given employment to many who might otherwise have been without work. It is cold, disagreeable work at best, and a trifle dangerous, withal, hardly a day having passed without some trivial accident reminding the busy workers of what might occur in the way of fractures and dislocations. The block of ice, passing up the incline, frequently takes a direction not in accordance with the wishes of the man behind it, and slides back again, to the great peril of all who are not prudent enough to keep an "eye to windward."

Nothing serious has befallen any one so far, though flying rumors of broken legs and other casualties reached us frequently, last week. Now that the houses are filled, the proprietors look anxiously for the day when they can move their contents southward, evidently not far in the future. The ice trade this year will be quite an item in the port list, as it has already furnished many items for the Port, and should furnish enough of the article to cool all the beer in Milwaukee. It helps to swell the list of industries that will make our village lively this year.

LOCAL politics do not worry any one here at election time. At all other seasons the cry is bitter; everyone lifts up his voice in anguish, and vents his despair of ever seeing affairs conducted as they should be. From the first Tuesday in April until the last Sunday in March the wall is incessant, and there is never a period to the ireful intonations. Every officer is buried beneath a load of obloquy, and every voter is rigidly determined that the next election shall make a change in the administration. A short time before the eventful day arrives the tale bearer must depart, for the strife ceases, and all seem blissfully unconscious that the time has arrived when

they may put an end to their woes. It would seem that all differences had been healed, and a balm applied to every wound, for no murmur is heard to disturb the repose of the incumbent who wishes to "run again." If any man there is so base as to have objections, he carefully hoards them for use after election; for this is a time to call every man brother. But election once over, then the sirenade begins again, and old offenses are brought from their private treasure houses, little conclaves are gathered in alleys and parlors, with woe begone visages, all singing in chorus "plunged in a gulf of dark despair."

ELECTION day passed without disturbance or excitement; in fact, less interest could hardly have been displayed by a corpse. No tickets were put in the field until late in the morning, and these barely obtained a recognition. Only a hundred and thirty-four ballots were cast—the lightest vote polled since Escanaba became a village. Notwithstanding the general apathy displayed, a remarkably good list of officers were chosen. Chas. E. Brotherton was re-elected supervisor, without a dissenting ballot; Robert E. Morrell was elected clerk, F. E. Harris, treasurer, Matthew Stephenson, Justice of the Peace, John M. Wright, Highway Commissioner, Frank H. Atkins, School Inspector, Dr. J. H. Tracy, School Superintendent, and F. E. Bacon, Nich. Welsh, W. A. Denton, and Thos. Ockerlin, constables, by various majorities. The overseers of highways elected were: in district No. 1, H. McFall; No. 2, Clifford Barron; No. 3, John Peterson; No. 4, Peter Oleson; No. 5, George T. Burns. There were 101 ballots cast in favor of the tax for building the court house, and 6 against it. For the constitutional amendment, 70 votes were cast, and 8 against it. One hundred votes were polled for the bridge tax, and but one against it.

ALMOST every one in town has been more or less annoyed by the predatory incursions of lawless cattle—cows, for the most part—that wander about the streets during the night, harassing the owners of shrubbery, ruining superannuated fences, and working havoc among the sidewalks and paths. Many of the animals are adepts in foraging, and have learned some of the most exasperating tricks, such as opening gates by lifting the latch with their horns, and divers others equally well calculated to subtract from the sum of human happiness. Any man may be pardoned for indulging in expletives on the occasion of such an inroad; most men discover the lack of truly expressive interjections in polite English, and resort to choice selections from the modern tongue. Nevertheless, there is a limit beyond which a gentleman will not go; no gentleman will abuse a helpless animal at any time, even his own, still less one of his neighbor's; no man with human instincts would be guilty of such a brutal act as that which we record in this paragraph; yet, we regret to say, it is not the first of the kind which has occurred in the village of late. On Monday morning some one maimed a cow belonging to Tim. Killian by cutting her leg—with an axe, evidently—so badly that it was necessary to kill her. It is not known who did it; possibly, it was an accident; but any one who would deliberately commit such an atrocity would as readily set fire to his neighbor's barn, and is a dangerous man to have in the community.

### [To the Editor.]

There was a question asked in the Iron Port last week about the common beverage of this town, (this time I don't mean whisky), which I beg leave to reply to in this manner: All persons who are acquainted with our soil, know its character to be that of a very coarse sand, not possessing any more absorbing power than a sieve; the consequence is, that all waste and decomposing matter that is dissolved by the rains are carried down, through this open sand sieve to the level of the water of the lake. Having reached this point they remain where they are until slowly absorbed by the mass of water in this sand; the sand on all sides acting as a barrier to prevent changes of level by changing winds from carrying away this dangerous matter. When open wells are used this poisonous matter must of necessity find its way into them, and with drive wells the case is nearly or quite as bad, for, when water is withdrawn from a point below the general level, that which is above will find its way down, by force of gravity, more readily than that at a distance can, latterly, without the same force. As our population increases the town will be endangered to a greater extent, simply because a greater amount of sewage is made which remains permanently with us—out of sight, it is true, but only a few feet away from us at best. For this state of affairs the only and proper remedy is in getting a supply of pure water from such source as is at hand. I. A. POOL.

You can get lettuce, onions, radishes, cucumbers and strawberries at reasonable prices. Just received, fresh and nice, at Atkins, McNaughton & Co.'s. w1

### NORWAY.

A singular case of cerebral hernia has occurred in the practice of Drs. McLeod and Kimball. Mention was made some time since, in the Ranger, of the case of a boy named Bushau, 16 years of age, who was struck by a rock thrown from a blast at the Saginaw mine, causing a fracture of the skull which necessitated an operation. Several large pieces of bone were removed, and the patient has survived up to this time—over eleven weeks—though no hopes are entertained of his final recovery.

An accident occurred at the Stephenson mine by which John Fenlan lost his life. He was working under a projecting mass which was supposed to be safe, but a blast near by shook part of the rock down upon him, crushing his skull so badly that he died within an hour. He left a wife but no children. An inquest was held which exonerated those in charge of the mine, and the mining company bore the expense of carrying his body to Plattsburg, N. Y., whither his wife wished it taken for burial.

SCHOOL re-opened on Monday, with an enrollment of about 90 pupils.

Dougherty's building, intended for a flour and feed store, was ready for the siding and shingles on Saturday. The building was placed on posts which were not planted below the frost line, and the warm weather caused them to settle unevenly, swaying the house to one side, and on Sunday it fell with a tremendous crash. It will be rebuilt at once.

We were in error last week in stating that Mr. Bush had sold his hotel. He has disposed of his saloon only, and will open the hotel himself in a short time.

D. E. LaRue returned Monday from a short trip to Humboldt. We learn that a telegraph office will soon be established in the store of Messrs. Crane & McElroy.

Next to a depot, Norway needs sidewalks and crosswalks. They will soon be built.

Monday was election day, though few appeared to know it.

### QUINNESEC.

Election day passed off quietly, and the following officers were elected without opposition: Supervisor, Elisha Morcom; clerk, Hugh McLaughlin; treasurer, James H. Molloy; highway commissioner, William Dickie; sup't. of schools, John A. Kruse; justice of the peace, Charles B. Knowlton; overseer of highways, Thomas Hay; constables, Edward Brockington, Patrick Burk, John P. Dunseth.

James Hanley returned from Cleveland on Sunday.

H. D. Fisher passed through here Monday en route for Wisconsin.

H. J. Bebeau and J. F. Atkinson left on Tuesday for Chicago and Appleton.

Some unfavorable comment has been made concerning the location of the Miners' hospital at Quinnesec. Indeed, it has been asserted that those whose duty it was to determine the site, did so locate it merely to further personal ends. This, to any one who will reflect, is an absurdity. The site was determined on, after mature deliberation, as likely to be nearer the center of the mines during the coming summer than any other point that could be selected. A great many men will be employed in the vicinity of Quinnesec, and to the west of it—far more than one or two hundred—and it is believed that no wiser choice could have been made, in view of the existing circumstances.

### WAUCEDAH.

Mr. James Mix, of Kankakee, Ill., is about to put in machinery and explore the south half of section 15, north of the Emmet mine. He will also explore on the southeast quarter of section 17 and north half of section 16. Mr. Mix is an energetic business man, and we expect soon to hear of a find on some of his options.

Election was sharply contested, and resulted in the choice of Thomas Roberts, supervisor; Daniel Fitzgerald, clerk; Franklin S. Milbury, treasurer. Mr. William Walker, aged 65, had the misfortune to cut his hand badly with an ax some time since, and on Thursday Dr. Fortier was obliged to amputate a large portion of it.

For new rates of passage to Europe by the White Star line, go to C. L. Anderson, Norway.

E. S. GAGNON is making ready for the grand rush next week, when he will dispose of a new and large assortment of silver-ware and jewelry at astonishingly low figures.

L. D. MCKENNA is the Agent for Schlitz Brewing Co., Milwaukee Lager Beer.

### PETROLICA!

The Wonderful Hair Restorer.

There is no Hair Restorer in existence that has the same reputation that Petrolica has. It has been perfectly successful in making hair grow on bald heads, eradicating dandruff and curing head-itching. You can prevent baldness by using Petrolica, which is cheaper than ordinary hair oil and is better for hair dressing. It cures scalp disease; it cures chapped hands; it cures chapped face; it will keep your hands and face soft and smooth; it is free from all poisonous drugs; it is used to take the scurf from the scalp of infant babes. Satisfactory proof can be furnished for any claim that is made for Petrolica. Address all orders to  
**ALFRED BLACK, Oshkosh, Wis.**

**MERCHANT TAILORING.**  
The Old Pioneer Clothing House of M. O. Boies, Oshkosh, is the place to purchase your fashionable clothing. This house was the first to establish the system now so popular on Lake Superior, of taking measures and having work done at Oshkosh. Thousands of suits made for Lake Superior people in the last ten years, and our customers always satisfied. Every garment warranted, both as regards material and fit. Mr. Boies will visit the district every few months with full lines of samples of seasonable goods. Satisfaction guaranteed in every instance. Wait for Boies, the pioneer clothier. You will save money by doing so.

**LINDEN HOUSE,**  
L'Anse, Michigan,  
H. A. DOWNS, Proprietor.

This house has been refitted and re-furnished throughout, and is the only first-class house between Ishpeming and Houghton. The table is always furnished with the very best the market affords. Sample room for commercial travelers. The patronage of the traveling public is respectfully solicited. The Houghton stages leave this hotel daily. 603m3

**THE LAKE SUPERIOR**

Ship Canal,

**RAILWAY AND IRON CO.**

450,000 Acres of Land in the upper peninsula of Michigan for sale or lease.

**IRON MINES, COPPER MINES, SILVER MINES, SLATE QUARRIES, MARBLE QUARRIES, SANDSTONE QUARRIES, MILL SITES,**

**WATER POWER, FURNACE LOCATIONS (with fuel), PINE TIMBER, CEDAR TIMBER, POPLAR TIMBER, HARDWOOD TIMBER.**

1,500,000,000 feet of PINE TIMBER owned by this company.

These lands were selected by experts, for mineral or timber, at a time when but very little land had been purchased from the Government in their vicinity, consequently the lands of the company are invariably the most desirable for either minerals or pine or other timber in the district in which they lie.

**Menominee Iron Range, Gogebic Iron Range, Ontonagon Copper District, Silver District of Iron River.**

THE MINERAL LANDS of the company are now offered for lease, on reasonable terms, and options given for purposes of examination.

Eight of the best and largest mines in the Menominee Iron district are on the lands of this company: i. e. East Vulcan (two mines), New Vulcan, Curry, Norway, Cyclops, Ludington, and Woods—21, 40, 30—and this number will undoubtedly be increased during the present year.

For terms, lists, etc., apply to

# The Mining Journal.

A. HORNSTEIN, Editor.]

[Ishpeming, April 10, 1880.

HORACE VAN is a frog-eating Frenchman, but he also likes Beans. Horace is the proprietor of a couple of rooms in a little building one door west of the soiled dove cote known as the Milwaukee house, and in these two rooms abideth fourteen boarders. Last Wednesday evening Horace drank a little too much "lush" and went to his roost in bad temper, where he had some words with a boarder named Joseph Bean, which ended in Horace severely chastising the hereinbefore mentioned Bean, also chewing his ear and face. Bean has had Horace arrested, and Judge Kennedy will decide whether Frenchmen have any right to go from whisky to beans without paying heavily for the last dish.

ONE of the most enjoyable events of the season was the calico ball given by Scott Nelson and Miss Hattie Ham, at Austin's hall, last Wednesday evening, the occasion being the formal re-opening of this popular place of amusement, and the invitations for which were issued late last week. Most of the ladies appeared in costumes of calico, and many and varied were the tastes displayed; but all were as elegant as could be made out of pure calico a yard wide. Some of the gentlemen wore calico coats. The music was under the direction of Prof. Fohrman, and of course was first-class. To its strains some fifty or more couples skipped about the hall until long after the time when grave yards yawn, and papas and mamas are in the land of Nod.

SINCE Mr. Swift's election to the mayoralty his office has been besieged with applicants for the position of poundmaster. What there is desirable about the office we can't for the life of us conceive. It must be pure philanthropy, and a desire to benefit the city. Certain it is, however, the old poundmaster should not be re-appointed. He should have been impeached months ago, and as a further punishment for negligence, confined in a den of geese or a hog sty for at least sixty minutes. Let's have a good one this time. Select him without regard to age, nationality or social condition, but make him give bonds for a faithful performance of his duty; also be sure that he has sufficient education to distinguish between a dirty hog and a dirty cow.

LITTLE piggies roam the street, and they grunt at all they meet, so forlorn, that it seems as if they said, mister man, we're not half fed; give us corn. But the filth upon the walk, is as good as different talk from the owner, who we have no doubt would say, they eat barrels every day, and grunt for more. Yes, those hogs that roam about the streets of this city are filth-making birds; but then, they are ornamental and useful, because a town without an overdose of dogs has got to have something for sausage, you know. Yes, gentlemen of the council, we know it is a sin, for us to give you chin, 'bout those hogs; but when we come to think how the dirty birds do stink, we can't help it. If you'll put them in a cage, or use them for sau-sage, we'll shut up. But if you don't appoint a poundmaster who will make it his business to keep them out of our thoroughfares, we hope a herd of them will get in your yard some night, and root the foundation out from under your houses. Perhaps, after a few houses have fallen on you, you will "take a tumble" to yourselves.

MR. HORNSTEIN, the editor of this department of the MINING JOURNAL, and who, owing no doubt to his authorship of "Doggerel" and sundry other touching and sublime poetical effusions, is sometimes styled the "sweet singer of Ishpeming and vicinity," has gone below—some say to get joined, but we don't believe it—and left his work in the hands of an amateur pencil pusher, who has spent nights of agony and days of sadness vainly wishing that something of interest would turn up on which to expand himself. Little has occurred during the week, but such items as have presented themselves we give our readers, hoping they will forgive us for having served them so feebly. Mining news is necessarily scarce, for the reason that we don't know anything about mines, and don't want to, either, if to gain information would necessitate our going down the ladders. We don't like the looks of 'em. We would be culpable if we didn't say that we like Ishpeming, so we say it. It's got a set of business men in it who are made up of numparts enterprise and the balance in push, and we have no doubt that if the city had a few thousand more inhabitants it would cast a much larger vote and have more influence at Lansing. We like the Nelson House, too. It's the best hotel on Lake Superior, and if you don't believe us, ask any traveling man from C-h-i-c-a-g-o—they all stop here. Feeling confident that the editor will never ask us to serve him or you again, we bid you a final farewell, hoping that you may each and all live to eat the hen that scratches over your graves.

THE municipal election this year was a decidedly quiet affair, the streets, owing no doubt to the fact that the saloons were all closed, being almost deserted. Around the different polling

places stood from two to three shivering, teeth-chattering ticket holders, ever ready to button-hole and put a flea in the ears of the voters as they came up to deposit their ballots. Occasionally a beardless youth who is yet too young to vote but who has "influence" and wants to be an alderman sometimes would get excited and deliver himself of a few adjectives to enforce the idea that his man was the man for the place, but aside from this it was a quiet and extremely dull day in the city. All the mines worked their men as usual, with the single exception of the Barnum, which shut down in order to allow employes to do political work. There were two tickets in the field, the Citizens' and the Prohibitory Reform or Temperance ticket—the former headed by William F. Swift, and the latter by Benjamin F. Wright, for mayor. The citizens ticket was elected by a large majority, the temperance people falling somewhat behind their last year's vote. The following are the city officers elected for the ensuing year and their majorities:

Mayor, Wm. F. Swift, 412 majority.  
Recorder, Conrad Carlson, 388 majority.  
Treasurer, John Dillon, 105 majority.  
Justice of the Peace, Henry H. Milford, 466 majority.  
School Inspector, Byron M. Colwell, 491 majority.

WARD OFFICERS.  
In the First ward Wm. C. Uren was elected supervisor over Wm. E. Dickinson, by 140 majority; Wm. Murdock was elected alderman by a small plurality over Joseph Selwood and S. Johnson, as also was F. J. Eggan for constable over John W. Carlson and Francis Vivian. In the Second ward there was no opposition to Chas. H. Hall, for supervisor, he being the nominee of both parties, and receiving the full vote of the ward, 136; Edward R. Hall was elected alderman by 48 majority over Thomas Wolfendale, and Jno. L. Ryan was elected constable, over Frederick Kilgren, by 103 majority. In the Third ward Wm. Sedgwick was elected supervisor over Jno. W. Jochim, by a majority of 96; Geo. J. Fisher is the new alderman, by a small plurality over Chas. McNamara and Wm. H. Watters; Jno. Harbour was elected constable by a majority of 140 over Wm. R. Luke. Rasmus Fagerli polled the heaviest vote of any candidate on the temperance ticket, having received 292. There wasn't a single fight during the whole day, nor did the marshal have occasion to make an arrest for disorderly conduct. Our reporter did, however, see one black eye, but it was probably a case where the sidewalk took a leap into the air and bruised the unsuspecting wayfarer.

HEAVY WAGONS, Carts, delivery wagons, Buckboards and buggies manufactured and repaired in the best manner and on short notice, at our wagon factory.

## FIRST ARRIVAL Spring Stock --AT THE-- ROCK STORE.

We went to Market earlier than usual this season, and by so doing were fortunate enough to secure many of our goods much below prices paid by later buyers. We have marked them to correspond with the cost, thus giving our customers the benefit of our good luck. We have the Largest, Cheapest and best Stock in the city. Come while it is fresh and full.

## Carpets, Oil Cloths, Mattings, Curtains and Shades.

Our Departments are all full of the Latest Styles and Novelties. The Clothing Store is full of READY MADE CLOTHING Furnishing Goods, Hats and Caps and Piece Goods,

And we are prepared to make Clothing to order on short notice and in the latest and best style. This branch of our business is growing in popularity every day.  
The Old Rock Store. Myers, Wright & Co.  
Ishpeming, Mich., March 23, 1880. 607tf.

## The Puzzle Solved!

N	O	R	T

I	N	G	

If you have failed to solve the 15-14-13 puzzle, go to Norton's for the correct solution; and if you are puzzled to know where to get a neat fitting Suit, nobby Hat and fine Furnishing Goods, go to

STORE. NORTON'S.  
Our stock in those lines is the largest and our prices the lowest in the county.  
T. & P. J. NORTON.  
Mathews' Block, Ishpeming. 610tf.

## SELLWOOD Has Removed

To his new store in the POST OFFICE BLOCK, where he is prepared to greet all his old customers and many new ones in his magnificent quarters which are filled with a new spring stock of

## Dry Goods, BOOTS AND SHOES HATS & CAPS, Fancy Goods, &c., &c.

Also a fine line of Staple and Fancy Groceries. New stock arriving daily.  
JOS. SELLWOOD.  
C. H. SEABORG, Manager. 611tf

## Eagle Mills, MANUFACTURERS & BUILDERS.

Seasoned and Dressed Lumber, Ceiling, Siding, Flooring, Lath, Pickets, Dressed and Headed or rough, Shingles, Sash, Doors, Blinds, Mouldings, Brackets; all kinds of Scroll Work, etc. Window and Door Frames, Hemlock Well Plank, Spruce Ladder Stuff, Lagging for Steam Pipes. Bills cut to order. Estimates for Buildings in any part of the county.

F. W. READ & CO.  
Eagle Mills, Marquette Co., Mich.

## Rothschild & Bending, ATTENTION!

Now is the time to secure good

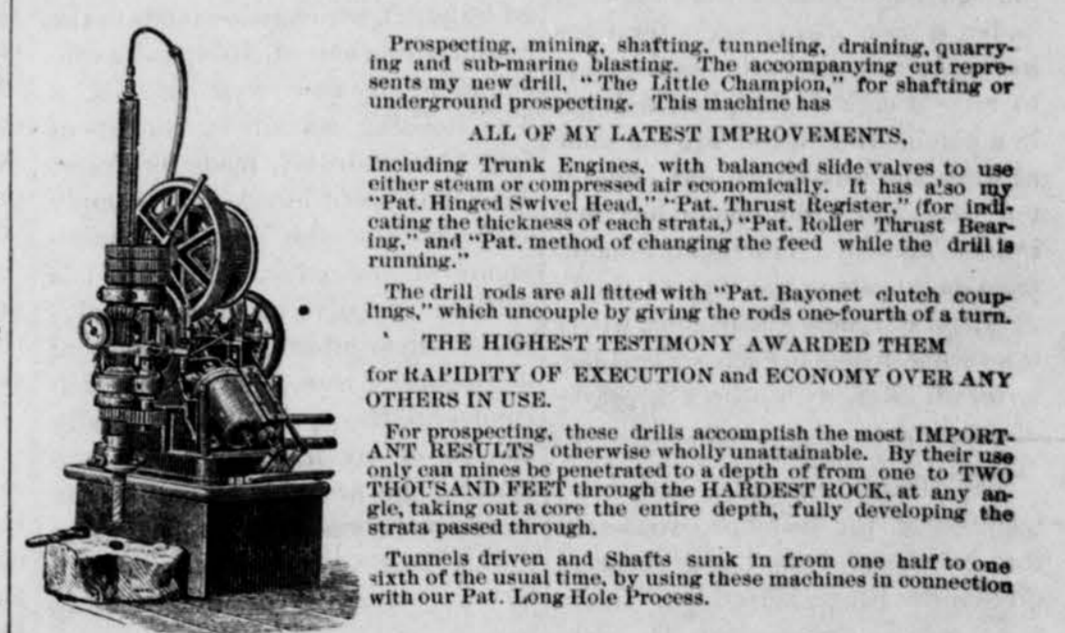

## Wines, Liquors, & Cigars, Bargains

IN ALL KINDS OF FURNITURE, UPHOLSTERY, WALL PAPER, SEWING MACHINES, DOORS, SASH,

Or anything in our line.  
HAGER & JOHNASON.  
CHAS. CAVIS.  
Wishing to accommodate his many friends in Marquette, will give MUSIC LESSONS  
To all who desire his services, at reasonable rates. PIANOS TUNED and organs repaired in a most thorough and satisfactory manner. MUSIC FURNISHED FOR PARTIES.  
Always in stock, a great variety of sweet and sour mash Bourbons and Rye's. Fine imported BRANDIES, GINS, JAMAICA RUM, SHERRIES, PORTS, And all kinds of Cordials: Brandenburg Freres' Claret, and G. H. Mumm & Co's Champagne; C. Lauteren Sohns' Rhine Wines; R. Bruninghaus' Burgundy Wines. Fine Domestic, Key West, and IMPORTED CIGARS, constantly on hand.  
Agents for John Gibson's Son & Co's celebrated Ryes, and for Western Cigar Co. Detroit.

## BUY THE BEST. BULLOCK'S LATEST IMPROVED DIAMOND-POINTED ROCK DRILLS.

Prospecting, mining, shafting, tunneling, draining, quarrying and sub-marine blasting. The accompanying cut represents my new drill, "The Little Champion," for shafting or underground prospecting. This machine has ALL OF MY LATEST IMPROVEMENTS, Including Trunk Engines, with balanced slide valves to use either steam or compressed air economically. It has also my "Pat. Hinged Swivel Head," "Pat. Thrust Register," (for indicating the thickness of each strata), "Pat. Roller Thrust Bearing," and "Pat. method of changing the feed while the drill is running." The drill rods are all fitted with "Pat. Bayonet clutch couplings," which uncouple by giving the rods one-fourth of a turn. THE HIGHEST TESTIMONY AWARDED THEM for RAPIDITY OF EXECUTION and ECONOMY OVER ANY OTHERS IN USE. For prospecting, these drills accomplish the most IMPORTANT RESULTS otherwise wholly unattainable. By their use only one mine is penetrated to a depth of from one to TWO THOUSAND FEET through the HARDEST ROCK, at any angle, taking out a core the entire depth, fully developing the strata passed through. Tumels driven and Shafts sunk in from one half to one sixth of the usual time, by using these machines in connection with our Pat. Long Hole Process.  
LITTLE CHAMPION. AGENT FOR  
Worthington's Duplex Pressure Pumps.  
THE BEST MINING PUMP IN USE.  
Also Water's Perfect ENGINE GOVERNOR. Most durable and economical Governor ever invented.

All inquiries cheerfully answered. Write for what you want to  
602 M. C. BULLOCK, 84 to 86 Market St., Chicago, Ill.

Sold in Marquette by JOHN CROWLEY. Price, 50 cents and \$1.00.  
Go to Crowley's for Mrs. Freeman's New National Dyes. For brightness and durability of colors, are unequalled. Color from 2 to 5 pounds. Price, 15 cents. 584tf

THE MINING JOURNAL.

NO PAPER SENT TO ANY ADDRESS UNLESS PAID FOR IN ADVANCE.

Entered at the Post Office at Marquette, Mich., as second-class matter.

Subscribers ordering their papers transferred to another address should be careful to give the name of the postoffice to which the paper is being sent at the time, in order to secure prompt attention, as otherwise the mail clerk may have to search through the entire list to find the name.

Particular Notice.—The Mining Journal will not be sent to subscribers after the expiration of the time subscribed and paid for, unless the subscription is renewed. Subscribers can always know when their subscription expires by comparing the number of the printed address on their papers with the corresponding number on their receipts.

All letters of a business character, such as advertisements and communications intended for the columns of this paper, should be addressed to "The Mining Journal," and not to the editor personally, as is often the case. Only letters of a personal or confidential nature should be addressed to A. P. SWENFORD.

All advertising sent from abroad must be paid for in advance, whether coming direct from the advertiser or through an advertising agency. Orders from advertising agents will not be accepted unless accompanied by the cash, unless based on our regular rates, less the usual commission and accompanied by the cash. This is a general rule, and will not be departed from under any circumstances.

The Deer Lake furnace is again in blast, and working satisfactorily. There are now five of the furnaces in this county in operation, and the prospects are that others long idle, will be blown in at an early day.

More Big Work.—Major H. S. Pickands, general manager of the Spring Lake and Bangor furnaces, is achieving a still more enviable reputation as an iron maker. His work at the first-named furnace exceeds anything we have ever heard of in charcoal iron-making, the product last week being 357 gross tons, with the consumption of only 85 1/2 bushels of charcoal to the ton of iron made. Where is the charcoal furnace, no matter of what size, that can beat it?

Mex were put to work last Monday at the Marquette & Pacific Rolling mill furnace, and it now looks as if the promise to re-light the fires by the first of June will be kept. New timbers are being laid on the trestle work, preparatory to the reception of fuel on the opening of navigation, and a general cleaning up around the plant is in progress. It is the intention, we believe, to have everything in readiness for a re-lighting of the stack as soon as a supply of coal can be obtained from ports below.

The Excelsior furnace stack was filled on Sunday last and the fires lighted the same evening. This is the old experimental peat furnace, under a new name, no alterations having been made in the stack except to raise it eight feet higher, and put in a patch. Her "lines" are the same as when she was blown out eight or ten years ago. She made her first iron on Tuesday. The fuel is brought from points along the line of the C. & N. W. R'y, below Escanaba, where the furnace company has several batteries of kilns, with others in course of erection.

The Mining Journal made brief mention of the fact last week that the Northern Iron Co.'s furnace, three miles below Marquette, is soon to be sold by the assignee, the company being in bankruptcy. We regard this furnace, in view of the building of the D. M. & M. R'y, the line of which passes close by its stock house, as a most desirable property—one of the best of the kind on the upper peninsula. Just before the panic it was thoroughly overhauled, and such changes made as were necessary to adapt the stack to the use of bituminous coal or coke, but the fires were never lighted, owing to the sudden collapse of the iron market. The plant is in a good state of repair, and we have it from the best of authority that the stack can be blown in at an expense of two or three thousand dollars over and above the cost of fuel. The great stumbling block heretofore has been the instability of the harbor at that point, which precluded the possibility of shipping the product by water directly from the furnace, and the absence of railway communication with Marquette. This difficulty will be overcome by the completion of the first section of the new railway, not later than the 31st of July next, which will not only enable whoever may undertake to operate this furnace to readily obtain all the fuel desired, over the Marquette docks, but will enable them, if they so desire, to obtain an abundance of charcoal from the hardwood forests to the east of them. It can, therefore, be operated to advantage as a bituminous furnace, or can readily be changed into a charcoal stack, in which last event it will have the advantage over any other

furnace now being operated in this region. The sale of this furnace is a matter worthy the attention of capitalists looking for an opportunity to engage in the manufacture of either bituminous or charcoal pig iron.

MEMONINEK IRON RANGE.

HISTORY OF ITS MINES—WHEN AND BY WHOM DISCOVERED—THE PROGRESS MADE IN THEIR DEVELOPMENT—PRESENT CONDITION AND FUTURE PROSPECTS OF THE RANGE, &c.

THE STEPHENSON MINE.

Is the property of the Lumbermen's Mining Co., and is located on the north-west quarter of the south-west quarter of section 4, town 39, range 29. It adjoins the Norway mine on the east, the Stephenson deposit being apparently an extension of the so-called north vein of the Norway, adjoining it on the south, and within a stone's throw of the engine house are the openings of the Saginaw, Sec. 4 mine, the ore in which is just as evidently a continuation of the south branch of the Norway deposit. The Stephenson vein, or deposit, dips to the south, and has an east and west trend, curving slightly to the north-west. The vein crosses the line between the Stephenson and Norway, at a point 120 feet north of the south-west corner of the tract on which the mine is situated, as described above, and crosses the Saginaw line at a point about 400 feet east of the same corner. Thus it will be seen that the company has about 400 feet of vein on the Stephenson tract, the average width of which is about 20 feet. The workings consist of 2 open pits in the west half of the vein, and two shafts—Nos. 3, and 4—the latter at the point where the vein crosses the line into the Saginaw, and No. 3 being 100 feet to the westward. Pit No. 2 is 100 feet west of No. 3 shaft, and 75 feet west of No. 2 is pit No. 1. Two test pits, not far apart, near the southeast corner of the tract, are both in ore, which is probably a part of the main vein or deposit. Operations were begun in August, 1879, but actual mining was not commenced until the following December. At present, work is being done in both the open pits, from which the principal part of the ore mined thus far has been taken. Both shafts are down to the first or 60-foot level, and connected by adrift, which last extends to the Saginaw line east of No. 4, and a considerable distance west of No. 3. The hoisting machinery consists of four 36-inch drums, made by Frazer & Chalmers, of Chicago, and is amply sufficient for the present requirements of the mine. The ore is a soft, blue specular, an average analysis of which afforded 58.90 per cent of metallic iron. Shipments will commence this spring from a goodly amount of ore in stock—a fair estimate of the probable output of the mine for the year being 40,000 gross tons. Railroad facilities are supplied by an extension of the Norway branch track, there being no necessity for tramways or inclines, since during the shipping season the ore can be dumped directly from the skips or buckets into the railway cars. The mine cannot be considered a large one, since the dip being to the south, it will not be many years before all the ore will be worked out down to the Saginaw line. There is enough of it, however, to afford reasonable encouragement to the hope of a large return on the amount of capital invested.

The Lumbermen's Mining Co., which is the owner of other and more promising properties on the range, was organized in August, 1879, with a capital stock of \$100,000—a fact which indicates a determination on the part of the corporators to indulge in nothing save legitimate mining enterprises. Its officers are: President—H. Ludington, Milwaukee. Vice-President—S. M. Stephenson, Menominee. Treasurer—Isaac Stephenson, Marinette. Secretary—Joseph Fleshiem, Menominee.

The Stephenson mine is in charge of Capt. John Carmichael, an old and experienced miner, and the work thus far accomplished would seem to indicate that the company has been most fortunate in the selection of a superintendent.

SAGINAW SECTION 4 MINE.

Is located on the southwest quarter of the southwest quarter of section 4, town 39, range 29, and like the

Stephenson, immediately adjoining the Norway on the east. It is the property of the Saginaw Mining Co., under a lease from the Hamilton-Merryman company, owners of the fee, by whom the first work was done in the winter of 1878-9, the first shipments being made in the following spring, the output for 1879 being 13,465 gross tons. The Saginaw deposit partakes more of the character of a well defined vein than any other the writer has yet seen on the range, and is undoubtedly continuous with the south branch of the Norway, which has been opened, and is being wrought close up to the line between the two properties.—The Saginaw openings being also near the line, and in the northwest corner of the 40 acre tract. The vein has been opened in an open cut over a length of 350 feet, and to a depth of, perhaps, 60 feet. The width of the vein or deposit is such as to render it an easy task to support the walls with timbers, if necessary, though the ore being much harder than that at the other mines, it is perhaps cheaper to leave pillars, as is being done. The ore is of the same general variety so far characteristic of the range, though more compact, and partaking more of the character of the hard ores of the Marquette range. An occasional horse of rock is encountered in the west end, and a thin stratum of rock and mixed ore runs through the vein for a considerable distance to the east, where it disappears into the hanging wall. In the east end of the open cut a shaft has been sunk 35 feet below the bottom, all the way in ore. At the time of the writer's visit, a drift was being carried eastward 150 feet on the vein from the bottom of the open cut, to connect with a shaft which will be sunk that distance from the present east end of the mine. The vein, or deposit, which will thus be opened up over a length of 600 feet, is known to extend still farther eastward, thus making up, to a great extent, in length what it lacks in width. Four derricks are employed in hoisting the ore to the surface, two of which are operated by horse power and two by steam. There are two 30-inch hoisting drums, operating as many derricks, another of which, together with an additional derrick will be added at an early day, if indeed they are not already in place. The mine gives employment to about 75 men, and the ore taken out during the winter embraces from 12,000 to 15,000 tons. A fair estimate of the output the present year, would be 35,000 to 40,000 gross tons.

Capt. John Perkins is mining superintendent, and the appearance of the mine affords ample proof of his skill and practical ability as a miner.

NEW COMPANY.—There was recently organized at Michigamme, in this county, a corporation under the name of the Northern Mining & Prospecting Co., of which J. P. Dousman is president; Hans Blomgren, vice president; John C. Fowle, secretary; Dr. Joseph Vandeventer, treasurer, and Robert O'Neil, mining superintendent. These are all gentlemen of high standing in the community in which they reside, and the new company, the MINING JOURNAL has faith to believe, has not been organized on a speculative basis, but for the purpose of engaging in legitimate mining enterprises on claims, that have already been secured in the best mining districts of Colorado.

Among these claims is the Molly Kelly, in which a shaft has been sunk to a depth of 156 feet, the Adeline, with shaft 125 feet, the Nova Scotia, the Cienus, the Martha, the Concord, with 40 feet of tunnel, and the Enterprise, with a shaft 65 feet deep, in a lode bearing 71 ounces to the ton. These, together with several other claims more recently secured, are all in good localities, enough having been done upon them to prove that some, at least, are of great value. A very high grade ore has quite recently been struck on property within 200 feet of one of these claims, which fact in itself would place a value on the property of the new company, were nothing more known concerning it in that regard. Most of these claims were secured nearly a year ago by Mr. O'Neil, after that gentleman had spent several months in Colorado, and had as fully as possible informed himself concerning mining matters in that region, and at a time when there was little difficulty

in securing a choice of the best undeveloped properties. Mr. O'Neil is now on the ground, and will commence the work of development immediately, while at the same time making an effort to secure for the company, such other and additional claims in the Gunnison district as he may consider desirable. The capital stock is placed at \$1,000,000, representing 100,000 shares, of the par value of \$10 each. Of this amount 10,000 shares, non-assessable, have been set aside for working capital, and will be placed in the market at the low price of \$2 per share. This amount, in addition to the considerable sum already expended in explorations, will, it is believed, be amply sufficient to fully develop the property and place it upon a dividend paying basis. Having a personal knowledge of the gentleman connected with this enterprise, the MINING JOURNAL has no hesitation in commending it to the favorable consideration of any and all who may wish to try their fortunes in a legitimate mining venture. A small amount invested in non-assessable shares of this company may, peradventure, return a comfortable fortune to their purchaser—stranger things are happening every day.

The liberals were successful in the recent parliamentary elections in Great Britain, and as a consequence Beaconsfield will have to step down and out.

The presidential cabinet wants congress to provide a territorial government for Alaska. By all means let it be done; this country ought to have a Siberia to which to sentence the more persistent and pestilential of its politicians.

AND NOW it is charged that congressman Springer, of Illinois, was paid \$5,000 for doing his duty in voting, in committee, against admitting the Minnesota blatherkite, Donnelly, to a seat in the House—to which, by the way, he was not elected by a majority of over 3,000.

BEN. HUSTON, of Tuscola county, will be a candidate for congress in the 7th district—irrespective of the fact that his knowledge of the common rules of English grammar won't bear the least "scrutiny." If the 7th district has no better person to succeed Conger, it had better lose no time in sending for private Dalzell or the immortal J. N.

THAT must have been a sickening sight—the hanging of Stone, the colored wife murderer, at Washington, Friday of last week. When the drop fell, the spectators were horrified to see the body drop, with a dull thud, upon the ground; an examination showed that the murderer's head had been jerked off as clean as if it had been severed with the razor with which he had cut his wife's throat!

WE have heard of ministers doing queer things before now, but Rev. Geo. R. Bennett, of Hillsdale caps the climax. He says "that he will convince a class of 12 at 25 cents apiece, or a class of 6 at 50 cents apiece, that Jesus Christ was not the burden of the old testament, nor the appointed, the righteous branch or messenger of the covenant, and to prove that his claims to be the Messiah are assumed and without foundation."

MR. A. BRUNEL, JR., who made the exploratory survey of the Sault Ste. Marie branch Pacific railway, reports the line as practicable and comparatively easy. The grades will be light, the ground being generally level and the soil mostly good. This projected line will start from a point on the Canada Central extension, north of Lake Nipissing, run to the mouth of Spanish river, and thence along the north passage of Lake Huron to Sault Ste. Marie and Goulais bay.

AT the age of seventeen, Mr. E. B. Washburne was apprenticed to the printer's trade in the office of the Christian Intelligencer, at Gardner, Me. "I am satisfied," said Mr. Washburne, at a late period, "that I learned more in the one year I was in the Intelligencer office than I ever learned in any one year of my life." That's what we thought; else how could the old chap have acquired the art of swearing like a pirate in half a dozen different languages? That he can do it, a certain conductor on the C. & N. W. R'y had ample proof one day last summer.

"R" is accorded another hearing on the Ishpeming Library matter, her article, in the absence of the Ishpeming editor, being given a place in another department. We accord this hearing to the writer, because of the fact that the article is partly explanatory, and with the understanding that the name of the author may be given if asked for. While disclaiming any intended reflection on the private character of the gentlemen she is charged with having unjustly maligned in her previous article, she nevertheless makes some direct and positive charges concerning the management of the library, which she doubtless believes to be true. It occurs to us, however, that the proper way would be, to prefer such charges against the librarian to the common council, or other properly constituted authorities, rather than to the public through the columns of a news-

paper. We hope and trust that we have heard the last of it.

THOSE interested in the Northern Pacific railway will be gratified to learn that the senate committee on railroads has virtually agreed to the bill extending the time for the completion of that work. A special dispatch from Washington to the Philadelphia Press says the bill is handicapped by a similar one in the interest of the Texas Pacific, and although the managers are not necessarily antagonistic, the friends of the Northern Pacific would have preferred to have each bill considered on its own merits. It is not stated whether the bill embraces a clause requiring the company to build that part of its contemplated line lying between its present eastern terminus and the Montreal river. If such a condition is not imposed upon the company the MINING JOURNAL will not be astonished, if the survey, now in progress, will be the end of the Northern Pacific part of the "south shore line," at least until another extension of time is wanted. What are our Michigan congressmen doing in the premises?

FUN WITH THE BOYS.

ESCANABA.—The Iron Port is now so well edited and altogether so neatly printed, that we look with some curiosity to its coming enlargement to the size of the MINING JOURNAL. It will, perhaps, be an easy matter to increase the quantity of mental pabulum the Port is wont to dish out to its readers, but we doubt very much if the Colonel can improve much on its quality. The Port in its present shape is one of our most welcome exchanges; what it will be when enlarged and printed on a new power press we wait anxiously to see; if it doesn't get worse, instead of better, Escanaba will continue to have one of the best local papers in the west. We have our little tiffs with the Colonel, and somehow the harder he hits back the better we like him—because he's a human worthy, &c., don't you see! The people of Delta county should give to their home paper a most liberal and hearty support—it certainly is, to the fullest extent, deserving of it.

Snow, plenty, and a gale of wind with it, at Marquette on Tuesday.

A gale, certainly, which broke up the ice in the harbor most effectually, but every ice-land in Marquette will take his oath there was no snow, except the winter crust, which was fast being dissipated, and has since entirely disappeared. At this writing (Monday, April 5th), the ground is wholly bare, the wild flowers are blooming, and there is nothing to prevent vessels from reaching any dock in the harbor. The port of Marquette has been open for ten days past to any vessel seeking an entrance.

Another statement of the "robbery of the Port" comes folded in the last number of the MINING JOURNAL. Will they never have done with it?

The statement in question was folded in the MINING JOURNAL as an act of justice to recent Grant, who had been assailed by the Ann Arbor cuncti, the paper which circulated the latter's tirade having declined to give the former a similar hearing, except that we know of the controversy, except that we know Col. C. B. Grant to be a high-toned, honorable gentleman, and believe him to be actuated solely by a desire to make himself governor of the state. Col. Grant is a resident of the upper peninsula, and as such, if for no other reason, was entitled to the hearing the MINING JOURNAL gave him.

ONTAGON.—The Miner says that the early bird has arrived, but that the worm is still frozen under.

From the Miner we glean the following concerning the copper mines of that region.

RIDGE Mine.—We have nothing special to report at this mine; everything looking well underground. We had hoped to have visited the mine this week, to report on it, but the state of the roads prevent it at present.

thick above the gates, and gave up the undertaking. Capt. Shay has received word that the engineers of the Sheldon are en route for the Sault overland for the purpose of putting the boat in shape for the season. It is the intention to go up with the Sheldon and consort Ely, get a load of ore at Marquette, and back before boats can get up through Mud Lake.

Geo. W. Brown has been lecturing on the state of the union, and whether Chippewa county did her whole duty—as he understands it—in the election last Monday, is fully known by this time.

We learn that a Southern capitalist has recently bought 15,000 acres of hard wood land near Point St. Ignace and the line of the D. M. & M. R'y, and with the intention of putting up a blast furnace there, as soon as the road is in running order. It seems strange to us that capitalists have not taken hold of these hard wood tracts before. There are over 200,000 acres in Chippewa county of fine black and maple as ever grew, most of it in close proximity to the sawing and planing mills, and the men who get hold of these lands now will have a bonanza one of these spring mornings.

DELTA.—The News volunteers the very unnecessary suggestion to its readers that "the folks" should not read just as if it didn't afford them an ocular demonstration of that fact with its every issue.

John Gordon has been appointed agent at Chisago, for the Anchor line, and will leave Duluth for a residence in the western metropolis.

The Tribune, which is one of the spiciest and the same time the very wickedest paper in the north-west, comes to us, not regularly, but in batches of three or four issues at a time. It is not necessary, however, Mr. Mitchell, to mark the articles you consider particularly able or interesting, and we had a little rather you wouldn't do so, particularly those on orthodoxy, because others seeing the marked paper might set us down as a disciple of your wickedness, which we aren't. And if it's all the same to you, Mr. M., we would rather have the Tribune sent out to us in smaller doses—one to be taken regularly every week, if you please.

The Blast furnace has been started up, for the first time, and is now blowing. The blast furnaces are smoking away like young Vesuvius.

And there's another thing you can do to oblige us, Mr. Mitchell, if you will take it kindly, as it means, and that is to let up in the stinging about gratuitous epithets as "whiffet" &c. They don't look well in print, and ought to be considered beneath the dignity of an intelligent, high-toned journalist.

ITEMS OF INTEREST.

PROF. \$1,200.—To sum it up, six long years of bedridden sickness, costing \$200 per year, total \$1,200—of this cost, \$100 was paid for three bottles of Hop Bitters, taken by my wife. She has done her own housework for a year since, without the least interruption, and I want everybody to know it, for their benefit. N. E. Farmer.

Don't remark that there is nothing new under the sun. There are sixty new styles of spinning bunnies.

PRETTY AND YOUNG. In every feature but the hair, which had grown white from fever. This lady at 35 writes us: "I have used Parker's Hair Balm six months and am more than pleased with it. It has restored the natural color to my hair and given it a silky softness, never than ever before. There is no dandruff, no falling hair, and it leaves the scalp so clean and nice and cool that I can ever so much enjoy my hair, and I thank like my self again." The beautiful, fresh and vigorous hair it produces, together with its property of restoring gray or faded hair to the natural youthful color, and entirely freeing the head from dandruff and itching, surprises no less than it pleases. Sold in bottles at only 50 cts. and \$1.00, by all first-class druggists.

A little girl in one of our public schools, the other day, had occasion to parse the word "anger." Confused in mind, she was completely dismayed, and asked her teacher if "there are any men angels."

EXCESSIVE HEAT. And improprietous food at this season of the year may speedily carry you to the grave. Parker's Ginger Tonic should always be kept in the house, as it is a most valuable remedy for all fevers, with teething children, and not only cures Diarrhea, Dysentery, Cholera, Cholera Infantum, Colic, Gripes, etc., but prevents these dangerous attacks. By its corrective action on the digestive apparatus it cures Headache, Indigestion, Nervousness, Palpitation of the Heart, Watery humors, Rheumatism, Gout, Gravel, Disorders, low spirits, sour stomach and all other symptoms and forms of dyspepsia, regulates the bowels, and causes you to eat all fruits and vegetables of the season. Buy a 50 ct. or \$1.00 bottle and try it. Sold by all first-class druggists.

Fish-woods are beginning to chin the surface of the earth and look around for boys with spades and an old oyster can.

What is the world to a man out of health? Reed's Hair Tonic is the best corrective that can be had.

There is no place like San Francisco for enterprise after all. Last week the wife of a well known business man, residing on Ellis street, eloped. The departure was discovered about 10 o'clock in the evening, and at the same hour the next morning the husband, getting up furniture sold at auction, and delivered up the key of the house to the landlord the afternoon of the same day. He was terribly afraid she would change her mind and return.

N. M. Chace, Wybridge, Ontario, writes: "I have sold large quantities of Dr. Thomas' Electric Oil. It is sold in bottles of 50 cts. and \$1.00, and in fact, for any affection of the throat it works like magic. It is a sure cure for hoarseness, and for all other ailments of the throat."

Your daughter has treated me very curiously. And the young man was lifted by the parental boot from the door of his girl's house to the middle of the street, and as he fell, as he would, and mildly explained that he hadn't finished the word, which was "courtously," and Alphonso was taken under the hospitable roof once more, and his portable in-hospitality was done up in salve, and then sent home to his man in a cask. This is true greatness rewarded and unpiously rebuked.

customers to subscribe to the new book, just out, by the late Gen'l J. B. Hood, published for "The Hood Orphan Memorial Fund," by Gen'l G. F. Beauregard. Many ladies in the south have become book polders and they smile sweetly on their admirers who purchase a copy of the book for themselves, and induce their friends to do the same. See advertisement in another column.

**A FRAGRANT BREATH AND PEARLY TEETH**  
Are easily obtained by cleansing your teeth daily with that justly popular dentifrice, *Sozodont*. Composed of rare antiseptic herbs, it imparts whiteness to the teeth, a delicious aroma to the breath, and preserves intact, from youth to old age, the teeth. Acidity of the stomach will destroy the strongest teeth unless its effects are counteracted with *Sozodont*, and this pure tooth-wash protects the dental surface by removing every impurity that adheres to them. Ask your druggists for *Sozodont*.

"Ah, me!" said a pious old lady, "our minister was a powerful preacher. For the short time he ministered the Word of God among us he banished the insects out of five Bibles."

**MALARIA**—If you live in districts where you are subject to malaria, you should keep your liver and kidneys in perfect order that they may throw it off. The great preventative is the celebrated *Kidney-Wort*. Use it whenever you are constipated or bilious and you will never have a touch of the chills.

Come gentle spring! Emerging from the tomb, accept a sweet eulogium from the printer; Yet—come to think—why, you're a fraud, you tramp!

You've hung around all winter! **ATTENTION** Dairymen who have the reputation of always making gilt-edged butter, get their high prices by using *Perfected Butter Color*, made by Wells, Wilson & Co., Burlington, Vt., by which they maintain the same fine bright color the whole year. The "New England Farmer," says: "It would entirely supersede the use of carrots and all preparations of annatto." It is sold by druggists.

**THE ELECTION**—The following is a list of city, town and ward officers elected in this county, (outside of Marquette city) on Monday last:

**CHOCOLAY TOWNSHIP.**  
Supervisor—L. D. Harvey.  
Clerk—O. D. Bishop.

**ADDITIONAL REPUBLIC ITEMS.**  
Everything quiet at the mine; not a finger squeezed, or a toe crushed for some time, and the mules seem deter-mined to furnish no more items for your readers.  
Our bonanza kings don't feel quite so rich as they did last week.  
None of the candidates on the stump ticket received a hundred votes.  
The nomination ticket went in straight as a string.  
The happy event alluded to elsewhere in these items culminated on Wednes-day evening last in the marriage by the Rev. J. S. Paull, of Mr. Thomas Ball and Miss. Maggie Gibson. Your re-porter not having been an invited or uninvited guest is unable to write an elaborate item concerning the affair, but takes it for granted that the presents were, as usual, numerous and costly. The tin-pan serenaders were out in full force, and gave the happy couple a benefit.  
Your reporter does not object to "Ve-rus" giving him an occasional lift, but rather likes it—the oftener, the better.

**L'ANSE**—At a regular meeting of the village council, held in the engine, house Thursday evening April 1st, there were present, president McKernan, trustees, Messner, Voetsch, Menge, Des-chaines, Smith, and recorder Shea; ab-sent, trustee Trotter. Minutes of the

previous meeting having been read and approved, the committee on streets re-ported that they had caused the culvert on Broad street to be cleaned, and the committee on fire department reported the purchase of five cords of wood for the engine house, and that the fire en-gine was in good order; both of which reports were received and ordered placed on file. The amount of the bonds required of saloon keepers for the ensuing year was fixed at the sum of \$2,000. The following bills were then allowed and ordered paid: Wil-liam Konick, cleaning streets, \$2.25; Alex. Hull, 5 cords wood, \$15. The bonds of the treasurer and marshal were presented, approved and ordered to be placed on file, whereupon the council adjourned.  
The entire people's ticket was elected in L'Anse township on Monday last, as follows:  
Supervisor—Edwin L. Mason.  
Clerk—Patrick C. Murphy.  
Treasurer—Cornelius D. Shea.  
Superintendent of Schools—John Q. McKernan.  
School Inspector—John Q. Barnard.  
Justice of the Peace, full term—Earl Edger-ton; to fill vacancy—Peter Ochsena.  
Commissioner of Highways—Peter Sand.  
Overseer of Highways Dist. No. 1—George Chambers; Dist. No. 2—David Pennock.  
Constables—James Halliday, Jr., Samuel Lloyd, James Watson, Nicholas Demen.  
Pound Master—Nicholas Demen.  
In the other townships of the county, the following officers were chosen:

**ARVON TOWNSHIP.**  
Supervisor—Walfred Been.  
Town Clerk—E. Oust.  
Town Treasurer—Oscar O. Zellen.  
Commissioner of Highways—Peter Hawke-son.  
Superintendent of Schools—Walfred Been.

**BARAGA TOWNSHIP.**  
Supervisor—James Hendry.  
Clerk—Henry Houghton.  
Treasurer—Martin Kelsey.  
Justice of the Peace—Peter Allie.  
Superintendent of schools—Thos. McGillan.  
School Inspector—Nelson Pennock.  
Commissioner of Highways—Anthony Girard.  
Constables—Thomas Seales, Gersham B. Few, August Hansen, Gabriel Feneia.

**SPUR TOWNSHIP.**  
Supervisor—James McFarland.  
Treasurer—John McGrath.  
Frank Foote is very low with inflam-mation on the lungs, but Dr. Turner thinks he will be able to bring him out all right in a few days.  
The schools are again in full blast, with an increased attendance.  
Confirmation services will be held at the Catholic church here-to-morr-ow, by Rt. Rev. Bishop Vertin.  
Somebody is losing a fortune by not starting a lively stable in this place. Horse flesh is in good demand, espe-cially on Saturdays and Mondays.

**BUSINESS NOTICES.**  
To RENT—A good house, in good repair; has ten rooms, and is centrally located. Rent low to a good tenant; possession given May 1st. Enquire of or address H. M. Noble, Marquette. 6127r

**IN THE DISTRICT COURT OF THE UNITED STATES for the Eastern District of Michigan, in Bankruptcy.** In the matter of Cornelius Donkersley, bankrupt. Notice is hereby given that the assignee of said bankrupt has filed a petition in said court, asking authority to settle and compound the claim of the said bankrupt's estate against James Pickands & Co. at the sum of two thousand dollars, and to convey to them all the remaining interest of the said bankrupt estate in the assets of the old firm of James Pickands & Co. for that sum; that it has been referred to James E. Dilliba, register, to take proofs concerning the matter, and to make an order, if all parties consent; otherwise to report to the court for a final order thereon; that Thursday, the 23rd day of April, next, has been appointed as the day for taking such proofs, at the office of said register, in Marquette, at 9 o'clock A. M. Creditors and all others interested are hereby notified to be present at that time, if they wish to be heard in opposition to the prayer of said petition. Dated at Marquette, the 8th day of April, A. D. 1880. FRANCIS M. MOORE, 612w2 Assignee of said Bankrupt.

**TRY A MAGNOLIA HAM!**  
As to the excellence of the MAGNOLIA there can be no question. This brand has been subjected to the severest tests in all climates, and attained the highest reputation wherever used. It has steadily and firmly grown in favor at home and ab-road, and for the reason that it is of superior quality. They are cut in the interest of the consumer, avoiding all waste, cured uniformly, and are just as represented—as near to perfection as any hams have been made to this time.

For Sale By  
**MURRAY & ROBBINS**

**LITERARY REVOLUTION**  
—AND—  
**UNIVERSAL KNOWLEDGE**  
An Encyclopedia in 20 vols., over 16,000 pages; 10 per cent. more matter than any Encyclopedia ever before published in this country, and sold handsomely and well bound in cloth for \$10, in half gorocco for \$15, and printed on fine heavy paper, wide margin, bound in half Russia, gilt top, for \$20—an enterprise so extraordinary that its success, beyond all precedent in book publishing, may be fairly claimed to inaugurate a *Literary Revolution*. The LIBRARY OF UNIVERSAL KNOWLEDGE is a real and the latest (1879) Edinburgh edition of "Chamber's Encyclopedia," with about 40 per cent. of new matter added, upon topics of special interest to American readers, thus making it equal in character to any similar work, better than any other suited to the wants of the great majority of those who consult works of reference, and altogether the latest Encyclopedia in the field. Specimen volumes in either style will be sent for examination with privilege of return on receipt of proportionate price per volume. Special discounts to all early subscribers, and extra discounts to clubs. Full particulars with descriptive catalogue of many other standard works equally low in price sent free.

Leading principles of the American Book Exchange :  
I. Publish only books of real value.  
II. Work upon the basis of present cost of making books, about one half what it was a few years ago.  
III. Sell to buyers direct and save them the 50 to 60 per cent. commission commonly allowed to dealers.  
IV. The cost of books when made 10,000 at a time is but a fraction of the cost when made 500 at a time—adopt the low price and sell the large quantity.  
V. Use good type, paper, etc., do careful printing and strong, neat binding, but avoid all "padding," fat and heavily-leaded type, spongy paper, and extra discounts to clubs, but avoid all resort to make books appear large and fine, and which greatly add to their cost, but do not add to their value.  
VI. To make \$1 and a friend is better than to make \$5 and an enemy.

**STANDARD BOOKS.**  
Library of Universal Knowledge, 20 vols., \$10.  
Milton's History of England, 3 vols., \$1.50.  
Chamber's Encyclopedia of Eng. Lit., 4 vols., \$2.

W. A. JELLISON, Prop'r. EXECUTION SALE. By virtue of a writ of fieri facias issued out of and under the seal of the circuit court for the county of Marquette, in the state of Michigan, to me directed and delivered, wherein Amos R. Harlow is plaintiff, and John E. Sullivan is defendant, against the goods and chattels, lands and tenements of the said defendant, for the sum of two hundred and seventy-eight and fifty-two hundredths dollars (\$278.52), and twenty dollars (\$20) costs, I have levied upon all the right, title and interest of the said John E. Sullivan, in the following described piece or parcel of land, situate in the city of Marquette, county of Marquette and state of Michigan: Commencing at the south east corner of lot numbered one (1), in block numbered five (5), of Harlow's addition to the village (now city) of Marquette, and running westerly along the line of said lot, two (2) rods, thence northerly on a line parallel with Fourth street, five (5) rods, thence easterly on a line parallel with Washington street two (2) rods, to the west line of Fourth street, thence southerly along said Fourth street, to the place of beginning. I shall sell at public vendue, on Monday, the third day of May, 1880, at ten o'clock in the forenoon of that day, at the front door of the court house, in said Marquette (that being the place of holding the circuit court for the county of Marquette), all the right, title and interest of the said defendant in and to said premises, and the hereditaments and appurtenances thereunto belonging, to satisfy said execution, and costs and expenses allowed by law.

FOR BUFFALO ROBES, HORSE BLANKETS, Sleigh Bells, &c. Call at the store of C. McNAMARA ISHPEMING.

J. ROPES, Chemist. Makes analyses of Ores and Minerals. Fire assays of Gold, Silver, and Lead.

WILKINSON & STEWART, Dealer in all kinds of ITALIAN and AMERICAN MARBLES, And Manufacturers of Monuments, Headstones, and all kinds of marble goods.

G. H. ARTHUR & Co., Merchant Tailors. Foreign and Domestic Cloths.

NOTICE! To avoid imposition, purchasers of Waltham Watches will observe that every genuine watch, whether gold or silver, bears our trade-mark on both case and movement.

CHANCERY SALE. In the circuit court for the county of Marquette, in chancery, Peter White, complainant vs. Mary Ann Finney, James Finney, Alfred E. Finney, Walter C. Finney, George S. Finney, Francis C. Thompson and Harriet C. Conklin, defendants. Notice is hereby given that in pursuance of a decree of the said court, made and entered in the above entitled cause on the 2nd day of December, A. D. 1879, I, James E. Dalliba, a circuit court commissioner in and for the county of Marquette, Michigan, will sell by public vendue to the highest bidder, on Wednesday, the twenty-first day of April, A. D. 1880, at eleven o'clock in the forenoon, at the front door of the court house, in the city of Marquette, in the county of Marquette, and state of Michigan, that being the place where the circuit court for said county is held all those certain pieces or parcels of land described as follows, viz: The piece or parcel of land situated in the city of Marquette, in the county of Marquette and state of Michigan, known and described as lot number six (6) of block number seven (7), of the thirty-six acre subdivision of the village (now city) of Marquette, being the land platted by John Burt, Charles Johnson and others, known as lot number two (2), of section twenty-three (23), in township forty-two (42) north of range twenty-two (22) west, dated Marquette, Mich., March 4, 1880.

W. P. HEALY, Complainant's Solicitor. THE C. & N. W. Ry has furnished a new coal burning switch engine for this city. It is No. 202. THEODORE Prostinske, the man so severely injured at the Saginaw mine last week, is still alive, and the physicians have hopes of his recovery.

The Mining Journal.

Ishpeming, April 10, 1880. [A. Hornstein, Editor.]

NOTICE TO CORRESPONDENTS.—Communications for the Ishpeming columns must be sent to the editor of this department to receive any attention in the future. No notice whatever will be taken of communications designed for this department unless this rule is complied with. No exception will be made in favor of any person.

C. H. HALL returned on Tuesday from Ohio. F. P. TYLLSON has got an elegant stock of wall paper; go and see it. GARDNER GREEN, president of the Deer Lake Iron and Lumber company, is in the city this week.

THERE is only one man in Ishpeming opposed to increasing the governor's salary, and he voted no. MARSHAL McVichie has been confined to his house for the past three days with a severe cold.

THE regular weekly social of the Waltz club will be held at Austin's hall next Wednesday evening. A GREAT many blonde emigrants have arrived in the city during the week. There's work for them all.

C. H. SEABORG, has returned from below where he has been purchasing goods for Selwood's already well filled store. Both the Excelsior and Deer Lake furnaces have gone into blast. The Deer Lake furnace made its first iron on Sunday last.

A SLIGHT fall of snow on Monday and Tuesday, with the bright sun later in the week, has added mud to mud, and now it's all mud. THE Lutheran congregation have been putting a new and very tasty matting in the aisles of their church, and the synagogue looketh heaps better.

CAPT. JNO. DUNCAN, superintendent of the Calumet & Hecla mine, and wife, were in the city Tuesday and Wednesday. They are on their way south for a visit. CHILDS, the Marquette photographer, has had his man Friday up here the past week making arrangements for the opening of a branch gallery in this place for the summer.

MR. H. A. BURT, of Marquette, sprained his ankle quite severely last Monday evening at the Excelsior furnace, by a fall. With the aid of a ten foot pole he manages to walk. MARRIED.—Mat. Dennison and Miss Johanna Wahl were married last Tuesday by the Rev. Father Brown. We hope that ere a year of wedded life has passed they'll have music in the family.

THE Nelson house verandah is being completed by the addition of a railing around the outer edge. When completed it will add much to the beauty of this popular hotel. REV. J. F. BORG will deliver a temperance sermon at the Swedish Lutheran church, in the Swedish language, next Sunday evening. A cordial invitation is extended to all Scandinavians, or any one else who desires to attend.

MAJ. Gen'l Kilpatrick delivered his second lecture on "Battle scenes of the rebellion," in Austin's hall last night to a somewhat better audience than on his previous visit. All who attended his lectures here speak of them in terms of highest praise. HENRY HEISLER, Milton's bartender has discovered a new method for changing a weak growth of hair on the upper lip to the most gorgeous mustache. If it will work on other young bloods as it does on Henry we'd advise them to try it. He simply ties them up in knots on retiring for the night.

TRAVELERS coming down from the copper country report the ice in Keweenaw bay as unsafe and abandoned by the stage. The first ten miles above L'Anse is traveled on wheels, but the balance of the way is covered with snow, and the sleighing will last some time yet. WALSETH & TISLOV have just received a fresh consignment of new milch cows, which they offer for sale at reasonable rates. We hope persons purchasing these beasts will not forget to turn them into the streets during the day. It gives tone to the town, you know.

MR. GYLLING is making some much needed improvements in his hall, by fitting up the rear part of the first floor for dressing rooms for the accommodation of dancing parties. When the improvements are completed it will make a very desirable place in which to skip the tru-la-loo. THE Ishpeming branch of the Marquette chassers will give a select hop at Austin's hall next Friday evening, the 16th inst. The object of the ball is to have a good time, and to raise funds to aid in defraying the expenses of the company, who have to furnish their own armory. Let all who receive bids go, for there'll be music and some 'oppin', sure.

"JUDGE" Platt, of Beaver Dam, Wis., an old and much esteemed commercial traveler for Henry Walsh & Co., New York, died suddenly of apoplexy at Rockland last week. He remains passed through this city last Monday, en route for his late home. A large number of commercial men at the Nelson deeply regret his decease, for he was a jolly good fellow, and they all liked him. CAPT. W. E. Dickinson, for many years a member of the school board, has tendered his resignation, which same has been accepted, much to the regret of the people in general. The captain was a faithful and efficient member, and the absence of his counsel will be felt by the board. But such is life. When you think you've got a man where you want him, he generally gathereth himself together and skippeth.

THE horse belonging to Pat. Lyon, the drayman, which was injured severely last week by a collision with Archambault's horse, has since died. Patrick mourneth, because that horse was a good mare and earned him a respectable living. Don't cry, Pat; suthin' or other will turn up. LATER.—Mr. Archambault has paid Patrick \$180 for the loss of his horse, and Patrick is happy once again.

THERE is at least one man in Ishpeming who took an interest in the election last Monday. He was sick in his downy couch, and unable to vote in person, so he sent his wife to do the business by proxy. It puzzled the inspectors, being the first time the question had been presented to them. They finally decided that the man was "off his base," and wouldn't let his wife vote. She went away disappointed and somewhat mad, mumbling something about paying wash bills. We didn't get on to the drift of it all.

WORK on the new engine house of the Cleveland Iron Mining company was commenced last Monday morning, under the direction of Mr. H. Gregory, of Marquette. The building is to be nineteen feet in height, 79 feet long and 44 feet wide, with a boiler house 4x44 attached. The first seven feet next to the ground will be built of stone found near the mine, and the remaining 12 feet will be of dressed Marquette sand stone. The building, when completed, will have cost in the neighborhood of \$10,000, and will be by far the finest engine house in the iron regions of Lake Superior. It is to be finished and ready for use in sixty days.

NEGAUNEE.

O, WHAT lots of mud! The Jackson mine pays to-day. The council met last Thursday evening. An infant child of Dr. Desjardins died last Tuesday morning.

CAPT. H. D. Bacon and family have removed to Ishpeming.

THERE will be a Sciopticon entertainment at Winter's Hall to-night.

Negaunee polled a larger vote last Monday than any other city in the county.

W. H. MIHLS, of the Mihls Manufacturing company, Fond du Lac, Wis., was in the city early this week.

MR. O. E. DOWNING, of Ishpeming, will preach in the M. E. church, to-morrow, both morning and evening.

J. H. KREMER will soon move his stock into the McKenna building, made vacant by the removal of Michael O'Dee's saloon.

HERMAN BENNETT has accepted a position as telegraph operator at Peshtigo, and left last Monday for that place. Good luck to him.

A. A. COLE, agent for the Northwestern Life Insurance company for the upper peninsula, is doing this city this week. He's a good 'un.

WORK was resumed on the new hotel building last Thursday. We hear, and hope it is true, that money has been raised sufficient to complete it at once.

RUDOLPH MAAS is expected home from Montreal the early part of next week. We understand he has graduated with honors from the McGill medical college in that city.

GEORGE MAAS and Harry Merry are getting up a private hop, which is to come off in Winter's Hall next Wednesday. It's to be the swell ball of the season, and no mistake.

THE editor of this department has gone below to seek a little much needed rest, consequently our readers will have to bear with us for the lack of spice in this column. It won't happen again.

CLIFFORD's theatre company is expected here in about two weeks. We understand the company is fully up to, if not better, than those of former years. They will undoubtedly have a full house.

THE citizens of this city will be rejoiced to learn that Robert O'Neil, formerly of this place, has had good luck in Leadville, where he went some three or four weeks since, having disposed of his claim in the "Little Johnny" and another mine at that place for \$65,000, cash. Oh, but we do sympathize with the poor fellow!

IRON Mountain Lodge, I. O. O. F., of this city, will celebrate the 61st anniversary of Odd-Fellowship in a right royal manner on Monday, the 26th inst. The society will meet at their rooms at one o'clock on that day, and will shortly thereafter parade through the principal streets. They will then attend the M. E. church in a body and listen to an address fitting to the occasion from the Rev. D. W. Misener, after which a banquet will be indulged in at the Jackson house. In the evening a social gathering of the members of the order, together with their families, (those who haven't got families can bring their girls,) will be held in the lodge room. A cordial invitation is extended to all Odd-Fellows in the county to participate in the exercises of the day and evening. The street parade at one o'clock will be headed by the Jackson brass band.

THE election was rather a quiet affair, although there was some pretty hard work done by some of the candidates. The saloons, by order of the mayor, remained closed during the day, but when the polls closed the doors were thrown open, and a goodly quantity of "booz" was swallowed—enough to make a good many very happy people before ten o'clock. There was no opposition to Mr. Breitung for the office of mayor. For the office of assessor, Mr. Foley had a lively tussle with Nick Laughlin, and only beat him by 67 votes. Thomas M. Wells got left on the recordership by 219 votes. The fol-

lowing is a list of the city and ward officers elected:

- Mayor—Edward Breitung. Assessor—James F. Foley. Recorder—Byron D. Jones. Treasurer—Charles Muck. Justices of the Peace—Theophile Roy. School Inspector, full term—Titus T. Hibbert. School Inspector, to fill vacancy—H. Roberts. Constables—John Jeffrey, Peter Trudell, Jno. Jennings and George Gordon.

WANTED.—A man to occupy and till a farm at Cheshire mine. There are on the farm 75 acres under cultivation, and 25 cleared of timber, with good barn and dwelling. It will be rented or let on shares. Tenant must furnish team and farming utensils. Apply in person or by letter, to J. F. SEEVENS, 611 1/2 Negaunee, Mich.

FOR SALE.—Buggies, Cutters, Harnesses, etc., etc., for sale at less than cost, and far below their intrinsic value. H. M. ATKINSON, 609 1/2.

Iron Lands,

Pine Lands,

Hardwood

Lands,

Slate Lands.

The lands of the MARQUETTE, HOUGHTON & ONTONAGON RAILROAD COMPANY are now brought to the attention of capitalists, iron-masters, lumbermen and explorers. This grant comprises some of the most favorable iron bearing properties, and best timbered lands in the upper peninsula. The lands are rich with iron ore of unequalled purity, and are thickly timbered with the best of pine and hardwood. Application for the purchase or leasing of lands, for rights of exploration, or for further information may be made to JOHN HORNBY, Land Commissioner. 605mf Marquette, Mich.

JUST OUT.

Hood's Great Book

OF THE WAR.

Advance and Retreat, Personal Experiences in the United States and Confederate States ARMIES:

BY GENERAL J. B. HOOD, Late Lieutenant-General Confederate States Army, published for the B. C. O.

Orphan Memorial Fund

BY GENERAL G. T. BEAUREGARD, NEW ORLEANS, 1880.

The entire proceeds arising from the sale of this work are devoted to The Hood Orphan Memorial Fund, which is invested in United States Registered Bonds for the nurture, care, support and education of the ten infants deprived of their parents last summer at New Orleans, the melancholy incidents of which sad bereavement are still fresh in the public mind.

The book is an elegant octavo, containing 360 pages, with a fine photograph likeness and a line steel engraving, made expressly for this work, four large maps of battle fields, bound in handsome gray English cloth at THREE DOLLARS, or in a fine sheep binding with marbled edge, THREE DOLLARS AND FIFTY CENTS—in half bound morocco, library style, FOUR DOLLARS, or in best levant turkey morocco, full gilt sides and edges, FIVE DOLLARS.

On the receipt from any person remitting by mail or express of the amount in a registered letter or by a postal order, bank draft, or check, a copy will be immediately sent free of postage, registered as second-class matter. The volume is published in the best style of typography, on elegant paper, with illustrations, executed as highest specimens of art. The author, the subject, the purpose, all alike render it worthy a place in every library—on every desk—or upon the book shelf of every home in the country.

Agents wanted in every town and county in the United States, and a preference will be given to honorably discharged veterans from the army.

To the ladies who feel a desire to express their sympathy with The Hood Orphan Memorial Fund, the sale of this book among their circle of friends, will afford an excellent way of contributing substantially and so deserving a cause.

For terms, rates to agents, etc., address with full particulars, GEN'L G. T. BEAUREGARD, Publisher, On behalf of the Hood Memorial Fund, NEW ORLEANS, LA.

Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and experiment, and are the most effective remedy yet discovered for diseases, caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are especially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel, or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhoea, Dysentery, Gout, Piles, Disorders of the Liver, and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs, they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists, Lowell, Mass.

SENT BY ALL DRUGGISTS EVERYWHERE.

REED'S

GILT EDGE TONIC

In every case of fever and ague, it is always a thorough remedy, while for disorders of the stomach, torpidity of the liver, indigestion and disturbances of the animal forces which debilitate, it has no equivalent and can have no substitute. It should not be confounded with the triturated compounds of cheap spirits and essential oils, often sold under the name of Bitters. For sale by all DRUGGISTS, GROCERS AND GENERAL DEALERS EVERYWHERE. 551y1

Contracts taken in any part of the county. Also plans and specifications on application.

Office and Shop opposite Summit House, Front Street, Marquette, Mich. 550-28

A WEEK in your own town, and no capital risked. You can give the business a trial without expense. The best opportunity ever offered for those willing to work. You should try nothing else until you see for yourself what you can do at the business we offer. No reason to explain here. You can devote all your spare time to the business, and make great pay for every hour that you work. Women make as much as men. Send for special private terms and particulars, which are mailed free. \$5 outfit free. Don't complain of hard times when you have such a chance. Address H. HARLETT & CO., Portland, Maine. 579y

A MONTH guaranteed. \$12 a day at home made by the industrious. Capital not required; we will start you. Men, women, boys and girls make money faster at work for us than at anything else. The work is light and pleasant, and such as any one can do right at. Those who are wise who see this notice will send us their addresses at once and see for themselves. Costly outfit and terms free. Now is the time. Those already at work are saying upland sums of money. Address T. E. & CO., Augusta, Maine. 579y

POPULAR SCIENCE NOTES.

AN electric locomotive has been manufactured and successfully operated on the street railway of Berlin. For use in telegraphy, aluminum is said to possess double the conducting power of iron, and can be made into extremely thin wires. The longest submarine cable in the world is that along the east coast of Africa, from Natal to Aden, it being 4,000 miles in length. The deepest well in the world is the one recently finished at Buda Pesth, Hungary, being 3,200 feet in depth. The temperature of the water it yields is nearly 165 Fahr. The electric light is coming into general use on board of steamships, and passengers and seamen alike express themselves as highly delighted with the new method of illumination. The very bright star now to be seen near the horizon, about due south, is "Sirius," the dog star, and it is estimated by astronomers that it gives us four times as much light as any other star visible in our latitude. The reason generally given by scientists for the phenomenon of hearing farthest sound just before a storm is that the air, being moist, has more than its normal conducting power, and that the low lying strata of clouds confine the sounds to the earth. Dr. Gould, of the Cordova University, South America, reports the discovery of a new and great comet in the neighborhood of the sun, passing northward—one which it is stated that nations north of the equator may be treated to a sight of at an early day. IT IS ESTIMATED that about 9,000 miles of new road are now under contract, and it is thought by men in a position to know that more miles of railroad will be built during 1880 in the United States than during any year before. PROF. M. Gamard, of France, it is stated, has completely modified the form of the American phonograph, and claims to have an instrument far superior to Mr. Edison's patent, and one that will become of practical utility, and come into general use. THE preliminary steps have already been taken for the holding of a world's fair, in New York city, in 1883. At a recent meeting of prominent citizens and capitalists in that great metropolis, a resolution was adopted asking Congress to take measures to give the proposed fair "official sanction and aid commensurate to its importance." THE manufacture of Glucose is becoming one of the most extensive industries in this country. Corn sugar is now used for all the various purposes for which any sugar is used, except for first-class confectionery, and is not only used largely in this country, but great shipments are constantly being made to Europe, where it is in great demand. IN the five cent nickel we have the entire metric system of weights and measures. The diameter is two centimeters, and its weight is five grammes. Two of these coins will weigh a decagramme, and five of them placed in a row will give the length of the decimeter. The key to the measure of length is also the key to measures of capacity, as the kiloliter is a cubic meter. SCIENTISTS have adopted the theory that the duration of animal life should be five times the growth of the animal or being. Thus, man gets his growth in twenty years and should live to be one hundred years old. The camel is eight years in growing and lives forty years. The horse reaches maturity in five years, and seldom lives beyond twenty-five and so with other animals. THE physical consequences of death continue to baffle scientists, and instead of the progress of science adding anything of importance to what has always been known, it has rather tended to deepen the distinction between the visible part, which perishes before our eyes, and that which we are ourselves, and to show that this personality, with respect to its nature as well as to its destiny, lies quite beyond the range of science. THE best copying pads now in use for copying letters, etc., quickly, is made as follows: Take gelatine, one ounce and glycerine, of fluid ounces, soak the gelatine over night. In the morning pour off all the water and melt both ingredients to a boiling heat, after the manner of melting glue. Pour off in a shallow pan and allow to stand ten hours or more, protected from dust, when it is ready for use. Over one hundred impressions may be taken from a pad made in this manner. To change the form, sponge off the face of the pad with a sponge and a little water. MORE wonderful than the Telephone in its magic workings, is that of the "Diaphote," a newly invented instrument by which persons are enabled to see by electricity. Its inventor, Dr. H. E. Licks, of Bethlehem, Pennsylvania, calls it by this name, from two Greek words, dia through, and phos light. Dr. Licks exhibited his instruments to a number of scientific men at his home recently, to the utter astonishment of all. The two instruments used, one being in the second story of the building, the other in the parlor below, were connected by means of an ordinary telegraph wire, and charged with electricity. A newspaper being placed before one of them was easily read by the audience at the other end of the line. Its inventor claims that ordinary print may be read hundreds of miles away as easily as at the distance used upon this occasion. We shall give a detailed description of the "Diaphote" in a future issue of this paper. SPEAKING upon the subject of "Insanity," at a recent meeting of the Medico-Legal Society, in New York, Dr. Geo. M. Beard remarked: "Insanity is a barometer of civilization, and as we advance higher in the art and sciences, so will insanity become more prevalent among us. Intense application, brain work and indoor life are the agencies which most frequently bring it about. Among savages or barbarians there is little or none of it. The intellectual activity of the women of to day is another great cause of insanity. What the mother is, so will the child be in an intenser degree. \*\*\* An improved system of education, with less 'cramping,' would tend to reduce the increase of insanity." While the Dr. may be somewhat broad in his assertions, there is much in his remarks that should at least interest teachers and parents of the present day in the bringing up of the "rising generation."

DRESS AND PARTY COLORED AND WHITE KID GLOVES.

Who Will Be The Next PRESIDENT?

Give us something easy---15-14-13.

Who got that Puzzle up? NEUBERGER!

That Great Boss Clothing Man!

He now puzzles out CLOTHING for Men, Boys, Youth and Children---better goods and later styles---for less money than any other man in the country.

CUSTOM WORK.

All Foreign and Domestic goods. Prices to defy any and all competition. First-class styles and fits guaranteed, or no sale.

In Hats and Caps, all the Latest Broadway Styles!

FINE HOSIERY, SILK & LINEN H'DK'FS.

MY NEW ENTERPRISE:

Gents' Boots and Shoes.

There is none better in the country than the fine hand-made goods manufactured by Hannan & Reddish, New York; not only to please the trade at large, but better goods at less money than any old rubbish kept heretofore. In fact, I have now the most complete line of goods which I ever displayed in Marquette, bought before the advance in prices, therefore am able to sell at prices that can't be beat.

WILSON BROS.' white and colored SHIRTS in stock; also made to order---perfect fit guaranteed

IN FACT,

For anything in the line of Clothing, gent's fine Furnishing goods, Hats, Caps, Boots and Shoes, call on

I. NEUBERGER.

400 Suits at \$8.00.

500 Cotton Pants at \$1.50.

[To The Editor.] The Rev. Dr. Bushnell, of Hartford, Ct., once said "whenever I fire into my flock I always know who is hit, by the fluttering;" but I am at a loss to know how I caused such fluttering by my article unless I hit. An old French proverb says, "he who excuses himself, accuses himself. I made no accusations, but simply asked questions which it is better to answer categorically than to waste ink and time in expressions of temper. No "allegations" were made, only questions asked, which are not yet answered. Do ye "beg the question," ye defenders of injured innocence? If the "local's" article is carefully read it gives a just cause for complaint of failure to observe the rules of the City Library. Speaking of Mr. Swift's interest in the Library and good natured desire to please, (I do not doubt that it is) Mr. Swift, Librarian, I write of, not Mr. Swift the friend and accommodating gentleman, he says, "not only does he accommodate the public to the very letter, but on occasions puts himself to considerable trouble to procure books for persons who come earlier or later than the regular hour, and at times when the Library need not be opened for any one." Here is a direct charge made against Mr. Swift for infringement of rules, since the Library (see the rules and regulations) is "to be open only on Wednesdays from 4 to 6 p. m.," and what right has one person to take out books on other days or hours, and others be confined to certain other days or hours? A "City Library" is a public institution, to the benefits of which each responsible person, especially taxpayers, have equal rights. I acknowledge Mr. Swift's kindness and courtesy; no one denies that, but each time he did the above he broke a rule of the Library. I would say here to "J. D. H." that "questions" are not "charges;" and the intense ire aroused on a question in regard to the Library would indicate something wrong in Denmark." In regard to "random" shooting, I must have hit some mark, judging by the inflammation excited. As to "sneaking" an article into the paper, "R" was written to some time ago by Mr. Swineford, "when you have anything you wish published please send it to the office of the JOURNAL." Mr. Swineford is too much of a gentleman to ask any one to do a sneaking thing, and too brave a man to do or ask any other person to do anything "surreptitiously." Yes, J. D. H., I went, and dozens of others went, Wednesday after Wednesday, (and not at the time when the library was closed by order of common council, "Mr. Local" for gathering in of outstanding books, &c., which by the way can't have been gathered much, since I know of one book which has been out for two years, and two for nearly six months), and neither the librarian nor "competent person" was there unless behind closed and locked doors. Names can be given with little trouble of those who experienced this disappointment until it became monotonous. I am ready to prove by excellent witnesses the truthfulness of the article sent over my initials--and do emphatically deny either "injustice," "untruthfulness," or "maliciousness," in a single line of the article referred to so hotly by J. D. H. and the "Local." For the questions not being answered, I make these assertions, and if any one cares enough about it to make the inquiry as to who "R" is, they or he may go to the editor-in-chief. Does this prove me a sneak? Mr. Swift has not been at the library with open doors or ready to deliver books every Wednesday from 4 to 6 p. m., or being absent has not left a "competent person" in his place, unless behind a locked door. Persons do draw books from the library without deposit of any kind. Books are retained months and years instead of weeks and no charge is made. Books are drawn out on other than regular days for drawing. I judged that the purchasing committee did not receive publisher's discount to libraries from the high value printed in most of the books, in most cases beyond retail prices. I never knew before that the simple inquiry by a taxpayer or citizen, of how public money was expended, was a charge of malfeasance in office. Will Mr. Hornstein and J. D. H. read the rules and regulations in the city library catalogue, carefully, then re-read my first article, and honestly say "it is unjust and malicious to ask if these rules are enforced?" For the gentlemen referred to in these articles I have the firmest respect and honor, and say "Amen" to all the praise given them as individuals; but a man holding any public office must not be over sensitive when his work is criticised or inquired into. No one could be more astonished than I at the construction put upon my first article. R.

FURNACE PROPERTY For Sale!

I will sell, at public sale, Monday, eleven o'clock, A. M., April 19th, the Furnace, with adjoining lands--about twenty acres, more or less--Lots 18, 19, 20, 21 in Block 3; Lots 41, 42, Block 8, in the village of Harvey. Also an undivided interest in W 1/2 of NW 1/4, Sec. 6, S 1/2 of NW 1/4 Sec. 20, SE 1/4 of NW 1/4, NE 1/4 of SW 1/4, Sec. 22, SE 1/4, E 1/2 of NE 1/4, SW 1/4 of NE 1/4, E 1/2 of SW 1/4, and SW 1/4 of SW 1/4, Sec. 28, entire Sec. 34; SE 1/4, Sec. 28, all in Town 47, Range 24, west. The above property will be sold subject to any and all encumbrance thereon. F. B. SPEAR, Assignee Northern Iron Co.
