

ITEMS OF INTEREST.

MONEY isn't exactly tight, but it is perhaps a little exhilarated. "WHAT every one says must be true," that "Dr. Sellers' Cough Syrup" has no equal for coughs and colds. Try it. Price 25c.

A TEXAS young man shot himself because a young lady refused to dance with him. In his blind rage he probably mistook himself for a rival.

HEALTH, strength and vigor given, and miraculous cures effected, by using Brown's Iron Bitters. Its sale is immense. EXTRACT from a letter from Angelina: "Dear Henry: you ask me if I return your love. Yes, Henry, I have no use for it and return it with many thanks. By-by Henry."

AGENTS can now grasp a fortune. Outfit worth \$10, sent for full particulars, address E. G. Rideout & Co., 10 Barclay St., N. Y.

"TOMMY," said a mother to her 7-year-old boy, "you must not interrupt me when I am talking with ladies. You must wait till we stop, and then you can talk." "But you never stop," retorted the boy.

"THE doctors said my wife had consumption. Tried Lindse's Blood Searcher, and she has better health than ever." G. H. Hubbard, Hampden, Ohio.

"ARCHIMEDES, you say, discovered specific gravity on getting into his bath; why had the principle never occurred to him?" "Probably this was the first time he ever took a bath."—Harvard Lampoon.

MRS. A. N. FRANK, 177 West Tupper street, Buffalo, N. Y., says she has used Thomas' Electric Oil for severe toothache and neuralgia, and considers it the best thing she knows of for relieving pain.

TEACHER.—"Did I not tell you to be prepared with your history lesson? And here you are, unable to repeat a word of it." Scholar.—"I didn't think it was necessary, sir; I've always heard that history repeats itself."

No matter what happens you may rest assured that you are being speedily cured by Thomas' Electric Oil, in all cases of rheumatism, neuralgia, toothache, etc. One trial only is necessary to prove its efficacy.

POSTOFFICE clerk: "Here! your letter is overweight." Pat: "Over what weight?" P. C.: "It's too heavy; put another stamp on it." Pat: "Oh, git out wid yer foolin'! Sure if I put another stamp on, won't it be heavier still?"

A GOOD square meal is too often followed by a disordered stomach, symptoms of dyspepsia or indigestion. Every miserable dyspeptic in the land should know that he can be cured by a timely use of Burdock Blood Bitters. Price \$1.00, trial size 10 cents.

IN Arkansas when a couple of 10-year-old boys are not home for supper, their mother looks troubled, and observes, "Now, where in the world are their children? If they are out robbing trains again I'll take the hide off 'em when they come home, con art them!"

"My friends," said a political speaker, with a burst of ingenious eloquence, "I will be honest—There were a large number of my neighbors present, and the terrible outburst of applause which followed this remark entirely upset the point which the orator was about to introduce."

VIRTUE ACKNOWLEDGED.—Mrs. Ira Mulholland, Albany, N. Y., writes: "For several years I have suffered from off-recurring bilious headaches, dyspepsia, and complaints peculiar to my sex. Since using Burdock Blood Bitters I am entirely relieved." Price \$1.00, trial size 10 cents.

WHEN little Minnie was 2 years old she asked for some water one night. When it was brought she said, "Papa, can't you get me some fresh water? This tastes a little withered." Her little sister Belle had been accustomed to a light in the room and walked in great distress, crying, "We can't see, Aunt Hattie; my eyes are all blowed out."

GRANDMOTHER used to say: "Boys, if your blood is out of order try Burdock and boil it down in kettles, making a nasty smelling decoction; now you get all the curative properties put up in a palatable form in Burdock Blood Bitters. Price \$1.00, trial size 10 cents."

THE minister asked the Sunday school: "with what remarkable weapon did Samson at one time slay the Philistines?" For a while there was no answer, and the minister, to assist the children a little, commenced tapping his jaw with the tips of his fingers, at the same time saying: "What's this—what's this?" Quick as the wind a little fellow, "Burdock Blood Bitters," replied: "The jawbone of an ass, sir."

MRS. ANNIE A. SMITHTON, of Auburn, N. Y., writes: "I have doctored for years and tried various advertised remedies for my complaint, which was general prostration. I believe I suffered every ill that flesh is heir to. The least exertion caused the greatest fatigue. I was tormented with dyspepsia and every irregularity. My blood seemed poisoned, pimples and sores were all over my body; nothing I tried ever gave me more than mere temporary relief, and I felt myself growing worse and worse. My friends, the druggist, advised me to use Burdock Blood Bitters. From the very start I began to improve; now I do not feel like the same woman."

SHE was a Boston woman; tall, thin, with false curls and a sour visage. Beside her sat her husband, a little, meek, demure looking man, who seemed incapable of boldness of speech or action. Presently a guest at the other end of the table bawled out at the top of his voice: "Then the demure looking little man turned to her and said: 'Dovey, somebody wants you.'"

A TOO utterly, too, too young man had his fortune told by a clairvoyant. He charged \$5. He refused to pay it, and sued him before a justice of the peace to recover the amount. The defense was that the clairvoyant was a charlatan and that there was no truth in the story she had told him. Turning to her the justice then asked: "What have you to say to that, madam?" "I admit," she replied, "that what I told him was purely imaginary and false." "Then why do you insist," said the justice, "on collecting the bill?" "Because," she answered, "it was worth \$5 to hold his dirty hand."

THINKERS WILL READ AND HEED THIS.—When our most experienced and practical physicians widely endorse and recommend a medicine, knowing from the ingredients used it must have an excellent general effect on the human system, and is a true strengthener of every organ of life, and recognized as Nature's best assistant in curing dyspepsia, indigestion, general debility, nervous prostration, want of vitality, constipation, fevers, chronic stasis and fever, rheumatism, female diseases, broken down constitutions, ill health, weakness, debility, imperfect action of the organs of life, and health, etc. all of which make life miserable; then indeed should the newspaper press of the country call the attention of suffering humanity to so meritorious a compound. We refer to Thomas' Iron Bitters, a remedy having the largest sale in the east of any medicine ever invented, simply because it has true merit and gives permanent relief.—Herald.

Two young men were traveling on the cars from New York to Albany. It was clearly to be perceived that they were representatives of the press. They did not wear broadcloth clothes, their hands were soiled with plumbago dust, and they had a dead-head air about them. Anybody would have said they were newspaper men, and they were. When the conductor came round one of them was so deeply immersed in conversation that he passed up what he supposed was his ticket, without observing it. The official glanced at it, smiled, and handing it back said: "It's a pretty face, but you can't pass on it. Horrible! It was the carte de visite of a young married lady."

A BAPTIST MINISTER'S EXPERIENCE.—I am a Baptist minister, and before I even thought of being a clergyman, I graduated in medicine, but left lucrative practice for my present profession, 40 years ago. I was for many years a sufferer from quinsy: "Thomas' Electric Oil" cured me. I was troubled with hoarseness, and Thomas' Electric Oil always relieved me. My wife and child had the diphtheria, and Thomas' Electric Oil cured them, and I taken in time it will cure, seven times out of ten. I am confident it is a cure for the most obstinate cold or cough, and if any one will take a small teaspoon and half fill it with the Oil, and then place the end of the spoon in one nostril and draw the oil out of the spoon into the head by sniffing as hard as they can, until the oil falls over into the throat, and practice that twice a week, I don't care how offensive their head may be, it will clean it out, and cure their catarrh. For deafness and earache it has done wonders to my certain knowledge. It is the only medicine dubbed patent medicine that I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my house for any calamity. I am now suffering with a pain like rheumatism in my right limb, and nothing relieves me like Thomas' Electric Oil. Dr. E. F. Clark, Corry, Pa.

HAVE YOUR MAGAZINES AND MUSIC BOUND! BY C. A. Eggcrs. Prices lower than ever, and in accordance with the times. MINING JOURNAL BUILDING 681ms Marquette, Mich.

BUY THE BEST! BULLOCK'S LATEST IMPROVED DIAMOND POINTED ROCK DRILLS. Prospecting, mining, shafting, tunneling, draining, quarrying and sub-marine blasting. The accompanying cut represents my new drill, "The Little Champion," for shafting or underground prospecting. This machine has ALL OF MY LATEST IMPROVEMENTS. Including Trunk Engines, with balanced slide valves to use either steam or compressed air economically. It has also my "Pat. Hinged Swivel Head," "Pat. Thrust Register," (for indicating the thickness of each strata), "Pat. Roller Thrust Bearing," and "Pat. Method of changing the feed while the drill is running." The drill rods are all fitted with "Pat. Bayonet clutch couplings," which uncouple by giving the rods one-fourth of a turn. THE HIGHEST TESTIMONY AWARDED THEM FOR RAPIDITY OF EXECUTION AND ECONOMY OVER ANY OTHERS IN USE. For prospecting, these drills accomplish the most IMPORTANT RESULTS otherwise wholly unattainable. By their use only can mines be penetrated to a depth of from one to TWO THOUSAND FEET through the HARDEST ROCK, at any angle, taking out a core the entire depth, fully developing the strata passed through. Tunnels driven and shafts sunk in from one half to one sixth of the usual time, by using these machines in connection with our Pat. Long Hole Process.

The Mining Journal.

ISHPEMING, NOVEMBER 19, 1881.

THE saw mill at Clarksburg is soon to be put into operation. This burgh seems destined to become an important point—even though corner lots there are left vacant through the greed of their owner.

WALSH & TISLOV are turning out a lot of dump sleighs for mining firms in the copper region. The work turned out of their shops is of such excellent quality as to bring them business a long way from home.

PEPPER.—Prof. G. W. Pepper will deliver a lecture here on the 30th inst. Wonder if it is the same Pepper who gave a terribly thin scientific lecture here six years ago? If it is —, but we hope it isn't.

THE most common way to get up a financial raffle is to start a raffle. When the raffle breaks up in a row the projector finds himself with too much of a raffle on his hands, and this is quite often the case.

DITCHED.—A train of fifty-seven ore cars broke in two while near Patterson station on the Chicago & Northwestern Railway Thursday night. The cars behind, forty in number, ran into the forward part of the train which had stopped, with such force as to pile forty cars into a mass. When an irresistible force comes in contact with an immovable object there's a collision takes place on a railway track.

LOST.—On Wednesday, of this week, mayor Outhwaite had the misfortune to lose a Maltese cross watch charm. The cross was a thirty-second degree emblem, and had the figure of a crown and cross on one side and a double headed eagle on the other. The charm has a peculiar value to the owner on account of its being a present, and Mr. Outhwaite wishes us to say that the finder will be rewarded with a five dollar bill on returning the same to him.

FATALITY.—By a fall of rock at the Incline pit of the Cleveland mine at 4 o'clock yesterday morning, C. W. Lindstrom, a Swede, was instantly killed. His skull was crushed and both legs broken, in fact, he was completely jammed to a jelly. Coroner John Westgren held an inquest at the engine house yesterday afternoon and the jury found a verdict in accordance with the facts. Lindstrom was a middle-aged man, but inexperienced in mining. He leaves a family in the old country.

ROSSITER & Co.'s new place was opened per force Saturday night. The proprietors were not quite ready to open, but the people came and would get in, so business was commenced, and it has been booming there ever since. This firm has opened by all odds the finest restaurant and bar on the peninsula. It is simply astonishing how they have in so short a time transformed the rooms they occupy into such elegant apartments. All the furniture and fixtures are of the finest materials, and the place is fitted up in rich city style. No money was spared to make it the model establishment of the kind, and the proprietors can flatter themselves that they have accomplished it. A good run of custom shows that the place meets with high favor.

Ask any druggist that has ever sold White Wine of Tar Syrup, and he will tell you it is the best remedy for the Lungs there is in use. Price 50cts. Sold by J. Crowley.

WHEN you get ready to go to Europe or to send for your families or friends, please go to "The Old Rock Store" and buy your tickets from I. N. Oie. He is agent for some of the best steamboat and railroad companies in the world.

[First publication Nov. 5, 1881.] PROBATE ORDER.—State of Michigan, County of Marquette, ss: At a session of the probate court for the county of Marquette, holden at the probate office, in the city of Marquette, on Tuesday, the first day of November in the year one thousand eight hundred and eighty-one. Present, Hon. Edward S. Hardy, Judge of probate. In the matter of the estate of Joseph W. Edwards, deceased. Amos R. Harlow, administrator, with the will annexed, of said estate, comes into court and represents that he is now prepared to render his final account as such administrator. Thereupon it is ordered that Monday, the twenty-eighth day of November, 1881, at ten o'clock in the forenoon, be assigned for examining and allowing such account, and the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said court, then to be holden at the probate office, in the city of Marquette, and show cause, if any there be, why the said account should not be allowed; and it is further ordered that said administrator give notice to the persons interested in said estate of the pendency of said account and the hearing thereof, by causing a copy of this order to be published in the MINING JOURNAL, a newspaper printed and circulated in said county of Marquette, three successive weeks previous to said day of hearing.

[First publication Nov. 12, 1881.] PROBATE ORDER.—State of Michigan, County of Marquette, ss: At a session of the probate court for the county of Marquette, holden at the probate office, in the city of Marquette, on Tuesday, the eighth day of November, in the year one thousand eight hundred and eighty-one. Present, Hon. Edward S. Hardy, Judge of probate. In the matter of the estate of Martin Tiddy, deceased. On reading and filing the petition, duly verified, of A. Kidder, praying that administration upon said estate may be granted to H. H. Stafford, or some other suitable person; thereupon it is ordered that Monday, the fifth day of December, next, at ten o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said court, then to be holden at the probate office, in the city of Marquette, and show cause, if any there be, why the prayer of the petitioner should not be granted; and it is further ordered that said petitioner give notice to the persons interested in said estate of the pendency of said petition and the hearing thereof, by causing a copy of this order to be published in the MINING JOURNAL, a newspaper printed and circulated in said county of Marquette, three successive weeks previous to said day of hearing.

NO PAPER SENT TO ANY ADDRESS UNLESS PAID FOR IN ADVANCE.

SUBSCRIBERS ordering their papers transferred from one address to another should be careful to give the name of the postoffice to which the paper is being sent at the time, in order to secure prompt attention, as otherwise the mail clerk may have to search through the entire list to find the name.

PARTICULAR NOTICE.—The MINING JOURNAL will not be sent to subscribers after the expiration of the time subscribed and paid for, unless the subscription is renewed. Subscribers can always know when their subscription expires by comparing the number of the printed address on their papers with the corresponding number on their receipts.

All letters of a business character, such as advertisements and communications intended for the columns of this paper, should be addressed to "THE MINING JOURNAL," and not to the editor personally, as is often the case. Only letters of a personal or confidential nature should be addressed to—A. E. SWINERD, care of the Post Office at Marquette, Mich., as second-class matter.

IMPORTANT NOTICE.—A meeting of the Iron Ore Association will be held at 10 A. M., Monday, Nov. 21, at the office of the Republic Iron Co., to select delegates to the National Tariff Meeting to be held in New York. A full attendance is requested. By order of D. MORGAN, Pres't. C. Y. OSBURN, Sec'y.

EXPLORATIONS on the Falls River Iron company's property, near L'Anse, will be resumed and continued during the winter.

A NEW hoisting engine, with drum, has been ordered for the Wheat mine, which is said to be developing finely, the vein at the east end being at least 30 feet thick.

THE discovery of iron ore in the Huron Bay slate district is reported, but as far as the MINING JOURNAL can learn nothing of positive value has as yet been found.

REPORTS says that the Wheat hard ore vein has been cut on the Grand Rapids Iron Co.'s leasehold, but for the truth of such report the MINING JOURNAL cannot vouch.

E. A. SKINNER, Esq., having resigned the local superintendency of the Dalliba mine, Walter Fitch, formerly ore shipping clerk for the M., H. & O. R. R. has been appointed to succeed him.

MYERS EPHRAIM, of Escanaba, is reported to have found ore of good quality in the vicinity of Little lake, some 20 miles south-east of Negaunee. It is probably in what is known as the Cheshire range, or district.

SILVER lead, said to give by analysis 60 per cent. of lead and 20 ounces of silver to the ton, is reported to have been discovered on the newly surveyed route of the Milwaukee, Lake Shore & Western railroad, at a point near Agogeeb Lake. Go slow.

AN undivided one-half interest in the Iron River property, section 26, town 43, range 25, has been sold to the Brier Hill Iron & Coal company for a consideration of \$450,000, the payment of the larger part of which hinges upon the development of a paying mine. The same company has also bought four-tenths of the Florence mine, for which it paid \$150,000.

THE Brier Hill Iron Co.'s explorations near the Curry give unmistakable promise of the development of a mine of goodly proportions. A drift across the formation from the bottom of the shaft was at last accounts over 30 feet in ore, with neither wall in sight. The ore is of an exceptionally fine quality, and that there is a large body of it there can be but little doubt.

At the late annual meeting of the Boston Iron Co. the old board was re-elected, with the exception of J. C. Morse, Esq., who declined in favor of John Hornby, elected in his stead. The officers of the company now are: President—CHARLES E. WRIGHT; Secretary—JAMES PICKANDS; Treasurer—JOHN HORNBY; Supt.—CAPT. WILLIAM ROBERTS.

THE MINING JOURNAL, it appears, was not well informed when it stated last week that the Republic would not be able to bring her product up to that of last year. On the contrary, her output up to and including the 16th inst., is given at 235,313 gross tons—only 74 tons less than the whole amount of last year's shipments, with at least two cargoes yet to be reported.

THE total lake and rail shipments from the Lake Superior mine for the year, up to and including the 16th inst., are reported at 256,407 gross tons, with 9,000 tons remaining in stock. Of this enormous product 100,000 tons were mined during the last four months, notwithstanding the untoward state of the weather. These figures place the Lake Superior in the lead of all other American iron mines.

THE Atlas Iron Co. has made arrangements for the thorough exploration of its property in sections 5 and 8, town 47 range 26. On the former section parties have undertaken to show up a workable deposit of merchantable ore for a valuable consideration in stock—the value of the consideration depending entirely upon that of the developments to be made. Specimens of ore shown by the parties would seem to indicate that there is a fair show for the development of a paying mine on the company's leasehold.

A. B. CORNELL, of Youngstown, Ohio, has bought a half interest in the St. Lawrence mine, now being opened, and which is located on the north range, a short distance west of Ishpeming. The ore at this point exists in apparent large body, but is said to be rather lean, though low enough in phosphorus for Bessemer purposes. A plant of machinery has been purchased, and it is the intention to work the mine on an extended scale the coming season. J. C. Lewis and J. R. Wood are the joint owners with Mr. Cornell.

THE Dexter Mining Co. is the title of a new corporation which recently filed its articles of association. This company has been organized with a view to the exploration and development of the east half of the north-west quarter of section 3, town 47, range 28, which tract lies immediately west of that now being explored by the David's Mining & Exploring Co. The latter company's first drill hole, which penetrated 35 feet of red ore, is on or very near the line between the two properties, and the new company therefore starts with a very fair prospect ahead.

THE lake shipments for the week ending 16th inst. footed up 54,566 gross tons, against a total of only 24,794 tons during the corresponding period last year. It is noticeable that while 23,377 tons of last week's shipments were from Marquette, only 534 tons were shipped from the same port during the corresponding week of last year, and that at this writing vessels having a cargo capacity of at least 20,000 tons, are in the harbor loading or waiting for cargoes. It is now perfectly safe to estimate the lake shipments for the season at 2,200,000 tons.

At the Garfield, on the Menominee range, the indications are fair for the development of a paying mine, although that consummation is by no means fully assured. The new shaft is reported about six feet in ore which averages well in metallic iron, but is rather high in silica. A sand-drift shows a large body of such ore, which, it is hoped, and not without reason, will materially improve in sinking. On section 14, immediately west and adjoining the East Vulcan, the shaft is down 50 feet in slate without striking ore. This shaft will be put down 125 feet, and from the bottom a drift will be driven south across the formation in the hope of striking the East Vulcan deposit.

LAST winter, while the Brule River R. R. controversy was at its height, the MINING JOURNAL was charged with having been bought up by the Canal company, a charge which was at the time properly refuted. It now reaches the editor's ears that the charge was based upon statements or boasts made by no less a personage than Theodore M. Davis himself. The truth is, the MINING JOURNAL never knew of met Theodore M. Davis until sometime after the adjournment of the legislature; never had any consultation with any other officer of the Canal company concerning the matter, and so far from being bought up by the MINING JOURNAL has never had even the legitimate business patronage of the Canal company. Theodore M. Davis has the floor for the purpose of a personal explanation, which must be made plain, explicit and straight to the point, under penalty of having his conduct in the premises properly characterized in these columns, and in plain Anglo-Saxon, the meaning of which will require no interpretation.

It will be seen by notice at the head of our editorial columns that the Iron Ore association is not defunct, but still lives. While the MINING JOURNAL notes this fact with pleasure, it is nevertheless true that the association has fallen far short of what might reasonably have been expected of it. It has held no meetings, and is now only called together at the last moment to meet an emergency which should have been provided for a month ago—to "provide proper representation," etc., at the tariff convention which meets in New York only a week hence, and in the action of which this section is vitally interested. With all due respect to the members of the association the MINING JOURNAL ventures to suggest that it is now too late to provide proper representation in the New York convention. The delegates from this district should have been accredited at least a month ago, so that they might have had ample time to prepare themselves for a proper discharge of the duty devolved upon them—time in which to collate facts and figures, and for consultation with the delegations from other mining regions; but, as it is, the delegates from this district, whoever they may be, will necessarily go illy prepared to do their whole duty either to themselves or the great interest they will represent. This should, and would, not have been had the Iron Association been a live, active body, rather than a corpse which can only be galvanized into spasmodic action in cases of great emergency. It is sincerely to be hoped that at the

meeting on Monday next steps will be taken to make the Iron Association an active and effective institution, which shall at all times be prepared to grapple with questions which affect the welfare of the great iron mining industry of Lake Superior. Regular meetings should be provided for. Rooms should be secured for the meetings; a suitable person should be employed to take charge; specimens from all the mines should be collected and properly labeled, and the rooms of the association be thrown open to the thousands of visitors who annually come here to investigate our mineral resources. By this means the Iron Association can be made a power in shaping the future welfare of this region—not otherwise.

SHIPMENTS.—The following is a statement of lake shipments of iron ore for the season, up to and including Nov. 16, 1881:

Table with 2 columns: Name of Mine, Gross Tons. Includes Escanaba-Marquette District, Menominee District, and L'Anse.

The following table exhibits, in gross tons, the total lake shipments of iron ore for the present season, up to and including November 16, together with the amount shipped during the corresponding period last year:

Table with 2 columns: WHERE FROM, 1880, 1881. Includes Escanaba, Marquette, L'Anse, and Total.

An increase of 353,049 gross tons.

The following is a statement of shipments made from the Menominee Mining Company's mines by lake, from opening of navigation to Wednesday, November 16, inclusive:

Table with 2 columns: Name of Mine, Gross Tons. Includes Chapin, Cyclops, Florence, Norway, Quinnesec, Vulcan, Eagle, and Total.

An increase of 100,888 tons over a corresponding period last year.

The year now nearing to a close has been one of great prosperity to this country, and it has been full of great events. It is the centennial of the establishment of this nation on a foundation of assured independence—and it has grown most wonderfully in power, population and influence in the century that has intervened between the relinquishment by England of her assumed prerogative of control over the colonies and this year of 1881.

The activity in business of all kinds that marked the opening of the year has been maintained, and will attend its close, giving promise of another year of unexampled growth and development in all branches of trade and industrial effort. In other respects, too, the year will be a notable one for all time to come in American history. The assassination of president Garfield gives it a mournful title to remembrance. And yet that event, more powerfully than any other which transpired since the

war closed, demonstrates the stability of our republican institutions. By the act of an assassin a complete change of administration has been effected in our government without in the least disturbing governmental operations, affecting values, or creating any of those social convulsions usually attendant upon such occurrences in the older countries and under their so-called "strong governments." This serves to show that a government resting on the affection of the people, and "deriving its just powers from the consent of the governed," is, after all, the strongest that human ingenuity can devise or frame, and is the best possible answer to the repining of those vulgar rich among us who would like to see the grand simplicity of our system exchanged for the tawdry splendor of a "strong" despotism. Two presidents have been inaugurated during nine months of 1881, three different administrations have held power within the same period, and yet no jar was felt in the machinery of government, which has moved grandly on, impelled by the mighty force of popular sentiment and approval behind it, greater than presidents or administrations, more enduring than parties, and doing its appointed work with a steadiness and precision contrasting sublimely with the mutability of political affairs and the painful uncertainty of human life. There is much to render the student thoughtful and the patriot sanguine in the history of our glorious young republic for this year of 1881, which has brought us so large a share of material prosperity, of national growth, and a crushing national sorrow that bowed our people in grief at the tomb of a beloved president, murdered without a shadow of cause by a depraved and senseless assassin.

Chicago will have to bestir herself in the immediate future to retain the control she now holds over the trade of the rich and growing "Great Northwest." New railway systems, designed to rob Chicago of a heavy share of the commerce that has brought that city such magnificent prosperity within the past quarter of a century, are pushing forward to completion, and a few more years will see the haughty metropolis forced to sue for what she now commands. The completion of the Northern Pacific road, with its connections, by water and rail, with all the great eastern cities, will sensibly weaken the hold of Chicago on a territory that now renders her rich tribute. Her business men begin to perceive this, and are already considering how they can avert the threatened danger to the supremacy of their city. There is not a city in the world with inhabitants more imbued with belief in themselves, and their ability to bend circumstances to their will, than those of Chicago, and it is safe to predict that they won't stand supinely by while the game that affects their vital interests is being played. The trade of the states lying to the north and west of her is a rich stake, and she will not let any portion of it get away without a struggle for its retention.

To an outsider it would seem that the sheriff of Manistique county would be more at home running a country hotel than a county jail. Another batch of prisoners—and a mighty bad lot, too—escaped through his carelessness the other night. The sheriff had allowed them the freedom of the corridor, and when he went to lock them in their cells over night they seized and overpowered him, then making good their escape. Four got away in this manner; Jones, in for murder, and Nutt, Murphy, and Woodard, charged with attempted rape and arson. Jones was abandoned by the pals whom he aided in effecting their liberation, and subsequently returned and gave himself up of his own accord, but the other three are still at large, or were at latest accounts. When the escaped criminals were placed in custody for a most infamous crime the MINING JOURNAL suggested to the sheriff that it would be well to guard them closely, but he failed to act upon the hint. It may be that he didn't read the paper, but we don't want to believe him derelict in all his duties. The officer is making a wretched record for himself as a custodian of prisoners, and much unnecessary expense for his county, by permitting these repeated jail deliveries.

Though our friend J. K. Wright, of Marinette, failed of election to membership in the Wisconsin legislature last week, he reaped all the glory in the contest, his opponent just barely scratching in by a narrow margin, notwithstanding that the district is overwhelmingly republican. Mr. Wright made a brilliant run, carrying his home precinct by over three hundred, though he had an adverse majority to overcome, and securing a handsome majority in his own county—which gave the republican state ticket over 500 majority. "Jase" is an outspoken democrat, but the fact that he is opposed to them politically did not prevent his republican neighbors from standing by him like men at the polls. It is such instances as this that enables us to trust

that the people won't permit partyism to ruin the country, but it can't be denied that the reassuring effect in this case would have been greater if a few more republican votes had been cast so as to ensure putting the Wright candidate in the right place.

The trial of Guiteau was begun at Washington on Monday, when the notorious political "readjuster" was brought into court, and the case formally opened by his arraignment on the indictment charging him with the wilful murder of president Garfield. His counsel are Scoville, his brother-in-law, and a young attorney named Robinson, assigned to the position of assistant counsel in the case by the court. A jury was impaneled in the case by the middle of the week, much less difficultly having been experienced in finding competent jurors than was anticipated. The prisoner's demeanor in court is quite in keeping with the impression given by his conduct since he has been in confinement. It is evident enough that he is not of sound mind, in the ordinary sense of the phrase, but his insanity takes the form of an inordinate vanity and restless craving for notoriety, which it would be wicked to regard as absolving him from responsibility for his terrible crime, planned with a selfish desire to promote his own advantage, and in the full belief that the investment with power of the "stalwart" wing of the republican party through the death of his victim would ensure him immunity for his cruel act. On this point, however, the court will shortly pass, the plea of insanity being the chief one on which the defense relies, though Guiteau himself objects—or pretends that he does—to having this plea raised in the case at all. Despite the tremendous consequence, of the now historic crime for which he is arraigned, Guiteau's trial promises to excite but little interest, even in Washington. The people have grown weary of hearing and reading about the miserable "crank," and only desire that he shall be fairly tried and properly punished for the murder that gives his infamous name a place on one of the saddest pages of American history.

The Chicago Times, of Monday, makes this unkind personal mention of a great Michigander:

Hon. J. A. Hubbell, member of congress from Michigan, who has aspirations for the speaker's seat of the house, is at the Palmer. He became known to fame as the "giver away" of a private letter from Gen. Garfield regarding the raising of money for Indians by Gen. Thomas Brady, late of the star route.

The Times, obviously, doesn't thoroughly know Mr. Hubbell—our "Jay"—who has several more titles to fame than that to which it makes slighting allusion, and all of them equally to his credit. If there is any such thing as the law of compensation Mr. Hubbell ought to rank as a great man away from home. Here he is only rated as an extremely lucky one. The MINING JOURNAL is stirred with conflicting emotions when it contemplates the possibility—remote though it be—of Hubbell becoming presiding officer of the house; on whose floor he has so signally failed to make himself useful, either to this district or the nation at large. It local pride might be touched by that recognition of "our representative"—but the sight of such a pigmy in the chair where great men have sat would sorely vex it on behalf of the nation, of whose retrogression in the grade and character of its public men such a spectacle would be too painfully conclusive.

In all our cities the unsightly telegraph pole, with its creaking burden of stretched wires, has become an intolerable nuisance. Anything which gives promise of its abatement will be universally welcomed. It is probable that the plan of laying wires underground will soon do away with the cumbersome system of carrying them on poles, where they are peculiarly subject to damage from storms, or other causes. The Mutual Union Telegraph company is now putting down wires on the underground plan, as is also the Western Indiana railroad. A brief description of this method may not be amiss in this connection. The wire used is No. 12 copper. Each wire is encased in a glass tube an eighth of an inch in diameter. Forty wires are then enclosed in a lead pipe. They are rendered perfectly air-tight and insulated by pouring on a solution of paraffine. Three of the pipes are laid in pine boxes, four by four inches. After this they are ready for the trenches, and when covered are out of the way and secured from damage by storms.

The star route cases have been dismissed under the proceeding by information, judge Cox, of the Washington criminal court, ruling against its binding force. This does not necessarily end the prosecution, as the government has not exhausted its remedies, but it might as well, the purpose of the present administration plainly being to shield Brady and his associates. District-attorney Corkhill has been manifestly in league with the plundering crew throughout—and Lord only knows how many others of those in authority at Washington. The curtain can't be rung down on that farce any too quickly. The people are mortally tired of the clumsy performance.

A London dispatch has this information:

A mysterious box sent from America to Ralph Creyke, member of parliament, was opened with great precaution at Woolwich arsenal, under the idea that it was an infernal

machine, but it was found to contain samples of guano.

With a carelessness that we have had occasion to notice and deplore frequently, the sender of this important item of news neglected to record what the cautious officials said when they discovered that the box held nothing but guano!

There is many a slip between the office and the candidate. In the county election down in Fond du Lac county, Wis., J. C. Pierron—who was treasurer of Fond du Lac city when Baker's bank closed its doors, and who was bankrupted by its suspension—was nominated for the sheriffly by the democrats. The informal returns showed him to be defeated by 57 adverse majority, and the republicans were overjoyed, while poor Pierron felt that the Lord had indeed ceased to smile upon honest men. But the official canvass, which was made Wednesday of this week, established that Pierron has a majority of 14, and he will eat his Thanksgiving turkey with a cheerful heart next Thursday, while the man who did the crowing immediately after election will sit in a cave of gloom and swear. That county of Fond du Lac is one of close calls in politics—the last democratic sheriff elected before Pierron having had but nine majority. We tender heartfelt congratulations to the successful candidate, whom the writer knows to be an honest and deserving man. As a stroke of poetic justice, he is fairly entitled to the benefits his new office will bring him in return for the losses sustained in another, through no fault or wrong-doing of his own.

There has been something of a shrinkage in the democratic victory in New York, as at first reported, but that party will undoubtedly control the state legislature—an advantage of minor importance, as no U. S. senators are to be chosen the coming year—unless either of the two senators from that state should die or resign in the meantime, which isn't likely. Neither Lapham nor Miller have decency enough for anything of the sort.

An aged resident of Elkhorn, Wis., fainted during the sermon while at church last Sunday, striking the corner of his pew as he fell with such force as to kill him instantly. The preacher who officiated on the occasion will not be indicted for manslaughter this time, but he will be wise to shorten up his sermons considerably in the future.

Ill feeling engendered in the late canvass led to the shooting of Dr. W. H. Woodford, at Scandia, Kan., by J. C. Humphrey, editor of the local paper at that place. The doctor is not expected to live; if he dies the editor will probably be lynched, and altogether it is a scandalous affair, quite characteristic of sanguinary Kansas.

Guiteau feels so confident of his acquittal that he is planning a lecturing tour; and a voyage to Europe after he has made money enough in the lecture field to enable him to indulge his desire for foreign travel. His confidence would seem absurd could one forget the notorious incapacity of government prosecutors.

The statement is made in one of the daily prints that "the star route revelations have destroyed Dorsey's political influence in Arkansas." Dorsey doesn't mind that so much. He knows that he's "solid" at Washington. The present administration isn't likely to go back on the "savior of Indiana."

There seems to be a lull in the train-robbing business since the railway companies set up the passenger tariffs. "The robbers are probably discouraged by the reflection that the companies takes so much money from travelers for fares now that what is left isn't worth halting a train for."

The biennial session amendment was carried in Wisconsin at the recent election and will go into effect next year.

NEWS SUMMARY.

In Central Russia railway traffic is impeded by snow, the fall being unusually heavy for this season of the year.

Paul de Cassagne has fought another duel, his antagonist being Adrian Montebello. The affair seems to have been mismanaged, as Montebello was slightly wounded in the encounter.

Because he remarked that Guiteau did right in killing Garfield, Gen. Madison Drake, of the New Jersey militia, will be hauled up before a court-martial at Trenton. Drake made a goose of himself if he said what is charged against him, and New Jersey oughtn't to have any use for such gabblers in her service.

The steam barge Brunswick and the schooner Carlingford collided in the gale Friday night of last week, off Dunkirk, N. Y., and both were sunk. The captain and six men of the schooner pulled twenty miles to the shore, but one man was lost before starting. The barge lost an engineer and two cooks in the waves. She was built by Captain Bewick, of Detroit, at a cost of \$150,000, and was insured for \$75,000.

A physician who has practiced forty years in Calhoun county, of this state, has been detected in making and passing counterfeit silver coins. He was brought before the U. S. commissioner at Detroit Saturday, and pleaded guilty. A trunk full of dies and bogus coins was found in his possession. His name is Leonard and he is a man 74 years of age.

The impression gains ground in New York that it will be impossible to carry out the present plan of the East river bridge with due regard to public safety. The sum of \$12,000,000 has already been taken from taxpayers and sunk in the structure.

For some time past Jay Gould has been annoyed by anonymous letters, threatening him with death unless he furnished the writer of them with "points" on the stock market which would enable that person to make good

osses he claimed to have sustained in stock deals through Gould's manipulations of the market. With the assistance of his broker Gould set about hunting the black-mailer down, but his shrewdness defeated all his plans until Saturday last, when he was detected in the act of mailing one of the missives in a street letter box, and promptly taken into custody. The man proved to be Col. J. Howard Welles, a gentlemanly appearing person, and well connected in the city. His friends claim that he is partially deranged, especially on the subject of stock gambling, for which he has an inordinate passion. His first letter to Gould was very menacing in its tone, and gave him only six days to live unless he furnished the required information. Gould responded by means of "personals" in the papers, with a view to bringing about an interview and thus ascertaining the black-mailer's identity, but he was too wary a bird to be caught by any ordinary device, and it was at last found necessary to employ a large force of detectives to watch the letter boxes before he could be taken. Welles is an ex-military man of considerable means, has a good education, and is very gentlemanly in his manners and appearance. He is 55 years of age, and has operated in a modest way on Wall street for a period of years. When arrested he threatened to shoot himself if the matter were allowed to get into the papers, but he succeeded in making a stiff of himself up to last accounts, though the papers were full of it next day.

Theodore Tyrer, an agent of a leading New York banking house at Albert Lea, Minn., is under arrest for numerous crooked financial transactions that will be likely to land him in the penitentiary. He was trying to "skip" when taken.

A brace of young bloods at New Orleans were arrested Sunday morning on their way to fight a duel in one of the city parks. One was an attorney named Givens and the other the son of Rabbi Gutheim, both being Hebrews. Gutheim set the challenge. Some scandalous story set on foot concerning a young lady to whom Givens is betrothed was the original cause of the trouble.

Six lynchings, who attempted to take a murderer out of jail and hang him at Grand Rapids last June, were on trial last week for the offense. The jury failed to agree, standing 11 for conviction and one for acquittal.

A battery of ten boilers in the saw mill and salt manufacturing establishment of Hamilton, McClure & Co., six miles below East Saginaw, exploded with terrific force Sunday morning, killing four firemen employed about them and entirely demolishing the boiler house, besides greatly damaging the sawmill and other buildings in the vicinity. Low water in the boilers is supposed to have caused the disaster. The damage is placed at \$25,000.

A skiff containing sixteen persons was caught in the swell produced by two passing tugs in the river at Troy, N. Y., Saturday night, and capsized. Eight of the party were drowned before aid could reach them.

Mrs. Edwin Booth died at New York Sunday, of consumption.

Forty persons were killed by the explosion of gas in a sulphur mine at Gissolungo, Italy, last week.

At a conservative banquet at Bristol the marquis of Salisbury insisted upon the right of the Irish landlord to compensation, saying that the sub-commissioners were appointed because of their favoring the government policy.

The spontaneous combustion of rats caused a fire in the junk stores of Becker & Wile and M. N. Jacobs at Fort Wayne, in which damage of \$20,000 was inflicted.

The czar of Russia has appointed a special commission to reorganize provincial administration and take steps toward facilitating peasant representation in the district councils.

Two darkeys at Norfolk, Va., ended a good-natured dispute politics Saturday last by fighting a moose duel with shot guns at ten paces. Either by accident or design, one of the guns was loaded with small shot, with serious consequences to the darkey politician who stood up before it. He received the entire charge, and died shortly afterward from the wound.

Three papers at Indianapolis have been indicted under a law of the state for publishing lottery advertisements.

A St. Louis savings bank was robbed of \$2,000 Monday afternoon by four men, two of whom engaged the attention of the cashier and book-keeper, while the other two adroitly lifted the contents of the cash drawer.

Hundreds of persons are dying daily of cholera at Mecca, that plague raging there in its most virulent form.

A contract has been made between the Huntington railroads on the Pacific coast and the Gould system in the southwest by which they will be operated as a joint line from the Mississippi river to the Pacific ocean, with a division of earnings on the basis of mileage. The point of junction is eighty miles east of El Paso, where the Southern and Texas Pacific ds will within a few days be connected.

A dynamite explosion on the steamer Severn, bound from Bristol to Glasgow, killed nine persons and seriously maimed forty-three others.

A son of Rev. Dr. Lamahan, pastor of the Foundry Methodist church of Washington, was arrested in the postoffice at Baltimore for embezzling money from the mails.

All doubts as to the man arrested in Nebraska being Ed. Maxwell alias Williams, the noted Wisconsin desperado, has been removed, and he is on his way to the latter state, in charge of several sheriffs, to stand trial. His brother Alonzo, who eluded arrest at the time Ed. was taken, is still at large, the officers having lost all trace of him.

Burglars raided the house of Jesse Baldwin, a wealthy farmer at Boardman, a place five miles south of Youngstown, Ohio, Monday night, or, rather, Tuesday morning, as the job was done at 3 o'clock A. M., and robbed him of \$30,000 in money, besides a large amount of silver and other articles of value, including \$5,000 in government bonds. Baldwin was known to have a large amount of cash in his house, and this induced the cranksmen to make the raid on him that netted them such rich booty. Some time since he received \$17,000 in gold for government bonds at Washington, the publicity given to which circumstance at the time doubtless attracted the attention of the burglars to him. When the attack was made some resistance was attempted by the family, but the marauders were in strong force and it was wholly futile. A safe containing the money and valuables was deliberately "cracked," the booty removed to one of Baldwin's carriages to which the burglars had attached one of his teams, and after they had completely gutted the safe they drove off in haste. Two miles south of Boardman the carriage broke down, when the thieves stole a number of horses from farmers thereabouts and continued their flight toward the Ohio river. A force of farmers are on their trail, and a large reward is offered for their apprehension, but it is not believed that the robbers will be captured or the booty recovered, as they have left no clue to their identity, and the job shows plain evidence of having been the work of adroit professionals.

FUN WITH THE BOYS.

ESCANABA.—The Port gives a lengthy description of the new railroad shops at that place, from which it appears that they are quite extensive. The shops are situated between the road house and Thomas street.

There are two buildings, 294x90 and 294x60, respectively, on the ground. The former of these contains the boiler shop, engine room, blacksmith shop, and a store room for the material used in these departments. The latter, or north building, is the machine shop proper, and will be filled with lathes, etc., on the north side, the south side being arranged to receive locomotives in need of repair. At the west end of this building are the engine and store rooms. Both buildings are excellently lighted up, and conveniently arranged for the purposes to which they are devoted. The old shops will be used for car repairing for the present. The new buildings are of brick, with solid stone foundations, gravel roofs, are practically fire proof, and are, the Port says, the first of a system designed to replace all the old wooden structures of the company at that point with similarly durable ones, especially adapted to the work the company will have for its shops there, which is getting to be very large in amount.

The Ludington company's mill, at Flat Rock, has shut down for the season, and the tug has gone to Marinette to lay up for the winter.

There will be a "temperance corner" in the Port henceforth, edited by a lady. The editress lets the readers of the paper off easy in the number before us, containing her initial effort. Only one article is given, and that a short one clipped from a medical journal, recommending persons afflicted with the "alcohol habit" to eat an orange before breakfast as a cure.

"Neither firewood or coal to be had, many consumers un supplied, and winter at hand," is the chilling report of the local paper. Still, if the supply of whisky holds out the great mass of Escanaba's populace will pull through with no more serious suffering than that incident to an occasional attack of tremens.

A laborer on the ore docks who went through the pocket and chute into the hold of the vessel alongside, with a carload of hard ore, and had both arms broken, described his sensations en route to the doctor. Said he: "I tell ye, doctor, I saw fifteen kinds of light going down that chute."

A brakeman named La Plant, employed at the ore docks, had an arm broken while coupling cars Tuesday last week. It was bruised so badly that amputation was necessary. Several minor accidents at the docks the same week are also reported.

Ephraim's explorations near Little Lake are more promising with every day's work. A shaft eight feet in diameter is in ore at bottom, and specimens shown us, taken from it on the 24th are of fine, heavy red ore. He will go down fifteen or twenty feet further with the shaft and then cross-cut to ascertain the width of the deposit. Myers has stuck to it, while other have wavered and gone out, and we hope his faith and persistence may be rewarded with a mine, a big one.

Florence.—The News exults over the triumph in that county of the "glorious old republican ticket." Its readers can now see where it stands politically—something that wasn't entirely clear during the canvass.

J. F. Shafer has a band of Indians out searching for captain Dickinson's lost boy. The general belief is that the little fellow has been abducted. Circulars giving a description of the boy, and offering a reward for his recovery, or return, have been sent to all the cities around, and all other steps taken that could be thought of to lead to his discovery, dead or alive.

Florence has a pedestrian, Mr. George Libbie—to whom she "points with pride." He walked from Holmes' camp No. 3 to Florence—a distance of 7 1/2 miles—in 55 minutes, the other night. He probably wanted to see his girl. It isn't likely that any man would make such a tramp as that merely for a drink of Florence whisky.

An explosion of several sticks of giant powder occurred at the Florence mine on Tuesday last. It appears that the cartridges were being warmed, on a bench, near a hot stove and the powder attached to one, coming in contact with it, fired the whole lot. Several men were struck with flying missiles, but fortunately only one, Joe Gosman, was seriously injured. He is much bruised all over but no bad results are anticipated, although he may be laid up for a month or two.

A meeting of Commonwealth miners was held at which it was decided to raise a purse of \$300 to be given to the party, or parties, "who will find and return Capt. E. W. Dickinson's son, dead or alive." This is in addition to the reward already offered, and is a pleasing indication of how thoroughly those working under him sympathize with the captain in the terrible affliction that has come upon him and his family.

The Crystal Falls Iron Co. is now exploring and developing what is known as the Rominger deposit, on the southeast 1/4 of section 24, 42-33. The prospect is said to be very good.

S. D. Hollister, has got a very fine showing of soft hematite ore, on section 21, 43-32, adjoining the Crystal Falls Iron Co.'s mine. The stripping is about twelve feet in depth and the vein uncovered for about ten feet, across the formation to the hanging wall, which is a plumbago schist and containing a very pure article of graphite. The indications for a mine are very flattering.

ONTAGONA.—There have been no further developments in the affair of the alleged theft of county clerk Power's books, the Miner says. No steps have been taken to get at the inwardness of their mysterious disappearance. The irregularity in the incupulated official's accounts can not be established without the records, and as they are not to be had Mr. Powers "holds the fort" with a good deal of confidence. Ontagona's county board must be a rare aggregation of luncheads to allow this state of things to continue. The opposition paper comes gallantly to the support of the clerk, as might be expected. "Where the carillon is, there will the vultures gather."

There were eight miles of the new road ironed last Saturday, and the contractors are bound to complete the first twenty miles this season, weather or no weather.

A Miner printer had his hand wounded by the bursting of a shell in his revolver while firing the weapon the other day, and another member of the force who was looking on barely escaped a more serious injury. Printers shouldn't fool with "shooting irons." A "shooting stick" should be the only dangerous weapon handled by one of the craft.

Mr. Weir, the chief engineer in charge of the survey of the Rhineland road to Union Bay, has been in town this week purchasing and forwarding supplies for his winter's work. This looks like business for he has just returned from a visit to New York and Milwaukee, whither he has been to consult with the company.

[First publication Oct. 29th, 1881.]
 STATE OF MICHIGAN, COUNTY OF MARQUETTE, ss. At a session of the Probate court for the county of Marquette, holden at the Probate office, in the city of Marquette, on Wednesday, the twenty-sixth day of October, in the year one thousand eight hundred and eighty-one. Present Hon. Edward S. Hardy, judge of probate. In the matter of the estate of Maria L. Campbell, deceased. Abram Mathewa, administrator of said estate, comes into court and represents that he is now prepared to render his final account as such administrator, and has filed the same for examination. Thereupon it is ordered that Monday, the twenty-first day of November next, at ten o'clock in the forenoon, be assigned for examining and allowing such account, and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said court, then to be holden at the Probate office, in the city of Marquette, and show cause, if any there be, why the said account should not be allowed; and it is further ordered, that said administrator give notice to the persons interested in said estate of the pendency of said account, and the hearing thereof by causing a copy of this order to be published in the MINING JOURNAL, a newspaper printed and circulated in said county of Marquette, three successive weeks previous to said day of hearing. EDWARD S. HARDY, Judge of Probate. (A true copy.) E. S. HARDY. 6804

PAINTS, OILS AND VARNISHES!
 Immense stock of
Wooden Ware and House Furnish- ing Goods.
 Particular attention given to Plumbing and Gas Fitting, Tin and Sheet Iron work. 681

NEGAUNEE.

REMEMBER the poor on Thursday next. HON. JNO. QUINCY ADAMS is expected home to-day. THE bachelors' club will roost in rooms over Cyr's drug store. MR. JAMES TREMBATH, of the Jackson house, and his wife are expected home to-day. THE pale air round about a certain butcher shop in the upper end of the city is streaked with—stinking smells. THE business houses of this city will generally close, at least a part of the day, next Thursday. Morse Bros. & Co. have decided to keep their place of business closed the entire day. ONCE more the genial countenance of Prof. V. B. Cochran, state superintendent of public instruction, has been seen on our streets. He came up on Sunday to attend the teachers' institute at Ishpeming. A NEW cistern is to be located at the corner of Case street and Brown avenue, to supply water in case of fire, and the committee on streets and bridges will receive sealed proposals for its digging, up to Thursday next. IN making your purchases for Thanksgiving remember that Kuhlman keeps mince meat, fine winter apples, self-raising flour, and, besides, all the delicacies that must grace the Thanksgiving table. If you want to do the inner man a "power of good" buy your groceries of Kuhlman. THE minstrel troupe, notice of whose coming appeared in this column last week, held forth at Winter's hall on Wednesday evening. The knowledge that the troupe was playing to a "thin" house, and that the small receipts had been "gobbled up" by a Copperdom hotel keeper in whose debt they had left, did not operate to render the performers as light-hearted as the character of the toney entertainment would warrant; however, the fact that the audience appeared well satisfied with the show speaks volumes for what the company is capable of doing when prosperity is with it. FIRE broke out in the carpenter and blacksmith shop of the McComber mine last Tuesday night, about half-past seven o'clock, and as it was given its own way, didn't let up until it had destroyed the building, and also a large amount of clothing belonging to the men, and two car loads of coal. Most of the property of the company was removed from the building during the progress of the flames. The loss on the building amounts to about \$500. As the fire was beyond the reach of the engine, and as it was known that water could not be found near at hand, the department here did not take out the machine. The fire made a very pretty sight, and pleased the children amazingly. QUITE a large party of young people gathered at the home of Mr. and Mrs. M. A. Gibbs last Monday evening to pay their farewells to Miss Carrie, sister of the host, who has been spending the summer here, but who left on the following day for her home in Connecticut. The party is said to have been one of the most pleasant events of the year, only marred by the knowledge that on the following day the accomplished young lady, in whose honor the gathering was had, would be absent from her Negaunee friends. Miss Gibbs was accompanied on her homeward journey as far as Cleveland by Miss Jessie D. Maitland, niece of A. W. Maitland, Esq., who also returns home after a visit of some length. FEIBISH has opened up his entire new stock of liquors and cigars, and not only is his store completely filled with new goods, but, so large is his stock, that he has been compelled to secure store room outside. The layout of liquors is one of the finest to be had in the country, the stock having all been bought by Mr. Feibish after having given it his personal inspection at the markets in Louisville and Cincinnati. In cigars alone he leads any house in the county, and of case goods he has an elegant variety. Retail dealers would do well to visit his store when in the city, and if there is a man in Negaunee who wants to purchase a meerschaum pipe, to him we would say, go look at Feibish's selection, and you will be sure to find one out of his large variety that will yield solid comfort.

It was a ball for the people, and all the people were "expected" there. O balls! The tickets read "refreshments of all kinds will be served," and it was thought by the generous landlord that, with all kinds of viands to tempt the crowd, even the most fastidious lunch fiend could not afford to neglect the spread. But they did. The MINING JOURNAL reporter knows many very respectable and even worthy citizens who did not go—or who at least say they didn't. But that made no difference with the ball. Derago was there with his full string band, and enough of the "bids" were accepted to make the affair pass as "one of the leading social events of the season." As the gay crowd of dancers threaded their way home through the streets in the small hours of the morning they could be heard sawing the thin air with "Didn't we have a hell of a time, eating cake and drinking wine?" while most of the people thought they did. The Depot hotel, by H. L. Cohn, inspector-general, is now fairly launched, and whether the patronage of the bloods be given it or not, you hear us bark, it will be run in full accord with the high moral sentiments of the host and hostess, which, if allowed full sway, will eventually make the neighborhood where his house is located, a name and reputation that can not be distanced by any other place in the county.

THE Presbyterian and Methodist Episcopal churches will hold a union Thanksgiving service at the M. E. church next Thursday forenoon, at half-past ten o'clock, the sermon for the occasion to be delivered by Rev. H. E. Davis, of the Presbyterian church. THE MINING JOURNAL trusts the Rev. gentleman will be greeted by a large house, and that each member of the congregation will take a good sized coin along to put into the contribution box, thereby helping to make as large a fund as possible in aid of those in our city who have little to be thankful for but poverty and an empty coal bin. There is no one thing that will evidence a man's true thankfulness for the blessings of life more conclusively than generous bestowal of his goods to the unfortunate poor. Remember the poor next Thursday.

THE great 50c Cough cure, White Wine of Tar Syrup, is very pleasant to take, and two or three doses will often cure a cough of weeks standing. Price 50c. Sold by J. Crowley.

CO-PARTNERSHIP NOTICE.—The undersigned have this day entered into partnership for the transaction of business under the firm name of Sporley & Kline. G. SPORLEY, S. P. KLINE.

It was a ball for the people, and all the people were "expected" there. O balls! The tickets read "refreshments of all kinds will be served," and it was thought by the generous landlord that, with all kinds of viands to tempt the crowd, even the most fastidious lunch fiend could not afford to neglect the spread. But they did. The MINING JOURNAL reporter knows many very respectable and even worthy citizens who did not go—or who at least say they didn't. But that made no difference with the ball. Derago was there with his full string band, and enough of the "bids" were accepted to make the affair pass as "one of the leading social events of the season." As the gay crowd of dancers threaded their way home through the streets in the small hours of the morning they could be heard sawing the thin air with "Didn't we have a hell of a time, eating cake and drinking wine?" while most of the people thought they did. The Depot hotel, by H. L. Cohn, inspector-general, is now fairly launched, and whether the patronage of the bloods be given it or not, you hear us bark, it will be run in full accord with the high moral sentiments of the host and hostess, which, if allowed full sway, will eventually make the neighborhood where his house is located, a name and reputation that can not be distanced by any other place in the county.

THE Presbyterian and Methodist Episcopal churches will hold a union Thanksgiving service at the M. E. church next Thursday forenoon, at half-past ten o'clock, the sermon for the occasion to be delivered by Rev. H. E. Davis, of the Presbyterian church. THE MINING JOURNAL trusts the Rev. gentleman will be greeted by a large house, and that each member of the congregation will take a good sized coin along to put into the contribution box, thereby helping to make as large a fund as possible in aid of those in our city who have little to be thankful for but poverty and an empty coal bin. There is no one thing that will evidence a man's true thankfulness for the blessings of life more conclusively than generous bestowal of his goods to the unfortunate poor. Remember the poor next Thursday.

THE great 50c Cough cure, White Wine of Tar Syrup, is very pleasant to take, and two or three doses will often cure a cough of weeks standing. Price 50c. Sold by J. Crowley.

SUPERIOR TO ALL OTHERS. DURABILITY, ECONOMY, AND GENERAL CONSTRUCTION. BUY THE BEST! M. R. MANHARD & CO.

CHICAGO & NORTH-WESTERN RY. Chicago and all of the

REPUBLIC.—The MINING JOURNAL representative made a pilgrimage to Republic early the present week, and jotted down what he heard and saw in that prosperous village. Every one seemed to pursue the even tenor of his way, and nothing very exciting could be gleaned.

Tapley's snide minstrels howled before a slim audience at the town hall Monday evening. For once a poor show got a poor house.

A rare occasion for Republic—a week without any babies.

Mr. Emil Hart has commenced the construction of a residence on Republic avenue. It will be a large frame dwelling.

The best part of the day in Republic is at night. The town looks dead during working hours.

The first dance of the season by the newly organized "Racquet Club" will be held at the town hall next Thursday evening.

The club will trip the fan-tastic occasionally during the winter.

A fair will be held at the Town hall by the Catholic congregation next month. It will be opened on December 15th, and will continue for a week.

The object of the fair is to raise money enough to make the last payment on the new residence of the priest, lately erected by his parishioners.

The young men will do well to get their silver quarters ready as they will all be compelled to take a chance for something.

Mr. Mat Gibson met with a painful accident last Saturday morning, from the effects of which he has been suffering ever since.

While driving to the mine from the village his team became frightened and ran. Not being able to hold them, Mr. Gibson jumped from the wagon, in the hopes of escaping from injury, but received a severe jar in landing on the ground. No bones were broken, but his system sustained such a shock as to confine him to his bed for nearly a week.

Park City is the euphonious title under which the West Republic location flourishes.

Pay-day at the Republic mine occurred Thursday.

A new hotel is one of the things the future has in store for Republic.

Messrs. Thomas Carey, of this place, and Joseph Fay, of Marquette, are perfecting plans for the erection of a large building for hotel purposes to be constructed during the winter.

The structure is to be a fine one, and will do credit to the town. It is to be located on the lot opposite McCabe's hardware store, which will be central, so far as the village is concerned, and very handy for the traveling public, as the depot is near by.

Such a hotel has been a long felt want in Republic, and good Republicans wish the project successfully carried out.

Measles are quite prevalent here at present.

The pack peddlers scent a mine pay-day as a crow smells carrion, and are always here in large numbers when the miners receive their monthly stipend.

The new passenger depot is finished, and is a decided improvement over the old one.

Residents of Republic, and people having occasion to come here now and then, are gratified with the prospect of two trains a day during the winter.

This will obviate the necessity of stopping over here two nights to do a day's business.

L'ANSE.—The steamer Ivanhoe changed time recently, hence passengers have been obliged to stop over night at this place. This is annoying to the passengers, but it is "fruit" for the hotel men.

The contractors on the saw mill road have completed their work, and in a substantial manner, thereby giving us one of the best drives in the country for owners of fast horses to speed their nags on.

The state road between here and Ontonagon, though well constructed, is not in anything like as satisfactory a state, owing to the nature of the ground and the recent rain falls.

The report is that 200 tons of graphite will be shipped from the Conrad opening, near the Taylor mine, within a short time.

A. G. Shields has moved his steam wood-sawing outfit to the Taylor branch, where he intends to run it during the winter.

Parties having the contracts to fill are betaking them to the woods.

Weigh-master Pitch is trying to be patient as Job under a similar affliction—that is, similar as to boils. We wouldn't institute for the world that he has to endure Job's other trouble.

There is one member of the town board who didn't favor accepting the saw mill road. We think he ought to take a "Tumble."

The force of men at the Taylor mine has been cut down to the winter standard.

Thos. and John Nester, brothers of the talented "Tim," have secured a saw mill site across the Bay, for which they paid handsome.

OSTONAGON.—Deliver up your brains or I'll blow your money out.

Crozer, the postmaster here, told some ladies the other day, who inquired if he thought the county clerk had actually stolen the money, that he had not felt so badly about anything since his second wife died!

The manure-slinging brigade of our interesting village was at its usual delightful work Saturday night last, and the members of it showed up the quality of their cussedness by sneering the front of the Ontonagon Miner office with the sort of filth their conduct leads us to believe was used in their creation.

The pleasure they took in their filthy task was evident from the finger marks left on the door and windows of the editor's room, and appearances would indicate that the outrage was perpetrated by the identical foul-scented crowd that escorted, or welcomed, our great county agitator of pollytickle fame into town on the glorious 4th. All of which shows the way that mob delights to celebrate its independence—of decency. Lucky for Meads that, like all editors, he didn't have much "sheneau" on hand or they would have burglarized his concern and cleaned him out—books and all, as is the custom with these scabs. Perhaps the movers in this demonstration imagine that by defiling another's house they can purify their own reputations, and remove stains of dishonor from blackened official characters. It looks as if that was just about their idea.

WHO IS IT

That hollers all through the country that SPENCER has ruined the harness business? That is not the trouble, gentlemen. It is because I make a far better harness, for the same or less money than any other firm in Michigan. There is where the shoe pinches.

SWEETS' PATENT Common Sense Sleigh.

THE STRONGEST, MOST DURABLE, AND MOST PERFECT SLEIGH IN USE.

I RESPECTFULLY CALL THE ATTENTION OF Lumbermen to this cut, showing Sweet's Logging and Supply Sleighs. We are now making eight different sizes, suitable for all kinds of work, both double and single, and of any width of track desired. It is a well-known fact that these sleighs will draw larger loads, with more ease of draft, than any other sleigh produced. They are built loose jointed, so that each runner will act independent of each other, and will not tip over in bad places, as the common stiff-jointed sleigh is sure to do. They also have a Patent Shoe, Concave Heel, so as to prevent the sleigh from slewing or sliding sideways, so that the sleigh is bound to keep the track, which is a large item to every man that drives a team. I keep on hand all sizes of Logging, Light and Heavy Teaming and Delivery Sleighs, all warranted to give perfect satisfaction. Parties will please send their orders in in time for the coming winter, and not wait until the rush comes. All orders promptly attended to. SOLD CHEAP FOR CASH.
