FERRY'S SEED ANNUAL FOR 1885. Will be mailed FREE to all applicants. It contains illustrations, prices, descriptions and directions for sowing all the most valuable and flower-bearing seeds. Write for samples and prices. (53197)

NEW RESIDENCES. Description of Two New Dwellings Soon to be Added to the Adornments of Our Beautiful City.

A MINING JOURNAL reporter yesterday had the pleasure of examining the plans of an elegant residence which is soon to be erected in Marquette, and which will be another ornament to the city. The plans have just been completed by Mr. J. C. Robson, architect and foreman for Messrs. Hager & Johnson, and are for Mrs. J. P. Pendill.

The new residence is to be located on lot No. 6, in Hewitt's addition, on Ridge street, east. It will be a wooden structure, Queen Anne style, and two stories high, besides the basement and garret. The basement will be constructed of stone, all above the grade being sawed ashlar.

The basement will contain six rooms, with an eight foot ceiling. The different rooms will be fitted up for the steam heater, fuel, general store room, laundry, and other purposes.

On the first floor above the basement there will be four rooms, besides a hall, kitchen and pantry. The parlor will be 13 feet and 6 inches by 27 feet, and will open into the library by an archway, the latter room being 13 feet 6 inches by 21 feet, and provided with a wood grate, while the parlor will have a coal grate, and the dining room will be 12x20 feet. The parlor and dining room will both open into the hall by sliding doors. The hall will be 12x22 feet with a four foot stair case leading to the hall above. The kitchen will be 13.5x15, and will be provided with hot and cold water, and marble-top, stationary washstand. The hall on this floor will be 12x32 feet, with an enclosed stairway leading to the garret.

The structure will be finished elegantly, both inside and out. On the first floor, the hall and staircase, and the bath-room on the second floor, are to be fitted up in select cherry, and the remainder of the interior in select Norway pine, all to receive a hard oil finish.

The front of the structure will be provided with a handsome piazza, as will also the side facing the lake. The windows will be large, with top sash of stained and ground glass, the balance to be the best quality of double strength glass. A pair of very elaborate doors, made of cherry with a hard oil finish, will constitute one of the tasteful adornments of the front. The two top panels will contain figured, stained glass, and the center panels figured ground glass.

The general appearance of the structure will be very attractive and striking, and when the building is completed, it is estimated, will cost from six to seven thousand dollars.

The contract for erecting the house has not been let, but the plans now being ready, bids will be received at any time. Mr. Robson also has just completed plans for a very handsome and commodious story and a half cottage for marshal French. This also is to be a wooden structure, with stone basement, and will be located on the corner of Michigan and Pine streets. The style will be Gothic, and it will contain eight rooms, besides closets, pantries and hallways. Mr. French already has broken ground and got the foundation under headway. The estimated cost is from \$1,500 to \$2,000.

Teachers' Institute. Teachers throughout the county should not neglect to attend the institute to be held at Negaunee five days next week, beginning at 10 A. M. Monday. Teachers' Institutes have been held at intervals far between, and were not always attended as they should have been. In lower Michigan and the eastern states, teachers' institutes and conventions are held several times each year, and are invariably well attended by the class they are intended to benefit.

As has been before said, the argument is often used against the teachers of the district that they do not take sufficient interest in their work and are far behind the times. This reporter does not believe, but that there is always room for improvement is not to be doubted. The teachers should show that they are earnest in their work, and willing and anxious to advance themselves in the profession to which they have chosen to dedicate their talents. They owe certain duties to the pupils and parents beside a six-hour daily drill in the school room, and an attendance on the institute to be held next week is one of these.

All teachers can secure accommodations at the Breitung House at half rates, or one dollar a day, and the expense of attending the session will be light.

THE SHAMROCK. Under the Auspices of the Irish Nationalists of Marquette County, Hibernia's Sons Will Celebrate To-day.

Unless the elements, which have been somewhat unruly of late, interfere with the elaborate program arranged for to-day, there is no doubt but this will be one of the greatest gala days for our Irish fellow citizens that Marquette ever has witnessed.

It is unnecessary for the MINING JOURNAL to go into minute details as to the order of proceedings, since there are committees that have full charge of affairs, and who will be on hand to see that everything moves along smoothly. The speaking and the sports and amusements arranged for the occasion, will take place at the driving park, this afternoon.

Rev. Dr. Betts, of St. Louis, who has the reputation of being one of the most eloquent orators in the country, will address the multitude, as will also Hon. John Power, of Escanaba, a gentleman whose oratorical abilities are so well known in Michigan that comment regarding them would be superfluous. The speeches by these gentlemen will constitute the principal and the most substantial portion of the program, but after these will come the sports and amusements. They will consist of bicycle and foot racing, jumping, throwing sledge and the tug of war. A platform also has been erected for dancing purposes in the afternoon.

One of the most interesting of the sports will be the match game of base ball between the Negaunee and Hancock clubs. The latter now enjoys the undisputed claim of being the champion club of the upper peninsula, as it has defeated every club that it has met this season. If the Negaunee give them even a "close rub," it will be all that can be reasonably expected of them. That they will do their best there is no doubt.

In the evening a ball will be given, under the auspices of the Ancient Order of Hibernians, at the new opera house.

As announced elsewhere, a special train will leave at 1:30 o'clock to-night for Michigan and Intermediate stations, for the accommodation of those who wish to remain to take part in the festivities of the evening.

Helen Potter Night. Next Monday night Marquette people will have the pleasure of seeing and hearing Miss Helen Potter, one of the most gifted women that this country has produced, in a program so varied and exacting, and demanding a range of talent so wide, that it seems incredible that one person can render it all. She will be assisted by the Chequamegon orchestra, of Ann Arbor, whose playing has contributed so much to the enjoyment of citizens and visitors during the past six weeks. The numbers in preparation for Monday night are exquisite productions, and form a program of a much higher grade than the gentlemen have ever played in this city. That they will be intelligently and conscientiously rendered is assured. The orchestra has gained many friends during its stay, and, as it is so soon to leave the city, the opportunity to hear it under circumstances so favorable should be embraced by all.

Copp's Settler's Guide. Henry N. Copp, the land lawyer of Washington, D. C., sends the ninth edition of Copp's Settler's Guide, an indispensable book to all who are interested in public land. A chapter, illustrated with cuts, shows how to get township, section and quarter-section corners, and explains the system of government surveys. It gives the latest rulings and instructions under the homestead, pre-emption, Timber culture, desert land, and other twenty-five cents.

It will tell you who is entitled to enter land; how continuous your residence must be; what improvements you must swear to; all about contests, and on what grounds they can be commenced; also about state lands, stone and timber lands, mineral lands, desert entries, saline, railroad, coal, townsite, and other lands; scrip, warrant, and other entries. Its purchase will save money and trouble, as erroneous statements circulated by conversation among settlers may, if acted on, cost you a contest, perhaps your land and improvements.

Change of Management. Superintendent Moore's official connection with the Detroit, Mackinac & Marquette railroad company ceased Monday, day, and Tuesday morning the new general superintendent, Mr. Andrew Watson, took charge of affairs. Mr. McCool, as has been previously announced in these columns, resigned the post for the purpose of accepting a desirable situation with a Missouri railway company.

Mr. Watson, of late, has resided at Jackson, this state. Some years ago he was general superintendent of the Detroit, Grand Haven and Milwaukee road, and afterward occupied the same responsible official relations with the Great Western railway company, of Canada, so that in assuming the duties of superintendent of the D. M. & M. he brings with him a ripe experience and an established reputation as a railroad man.

Telephone Matters. It is the intention of Supt. Jas. R. Doe, of the Michigan telephone and telegraph company, to establish toll stations in each city where there is now a telephone exchange. For a small charge, probably fifteen or twenty cents, persons not having telephones can send messages, and transact business over the line when they wish to do so.

All telephone construction work for the year has been stopped, and the exchanges and phones have been pulled out of several small lower Michigan towns. In the upper peninsula the system continues to show a healthy and gradual gain. Ten new instruments were put in and three taken out in the county during the past month, leaving a net gain of seven instruments.

Postponed. The Presbyterian Sunday school picnic that was announced to take place Thursday, together with the excursion to Au Train, was postponed on account of the weather, until next Wednesday.

CAMP JUMBO. A Mining Journal Wayfarer is Taken In at That Silvan Resort and Most Inappositely Cared For.

Our representative paid a visit to Camp Jumbo this week. He didn't start out to go to Camp Jumbo at all; in fact, he never knew there was such a place as that until the evening he landed there, involuntarily, as it were. How he came to visit the camp need not be explained—in truth, our representative would rather be excused from giving a full explanation on this point. It is a rare place, this Camp Jumbo, and fortunate are those who have the opportunity to spend some of their time at that silvan haunt. It is situated about fifteen miles west of Florence, on the west branch of the C. & N. W. railway, in a beautiful grove near the railroad track. Some seventy-five people have been encamped there for the past two weeks, hunting, fishing and rustling. They are well supplied with camping outfits, and have a rare good time of it. On the day of our representative's visit, Aug. 18, over five hundred trout had been caught and two fine deer brought down. This sport enlivened the spirits of the party and all were in high glee that evening. Time doesn't fly on leaden wings at Camp Jumbo, as some program of amusement is daily provided for the campers. On the evening when our representative dropped down upon the camp, like an intruder, a moose divorce suit was in progress. All persons in the camp were more or less interested in the divorce proceedings, most of them being witnesses. The case was that of Highflyer vs. Highflyer, and the evidence on both sides was very rich and entertaining, while the verdict, by a female jury, was decidedly original. It pre-cluded our representative, however, against female juries, and when he saw for a divorce, he's going to have a male jury or none at all. The famous case was decided late in the evening, after which the court broke up and all the campers retired, except the serenaders, who made the grove ring with their voices until late in the night. The singing was very fine, and added immensely to the MINING JOURNAL delegate's enjoyment of the night at the camp. He takes this occasion to thank the ladies and gentlemen of the camp for the hospitality shown him, and the kindness with which he was entertained, coming, as he did, an unbidden guest at a stranger. Following is a list of names of the parties at Camp Jumbo:

Walter Cole, Mrs. Prescott, Carrie, Louise, Lillie, Eddie, Sammie and Elsie Prescott, Miss Rose, Louise Sizer and Gertrude Sizer, Mr. and Mrs. Brockway, May Brockway, Mr. and Mrs. Hart, Mrs. Patrick, Mr. and Mrs. Hatch, Grace Hatch, Mr. Wolverson, Mr. and Mrs. Coleman, Mr. and Mrs. Russell, Arthur Russell, Mrs. Clayton, Eva Clayton, Mr. and Mrs. Wm. Watson, Ray, Alie and James Watson, Mr. and Mrs. Borgstrom, Ellis Curtis, Lizzie Mervyn, Mr. and Mrs. Hitchcock, Mamie Hitchcock, Bessie, Mars and Mont Skinner, Mr. Grover, Miss Valentine, Charlie Rogers, Miss Holgren, Mr. and Mrs. R. C. Moryman, Mr. and Mrs. Kobb, Mervyn, grandma Mervyn, Miss Hatfield Walker, Miss Annie Gould, Miss Amelia Brown, Bertha, Amy and Lou Curtis, Mrs. James Colburn and son.

Circuit Court. The following cases were disposed of Saturday and Monday by the circuit court:

ON SATURDAY. Andrew G. Johnson, appellee, vs. E. A. Wetmore, appellant, in assumpsit. Jury trial. Verdict for \$33.89.

Catherine Johnson and John Johnson, administrators of the estate of Isaac Johnson, deceased, appellants, vs. William J. Ray, appellee, in assumpsit. Continued on application of plaintiff, with costs taxed to defendant.

Louis Bora vs. John A. Kruse, in assumpsit. Tried by court. Judgment for plaintiff for \$101.67, damages.

Cornelius Gorman vs. John A. Kruse, in assumpsit. Trial by court. Judgment for plaintiff for \$93.20.

Louis F. Pearce vs. John A. Kruse, in assumpsit. Trial by court. Judgment for plaintiff for \$295.45 damages, and costs to be taxed.

M. & W. Railway company vs. Marquette City, in assumpsit. On motion of plaintiff and consent of defendant, case discontinued without costs.

D. M. & M. R. company vs. Marquette City, in assumpsit. Same as above.

William Cole and Henry Cole, appellees, vs. Pittsburgh and Lake Superior Iron company, appellants, in assumpsit. Discontinued by consent, without costs.

ON MONDAY. Joseph S. Treat, et al., vs. William Rhodda, trespass. Continued on motion of E. E. Osburn, on payment of \$10 attorney fee.

The case of Edward E. Pemberty and Patrick Brennan vs. Edward Breitung, in assumpsit, is now pending. Jury trial.

The case of Kasell (Shinsky vs. Benj. J. Eitelohm, in assumpsit, and another case between the same parties, were consolidated, and transferred to the United States court.

The assumpsit case of Edward E. Pemberty and Patrick Brennan vs. Edward Breitung, was settled Tuesday, and discontinued without costs, after the testimony had been all taken and the case was ready to go to the jury.

The chancery case of Patrick J. McCann vs. Tankard C. Winter and Rachel M. Winter, was disposed of Wednesday. A jury returned a verdict as to the facts, upon which Judge Steere granted a decree.

A judgment in the assumpsit case of William Ward vs. George Berringer, was rendered in the morning. During the day a number of other cases were continued, or time given to settle bills of exception, etc. Most of the business transacted during the day was of no public interest.

The court adjourned Thursday, sine die.

THE INOFFENSIVE POSTMASTER. (The following verses, from the New Sun, hardly have a local application, but they are so good that they merit a place in the MINING JOURNAL on general principles.)

Last fall the Bourbon scorners hereabouts in Gotham Corners, After Brother Blaine was beaten, told me that my goose was cooked: Long and loudly kept announcing that the time had come for bounding—

That a good, old, solid Democrat for my P. O. was booked; And they sent in their petitions, and they went on special missions To Cleveland and to Vilas, but they haven't made me go:

Nor care I how much they try it, for I keep uncommon quiet— Inoffensively inactive in the last campaign. 'Ye know? They may kick, kick, kick, but I'll stick, stick, stick, While I can.

And I am not apprehensive, for I am an inoffensive— A very inoffensive partisan.

I made my contribution to that noble institution— The O. P., but not as large as usual, 'ye see? And of course the neighbors noted that for Brother Blaine I voted:

But I only voted once, and that's unusual with me. And for just very gently whooped it up for Brother B.:

Oh, very gently, for my mind was fixed intently On higher things than politics, namely, my salary.

I have put up Cleveland's picture as a handsome office fixture, Hanging from the self-same wall where Blaine's was wont to smile;

And I take a Mugwump paper, as a very proper caper For a P. M., somewhat demi-Democratic for a while.

There's a powerful lot of growling, and of animated howling Among my fellow citizens at what they call my gull:

And the Democrats are pensive because I'm inoffensive, Or at least have learned to be so since Blaine was kicked last fall.

But they may kick, kick, kick, and I'll stick, stick, stick, If I can; And I am not apprehensive, I am such an inoffensive— Such a very inoffensive partisan.

CONDENSED CITY NEWS ITEMS.

"Skid" is a common sight on the streets of Marquette now.

The Burtis saw mill is now running night and day. A pressure of business makes it necessary.

The engagement of the Chequamegon band, at the Clifton House, closes one week from to-day.

Mayor Thurber's new business building, on Washington street, will soon be finished and ready for occupancy.

Justice Steere and a number of other gentlemen will leave in a day or so for a deer hunt in Menominee county.

Manager Ross has been making some very notable improvements in the Adams hall during the past few days.

The Twilight dancing club, of Marquette, will give one of its popular parties at Adams hall next Wednesday evening.

The fronts of the business rooms in the Adams block, on the west side of Front street, are being painted and varnished.

Remember the excursion on the lake, to-morrow afternoon, on the elegant steamer Minnie M. Fare only fifty cents.

John F. Mack, Jr., is enlarging his store building on Washington street. Growing trade demands it, and it must be done.

S. Kaufman has leased, for three years, Hiram A. Burt's house on Ridge street, and will move into it the first of September.

Some unknown miscreant, during Monday night, threw a stone through a large window at the head of the front of J. W. Spears' store, on Washington street.

This evening will occur the great MINING JOURNAL three-mile skating race, at the Casino rink. Don't miss it—more fun 'en you ever heard of before.

Bear in mind that Helen Potter is to be at the Casino rink next Monday evening, and also the Chequamegon orchestra. Secure reserved seats at Conklin's store.

George Andrews is retailing in Marquette a liquid ice-eraser, together with a recipe for making the same. The cost is small, and the work the "eraser" does is thorough.

The lumber business is livelier at the present time in the upper peninsula than in lower Michigan, say lumber dealers from the Saginaw valley who are now in Marquette.

A young child of Mr. and Mrs. Messier fell from a second story window of their residence yesterday, and received some painful injuries, but is not considered dangerously hurt.

The editor of the Houghton Gazette boldly declares that, "as a money earner, we wouldn't exchange a good farm in this section for the best farm in southern Michigan."

Before justice Cray, yesterday, Freeman Brothers obtained a judgment of \$26 and costs against parties who shaved a buzzy for them, some time ago, while driving at Negaunee.

The boy who was looking for a lost pocket-book, containing some money, last Saturday, will be able to recover his missing valuables by calling at F. A. Green & Co.'s store, on Washington street.

There was lost Tuesday afternoon, on Front street, or on the hill, a gold bar-pin, daisy pattern. The finder will be rewarded by returning the same to Mrs. Richard Blake, at the Mesnard House.

The rainfall, for a short time yesterday morning between two and four o'clock, was about as heavy as was ever known in this region, and lake navigators say that they never saw a darker night, or more vivid lightning.

Patrick Sullivan has been sent to the Detroit house of correction, for one year, for getting drunk and abusing his family, and manifesting other vicious inclinations. This is his second term at the institution named.

Tug Jim Reed cleared, Sunday, with a raft of short logs—two million feet—in tow, belonging to mayor Thurber, of this place. The Reed will tow the logs to Detroit. It is the first lot of short logs ever towed out of this harbor.

The MINING JOURNAL acknowledges the receipt of the annual report of the attorney general of this state, for the year 1884. The report, of course, is by ex-attorney general J. J. Van Riper, whose term expired the first of last January.

Mr. H. Seiden, the well-known contractor, of L'Anse, is in the city on business. He is now engaged in building the Osceola railroad, from the mine by that name, in Houghton county, to Torch Lake, and reports very satisfactory progress.

Mr. Volk, of the Clifton, was the recipient Monday of a very large deer. It weighed one hundred and sixty-eight pounds, and measured from tip to tip—tip of the nose to the tip of the "toes" on the hind feet, when stretched out—nineteen feet.

The Chequamegon orchestra will assist Miss Potter, next Monday evening, in entertaining a risk fall of people. There will be five musical numbers on the program, and every one a jewel. Don't Potter round and miss getting a reserved seat, for you'll be madder's Helen the band boys if you do.

The members of the Chequamegon band, in full dress, appeared on the Mesnard House balcony Monday afternoon, about five o'clock, and gave one of their superb concerts. This "new departure" was made as a special favor to Mr. Charles Orton, the popular lumberman, of Bay City.

The MINING JOURNAL is informed that Hon. John Power, of Escanaba, and Dr. Betts, of St. Louis, who are to address the Irish national pioneers at this place next Saturday, will arrive at Ishpeming Friday afternoon, where they will tarry until Saturday morning. The affair promises to be a great success.

The St. Ignace News and Free Press, speaking of the excursion over the D. M. & M. road Sunday, says that the three hundred passengers who went from that place all speak highly of the trip. "The band is specially loud in its praise of the treatment received from Frank Hechely, the manager of the excursion."

The party given Wednesday evening, at the Casino rink, for Mr. D. McCool, by Mr. and Mrs. Volk and other friends of that gentleman, was a large and very elegant one. The Chequamegon orchestra gave one of its fine concerts, and played for the dances. Refreshments were served at the rink. The affair was a marked success in all respects.

Frank McGuire, a fifteen-year-old son of the lighthouse keeper, Wednesday caught one of the largest speckled trout that has been captured hereabouts for a long time. It weighed exactly four pounds, and measured nineteen inches. The reporter saw it, and knows whereof he speaks. It was caught near the lighthouse.

Mr. J. C. Lewis, who was among the persons injured Monday by the collapse of the roof of the grand stand, which was being erected at the Lapeer driving park, as reported in this paper, is a former well known resident of Marquette. The news of the accident was also wired to some of his friends here, who are informed that he will probably recover.

At a meeting of the common council Monday evening the contract for laying a sewer from the lake shore, at the foot of Washington street,

The Mining Journal.

ISHPEMING, AUGUST 22, 1885.

The tide has turned in gold matters. Business is noticeably better, and the merchants are free to say so.

Heywood's Mastodons are killed here for Saturday evening, September 12th.

The rink will be opened every night, instead of three nights a week, as before.

Bishop Harris will hold special services at the Episcopal church next Thursday night.

Michigamme is satisfied at last. There is to be an excursion to there on Sunday, August 30th.

Deer are said to be more numerous than usual this fall, but not every hunter is successful in bringing one home.

Capt. John Jones, of the Superior polo club, says that he is now ready to receive a challenge from any other club in the county.

The Nelson House is taxed nearly to its full capacity to accommodate the numerous guests who visit the city for pleasure or profit.

There has been a rumor current that the Lake Superior mine had raised the wages of the surface employes, but it is without foundation.

There are at present no cases of diphtheria in the city. There is one case of scarlet fever, but that is not considered a dangerous one.

Hunters from abroad are arriving here with the loudly expressed intention of killing a great many deer. They will get some, no doubt.

Judge Mildon is adding another story to his building on the corner of Division and First streets, and will make a first-class business building of it.

Leslie Ray is canvassing the city for Grant's memoirs, and the reporter is glad to note that he is securing subscriptions for a large number of copies.

It was so cold Tuesday night that ice formed to a depth of over an eighth of an inch, in places where water had been left outside in a bucket or pail.

A dance at Michigamme Wednesday night drew a number of young people from here, Negaunee, Marquette, and towns along the line of the M. H. & O.

There is a city ordinance which prohibits the shooting of firearms in the city limits, but it isn't very extensively feared, to judge from the reports frequently heard.

Contractor Majhannau expects to finish the sewer on Cleveland avenue by September 10th. The total distance is about 1,300 feet, and nearly two-thirds is done.

Thirty new men, not thirteen, were elected by the A. O. U. W. lodge at the last meeting. The lodge rooms will be moved to their new location on Cleveland avenue during September.

A new route agent, Henry Steele, has been placed on the Ft. Howard and Ishpeiming railway postal route, vice Thomas Hazerty, transferred to the Green Bay and Milwaukee route.

Engine No. 114, of the C. & N. W. railway, which was badly smashed up by running off the rails in the yard here Saturday night was taken down to Escanaba on Sunday to be repaired.

Thomas Trathon has removed his barber shop from Main to Division street, and is established in new and commodious quarters. He will also keep a stock of cigars and confectionery on sale.

The "blue shirts" won the polo game Saturday night. After the game the boys were kindly treated to ice cream and refreshments by Mrs. G. A. Newett, for which they duly returned thanks.

The examination of John Uren was conducted before Justice Kennedy on Friday. He was bound over to the next term of the circuit court, and will be reasonably sure to get a sentence then which he deserves.

A gold boom would be apt to bring an undesirable class of people to the city, as camp-followers, who always prowl in the rear of the main army. We can stand the camp-followers though, if we have the boom.

There are a great many strangers from abroad in the city, and they all steer direct for the specimens at the Nelson House. After that they get the gold fever and it attacks them worse than it does a native.

The Wiswell electric amalgamator and pulverizer is being introduced quite extensively in the far southwestern mining sections, where Mr. J. P. Wiswell now is. At present one is being set up at Fresnillo, Mexico.

Taleen, Johnson & Co. have moved into their single store, it having been lengthened and refitted throughout. They also have the second story of the building, which they use for store rooms, carpet room, etc.

If Nels Majhannau can excavate for a big city sewer, put in the plank at \$1.50 a foot, and make money, some one gets a good profit when charging \$1 a foot to dig the trench for water pipe, cellar drains, and such things.

A man who left the city recently for Alaska has promised to send our worthy marshal a sealskin, and about the latter part of next November we may expect to see that functionary arrayed in sealskin from head to foot.

There are enough veterans of the late war here and in Negaunee to form a part of the Grand Army of the Republic with as many members as the one at Marquette, and if the veterans would bestir themselves it might be done.

The effect of the new gold find on the Ropes mine should be very favorable. It proves conclusively that there is a gold range to the north of Ishpeiming, and that the Ropes is not merely a pocket, as some envious ones have asserted.

A Finlander named Billy Harrio was hurt Monday at the Cleveland mine by a rock which fell from the hanging wall and struck him on the head. The rock was

not very large, nor the wound very serious, and Billy will be all right in a few days.

The huckleberry season is now at its height, and large quantities are being brought into the city, and still more shipped to Chicago, and Wisconsin buyers.

They are gathered chiefly near the sands, on the line of the C. & N. W., and near Morgan and Eagle mills, on the M. H. & O.

It is lamentable, but nevertheless true, that all of the alleys and streets are not as clean as they were when the street commissioner sledged them up this spring.

The authorities find it almost impossible to prevent people from throwing slops and garbage into the alleys. Proclamations and personal notices have little effect.

Some young rascals have amused themselves of late by throwing stones at the windows of the city school building, and have broken a number of panes of glass.

The janitor kept close watch, and has a pretty strong idea of who the offenders are. If they try it again they will be caught, and they, or their parents, made to pay for the damage done.

It's sugar quartz, sure. Some practical joker sawed up a lot of it into small lumps, and filled a sugar bowl with them at the hotel. A drummer who sat next to the sugar bowl tried to sweeten his coffee with it. He emptied the sugar bowl and filled the cup with sand, and the saucer with coffee, but to no purpose. It makes even a poorer sweetener than glucose.

Albert Jackson Post, G. A. R., at Marquette, has made arrangements with Col. Lansing, of Rockford, Ill., to perform the military drama "Bank and Fire" for four consecutive nights, the last four days in the first week of September.

With the exception of two characters, the parts will be filled by home talent. We suppose a great many of our citizens will help to fill the old veterans' treasury by attending the performance.

If there is anything which appeals most strongly to the sympathetic mind of a journalist, it is the case of a man who goes around the city, and tries to prejudice the minds of business men against the paper, for some trivial reason.

An open enemy is to be respected even if hated, but a covert meddler, who does evil by stealth, is one of the most contemptible men, and need expect little leniency.

John Holm, a miner employed at the Cleveland mine, had his foot badly crushed in the Sellwood, or No. 3 pit, of that mine last Saturday morning.

A large boulder being detached from the walls of the shaft, and rolled down the skip track, stopping only when resting on Holm's foot.

The injury is not a dangerous one, although liable to lay the man up for some time.

An historical magazine, published at Cleveland, Ohio, denotes a large share of its space in the current number to an interesting description of the first opening of the Lake Superior iron region.

Very good steel plate engravings of John Outhwaite, S. L. Mather, H. B. Ely, Fayette Brown, and others intimately connected with the opening of the section are given.

The article contains much of interest to people of the Lake Superior region.

The delivery team of Tim Hughes ran away Wednesday forenoon, from the freight depot of the Northwestern railway.

There were three small boys in the wagon at the time. One jumped out when the horses started and the other two were spilled out a few rods further on.

A baby carriage was run over and the child thrown out, but the little one was not harmed. It was surprising that some of the children were not killed, or seriously hurt.

Attention was called a few days ago to a number of loafers who insult ladies, and others passing by, and who have their headquarters on the corner of Pine and Division streets.

There is another place where they congregate in almost as large numbers, and that is along the front of the school house yard, on Division street.

They roost along the fence every evening. These fellows have a right to make loafers of themselves, if they so choose, but they have no right to annoy or insult passers-by, especially ladies. Some means should be devised for keeping them off the school house fence, if such a thing is possible.

It is hard for some people to believe that there is really gold up here in considerable amounts. They have been saying for several years that there was not enough gold to pay for the mining, and to suddenly find that a vein had been discovered, rich beyond the most sanguine expectations of gold enthusiasts, has made them very sad.

After seeing the specimens at the Nelson House, all they can do is to go away and say that the gold was all blown out by the first blast, but assays of the quartz have spoiled their theory. They might as well give in gracefully.

Paul Stiffens, a German, was taken charge of Wednesday night by the marshal, and on Thursday was conveyed to the county jail at Marquette. He is suffering from an attack of insanity, and on Tuesday traveled around the city announcing that he was about to commit suicide.

He changed his mind, and went to Negaunee. While there he acted so queerly that the police ran him in, and he was brought home Wednesday morning by his friends. He is a young man, and is said to have been subject to mild attacks of insanity since his prostration by sunstroke, several years ago.

Another Victim. The toy-pistol is not more dangerous than a charged soda fountain cask. The pressure is something enormous, and the man who turns the stop-cock is liable to be uncomfortably brought to see the force of this observation.

A prominent railroad man was explaining to a high city official yesterday how the thing worked, when the Negaunee man tried it, and the above-mentioned city official made the experiment himself. It worked beautifully and with customary promptness. His clothes are now being cleaned by a man on Division street. Next.

BASE BALL.

Ishpeiming will have a Base Ball Club yet This Fall that Can Knock 'em All out.

The Ishpeiming base ball club has been unexpectedly strengthened by the acquisition of several new players, and the boys feel confident that with the re-organized team they can lay out the Negaunee nine after a trial or two, and satisfy the Hancock fans that the iron country produces the best ball players.

James Shea, who has pitched for the Hancock this season and the last, has returned to this city, and will play with the home club. He is not only an exceptionally good pitcher, but a good all round player, and rarely fails to add a few scores to his club's side by several well made home runs.

Case Downing, who has pitched with the Negaunees, will also join the Ishpeiming nine, and he and Shea will alternately act as pitcher and short-stop. Cahill and Olsen will catch and field by turns.

With Lundahl as first baseman, Butler, as second, and Woodcock on third base, and Crowley, Hosking, and Gunville in the field, Ishpeiming has the strongest base ball team yet seen here, and one which, with judicious training, can probably get away with anything in the way of a base ball club now in the peninsula.

The boys are not disposed to boast, but they have a very strong nine, and will try to arrange for matches with the Hancock and Negaunee nines, now the crack clubs of the peninsula.

The Gold Excitement. The gold fever which has been held in abeyance for the past six months, has broken out afresh, all because of the new find on sec. 35, town 48, range 28.

Specimens from there are now on exhibition at the Nelson House, and eclipse anything of the kind yet seen here. There are about twenty pieces of sugar quartz, all carrying free gold in greater or less quantities, and which are enough to give the most conservative a slight attack of gold fever.

Little idea is had of the large amount of exploring for gold which is being done to the north of the city. Both the assayers here are given all the work they can attend to, and much is sent to Chicago, Cleveland, or Marquette.

Nearly every available forty on which a quartz vein can reasonably be expected is being prospected, and it can safely be said that no time has there been so much activity in gold matters as at present.

The reason why more is not heard from all and large is that the gold-seekers are working, and not talking, whereas last fall they were talking, and not working.

Terrible Accident. An eleven-year-old son of Patrick Shea met with a shocking accident at the Lake Angelina mine Monday afternoon. It appears that the boy had been in the habit of taking surreptitious rides on a wire rope that hoists the skip from one of the shafts, and by putting his arm around it he could take a rapid and presumably pleasing trip nearly to the sheave wheel at the top of the shaft-house.

He had been warned repeatedly to abstain from the dangerous pastime, but took no heed, and tried it for the last time Monday. When he came to the place where he intended to let go he found that he could not do so, and he was drawn to the sheave. His arm was ground through the wheel, and the flesh, literally stripped from the bone.

The boy was rescued as soon as his position was seen, but not until he had received very serious injuries. It cannot be said yet just how serious they may prove, but it is reasonably certain that he won't try to ride on a wire rope again.

PERSONAL. Miss Nell Melanahy left the city Tuesday for Escanaba, where she will make her home in the future.

Mr. Mann returned Monday from a hunting trip, bringing home one of two fine deer that he shot in the two days that he was out.

Mrs. W. B. Johnston returned Tuesday from Ellioville, New York, where she has been visiting her parents for the past six weeks. She will remain here about ten days, and then go on to Bessemer to join her husband.

Messrs. M. L. Cardell, postmaster at Hancock and J. C. Foley, who registered from the same town, are in the city. Mr. Foley has some valuable options, in the vicinity of the new gold field, which he will look after.

John W. Joachim leaves to-day for Chicago, to see what there is new there in the way of stocks, of which he makes a specialty.

Mr. Duncan Gilchrist is at present somewhere, but will probably do so. He doesn't like to leave a section where they are discovering gold in such quantities merely to go to a new iron region, hence his indecision.

Convention of German Journalists. MILWAUKEE, Aug. 20.—A reception of delegates to the convention of German American journalists and authors, the first event of its kind ever held, was conducted at the Grand Opera House this evening, about fifty representatives of the leading German papers of the country being present. Additional arrivals are expected to-morrow.

The convention will continue the remainder of the week, an interesting program having been prepared. To-morrow evening the visitors will be given a grand banquet by the representative German business men of this city.

Commemorating Wayne's Victory. TOLEDO, O., Aug. 20.—A large crowd of pioneers, from the entire length of the Maumee valley, from Ft. Wayne to Toledo avenue, assembled at Turkey-foot rock, 12 miles from here, and the site of the battle of Fallen Timbers, where Wayne broke forever the Indian power in the northwest, to organize an association to mark the historic spot of that struggle, this being the ninety-first anniversary of Wayne's victory. Congress will be asked for a moderate appropriation to mark the historic place.

The Delta Tau Delta Fraternity. DETROIT, Aug. 20.—To-night the Delta Tau Delta college fraternity convention was meeting in this city, but a public session at Whitney's opera house. S. S. Babcock delivered the address of welcome, following which came the response and address by W. W. Cook, of New York, president of the convention. Prof. J. H. Grove, of the Ohio Wesleyan university, delivered the oration on "What may we demand of our colleges." A poem, "Our Mother Purple and Gray," by H. W. Collingwood, was read by C. W. McCurdy.

Passenger Rates Advanced. CLEVELAND, Aug. 20.—At a meeting of the passenger agents of the Lake Shore, New York, Pennsylvania and Ohio, Cleveland & St. Louis railroads, to-day, it was decided to advance the passenger rates from Cleveland to New York from \$8.50 and \$9 to \$10.50 and \$11.50 for second and first class respectively.

QUELLED THE STORM.

A Large Ocean Steamer Saved by Pouring Oil on the Water.

The steamship Polynesia arrived at New York from Hamburg lately, and reported having encountered a cyclone, during which her companion hatch ladders and all movable articles had been washed overboard. Capt. Kuhn said: "We sailed from Hamburg on July 31 with 249 steerage passengers, and had fine weather until we reached the banks. On August 16, in latitude 43 degrees, longitude 53 degrees 30 minutes, a terrific cyclone swept down on us. We were somewhat prepared for it, however. At 4 o'clock in the morning the barometer stood at 31.10. By 5 o'clock, or in four hours, it had fallen to 29.96—a half inch. This in the summer weather means a storm, and, taking the warning, I ordered all the hatches to be closed down and to

PREPARE FOR A HURRICANE. The barometer still continued to fall fast. The lowest it got to during the gale was 29.10. At ten o'clock the wind suddenly swept down on us in a perfect fury, and in a moment the sea ran mountains high. I immediately ordered the engines to stop, and decided to lay to until the cyclone had passed, feeling assured it would last only a few hours, and that if we went ahead we should get the full force of it. The wind first struck us from the southeast and the sea was lashed into a perfect fury. Wave after wave dashed on our starboard bow, but we managed to keep her head in such a position that little harm was done. At ten o'clock the wind suddenly shifted to the southward, and a terrific breaker, looking like a

HUGE MOUNTAIN OF WATER, broke over our starboard bow. I tell you, sir, it unnered me for a moment. I have never seen anything so terrific. I have seen gales of Mauritius, and anyone who has been to sea knows they are bad enough, but this fell far beyond all other falls with a crash on the deck, knocked down the seamen who were on duty, and hurled them against the bulwarks. It broke over the foremast on our deck, carried away a companion hatch, and poured into the cabins, causing a panic among the passengers, who were kept below. It knocked down the chief steward and broke his leg, and he was carried away to offer leading to the spar deck. I think if any other wave had immediately followed this we SHOULD HAVE GONE DOWN.

We got her head righted again, and continued to resist the breaker as on a vessel for some time, the wind at the same time, tearing through our rigging at a fearful rate. At midday another huge breaker broke with full force over our bow. It carried away a boat and the main gaff and all movable articles on deck. I saw that something must be done to try and stop this, and decided to try the effects of oil. A tank of paint oil was placed on the starboard side of the ship and the oil allowed to leak out.

THE EFFECT WAS MARVELOUS. It gradually spread over the water and quieted it right down. The oil spread over a large area around the vessel and quieted the storm entirely. The cyclone lasted for eight hours, passing off to the northwest.

"Do you think steamers now crossing the Atlantic will be in any way endangered by the gale?" "No, it only covered a small space and passed away to the northwest. We were on the edge of it. The next day I noticed several sailing vessels with their sails and rigging torn to pieces. They had evidently received the full force of it. We were about nine hundred miles from Sandy Hook.

THE DAY AFTER HIS FURNAL. A prominent Texas banker proves a suicide and defaulter.

FE. WORTH, TEX., Aug. 20.—Nothing has occurred in the financial history of Fort Worth so startling as yesterday's developments. Tuesday the body of John Nichols, vice president of the City National bank, whose sudden death occurred Monday at the bank, was followed to the grave by every man of prominence in the city. To-day the dead banker is

BRANDED AS A DEFAULTER. Rumor first placed the amount owing the bank at \$50,000, but the investigation at the other banks places the amount at about \$100,000. The word "about" in the report of the committee is ominously regarded. The bank is supported by a large amount of capital of \$100,000. Every one now believes that

NICHOLS COMMITTED SUICIDE, and needed for that purpose some drug that would produce symptoms of cholera. His accounts as city treasurer are being hastily examined. It is believed that his total indebtedness to the bank and outside parties, aggregated about \$100,000, and his estate is valued at about the same amount. He held \$50,000 in stock of the City National bank, and in his will he divided this stock equally between his two daughters. Nichols' body is to be exhumed.

SOUTHERN PRISON SURVIVORS. They Recount Their Experiences and Elect Their Officers for the Ensuing Year.

PHILADELPHIA, Pa., Aug. 20.—The second day's session of the twelfth annual convention of the national association of ex-union prisoners of war, was held to-day. Very little other than routine business was transacted. A considerable portion of the session was taken up by different members of the association, who recounted their experiences in southern prisons, after which a program of singing was elected. President J. H. Longnecker, of Bedford, Pa.; first vice president, J. F. Macken, Sandusky, O.; second vice president, Henry Kripp, of Baltimore; chaplain, Rev. Chas. Dickson, of Hartford, Conn.; treasurer, Rev. G. Girsey, of Fremont, O. The convention then adjourned to meet in Buffalo, August 20th and 21st, 1886.

The Telegraphers' Convention. NEW YORK, Aug. 20.—The Old Time telegraphers, who are holding their annual convention here, were entertained to-day with a lunch and an excursion around the bay by Ernest Wyman, president of the New York Western Telegraph company of Canada.

No Higher Eastern Rates Yet. NEW YORK, Aug. 20.—No progress was made to-day in the negotiations now pending between the passenger agents of the trunk lines regarding higher rates of fare. During the day several of the agents called at commissioner Fink's office. No regular meeting was held.

Underwriters' Parade. ST. JOHNSBURY, Vt., Aug. 20.—Lyndon Centre is a village of 300 inhabitants, and is about 160 years old. The first fire there, since its foundation, occurred to-day. The loss was small.

The Big St. August Race. HARTFORD, Conn., Aug. 20.—The \$10,000 steeple chase was completed to-day. Joe Davis was riding; Abdo, second; Kendall, third. Seven heats were trotted. The unfinished 2:23 class race was won by Nobby; Butterscotch, second; Breeze Medium, third.

THE SOUTH AMERICAN COMMISSION.

In Uruguay and the Argentine Republic They Are Cordially Treated.

The commissioners appointed to visit the Central and South American states in the interest of more intimate international and commercial relations between these countries and the United States, have submitted a report to the department of state of its work in Uruguay and the Argentine Republic. After stating that both at Buenos Ayres and at Montevideo the commission sought from the commercial communities information concerning the present condition of commerce, and suggestions as to the best means of promoting trade with the United States, which will be submitted with a report to the president now in course of preparation, the report in part says: The share of the United States in

THE ENORMOUS COMMERCE of the river Plate country, which includes Paraguay, Uruguay and the Argentine republic is lamentably insignificant and less than it was half a century ago. The reason is very apparent. Twenty-one lines of steamships control these ports with those of Europe, while there is no regular steamship communication whatever with our country. From forty to sixty steamers arrive at Buenos Ayres every month from Europe and not one from the United States. The few products of our fields and factories found there are brought sometimes in chartered vessels, but this is a scanty commerce by way of Europe, the merchants with one voice saying that because of the absence

of STEAM COMMUNICATION, they can afford to buy in the United States only such articles as cannot be obtained elsewhere. The presentation of the commission to the president of Uruguay was made the occasion of a great deal of ceremony and military display, it being the desire of the government, as well as of the people, to testify in this manner to their admiration for the "Great Republic," as the United States is universally called. The president of Uruguay and his ministers, after expressing with great ardor their admiration for the United States, their efforts to initiate our government in all things and their desire for closer relations, accepted without discussion each and all of the propositions submitted by the commission except that which relates to the reciprocity treaty with the United States. For this they would have readily assented also had the commission felt justified in encouraging them to expect that the congress of the United States would consent to a reduction or removal of the duty on wool, this being the chief product of Uruguay, and the only article exported to the United States which is taxed under our tariff. With regard to the proposed common coin and the international congress they were quite enthusiastic. The government of Uruguay, they said, was not in such a financial condition as to offer pecuniary aid toward the establishment of a steamship line between its ports and the United States, but very earnestly hoped that something might be done in this direction, and would agree to afford the steamers

SPECIAL PRIVILEGES in the matter of harbor dues, etc. The presentation of the commission to the president of the Argentine republic was at the commissioners' request attended with a little formality as was consistent with diplomatic rank and usage, and the usual complimentary addresses were exchanged. The report contains some interesting details of the conference with president Roca and his government, the report continues, "we are cordially approved and accepted by the Argentine government, and the commission met with cordiality, and now have the desire for closer political and commercial relations with the United States so apparent as in the Argentine republic. That country aspires to be to South America what our country is to the northern continent, and is making very rapid strides toward such a position. The president earnestly desired more intimate commercial relations with the United States, but said it was useless to expect trade without transportation facilities. The Argentine government was willing to do as much as the United States in giving financial aid to a steamship company that would sail vessels between the port of the two countries, and we hope that our congress would do something at once so as to make the market of the United States accessible to the Argentine importers."

AN OPEN LETTER TO YOU. What a glorious world this would be if we all had everything we wanted. There is one thing we want you which you can help us out, and that is, your trade in our line.

Allow us to introduce to your attention, respectfully soliciting at least one trial, the brand new firm of Taleen, Johnson & Co. We have nothing old to offer in the way of goods, in our general merchandise stock, fresh and new, and in ideas everything original and practicable.

You will find plenty of proof that will abundantly repay and satisfy you, by comparing us with others, that our goods and prices, and methods of doing business, are as nearly correct as can be.

No man on earth, let him be possessed of the most consummate skill as buyer, can get lower prices than we quote to you. Do not indulge in the thought that because our prices are low the goods are not first-class in every way. When you see them on our counters you will say that the facts match our statements. Their quality and cheapness will excite your astonishment and admiration, assuring you to be a judge of values.

You can order goods from us with the full assurance that any or everything not entirely satisfactory can be returned. Please answer.

Yours very truly, TALEEN, JOHNSON & CO. ISHPEMING, Mich., July 29.

FOR SALE BY F. Wessner & Son, Marquette, Mich. F. P. Wessner, Marquette, Mich. Murray & Robbins, Marquette, Mich. J. Dreyer & Bro., Marquette, Mich.

THE MINING JOURNAL

Entered at the Post Office at Marquette, Mich., as second-class matter.

The Hancock Mining Herald states that the tributors who are working the Wolverine copper mine "have again struck it rich."

CAPT. SMITH MOORE is getting some very rich looking rock from his prospect in the north part of this city.

For the week ending August 18th, ore shipments from the Minnesota Iron company's mines to the port of Two Harbors, amounted to 7,965 gross tons.

The Vulcan furnace, at Newberry, will go into blast about September 1st, by which date it will have fifty kilns built and ready to do service.

THE Cleveland Iron Trade Review opines that if the resumption of operations by large iron works on full time, and the running of others on double turn are to be taken as any indication, the return of better times is not far distant in the future.

ONE more mine—the Manganese—has "gone over to the majority," i. e., joined the list of idle mines.

From fifteen to twenty car loads of ore daily is the present output from the Germania mine, we gather from the mining column in the Ashland Press.

THE McKinnon brothers, owners in fee of the Nanaimo mine, have seized that property for royalty alleged to be due, but the company will contest the claim.

JULY's product of bullion from the Ropes mine was \$2,050. This was from the stamps alone, the Wiswell mills not having been in operation during that month, owing to changes and repairs which they were undergoing.

"ONE blast on his bugle horn were worth a thousand men," the poet tells us of Roderick Dhu. The blast that opened up that vein of gold-bearing quartz on section 35 was worth more than that to the upper peninsula, besides ever so many thousands of dollars.

A GENTLEMAN of this place is in receipt of a letter from a Fond du Lac correspondent in which the information is given that the furnace at that place will go out of blast on the first of December next, and also that the cost of making pig iron there, as the furnace is now running, is \$15 per ton.

MR. J. K. RODGERS, one of the most courteous gentlemen who occupies the position of editor on any paper, is now sole editor and business manager of the Ontonagon Herald.

OUTSIDE capital is invited to fight shy of investment in Marquette county gold properties from this date forward, if it feels so inclined.

IN the list of dividend paying mines given in the Wall Street Daily Indicator the Calumet and Hecla stands second in the total amount of dividends, paid to

date, the Consolidated Virginia, producing gold and silver, being the only one which leads it.

During the week, Mr. Jones, the Ishpeming assayer, made analyses of several specimens of sugar quartz from the new find on 35, 48-28, selecting pieces in which no gold was visible.

TO HIS many fellow-laborers in the journalistic field, both in this state and elsewhere, who have seen fit to bestow upon him their published expressions of good will and complimentary regard, the associate editor of the MINING JOURNAL returns his most hearty thanks.

FOR the week closing with and including Wednesday, lake shipments of iron ore from the ports of Marquette, Escanaba and St. Ignace, amounted to a total of 78,889 gross tons.

MR. ALFRED MEADS, editor and proprietor of the Ontonagon Miner, wishes to dispose of his paper and printing establishment and has issued the following circular to that effect:

By arrangement with Mr. C. H. Hall, of the Lake Superior Iron company, a ton of rock from the new gold find on that company's property will be supplied to Mr. Merritt and the gentlemen associated with him in perfecting an entirely new method of extracting the precious metals, for treatment by their process.

DISPATCHES from Minneapolis say it is now an assured fact that the new Chicago, Burlington & Northern road, which is being built between Chicago and St. Paul, will run direct to Minneapolis.

THE amalgamated association of iron and steel workers has established a bureau of labor statistics for the purpose of gathering reliable information from all parts of the country concerning labor and industries.

THE celebrated group of Negaunee hematite mines, the Milwaukee and Wheeling at present give very promising indications. In the former they are now working on one stop which is 25 feet wide and 15 high, with neither foot nor hanging wall in sight.

THE Wheeling is also looking up. A shaft has been sunk to the south of the open pit which adjoins one of the pits of the Milwaukee, and encountered the ore body at a depth of 150 feet.

THIS paper has it from a thoroughly reliable source that they have struck the Chapin vein in the Hamilton shaft on the Emmett Mining company's property, adjoining the Ludington mine.

WE take the following item of railroad news from the Wednesday's Marquette Mining Herald:

MR. F. W. Anthony has taken the contract to grade that portion of the Hancock & Calumet railroad between Hodge's and Cleve's foundries, a large force of men starting to work there last Monday.

THE new capital is invited to fight shy of investment in Marquette county gold properties from this date forward, if it feels so inclined.

IN the list of dividend paying mines given in the Wall Street Daily Indicator the Calumet and Hecla stands second in the total amount of dividends, paid to

makes the rumor assume an air of truthfulness, and, we believe, later developments will prove that the rumor is quite correct.

IN its report on the condition of the Cleveland iron market, the Iron Trade Review of the 15th says:

ALTHOUGH the ore market still rules quiet, and the pig iron market is not showing the improvement and strength that could be desired, still there are some encouraging features to be noted.

WE quote from a private letter received at this office from Gov. Swineford, which is dated, Portland, Oregon, Aug. 14th:

JUDGING from the reports received from London, the commission appointed to investigate the depression of trade is not likely to accomplish much of value.

FROM Hon. Edward Breitung the MINING JOURNAL learns that the Minnesota Iron company is now operating and shipping from four of its mines, and is opening up the fifth, the latter being the Ely, from which they will begin to ship ore in the course of a few weeks.

ion as to the direction in which the vein extended has been verified.

ALTHOUGH the ore market still rules quiet, and the pig iron market is not showing the improvement and strength that could be desired, still there are some encouraging features to be noted.

WE quote from a private letter received at this office from Gov. Swineford, which is dated, Portland, Oregon, Aug. 14th:

se them can be fur. by our own people. ula money and en- that is necessary new industr...

tract, onto which the lode undoubtedly extends, as well as several other pieces in the vicinity to which this find gives a high prospective value.

Wednesday, in company with several gentlemen from this city, the editor visited the new gold find on section 35, 48 28, of which so much has been said in these columns during the past few days.

These had been examined, over and over, for specimens carrying free gold, by the hundreds who have visited the place during the past week, and as a matter of course all the finer pieces had been carried off, nevertheless our party, by dint of careful searching, secured from the heap of refuse some beautiful samples of quartz in which the virgin gold was plainly visible.

Men are now at work under the direction of Mr. Jas. Jopling, tracing the vein, in the interest of the gentleman named and those who with him hold a lease of the Gingrass tract adjoining.

They were successful Wednesday in following it about seven hundred feet from the opening on the Lake Superior company's land, this carrying it well over on the latter property.

The Nelson House "lay out" of specimens from the new find was duly examined and admired. It is, indeed, a magnificent showing of richly mineralized quartz, many of the pieces being thickly studded with virgin gold, which appears all through them in a variety of beautiful forms.

A MONTANA mining party discourses with great freedom concerning the methods by which the mining industry in a neighboring state has been given an ill name.

The men of Colorado have themselves to blame for the depression which now prevails in the mining industry in that state. Mining honestly conducted by conservative and intelligent men is as safe and legitimate a business as merchandising or banking.

What is true of Colorado—and the above is undoubtedly not wholly an overdrawn picture—is equally true of the western mining districts generally. Millions of dollars of eastern capital has been swallowed up in swindling schemes out there, and the papers have aided the sharks in their iniquitous work of palming off valueless properties on credulous buyers, until they have taught investors caution through sore experience.

Though nothing of the sort has been attempted here in Michigan, it is difficult to interest outside capital in our meritorious mining ventures, because the capitalists who have money to spare for investment have been so frequently bitten by the western mining sharks that they have grown timid, and decline to put in money where it might be placed with the certainty of large returns.

If our western friends have learned at last that honesty pays in the long run, we are devoutly glad of it, not only for their moral good, but because a cessation of their "jobbing" operations will conduce to our material benefit by dissipating the injurious suspicion with which they have taught eastern capitalists to look on the mining industry as a field for safe and profitable investment.

Below is given a tabulated statement showing the amount of iron ore and pig iron shipped from the lake ports of this district for the month up to and including Wednesday, Aug. 13th:

ROYAL POWDER Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low cost, shoddy, alum or phosphate powders. Sold only in cans.

Below is given a tabulated statement showing the amount of iron ore and pig iron shipped from the lake ports of this district for the month up to and including Wednesday, Aug. 13th:

THE SICK MAN.

He is Probably Not So Bad Off Since England's Queen Courts an Alliance With Him.

Little Alfonso Resigns the Colony of the German Uhlans because William Takes Away Caroline.

Cholera in Spain, Small Pox in Canada, and a Rebel Advance on Demogora, and Other Events.

ENGLAND. COURTING THE SULTAN. LONDON, Aug. 20.—The Standard's Berlin correspondent says: "An eminent Turkish diplomatist declares that the sultan and the grand vizier oppose an alliance of Turkey with England against Russia."

THE STANDARD URGES THE GREAT IMPORTANCE of securing an alliance between England and Turkey. It expresses a hope that Sir H. Drummond Wolf will be successful in securing the desired alliance.

ROYAL TRAVELERS. LONDON, Aug. 20.—Queen Victoria and the prince of Wales will start for Norway on one of the royal yachts to-morrow. The princess of Wales and her daughters have gone to Yeadon to visit the duke of Cumberland.

THE PARCELLETTES. LONDON, Aug. 20.—Parnell has summoned the members of the Irish parliament party to meet here on the 23rd inst. The object of the meeting is to consider what plans shall be adopted to advance the cause of the party in the approaching electoral campaign.

PERSECUTED MR. PEACE. LONDON, Aug. 20.—The London newspapers generally denounce the Pall Mall Gazette for refusing to publish the letter of Miss A. M. Francis, exhorting Mr. Peace from the charge of having enticed her from her home, as recently published in the Gazette. The solicitor for Mr. Peace recently published a letter in which he says that he has been instructed by his client to refrain from prosecuting the girl's father on the charge of common assault and battery, for the canting he inflicted on Mr. Peace the other day, on the alleged ground of his betrayal, and of his cruelty to the young lady, because of the trivial penalty that would attend conviction, but to prosecute him on a far graver charge. The solicitor asks the public to suspend judgment on the case until the merits are developed by the courts.

WHO IS HE? BOMBAY, India, Aug. 20.—The supposed priest, "Father Kanovics" by name, who was arrested at Cochín, on the Malabar coast, on suspicion of being a spy, has been sentenced to six months' imprisonment. During his examination he admitted having been in Egypt, and acquainted with Oliver Pain, but refused to answer further questions. Several witnesses have left here for Cochín to try to identify him. His appearance tallies with Sir Elyan.

SPAIN. ALPHONSO IS MAD. PARIS, Aug. 20.—The Figaro states that the king of Spain has, in order to show his displeasure at the assumption by Germany of the control of the Caroline islands, resigned the honorary colony of a regiment of German Uhlans, which was some time ago bestowed on him.

CANADA. SMALL POX. MONTREAL, Que., Aug. 20.—Thirty-two new cases of small pox were reported here to-day. Some of the afflicted persons reside on the principal west end streets.

EGYPT. MARCHING ON DONGOLA. CAIRO, Aug. 20.—The news that the rebels have taken and occupied Debbah and Ambugusia, and are now marching on Dongola, is to-day confirmed.

IRELAND. THE RENT QUESTION. LIMERICK, Aug. 20.—After a stormy session to-day the tenants of the county of Devon decided to accept the earl's offer of a reduction of ten per cent in rents.

ITALY. KASSALA'S RELIEF. ROME, Aug. 20.—The Tribune says that the Italian expedition for the relief of Kassala will mass at Koran, in September, and march early in October.

AUSTRO-HUNGARY. DIPLOMATIC CONFAB. VIENNA, Aug. 20.—It is reported here that count Kalnoky and M. DeGiers have met at Dresden. Herr Tiza, the Hungarian prime minister, previous to his departure for Ostende, was informed by count Kalnoky that no important political question would be discussed.

FRANCE. GOVERNMENT'S FUNERAL. PARIS, Aug. 20.—The government has ordered admiral Courbet's remains to be landed at Brest, instead of Toulon, owing to the prevalence of cholera at Toulon. Expensive preparations are being made for the reception of the body.

ROCHEFORT'S ANTIQUES. PARIS, Aug. 20.—The Intransigent, Rochefort's paper, states that England has instructed Lord Lyons, British ambassador to France, to complain to M. De Freycinet, minister of foreign affairs, of Rochefort's attempts to incite the Parisians against Lord Lyons.

THE CHOLERA. MADRID, Aug. 20.—The only wealthy persons who have been attacked by cholera are public officials who are compelled to visit the hot beds of infection. Many people are returning to the city, which is considered safer than the provinces. Tuesday's returns show there were 322 new cases and 150 deaths in Granada city, and 348 new cases and 125 deaths in the province. Two doctors, who went from Madrid to Granada, have died of the disease. A doctor who saved fourteen out of fifteen patients in the second stage of infection, by administering an emema of ether, has been authorized to apply the remedy in the hospital. There were 4,109 new cases and 1,541 deaths in Spain yesterday.

Pity They Didn't Get Him. FALL RIVER, Mass., Aug. 20.—A hundred and fifty persons, aroused at the cruelty of Geo. Mate to his three motherless children, assembled in front of his house last night for the purpose of lynching him. The police, however, saved Mate by locking him up. His children bear the marks of terrible treatment, and have had nothing to eat for some days, but some dough made by one of them.

Lost His Leg. CALUMET, Mich., Aug. 20.—Simon Tobinski, a Polisher, working on the Hecla & Torch Lake railroad, had his leg crushed by a car running over it. Amputation was performed above the knee.

OVER A CENTURY AGO. After clearing away the debris in the largest mine, and following the dip of the vein, they claim to have uncovered a vein of very rich ore. They estimate that nearly five millions of silver is already in sight, and word has been sent to Utah, and a great influx of Mormon miners is anticipated.

RICH SILVER FIND. Mormon Miners Explore a Mexican Mine Over a Century Old, With Good Results.

EL PASO, Tex., Aug. 20.—The important announcement comes from Comilitans, Mexico, that the Mormon colony which recently located there, has discovered a silver-banza in several old mines, which were pumped out. The colony was located as an agricultural colony, and the colonists were selected with this view. A few old miners took poorly to agriculture, and bought abandoned mines that were opened.

Both Drowned. CLEVELAND, O., Aug. 20.—Joseph Zitka went bathing in the river yesterday, and being taken with a cramp Chas. Blazek went to his rescue, when both were drowned. Both men leave families. This morning, near the same place, a man named Creekel committed suicide by drowning.

Peoria Whisky Released. PHILADELPHIA, Aug. 20.—All Peoria whisky, detained in this city by direction of commissioner Miller, of the internal revenue, has been released. The last of the lot, that from the distilling firm of Zoll, Zwaibacher & Co., was freed to-day.

YELLOW JACK IN NEW YORK.

A Sailor Inflicted With the Dreaded Disease, is Picked Up in that City.

NEW YORK, Aug. 19.—A dispatch from health commissioner Raymond, of Brooklyn, warned the sanitary authorities to-day to be on the lookout for Ranny Ryers, 22 years old, a sailor on the schooner John Gibson, and who left the vessel, now lying at a Brooklyn dock, sick with symptoms suspiciously like those of yellow fever.

Ryvers left ship yesterday, and it was found that he had crossed the city to New York. Search was at once made for him. Before it was begun a citizen had found Ryers lying very ill in the battery park, and had helped him to 23 Street, where he fell in the hallway under a gutter. Here Dr. Coanta, an inspector, found him, and had him removed to the Riverside hospital.

During the night he developed the well-known signs of the dreaded disease. This morning he was removed to quarantine. The premises in State street were disinfected, and the Brooklyn health officers are now looking after the ship and its partly discharged cargo.

The health officers say that they do not believe that yellow fever could become epidemic in New York in its present excellent sanitary condition.

THE FELTON EXPLOSION. That it Was the Work of Dynamites Conclusively Proved.

WILMINGTON, Del., Aug. 19.—Capt. Wiley and pilot Curry have been overhauling the plaster and other debris on the steamer Felton this morning, and have found a fragment of metal belonging to a cable, a bunch of bright, twisted wire, and a piece of tin believed to have been the lid of a dynamite canister. These to which such a lid would belong, are one of the most positive proofs that the explosion was the work of dynamite.

The finding of the cables is considered as important, as corroborating the statement of H. M. Morrison, a witness who saw a man, whom he described in the companion way door, place a cable behind the door, and hook the door back. Master mechanic Collins, who was on the ship this morning, and found the tubes behind the indentation bent inward, but sound and unbroken.

THE NEW ELDOBORADO. At Juneau, Alaska, a Lode Has Been Tapped Which is Inexhaustible.

Bev. J. A. Zahn, of Notre Dame university, of Notre Dame, Ind., who arrived lately at Portland, Ore., from Alaska, on his way home, was interviewed by a reporter of the News, of that city, who asked him how he enjoyed the trip.

"Very much, indeed," he replied; "I have traveled considerably in both Europe and America, but never before did I see such scenery. As soon as the beauties of this Alaska are fully understood, thousands will go to Alaska every summer instead of to Europe, and many more will be attracted by the wonderful beauty of the scenery. Besides there is no sea-sickness, owing to the smoothness of the water. I have great faith in the future of the mines of the Yukon valley, and more mills than here in Virginia City. They have over 200 wide and there is already enough in sight to keep the 120-stamp mill running for a life time. The lode can be traced for miles, and more mills will be put up. The future of Juneau is an assured fact. The Ancon, the steamer that brought us down, had \$100,000 in bullion on board. This was the result of twenty days' run of the mill. It is not counting 600 tons of sulphurets, worth from \$100 to 150 per ton, which will make the yield much larger. The result of this first twenty days' run has opened the eyes of many and satisfied all as to the great richness of the mines of Alaska. Besides mining there is the fishing interests. Were I to tell you that it is no trouble to catch three or four hundred salmon at a haul, you would think I was romancing, but such is the case. In short, there is a great future for the fishing, fur, timber and gold mines of Alaska. Capt. Carroll made the trip as pleasant as possible for myself and the rest of the passengers, and I must say that I never enjoyed a summer tour better in my life."

ONLY TWO LIVES SAVED. A British Ship Wrecked at Pt. Reyes on the Coast of California.

SAN FRANCISCO, Cal., Aug. 20.—It is reported that the British ship Haddingtonshire, from Astoria, Oregon, for Liverpool, with a cargo of flour and salmon, is ashore of Pt. Reyes, forty miles north of this port. It is also said that eight lives were lost.

A LATER REPORT. SAN FRANCISCO, Aug. 20.—The Merchants Exchange has just received the following particulars of the loss of the British ship Haddingtonshire: The vessel left Astoria, July 6th, got down as far as the equator, when she struck a heavy gale which disabled her so as to render the captain to put back to San Francisco for repairs. In that port she lost four seamen and her chronometer. When off this port, last night, she encountered a dense fog, and while groping about ran on the rocks near Point Reyes, at 3 o'clock this morning. The vessel's cargo is a total wreck, and all aboard, except one sailor and the cabin boy, were drowned.

Died With His Boots On. ST. LOUIS, Mo., Aug. 20.—A dispatch from Toiyah, Tex., says: "John Morris, sheriff of Roeges county, got on a big spree there Tuesday night, and used his pistol freely. An attempt was made to arrest him by sergeant Couglight and three other state rangers, when Morris opened fire on them, killed C. P. Nigh, and seriously wounded Sam Love. The sheriff was shot three times, and killed."

Street Car Drivers' Strike. MEMPHIS, Tenn., Aug. 20.—The drivers on the several lines of the Memphis Street Railroad company struck this morning, and travel has been greatly interrupted. At 1:30 P. M.—At this hour the cars on the several lines are running with some regularity, being moved by new drivers, who are protected by the police. The committee of conference appointed at the meeting of the drivers to report to the officers of the company, reported to-night that the officers of the company wished to treat with them. The cars were running during the morning by raw hands, but at 8 o'clock to-night were all withdrawn. Everything is quiet and the strikers hope to carry their point by peaceful means.

Will Stand by the Scale. CLEVELAND, O., Aug. 20.—The strikers at the Cleveland rolling mills held a secret meeting last night, and by a vote of 1,000 to 41 decided to stand out for the scale of wages as fixed by the Amalgamated association.

The Dangerous Weed. CHICAGO, Aug. 20.—Henry and George Fleychman, two brothers, aged nineteen and twenty-two respectively, who have been carrying on a commission business on South Canal street, showed symptoms of insanity some weeks ago, Henry's symptoms manifesting themselves in his disposition to fling flat irons at people. Both were melancholy and could not sleep. The county physician thought their derangement was owing to their excessive use of tobacco.

He Sleeps the Eternal Sleep. MONTREAL, Aug. 20.—A fire broke out this morning in the Bell Telephone company's works. The flames worked up through the premises of the bank note company, causing a damage estimated at \$80,000, which is fully insured. A watchman named Brady, in the bank note company's premises, had fallen asleep, and was smothered.

CASUALTIES.

An Explosion on the Steamer Felton Wrecked Her Upper Deck and Injures Sixteen Persons.

At Laper, Mich., the Roof of the Grand Stand at the Driving Park Collapses, Injuring Many Workmen.

PHILADELPHIA, Pa., Aug. 17.—An explosion this morning occurred on the steamer S. M. Felton, just after she had left her dock on her trip to Wilmington, Del. She was opposite pier No. 8, when the passengers and crew were startled by an explosion which shook the boat from stem to stern, and when the smoke cleared away it was found that the entire forward part of the vessel above the water line had been badly damaged, and a number of PASSENGERS INJURED.

some of them severely. The pilot house and the entire upper deck was lifted, and fell to the lower deck. The bow presented a scene of complete wreckage. Tugs proceeded at once to the injured vessel, and with the assistance of police tug Wm. S. Stockley, which was lying near by, at once proceeded to remove the injured.

The ambulance of the Pennsylvania hospital soon arrived, and took most of the injured to the hospital. The passengers and many of those who saw the explosion from the shore insist that gunpowder, or some

SMILAX EXPLOSION. was ignited on the forward deck, and several persons who were standing on the pier declare that they distinctly noticed the odor of gunpowder. There has been considerable rivalry between the Felton and other boats in the city, and reports have gained ground that malicious persons placed an explosive on the deck. This is a mere rumor, however, and the cause will not be known until a full investigation is made. There were over 200 people on the boat, men, women and children, when the explosion occurred. The wrecked upper works took fire, and

A FRIGHTFUL PANIC ensued. This was speedily checked by the coolness of a number of men, who drove the women and children aft, and prevented many frantic women from leaping overboard. Besides those seriously hurt a large number were stunned. There now seems but little doubt about the explosion being due to dynamite or powder, though no one seems to know how it was taken on board. It seems marvelous that half the people on board escaped death. The list of wounded numbered 16. Capt. Wiley, Mr. Lawrence, Mr. Morshon and Mr. Little made a careful examination of the wreck, for the purpose of ascertaining the cause of the explosion. The investigation established the fact that the explosion was CAUSED BY DYNAMITE.

The explosive had been placed forward, directly in front of the head of the boiler. The steamer came up from Wilmington at half past five, and was at work till ten o'clock last night. She lay at Wilmington in charge of Andrew Jones, of Bridgeton, N. J. He could not be communicated with to-day, but Capt. Wiley says that

A STRANGER HAD BOARDED, or attempted to board the steamer last night, the watchman would have informed him of that fact. While the steamer lay at her wharf this morning, the passengers came aboard and took chairs on the hurricane decks, or aft, the officers and deck hands were busy and no attention was paid to the movements of the passengers. Several carrier baskets, satchels, or bundles, and packages might have been carried aboard without attracting attention. Detectives have been put on the case. The Felton was insured for \$50,000.

A Collapsed Grand Stand. LAPER, Mich., Aug. 17.—The roof of the grand stand, which was erected for the driving park races of Wednesday and Thursday, collapsed this morning. Twenty thousand shingles were on the center of it, and fifteen men were working thereon, while there were fifty men in and around the building. The shingles blew away on the wind, and several men were injured. W. O. Wood was hurt in the spine and back, also internally; J. C. Lewes, had an arm broken, and was otherwise badly hurt. Jimmy Weir, a boy of sixteen years, had a leg broken, and many others received slight injuries. It is thought all will recover.

THE MARQUETTE TOWERS. They Were Built on the Coast of Ireland to Repel a French Invasion.

"Before the marlboro towers all disappeared from the Irish seaboard," writes a correspondent to the Transcript, "the purpose and story of them are worth a passing notice. They were built at the end of the past century to protect the coast from an anticipated French attack. There are many of them along the English shore, but Ireland was the expected scene of invasion, and was at the time the least protected part of the three kingdoms. As a matter of fact the French fleet did ride in Bantry Bay, and an invasion was always dreaded. Lord Cornwallis was vicerey, and he ordered a series of forts to be built wherever there might be a fear of the French landing. It was necessary to select some plan of construction, and it was thought desirable that the same model should be adopted in all cases. It happened that the duke of Richmond had just returned from the Mediterranean, where he had witnessed the capture of a French town on the shores of Corsica by a well equipped fleet. The cannon were of heavy caliber, but the projectiles could make an impression on a cliff of soft buff of stone, which stood triumphantly constant fire. These were not the days of rifled cannon. The duke made a note of the circumstance, and when a model had to be adopted suggested the fort which had done such service in the siege of Martello. The town seems now to be forgotten, but the name of it in a corrupted form has, at least, got foothold in the English language, and may puzzle an etymologist of the future, as, indeed, the towers themselves—if a few should survive the lapse of centuries—may confound the Pickwicks of a coming day."

THE SICK MAN. He is Probably Not So Bad Off Since England's Queen Courts an Alliance With Him.

Little Alfonso Resigns the Colony of the German Uhlans because William Takes Away Caroline.

Cholera in Spain, Small Pox in Canada, and a Rebel Advance on Demogora, and Other Events.

ENGLAND. COURTING THE SULTAN. LONDON, Aug. 20.—The Standard's Berlin correspondent says: "An eminent Turkish diplomatist declares that the sultan and the grand vizier oppose an alliance of Turkey with England against Russia."

THE STANDARD URGES THE GREAT IMPORTANCE of securing an alliance between England and Turkey. It expresses a hope that Sir H. Drummond Wolf will be successful in securing the desired alliance.

ROYAL TRAVELERS. LONDON, Aug. 20.—Queen Victoria and the prince of Wales will start for Norway on one of the royal yachts to-morrow. The princess of Wales and her daughters have gone to Yeadon to visit the duke of Cumberland.

THE PARCELLETTES. LONDON, Aug. 20.—Parnell has summoned the members of the Irish parliament party to meet here on the 23rd inst. The object of the meeting is to consider what plans shall be adopted to advance the cause of the party in the approaching electoral campaign.

PERSECUTED MR. PEACE. LONDON, Aug. 20.—The London newspapers generally denounce the Pall Mall Gazette for refusing to publish the letter of Miss A. M. Francis, exhorting Mr. Peace from the charge of having enticed her from her home, as recently published in the Gazette. The solicitor for Mr. Peace recently published a letter in which he says that he has been instructed by his client to refrain from prosecuting the girl's father on the charge of common assault and battery, for the canting he inflicted on Mr. Peace the other day, on the alleged ground of his betrayal, and of his cruelty to the young lady, because of the trivial penalty that would attend conviction, but to prosecute him on a far graver charge. The solicitor asks the public to suspend judgment on the case until the merits are developed by the courts.

WHO IS HE? BOMBAY, India, Aug. 20.—The supposed priest, "Father Kanovics" by name, who was arrested at Cochín, on the Malabar coast, on suspicion of being a spy, has been sentenced to six months' imprisonment. During his examination he admitted having been in Egypt, and acquainted with Oliver Pain, but refused to answer further questions. Several witnesses have left here for Cochín to try to identify him. ROCHEFORT'S ANTIQUES. PARIS, Aug. 20.—The Intransigent, Rochefort's paper, states that England has instructed Lord Lyons, British ambassador to France, to complain to M. De Freycinet, minister of foreign affairs, of Rochefort's attempts to incite the Parisians against Lord Lyons.

THE LABOR PROBLEM.

The Knights of Labor Denounce the Wash Officials and Order a General Strike on that Road.

One Hundred and Fifty Men and Boys at the Michigan Bolt and Nut Works Stop Work.

At Memphis, Tenn., the Street Car Drivers Struck Yesterday, to the Detriment of the Public.

KNIGHTS OF LABOR. A GENERAL STRIKE. ST. LOUIS, Aug. 18.—A meeting of the executive board of the Knights of Labor, and of the committees representing the employees of the Washash system, was held this morning. A body of resolutions was adopted denouncing the Washash officials for trying to break up the Knights of Labor, and for causing the arrest of its members by United States marshals, like common felons. The committees are awaiting information from branch organizations of Knights of Labor throughout the west before resorting to extreme measures.

A. M. G.—A general strike has just been ordered on all lines west of the Mississippi river.

AT DECATUR. DECATUR, Ill., Aug. 18.—The Washash strike was inaugurated here at noon to-day; less than ten men quit work out of 300 employed, which is explained by the fact that nearly 80 knights quit work two months ago, and have remained idle ever since.

AT TOLEDO. TOLEDO, O., Aug. 18.—The command sent by the Knights of Labor executive committee, at St. Louis, yesterday, ordering a general strike along the line of the Washash, had little effect here. Only about one-sixth of the employees at the shops and yards here are members of the order, and they are too much in the minority to avail anything in a strike. At the noon hour, the time set for the strike, all was quiet, and all re-commenced work at 1 o'clock. No general strike is expected here.

AT CHICAGO. CHICAGO, Aug. 18.—It is claimed that the strike ordered by the Knights of Labor on the Washash road here will have little effect on the working of the road here. The engineers, firemen and brakemen belong to unions of their own, and it was thought that the order would not affect, to exceed, ten men in the shops and yards here.

AT KANSAS CITY. KANSAS CITY, Mo., Aug. 18.—The Washash men employed here remained at work to-day.

AT FORT WAYNE. FT. WAYNE, Aug. 18.—The looked for strike on the Washash shop men, at this point to-day, failed to materialize.

AT CLEVELAND. CLEVELAND, O., Aug. 18.—The coal miners of the Massillon district of the Tuscarawas valley have been called to meet at Massillon, Ohio, to-day, at which the object of the meeting is to reconsider the action of two weeks ago, when the miners voted to strike against the proposed reduction of 15 cents per ton.

AT ST. LOUIS. ST. LOUIS, Aug. 18.—The Washash road has only two very small repair shops, and a small road house here, employing all told perhaps fifty men. It therefore cuts but a slight figure in the strike, and all men remained at work to-day, and there is not likely to be any trouble at this point.

ST. LOUIS, Aug. 20.—There are no new developments in the impending strike of the knights of labor to-day. All authentic cases of knights discharged for obeying the general order affecting the handling of Washash cars will be reported to the southwestern committee, who will keep them on file, and consider them at such time which they think fit. All branches have received a first general order, but a strike is not likely to be ordered for several more days. Locally there have been no refusals to work this morning, so far as is now known.

Justifiable Strike at Detroit. DETROIT, Aug. 18.—Two weeks ago the Michigan Bolt and Nut works announced a 10 per cent. reduction in wages, to take effect August 15th. The notice was received with consternation by the employees, the most skillful of whom received only \$1.75 per day, and the majority less than \$1.00 per day. There being no organization among them, protests were being acted on. Last Friday night a meeting was held at which a committee was appointed to carry the case to the superintendent. The committee stated their case and were promptly discharged. Thereupon the men and boys, to the number of 150, quit work, demanding the re-instatement of their committee, and the payment of former wages.

Street Car Drivers' Strike. MEMPHIS, Tenn., Aug. 18.—The drivers on the several lines of the Memphis Street Railroad company struck this morning, and travel has been greatly interrupted. At 1:30 P. M.—At this hour the cars on the several lines are running with some regularity, being moved by new drivers, who are protected by the police. The committee of conference appointed at the meeting of the drivers to report to the officers of the company, reported to-night that the officers of the company wished to treat with them. The cars were running during the morning by raw hands, but at 8 o'clock to-night were all withdrawn. Everything is quiet and the strikers hope to carry their point by peaceful means.

Will Stand by the Scale. CLEVELAND, O., Aug. 20.—The strikers at the Cleveland rolling mills held a secret meeting last night, and by a vote of 1,000 to 41 decided to stand out for the scale of wages as fixed by the Amalgamated association.

The Dangerous Weed. CHICAGO, Aug. 20.—Henry and George Fleychman, two brothers, aged nineteen and twenty-two respectively, who have been carrying on a commission business on South Canal street, showed symptoms of insanity some weeks ago, Henry's symptoms manifesting themselves in his disposition to fling flat irons at people. Both were melancholy and could not sleep. The county physician thought their derangement was owing to their excessive use of tobacco.

He Sleeps the Eternal Sleep. MONTREAL, Aug. 20.—A fire broke out this morning in the Bell Telephone company's works. The flames worked up through the premises of the bank note company, causing a damage estimated at \$80,000, which is fully insured. A watchman named Brady, in the bank note company's premises, had fallen asleep, and was smothered.

THE OBJECTIONS TO KELLEY.

The Friendly Relations Between Austria and Italy the Reason for His Rejection.

The Washington correspondent of the Adviser sends to that paper the following statement of the reasons that have induced Austria to decline to receive Mr. Kelley as representative of the United States at the Austrian court:

"The inside story of the Kelley affair has at last become known, and in so

FRIENDSHIP'S FAVORS

Ex-Superintendent D. McCool, of the D. M. & N. Road, is handsomely remembered by His Late Associates and Employees.

Wednesday evening, between half-past seven and eight o'clock, a very pleasant incident occurred at the office of the general superintendent of the Detroit, Mackinac & Marquette railway company.

As the events of the occasion demonstrated, the affair was a complete surprise to Mr. McCool. At 7:30 o'clock he was at the residence of Hon. Peter White, when a message was sent to him requesting his immediate presence at the office.

Mr. McCool, the popular sense of regret over your retirement from the position of superintendent and general manager of the D. M. & N. railroad, and your approaching departure from among us, has found manifestation to an extent and in a manner fully erasing the high esteem and affection entertained for you by all of your late employees.

Mr. McCool, the popular sense of regret over your retirement from the position of superintendent and general manager of the D. M. & N. railroad, and your approaching departure from among us, has found manifestation to an extent and in a manner fully erasing the high esteem and affection entertained for you by all of your late employees.

Mr. McCool, the popular sense of regret over your retirement from the position of superintendent and general manager of the D. M. & N. railroad, and your approaching departure from among us, has found manifestation to an extent and in a manner fully erasing the high esteem and affection entertained for you by all of your late employees.

C. H. WATSON, W. J. TENCH, E. W. ALLEN, J. B. WILSON, S. B. FLOETER, FRANK BECHRELY.

Mr. McCool was visibly moved by the unexpected demonstration, and frankly stated that it would be impossible for him to express his gratitude under such circumstances.

The watch which was presented to Mr. McCool is a very valuable one, having a very heavy, 18 carat, open-face case, with the monogram "D. M." on the back.

The game between the Negaunee and Marquette base ball clubs, at the driving park Sunday afternoon, had the merit of being a close one, and, notwithstanding the size of the score—eighteen to seventeen—there was some very good playing by both clubs.

The game between the Negaunee and Marquette base ball clubs, at the driving park Sunday afternoon, had the merit of being a close one, and, notwithstanding the size of the score—eighteen to seventeen—there was some very good playing by both clubs.

Rank and File.

As the MINING JOURNAL has heretofore stated, the Albert Jackson post, G. A. R., will present the thrilling military drama, entitled "Rank and File, or An American Soldier," at the Casino Rink, on Wednesday, Thursday, Friday and Saturday evenings of the first week in September.

As the presentation of "Rank and File" in Marquette, is to be for the benefit of the veteran organization of the city, it may be confidently predicted that our citizens will take a lively interest in the matter, and liberally patronize the performance when it comes off.

This drama has been presented at all the leading points in Wisconsin, and at many places in this state, under the management of Col. E. H. Lansing, under whose personal supervision it will be put on the stage here.

The piece was not only rendered at Hancock for several evenings, but also at Lake Linden, Calumet and Houghton, and at each place gave good satisfaction.

Referring to Mr. Bartlett's performance in this play, the Detroit Free Press says: "The well known and popular comedian, Owen Bartlett, takes the part of 'Skid,' the contraband, whose comical situations, character songs and stage business generally, make him the leading character.

A DOUBLE-HEADER.

A Big Excursion Sunday from the Copper Country and One from the Straits of Mackinac.

Neither the people of Marquette, the railroad companies nor the fifteen hundred excursionists, who came from all directions of the compass to visit the upper peninsula metropolis, were disappointed last Sunday.

The Houghton train arrived at noon, and the numerous coaches were crowded to overflowing with people from all along the line, nearly a thousand alighting when the train arrived.

The train from St. Ignace arrived at 2:30 o'clock in the afternoon, and deposited somewhere in the neighborhood of five hundred excursionists.

The two bands from "outside," together with the Chequamegon, a portion of the time, so filled the ambient air with mellifluous symphonies that one might imagine—if his imagination were vivid enough—that he had been suddenly transported to some musical clysium, where to dwell were bliss.

There was no special program arranged for the day here, and consequently the visitors devoted the time to sight-seeing and calling upon friends and acquaintances. The order maintained was most excellent, notwithstanding the fact that the refreshing extract of malt flowed like water, down many throats, during the day.

The Houghton train departed at 4:30, and the St. Ignace train at 7 o'clock in the evening, expressions of satisfaction over the pleasure and complete success of both excursions being heard on all sides.

Polo Game Off.

Manager Stevens informs the MINING JOURNAL that he has been unable to complete arrangements for the polo game between the Negaunee and Marquette skaters, at the Casino rink, next Wednesday night.

A NEW DEPARTURE.

Marquette Postoffice to be a Special, or Immediate Delivery Office.

Marquette is one of the postoffices in this state which has been selected, by the postmaster-general, where, on and after the first of next October, messenger boys will deliver immediately letters bearing a special ten cent stamp.

The new special delivery stamps, which are to be sold in any required amount, and to any person who may apply for them, but they can be used only for the purpose of securing the immediate delivery of letters addressed to and received in the mails at any of the offices designated as special delivery offices.

Under no circumstances are they to be used in the payment of postage of any description, or of the registry fee, nor can any other stamps be employed to secure special delivery, except the special delivery stamps.

Postmasters will be required also to employ a requisite number of messenger boys to ensure prompt delivery, the compensation paid in no case to exceed thirty dollars per month.

Postmasters will be required also to employ a requisite number of messenger boys to ensure prompt delivery, the compensation paid in no case to exceed thirty dollars per month.

As was stated in the last issue of the MINING JOURNAL, it was paid a very pleasant visit by Mr. Charles Adams, of Rochester, Oakland county, this state, who, accompanied by his wife, is the guest of his daughter and son-in-law, Mrs. and Mr. Sydney Adams.

Mr. Adams is an enthusiastic admirer of Marquette, which he had not visited before in ten years. He observes a great improvement in the city since then. He is especially struck with the excellent health of the community, and says that people not familiar with this Lake Superior region have no idea of the splendidly exhilarating and health-producing properties of its climate.

Mr. Adams will remain in the city until the latter part of the week, and the MINING JOURNAL is assured that he will carry with him, where he goes, a good report, as may be judged from the above, of the upper peninsula metropolis.

Round Trip Tickets. Round trip tickets will be sold to Marquette from Michigan and intermediate stations, to-day, for trains No. 4 and 2, at half rates.

Resolution of Thanks. ALBERT JACKSON POST, No. 200, DEPT OF MICH., G. A. R., MARQUETTE, AUG. 17, 1885.

At the regular meeting of this post, held at the date above mentioned, the following resolutions were unanimously adopted by a rising vote:

Resolved, That the heartfelt thanks of this post are hereby extended to the citizens of Marquette, generally; to the Rev. Dr. Bonar for the opening prayer; to the orator of the day, Hon. E. O. Clark; to the Rev. J. P. Varney for the benediction; and to the More House company, the Marquette Chassours, the Marquette and Tontono lodges and North Star camp, I. O. O. F., the St. Jean de Baptiste, German Aid, and Scandia societies, who joined with us in honoring the memory of the great citizen-soldier also.

Public Health.

Marquette has the general appearance of being in an excellent sanitary condition, but it will not be out of place for the MINING JOURNAL to admonish citizens to be watchful in this regard.

In a circular just issued, Henry B. Baker, secretary of the state's board of health, says that "sanitary authorities have claimed," "that the sanitary work which they have recommended to be done as a preparation for cholera—such as preventing and abating nuisances, attending to drains, sewers, privies and cesspools; cleaning up generally, and unusual carefulness in regard to foods and drinks—would reduce the sickness and deaths from other diseases, even if cholera did not come.

Observations in Michigan for many years have shown that in July the meteorological conditions especially unfavorable to health are, high temperature, excessive humidity of the atmosphere, and deficiency of ozone.

It remains to be seen to what extent efforts for the seclusion of cholera from this country, and the general preparation for cholera by boards of health and the people shall prove effectual; but even if cholera shall not be entirely prevented, there will remain the belief that the measures which have so greatly decreased the sickness from other diseases cannot but have had their influence in decreasing it, and if cholera does not occur in this country it is seen quite probable that, by reason of the suffering elsewhere, there may be as many cases of serious sickness prevented in this country as there have been cases of cholera in Europe.

There were filed in the secretary of state's office, at Lansing, the other day, articles of incorporation for the Canada, LaCrosse & Southwestern railway company, principal office at LaCrosse, Wis.; capital stock, \$42,700,000, formed by the consolidation of the Canada, LaCrosse & Southwestern railway company and the Sault Ste. Marie & Southwestern railway company.

Another Excursion Over the Marquette, Houghton & Ontonagon Road.

On August 30th there will be a grand picnic and musical festival at Michiganville, and arrangements have been made by which the M. H. & O. company will run excursion trains to Michiganville.

One of the attractions at Michiganville that day will be the return match game of base ball, between the Negaunee and Marquette clubs. The citizens of that place are also arranging for other entertainments, which will be announced in due time.

Of Interest to Teachers. Miss Mollie Covert, local committee, notices the MINING JOURNAL to give notice that teachers attending the institute, at Negaunee, will be furnished with accommodations at the Breithung House at half price, namely: one dollar per day.

Excursion on the Lake Sunday. The new and elegant steamer Minnie M., under the management of Mr. R. J. Cooke, of Sault Ste. Marie, will make an excursion trip to-morrow from Cheboygan, Mackinac City, Mackinac Island, St. Ignace and Sault Ste. Marie to Marquette, arriving here at 7 o'clock Sunday morning.

On the return trip to the straits, parties wishing to go down will be carried to the "Soo" for \$2, and to Cheboygan, Mackinac City, Mackinac Island and St. Ignace for \$4.

TEST YOUR BAKING POWDER TO-DAY!

Brands advertised as absolutely pure CONTAIN AMMONIA.

THE TEST: Place a can top down in a hot stove until heated, then remove the cover and smell. A chemist will not be required to detect the presence of ammonia.

DOES NOT CONTAIN AMMONIA. ITS HEALTHFULNESS HAS NEVER BEEN QUESTIONED. IN A MILLION HOMES FOR A QUARTER OF A CENTURY IT HAS BEEN THE CONSUMER'S RELIABLE TEST.
