market, but they didn't. Things are not the Vandergrift and other mills who quite well. working as he anticipated, and the strike have declared against the strike and reis already regarded as a failure. Presi- iterated their preference for the nondent Shaffer underrated the staying powers of the Steel Corporation when he scale for these thousands, as party of The Mining Journal is located in Room excellent habits and highly esteemed by pitted his association against it, wherein the second part, as the American Sheet he made a mistake that will cost the Steel Co, would have been in demanding Amalgamated and its membership dearly that Mr. Shaffer treat with it as the in prestige and wages lost, while the representative of Zug & Co., or any other to call. Telephone No. 376. prospect now is that the Steel Corporation will be immensely strengthened by laration at Vandergift, Mr. Shaffer's its final result.

Admiral Cervera was tried by his government because his fleet was destroyed it Santiago, and now we are going to

have a court of inquiry into the conduct of the American naval commander who o pieces. All of which goes to show the union, why should not the camhat rank and success give no security gainst trouble in the naval service. A istorical story in point is that related f a French admiral who was taken prisner by the British during the Napolenie wars. After a time an arrangenent for his exchange was made, and his captors, with whom he had become exceedingly popular, congratulated the Frenchman on the prospect of his early estoration to liberty and his own country. He listened without manifesting nuch enthusiasm, and then remarked that he knew what his fate would be when he got back to France-he would be tried for having surrendered his ship with the certainty of being convicted just dealing or power to enforce a prinwhimsical grimace and a shrug of the houlders, after musing a moment, "ze irst consul will soon have no admirals eft, for zose zat fight you shoot and ise zat don't he shoots." There is a ioral in this for those who have a de-

ire to win fame in ocean fighting. It a risky business at best, and after a an gains reputation in it he may los t by an indiscretion, as Dewey did, or ave it tarnished by envious assaults, happened in Schley's case.

THE AMALGAMATED'S DEMANDS.

That there is still a great deal of misiderstanding of the grounds on which the strike of the Amalgamated association was ordered is manifest' from the nature of the arguments submitted in ts support by some of the newspapers. These papers assume that the U.S. Steel Corporation became involved in the rouble through an attempt made by its nanagers to limit the scope and curtail he power of that association. This is ov no means the case. The strike was rdered because the association insisted in the claimed right to unionize nonmion mills, seeking to accomplish this

inion scale. The Steel Corporation de- Agent, Houghton.

union regime at those mills? Mr. Shaffer was as preposterous in asking to sign a ndependent mill, in fixing up a scale for such mill. Yet in the face of this decclaim that he represented all the employes of the company stands unre-I tracted.

To call from their work the number o nen involved in this strike is to assume grave responsibility. If Mr. Shaffer and his associates have made the progress they seem to have made in getting as mainly instrumental in pounding it the employes of the three companies into paign go on as it has, on the express for all mills that have been brought unler union control? Is not the real reason that the Amalgamated associa on officials believe that some mills must e forcibly unionized if at all? Was it not the expectation that a raid on the stock of the billion dollar corporation would bring pressure from stockholders nd compel officers of that company to yield to policy and abandon principle' From the very start, it appears, the Amalgamated association planned a resort to coercion. As the appeal is to force, it will doubtless be met with force. Having set out to compel the Steel corporation to do what the latter could not do without abdicating all claim to and shot. "By Gar," he continued, with ciple, the Amalgamated association must expect to abide by the result. The association will not come out of the contest as it went in. It will be vastly stronger or it will be well-nigh shorn of power. Unfortunately, weeks will pass before the strike leaders will find out which it will be.

SHE DIDN'T WEAR A MASK.

diseases of like character are classed as skin diseases, when they could just as properly be called blood diseases, for they undoubtedly originate in the blood, like Cancer, Catarrh, Scrofula, Rheumatism, Contagious Blood Poison, etc.; the only real difference being in the intensity and nature of the poison. The more serious diseases, Cancer, Catarrh, etc., are caused by some specific poison or virus, which is either inherited or in other ways gets into the blood and attacks certain vital organs or appears in the form of terrible sores and ulcers, while the milder and best descent as the diseases are caused by blood humors or an over acid condition less dangerous skin diseases are caused by blood humors or an over acid condition of that fluid. These acid poisons, as they ooze out through the pores of the skin, cause great irritation, with intense itching and burning. The eruption may be of a pustular kind, with excessive discharge of thick, gummy fluid, or the skin may be hot, dry and feverish, swollen and fissured. Skin diseases, whether they appear as sores, blotches or pimples,

I can cheerfully and most sincerely endorse your specific as a cure for Eczema, the most irritating and annoying disease, I think, that flesh is heir to. I was troubled with it for twenty-five years, and tried many remedies with no good effect. After using your medicine a short time I think I am entirely relieved. You can give this statement any publicity you may desire, as it is voluntarily made, more for those afflicted than notoriety for myself. Very respectfully, WM. CAMPBELL, 318 West Central. Wichita, Kans.

racing pro a couple of good crowds at the matinees today and tomorrow, they will be considerable losers on account of their endeavors to give Marquette some good, clean sport.

It is said, and it is easily believed, that never in the history of the city has the sporting fraternity had such ill luck in its efforts to enliven things as during the past few days. Yesterday was the fifth consecutive day of unfavorable weather and what makes it harder is the fact that previous to Wednesday, the day on which the first matinee joyed over two solid weeks of weather unmarred by rainfall.

Someone has suggested that the promoters take their string of horses and tour the scorching corn belt, saying that benefit of his fellow sufferers, that he such a proceeding would be much more efficacious in procuring rain than twice the number of prayers which has ascended during the past few weeks.

Notwithstanding their ill luck and their already considerable loss, the horsemen continue game and will proceed with their program today and tomorrow, hoping it is time for a change of fortune, and they are hardly apprehensive of track and will offer reduced rates for P. Ry. the up-the-road people who will witness the sport.

CAPTAIN WALFRED BEEN.

Interesting Sketch of a Pioneer of the Upper Peninsula.

The following sketch of the venerable Captain Alfred Been of Skanee, one of the pioneers of the upper peninsula, published in conjunction with a picture of the old gentleman, is from the Detroit News-Tribune of recent date:

"Captain Walfred Been, who owns considerable land out at Skance, on the shores of Huron Bay, who has the blood of the Swedish nobility flowing in his veins, and who spent years sailing on the Atlantic, and later on the great lakes, and who is now one of the promior more families, all Swedish, whom he from \$3,00 per day, upwards, and what induced to settle upon homesteads in the you get at either house is easily worth vicinity of Skanee, and Been is a little king among them. He has immense or-"George W. Hibba township a great many years, is also postmaster, and has held about every patrons. He has put into effect out of other office which Skanee affords. The Marquette, a card of rates to fishing captain is now well along in years, but he tells some interesting stories of the carly days of his life on the lakes. He was born in Helsingborg, Sweden, and studied medicine until he was twenty. Then he went to sea during the summers and studied navigation in the winter. He sailed in '46 for New York, and deserted the ship there, afterward spending five years on American vessels, coming to the lakes in 1852. He sailed the lakes for five years until he lost his vessel, the Java, on Lake Erie.

"As early as 1857 he came to fish in the natural scenery at Huron Bay, and Drug Co.
