

FUN WITH THE BOYS.

ESCANABA.—From the Port of the 23rd we learn that "Squire Gracie's house was burglarized last week by a fellow who tumbled down a flight of stairs as he entered the building, the noise rousing the "squire, who valiantly grappled him. The marauder managed to get away, but not with any booty.

A Negamine man was looking the town over last week for a runaway wife. He failed to find the one he wanted, and went home a sad and singular man.

The little school teacher Garibaldi, laden with books for Fayette, sprung a leak in the lower bay on Saturday last, July 16th, and was run upon Portage Island where she now lies, badly broken up.

The Port advises such of its readers as own land bearing a growth of black birch to be saving of the timber. It is becoming a fashionable substitute for black walnut with furniture makers, and has a future before it.

Bulletins giving the signal service bureau weather reports as far south as St. Louis, and west to Moorhead, are now published daily at Escanaba. The Port thinks Gen. Hazen is to blame for a good deal of enhanced efficiency in his department. He does seem to be getting the best of Venator.

A couple of citizens had a quiet and business-like mill the other day near the post-office. There were no words or blows wasted—though several of the latter were given and taken in grim silence. Names withheld because whisky wasn't at the bottom of it, and the difficulty was settled on the spot without any resort to law. The Port doesn't even drop a hint as to the identity of "the woman in the case." Cautious sheet.

We hear that our neighbor Young is losing his treat, the water of his preserve having been in some manner poisoned. Mr. Young thinks the trouble arises from the leaching of the ashes from forest fires, but this is conjecture only.

Young Lawless, who was injured by the bursting of a signal gun on the 4th, is recovering.

Four cargoes of coal, aggregating four thousand tons, were received at Escanaba last week. Three of these were consigned to the railway company, the fourth to a mining company in Marquette county.

Ben Young has contracted to build the bridge over the Escanaba. The sum agreed upon is \$1,450 and the bridge is to be completed by the first of October.

One shipment up to and including July 21st this year show an increase of 60,226 tons over those of last year for the period ending July 22nd.

FLORENCE.—The News of last week announces that forest fires are beginning to be seen and heard from again in that locality.

The branch railway track to the furnace is nearly completed.

Work is going on all along the line of the Crystal Falls railroad.

Lawyer McIntosh has been engaged by the law-abiding citizens of Florence to apply the legal lash to the backs of its law-breakers. Waiting for the district attorney to come up from Marinette gives offenders too much of a chance to evade punishment.

While making an arrest the other day deputy sheriff Dix was struck with a club on the hand, disabling him for some time. When his assailant made clubs revolvers the officer should have played his trump. Then he might have taken the knife and made all the points in the game. The only hand that wins in cases like this is one with a revolver in it.

OSTONAGON.—We learn from the Miner that its editor wasn't well enough last week to keep his paper up to the customary standard of interest, which isn't surprising. If that fellow should shove his knuckles in our face, Meads, it won't be the editor in the case who will lay up for the subsequent week. We'd enjoy "chasing" his "form," planting kicks under his coat-tail until our wind gave out.

And every satisfied thus in this upper country knows just where to find the MINING JOURNAL office.

"Everything is booming" at Ontonagon, says the Miner. Wouldn't "bumming" be the better word?

An addition of some three hundred railroad men gives Ontonagon a perceptible population temporarily.

A strange object, resembling in appearance a bear, was seen in the channel on Wednesday evening by several gentlemen of the village. The spectators watched it for some time as it swam from pier to pier, and at length, decided it was a bear, though on account of the darkness were unable to get a good view.

Two special policemen have been appointed to look after the strangers in town. The natives are capable of taking care of themselves, presumably. Who has charge of Tim Nester, of the bawling mouth and striking fist?

These Warren were killed and badly injured by a mule one day last week as he was arranging the freight's harness. He was in the employ of the railway company, and formerly served five years on the steamer Fernout. His injuries are not dangerous.

DULUTH.—The Tribune says "two essentials are lacking to make Duluth a first-class summer resort." And the worst of it is they are such "essentials" as Duluth isn't likely to possess until the place becomes a city in fact instead of pretension. The place is forever putting on airs on the prospect of some millionaire spending his dollars to build it up, and never taking hold itself in the downright earnest fashion of other towns on the lake.

Wm. C. Sargent and others have purchased the major portion of the townsite of London for \$20,000, and the Tribune thinks it can see speculation in their eyes.

A new coal dock is in process of construction.

Ex-president Hayes owns a building in Duluth, and a local paper goes for his excellency because he allows the sidewalk in front of it to remain in a dangerous and unsightly condition. It should be remembered that the poor man is out of office now and has to scratch round for a living like the rest of us.

CALUMET.—The News announces that the Calumet & Hecla Mining Co. will pay its annual quarterly dividend on stock Aug. 12th. Five dollars a share is what it will amount to. Handy stock to have about one's clothes, that.

Information was received at the Cliff mine the other day from Mr. Simpson, the owner, to suspend operations at the old mine, and devote all attention to exploring for the Calumet conglomerate and also on the amygdaloid. The diamond drill arrived this week.

A number of Finlanders, bound for Keweenaw county, passed through Calumet last week. Also one hundred men on their way to work on the O. & B. R. railroad.

SAGIT STE. MARIE.—The News of Saturday last mentions that large volumes of smoke were seen, rising in the region back of Waiskai Bay early in the week denoting the existence of heavy forest fires in that direction.

Bears are plenty and hold up the river. On St. Jo Island they prowled around the farm houses and occasionally dug off a pig. The grangers should trade their pitchforks for guns and protect their porkers as their forefathers did their homesteads—by shooting the invaders.

Wm. Doyle dug up a quantity of Indian bones the other day while excavating on the court-house grounds. He has saved a skull from the collection as a relic.

On Sunday the Rt. Rev. Bishop Vertin officiated at the Catholic church and confirmed a number of applicants. In the afternoon his lordship performed the ceremony of laying and blessing the corner stone of the new Cathedral. There was a large attendance, and four priests assisted.

A gang of monte men, who have been operating on the river for some time past, tried to beat a Louisiana man out of his money at the

Club house one day last week, but he broke up the game with a revolver and saved his shekels. He fired several shots, but, unfortunately, failed to hit any of the scalwags.

MEMORIAL.—The Herald of the 28th notes the presence in that town of J. M. Longyear, of this city.

The Toledo took on board a large consignment of pig iron from the Menominee furnace Friday of last week.

The canal company has issued about 500 options on its lands to parties who are anxious to discover iron mines.

A teachers' institute for Menominee county will be held at Menominee, commencing Aug. 22nd and lasting four days. The school ma'ams will board 'round we presume, and Hank is trying to grow curls on the bald part of his head with a view to coaxing some of them to take pot luck with him.

Mellin Smith, the burned out Wallace lumberman, will rebuild on a smaller scale and try his luck once again in the milling business. Certain Menominee parties to whom he was heavily indebted have presented him with a release from the obligations, for which acts of substantial kindness the gentleman expresses, very properly, profound gratitude. Lots of people would be glad to burn out if their creditors could be relied on to extend that kind of sympathy.

The burner of the L. W. & V. S. mill expanded until it lasted the other day. We've known men who did precisely the same thing.

Menominee is going to have a palatial new hotel. To build it 150 cords of stone and a million of brick, besides a stack of money will be required. Sam Stephenson will furnish the latter.

H. A. Tuttle, of Cleveland, was here over Sunday. He had been up the line visiting various mines during the week, devoting his time to the commonwealth, of which he is now manager. About 100 cars a day are employed in conveying the ore of this mine to the Escanaba docks, but the yield of the mine is increasing so fast that 150 cars are now desired.

M. T. Turtle reports the iron business good and expects it will so continue for a year or two at least.

HANCOCK.—Inquires the Journal of that place: "Has any one claimed the money found by Sullivan on the base ball ground July 18th?" Is Sullivan, the fender the party who puts his knife into people on slight provocation? If not we'll send a man up there to see about the money. But, may be, the Hancock editor wants it himself.

"Which is the faster, Grison or Maud S.?" Inquires the Journal's constructor of conundrum's. Oh, give us suthin' hard. The one that took the most 'cats, of course—hold on there—the one that didn't get an cat, we mean—confound your conundrum, we give it up.

The Quincy company has the framework of its new elevator up, and work on the exterior of the building is being pushed along rapidly.

Chase's dock is being extensively repaired this season.

Two brothers named Sullivan got into an altercation Sunday afternoon that eventuated in one of them being stabbed in the hip. The parties tried to keep the affair quiet after the melee, but marshal Flynn made complaint against the one who did the cutting, and he was fined for violation of the village ordinance prohibitory of such performances.

The Quincy has declared a dividend of \$1 per share, or \$120,000, payable August 22, to holders of July 30. This is Quincy's twenty-sixth dividend and brings the total amount divided by the "old reliable" up to \$2,710,000.

Orders pour in on the rolling mill folks, and the concern is kept running night and day. The new smelting furnace is almost ready for work.

The Mining Journal.

ISHPEMING, JULY 30, 1881.

The open space in front of the Rock store has been illuminated every night for the past three weeks.

Mr. I. N. Oie and wife returned home Wednesday after a two weeks absence visiting friends in Illinois.

WILLE a swindling catch-penny street-lottery man was plying his profession by the light of two gasoline lamps last night, somebody fired a bullet into one of them, causing a scattering of the crowd and a general breaking up of the lottery business for the time being. The lamp exploded and partially burned up the fellow's dry goods box and trinkets. He was a badly broken up community, and offered a reward of \$25 for the detection of the parties who perpetrated the deed.

They had a patient at the hospital Thursday who didn't make them much trouble. He was a twelve-year old boy from Ten Kilns, who was brought in on a coal cart with a broken arm. His arm was set and splinted upon his being brought to the hospital, and the little patient placed on a cot in a room by himself. This was in the forenoon. When they brought his dinner he wasn't there, and hasn't been seen since. It is believed he got lonesome and determined to go back home, which he did without letting any one know of his departure. The boy has lots of grit.

INSTALLATION SERVICES.—Interesting services were held at the Presbyterian church Thursday evening at the installation as regular pastor of the congregation, of Rev. A. F. Ashley. Mr. Ashley has been in charge of the Presbyterian church for over a year, to the satisfaction of the entire congregation. At the last meeting of the presbytery a call was made for his installation here as pastor. An adjourned meeting of the presbytery was held Thursday evening for that purpose. The church was tastefully decorated, and all the members of the church, besides many others were present, filling the building to its utmost capacity. The services were such as are designed for this special ceremony, and were very impressive. Rev. Mr. Bill, of Marinette, preached the installation sermon, Rev. D. Stuart Banks, of Marquette, charged the people and Rev. H. Davis, of Negaunee, charged the pastor. The installation of Mr. Ashley as regular pastor of this church is a source of much gratification to its members, as he is greatly beloved by them. He is a gentleman full of charity and kindness toward all, liked by all who know him. He is deserving of everything the congregation can do for him.

TWO ACCIDENTS.—Two accidents occurred in the Cleveland mine Thursday morning within a few hours of each other, both of which were serious but not fatal. The first happened at four o'clock, and was occasioned by the falling over of a scale of rock in Sellwood's pit, catching an old man by the name of Fred Dwyer in its descent, and breaking his leg. The piece of ground that fell weighed about half a ton, and it came down from a place that had been recently inspected and pronounced safe. It was loosened by a blast.

The second accident, which occurred at 7 o'clock, was a much more serious one, and resulted in sadly crippling and disfiguring a miner by the name of James Wedge. Wedge was engaged in charging a hole with giant powder. The cartridge he was inserting was too large and would not fall to the bottom. Seeing that he could not force it down, he commenced scraping a cavity in the cartridge in which to insert a cap and explode it. While doing this the powder exploded, with frightful results to the man. His left hand was blown off, two fingers of his right were so badly shattered as to require amputation, his left eye was blown out, his right one injured, and his skull fractured. He was taken to the hospital, where his wounds were dressed and where he was made as comfortable as his terrible injuries would admit of. Although he lies in a pitiable condition, there is no doubt of his recovery. The accident happened in No. 6 shaft of the incline mine.

TO WHOM IT MAY CONCERN.—NOTICE TO DEPOSITORS: On and after August 1st, 1881, the rate of interest paid by The Bank of Ishpeeming will be 3 per cent. per annum. All holders of certificates of deposit are hereby notified to present their certificates for payment or change of rate of interest. By order of Board of Directors. E. G. ST. CLAIR Sec. 6792

NEW GOODS

—AT—
BRAASTAD & CO.'S.

We are in receipt of an entire new stock of spring and summer goods at our two stores on Cleveland avenue. In our main store we have an elegant line of Dry Goods, Fancy Goods, Notions, Boots and Shoes, Groceries, Crockery and Tinware. THE MINING JOURNAL.

NO PAPER SENT TO ANY ADDRESS UNLESS PAID FOR IN ADVANCE.

SUBSCRIBERS ordering their papers transferred from one address to another should be careful to give the name of the office to which the paper is being sent at the time, in order to secure prompt attention, as otherwise the mail clerk may have to search through the entire list to find the name.

PARTICULAR NOTICE.—The MINING JOURNAL will not be sent to subscribers after the expiration of the time subscribed and paid for, unless the subscription is renewed. Subscribers can always know when their subscription expires by comparing the number of the printed address on their papers with the corresponding number on their receipts.

All letters of a business character, such as advertisements and communications intended for the columns of this paper, should be addressed to the editor personally, as is often the case, July letters of a personal or confidential nature should be addressed to—A. P. SWINERD.

All advertising sent from abroad must be paid for in advance, whether coming direct from the advertiser or through an advertising agency. Orders from advertising agents will not be accepted, or receive any attention whatever, unless based on our regular rates, less the usual commission and accompanied by the cash. This rule is imperative, and will not be departed from under any circumstances.

A new engine and 4-foot drum have been received at the Chicago mine, and will soon be in operation.

An occasional item of mining news, contributed by reporters, can be found in the Ishpeming and Negaunee departments.

The Republic is 19,630 tons behind her last year's figures, but it now looks as if she might "catch up" before the close of the season.

The Calumet Iron Company is the title of a new corporation organized for the purpose of developing a new find on the Felch Mountain range.

A DISCOVERY of what looks to be a very fine quality of ore has been made on the old "Brass wire" tract, which adjoins the New York and Cleveland mines.

The Lake Superior mine shipments by lake, up to and including the 27th inst., footed up to 91,559 gross tons—an increase of 13,170 tons over a corresponding period last year.

The Cleveland mine reports 81,813 tons shipped by lake up to the 27th—a slight falling off from last year, which, however, will be made good long before the end of the shipping season.

CHAMPION lake shipments are reported at 54,546 gross tons, as compared with 46,098 tons during same period last year—and that, too, without making any perceptible inroad on her winter stock-piles.

The editor has an option for a lease of what he believes to be a valuable tract of iron land, and in which he will give a controlling interest to any reliable party who will furnish the money to explore and develop. Further particulars will be furnished on application, in person or by letter.

JUDGING from the rate at which ore is now being forwarded, it seems safe to predict an increase of not far from 250,000 tons in the year's product—and it could have been made much larger, had the outlook at the beginning of the season been such as to encourage a little extra exertion on the part of mine owners.

The Illinois Iron Company is the title of a new corporation of which Hon. Edward Breitung is, or will be, president, and which succeeds the Scandia company in the work of developing a very fine show of iron on the north-west quarter of section 26, town 40, range 30. A 7-foot vein has been opened on this tract, the further extent of which is now being tested with the aid of a diamond drill.

A NEW FIND is reported to have been made at the Indiana (old Green Bay) mine, on the Negaunee range. It is on the north side of the hill from the old openings, and the ore is said to be a first quality of soft hematite. Now, if Foley will do as well for the Baraga folks, whose tract lies just west of the Indiana, he will lay up shekels for himself, and make several expectant souls happy here on earth.

At the Curry mine, Menominee range, the diamond drill has cut two veins of ore, about 200 feet east of the main pit, and at a depth of 79 and 128 feet, respectively. One of these veins is 12 and the other 14 feet in thickness. Capt. William Trebilcock has been appointed mining captain to succeed Capt. Williams. The finding of the two veins referred to, which are probably merely an extension of the main deposit, adds very largely to the value of the Curry as a mining property.

THE Cream City Iron Mining Company is the name of a new corporation which has just filed its articles of association, and of which George Berlinger is president and Edward F. Zinnis, of Milwaukee, secretary and treasurer. The company has taken a lease of the south half of the south-west quarter of section 7, town 46, range 30, the fee of which is in the M., H. & O. R. R. Co., and on which, it is claimed, an 11-foot vein of merchantable ore has been opened.

New discoveries are reported from the Agogeebic region west of Sunday Lake. The latest find is that of a red slate ore by Mr. Fay, who is exploring on a canal option for Frank Merritt and Frank Mills, of Ishpeming. Several analyses, made by Julius Ropes, Esq., gave from 64 to 66 per cent. of metallic

iron, with a rather large percentage of silica—which last, however, is counterbalanced by the fact that it is very low in phosphorus. This new find is located on the south-west quarter of section 17, town 47, range 46, and Mr. Fay reports having uncovered two separate and distinct veins, one of which is 25 and the other 30 feet thick. It now looks as though the Agogeebic district might ere long assume a hitherto unlooked for importance in connection with the iron mining industry of the upper peninsula. It is, at all events, attracting a great deal of attention, and the work thus far done in the way of exploration has certainly been productive of the most gratifying results.

Our esteemed friend, H. D. Fisher, is, apparently, not very well pleased with our editor's statement of facts connected with the discovery of iron ore in the Wisconsin division of the Menominee range. It is true that gentleman has not entered his objections in print, but the editor has heard from him so often, directly and in a roundabout way, that he wishes to have the disputed point settled, to the end that he may place Mr. F. right if, in fact, he has done him the least injustice. In a conversation with Mr. Fisher the editor came to the conclusion that the sole head and front of his offending was the failure to give that gentleman the credit of having been the original discoverer of iron ore on section 34, and in having asserted that Mr. Charles E. Wright had, previous to the discovery of the Commonwealth deposit, found some loose ore under the upturned roots of a fallen tree, on the same section, "which fact he mentioned to Mr. Fisher." &c. Ignoring the fact that Col. Charles Whittlesey had found ore on the Commonwealth tract twenty years before either Wright or Fisher claim to have done so, let us see if the first part of the statement to which Mr. Fisher takes exception is true or otherwise. Mr. Wright, in his report to the State geologist, page 679, Vol. 3, Geology of Wisconsin, says: "Near the center of section 34 (the section on which the Commonwealth is situated) we saw a loose ledge of ore exposed under the turned up roots of an old tree, but it was left to H. D. Fisher, in 1876 * * * to first unearth the solid ledge of iron ore, and thus prove its existence beyond all question."

The same credit is given to Mr. Fisher in our editor's Annual Review; it therefore follows that Mr. Fisher must either discredit Mr. Wright's word as well as our own, or else he has no cause of complaint except the statement that Mr. Wright had mentioned to him the discovery of the loose ledge alluded to, which statement he denies. The question may, therefore, be considered settled in all material points, except as to whether Fisher did or did not obtain from Mr. Wright information through which he was lucky enough to discover the Commonwealth mine. Mr. Wright's statement is conclusive as to the discovery of the loose ledge in 1875; Mr. Fisher discovered the solid ledge in 1876. These are facts, referred to now not in anger or malevolence, but because the editor has been accused of a willful misstatement. He may have been in error as to how Mr. Fisher obtained the information which led to the discovery of the Commonwealth; Mr. Wright may not have told him of his discovery of the loose ledge, as stated in the Annual Review; but Mr. Fisher was a novice so far as exploring for iron ore was concerned, and must have got the information from somewhere or some one. Will Mr. Fisher kindly give the MINING JOURNAL permission to tell its readers the whole truth in the premises? If not, let him forever after hold his peace, with the assurance that in treating of mining history and affairs on the upper peninsula, it is and always has been the policy and desire of the MINING JOURNAL to speak the truth, even to the extent of giving the devil himself his due.

It looks like business, and augurs well for the future prosperity of Marquette. A corps of engineers are in the field making the preliminary survey for an extension of the D., M. & M. railroad from this city to the mines, and report having found a very feasible route to and beyond the Little Carp river. Two routes are being surveyed—one starting from the mouth of the Carp, and the other from the company's grounds on the lake shore up Whetstone brook. Which will be adopted is a matter yet to be determined; there are substantial reasons that can be urged in favor of either. If it is intended to make the extension a mere feeder to the main line, with the sole view of carrying ore to Point St. Ignace, a junction at or near the Carp would doubtless be the most advantageous; but if it is to be the design of the company to build docks on its extensive water front here in Marquette, and engage in the transportation of ore from the mines to the nearest lake port, then the other route must necessarily be adopted, and, most probably, it could be made to answer both purposes. That the company means business, however, there is no question. The surveys are not being made, as has been intimated in some quarters, as a mere "bluff" to effect some other purpose the company has in view, but with the bona fide intention of building the line and having it completed by the opening of navigation next spring, as is evidenced by the following circular to mine agents and owners: By the opening of the season of 1882 this company will be prepared to transport ore from the mines of the Marquette range, Lakes Superior, to its terminal point at St. Ignace, at which place the facilities for loading into ves-

sels will be equal to any port on the chain of lakes, it being the intention of the company to construct this fall at St. Ignace a dock similar to the new docks at Escanaba.

No more commodious or convenient harbor is to be found than St. Ignace affords, situated as it is at the entrance to both Lakes Michigan and Huron, with no obstruction in any direction to the free passage of vessels, while the delays and dangers incident to the passage of the Sault canal to Lake Superior ports, and through Green Bay to Escanaba, will be avoided.

The advantage of St. Ignace is further enhanced by the length of the season, navigation being open earlier and closing later than is possible at any other shipping port, while its comparative nearness to consuming points will enable shippers to secure the lowest possible rates for vessel transportation. We respectfully solicit you to consider these facts before making contracts for the next season, and to favor us with an opportunity to lay before you figures for carrying ore, as we propose to afford shippers every possible facility, believing that we can insure a considerable saving in time and expense.

Please address communications to THOMAS MCKEOWN, Chief Engineer.

That the company has in contemplation the construction of ore docks here at Marquette, may be inferred from the purchase of the necessary water front, and the further fact that one of the routes being surveyed, and most likely to be adopted, is the only one by which an approach to that part of the harbor protected by the breakwater can be made. With the necessary docks at this point, the company would be enabled to compete with the M., H. & O. R. R. for the delivery and shipment of ore to and from this port, and at the same time take care of all the through traffic it may be able to secure. At all events, the extension will be most speedily built, and thereby Marquette cannot fail to profit largely.

SHIPMENTS.—The following is a statement of lake shipments of iron ore for the season of 1881, up to and including July 27, 1881:

Table with columns for location and quantity. Includes ESCANABA-MARQUETTE DISTRICT and MENOMINEE DISTRICT.

Table with columns for location and quantity. Includes MARQUETTE-MARQUETTE DISTRICT and L'ANSE.

Table with columns for location and quantity. Includes PIG IRON and QUARTZ.

Table with columns for location and quantity. Includes WHERE FROM, 1880, 1881.

An increase of 50,718 gross tons.

The following is a statement of shipments made from the Menominee Mining Company's mines by lake, from opening of navigation to Wednesday July 27, inclusive:

Table with columns for Name of Mine, Gross Tons, and Net Tons.

An increase of 32,334 tons over a corresponding period last year.

Every little while it is intimated by some small fry upper peninsula newspaper that the MINING JOURNAL's mild comments on Senator Swift's course in supporting the Brule River job was the cropping out of feeling born of the contest last fall, wherein the editor heretofore was voted for by those who opposed the election of Mr. Swift. The same papers argue that Mr. Swift must have been exceedingly popular or he could not have been elected by the large majority which was thrown for him. The MINING JOURNAL has paid no attention to these ill-natured remarks, and has had very little to say concerning Mr. Swift's course as a legislator, for the very reason that it knew the charge of "sour grapes" would be thrown back by the little souls whom the Almighty (as Greeley said) allows to edit certain upper peninsula papers, and because it personally esteems Mr. Swift, against whose private character it would utter no word of suspicion or reproach. It therefore allows one of the supporters of Mr. Swift, at the last election, to speak for its editor, which the Schoolcraft County Pioneer does, as follows: As to his bearing Mr. Swinford so badly, there is no great honor about it when it is known that but few men know that Mr. Swinford was a candidate, he having only been nominated the Wednesday before the election. In the south part of this county no person was aware of the fact until after the polls were closed. Of course we should not have supported the editor of the MINING JOURNAL for political reasons; but we will say here that it is the silliest of silly attempts to endeavor to raise Mr. Swift in the estimation of the people by comparing him in the way of ability with Mr. Swinford, a gentleman who has few superiors in that respect in the state. Swift got that 2,000 majority simply because he had no real opposition and the district being of itself strongly republican. The Major has our thanks; nevertheless he might have gone further and stated a few figures. Notwithstanding Mr. Swift's opponent was nominated only the Wednesday before election, when it was too late to announce the fact to some of the counties even by telegraph, and after the tickets had all been printed and distributed in others, it is a fact that Mr. Swift, having nominally no opposition in three counties of the district, yet ran 136 votes behind the head of his ticket, though his majority was greater than that given to the republican electors. His opponent's name was not printed on any of the democratic tickets used in a large part of Delta county, nor on any cast in the whole of Chippewa and Mackinac, by reason of which fact he lost over 600 democratic votes. Looking at the facts and figures it can't be said that Mr. Swift's friends had a great deal to boast of, unless running behind his ticket be taken as an evidence of a candidate's great popularity. However, the MINING JOURNAL knows one man who was and is very glad that Mr. Swift was elected—and that man is the person whom he defeated. The latter has none of the curses which have fallen to the lot of the victor, and avers now, as he did before election, that the only inducement to a candidature to him was the absolute certainty of defeat at the polls. The man is a damned fool who, having anything else in the world to do, consents to be a candidate for the Michigan legislature when there is the remotest chance of being elected. "Ain't it," Mr. Swift?

Are we going to have another panic? The alarmists are constantly predicting that we are, but neglect to supplement the startling prophecy with a showing of the causes which are to overthrow the existing prosperity and involve the country once again in financial and commercial disaster. Or, if they offer any reason at all for their disquieting prognostications, it is the silly, puerile one that the present state of things is too good to last, and will naturally be followed by a collapse and consequent distress, just as the "flush times" prior to 1873 were succeeded by the panic of that year and the "hard times" that came in its wake! These dismal prophets are, after all, strangely obtuse, or they would readily see that there is a vast difference between the healthy development of the nation's varied resources—from which the general prosperity springs—at this time, and the feverish speculation arising from ill-adjusted and unsettled values which preceded—and, indeed, produced—the panic of 1873. "Like causes produce like effects," but the promoting and exciting causes of that catastrophe do not exist to-day; nor can we see any reason to apprehend its repetition in the circumstance that money is plenty and labor in demand, with great enterprises going prosperously forward all over the country. True, we are confronted with the prospect of a short wheat crop, and the equally probable further disadvantage of a low price for our surplus, owing to an unusually good yield in Europe. But wheat is not our only article of export, while it is the only crop in which we are menaced with a shortage. Better yet, we are in no need of foreign money. The nation is well supplied with money to meet the demands of trade and carry on all current or projected undertakings. Our currency is sound, with a purchasing power admirably adjusted to the accepted standards of value; our financial system working easily on a well-defined policy, that is not subject to frequent and demoralizing changes; our laborers employed at good wages, and our capitalists generally receiving, and satisfied with, a legitimate return for their investments. We can see in all this much to reassure, but nothing to alarm, and confess that we are at a loss to discover in the serene sky now bending above us those signs of a financial and commercial cyclone that others claim may be easily discerned.

If Cyrus W. Field were not very much of an ass it would at once occur to him that his proposed fund for the benefit of the president's family is a gross insult to the whole American people—implying, as it does, that they are either too poor or too niggardly to properly reward a man who has given the best years of his life to their service, finally becoming, through the choice of the people, chief magistrate of the nation. Mrs. Garfield, did occasion arise, might gracefully accept from the whole American people, through the action of their representatives in congress, the aid that she certainly cannot receive from the vulgar Field fund at this time without forfeiture of a dignity that seems to be one of her chief characteristics. We are not in the habit, as a people, of allowing those who serve us well to go unrewarded, and there is no necessity whatever for the action taken by shoddyites like Field, ostensibly to aid the Garfield family, but really to obtain a little high-priced notoriety out of an occurrence which has attracted the attention of the world.

A flutter of alarm was occasioned the president's physicians and attendants last Friday night and Saturday morning by a marked change for the worse in his condition. His pulse rose as high as 130, the fever thus indicated being afterwards succeeded by chills. On examination the trouble was found to arise from a stoppage of the discharge from the wound. Treatment to remedy this was attended with good results, and at last reports the symptoms were again favorable, though the patient is noticeably weaker since the unfortunate set-back. It would seem as if the physicians and nurses who permitted the wound to clog up in this manner were hardly giving the case the attention its importance demands. But we mustn't forget that a good deal of their time is consumed in telling the newspaper reporters all about the case and getting their own names in print as frequently as possible.

Cheek is the chief stock in trade of the fraternity of advertising agents, but Herman Ridder, a New York member of that piratical brotherhood, furnishes the most indurated development the MINING JOURNAL has yet struck. He asks us to insert a ten-inch advertisement one year for \$16, intimating, as an inducement for us to "close this contract" with him, that he will probably have more business for us in time if we accept this offer. No, Herman, you'll have to excuse us. You keep the \$16 and we'll keep the space for some honest patron who knows the value of the paper as an advertising medium well enough to pay six times the money for it without grumbling. And if you ever come this way call at our office. It would relieve our indignant feelings immensely to kick the fellow down stairs who insults us with such a proposition.

In London the belief prevails that the president's death would be followed by a financial crash in this country. The incapacity of Englishmen to understand American affairs would be a subject of wonder were their ignorance regarding matters on this side of the Atlantic not so well understood. Frinstance, the London Times of Monday has a lengthy leader on the overthrow of "Horace Conkling, late senator from New York." To make the article more pointedly ludicrous it only needed an allusion to "Roscoe" Greeley, another distinguished citizen of that state whose ambition lured him to his own destruction.

European crop reports are more favorable this year than they were last, while the contrary is true of this country. The prospect is that America will not only have less than the ordinary surplus to sell next fall, but will also be forced to sell that in a sluggish market at a less price than has been realized for some years. Our people should begin to shorten sail a little at once. A light crop in conjunction with a poor price breeds bad weather on our financial waters.

John Russell Young has been figuring on Grant's income, and makes it out to be something like \$30,000 yearly. If it be true that the old man has quit drinking this should suffice to keep him in cigars and meet his other wants. He never went much on expensive clothes. But has he quit drinking? That's the unknown quantity in the problem. Until that point is settled to a certainty the public must continue in torturing doubt as to the sufficiency of his income.

A jubilant "half-breed" organ states that Lapham's return home from Albany after his election was a "continual ovation." The same might be truly said, in a certain sense, of the progress of any ordinary circus concern. It seems to be just as true in our day as when the phrase first obtained currency, that "a living jackass is greater than a dead lion." Conkling's final and complete annihilation politically was consummated Friday of last week, when the New York legislature chose Lapham to succeed him in the U. S. senate. Even Roscoe can probably see now that his resignation was one of the worst efforts of his life. The rest of us paltry creatures saw it long ago. What are they good for, anyway? We allude to the secretary of state's reports concerning the crops. In his report for 1880 Chippewa county is credited with having grown just 120 bushels of wheat! If Mr. Jenney had multiplied those figures by 250, he would have come much nearer the truth. A Washington correspondent vouches for it that Dr. Bliss, who is in charge of president Garfield, was once expelled from an association of regular practitioners for foisting a "patent" quack medicine upon the market.

JAS. DWYER & Co.,

Wholesale Dealers in Imported and Domestic WINES, Liquors AND CIGARS, Smokers' Articles, Etc.

ISHPEMING, JULY 30, 1881.

CHICAGO & NORTH-WESTERN RAILWAY. Time of departure of passenger trains from Ishpeeming, in effect 1st:

Leave for Chicago and the East... 1:15 P. M. Arrive from... 1:35 P. M. E. D. BRIGHAM Agent.

THAT Sunday law—who said we have a Sunday law?

AN addition to the Swedish Lutheran church has just been completed.

TRACK has already been laid on the new Northwestern switch to the Cleveland mine.

THE foundation of Donahoe's new store is done and work on the superstructure going forward.

THE two jumpers, Finucan and Sullivan, gave a jumping exhibition at the driving park Thursday afternoon.

OFF Main street the hematite can occasionally get up a little picnic, but on that thoroughfare its day is over for good.

THE Scandinavian society's picnic will be held on the same day as the opening of the driving park, whenever that will be.

SLADE'S spirits materialized before a large audience at Austin's hall Sunday evening. The show drew largely on the churches.

REV. J. HAMILTON, formerly pastor of the M. E. congregation here, but now of Calumet, has been spending a few days in Ishpeeming lately.

JOHN W. JOCHIM, Esq., returned yesterday from a two weeks' visit below, where he has been selecting a stock of stoves for the coming winter.

BETWEEN traveling salesmen, book-agents, patent medicine vendors, auctioneers, &c., there is a lively chase after the almighty dollar in Ishpeeming just now.

THEY came near having a fire in the business portion of the town Monday night. An incipient fire was discovered in a bakery on Main street, just in time to prevent a conflagration.

THE ordinary temperance saloon don't stand the ghost of a show for the Sunday trade since the closing ordinance. Nobody is trying to close these places, and so they are of no account.

AMONG the catch penny concerns now trying to make a fortune in Ishpeeming is a fellow with a telescope, who allows individuals to peep at the stars through his glass at a small price per head.

A New "Little Champion" drill, fresh from M. C. Bullock's shops, has just been added to the Cleveland company's stock of exploring machinery.

THE school house is undergoing its regular vacation series of repairs. The foundation walls of the building are being strengthened, and large iron bars inserted from wall to wall under the floors to steady the sides.

COMING BACK.—Before leaving, the managers of Wildman & Peck's comedy company expressed their determination to return to this place and bring another engagement here.

A NEW building is being erected near "A" shaft, to take the place of the charred and blackened ruin of the old one. The new shaft house will be made fire-proof with sheet-iron, the company not being desirous of running any more risks.

A NEW Rand air compressor has been received at the Lovthian mine, and is to be put in working order as soon as possible. The machine has a capacity of compressing air enough to run ten drills, and will accelerate work at the mine very much.

ISHPEMING is flooded with pictures of the town. The pictures are well executed, but Ishpeeming is such a poor subject for an artist that there is not much to admire about the lithograph after all, except its correctness as to the locality of the mines and buildings.

MORE ORE.—D. F. Wadsworth and M. H. Crocker have given the Teal Lake range another shove forward in the road to development. They have discovered a bed of hematite directly west of the Bessemer, which they will at once open up and make a mine of.

A NUMBER of our Norwegian citizens and their families betook themselves to a grove near Greenwood last Sunday and indulged in a little private picnic. The day was very pleasant and the picnicers had a nice time until the rain interfered, about the middle of the afternoon.

How does this happen, anyhow? The cow with the bell on is not nearly so numerous in Ishpeeming as during former summers; at least so it seems to the casual observer. Those who have suffered from this nuisance are not at all angry about the absence of the bovines.

A BALLOON show of some kind, conducted by a Prof. Arnold, will exhibit here next Friday. Exactly what sort of a show it is to be is not yet known,

but it is hinted that the professor has a tent and a number of horses, and that his show is nothing short of a circus. Whether or not grounds can be secured for the tent, is a question. They are so prejudiced against circuses here that if this is one in disguise it will be hard for the manager to get a place to exhibit on.

THE wizard oil crowd found this a good town for the disposal of their wares, and have been lingering with us a second week. The doctors say they find wizard oil in nearly every house, which goes to show how Ishpeeming people love to buy from street peddlers.

WM. KREUZ, formerly of the firm of Kreuz & Glocke, left this week for Commonwealth to make that place his home in the future. He will start a cigar manufactory there very soon. William is an upright and industrious man, deserving success in business, which the writer hopes he will meet with in his new place.

ANOTHER NEW STORE.—Pat. Keyes has commenced work on a new store on the lot adjoining Sheldon's shoe store. By taking ten feet from the saloon of Tim Conney, a sufficient width is obtained to allow the erection of a good sized store. The building will be in the usual Ishpeeming fire proof style-frame, with a tier of brick in the front of the second story.

COURAGEOUS LADIES.—Miss Florence Mann and Miss Otis, of Evanston, Ill., descended "A" shaft in a bucket last Tuesday. They are the only ladies who have ever gone down this deep hole. Few men, except miners, have dared to thus descend; as the shaft is nearly 400 feet deep, it requires some grit to go to the bottom in a bucket. Mr. W. O. Stone, who accompanied the ladies to the place, was content to stand at the mouth of the shaft and look down.

NEW MINING COMPANY.—Messrs. John R. Wood and "Curt" Lewis have recently made a rich find of hematite directly north of Frederick's kilns. The deposit so far as explored shows a length of several hundred feet and a good width. The land is the property of Robert Nelson, Esq. The showing is considered so good by the finder, who, by the way, is one of the most reliable mining men in this region, as to warrant the expectation of its development into a large mine in the near future. A company has been formed to operate it under the name of the St. Lawrence mine.

THE school house is undergoing its regular vacation series of repairs. The foundation walls of the building are being strengthened, and large iron bars inserted from wall to wall under the floors to steady the sides. The rooms are being kalsomined and cleaned up, and everything about the premises made snug for the coming fall and winter. Tasty little buildings have been erected over each of the two pumps, an improvement that was much needed. The school building will be rendered perfect in every respect for the fall term, except in size, and that defect can't be remedied without putting up an additional school house. The need for increased school room becomes more pressing every year, and the board can't delay building very much longer.

COMING BACK.—Before leaving, the managers of Wildman & Peck's comedy company expressed their determination to return to this place and bring another engagement here. This is something very much to be desired by all who enjoy seeing a good theatrical performance, and it is to be hoped that they will adhere to their purpose of returning, and come. The troupe is, without exception, the best that ever visited this region. They did not do a paying business in Ishpeeming, which is to the discredit of the place, inasmuch as snide shows nearly always draw full houses. The MINING JOURNAL heartily recommends Wildman & Peck's comedy company to the amusement loving public as being first class in every particular as a theatrical troupe, and hopes that when they come here again they will be greeted by crowded houses.

IT is a melancholy fact that there is more business done at the saloons on Sunday since the passage of the Sunday closing resolution than ever before. Unless rigidly enforced, the resolution will have an effect diametrically opposite to what was intended and hoped for by the majority of the council and signers of the petition. The agitation of the subject has sent scores of men into the saloons on Sunday who otherwise would not have thought of it. Hundreds have gone into the saloons and drank merely through the desire of seeing if this could be done without molestation or interference. The question now arises, "what is going to be done about it by the city authorities?" The temperance societies, with all their aversion for such doings, have not as yet raised a finger to interfere with the selling of liquor on Sunday. Meanwhile the saloon keepers are continuing to do just as they did before, and many are being benefited by an increased Sunday trade. Better to have let it alone in the first place.

BOOTS & SHOES

A FULL LINE OF THE CELEBRATED

Jefferson Goods!

NOW IN STOCK.

The reputation of this make of Boots and Shoes is unrivaled.

COUNCIL PROCEEDINGS.—An adjourned special meeting of the common council was held at the council chamber on the 21st day of July, 1881, for the final confirmation of the assessment rolls for grading and macadamizing Rock, Fisher, Third and Fourth streets. On the roll being called there were present Aldermen Prentice, Mullally, Pickands, Williams and Mack.

The reading of the minutes was dispensed with.

On motion the rules were suspended, and the final confirmation of the special assessment rolls for the cost of the grading and macadamizing Rock, Fisher, Third and Fourth streets, and of Fourth and Sixth streets from Washington street to Ridge street, and Fifth from Washington to Bluff street, was taken into consideration; and it was moved by Alderman Williams, seconded by Alderman Pickands, and unanimously carried, that:

WHEREAS, Due notice has been given, by the posting of notices, as required by law, of the meeting of the common council of the city of Marquette to consider the final confirmation of the assessment rolls for the cost of grading and macadamizing Rock street from Front street to Fifth street, Fisher street from Front street to Fourth street, of Third street from Superior to Fisher street, and of Fourth street from Back street to Fisher street; also of Fourth and Sixth streets from Washington street to Ridge street, and Fifth street from Washington street to Bluff street; and all needful revision and correction of said assessment rolls and assessment districts as established by the assessor having been made to the satisfaction of the said common council, therefore,

Be it Resolved, By the Common Council of the City of Marquette, That the said assessment rolls and said assessment districts be, and are hereby, confirmed.

The committee on streets, sewers and bridges report that Karl Horne was the lowest responsible bidder for grading and macadamizing Fifth street from Ridge to Bluff street; and on motion the contract was awarded him at 80 cents per lineal foot.

On the recommendation of the street committee the council, by a vote of yeas and nays, authorized the recorder to draw an order in favor of Patrick Keefe for \$1,000, and one in favor of Carl Horne for \$700, to be applied on their respective contracts.

The recorder was also instructed to draw an order in favor of James P. Pendill for \$87.75, to reimburse him for money advanced in purchasing for the city and securing title to lots 18 and 19 of block 3, Cleveland Iron Company's subdivision, amounting to \$728.50, and money paid J. J. Maloney for mason work in building basement under building on said lot, the receipts therefor being submitted to the council.

The cost of grading and macadamizing Arch street, west from Front street, and Third and Fourth streets, from Ridge to Arch street, having been ascertained, it was

Resolved, That the city assessor be, and is hereby, ordered to assess the cost of such grading and macadamizing said streets so ascertained as aforesaid, on the lots and real estate made subject to assessment therefor.

A petition was read from Fred Frei and others, requesting the removal of the city pound to some less populous part of the city, and was referred to the committee on police claims and grievances.

On motion the council then adjourned to July 28th, 1881, at 7:30 P. M.

JOHN G. O'KEEFE, Recorder.

ADJOURNED SPECIAL MEETING, July 28th:
An adjourned special meeting of the common council was held on the 28th day of July, at which were present the mayor, aldermen Prentice, Mullally, Lyons, Pickands, Williams and Mack.

The reading of the minutes being dispensed with, and the rules of order suspended, alderman Pickands moved the following resolution, which was adopted:

That, whereas, the common council has ordered that a sewer be laid along Erie street, from Blocker street to Cedar, and thence to Lake Superior, according to the plans and specifications, as approved by the council, and the cost of said work having been ascertained to be forty-two hundred and forty dollars; therefore, be it

Resolved, That the assessor is hereby ordered to assess the cost of said work, so ascertained, as aforesaid, on lots and real estate, made subject to assessment for the payment of the cost of said sewer, under the charter and ordinances of said city, and in accordance therewith.

The city assessor, in compliance with the foregoing resolution submitted his report, establishing and defining a local assessment district, for the cost thereof, which report and roll were examined by the council, and on motion were accepted and approved as made.

The city assessor also presented his report, as already ordered by the council, establishing and defining a local assessment district for grading and macadamizing Arch street from Front to Fourth street; Third street and Fourth street, from Ridge to Arch street, and Fifth street from Bluff street to the point of rock on the north end of said Fifth street, and his assessment of the property in said districts for the cost thereof; which report was on motion accepted and approved, and the recorder instructed to publish notices as required by the charter, for the final confirmation of said assessment rolls.

On motion the council then adjourned to August 8th, 1881, at 7:30 o'clock.
JOHN G. O'KEEFE, Recorder.

REMEMBER.—The family of "L" is dispersing on its annual camp meeting tour—some for Walskai Bay and others for L'Anse.

Mr. E. Rogers has taken a sub-contract from Messrs. McDermid and Ross on the N. P. railroad.

Henrio & Son have moved their store from Munising up to No. 2 kilns, on the railroad.

The steam yacht Hays makes weekly trips from Rock River to Munising for the accommodation of settlers. Twenty dollars per ton is the tariff charged on freights to Rock River, and even then we have been short on freight. What will the charge be when the railroad is built? We give it up—our arithmetic won't reach.

Sawyer, of Laughing Whitefish fame, intends moving from his present location to No. 2 kilns, where the hungry can always depend upon getting a first-class meal when he gets established there.

John McKinnon always gets in on time with the mail, though he takes Shank's mares to carry it from Au Train.

Not a line steamer in the bay this season! Wait until Old Boreas gets on the howl, and they will be glad to seek the protection it affords.

Twenty-three deer and one bear were seen at Sixteen-Mile Lake one day this week. The proportion of venison to bear meat may be too much for some stomachs, but we must record these things as other people tell us they saw them.

W. J. Pieton lit down on this ancient burg last week. Since the railway has passed us the boys are becoming somewhat independent, but the mail brings them to roost.

There are said to be several whisky vendors in Onota township who should either "sit" or "hoist" a license.

Go to Crowley's for the boss fly-killer. We have it and are happy.

There are a number of cases of scurvy on the D. & M. R. R. down in the swamp. As acids and fruit are being shipped to them we presume they will pull through all right.

THEIR STATEMENTS INDORSERD.—A strong statement unqualifiedly indorsed most induce confidence. In this connection we note the following from Dr. Louis Bock & Son, Sheboygan, Wis.: We have been handling St. Jacobs Oil and are pleased with the large demand. Hardly a day goes by without hearing from some one or another of our patrons having used it with entire satisfaction, saying it is the best thing they ever tried, and we join them in so saying.—Pittsburgh Catholic.

BURT'S Fine Shoes. Elegant Linen Boys' and Children's Clothing.

Great Closing out Sale of Spring and Summer Clothing

BUSINESS SUITS
MADE TO ORDER FOR \$25.00.

Ladies and Gentlemen, for your Good, Reliable Clothing and Low Prices go to

I. NEUBERGER,
Bank Building.

All Wool Single Boys' Pants at \$1.50. SHIRTS MADE TO ORDER.

L'ANSE.—Last week's MINING JOURNAL stated that Mr. McPherson had charge of the explorations on the Conrad property. This is an error. Judge Hendrick remains in charge of the work on that property. Mr. McPherson is in charge of Fall River property.

Mr. John Gunnes' long expected new tug, the E. L. Mason, arrived here Thursday of last week. She was built to order at Aigonac, Mich., and we can see with the eye of a novice that she is No. 1 craft.

The barge Iron Duke and her consort, Iron Chief, loaded 1800 tons of Michigan ore here on Monday, that being the largest load taken from here this season.

Miss Ella Curtis left on Saturday's train for her home at Farmington, Mich. She has not yet decided whether she will teach here this season or not.

Quite an interesting law-suit was tried on Tuesday before Judge Hendrick, the parties to which were Peter St. Arnold, plaintiff, and John Billinger, defendant. The plaintiff was successful in his suit, obtaining a judgment in his favor for \$100 and costs.

Our village marshal arrested a pair of noisy individuals Monday for being drunk and disorderly, and Judge Hendrick completed the job by sending them to the county jail for twenty days. A little salutary discipline of this sort will go a great way towards rendering our village the orderly place we all desire it to be.

Another yacht, the Minnie, has been brought here from Ontonagon to ply between this point and the Pequaming saw mill. She belongs to C. and E. Johnson, who announce that the boat will make regular daily trips. Cridor is her captain, and he is just bubbling over with nautical knowledge and fun that isn't naughty.

Invitations are out for a grand wedding this week, a report of which your correspondent will furnish for the next number of the MINING JOURNAL.

Haying has commenced in earnest, but only a light crop will be gathered this year in Baraga county.

[First publication July 30, 1881.]
THE CIRCUIT COURT FOR THE COUNTY of Marquette, Edward Fraser vs. Narcisse Bisson, Carriette Bisson and Moise Bisson, in attachment. Notice is hereby given that on the 30th day of June, A. D. 1881, a writ of attachment was duly issued out of the circuit court for the county of Marquette, at the suit of Edward Fraser, the above-named plaintiff, against the lands, tenements, goods and chattels, moneys and effects of Narcisse Bisson, Carriette Bisson and Moise Bisson, the defendants above named, for the sum of six hundred and five & 10/100 dollars (\$655.00), which said writ was returned on the 6th day of July, A. D. 1881.
Dated this 29th day of July, A. D. 1881.
F. O. CLARK,
Attorney for Plaintiff.
