A. P. SWINEFORD.

Devoted to the Iron and Industrial Interests of the Country.

THREE DOLLARS PER YEAR.

ESTABLISHED IN 1846.

MARQUETTE, LAKE SUPERIOR, MICHIGAN, APRIL 17, 1880.

NEW SERIES, VOL. XI, No. 613.

## CITY AND COUNTY.

**HON. C. Y. OSBORN** returned from Washington last Sunday.

The tug *Rose* has been skipping about the bay the past week. Don't get uneasy, boys.

**JAMES DWYER** has gone on a some what extended business trip to Chicago, Cincinnati and Louisville.

**JAMES S. CHASE**, a prominent land dealer of Greenville, Montcalm county, was in the city early in the week.

No Marquette pilot has yet been rejected on account of color-blindness. A dozen or more have been examined.

**KIBBEE**, he of the Northwestern Mining Journal, Hancock, was in the city over Saturday night, on his way to Chicago.

**CAPT. WM. WARD** and daughter, who have been spending a few weeks in this city, left for their home in Pittsburgh, last Sunday.

**COL. J. B. CULVER**, of Duluth, was in the city during the week, in the interest of the Michigan extension of the Northern Pacific railroad.

The National Hotel is doing an excellent business, the house having been full to running over most of the time during the past two weeks.

Did the silver-tongued fog-whistle blow you out of bed last Wednesday morning and cause you to express your feelings in language you wouldn't use in church?

The U. S. steamboat inspectors, Messrs. Blanchard and Gooding, of this place, have gone to Menominee, to inspect steam crafts at that place. This is their first trip for the season of 1880.

Most of the lumbering camps hereabouts have been broken up, and the men are coming back to the city, in consequence of which every thing about the city assumes a more lively appearance.

**S. M. LEVY**, for many years past a leading merchant of this city is closing out his stock of goods preparatory to his removal to Milwaukee, where he will engage in the manufacture of woolen goods.

**CAPT. WM. CUMMINGS**, a gentleman well known in this city and all Lake Superior ports, has been transferred from the steamer *B. W. Blanchard* to the Lake Superior Transit company's propeller, *Pacific*.

A TEAM of plugs belonging to Pat Doyle, and hitched to a charcoal wagon, got "plug ugly" last Monday and made a little stir on the usually sleeping Front street, by running away. There were no bones broken.

The sanctum acknowledges a call from the Hon. P. J. Bennett of the Norway Iron Chronicle. He is after printers, but the business in this city employs all of this craft that can be mastered. He went away sorrowful like.

The attention of Mining captains and explorers is called to the advertisement of J. M. Longyear in another column of this paper, asking for experienced mining men to take charge of explorations in the Menominee Iron range.

**PETER C. MILLER** has contracted with the M. H. & O. R. R., to handle all freights on the merchandise pier the coming summer. Mr. Miller will give employment to a large number of men. He has had this contract for four successive years.

**MR. JNO. E. SULLIVAN**, for many years past superintendent of the telegraph line of the M. H. & O. Railroad has severed his connection with that road. Whether he has accepted a similar position on another line or not we have not heard.

The wife of Mr. H. R. Hadrich of this city, died of consumption, at her home on Wednesday afternoon of this week. The funeral was from the house yesterday at 2 o'clock and was attended by a large concourse of sympathizing friends and relatives.

The board of county canvassers which met on Tuesday last in the county clerk's office, declared the vote on the Governor's salary amendment to be yes, 1486, nays, 192. Looks very much as if the Governor of Michigan would get enough salary to pay board bills for two.

**JUDGE HARDY** went to Negaunee Wednesday to inquire into the case of Michael O'Brien, who was supposed to be insane. After a careful examination by a competent physician, before the judge, Michael was pronounced possessed of sufficient sense to entitle him to dwell without the walls of Kalamazoo.

Letters advertised at Marquette, April 15, 1880:  
Campbell, Michael Duval, Charles  
Carpenter, Henry Dube, Francois  
Carrier, A.-2 Johnson, Soren  
Orthenberger, Emanuel

## CINDERS.

Cinders has canvassed the opposition "directors," and finds them to be a unit in favor of Grant-land grant.

It is not always safe to bet on the result of a divorce case, no matter how carefully the papers are drawn. We hear a rumor of one being "discontinued without costs," all owing to a mere scratch.

"It's never too late to mend"—one of Cinders' newly-married friends wore a pair of pants the other day for the first time in two years—that is to say he had on the pair which his better two-thirds sat up and mended after midnight.

Cinders would advise all young men to see that they do their courting and lally gaging behind closed shutters; it will save much embarrassment. One young man down in the rolling mill district would give two old Irish women a week's salary each, if they were a little less fond of relating what they saw from the street one evening some ten days ago.

An ingenious insurance agent of this city sauntered into the news department of this establishment the other day and handed a couple of the compositors a new fangled insurance (clothes pin affair) copyholder of which the intelligent type jerkers had no knowledge as to what they were used for, and supposing them to be local notices or something of that sort to be put into type for the paper, set them up under the heads of "Items of the day." Of course the proof reader marked them "killed," and now those two compositors carry their pants pockets full of double pica slugs with which to brain that life insurance man.

Yesterday as Cinders was passing up Superior street he saw a woe-begone looking individual, nigh onto 40 years of age, sitting on the walk along side the tenanted old rookery known as the Iron Mountain house weeping as if his heart was about to bust, and rubbing his eyes with a red cotton handkerchief. His general make-up excited our curiosity and we approached and inquired what ailed him. "Oh, sir," he sobbed, "I've just been learning the lesson of life," and he burst out with fresh weeping. "You don't mean it," we ventured. "What is it?" "Oh! sir," said he, "It's the sad, sad business of parting." "Did she go back on you—give you the dirty shake," we asked. "Oh, no, sir, it wasn't that, for I am a married man; but my mother-in-law, who was a widow with six small children, has just got married, and left my poor wife and me all alone." "Poor man," we said, "yours is indeed a sad and exceptional case; it shall be recorded."

The postoffice, at the usual hour on Wednesday night, was the scene of the eighth weekly meeting of the opposition "directors." After the sounding of the gong, and quiet had been obtained president Billy Roberts rose and said: "Gentlemen and 'directors': The winter of our discontentment has been made gloriously beautiful by the sun's bright rays, and the darkened clouds that hung over us have been scattered by its golden beams. Our brows are no longer bound with wrinkled scowls, and our worn out shoe packs have been hung upon our parlor walls as mementoes of past service and for future use. The stern alarming looks with which we were met by section bosses have been changed to more cheerful greetings and delightful street resting places have taken the place of dreadful marches through wind, sleet and driving snow. Bright visaged sun has smoothed our sidewalks, and now, instead of mounting pick and shovel and going forth to toil and hardship, we can caper nimbly about the street corners to the lascivious pleasing of a corn-cob pipe and an occasional 'smile.' Although most of us are not shaped for playful tricks, and have not been accustomed to mirror courting; some, perhaps, rudely stamped, and wanting of that majesty so desirable in modern flirtation; at least, enough of it to render it safe for us to flirt and strut upon the street with golden haired damsels clothed in calico; we who are curtailed in fortune, short of stature, unfinished, as it were, and sent before our time into this world of want, but half or two-thirds made, who excite the street cur so that at our approach he shies across the street with his tail thrust between his hindermost legs, giving forth yells of disapproval at our appearance. Why we, in this most prosperous time can have no delight to pass our time away unless we be allowed to stand upon the warm side of the sun and descend upon our own uncomeliness. Now as we cannot prove ourselves adepts in making 'mashes,' we can at least comment upon the apparel of lady passers, and do much toward proving ourselves haters of the idle vanities of our day. Thus with delight we can linger to survey the promised joys of our opposition way, thus from afar these undiscovered scenes, will appear to us as very pleasant air-castles. Let the business of the meeting proceed without delay; Mr. Secretary, what is there on your table?" Johnny said he had no communications on his table; but he had the written application of Mr. Luke Reed, accompanied by the requisite wherewith to pay for two shares of stock, therefore he moved that he be allowed to come in as a director, and his money accepted. The motion had several supporters, and on being put was carried without a dissenting voice. Luke came in and was introduced to the "directors" by president Roberts, who said that it gave him much pleasure to welcome so important a personage to a membership among them, and hoped that the associations of this meeting and with his fellow directors upon the streets would hereafter prove mutually beneficial. Luke took occasion to say that from the first, the opposition scheme had met with his hearty approval, and he had only been kept from espousing the cause openly before by a lack of funds, that besides the amount necessary for the purchase of two shares, he had sufficient "filthy" in his clothes to warrant his asking the board, upon its adjournment to accompany him to a saloon and take a round of beer. The president said he had no doubt the invitation would be accepted, that the

"directors" seldom indulged, but when they did it was about this hour of the day. Paddy O'Brien, from the committee on "right of way" made a verbal report, in which he stated the difficulties encountered in obtaining a land grant, also of the trouble he had in making Louis Koopp, Carl Kunde and Sig Zerbel see the beneficial results that would accrue to them by permitting the line to pass through their farms in the Dutch settlement. They were anxious for the road but would not give up their land unless paid an exorbitant sum. Paddy denounced these gentlemen as pig-headed dutch men who had no love for country or its prosperity, and for him he proposed to see to it that they paid double rates for cabbage and sour-kraut transportation, when the road was completed. "Director John Crow said he would like to hear from the glee trio if there was no further business. The president said that if the trio had a song, business could rest and they would hear the song. They then arose and sang the following production of the poet-director to the tune of "glowing slippers":  
We're going to build a railroad and run it through Marquette,  
And hold our full headquarters down at the Chocolate.  
It is the only country where all the wheat is growing,  
And we must contract with Watson to get us good brown loaves.  
We're going to build our depot down near the swampy bogs  
Where we can find passengers, lightning bugs  
And we must run short of loading when the berries are ripe,  
We'll charge big bags of evergreens and the feathers of the snipe.  
Our cars must be made large, we will have a lot of seats—  
With a headless coach attached to it carry up half-broods.  
Dozsey will be our manager—he'll use the best of his skill,  
To buy the old trumper that's in the rolling mill.  
And he'll contract with the company to buy all the coal he can get,  
But Hawkins swears he'll hang him with a piece of wire rope.  
One of our late new members, his high notions he took the crowd,  
He thinks he's far above us for speaking through his nose.  
He says he'll supply the train that's coming from the far north,  
If they'll smoke a dish of oysters and eat a good cigar.  
What's he do with Dennis Donovan; he'll fall about every day,  
He'll drag the chair of Billy Roberts if he don't give up the chair.  
We've got the here for spiders and all such kind of low,  
And he'll buy up the little herring in the market, and give him credit for the business he's doing.  
He'll supply us with potato bugs from the man that's here for spiders and all such kind of low.  
We have a letter from Paddy Plunkett—the man he'll be with us very soon,  
And bring us a shareholder in the person of He's our traveling agent throughout the United States.  
And we're dead sure he is going to bring us all the gold he can get,  
We will then go to Ishpeming, there's men there sure to refuse;  
We're sure of one you know him well, his name is Patrick Mullins, Joseph Winter, John Truman and Rowland Savage.  
Frank B. Spear and Jno. W. Spear, vs Marquette Houghton & Ontonagon Railroad company; case; Jury trial, verdict in favor of plaintiffs for \$3,818.91.  
Gilbert Marcott, administrator, vs Marquette, Houghton & Ontonagon Railroad company; trespass on the case; Jury trial pending.

may attend with genuine wax-work made from the sap of the maple tree. Persons with impaired digestion, or severe exposed teeth, are not compelled to accept of this sweetness; but can fill up with a first-class orthodox supper and coffee. Charges moderate.

There was a little row down at the Chocolate township election, on the 5th instant, between Wm. Knox and Henry Priebe, Henry didn't like William's knocks, so he had him arrested for assault and battery. The case came up before his honor justice Hardy Thursday morning, but was adjourned until the 27th inst., and William the knocker was required to furnish bonds to the amount of \$100 dollars for his appearance at that time. He got the bonds.

LANYON'S patent stonebreakers and ore crusher's are being introduced in this country by Mr. R. S. Anley. The ore crusher is a combined breaker and roller, and it is claimed by the agent that it will crush 70 tons in ten hours to the fineness of sand and fine gravel. All parts of the machine that come in contact with the ore are made of chilled iron and steel. The crusher is manufactured by J. Lanyon & Bro. of Mineral Point, Wis., and weighs 8,000 pounds.

The congregation on Crowley's corner were entertained last Saturday afternoon by a drunken man, who, by his many words and actions, gave unmistakable evidence that he was from the land presided over by his royal "nibs," Mr. Lorne. He claimed he could thrash any forty-nine Yankees in the crowd, and enforced the remark by epithets most vile. The street gamins pestered him with soft snow balls, hitting him in the face and head, and worked him up to the highest pitch of anger. Why the authorities will permit these scenes to go unrebuked upon the streets is more than we can tell. They are certainly anything but becoming an enlightened place like this.

**CIRCUIT COURT.**—The following cases have been disposed of during the week ending Friday April 15th:  
Isaac Neuberger vs. Wm. L. Wormore, et al; Judgment on verdict.  
The following additional jurors were summoned from Negaunee and Ishpeming:  
Edward D. Nelson, Geo. A. St. Clair, Michael Hughes, Benjamin Neely, Angus Martin, Henry Sawbridge, George Arthur, Richard Mathews, Jr., Patrick Mullins, Joseph Winter, John Truman and Rowland Savage.  
Frank B. Spear and Jno. W. Spear, vs Marquette Houghton & Ontonagon Railroad company; case; Jury trial, verdict in favor of plaintiffs for \$3,818.91.  
Gilbert Marcott, administrator, vs Marquette, Houghton & Ontonagon Railroad company; trespass on the case; Jury trial pending.

**METEOROLOGICAL** record for the week ending April 15th, 1880:  
Day. Mean Daily Barometer. Mean Daily Temperature. Precipitation, in inches. Average velocity of wind. Weather.  
Friday..... 29.47 48 NW 12 Fair.  
Saturday..... 30.05 37 NW 18 Fair.  
Sunday..... 30.20 30 N 12 Clear.  
Monday..... 29.89 40 NW 14 Clear.  
Tuesday..... 29.70 39 NW 10 Fair.  
Wednesday..... 29.45 46 E 18 Fair.  
Thursday..... 29.06 34 E 15 Fair.  
Means..... 29.82 38 NW 14  
Amount of rainfall, or melted snow, during week is .65 inches.  
Highest velocity of wind 34 miles per hour west on the 14th inst.

**MR. LAZARUS METZGER**, step-father of Mr. Philip Berdie, died at his son's residence in this city last Tuesday morning at eleven o'clock, after an illness of five weeks. The deceased was in the 71st year of his age; was born at Landau Pfalz, Bavaria, Germany, and has only resided in this country four months, all of which time has been spent at the home of Mr. Berdie, and with whom, on account of his vigorous constitution, he had expected to pass some years of quiet enjoyment. It is supposed that coming as he did from a temperate climate, to the radical change of a Lake Superior winter had much to do with hastening his death. His remains were taken to Chicago for interment Wednesday.

A DIVISION of the Ancient Order of Hibernians was instituted in this city last Saturday evening, with a charter membership of some twenty or more of the leading Irish residents of this city. P. H. Devine, Phil. Maddin, Jno. Mulvey, M. E. Gaffney and several other gentlemen, members of the order in Ishpeming and Negaunee, came down and assisted in the organization. It is the intention of the new subordinate division in this place to secure the hall over the store of James Dwyer & Co. for regular weekly meetings. The following gentlemen will officiate the new organization for the first term: President, P. F. Mullahey; Vice-president, Samuel E. Byrne; Treasurer, James Dwyer; Secretary, P. J. Noonan; Financial Secretary, Martin Foard.

The May term of the United States court for the Northern Division of the western District of Michigan, and which was to have convened in this city on the 4th day of May next, has been adjourned for one week, viz; to

Tuesday the 11th day of May. The session of this court will be presided over by Judge Brown, of the eastern District. The following is the list of jurors drawn: H. O. Young, Fred. Braastad, Eugene G. St. Clair, Wellington F. Carr and Wm. Hoskins, Ishpeming; James N. Cox, Sereno M. Streeter, George C. Sheldon, Albert Wanzer and George S. North, Houghton; George McDonald, Rowland Savage, V. J. Newman, M. A. Gibbs and Norman McLeod, Negaunee; Wm. H. Morrison, and Hugh Barclay, Menominee; Jacob F. Shafer, L'Anse, L. C. Palmer, Wm. D. Rees, James Pickands, D. McKinnon, Sidney Adams and George W. Green, Marquette.

**DIED.**  
MCGREGOR.—In this city, on Wednesday afternoon, April 15th, 1880, at the residence of her son-in-law, Mr. Geo. W. Green, Mrs. Sarah McGregor, in the 59th year of her age.  
The deceased was the mother of the late John T. McGregor, also of Mrs. Geo. W. Green, and Mrs. Jno. C. Lewis, of this city; Mrs. C. V. Austin and Hiram McGregor, of Lapeer. For the past seven years she has lived with her daughter in this city, where, surrounded by a large circle of children, grandchildren and great-grandchildren she has passed a life of rest and comfort such as a large and loving progeny only could bestow. Had Mrs. McGregor lived until next Tuesday she would have been 89 years of age. She has been a faithful and constant member of the M. E. church for upwards of seventy years. Her death, though sudden, was looked for daily, as her health had been failing rapidly. Her remains were taken to Mt. Vernon, Macomb county, for interment, yesterday.

**BRICK-BATS AND SCRAP-IRON.**—Mr. E. S. Culver residing on the corner of Washington and Fourth streets says: that last Sunday, in the dawn of the morning, ere the sun had yet appeared, that without a hint or warning, rocks and iron were at him fired. He was awakened by a good sized rock coming ker-chunk through his bed room window, and causing him to arise much earlier than was his custom on the 1st day of the week. The first rock was followed by another, and later still by a piece of old iron. This last brought forth a response from the mouth of Mr. Culver's revolver, but the shot was without effect. The inmates of the house were aroused and went in search of the marauder, but did not succeed in capturing him. Mr. Culver had reason to believe that the guilty party was John E. Sullivan, and he accordingly had him arrested for the offense. The case came before Judge Hardy Thursday, when Sullivan pled not guilty. He was bound over in the sum of \$100, to appear before the above mentioned judge on Wednesday the 28th inst.

The usually quiet and peaceful town of Chocolate has had its sensation. It was not an elopement nor a wife murder; but a cold blooded chicken steal, and the perpetrators of this atrocious crime were two young Frenchmen. There was to be a wedding and believing that stolen fruit tastes sweeter than any other, they determined to have a lay out of fricasseed hen that would be second to no spread ever before offered in the township. In the dead of the night this pair hid them to the residence of Mr. Roberts, two miles below the village, and yanked from the roost five female hens and one male rooster and by gagging their mouths to prevent cackling succeeded in getting them to their own cot. Mr. Roberts on missing his property came to this city and laid the case before detective Dolf, who in a few short hours discovered the thieves and made them return the property. To save trouble they also gave Mr. Roberts \$8.50 for taking care of his birds over night, and promised him he should not be molested more.

The other afternoon, while rocking in our easy chair, peering over the death of local happenings and our lack of energy, a solemn looking lady, who we'd swear on the shady side of forty, entered proudly and to bore us, sir, two long weeks ago, and the subject I had chosen you remember well was spring, and although I scanned your paper, with the aid of a wax-taper. I have discovered that poem not a solitary thing." We told her that we had received just 40 poems on that subject during the past month, and that we had decided that they should be divided among the years that follow— one to each succeeding spring; that hers, we were pleased to mention would receive our best attention in the year of 1920 when the frogs begin to sing. She went out; but her look froze us, paralyzed us, as it were; we can never, no never forget her. The poem for this week is (we guess) respectfully dedicated to the gallant captain of the Tomel Boy; the one for next year is headed "The winter's ice has sunk away," and will appear April 16th, 1881. Look out for the ice sink.

A serious injustice has been done

Mr. Geo. Reed of this city by the local correspondent of an up-the-road paper, and which, injustice to Mr. Reed, should be corrected by that person. The statement that Mr. Reed had the care and custody of H. A. Burt's sick horse is wholly without foundation in fact. The horse was not kept in his barn, nor did he have anything to do with the animal until he was notified that the horse was dead, and requested to come and take it away. On arriving at the barn the horse, which had been pronounced dead by Burt's family horse doctor, was dragged out by a chain fastened around his neck. The animal, it seems, was not yet dead, but the chain soon settled the death question forever, and in as short a time as could have been done by hitting the animal in the head with an axe. The "poor animal" was not "writling in agony" and did not "at times lift himself from the ground as far as his strength would permit." The only sign of life shown was when the chain was first attached to his neck; then it raised one hind leg almost two inches; dropped it, and expired. We make this statement for the benefit of Mr. Reed, who is known by every one in Marquette to be a humane man, kind and skillful in his treatment of horse-flesh. The animal in question was kept in Burt's own barn and was cared for by his own man.

In your issue of last week appeared the following:  
The condition of Lake street near the Lake View cottages is simply disgraceful. During the whole winter, water from a leaky water pipe on Fisher street has been flooding the sidewalk in that locality, freezing as fast as it ran down, until there is at least three feet of ice over the street and sidewalk. The water pipe ought to be repaired, and the mayor and council ought to have sufficient influence, in the absence of direct authority, over the water board to effect that much to be desired result.  
The flat-footed and positive manner in which you make your statement would seem to preclude all question as to its exact and entire truth. Nevertheless, I declare it to be absolutely and entirely false, nor am I content with a simple denial. There are few people in this community who read your paper but know as do you, that the water pipes of the city are under my charge. To these your article, though containing no names, is a direct and positive charge of gross neglect of duty on my part, as well as inattention to duty on the part of the members of the water board. That Lake street and sidewalk at the point indicated is covered with ice and in bad shape is true. An intimate acquaintance with that locality leads me to account for it in this way: Along the side hill at that point are numbers of springs which flow the entire year. In summer the water disappears in the sand as it ordinarily does in winter the ground being protected from frost by the snow white banks up under the lee of the hill. The past winter was a good deal "off." Thaws and rains were frequent, making more water for the springs, and taking off the protecting snow. The ground froze, did not absorb the water which flowed over the surface and froze, adding sheet after sheet of ice until the street is in the condition you describe.  
This is the whole of it, Mr. Editor; but this is only my statement. You state most positively, that the water comes from a water pipe. Now, sir, I make you this proposition, first stating that if a leak, half the size of an ordinary lead pencil, exists within the territory stated, an active man with good eyes, and intelligence enough to tell a hole in the ground from a hitching post can find it in fifteen minutes, but I will be liberal: If, within three days from the date hereof you will conduct me to the leak, which you state as a fact beyond question exists, and to which the ice upon Lake street is attributable, I will pay you fifty dollars. In case of a difference of opinion, growing out of my own, or editorial ignorance of hydraulics, we will leave the question to the mayor.

Marquette, April 17, 1880.  
It may be that the MINING JOURNAL was too hasty in charging upon the water board a fault that does not belong to them to remedy. We were of the opinion that the bad condition of Lake street at the place mentioned was caused by a leaky water pipe; but if such is not the case, and we have done Mr. Warner or the water board an injustice, as he claims, we very cheerfully "accept of his apology." This, however, does not do away with the nuisance, and we hope the person or persons whose duty it is to see the thing remedied will not forget to do it before it is everlastingly too late to go on the credit side of their administrative record.

LAND OFFICE AT MARQUETTE, MICH., April 16, 1880.  
NOTICE is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim and secure final entry thereof and that the said proof will be made at this office on Tuesday, the 25th day of May, 1880, at 10 A. M., by Daniel M. Johnson, homestead entry No. 618 for the south 1/4 of section 4, of Section 6, T. 46 N., R. 23 W., to prove continuous residence and cultivation upon said tract, and names the following as his witnesses, viz: Yalman Barman, Christine Nelson, Bern Sigaker and John Kreger, all of Chocolate township, Marquette County, Mich.  
H. H. STAFFORD, Register.

# The Menominee Ranger.

C. E. MASON, Editor.] Devoted to the interests of the Menominee Iron Range. [Saturday, April 17, 1880

## ESCANABA.

R. PEACOCK left for Chicago on Saturday.

WANTED—A new crosswalk. Inquire on Ludington street.

THE summer time card goes into operation on Sunday April 18th.

NAVIGATION open on Monday, April 12, and six vessels in the harbor.

"E. S. Canaba, Fayette, Mich." was the address on a package at the express office.

THE debris of Hess' building still obstructs the passage of Ludington street. Take it away.

GREENHOOT'S building on Wells avenue has been sold and moved away to give room for his new residence.

MILLERS are proverbially happy but ours is uncommonly joyful. He can dance all night till broad daylight and—we forget the rest.

ONE swallow does not make a summer, but there were some fellows who had no difficulty in reaching the solstice, last Sunday night, on that account.

THE Thermometer is, after all, the best Ranger. It ranged from 76 degrees at 2 p. m. Friday down to 23 degrees at midnight, all this happened last week.

WHILE the Rust was entering the harbor on Monday, Daniel Mahoney, the mate was at the wheel. One of the other barges crowded the floating ice against the Rust's rudder causing the wheel to revolve rapidly, and dash Mahoney to the deck, bruising him badly though fortunately no bones were broken.

THE body found near Ford River last week is believed to have been that of Wm Kieffer, who worked for C. P. Pease at Barkville last winter. He was accidentally injured some time since and lost his front teeth, and otherwise answers the description of the corpse. Kieffer had relations living at or near Sandusky Ohio.

THIS season will be one of unusual activity along the bay shore. The Welcome and Capt. Hawley's new boat will make their trips the same as last summer, while Sandy Thomas will run a daily boat to Fayette. Several craft of various kinds and dimensions will be engaged in traffic to various points on the bay, and passengers to any part of the county will find ready conveyance.

If the board were to enact that all cattle should be shut up at night, would it not be a beneficial act, conferring a lasting boon upon all alike—to the poor creatures exposed to the deadly perils of axes, bricks and bludgeons—to the owners of milch cows, who will thereby avoid the weary journey over desert sands, and through impenetrable forests of hack metack and scrub pine in search of the missing kine, and last, but not least, to the unfortunate possessors of blooming gardens and alleys green, who retire each night to their uneasy pillows in the dread expectation of awakening to behold but desolation and ruin where yesterday's sun shone over verdure and foliage.

THE health officers has notified house holders to remove all accumulations of stable and kitchen refuse from their premises at once. The order should be obeyed implicitly, and it is surely not flattering to the tastes and habits of a portion of our people that such an order should be necessary. With every facility for cleanliness, it is a fact that many neglect to rid their yards and out houses of the offal and refuse which, exposed to the warm spring rains and the hot sun, breed malarial fevers. Even the better quarters of the town are not exempt from these plague spots and it is time that every one awoke to the necessity of making a general and through spring cleaning, out doors as well as in. All should feel an interest in keeping the town cleanly and healthful, and the health officer is powerless unless he is aided by public sympathy and support. Surely no one desires to oppose so desirable an object as the purification of our beautiful village, so let every one do his part, in obedience to the command of the officer.

THE sidewalks in various parts of the town are in bad condition, and much work must be done to make them convenient and safe. Too much must not, doubtless, be attempted at one time, in the way of improvement; but a general exertion should be made at once to remedy some of the worst and most dangerous deficiencies. In many places the walks are rotten and covered with sand, having been left for years to their own destruction, and these should be looked after at once; or, crowded with workers and pleasure seekers as the village will be this summer, there will be a heavy bill for some one to foot. In many places the walks need to be wholly rebuilt, and some, that are in good repair, should be widened. Even on the business streets the walks are in a distressing condition, far more so than there is any occasion for, in the present state of business. There has been sufficient excuse in the past years of depression for the gradual decay of that part of the town

which was hastily built to accommodate the crush of '72 and '73, but that excuse is gone and now is the time to mend.

EVERYBODY turned out to witness the sight that can be seen but once a year—the first vessel of the season; and this year the spectacle was magnificent, for there was not one, but three first vessels, and the way in which they tore a road through the ice to the docks rivalled the feats of Farragut's furious frigates in Mobile bay, and would have excited the envy of a Ross or a McClintock. The three propellers, working together, and pinching off a peice of ice alternately on this side and on that, proved the truth of the old adage of union and strength, and set the fragments whirling from their wheels as April sends them down the "rushing Escanaba." The steamers were followed by several sail vessels which had little difficulty in reaching the docks after a passage had been opened. To the Rust belongs the honor of being the first of the season. But few of those who watched, with so much interest, the approach of the steamers on Monday can realize the anxiety and impatience with which, in the early spring time, the pioneers, not many years ago, looked for the arrival of the vessel that brought to them the first news that they had heard in months of the great world "outside." The long monotony of the winter,—and such winters as they had then would shame the little cold spells we have now. The deprivation of such articles as were forgotten in making the winter provision, and the longing to hear from those from whom they had been cut off for months, all made the coming of the first vessel an event to be hailed with the joy that fills the soul of the cast away sailor as he beholds the approaching, sail of his countrymen. Only those who have been thus secluded through the long northern winter can appreciate the delight of such a visit.

MRS. H. A. BARR has gone to Milwaukee on a visit.

JOHN S. McDONALD, Fond du Lac, was at the Tilden on Tuesday.

THE docks are alive again with men and engines. The first ore from Norway and Quinnesec was received Tuesday.

THE steamer Truesdell, Capt. Henry E. Stines, will touch here this summer, in the place of the Menominee which was the "Chicago boat" last year.

MR. HILLER has sold his interest in the business of J. N. Mead & Co. and will hereafter confine his attention to furniture and fixtures, groceries and glassware.

OUR friends of the Iron Port set up their cylinder press on Wednesday, and their office looks quite metropolitan. The country is growing fast, but the Port can keep pace with it.

THE boys had the engine out Wednesday for practice and proved her to be ready as themselves for serious work. Everything is in excellent order, and Capt. Lott says that the new horse is superb.

THE court house tax is probably carried, though there is a possibility that Ford River has gone strongly enough against it to kill the majorities in the other towns. Escanaba should be ashamed of herself if it is lost, for voting enough could have been polled to bar all oppositions; but tis ever thus with some folks they don't know what they want till it is too late.

AN extra officer would be extremely useful just now, when so many strangers are crowding into town. One day this week a drunken brute made Ludington street a terror to passing ladies, several being compelled to leave the sidewalk and wade, through the sand, across the street. The sheriff was absent on business and the Marshal had retired after his night watch, leaving the streets unguarded. There should be another man put on the force at once.

AN allusion is elsewhere made to the effect of the filthy condition of yards and alleys upon the walks in the lower part of the town. While the water is undoubtedly rendered impure, as all who are obliged to use it will attest, there is a question in the minds of some as to whether, after all, impure water is really injurious. Not long since, a celebrated German physician, who resides in Berlin, and whose name we have forgotten, subsisted for weeks upon water taken from the city sewer, and was much improved in bodily health thereby—this, upon the authority of the Berlin Medical Gazette.

## QUINNESEC.

A bakery is to be added to the conveniences of this place. Mining explorations are waiting for the weather to settle, but the merchants wait for nothing; certainly not for customers, though they wait on them with all diligence and politeness. Good reports come from the explorations on the Brule and Paint rivers. John McKenna, on 20-43-32, is believed to have found good iron. McKenna, Maulby, & Breitung on sect's 11 12 and 14, 42-33, also have good openings; there is also said to be a good showing on 24-

## NORWAY.

Henry Revard found an exploder lying in the road on Wednesday of last week, and holding it in his hand picked it with a pin. The result was the loss of the first joint of several fingers and other smaller injuries.

Pneumonia is quite prevalent in the village and vicinity.

A clairvoyant has been reading in the stars and starways; the destinies of the love lorn maidens and ambitious artisans, who gladly gave their hoarded silver, in exchange for the oracles of the dark-browed, wild-eyed wizard, whom nightly vigils and long continued study of constellations and conjunctions, of key-holes, kitchen doors and cupboard have made learned in the mystic lore of the golden future. We are pleased to learn in this connection, though at second hand, that everyone who has obtained the ear of the oracle is to be healthy, wealthy and wise, to revel in gorgeous luxury, far surpassing the tales of splendor of the east; in fact, all are to have a hotel or a mine, and, after passing through the usual vicissitudes, caused by the devilish machinations of the "dark man," will marry their own truly beloved, who has always been faithful and will live happily ever after.

James Morrell, of Escanaba was looking about last week for a place in which to establish himself in business, and has determined on Norway. His will be a valuable addition to our mercantile interests.

M. R. Hubbard, of Oakfield, Wis., was in town Monday, and has determined to go into business here.

A 200 horse power Corliss engine was received at the Norway on Monday.

Crane and McElroy are building a warehouse for lime, cement, etc., on the lot formerly occupied by Reynold's building, that having been moved to the next lot east. P. McKenna will build a livery stable on Main street near the track. Several houses are building opposite.

Chas. Bush has nearly finished his hotel, and will open the bar on Tuesday. He has a fine place and it will be well kept.

Hager & Johnson's brush is being cut and burned and the general activity in improvement is surprising.

The depot at last. A party of fourteen men, under the supervision of A. S. Rowell, commenced work on the depot on Monday; a few days and our affliction will end, though some curiosity is manifested as to the manner of getting to the depot after it is built. A tank and turn table will also be built at once.

Don't buy your groceries of ATKINS, McNAUGHTON & CO. unless you want something good. They sell only the best and freshest of groceries; their vegetables and fruits are always fresh, being received daily. The celebrated California canned goods at bottom figures. 613w1

McGILLIS & BISSELL of Neenah, Wis., having purchased the business of L. D. McKenna, are now prepared to furnish the people of Escanaba with choice groceries, fresh fruits and vegetables, etc., at bottom prices. They will not be undersold, and their house in Wisconsin affords them the means of placing before our people the freshest of country produce. 613w1

In no way can a leisure hour be spent with more pleasure and profit than in visiting Pool's hot houses and regaling the senses with the beauty and fragrance of the wealth of floral treasures which he exercises so much skill and patience in rearing. He has, this spring, an unusually fine display, both of flowering plants and of ferns and mosses, a large share of which, we learn, are destined to delight the people of Marquette. 613w1

L. D. MCKENNA is the Agent for Schlitz Brewing Co., Milwaukee Lager Beer. 609t.

## TILDEN HOUSE,

Escanaba, Mich.,

BROWN, BUTLER, BLAKE & Co., Prop's.

This hotel has been leased for a term of years and refitted and refurnished anew for the accommodation of the public. The location is grand. Our object is to please all, and our charges will be as low as those of any other first-class house in the country. Brown will be at all the trains. "If you see a tall stout man with light clothes on, that is Brown." 650t

## MERCHANT TAILORING.

The Old Pioneer Clothing House of M. O. Boles, Oshkosh, is the place to purchase your fashionable clothing. This house was the first to establish the system now so popular on Lake Superior, of taking measures and having work done at Oshkosh. Thousands of suits made for Lake Superior people in the last ten years, and our customers always satisfied. Every garment warranted, both as regards material and fit. Mr. Boles will visit the district every few months with full lines of samples of seasonable goods. Satisfaction guaranteed in every instance. Wait for Boles, the pioneer clothier. You will save money by doing so

1880, proclaiming the estimates of value

of foreign coins in United States money</

# The Mining Journal.

A. HORNSTEIN, Editor.]

[Ishpeming, April 17, 1880.

MAIN street has been dusty most of the week.

A NEW music store is soon to be opened in this city.

Dr. Bigelow and wife arrived here Thursday morning.

THE annual invasion of this region by cows has commenced.

THE fashionable color in Ishpeming this season will be red—for a change.

CHILD'S new gallery is at last receiving its finishing touches. It will soon be occupied.

THE American house is the new name of the Little Barnum under its present management.

THE lone fishermen are tinkering their old fishing tackle and getting ready for the war on the wary brook trout.

A POOR woman by the name of Mrs. Wm. Carney will give a dance and raffle at Austin's hall to-night. Admission to the dance free.

THAT old timer, Lindquist, has been sentenced to the house of correction for a year, and Ishpeming must bid a long adieu to her champion bummer.

WILLIAM MOCKLER is going into the draying business in a few weeks. He went below yesterday to purchase a first class spring dray for that purpose.

THAT new open mine at the foot of Main street is getting to be quite a hole in the ground. A force of men and and horses as large as can be worked conveniently are employed on the excavation.

NEW MINING COMPANY.—The Silver Star Mining and Exploring company is the name of the new organization formed here last Thursday evening. The members of the new company are mostly Ishpeming parties. We understand that they will send explorers out west to prospect and take up claims for them.

THE most picturesque locality in Ishpeming, by all odds, is Pine street between Pearl and Division. You don't have to draw on your imagination while passing that section; you have a full view of all the back yards without a single unfriendly fence to obstruct the vision. The occupants of lots in that part are very open in their ways, even to the sacrifice of decency. If they would condescend to draw a veil in the shape of a high board fence, they would very much improve the looks of the street.

[To the Editor.]

THAT LIBRARY AGAIN.—It is said that during the late civil war our greatest victory was won in the hardest battle fought by reserving the heaviest fire for the last, but we never before appreciated the complete demoralization of the enemy just as they were congratulating themselves upon having silenced their opponent. We do now. Now, we could have "Overman's Metallurgy," or "Van Cotta's Ore Deposits" hurled at us every day and never flinch, but to be bombarded with the Rev. Dr. Bushnell, of Hartford, Ct., and not satisfied with that, to send a French proverb crashing into our bewildered brain, and then to add insult to injury by mis-quoting Shakespeare at us! We might possibly survive Dr. Bushnell, and gasp at the French proverb but to handle his dear old quotations with kid gloves, and say there is "something wrong in Denmark." Now, if there is something rotten in the library, why not have said rotten. We would have all excused it, in consideration of the dire necessity that must have provoked the assertion. Alas! there is nothing left for us to do but rally our scattered senses after being so completely hit—so fearfully crushed, and armed only with "intense ire" rush once again into the sanguinary conflict—not to the rescue of "injured innocents," but to the more solemn rescue of our own wounded dignity. It is humiliating to realize that after so "hotly" defending the cause of "injured innocents" that after all "R" is their ablest champion—that "R" has the "firmest respect and honor" for all these injured innocents—that "R" can say "amen" to all the praise we gave them, proving conclusively that our ammunition was all wasted—that our intense ire was all uncalled for! We are overwhelmed; annihilated! We cannot even "deny the allegation, or defy the alligator," but in the meekest of spirits acknowledge that if "R" went Wednesday after Wednesday and found the library closed, of course it was closed; who for a moment ever doubted any assertion that "R" might make. If "R" states that persons draw books from the library without deposit it certainly must be so. If "R" assures us that books are retained months, years, centuries, ages, eternities, we are all instantly convinced of the truthfulness of the assertion. If "R" knows it to be a fact that books are drawn on other than regular days—is there a man—or woman either, so bold as to deny the charge! In course not. If "R" should affirm that she didn't know who wrote the article in the Agitator signed "Voter" we would all wonder who in the world did do it then. If "R" assures us that questions are not charges, we beg pardon that we ever thought

so. Now we shall feel at perfect liberty to ask Mr. A. if he thinks Mr. B. is really an honest man—that's not a charge, it's only a question—thanks again. We are ready to believe anything. We believe you "R" to be a tax payer and a "Voter," and even the Rev. Dr. Bushnell himself, if you only say so. Is not our demotion complete? It has been said reproachfully (of course it is not so) that a woman always will have the last word, but should "R" open out another bombardment:

"I shall fall like a bright  
Exhalation in the evening  
And no man see me more."

J. D. H.

THE fire in the Deer Lake furnace can be seen at night from any high place in the city.

A MOVEMENT is on foot to construct a good wagon road to the Big Mountain Mine.

THE Excelsior furnace caught fire in the roof of the engine room Thursday forenoon; but the flames were extinguished before any damage was done. The apparatus for fighting fire at this furnace is very perfect, as it enabled them to extinguish the fire in short order. The Lake Angeline whistle sounded an alarm, but it was not heard in town.

COMMON COUNCIL.—The first meeting of the new council was a special, called by mayor Swift last Thursday evening, when the board was called to order, the mayor was in the chair and a full council was present. The first procedure of the meeting was to organize for the year and adopt an order of business. After this the mayor appointed the various committees for the year. Following the appointment of the committees it was moved and carried that the council proceed to elect, by ballot, the various city officers to be appointed by that body.

The first office voted for was city marshal, for which Daniel McVichie, the present incumbent, received the unanimous vote on the first formal ballot.

Hon. H. O. Young was next elected city librarian, also unanimously. For city attorney E. E. Osborn was chosen.

Dr. W. T. Carpenter was thereupon appointed health officer, and Daniel McVichie re-appointed street commissioner.

The office of pound master was left vacant until the next meeting, for further deliberation as the great danger and responsibility of the position requires the selection of not only a "strong man," but one who will perform the onerous duties of the office faithfully and with proper dignity. The election of night watchman was also left over until the next meeting. By a unanimous vote it was decided to allow the city officers the same salary this year as they received last. The time for holding regular meetings in the future was changed from every third Wednesday to the first Wednesday of every month. After this last measure the meeting adjourned. As to the officers appointed, comment is entirely unnecessary. It is enough to say that the council has chosen the very best men to be found for the positions, which statement every voter in Ishpeming knows to be a fact. By their actions so far, it is evident that the city board are going to work for the best interests of the entire city, the same as the preceding board, and the tax payers of Ishpeming can rest assured that the municipal affairs will be economically and wisely attended to.

DONAHOE BROTHERS' grocery store is one of the busiest places in Ishpeming, which is caused by the large number of customers who find it to their interest to trade there. They always keep the best of everything in their line, which embraces groceries, provisions, hay, feed, grain, boots and shoes, a fine line of crockery and glass ware, and gents furnishing goods. They also keep on hand a complete stock of crackers, snaps, jumbles, cakes &c., from the celebrated Rockford bakery. This bakery manufactures the best goods in the market, and wherever they are offered for sale take the precedence over all others. People who once use the Rockford crackers refuse to buy any other and Donahoe Brothers in keeping supplied with them only do as they do in all other things—supply their customers with the best of everything. 613tf

HEAVY WAGONS, Carts, delivery wagons, Buckboards and buggies manufactured and repaired in the best manner and on short notice, at our wagon factory. 610-3w WALKER & TISLOW.

### BUY THE BEST. BULLOCK'S LATEST IMPROVED DIAMOND-POINTED ROCK DRILLS.

Prospecting, mining, shafting, tunneling, draining, quarrying and sub-marine blasting. The accompanying cut represents my new drill, "The Little Champion," for shafting or underground prospecting. This machine has ALL OF MY LATEST IMPROVEMENTS, including Trunk Engines, with balanced slide valves to use either steam or compressed air economically. It has also my "Pat. Hinged Swivel Head," "Pat. Thrust Register," (for indicating the thickness of each strata), "Pat. Roller Thrust Bearing," and "Pat. method of changing the feed while the drill is running." The drill rods are all fitted with "Pat. Bayonet clutch couplings," which uncouple by giving the rods one-fourth of a turn. THE HIGHEST TESTIMONY AWARDED THEM for RAPIDITY OF EXECUTION and ECONOMY OVER ANY OTHERS IN USE. For prospecting, these drills accomplish the most IMPORTANT RESULTS otherwise wholly unobtainable. By their use only can mines be penetrated to a depth of from one to TWO THOUSAND FEET through the HARDEST ROCK, at any angle, taking out a core the entire depth, fully developing the strata passed through. Tunnels driven and shafts sunk in from one half to one sixth of the usual time, by using these machines in connection with our Pat. Long Hole Process.

Worthington's Duplex Pressure Pumps. THE BEST MINING PUMP IN USE. Also Water's Perfect ENGINE GOVERNOR. Most durable and economical Governor ever invented. The Brush Electric Light Apparatus. ("LIGHT FOR THE WORLD.") For lighting Mines, Smelting Works, Furnaces, Foundries, Machine Shops, &c., &c., &c. Gives a CLEAR WHITE LIGHT. Cheaper than oil or gas, and from THIRTY TO ONE HUNDRED TIMES THE POWER. Send for Circulars and Prices. All inquiries cheerfully answered. Write for what you want to M. C. BULLOCK, 84 to 86 Market St., Chicago, Ill.

For brightness and durability of colors, are unequalled. Color from 2 to 5 pounds. Price, 15 cents. 584tf

THE MINING JOURNAL.

NO PAPER SENT TO ANY AD- DRESS UNLESS PAID FOR IN ADVANCE.

Entered at the Post Office at Marquette, Mich., as second class matter.

Subscribers ordering their papers transferred to a new address should be careful to give the name of the postoffice to which the paper is being sent at the time, in order to secure prompt attention. Otherwise the mail clerk may have to search through the entire list to find the name.

PARTICULAR NOTICE.—The MINING JOURNAL will not be sent to subscribers after the expiration of the term subscribed and paid for, unless the subscription is renewed. Subscribers can always know when their subscription expires by comparing the number of the printed address on their papers with the corresponding number on the receipts.

All letters of a business character, such as advertisements and communications intended for the columns of this paper, should be addressed to "THE MINING JOURNAL," and not to the editor personally, as is often the case. Only letters of a personal or confidential nature should be addressed to A. P. SWINNEY, Editor.

All advertising sent from abroad must be paid for in advance, whether coming direct from the advertiser or through an advertising agency. Orders from advertising agencies will not be accepted, or receive any attention whatever, unless based on our regular rates, less the usual commission and accompanied by the cash. This rule is imperative, and will not be departed from under any circumstances.

The Iron Cliffs company have found a large deposit of good hematite ore on the Deer Lake road north of Ishpeming, and will commence active mining operations there soon. The extent of the deposit is, of course, uncertain, but a force of men will be put to work there shortly who will test its size.

The movement of ore has already commenced, thus opening the season of shipments to the docks unusually early. Most of the Ishpeming mines began sending out ore this week, and the other mines will no doubt soon follow suit. When the first boats arrive in Marquette and Escanaba they will find every pocket in all the docks filled with ore, and many car loads on the tracks ready to be dumped.

At the Millwaukee mine Messrs. Adams & Foley have just uncovered a new deposit of ore, better and more extensive than any yet opened on the property. It is located at the No. 2 shaft, and is a 50-foot wide vein of soft dark brown hematite very clean and rich. Although the deposit is not yet thoroughly explored, it is from present appearances certain to yield from 15,000 to 20,000 tons the present season if properly worked. Adams & Foley have a very valuable property, it seems.

Work on B shaft of the Iron Cliffs Co. at Ishpeming has just been commenced, and will now be pushed forward vigorously. A shaft has reached a depth of some 70 feet. The large quantities of water still hinder work at this place; but the management hope to overcome the obstacle by cutting a "plait" or drift off the shaft, which is to catch the water and act as a basin to hold it from whence it will be pumped to the surface. By this means it is hoped to keep the bottom of the shaft clear of water and greatly facilitate the work of sinking.

A new process for separating ores has recently been discovered by some parties in Maine, by which it is claimed that very lean ores usually deemed worthless can be profitably separated. They claim to be able to take the ore out of the rock, thereby turning lean into rich ores. If the process is all that is claimed for it, it will enable owners of deposits of lean iron ores to work their mines to a profit, besides bringing into prominence some deposits of other minerals in this region which heretofore were considered worthless on account of their lack of richness, such as the known veins of silver lead and gold bearing quartz.

FAST WORK ON CHARCOAL FUEL.—The Bangor furnace, under the management of Maj. H. S. Piekands, made in the week ending March 11, 313 gross tons of pig iron, and the Spring Lake Iron Co's new furnace, at Fruitport, under the same management made during the same week, 376 gross tons of pig iron, on less than 90 bushels of coal per ton of metal, for each furnace. The following is the record of the new furnace at Fruitport since her start:

Table with 2 columns: Week, Tons. Row 1: First week, 283 gross tons. Row 2: Second week, 313. Row 3: Third, 313. Row 4: Fourth, 313. Row 5: Fifth, 313. Total: Counting 2,396 pounds to the ton.

The best day's work at Fruitport was 56 tons, and that at Bangor, 51 tons.

The Deer Lake Iron & Lumber Co. are now mining ore on their own property near their furnace. They have opened a couple of small deposits of hematite from which they are taking some very good ore. The quantity of ore taken out is yet

very small, neither of the deposits being more than two feet wide. The company is mining and exploring at the same time, and has hopes of eventually finding ore in larger quantities than at present. The locality of their mining operations is about a mile west of the Cleveland Hematite and less than a mile east of the furnace. Should they find ore enough here to supply the furnace, which is not at all improbable, the Deer Lake would become one of the most valuable and profitable furnace properties in the whole country.

THE EXCELSIOR FURNACE.—This furnace, which went into blast two weeks ago, is now working very satisfactorily and making a good quality of iron. The average amount daily made has been twelve tons; but is now being increased constantly, and it is expected that they will be able to make 25 tons per day in the course of two or three weeks.

Two-thirds hematite and one-third hard ore is used. The work of remodeling the furnace has been an extensive job, everything about the place having been entirely changed or rebuilt. It is today almost a new furnace, and as well accoutered as any one stack plant in the county. The stack, which has been raised, is now 44 feet high, with a bell and hopper; hosh 8 feet 9 inches and hearth 3 feet. It is supplied with three large boilers and one small one, one heavy horizontal blowing engine, two blowers 3 feet 6 inches in diameter, with 5 feet stroke one air receiver and two hot blast ovens. Large sheds have been built in front of the casting house where ore and coal is unloaded from the cars and where the crushing is done. A new safe elevator hoist has just been put in. The work of getting the furnace in order and starting it has been under the supervision of Mr. P. H. Carroll, the founder, whose competence as a furnace man is well known.

NEW COMPANY.—There was recently organized at Michigamme, in this county, a corporation under the name of the Northern Mining & Prospecting Co., of which J. P. Dousman is president; Hans Blomgren, vice president; John C. Fowler, secretary; Dr. Joseph Vandevanter, treasurer, and Robert O'Neil, mining superintendent. These are all gentlemen of high standing in the community in which they reside, and the new company, the MINING JOURNAL has faith to believe, has not been organized on a speculative basis, but for the purpose of engaging in legitimate mining enterprises on claims, that have already been secured in the best mining districts of Colorado. Among these claims is the Molly Kelly, in which a shaft has been sunk to a depth of 156 feet, the Adaline, with shaft 125 feet, the Nova Scotia, the Cienus, the Martha, the Concord, with 40 feet of tunnel, and the Enterprise, with a shaft 65 feet deep, in a lode bearing 71 ounces to the ton. These, together with several other claims more recently secured, are all in good localities, enough having been done upon them to prove that some, at least, are of great value. A very high grade ore has quite recently been struck on property within 200 feet of one of these claims, which fact in itself would place a value on the property of the new company, were nothing more known concerning it in that regard. Most of these claims were secured nearly a year ago by Mr. O'Neil, after that gentleman had spent several months in Colorado, and had as fully as possible informed himself concerning mining matters in that region, and at a time when there was little difficulty in securing a choice of the best undeveloped properties. Mr. O'Neil is now on the ground, and will commence the work of development immediately, while at the same time making an effort to secure for the company, such other and additional claims in the Gunnison district as he may consider desirable. The capital stock is placed at \$1,000,000, representing 100,000 shares, of the par value of \$10 each. All of the stock is unassessable, and 50,000 shares have been set aside for working capital. Of this amount 10,000 shares have been placed on the market at \$2.00 per share. This amount, in addition to the considerable sum already expended in explorations, will, it is believed, be amply sufficient to fully develop the property and place it upon a dividend paying

basis. Having a personal knowledge of the gentlemen connected with this enterprise, the MINING JOURNAL has no hesitancy in commending it to the favorable consideration of any and all who may wish to try their fortunes in a legitimate mining venture. A small amount invested in non-assessable shares of this company may, peradventure, return a comfortable fortune to their purchaser—stranger things are happening every day.

THERE is a lunatic down in Jackson who claims to be a weather prophet, and says we are to have more snow now and June than at any time during the winter just past. We recommend that he be suspended in air, for expressing such language.

PECK'S STICK of the 10th inst., has the following item: Gen. Kilpatrick lectured at Marquette, Mich., a few nights ago, to a small but very respectable audience. One of the most respectable men in Marquette is the janitor of the public hall.

Of course he is, and he's our candidate for President in 1894, too; but Bro. Peck, there were six or eight other fellows in the hall who were equally respectable.

HON. WM. A. HOWARD, governor of Dakota Territory, died at the National Hotel, Washington, D. C., on Saturday morning of last week, of neuralgia of the heart. Mr. Howard came to Michigan in 1840, and from that time till the day of his death has been an active politician. He has represented the state in congress three successive terms and has held other offices of trust. His remains were taken to Detroit for burial.

EUGENE FAIRFAX WILLIAMSON, better known as "Gentleman Joe," persecutor of Rev. Dr. Morgan Dix, of New York, is getting deeper and deeper into the meshes. It now appears that he has been amusing himself by obtaining jewelry from New York houses on Pittsburgh drafts, with forged endorsements, and sailing under the name of E. P. Adams. He is also charged with having robbed street letter boxes in Pittsburgh.

We clip the following from the Detroit Evening News of the 19th inst.: The Spurr Mountain Iron company of Lake Superior, went into commission, mostly with Detroit capital, about five weeks ago. Henry N. Walker was the president, Freeman Snyell was the secretary and treasurer, and W. G. Thompson and Capt. Stevens were two of the shareholders. The company was managed, and in 1878 made an assignment to Mr. Norvell. This did not appear to help matters, as a dividend has since been paid. The laborers, or rather those parties to whom they assigned their claims for wages, commenced two suits against the shareholders, and the case was tried in the Wayne circuit court. The defendant claimed that the company should be joined with the shareholders as defendants, but Judge Reilly overruled their plea. Another suit in the superior court, against Thompson and the company, was defended on the ground that the plaintiffs had previously sued the company, singly, in a Lake Superior court, and obtained judgment. Judge Chipman held the defense sufficient to give a verdict for the defendant. Both cases were appealed to the supreme court by the losing parties, and that tribunal has since rendered its decision, reversing the superior and reversing the circuit court decisions, thus giving Thompson an unqualified victory in each case. The amount of the claims was \$28,000.

The railroads of the United States have, through their various associations, been in the habit of keeping "black lists" in which is recorded the names of all persons who have sold or loaned season or trip passes designed only for their own use. The class of persons who have been most guilty of this breach of trust, we are pained to confess are newspaper editors. The editor who would deliberately sell or loan a pass made out in his own name, would be guilty of almost any other crime known in common law. No editor or other member of the press can plead ignorance of the difference between a pass and a ticket. All passes are made for the use of some specific person by name, and are intended to be used by that person alone. All passes, trip as well as season, are absolutely and unqualifiedly not transferable, so that whoever sells, leases, lends or transfers in any way, is guilty of a crime that should and will not be overlooked by any railroad man or corporation; nor should any person who understands the sacred personal character of a pass, refuse to brand as a scoundrel and as deeply guilty he who intentionally violates the principal element that was understood by the receiver as well as by the giver when the pass was issued. It is to be hoped that all honest members of the press will join with the railroads in exposing and denouncing the members who, by these acts, are so rapidly bringing the whole editorial fraternity into disrepute. The western railroad association—covering the territory west of Buffalo, Pittsburgh and Wheeling, north of the Ohio river, west of the Mississippi river, (including Texas) the Pacific coast, and extending to the northern boundary of the U. S., has adopted the following:

Resolved, 1st. That the secretary of the association shall keep a black list, on which shall be entered the names of newspaper editors, publishers, or other persons who shall be reported by any member of this association, who shall obtain any free transportation, or having legitimately obtained any such transportation, shall use it for any other purpose than expressed or implied in the terms specified in the pass or permit, by selling, lending, or in anywise disposing thereof. 2d. That the secretary shall make monthly reports to the members of the association of all parties so reported to him. 3d. That no party so entered on the black list shall be entitled to or be furnished with any free transportation by any railroad represented in this association. 4th. That whenever all parties on whose account any one has been placed on the black list shall notify the secretary that the charge is withdrawn, the secretary shall give notice to the one against whom such party is reported to good standing as to the matter involved.

FUN WITH THE BOYS. ESCANABA.—The Post of last week says: "Every other man in Escanaba is color blind—doesn't seem to know the difference between a

clean shirt and a dirty one.—Cinders. Try an experiment. Wear a clean one for a week, and you come down. If the remarks called out don't disprove the color blindness theory we'll meet the landlord." It wouldn't do Mr. Post, you couldn't appreciate it, and then, you know, it would appear just the opposite in your eyes.

It is reported that the Rev. H. W. Thompson has been or will be compelled by ill-health to give up his natural home, and to seek a more quiet and less exhausting avocation. A Swedish church, writing to Winegar, Miller & Co., under date of the 10th inst., says: "We are coming. Shall start first week next, for Green Bay, and an other one on Tuesday following. By that time, she will go to Escanaba if possible."

The Post asks the question, "What is going to be done with our streets?" and recommends gravel or broken stone being put upon them, but would be satisfied with cedar block pavement. Why not get asphalt—it would be softer. The tracks along the section of block-up, on Third, are evidently being laid, and are thrown from or knocked down by a train, as we have hadly cut and bruised, was insensible, and the roadbed was injured. In the case of the case was sent by telegraph to Supt. Lincoln, who had the man brought here, and Dr. Tracy dressed. At the end of the day, the man was still unconscious, but it is probable that he will survive, as there seems to be no fracture of the skull. From memoranda on the subject, it is learned that the man is Herman Johnson, that he came down the M. I. railroad bound for Menasha, got upon the wrong train, and was thrown from the train, receiving the injuries mentioned. He is carried to the hospital in the city by hotel, at the charge of the railway company.

This man got on the north bound train at the junction, with a ticket for some point below. Conductor Heolbin told him he was on the wrong train and intended to let him off at the next station, but on coming back to him from another car, where he had been taking up tickets, the man was missing, having gone to the platform and jumped off. No one is to blame but the man himself, who must have been a little off his head.

THE various cedar and lumber camps in this county are beginning to break up, and the presence of our friends the shanty men in our midst makes the streets look a little livelier and our hearts feel a little more cheerful. Some of our friends would be a little surprised to see an occasional man on the streets, even if he does not more than tramp down the moss on the sidewalks.

The work on the piers at the head of the canal, which has been going on for the past two months, is now successfully completed. The prospect for an early opening of navigation, when the country is ripe for the harvest, is better than it has been for years. The prospects for an early opening of navigation, when the country is ripe for the harvest, is better than it has been for years. The prospect for an early opening of navigation, when the country is ripe for the harvest, is better than it has been for years.

We are informed by parties down from Whitefish Point that Mr. Barclay, of that place, has been arrested by the police, and is now in jail on a charge of larceny. He is one of the proprietors of a large cranberry marsh lying back of the point, and was charged with having stolen a gun, and a quantity of other property, and is now in jail on a charge of larceny. He is one of the proprietors of a large cranberry marsh lying back of the point, and was charged with having stolen a gun, and a quantity of other property, and is now in jail on a charge of larceny.

PREPARATIONS are under way for the erection of an addition to the north end of the Quincy battery, sufficient to house the batteries of stamps, together with the washing machinery necessary to treat the extra rock which will be produced by the new battery. In view of the short run, was very satisfactory, and indicates that the openings are in bonanza once more. Instead of being, as most of the time they have been, a discouraging kind of barrenness. For the 8 years previous to 1878 the product of mineral per cent of rock stamped, was 2.43 per cent, and the average was 2.43 per cent. There is every reason to believe that the bonanza period of 1878 and 1879, which reduced the product of the last 8 years to 2.43 per cent, is now being repeated. The mineral per cent of rock stamped, is passed, and so encouraging is the outlook at almost all points, that it will not be long before the Quincy battery will be producing a higher percentage of mineral per cent of rock stamped, than ever before in her history.

Marquette is going to have its life-saving, disease-destroying corps augmented by the accession of a homeopathic physician to its medical fraternity. We wonder the citizens of Hancock have never attracted a homeopath. At present all our paths are all-paths, and all are a mystery. It is marvellous that when we have in our midst so many firm believers in the "bait of the dog that bit you" theory, there should be no practitioners of that similar motto: "Similia similibus curantur." In behalf of the aforesaid believers, we call the attention of all homeopaths, wherever situated, to the fact that the Quincy battery, which is held here, whose virgin soil awaits only the treading of homeopathic plows and the pattering of homeopathic potters to make it blossom like a rose.

Cows are permitted to roam at large in the streets of Marquette, and in several instances have trampled on the children. We have heard of several cases carrying babies to the tops of high cliffs—of gypsies stealing children and secreting them for years amid forest fastnesses—of ruffians kidnapping Charlie Kosses and holding them for a princely ransom—but it remains for the city of Marquette to produce a case of cows trampling on children. We have heard of forming other breaches of the peace, under the very eyes of the police, to cowardly belief. If the police would only be more vigilant, and send out their "Outside it is all clear water."

ONTONAGON.—From the Miner of the 10th we get the following intelligence: The weather is all that we can desire; the days are warm and bright; the snow almost entirely melted; the ground is now so hard and firm in the river is rotting fast. The shore ice, however, remains firm, but a good wind to stir up the ice would break it up, and it would send it out. Outside it is all clear water.

In regard to the E. Anse road the Miner says: We are glad to learn that Mr. Davis, the contractor, will but a force of men to work on the road now. We believe that it will be as early as it can be done. It is his intention to put on a strong force of men and push the work through to completion this summer. This road is in the hands of the Ontonagon county, and is out of the woods.

The Ahmeck mine has recently been set off from the Seneca mine and has been placed under the charge of Capt. Daniels, of the Oscoda, who has already commenced the building of houses for the working force. He will make active preparations for mining work at once. If a railroad should finally run here we believe it would scare half the people about half to death, and they'd be awfully sorry for the change it would bring. There are people here who won't be half so contented and well off with a railroad as they now are without one.

GOOD WORK.—On the 27th of last January Freeman Bros. took a contract of McDermid & Hendrie to furnish 55,440 ties for the D. M. & M. R. R. To the casual observer 55,440 ties is not much of a job, but when we consider a moment the number of hard days work, both for men and teams; camps to be built, provisions for the men, feed for the teams, roads to be cut out, the deep snow and the limited time in

which it was done, it is then we begin to get a glimpse of the difficulties to be overcome. They took hold of the work with that energy and push for which they are noted; and after getting their gangs fairly at work began filling their contract at the rate of nearly a thousand ties per day. The ties are well made and of good sound material, 8 feet long, six inches thick and not less than six inches face. They are piled in good shape along the line of road in parcels of from one thousand to five thousand for the whole twenty miles. With the exception of a subcontract for 10,000 which will be completed May 1st, the entire contract is done. The 45,440 ties gotten out by the Freeman Bros. themselves, being delivered and the men, teams and tools brought in.

SPRING "POETRY." Beneath the chilling, wintry blast Beneath the ice-bound bay, A gallant vessel lay, The Tom Boy in the ice, stuck fast.

But, ah! that vessel was the pride of the bay, Of Marquette's lovely bay, As, on a summer's day, So proudly o'er the waves she'd ride, And she so fearlessly and bravely ran, Bode on the raging sea, Her white, so manfully, Her captain steered a watery grave, But now the gentle spring has come, Her captain's quickly gone, And he's his first love down, Upon the foaming sea to roam. In sails and rigging now grand, The harbor she will grace, And every boat she'll race— The sea shall own her just command. Marquette, Mich. S. P.

REPUBLIC.—Now Mr. Highway Commissioner, unless you set to work and build that promised sidewalk from Laxstrom's to our front door, we'll vote against you next time round.

'Tis true we have a very nice town, where almost everything may be purchased that pleases the eye or palate more especially the palate, yet in stead of going in that direction, the heads of families would take their wives and little ones to the hill east and south of the mine, expand on the beauties of the landscape, whisper words of hope and comfort, and breathe pure air from the hill; all would be benefited, and life seem fairer, broader, and more hopeful to these weary ones than could ever be gained by any number of visits to the city.

If my especial friends wish to have a job fishing for me in the river, they had better send around a few more book agents, insurance chaps, and other cheeky individuals who just want my name for the sake of the influence &c. I'll be even with you yet, good folks.

Taking advantage of the hour when our spiritual advisers were engaged with their flocks, I strayed away from the fold, and, making a bee line for one end of the range, determined to familiarize myself with danger, by looking down all sorts of pits and yawning chasms, peering into machine shops and wondering at the derricks and other machinery. Found two or three nice places for committing suicide, but left rather hastily from some niches containing an oil can. Tried to make myself an expert by deciding where the line should be drawn between No. 1 and No. 2 ore. All this I did on the Sabbath, while the ponderous machinery, the horses and mules, and the muscles of about six hundred men were absolutely at rest.

L'ANSE.—Alfred Thurlby of Creston, Iowa, spent a day last week with friends here. He looks better than ever.

Our streets are all dry and in good order. The beautiful snow has left us once more.

Keweenaw Bay is still solid and people are passing over the same every day. A concert was given last Tuesday evening by the pupils of Prof. Chase, at the Methodist church, for the benefit of the professor, to wind up the singing lessons for this season. He is about to leave L'Anse to spend the summer at Lake Linden. The concert was credit to him as well as to his pupils, who have advanced splendidly under his management, and we are only too sorry to hear that he is going to leave us. The church was crowded to its utmost and must have netted the professor quite a little sum.

The following is the list of the circuit court jurors drawn last Tuesday in Baraga county, and which will be in session on the 27th inst, viz: Oscar O. Zellon, Ingeborg Oust, Arvon township; Martin Kelsey, Thomas Scales, John Hand, E. D. Newton, Barney McAntley, George W. Few, J. A. Shafer, Anthony Girard and Samuel Stevenson, Baraga township; Jno. H. Matheas, Anselm Boivin, Robert Trotter, August Menge, John Q. McKernan, A. A. Guck, H. C. Osgood, Jacob Boeringer, Thomas Deschamps, Frank King and Earl Edgerton, L'Anse township; John McGrath and James Kercher, Spurr township.

It is reported that Mr. Alfred Thurlby has been appointed telegraph repairer on the M. H. & O. R. R. for which position the company could not have made a better selection than Thurlby. Why don't some of our young folks take a hold and reorganize the old "Wolverine Fire company?" which is something they ought to take a pride in. We have a good steamer and everything belonging to the same on hand, and which stands at their disposal at any time. Our village marshal is very ill with inflammation of the lungs. The sidewalks in the village of

L'Anse ought to be looked after; some of them are in a very bad condition, and if nothing is done to remedy them, the village may some fine day be obliged to pay for some broken limbs. The postoffice has been removed to Mr. A. G. Shield's building on Main street, which is a good place and gives postmaster Peter Crebassa ample room to square himself.

ITEMS OF INTEREST.

Life of the world is not to be very dull now. The czar hasn't been shot at since last Friday.—Burlington Herald.

PRETTY AND YOUNG. In every feature but her hair, which had grown white from fever, the lady of 35 writes: "I have used Parker's Hair Balsam six months and am more than pleased with it. It has restored the natural color of my hair and given it a silky softness, never had before. There is no dandruff, no falling hair, and it leaves the scalp cool and healthy, and makes me feel like my self again." The beautiful, fresh and vigorous hair, which is the crown of the property of restoring gray or faded hair to its natural youthful color, and entirely freeing the head from dandruff and itching, surprises no less than it pleases. Sold by all druggists at 50 cents, and \$1.00, by all first-class druggists.

A Towanda, Pa. sign reads thus: John Smith, teacher of cowslips and other diseases—grammar fault in the postscript, fresh salt herring on draft—like-wise Goo-freys cordial—pates assages and other garden truck N. B. based on fiction, no property, no meaning, chesney—also singing by the cure.

"Please pass the butter" is obsolete. "Allow the oleomargarine to slide down this way," is now the proper catch.

EXCESSIVE HEAT. And improper food at this season of the year may speedily carry you to the grave. Parker's Ginger Tonic should be used in the most judicious manner, as it is unequalled for nursing mothers with teething children, and not only cures Diarrhea, Dysentery, Cholera, Cholera Infantum, Colic, Gravel, etc., but prevents those dangerous attacks. By its corrective action on the digestive apparatus it cures Headache, Indigestion, Flatulency, and all the ailments which attend the bowels and enables you to enjoy the fruits and vegetables of the season. Buy a 50-cent, or \$1.00 bottle and try it. Sold by all first-class druggists.

It is odd, and sometimes melancholy to see a man trying to "make up his mind" when he has no material on hand to work with.

A FLAGRANT BREATH AND PEARLY. Are easily obtained by cleansing your teeth daily with that justly popular dentifrice, Scott's Emulsion, which is a most effective remedy. It imparts whiteness to the teeth, a delicious aroma to the breath, and preserves intact, from youth to old age, the vitality of the stomach which will destroy the strength and health of the system. Its effects are counteracted with Soda-water, and this pure tooth-wash protects the dental surfaces by removing every impurity, and prevents the decay of the teeth. Ask your druggist for Scott's.

A young lady of New York, who is partly deaf, is in the habit of answering "yes" to everything which a gentleman says to her for fear he might propose to her and she not hear it.

THE GREATEST BLESSING.—A simple harmless remedy that cures every form of Piles, hemorrhoids, by keeping the blood pure, stomach regular, kidneys and liver active, is the greatest blessing ever conferred upon man. Hop Bitters is that remedy, and its ingredients are being blessed by thousands who have been saved and cured by it. Will you try it? See another column.

If children were taught to say "mother" instead of "ma," the blood-curdling cry of a young goat on the street would never cease an anxious mother, and her group of children, to hear the matter with her darling.

KIDNEY DISEASES. Kidney diseases afflict a greater part of the human race, and they are constantly on the increase, but when the disease is in its early stages, it may be cured, and the patient may be made healthy and happy. Do not delay, but get the best medicine for the cure of this disease. It is a simple matter, and the cure is within your reach.

DO A FAVOR TO A SICK FRIEND. If you have a friend suffering from any disorder of the kidneys send them a package of Dr. Thomas' Electric Oil. It is a most effective remedy, and its great tonic power is especially directed to these diseases, and it quickly relieves the distress and cures the disease. Have a few bottles on hand, and you will be able to do a good deed for your sick friend.

Patrick dressing for a party—'Behold now, and I shall be able to get on these boots till I've worn them a time or two.

Ask some men for a local notice they answer that they are not interested in a paper is never read. Let the same man get caught kissing his neighbor's wife, or trying to hold up the sign of a house, and you will find that the same man changes instantly, and if they office is in the garret of a seventeen store building, they will climb to the top to beg the editor to "keep their names out of it" in his paper, you know.—Ex.

S. Chadwick, Arcadia, Wayne Co., N. Y., writes: "I have had severe attacks of asthma and cough, and I am now cured by Dr. Thomas' Electric Oil; the first dose relieved me in one hour. I continued taking it in increasing doses until I was cured. I had not had an attack of it since, now nearly one year."

An Illinois woman has named her baby "Pinafore." Probably because she never "What? Well, compared with the other children of Dr. Thomas' Electric Oil, which is the only remedy that has such wonderful cures for whooping cough, diphtheria, cold, burns, wounds, sores, lumps, &c.

BETHANY, ONTARIO. GENTLEMEN.—I feel it my duty to say a few words in regard to the great benefit I have received from the use of one of the remedies of the world, that is, Dr. Thomas' Electric Oil. I was one of the greatest sufferers for about fifteen months with a disease of the throat, which caused me to be deaf. I tried everything that could be done through medical skill, but without relief. As a last resort, I tried the Electric Oil, and in a short time my ear was cured and hearing completely restored. I have used this oil in several instances, it has effected cures of inflammation of the lungs, sore throat, coughs and colds, cuts and bruises, &c.; in fact, it is our family medicine. Yours truly, Mrs. W. J. Lane.

Robert Lubbock, Cedar Rapids, Iowa, writes: "I have used Dr. Thomas' Electric Oil both for myself and family for diphtheria, with the very best results. I regard it as one of the best remedies for this disease, and would use no other."

People & Billou, Druggists Cedar Rapids, Iowa, write: "We have never sold any medicine that gives such satisfaction to the customer and pleasure to the seller as Dr. Thomas' Electric Oil."

Messrs. Parker & Laird, of Hillsdale, write: "Our Mr. Laird having occasion to visit Scotland, and knowing the excellent qualities of Dr. Thomas' Electric Oil, he has written to us with some of his friends, who speak for itself. We may say that in several instances it has effected cures when all other remedies had been pronounced incurable by eminent practitioners."

"Grammar don't amount to nothing no way," said the man with the greasy vest; and we were nervous to doubt his sincerity.

St. Margaret's Hope, Orkney, Scotland.—Messrs. Parker & Laird: I am requested by several friends to order another parcel of Dr. Thomas' Electric Oil. The last lot I got from you having been tested in several cases of rheumatism, has given relief when doctor's medicines have failed to have any effect. It is an excellent quality of this medicine should be made known, that the million of sufferers throughout the world may benefit by its providential discovery.—Yours, etc., Gilbert Laird.

The great book of General J. B. Hood of his personal experiences in the United States and Confederate States Armies, entitled "Advance and Retreat," is being pushed for sale, as much on its merits as a valuable contribution to the history of the war, as by the ladies of the Southern and Western States, who use their personal exertions to induce their gentlemen friends to subscribe three or four dollars for its purchase, and thus add their share to "The Hood Orphan Memorial Fund," which has published the book through General G. T. Beutegger, whose Post Office box No. 200, New Orleans is crowded with letters from all parts of the country with inquiries as to the duties and privileges of agents, &c. speed them in their good work to help the orphan and fatherless.

Never mind what folks say about other preparations. They are not to be compared to Hood's Gilt Edge Tonic for Dyspepsia.

Here is another evidence that the times are improving, and all necessary household articles are increasing in price. A young man in Fredonia sold his wife to a neighbor, a few days ago for \$50. They used to be "given away."—Ex.

THE EMPRESS OF RUSSIA.

How She Was Wooded and Won. London Cor. Baltimore Sun.

From the memories of the Count de Reiset I translate the following, as he is the last of an old school of diplomats who leave their mark at every court in Europe, carrying hence in return recollections and regrets which they are one day sure to publish: Thirty-nine years ago this very month of January, the Grand Duke Alexander of Russia set out, accompanied by Count Orloff and a numerous suite, to visit the various courts of Germany, where princesses, marriageable and suitable, were officially reported to exist. He went to Berlin, of course, and to several other of the North German capitals. He arrived shortly afterward at Frankfurt and put up at the Hotel de Russie. But no marriageable princesses were to be found at Frankfurt—at that time a free republic.

It was only to be the halting place for the night and Karlsruhe their goal, where the Princess Alexandra, who afterward became duchess of Saxe-Coburg-Gotha, and the Princess Maria, of Baden, afterward duchess of Hamilton, and the mother of the Princess of Monaco, whose divorce suit at Rome is a cause celebre, formed a part of the greatest attractions in Germany. The imperial travelers were leaving Frankfurt, therefore, when the duke of Hesse-Darmstadt sent an invitation to the grand duke begging his company at the neighboring castle of Darmstadt. The young prince, somewhat unwillingly accepted the invitation. The dinner was a family one, and the young princess Marie did not appear. Alexander was even ignorant of her existence for her name had not appeared on the official list of German princesses aspired to the hand of continental princes. In the evening, however, the grand duke, while passing through the dining room of the castle, met a young lady accompanied by Mlle de Grancy, her governess; they were going to the drawing-room for tea, and the young lady modestly stepped aside to let the prince pass. Seeing this young lady so nice and so gentle, the grand duke asked of the Hessian gentleman who she was.

"This her highness, the Princess Marie of Hesse." "Indeed," said the grand duke, "how old is she?" "Immediately on reaching the dining room he begged to be presented to her. The Princess Marie was an admirable young girl—modest, simple, and charming. She had been brought up none what in the Cinderella fashion in the family of Hesse. The grand duke was struck still more by her retiring goodness and modest beauty, and during the evening conversed with her frequently. On his return to Frankfurt the grand duke scarcely spoke a word to the gentleman of his suit, and retired at once to his apartments. The following morning Count Orloff (now Russian ambassador-elect to London) waited on the prince to receive his orders and to learn the hour he had fixed for his departure for Baden.

"My dear count," said the grand duke, "we need go no further, I have made my choice; my journey is at an end." "What?" replied Count Orloff, astonished, "what choice has your imperial highness made?" "I shall marry the Princess Marie of Hesse if she will do me the honor of granting me her hand." "But," said the count, "from every point of view such a thing is impossible. The Princess Marie has not even been placed on the list of German princesses now marriageable. She is in weak health, and, moreover, too young. Your highness has not yet seen the Baden princesses, and the grand duke would be offended if you did not go to Karlsruhe!" "If necessary, for politeness sake, I shall go to Karlsruhe; but I shall only marry Princess Marie, who belongs to a family that has already given Russia one empress, and which is one of the most illustrious and ancient in Germany."

Count Orloff was in despair at this definite speech, and wrote off at once to the Emperor Nicholas. Indeed, this news was received with astonishment in the imperial family. The Princess Marie was known scarcely at all, having, since the death of her mother, been brought up privately by Mlle. de Grancy. The most intimate friends of the imperial family did their utmost to thwart such an alliance. But the Emperor Nicholas, whose affection for his son was unbending, would not oppose his inclination, and said almost publicly, in order to put an end to the various rumors afloat: "Princess Marie of Hesse, like all other German princesses, is to be found in the Gotha Almanach. She is, moreover, a charming young lady, who will make the happiness of our son. Both the empress and myself think that Alexander ought to marry according to his liking." It may be easily imagined what joy this news caused to the Hessian family. From that moment the gaze of the whole of Europe was directed to that young girl, so modest and so accomplished, who was soon to ascend one of the greatest thrones in the world. From the Count de Reiset I cease to quote, but must add, by the light of my own brief experience in touring to and from St. Petersburg, that I have never heard but one voice of love and admiration for this empress, who never forgave her maiden simplicity, modesty, and virtuous bearing. She was born on the 8th of August, 1824, and married the 28th of April, 1841, just about four months after the accidental meeting at Darmstadt I have described from Count de Reiset's memoirs.

ENGLAND'S WEAK SPOT.

How She Can be Starved Out in Case of a War. London Saturday Review.

It has often been asked by protectionists what England would do if she found herself at war with another maritime power. So long as America is able and willing to send us as much corn as we want, it matters nothing to the consumer whether or not it pays the English farmers to grow corn. It does not, that is only a reason why the farmer should grow something else instead. If the American producer can undersell him in wheat, or even in beef, he may in turn undersell the American producer in vegetables or in dairy produce. But in the event of England being at war this cheerful way of looking at the question would plainly be out of place. A whole population cannot be fed on early vegetables or on eggs fresh from the nest. The quarter loaf is the only thing that can do the work on a sufficiently large scale, and the quarter loaf is no longer to be had within the four seas. It is made for the most part of American wheat, and that wheat must be brought to this country before it can be turned into bread. It is useless to talk of breaking up pastures and laying down land in wheat ones more. That might serve our turn if we were still in the days when the next best thing to a war was the preparation made for waging it. But if England were engaged in a conflict conducted on the latest models, the whole business—preliminaries, fighting and negotiations for peace—might be over in less than a year, in less, that is to say, than the interval between one harvest and another. Where would the food of the nation come from during that time? Where, for example, would it have come from if we had found ourselves at war with a great power last autumn? We must either have drawn our supplies from the same quarters which are yielding them now, or have gone without them altogether. One look at the figures which tell of the weekly import of wheat from the United States, and of that "visible supply" which is to furnish the imports of future weeks, is enough to make this plain. With this source of food closed against them the great majority of Englishmen must have starved. The moment that war had broken out, an adversary, if he commanded any naval strength whatever, would have devoted the whole of it to closing this supply against us. In no possible way could he have served his own ends so well or compassed our defeat so easily. Supposing him to have succeeded, there would have been nothing for it but to sue for peace. If once the government had been confronted by the alternative of submission or famine, no amount of resolution would have availed them anything. They might have been willing to choose famine in their own persons, but they would speedily have been set aside in favor of a cabinet cast in a less heroic mold. No doubt we have a large and very costly navy afloat; that is not denied. But, large as it is and costly as it is, is it large enough to answer all purposes which in case of need it would have to answer. It must be remembered that if England were at war with a maritime power—perhaps with two maritime powers at once—she would not be in a position to send her navy to protect her commerce with food-producing countries. Her ships would constitute an indispensable element in her defensive strength. With one considerable fleet engaged in bombarding an enemy's coast, and another busy in protecting our own coasts against even the possibility of invasion, and a third cruising in Indian or colonial waters, how many ships could be spared for the yet more essential work of conveying grain ships from America? It may be answered that this, as being the most essential of all the functions which the fleet could have to discharge, would be so to say, a first charge on our naval resources. Then which of the other three is to be neglected? Are we to forego what might conceivably be the only means open to us of crippling our adversary, or of leaving our own coast undefended? Or, if neither of these duties are neglected, which of the colonies is it that is to be left prey to the sudden descent of some daring commander? What is needed, if the food supply of the country is to be really secured in time of war, is a navy strong enough to spare all the shipping we want for the protection of the main ships without making any one of the three other fleets that will have each its work marked out for it. Can this, or anything like this, be said of the English navy in 1880? But we will not discuss that.

**Fashionable Women.** Fashion kills more women than toll or sorrow. Obedience to fashion is much greater transgression of the laws of woman's nature, a greater injury to her physical and mental constitution than poverty and neglect. The slave woman at her task will live and grow old, and see two or three generations of her mistresses fade and pass away. The washer woman, with scarce a ray of hope to cheer her in her toils, will live to see her fashionable sisters die all around her. The kitchen maid is hearty and strong, when her lady has to be nursed like a baby. It is a truth that fashion-panpered women are all but useless for all the ends of human life. They have but little force of character, they have still less of moral will, and quite as little of physical energy. They live for no great purpose in life; they accomplish no worthy ends. They are only doll forms in the hands of milliners and servants, to be dressed and fed to order. They dress nobody and save nobody. They write no books; they set no rich examples of womanly manly life. If they rear children, servants and nurses do all, save to conceive and give them birth, and when reared what are they? What do they ever amount to but weak scions of the old stock? Who ever heard of a fashionable woman's child exhibiting any virtue of power of mind for which it became eminent? Read the biographies of our great and good men and women. Not one of them had a fashionable mother. They nearly all sprang from strong-minded women, who had as little to do with fashion as with the changing clouds.

IT WAS SO TO BE.

BY MARY H. RAY.

He was lean, and tall, and thin, She was fat and twenty-three; He had lands and loss of money, Nary dollar she.

He was dainty and dapper, She was ill that health could be; He enjoyed the lightest diet, Stronger victuals she.

He was single, loveless, lonely, She was full and happy free; He was looking for a dining, Mints of money she.

He proposed and she accepted, (Wine ones said 'twas so to be.) They were married, Were they happy? "Much," said she.

First a difference rose at table; He had ordered toast and tea, Crackers light and granam gruel; "Mutton chops," said she.

"Bills for dress, and bills for bonnets Bills will ruin me," said he. "Can't afford to pay them longer," "Such a life," said she.

With other men she talked and lingered, Laughed and joked in pleasure; He grew angry-eyed and jealous, "Only friends," said she.

She grew fast, and he grew furious; A suit in court, and they were free, While the knowing landlord and whisperer "It was so to be."

**A Wonderful Feat of Memory.** Phrenological Journal. The history of the celebrated conjuror, Robert Houdin, furnishes a remarkable example of the power of memory acquired by practice. He and his brother, while yet boys, invented a game which they played in this wise: They would pass a shop window and glance at it as they passed, without stopping, and then at the next corner compare notes and see which could recollect the greatest number of things in the window, including their relative positions. Having tested the accuracy of their observations, returning to the window, they would go and repeat the experiment elsewhere. By this means they acquired wonderful powers of observation and memory, so that running by a shop window once, and glancing as they passed, could enumerate every article in it.

When Robert became a professional conjuror, this habit enabled him to achieve feats apparently miraculous. It is told of him that, visiting a gentleman in a friend's house, where he had never been before, he caught a glimpse of the book case as he passed the half-pantry door. In the course of the evening, when one of the company expressed anxiety to witness some specimens of his power, he said to his host: "Well, sir, I shall tell you, without stirring from this place, what books you have in your library." "Come, come," said he, incredulously, "that is too good." "We shall see," replied Houdin; let some of the company go into the library and look, and I shall call out their names from this." They did so, and Houdin began: "Top shelf, left hand, two volumes in red morocco, 'Gibbon's Decline and Fall;' next to these, four volumes of half calf, 'Boswell's Johnson;' 'Rasselas,' in cloth; Hume's History of England,' in calf, two volumes, but the second one wanting; and so on, shelf after shelf, to the unspeakable wonder of the whole company. More than once a gentleman stole into the drawing room, certain that he would catch Houdin reading a catalogue, but there sat the conjuror with his hands in his pockets looking into the fire.

BUSINESS NOTICES.

MISS. JOLLY, of Chicago, is about to open a MILLINERY establishment in Prof's block, on Washington street. Ladies will find it to their advantage to give her a call before purchasing elsewhere. 613w1

**To Rent.**—A good house, in good repair; has ten rooms, and is centrally located. Rent low to a good tenant; possession given May 1st. Enquire of or address H. M. Nichols, Marquette. 612r

**Counting Under Difficulties.** He came up a little late, stepped in without ringing, and striding softly into the parlor dropped into an easy chair with the careless grace of a young man who is accustomed to the programme. "By Jove," he said to the figure sitting in the dim obscurity of the sofa, "my Jove, I thought I was never going to see you alone again. Your mother never goes away from the house nowadays, does she, Minney?"

"Well, not amazingly frequently," cheerfully replied the young lady from the sofa, "Minnie's away so much of the time now I have to stay in."

In the old hickory at the end of the house the moping owl complained to the moon much in his usual style, the katy-dids never sang more clearly, and the plaintive cry of the whip-poor-will filled the night the same.

"And, by George," he said to a friend fifteen minutes later, "if I didn't leave my hat on the piano and my cane in the hall. Strike me blind if I knew I had any clothes on at all! What I wanted was fresh air, and I wanted about thirty acres of it, and mighty quick, too."

**A Large Legacy to a Miner.** Virginia (Nev.) Enterprise. T. J. Cooper, of this city, left last night for London, Eng., to get the sum of £200,000, left him by will by his cousin, Charles Barber, late a merchant in Calcutta. Mr. Cooper has been in this city some sixteen years. He was for a long time rope-man at the Savage, and Hale and Norcross mines, and of late has occupied the same position at the C. and C. shaft. Mr. Cooper is going on no wild-goose chase. Some two months ago he saw himself advertised for in an English paper, when he wrote to the proper parties and satisfied them that he was the T. J. Cooper they were in search of, and money was sent him by the court of chancery on which to go to England and get the amount left him. His father, who resides near Clinton, Iowa, will accompany him to England. Mr. Cooper will return in this city with his wealth, as he leaves his wife and family here. Mr. Cooper was pretty well used in this place before the big dice, but since that time he has had it about as good as any other man working at the mines for wages.

"See that my granite kept green," he warbled under the window of his fair one's domestic one pleasant night last week, "I'll tend to the grave, business, young man," she said to the surprised parental ancestor, as he poked an old musket out of the second story window. No more concert that evening.

**WANTED** I wish to secure the services of a few experienced MINING MEN to take charge of explorations in the Menominee Iron District. Men who can give satisfactory references can secure steady employment and good pay. J. M. L. NGAYER, Agt., Lake Superior Ship Canal, Railway and Iron Company. 613w8

TRY A MAGNOLIA HAM!

As to the excellence of the MAGNOLIA there can be no question. This brand has been subjected to the severest tests in all climates, and attained the highest reputation wherever used. It has steadily and firmly grown in favor at home and abroad, and for the reason that it is of superior quality. They are cut in the interest of the consumer, avoiding all waste, cured uniformly, and are just as represented—as near to perfection as any hams have been made to this time.

## EXECUTION SALE.

By virtue of a writ of  
habere facias issued out of and under the seal  
of the circuit court for the county of Mar-  
quette, in the state of Michigan, to me direct-  
ed and delivered, wherein Amos R. Harlow is  
plaintiff and John E. Sullivan is defendant,  
against the goods and chattels, lands and tenements  
of the said defendant, for the sum of two  
hundred and seventy-eight and fifty-two hun-  
dreds dollars (\$278.52), and twenty dollars (\$20)  
costs, I have levied upon all the right, title and  
interest of the said John E. Sullivan, in the  
following described piece or parcel of land,  
situate in the city of Marquette, county of  
Marquette and state of Michigan: Commencing  
at the south east corner of lot numbered  
one (1), in block numbered five (5), of Harlow's  
addition to the village (now city) of Marquette,  
and running westerly along the line of Wash-  
ington street, along the south line of said lot,  
two (2) rods, thence northerly on a line parallel  
with Fourth street, five (5) rods, thence easterly  
on a line parallel with Washington street two  
(2) rods, to the west line of Fourth street,  
thence southerly along said Fourth street,  
to the place of beginning. I shall sell at public  
venue, on Monday, the third day of May,  
1880, at ten o'clock in the forenoon of that  
day, at the front door of the court house, in  
said Marquette, that being the place of  
holding the circuit court for the county of  
Marquette, all the right, title and interest of  
the said defendant in and to said premises, and  
the hereditaments and appurtenances there-  
unto belonging, to satisfy said execution, and  
costs and expenses allowed by law.  
Dated March 12, 1880. JACOB DOLF,  
Under Sheriff of Marquette county.  
F. O. CLARK, Attorney for plaintiff. 6067r

## NOTICE!

To avoid imposition, purchasers of Waltham  
Watches will observe that every genuine watch,  
whether gold or silver, bears our trade-mark  
on both case and movement.  
Gold cases are stamped "A. W. Co." and  
guarantee certificates accompany them. Sil-  
ver cases are stamped "Am. Watch Co., Wal-  
tham, Mass., Sterling Silver," and are accom-  
panied by guarantee certificates, signed R. E.  
Robbins, Treasurer. The name "Waltham" is  
plainly engraved upon all movements, irre-  
spective of other distinguishing marks.  
This caution is rendered necessary by reason  
of the fact that the Waltham cases are fre-  
quently separated from their movements, and  
put upon worthless movements of other  
makers, and vice versa, thus affecting injuri-  
ously the performance of the watches, and  
vitiating their guarantee, which is in-  
tended to cover only the complete watches  
wholly made by the Waltham Company. It  
is necessary, also, because it is so notorious as to  
be a public scandal, that there is great fraud  
in the metal quality of both gold and silver  
cases as now generally sold. We have demon-  
strated by frequent assays that many gold and  
silver cases offered in the market, are debased  
from 10 to 20 per cent. from the quality they  
assume to be. This is a fraud upon the pur-  
chaser, and accounts for the low prices at  
which such cased watches have been sold.  
AM. WATCH CO.,  
WALTHAM, MASS.

The genuine Watches of the American Watch  
Co., of Waltham (cases as well as movements),  
are offered in great variety and at lowest  
prices by their agents,  
M. S. SMITH & CO., Jewelers,  
Cor. Woodward & Jefferson Aves., Detroit.  
Only One Price. Plain Figures.

## CHANCERY SALE.

In the circuit court for  
the county of Marquette, in chancery.  
Peter White, complainant, vs. Mary Ann Fin-  
ney, James J. Finney, Alfred E. Finney, Wal-  
ter C. Finney, George S. Finney, Frances C.  
Thompson and Harriet C. Conklin, defendants.  
Notice is hereby given that in pursuance of a  
decree of the said court, made and entered in  
the above entitled cause on the 2nd day of  
December, A. D. 1879, James E. Dalliba, a  
circuit court commissioner in and for the  
county of Marquette, Michigan, will sell by  
public vendue to the highest bidder, on  
Wednesday, the twenty-first day of April, A. D.  
1880, at eleven o'clock in the forenoon, at the  
front door of the court house, in the city of  
Marquette, in the county of Marquette, and  
state of Michigan, (that being the place where  
the circuit court for said county is held) all  
those certain pieces or parcels of land described  
as follows, viz: The piece or parcel of land sit-  
uated in the city of Marquette, in the county of  
Marquette and state of Michigan, known and  
described as lot number six (6) of block num-  
ber seven (7), of the thirty-six acre subdivi-  
sion of the village (now city) of Marquette, being  
the land platted by John Burt, Charles John-  
son and others, known as lot number two (2), of  
section twenty-three (23), in township forty-  
eight (48), north of range twenty-five (25) west,  
also the undivided one-half part of the north-  
east quarter of the southwest quarter of sec-  
tion six (6), in township forty-seven (47), north  
of range thirty (30) west, situated in said county  
of Marquette, and containing forty (40)  
acres. Also the following described parcel of  
land situated in Schoolcraft county, Michigan,  
to-wit: The northwest quarter of section  
twenty-eight (28), in township forty-seven (47),  
north of range twenty-two (22) west.  
Dated Marquette, Mich., March 4, 1880.  
JAMES E. DALLIBA,  
Circuit Court Commissioner in and for Mar-  
quette County, Michigan. 6071r  
W. P. HEALY, Complainant's Solicitor.

# The Mining Journal.

Ishpeming, April 17, 1880. [A. HORNSTEIN, Editor.]

NOTICE TO CORRESPONDENTS.—Communica-  
tions for the Ishpeming columns must be sent  
to the editor of this department to receive any  
attention in the future. No notice whatever  
will be taken of communications designed for  
this department unless this rule is complied  
with. No exception will be made in favor of  
any person.

THE snow still lingers in the woods  
and on the hillsides.

CLIFFORD will hold forth in this city  
next week Tuesday, Wednesday and  
Thursday evenings.

THE waltz club closed their series of  
dances with last Wednesday's party.  
There will be few if any more dances  
here this season.

THE number of stores in this city is  
still on the increase. Whether the in-  
crease in business warrants the same  
only time can tell.

L. H. HINDS, of the New York mine,  
left this week to take a new situation  
on the range, in the employ of the Me-  
nominee Iron Co.

THAT street leading to the M., H. &  
O. depot is again in all its glory. It is  
reveling in its usual springy dose of  
mud. Will this always remain so?

AND now a full fledged spiritualist  
wants to come to Lake Superior and  
deliver lectures, at least he has written  
to engage a hall for that purpose.

WINTER gave this region a parting  
kick in the shape of a driving snow  
storm which tried the patience of the  
oldest inhabitants who ought to be  
used to such things.

THIS is pay day week at several of the  
mines, and, of course, a glorious week  
for the boys. As we go to press the  
prospects for an unusually large har-  
vest of window glass are very flattering.

THE members of the Happy Hours  
club intend to pass a few happy hours  
tripping the light fantastic at Austin's  
hall next Wednesday evening, the 21st  
inst. They will not fail to have a good  
time.

THE temperance meeting at the  
Swedish Lutheran church, Sunday  
evening last was attended by an un-  
usually large number who were addressed  
in an able manner by the Rev. J. F.  
Borg, in the Swedish language.

A MIXER at the Cleveland, named  
Sullivan, was struck on the foot by a  
piece of falling ground Tuesday after-  
noon, receiving a severe cut across the  
instep and disabling him from work  
with a painful but not dangerous  
wound.

SINCE the new improvements were  
inaugurated at Austin's hall, the man-  
agers can hardly accommodate all who  
want to occupy it. If there were twelve  
nights in the week the hall could be  
rented for every one. We knew it  
would be so.

THE opening of a bed of hematite  
ore by the Iron Cliffs company, just  
north of the city, on the Deer Lake  
road, will probably result in the closing  
of the highway at that place, and com-  
pel the Deer Lake folks to find a new  
way into town.

AT the Tuesdays fire the hose were  
subjected to the severest test that they  
have been put to since they were in  
use, and it is no wonder one section of  
them burst. It was almost 200 feet  
from the engine to the fire, one half of  
the way being up hill.

NEW locomotives are daily arriving  
from below to be utilized on the Pepin-  
sula division this season. The ore traf-  
fic is already commencing, several new  
trains having been on the division for  
several days this week. Oh, but it will  
be a boomer this year, and no mistake.

DRAMATIC.—Clifford's troupe will  
play M'Liss, Black Diamond and  
Uncle Tom's Cabin on their first,  
second and third nights respectively.  
Miss. Maud Oswald and Tom Coleman  
are the leading lights of the company.  
The latter is an old favorite with  
Lake Superior people.

LAST evening the Ishpeming branch  
of the Marquette Chasseurs gave their  
ball at Austin's hall. Although we go  
to press before the dancing took place,  
we are safe in asserting that it was a  
social success, for it could be nothing  
else under the management of the  
squad.

WHILE on Strawberry hill they were  
crying for more water, at the Excelsior  
furnace, on the south side of the Burt  
hill they were having an overdose of it.  
It came down the hill like a spring  
freshest most every day last week, al-  
most flooding the ground floors and  
causing serious hindrances to the work.

ACCORDING to the latest postal regu-  
lations, money orders can be sent to al-  
most any part of Europe and even to  
Anglo in Africa, through any money  
order office. The foreign money order  
system has been greatly simplified of  
late and the rates reduced. Rates to  
France and Germany are but little  
higher than domestic rates.

A FEW cisterns or reservoirs are  
needed in this city to supply water in  
case of fire in those parts of the town  
located farthest from the creek.  
There are several localities which can-  
not be reached by the hose of the de-

partment, where a fire could spread  
unchecked if once started. There are  
a few reservoirs in the swamp, but these  
are never brought into use. Where a  
couple are most needed is on the hill  
in the residence portion of the town.

THE new Lake Superior machine  
shop is to be a solid stone building and  
one of the largest of the kind on the  
peninsula.

PERSONAL.—Mr. G. W. Benedict,  
accountant for the Cleveland company,  
who has resided here for the past few  
months, will return to Marquette next  
Monday and re-open the offices of the  
company there.

Mr. and Mrs. W. H. Walters left last  
Monday for a week's visit to friends  
below.

THE summer time table on the North-  
western railway will be published this  
year almost six weeks sooner than on  
previous years. The passenger trains  
will begin to run on summer time to-  
morrow. As near as we can learn, the  
south-bound train will leave half an  
hour later and the up train will arrive  
an hour sooner; the two trains are to  
meet at Negaunee.

THE Ishpeming foundry has just  
turned out a new 60 horse power en-  
gine for the Saginaw section 4 mine,  
and is just finishing a large boiler for  
the Winthrop. Although Messrs. Rood  
& Ray have their shops crowded with  
work; they turn out only the best qual-  
ity of machinery and their work never  
fails to give satisfaction. They have  
an increased force at work in order to  
enable them to fill all orders promptly.

SERIOUS ACCIDENT.—A most disas-  
trous accident occurred to William  
Spargo, a miner at the Cleveland, early  
Tuesday morning. While holding drill  
a scale of rock fell from the wall near  
him, hitting him in its descent, and  
horribly mangled his right arm. He  
was taken to the hospital where he now  
lies. His arm was found to be so badly  
crushed as to necessitate amputation,  
which operation was performed the fol-  
lowing day. Spargo is an Englishman,  
35 years of age, and an experienced  
miner.

DESIRABLE residence lots are be-  
coming scarcer in Ishpeming every  
year, and it will not be long before  
none will be vacant in the present city  
plat. It will then be a knotty problem  
where to procure new building sites  
anywhere but in the swamp. On every  
side where the city could possibly grow,  
mining operations have barred the  
way. Meanwhile the lots yet vacant  
are filling up very fast. Somebody  
ought to lay out a new addition to the  
town before all the land is turned into  
open pits.

DIED.—An aged Norwegian lady,  
named Martha Friwald, known among  
our Scandinavian population by the  
endearing name "Grandmother," died  
last Sunday and was buried the fol-  
lowing day. "Grandmother" was a  
great pet among her countrymen and  
countrywomen here, and will be great-  
ly missed by them. She was always on  
hand in case of illness, nursing the  
sick and cheering the afflicted. Many  
is the person, old and young who has  
experienced her tender care, and it will  
be long, very long, before she will be  
forgotten.

FIRE.—The residence of A. K. God-  
shall on Strawberry hill took fire from  
a burning chimney Tuesday evening  
last, and was almost entirely consumed  
before the flames were extinguished.  
The chimney commenced burning at  
about half past seven o'clock. When  
first noticed no fear of its setting fire  
to the house was entertained, but the  
building soon filled with smoke and  
flames were discovered in the upper  
floor. An alarm was immediately  
sounded and the fire department called  
out. Before the crowd reached the  
top of the hill a lot of boys and men  
met them going the other way, declar-  
ing that it was only a chimney afire.  
As the chimney was seen to be burning,  
this was readily believed, and many of  
the crowd including some of the fire-  
men turned back. The engine had been  
got out already when the story came  
that there was no fire, so she turned  
about and the fireman commenced put-  
ting out the fires. Meanwhile the fire  
in the building was making headway  
and the neighbors were engaged saving  
the furniture while anxiously waiting  
for the department. A second alarm  
was sounded, when it became apparent  
that there really was a fire, and the de-  
partment rushed to the rescue with  
alacrity. The steamer was soon ready  
for action, a line of hose was quickly  
laid on the hill and after a little delay  
caused by the misunderstanding at the  
first alarm, a stream was brought to  
bear on the building; but not until the  
entire roof was blazing. After a few  
minutes work the hose burst, causing  
another serious delay and allowing the  
fire to spread all over the building. Be-  
fore they got to playing on the fire  
again, almost the entire structure was  
burning and the neighboring buildings  
were in danger of destruction. When  
again at work, however, the firemen  
were very successful in subduing the  
flames and had the fire out in a very  
short time. The building, although  
badly damaged, was only partially de-  
stroyed and can be repaired. The loss,  
which will fall short of \$1,000, is entire-  
ly covered by insurance.

NEGAUNEE.

THEY have commenced shipping from the Pendill mine stock pile.

SEE FOX & Sporely's notice of counters and shelves for sale in today's paper.

THE new common council held their first meeting Monday evening, the 12th inst.

A DANCING party will be held at Winter's hall next Wednesday evening, the 22nd inst.

KRAMER's new store will be an improvement over his old one. He expects to move by to-day.

THE steamer was out for practice Tuesday afternoon for the first time in many weeks. She worked well.

A BURNING chimney in the red boarding house at the Jackson location occasioned a fire alarm Wednesday noon.

THERE is a rumor to the effect that a Pullman sleeping car will this season be put on the line between Marinette and Marquette.

THE small building which stood on the lot north of the hotel has been moved away on another street and turned into a blacksmith shop.

ON the wings of the gentle spring zephyrs comes the rumor of an approaching wedding in this city which is soon, very soon, to transpire. So mote it be.

CLIFFORD, with a new dramatic troupe which includes the old favorite Tom Coleman, will play in Negaunee Friday, Saturday and Monday, April 23rd, 24th and 26th.

WHILE the dust has been flying through the streets of Negaunee all the week, there are still miles upon miles of good sleighing out in the country on some of the township roads.

THE remains of Horace A. Doolittle, brother of Mrs. Jay A. Hubbel, arrived here on the Northwestern passenger train Saturday, and were conveyed to L'Anse by a special train which was in waiting.

A FORCE of men are now at work on the new hotel and the prospects are that they will be kept employed until the building is finished. Most of the lathing is already done and the house will be ready for the plasterers by next week.

A MAN with a picture show which he called a "Scioption" gave an entertainment to several hundred empty chairs and about fifteen people at Winter's hall Saturday evening last. He left the country on the first train next day; he had enough.

THE roads in this neighborhood are in a very good condition considering the season. So far we have escaped the usual deluge of spring mud and it is to be hoped that we will continue to remain so lucky until summer is ushered in.

MADDER's saloon was burglarized last Saturday night, the thieves entering the place from a door in the rear of the building. Some fifteen dollars in money and a lot of cigars were taken. No clue to the perpetrators of the theft is yet found.

Now is the time when the annual story is started to the effect that the old Home restaurant building is to be removed or torn down by the city authorities and the site utilized as a street. This has been said so often that we can hardly believe it any more.

MR. RUDOLPH M. MAAS returned last Saturday from Magill medical college, Canada, where he has been taking a full course of study for the medical profession. He comes armed with a diploma from the strictest college in America, and therefore has a good right to the little of an M. D.

If you want to here foreign languages you should be up at the depot when the passenger train from below arrives. French Italian, Scandinavian and German are heard all at the same time among the crowds that arrive daily, making a miniature Babel of the platform for a few minutes.

H. M. Atkinson left for below this week to procure a car load of new horses for his livery stable. He says they will be the best livery stock he can find. He is repairing and re-painting all his buggies and carriages which with the new ones purchased

and his new lot of horses, will make his a livery stable second to none in the county.

BANKER Gray contemplates moving out of his present quarters soon. He has several localities in view, the chief one being the McComber building now occupied by Mr. Wettstein. In case he moves into that building he will occupy the room facing Gold street, and besides the Gold street entrances, will have an entrance through Wettstein's store on Iron street.

WE can't see how the railroads are going to get along any longer without an eating house here. If the through passengers are to be given a chance to eat dinner at all, Negaunee is the place where they ought to get it. There must be either a lunch counter or an eating house started pretty soon, unless it is the intention to let the passengers go hungry which is not all at likely.

TOMORROW the passenger trains on the C. & N. W. R'y will commence running on summer time. The hours for the arrival and departure of the two trains, which have been made closer every year, has at last been brought to a focus by making the up and down trains meet here. The train from the south will arrive before the south bound train departs. The change is made to accommodate the up-the-lake travel as well as to avoid the ore trains that will keep the road between here and the range crowded during the summer.

THEATRICAL.—Clifford's troupe, with Miss Maud Oswald and Tom Coleman in the leading roles, will play M'Liss, Black Diamond and Uncle Tom's Cabin at Winter's hall during their stay here.

A PARTY was given at the residence of Capt. Merry Thursday evening, at which a large circle of friends of the Captain and family had a very pleasant time. Dancing was indulged in until a late hour.

ANOTHER.—Latterell's saloon was burglarized last Tuesday night, and about ten dollars extracted from the till. The burglar or burglars entered the room from the rear, as in Madden's. There must be a gang of thieves in town; but no clue has yet been obtained of their identity or whereabouts.

FOR SALE CHEAP.—Two large counters and a lot of good shelving, suitable for a store. Enquire of FOX & SPORLEY.

FOR SALE.—Buggies, Cutters, Harnesses, etc., etc., for sale at less than cost, and far below their intrinsic value.

IN THE DISTRICT COURT OF THE UNITED States for the Eastern District of Michigan. In Bankruptcy. In the matter of Cornelius Donkersley, bankrupt. Notice is hereby given that the assignee of said bankrupt has filed a petition in said court, asking authority to settle and compound the claim of the said bankrupt's estate against James Pickands & Co., at the sum of two thousand dollars, and to convey to them all the remaining interest of the said bankrupt estate in the assets of the old firm of James Pickands & Co. for that sum; that it has been referred to James E. Balliba, register, to take proofs concerning the matter, and to make an order, if all parties consent; otherwise to report to the court for a final order thereon; that Thursday, the 26th day of April, next, has been appointed as the day for taking such proofs, at the office of said register, in Marquette, at 9 o'clock A. M. Creditors and all others interested are hereby notified to be present at that time, if they wish to be heard in opposition to the prayer of said petition.

GENT. G. T. BEAUREGARD, Publisher, On behalf of the Hood Memorial Fund, NEW ORLEANS, LA.

THE entire proceeds arising from the sale of this work are devoted to The Hood Orphan Memorial Fund, which is invested in United States Registered Bonds for the nurture, care, support and education of the ten infants deprived of their parents last summer at New Orleans, the melancholy incidents of which sad bereavement are still fresh in the public mind.

The book is an elegant octavo, containing 260 pages, with a fine photograph likeness and a line steel engraving, made expressly for this work, four large maps of battle fields, bound in handsome gray Morocco cloth at THREE DOLLARS, or in a fine sheep binding with marbled edges, THREE DOLLARS AND FIFTY CENTS—in half bound Morocco, library style, FIVE DOLLARS, or in best levant turkey morocco, full gilt sides and edges, FIVE DOLLARS.

On the receipt of the amount in a registered letter or by a postal order, bank draft, or check, a copy will be immediately sent free of postage, registered as second-class matter. The volume is published in the best style of typography, on elegant paper, with illustrations of the highest quality.

To the ladies who feel a desire to express their sympathy with The Hood Orphan Memorial Fund, the sale of this book among their circle of friends, will afford an excellent way of contributing substantial aid to so deserving a cause. For terms, rates to agents, etc., address with full particulars, GENT. G. T. BEAUREGARD, Publisher, On behalf of the Hood Memorial Fund, NEW ORLEANS, LA.

KIDNEY-WORT THE ONLY MEDICINE That Acts at the Same Time on THE LIVER, THE BOWELS, and the KIDNEYS.

These great organs are the natural cleansers of the system. If they work well, health will be perfect; if they become clogged, dreadful diseases are sure to follow with TERRIBLE SUFFERING.

Biliousness, Headache, Dyspepsia, Jaundice, Constipation and Piles, or Kidney Complaints, Gravel, Diabetes, Sediment in the Urine, Milky or Ropy Urine; or Rheumatic Pains and Aches,

are developed because the blood is poisoned with the humors that should have been expelled naturally.

KIDNEY-WORT will restore the health by action and all these symptoms will be banished. It is a safe and reliable medicine. Try it and you will find it to be the best. Tell it to your friends and you will be glad to hear of their recovery.

Why suffer longer from the torment of an aching back? Why be so fearful because of disordered urine? Why be so nervous and irritable? Why be so weak and exhausted? Why be so pale and thin? Why be so nervous and irritable? Why be so weak and exhausted? Why be so pale and thin?

Ayer's Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

It is a most agreeable dressing, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a rich brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often though not always cured. It checks falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brassy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanses the scalp, cures and prevents the formation of dandruff, and, by its cooling, stimulating, and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair, The Vigor is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

PREPARED BY DR. J. C. AYER & CO., Lowell, Mass., Practical and Analytical Chemists.

DRESS AND PARTY COLORED AND WHITE KID GLOVES.

**The City of Glasgow Bank.**  
New York Sun.

The liquidators of the City of Glasgow bank, which failed October 2, 1878, have submitted to the shareholders a report of their doings since their appointment, and it is an interesting, but melancholy piece of reading.

The total liabilities of the bank when the liquidators entered upon their duties October 23, 1878, were about \$64,000,000, and the assets about \$38,000,000, leaving a deficiency of about \$26,000,000. For this enormous deficiency each shareholder was jointly and severally liable to the full extent of his property, no matter how small his holding or how little his personal interest in the shares. Though he had but a single share, and though his title was that of a mere trustee without benefit to himself, it made no difference. He could be compelled, not merely to pay his proportion of the bank's debts, but also to contribute to make up the quota of fellow-shareholders who were unable to respond. This fact, and the proceedings taken in consequence, have rendered the bank's failure one of tragic importance to hundreds of families.

From the assets so far the liquidators have realized about \$24,000,000. On November 13, 1878, they assessed the shareholders pro rata, \$500 for every \$100 of stock, or \$21,000,000 on the outstanding capital of \$42,000,000. This first assessment alone exhausted the means of many of the shareholders, and at the time the report was made up it had only yielded \$10,500,000. In March, 1879, a second assessment was, therefore, laid on the shareholders still solvent of \$2,250 per \$100, amounting altogether to \$59,000,000. This assessment has produced \$11,500,000, making altogether about \$22,000,000 to be added to the \$24,000,000 collected from the bank's assets, or \$46,000,000 toward paying the \$64,000,000 of debts. Preferred creditors took \$8,000,000 of the money, and the expenses of the liquidation \$500,000 more. The general creditors have been paid \$37,000,000, or two-thirds the amount of their claims, leaving about \$18,500,000 still to be provided for, without counting interest. The uncollected assets of the bank will, it is thought, produce \$14,000,000, leaving \$4,500,000 and the interest to be contributed by 269 shareholders out of the original 1,819. The other 1,550 having been completely ruined by the two calls already made. The liquidators hold out hopes of another dividend of 5 per cent. to the creditors very soon, but after that their proceedings will be slow and tedious.

One passage in the report is almost sublime in the immensity of the distress which it describes. Among the shareholders who were unable to meet the first call made on them, 599 in number as the liquidators say, applied for a discharge of their obligations on making a complete surrender of their estates. Most of them also offered, with the assistance of friends, to pay the value of their estates, on being allowed to retain the same. Before accepting these offers a statement was required, verified by a declaration before a justice of the peace, according to a series of questions, information of the most minute character was demanded from the persons liable, as to their means and estate and their expenditure since the stoppage of the bank. The information thus supplied was subjected to careful examination, and after the basis of all arrangements had been adjusted with each contributor it was submitted to a committee of contributors, and after it had been approved by that committee it was submitted for final sanction by the court. Nearly 600 persons thus gave up all they had in the world, content, like Job, to escape with their lives!

The ruin, too, spread wider than the limits of the bank's own shareholders. Another Scotch bank, the Caledonian, held \$2,000 worth of City of Glasgow stock, and thus the shareholders in that bank became liable for the debt of the City of Glasgow Bank. Consequently they began selling or transferring their shares to irresponsible parties in the hope of escaping assessment. Learning this, the liquidators of the City of Glasgow bank requested the directors of the Caledonian to take steps for closing their register of shareholders. Negotiations ensued which resulted in an agreement that a petition for winding up the bank should be presented as the only means available for having the register closed, and the process of substitution or probably impudently for substantial stockholders arrested. Considerable delay took place under this petition, in the course of which the constitution of the Caledonian bank was altered to the effect of preventing any transfer of stock without the approval of the board of directors, and the petition for winding up was withdrawn. But the cloud still hangs over the Caledonian stockholders, though it is not probable that they will suffer to anything like the extent of those of the City of Glasgow Bank.

It is some consolation to us to reflect that the authors of all this misfortune—the directors of the bank—have been punished as felons, and that they, too, have been involved in the financial ruin of their constituents.

SOMETIMES men say, when their friends pass on, Ah! gone, gone, never to return! The golden bowl broken! the silver cord sundered! Life's schemes mercilessly brought to wreck and disaster! But is this wisdom? One nature touching another nature, one life breeding itself in another life, one world down here induring itself in the soul, but to be extinguished there—is this the end and finish of life? Never. Death is birth. We pass on to promotion. There is only a resurrection in the transit, only new birth, the quickening powers of that higher nature of God vitalizing the higher powers of our nature. Life never ends. Life's work is never done. The grand organic life of God and the world of the transient, seizing the life of our nature, by its gales of inspiration sets the soul to rolling up its tides of unbroken being to roll on for ever. Don't the angels get heart? Are they not greatness every time one awakens and turns from the error of his ways? And may we not say truly that the infinite soul comes to satisfaction reaped in no other way than from the travail that brings us onward, through all the stresses of the ascension, to the rest and finish that remaineth?

**FUN.**

Latest thing in boots--holes.

One of the things you don't want to be too generous with is your temper. Keep it.

An advertisement in a newspaper is worth two on the side of an old shed.

To keep apples from decaying, put them in a cool place--where there is a large family of children.

The *Waukeges* describes a shingle wedding as occurring when the first child is old enough to spank.

What island do the ladies, as we see them on the street, remind us of? Manhattan.

Pat: "Do you buy rags and bones here?" Merchant: "We do, sir." Pat: "Thin, be jabbers, put me on the skulkales."

I never argy agin a snuckess. When I see a rattlesnake's head sticking out of a hole I hear off to the left and say to myself that hole belongs to that snake. --*Josh Billings.*

When Noami s ood, up to be married, and the clergyman asked her if she was sure she was fourteen years old, it must have been a terrible twist for her to admit that she was 590.

A subscriber to a southwestern newspaper died recently, leaving a four years subscription unpaid. The editor appeared at the grave and deposited in the coffin a palm-leaf fan, a luen coat, and a thermometer.

"We wish," says a Texas newspaper, "that a few of our citizens might be permitted to live till they die a natural death, so as to show the world what a magnificently healthy country Texas really is."

A man is always a fool. If he be young, the world says when he is older he will know more; if he be older, it says he is old enough to know better, and when he is old it says the oldest fools are the biggest fools.

One of the southern papers tells of a man whose life was saved by a plug of tobacco carried in his pocket. A pistol bullet fired at him lodged in the tobacco and the man was unharmed. Moral: "If you will use tobacco, don't take it out of your pocket."

An exchange hastens to inform us that Queen Victoria drinks her tea out of a saucer. Glad to hear it; always supposed she took up the tea-pot and drank out of the "nose."

Father (who is always trying to teach his son how to act at table)--"Well, John, you see that when I have finished eating I always leave the table." John--"Yes, sir, and that is all you do leave."

A little boy of four was sleeping with his brother, when his mother said: "Why Tommy, you are lying right in the middle of the bed; what will poor Harry do?" "Well, ma," he replied, "Harry's got both sides."

Mrs. Partington says that just before the late war, circumstances were seen round the moon nightly, shooting stars perambulated the earth, the desk of the sun was covered with black spots of ink, and comets swept the horizon with their operatic tails. Everybody said that it portended war, and sure enough war did come.

There is nothing so charming as the innocence of children. "Mammy," said a five-year old the other day, "I wish you wouldn't leave me to take care of baby again. He was so bad I had to eat all the sponge cake and two jars of raspberry jam to amuse him."

A crusty old gentleman of Aberdeen not liking the way his landlady's daughter had of making free with his hair oil, filled the bottle with liquid glue the day before a ball to which the girl had been invited, and she stayed at home.

A scholar in a country school was asked, "How do you parse 'Mary milked the cow'?" The last word was disposed of as follows: "Cow, a noun, feminine gender, third person, singular number, and stands for 'Mary.'" "Stands for 'Mary'! How do you make that out?" "Because" answered the intelligent pupil, "if she didn't stand for 'Mary, now could 'Mary milk her?'"

A gentleman not particularly interested in piety was dismayed by being asked to say grace at a strange table. To refuse and explain would be embarrassing; to comply would be equally so; but he chose the latter, and started off briskly enough with, "Oh, Lord, bless this table!" Just here, being unused to the business, he nearly broke down, but by a gigantic effort pulled through with, "World without end, yours respectfully, amen."

"Mister, your sign has fallen down!" cried a temperance man to a grog shop keeper, before whose door a drunken man had fallen prostrate. We do not know whether this temperance man is the same to whose store a customer re- led, exclaiming, "Mr--do--you--keep--anything good to take here?" "Yes, we have excellent cold water--the best thing in the world to take." "Well, I know it," was the reply; "there is no one thing--that's done so much for--navigation--as that."

A QUAKER shopkeeper once met a Quaker customer of his going home with her bundles. He had been absent from his place, and had a notion in his wise head that she had been trading with a rival whom he did not much love. "How much did they give a yard for this, Mary?" "One dollar." "Why, I am surprised at that! I could get thee have it for 75 cents. And how much for this?" "Two dollars!" that was unreasonable. I could get thee have it for \$1.50. Why will the go away trading with strangers and world's people, Mary?" "I don't know what thee is talking about, friend John," she said; "but I did buy all these things at thy store, and if thee says the truth thee must owe me considerable money."

GIVES UP BY DOCTORS--Is it possible that Mr. Godfrey is up and at work, and cured by so simple a remedy? "I assure you it is true that he is entirely cured, and with nothing but Hop Bitters; and only ten days ago his doctors gave him up and said he must die." "Well-a-day! That is remarkable! I will go this day and get some for my poor George--I know hope are good." --*Salem Post.*
