

Rheumatism

Rheumatic pains are the cries of protest and distress from the muscles, aching joints and excited nerves. The blood has been poisoned by the accumulation of waste matter in the system, and can no longer supply the pure and health sustaining food they require. The whole system feels the effect of this acid poison, and not until the blood has been purified and brought back to a healthy condition will the aches and pains cease.

Miss. James Keel, of 707 Ninth street, N. E., Washington, D. C., writes as follows: "A few months ago I had an attack of Sciatic Rheumatism in its worst form. The pain was so intense that I had to lie in bed, and became completely paralyzed. The attack was a most unusual one, and my condition was regarded as being very dangerous. I was advised by one of the best able doctors in Washington who is also a member of the faculty of a leading medical college here, to continue his prescriptions and I would not get well. After having filled twelve boxes without receiving the slightest benefit, I decided to continue his treatment any longer. Having had of S. S. S. (Swift's Specific) I decided to give it a trial, and after I had taken a few bottles I was able to hobble around on crutches, and very soon thereafter had no more pain. My appetite has returned, and I am happy to be again restored to perfect health."

SSS the great vegetable purifier and tonic, is the most complete and interesting book of the kind in existence. It will be sent free to any one desiring it. Write our physicians fully and freely about your case. We make no charge for medical advice.

in the postoffice at Marquette, Mich.

After all, oratory counts with the people, and Stearns isn't much of a speech-maker. Bliss has an advantage in that respect which the Stearns following shouldn't make the mistake of under-estimating.

According to Judge-Advocate-General Lemly and Solicitor Hanna, who represented the navy department in the Shelby court of inquiry case, the admiral didn't count for much in the fight at Santiago. But Admiral Cervera of the Spanish fleet thinks differently, and he was there.

"The two factions of the Republican party in Wisconsin cannot swallow each other without subsequent dyspepsia," remarks the Milwaukee Journal. But we presume one of them could swallow the other without danger of unpleasant results. There would seem to be a physical, or political, difficulty about having them "swallow each other."

On Monday Representative Babcock of Wisconsin tried to get a favorable report from the Ways and Means committee of the house on his bill amending the iron and steel schedules by placing several articles on the free list and considerably reducing the duty on others, but failed, although all the Democrats on the committee voted with him. The only Republican member besides the author of the bill who voted in its favor was Tawney of Minnesota. Babcock got action—but not of the kind he desired—on his bill by springing it as an amendment to the war tax reduction bill which the committee had under consideration, offering his measure as a substitute for the tea tax paragraph of the war reduction bill. He chose his time shrewdly, as there were several members of the committee absent, but his ruse failed to get his bill before the house with the advantage of a favorable report, and it is said that he was greatly disappointed thereat.

Senator Stewart of Nevada gave notice in the senate the other day of his intention to offer as an amendment to the bill increasing the salaries of federal judges a resolution providing for an increase of the salaries of senators and representatives to \$7,500 annually. His proposal to have the salaries of members of congress raised fifty per cent did not appear to meet the approval of his colleagues, probably because most of these are fearful of the effect it would have in raising a "salary grab" howl. And yet the increase would not make them any too high. What we want is a better class of men in congress and to get them we must pay better salaries. It is well known that the salary of \$5,000 a year hardly enables a member of congress to live as he should in Washington. Surely a country as rich as ours can afford to pay fair salaries to men who are entrusted with the responsible work of making its laws. The increase is called for and should be made, and if it should be we believe the people would approve it.

If fashionable women would take to heart what Bishop Potter said in a recently delivered lecture about some of their fads, the wearing of pearls and other costly adornments for the winning of which men wear out or risk their lives would go out of fashion. Taking the ground that the production of certain things should not be encouraged by their use, the learned divine said:

Let us take as an example a string of costly pearls encircling a woman's neck. If they formed a remedy for some malignant disease, or if they could be classed as a benefit to mankind, their purchase would be justifiable; but their use as a personal adornment, which art could reproduce without danger, ought to make their brazen wearer, flaunting gems stained with a life's blood, at least a little ashamed of herself at times. And there is a whole group of manufacturers deadly to its producers. At a social gathering one woman asked another how the hostess looked. "As if she were emerald with diamonds," was the answer. "How coarse," said the first speaker. "How wanton would be better," was the retort. A favorite argument against giving better pay to the workman is that he is extravagant and spends what he earns for foolish things. How is it with you? Look at the modern American home! It is overcrowded with evidences of price and display. At every turn we are greeted by the stench of cost without a redeeming note of refinement or beauty.

There is a good deal of truth in this. Does the fashionable woman who adorns herself with a string of pearls ever stop to consider that by making these so much sought after for purposes of personal adornment she and her kind condemn many to a calling which shortens their lives? And it is true, also, that the ostentatious display of wealth in the furnishing of their homes by those to whom the cost is no hardship dooms many a family of the less well-to-do to disaster through the foolish emulation of a senseless extravagance. Our people might live nobler and better lives if they would but live more simply and not pay such unceasing homage at the altar of fashion.

ROOSEVELT'S STRENGTH.
President Roosevelt has been criticized for impetuosity, for brusqueness of manner, for bluntness of speech, and for a tendency to allow his peculiar personality to manifest itself rather too much in his method of disposing of grave public questions. He may be open to criticism on any or all of these counts. But there is one charge that has not been even whispered against him. No word has been uttered even by those who do not agree with him intimating a doubt of his honesty and sincerity.

A Washington letter in which it is stated that the president is gradually building up a powerful following in his party with a view to securing the nomination in 1904, and that he is doing this with a skill and tact proving him to be anything but a "bungler in politics," asserts that his predilection for "clean politics" may make him so strong with the people that he will be out of reach of the politicians by the time the next national convention of the party is called. No better fortune than this could come to the Republican party. With a candidate nominated through the mere force of his strength with the mass of the voters because of their confidence in his honesty of purpose and desire to have only clean methods employed in politics, the party would be simply invincible in the next campaign, and would achieve a sweeping victory.

So far President Roosevelt has made no serious mistakes. He has kept his promise to continue the policy of his predecessor so far as changing conditions permitted. He has shown a willingness to counsel with and be influenced by the advice of leaders of his party of recognized sagacity and probity, while standing out determinedly against the politicians who live by trading on their influence at Washington. At times he may have shown temper, but only when stirred to indignation by offenses on the part of officials who they are clothed serve as a shelter to their audacity or dishonesty. On the whole he has borne himself manfully and well in the high office to which he was unexpectedly called, and if he keeps growing in popular esteem as he has since he became the nation's chief executive the hostility of the few machine politicians whose schemes he has balked through his honest desire to worthily discharge the trust confided to him will not avail against his strength with the people to prevent him from being chosen to succeed himself.

AN EXCELLENT SUGGESTION.
The Diamond Drill of Crystal Falls, in commenting on the action taken by Judge Stone at Escanaba to restrain the vicious element there, as well as generally throughout Delta county, makes a timely and commendable suggestion to its own people, which it would be well for them to act on without delay. Its article on the subject is here reproduced:

The position taken by Judge Stone in connection with the immorality and saloon violation of the law in the city of Escanaba is meeting with the general approval of the law abiding element of the counties in which the judge holds his court. Judge Stone is no crank. He is not inclined to interfere with anyone so long as he is decent, and obeys the laws which the people of the great state of Michigan have enacted for the safeguarding of its citizens. In his position as circuit judge he is called upon to mete out punishment to those who break the law. It is but natural that with so many examples brought to his notice the judge should give some attention to the formative influences that are responsible for the evils. Seed planted in stony soil can scarcely be expected to bring forth strong, healthy plants. Young men and women cast a glance at the fathers and mothers, and unpeppable can scarcely be expected to grow to be good and moral citizens. Man is the product of his environments and if the boys and girls are to be brought up to be good and useful citizens it is necessary that the men and women, the fathers and mothers, of these boys and girls, should see to it that their environments are such as will throw about them the proper atmosphere. If, as frequently happens, these fathers and mothers are derelict or negligent in doing their duty, the presence in position of such men as Judge Stone is a Godsend. He is the agency through which the dormant moral force of the community is brought to a realization of its duty.

Iron county is a part and parcel of Judge Stone's circuit. What of our condition? Are we to put the requirements of the law at naught?

FLUCTUATIONS IN LAKE LEVELS.
The fluctuations in the levels of the great lakes have been the subject of discussion and speculation among lake navigators ever since the first vessel unexpectedly touched bottom in the connecting channels. With the deepening of the channels the fluctuations became a matter of serious concern to engineers engaged in planning or executing these improvements to navigation and they have been closely studied by the United States corps of engineers in connection with the lake survey.

Some days ago a statement was sent out, on the authority of one of these engineers, that the level of Lake Erie has been falling for four years. This was construed in some quarters as an evidence that the deepening of the channels connecting the lakes has resulted in lowering the general level of the lakes. Against that may be placed the explanation that the level of the lake bringing the water of the other lakes into Lake Erie have been deepened within a few years, the outlet from that lake has been unchanged for many years, hence the lowering of the level on that particular lake can hardly be accounted for in this way.

The publication of the dispatch brought out a letter from John E. Russell, who was secretary of the deep waterways commission that made careful investigation of lake fluctuations from the earliest known testimony. Mr. Russell says the conclusion reached was that there had been great changes, with some appearance of periodicity, but that it did not seem to be due to changes in precipitation or inhibition of the watershed, with consequent reduction of forest area. The first half of the last century had greater extremes of high and low water than the second half, in the region of the three upper lakes, and a very different appearance in the lower lakes and the St. Lawrence. From 1815 to 1830 there was lower water in all the lakes than during the period now passing, except in Champlain, which has had its highest and lowest water within the past thirty years. Very little difference appears in all the lakes the same time. They do not co-operate in low and high waters, but levels are equalized. The conclusion of the commission was that no effects on levels have appeared from the progressive deepening of the channels between the lakes.

A supplement to the Marine Review of last week contains a chart of the fluctuations in the levels of the five great lakes from 1860 to 1901, both inclusive, compiled by Major W. L. Fisk, engineer in charge, from the official records of the United States lake survey. It bears out in a general way the statement of Mr. Russell. The first fluctuation that attracts attention is the comparative stability of the level of Lake Superior. The fluctuations, with two or three exceptions, were less marked than on the other lakes and the periods between extreme points were longer. While the fluctuations in the other lakes were lower than in the two preceding years, the high water mark in the three years was above that of all but three years of the preceding thirty-nine, though when the level was abnormally high to be followed in 1871 by remarkably low water—and 1876. Lake Michigan shows on the chart alternating periods of years of decreasing and years of increasing water. The last high period was 1866-66, since which there has been a general decline, with partial rallies until 1897, when there was a slight recovery and but little variation of the mean level since. The movements in Lake Huron followed very generally those in Lake Michigan, the tracings on the chart showing a remarkable similarity. While the general trend in Lake Erie has been similar to that of Lakes Michigan and Huron the fluctuations of level in that lake of 1901 is the lowest recorded in the forty-two years except in 1896, though but a trifle lower than the record of 1896, and the low water mark was lower than that of any year except in 1896-6.

The last five years the records of levels in Lakes Michigan, Huron, Erie and Ontario show a general correspondence, except that in 1901 Lake Erie fell from the preceding year while the others showed a slight tendency upward.

Possibly a partial explanation of the comparative stability of level in Lake Superior and of the excessive fluctuations in Lake Erie may be found in the great depth of the former and the shallowness of the latter.—Cleveland Plain Dealer.

Difficult Digestion
That is dyspepsia. It makes life miserable. Its sufferers eat not because they want to—but simply because they MUST.

They complain of a bad taste in the mouth, a tenderness at the pits in the stomach, a feeling of puffiness, headache, heartburn and what not.

Hood's Sarsaparilla cured Joseph P. Laine, "lanagan, Ky., who writes: "I was troubled with dyspepsia for a number of years and took medicine that did me no good. I was advised by friends to try Hood's Sarsaparilla which I did and it put my bowels in perfect condition, gave me strength and energy and made me feel like a new person."

Hood's Sarsaparilla promises to cure and keeps the promise. Beware of substitutes. Buy Hood's and only Hood's.

FLUCTUATIONS IN LAKE LEVELS.
The fluctuations in the levels of the great lakes have been the subject of discussion and speculation among lake navigators ever since the first vessel unexpectedly touched bottom in the connecting channels. With the deepening of the channels the fluctuations became a matter of serious concern to engineers engaged in planning or executing these improvements to navigation and they have been closely studied by the United States corps of engineers in connection with the lake survey.

Some days ago a statement was sent out, on the authority of one of these engineers, that the level of Lake Erie has been falling for four years. This was construed in some quarters as an evidence that the deepening of the channels connecting the lakes has resulted in lowering the general level of the lakes. Against that may be placed the explanation that the level of the lake bringing the water of the other lakes into Lake Erie have been deepened within a few years, the outlet from that lake has been unchanged for many years, hence the lowering of the level on that particular lake can hardly be accounted for in this way.

The publication of the dispatch brought out a letter from John E. Russell, who was secretary of the deep waterways commission that made careful investigation of lake fluctuations from the earliest known testimony. Mr. Russell says the conclusion reached was that there had been great changes, with some appearance of periodicity, but that it did not seem to be due to changes in precipitation or inhibition of the watershed, with consequent reduction of forest area. The first half of the last century had greater extremes of high and low water than the second half, in the region of the three upper lakes, and a very different appearance in the lower lakes and the St. Lawrence. From 1815 to 1830 there was lower water in all the lakes than during the period now passing, except in Champlain, which has had its highest and lowest water within the past thirty years. Possibly a partial explanation of the comparative stability of level in Lake Superior and of the excessive fluctuations in Lake Erie may be found in the great depth of the former and the shallowness of the latter.—Cleveland Plain Dealer.

COPPER COUNTRY NEWS
(Additional.)
RICHER THAN EVER.
Evergreen Lode of the Mass Mine Producing a Great Deal of Silver.

The Evergreen lode of the Mass mine is proving to be a veritable bonanza in the production of silver. Just recently a shipment of 20,000 pounds of the mineral produced from the rock on this lode was sent to the Chicago Copper Refining company for treatment. The returns show that it contained 157.5 ounces per ton of mineral.

This makes the third test made, the other two tests being made from the mineral as it came from the different lodes, and the results obtained are much more gratifying than the officials even anticipated. It means that every ton of mineral produced from this lode is worth nearly \$100 in silver or about five cents per pound. Of course the extra cost of smelting and handling the mineral in order to save the silver will amount to something but it is safe to say that there will still be a profit of at least three cents per pound.

This makes a resource for the mine that was not considered when the property was opened. It has always been known that Evergreen carried considerable silver, but it was commonly supposed that it consisted mainly in what is termed spears, and the miners succeeded in appropriating the most of it for their own use. Last fall the management believing that this silver rightfully belonged to the company took steps which resulted in securing quite a large number of specimens varying in size from the small ones to some that weighed as high as twenty-five or thirty pounds. To be sure these were not solid silver, but mixed with copper. The large amount which was secured led the mine officials to believe that the mineral must also contain some silver. The first test which was made in New York revealed that there was from \$50 to \$65 worth of silver per ton of mineral. The second test which was made in Chicago a couple of months ago and the results obtained were a little better than the first test, while the third test of this last one, which was made with a still larger quantity of mineral produced exclusively from the Evergreen lode plainly shows that there is no question but what the silver will prove to be a source of much revenue for the company.—Ontonagon Herald.

USE OF THE DIAMOND DRILL.
It Has Become So Great That Supply of Diamonds Is Insufficient.

The use of the diamond drill in the Lake Superior copper district is becoming more extensive every year. The diamond drill is of inestimable value in prospecting, owing to its extreme simplicity both in construction and operation, and actual work in this district has demonstrated the fact that it is capable of penetrating ground faster and cheaper than any other method. Results in other mining sections have been satisfactory also, and the use of the diamond drill in all parts of the world has become so large that the supply of both black and white diamonds is insufficient to meet the demand, which, owing to imperfections, is useless as a gem. The present cost of setting a single bit for a drill ranges between \$800 and \$1,500, and as six or eight weeks of constant use will wear out a setting, the cost of drilling is very high per foot.

In the Lake Superior district the whole mineral range is now dotted, here and there, with diamond drills, which are at work punching holes in the strata in the search for paying deposits of copper. The Old Colony, Mayflower, Arcadian, Oneca and Torch Lake companies made use of the diamond drill during the past year and the results at the Old Colony and Mayflower, where the drills are still running, are gratifying. At both of these properties lodes well charged with copper were located, which are now being explored. In the territory about Calumet the mines can be penetrated to a depth of 1,000 feet or more through solid rock and perfect samples of mineral taken out for the entire distance. These samples are not disintegrated fragments of rock, but solid cylinders, showing the stratification and character of the ground explored. South of Portage Lake diamond drill explorations have been extensive, but unfruitful. At the Globe property, next south of the Champion, considerable delay is experienced in passing through the heavy overburden of sand. The same difficulty is encountered on the St. Mary's Canal Mineral Land company's land. Work in the vicinity of the Globe, Wyandotte and Winona is very discouraging. The formation is considerably disturbed and consequently the drill cores are fragmental, requiring great skill and care in reading.

POWER TO FIX RATES

IMPORTANT CHANGE ADVISED IN INTERSTATE COMMERCE LAW.

POOLING IS ALSO UPHELD

SENATOR ELKINS WOULD GIVE COMMISSION GREAT AUTHORITY.

Introduces a Bill Advocating Some Radical Changes—Would Abolish Imprisonment as a Method of Punishing Offenses.

Washington, Feb. 4.—Senator Elkins, chairman of the interstate commerce commission today introduced a bill making a number of changes in the interstate commerce law, the most important of which are:

Giving the commission authority under certain conditions to fix railroad rates, legalizing pooling and abolishing imprisonment as a method of punishing offenses against the law.

Appeal to Courts Authorized. The provision fixing rates authorizes the commission to hear complaints of discrimination made against common carriers, and directs that any definite order made by the commission after such hearing, declaring the rate regulation or practice to be just and reasonable, shall be operative, and be observed by the party or parties against whom it is made, within thirty days after notice.

An appeal is authorized to the United States circuit courts and the supreme courts.

That section of the bill concerning pooling provides that "it shall be lawful for any two or more carriers to make an arrangement between and among themselves for the establishment or maintenance of rates; it shall also be lawful for such carriers to agree by a contract in writing, filed with the interstate commerce commission, upon a division of traffic or earnings, or both."

Authority is given the commission to hear complaints against such pooling and to make an order annulling a contract in respects where it is found unjust and unlawful. Failure to comply with the order will work an annulment of the contract.

May Suspend Movements of Trains. Proceedings by injunction are authorized against any party disobeying the provisions of the bill, and the offending party is also made subject to a penalty of \$10,000.

Where railroads pass into a foreign country authority is given, in addition to fines, to suspend the movement of trains within the United States until the requirement shall be complied with. A fine of not less than \$1,000 nor more than \$20,000 is provided for the willful failure of any carrier to publish tariffs and to file the same as required by the interstate commerce law.

Authority is given the commission to require the publication of traffic rates, and where there is reasonable ground for a belief that freight or passengers are being carried for less than published rates the commission is authorized to issue proceedings in the circuit court of the United States, which court is required to enforce the observance of the published tariffs, the proceedings to be directed not only against the carrier, but also against the other parties interested.

Judge's Salary Bill Passes. After a brief discussion today the senate passed the bill providing for a twenty-five per cent increase in the salaries of United States judges. All the amendments were voted down, including one to increase the salaries of the cabinet officers from \$8,000 to \$12,500.

During the remainder of the day the urgent deficiency appropriation bill was under consideration, the Philippine tariff measure being laid aside temporarily.

Senator Hansbrough of North Dakota made a spirited defense of Judge Arthur H. Noyes, of the district court of Alaska, and Alexander McKenzie, upon whom attacks were made in the senate yesterday.

This precipitated a long discussion of the Noyes case, legal and technical rather than personal. No action could be taken on this subject, but the discussion will be continued tomorrow under the latitude allowed when appropriation bills are pending.

John F. Dryden was sworn in as the successor of the late Senator Sewell of New Jersey.

Delegat Wilcox of Hawaii today introduced a bill increasing the salary of the president of the United States to \$100,000, the vice president \$25,000, cabinet officers \$13,000 each, and members of congress \$10,000 each.

Oleomargarine Bill in House. The debate on the oleomargarine bill continued today in the house and the prospects are that a vote will not be reached earlier than Thursday. The

opponents to the bill are making a strong fight so far as the presentation of the argument is concerned. The speakers today were Messrs. Tompkins of New York, Robb of Missouri, Knapp of New York, Bates of Pennsylvania, Davidson of Wisconsin, Driscoll of New York and Hepburn of Iowa, in favor of the measure, and Coward of Missouri, Lanham of Texas, Grosvenor of Ohio and Kleberg of Texas, against the bill.

Representatives Babcock and Long, of the ways and means committee called on the president today and discussed with him the Cuban reciprocity. It was stated today by a Republican member of the committee that there was little further doubt that the committee would report some measure for Cuban reciprocity. Another member expressed the conviction that the rate of reduction would be about 20 or 25 per cent. Other members of the committee held that the minds of several members are still open and definite conclusions as to the course of the committee are not yet warranted.

GOVERNOR OF PANAMA.

General Salazar, Former Assistant to General Alban, is Elected.

Panama, Colombia, Feb. 4.—General Salazar, who distinguished himself as the assistant of General Alban during the campaign of 1900, has been appointed governor of Panama. He pacified the department of Bolivar, defeating General Uribe-Urbe wherever he met him.

Venezuelan Troops Defeated.

Willemstad, Feb. 4.—It is reported the Venezuelan troops were defeated near Paul. Numerous arrests were made Jan. 27 at Caracas and a Venezuelan gumbao was reached Puerto Cabello, bringing as prisoners two of President Castro's former ministers and eight leading merchants of Caracas. This is looked upon as proof that the government is in fear of more serious complications.

Government General Killed.

Willemstad, Island of Curacao, Feb. 4.—Despatches from Paragana, Venezuela, announce that the insurgents commanded by Sientalca, defeated the government troops under General Tribanaja and the latter was killed.

Revolutionary Steamer Sunk.

Colon, Feb. 4.—It is reported here that the Venezuelan revolutionary steamer Liberator was sunk by a Venezuelan gunboat while under repairs at Porto Colombo.

HUBBARD GOES AFTER MERGER.

Bill Introduced in Iowa Senate Regarding Railroads.

Des Moines, Feb. 4.—Senator Hubbard introduced a bill today providing that Iowa railroads may transact business and may buy, lease, own, control or operate railroads and railroad property outside of the state; also providing that a railroad organized in Iowa, and operating and controlled stock in railroads and railroad property and companies outside of Iowa.

The bill contemplates legalizing the operation of the Wyoming properties by the Burlington railroad of Iowa, and has a direct bearing upon the merger of the Burlington, Northern Pacific and Great Northern companies.

Senator Hubbard expects opposition to the bill on this ground, but believes it will pass the legislature for the reason that the Iowa law already gives Iowa roads authority to own, control and operate railroad property in all other states, and to Iowa, and his measure simply proposes an extension of this right to the operation of roads in states not adjacent to Iowa.

HOAR PROPOSES PEACE.

Presents a Petition for the Suspension of Hostilities in Philippines.

Washington, Feb. 4.—Senator Hoar today presented a petition signed by a number of distinguished citizens for the suspension of hostilities in the Philippines, and asking the opportunity to be given for the discussion of the situation between the government and the Filipino leaders. The following are among the names attached to the petition:

Carl Schurz, George F. Edmunds, Judson Harmon, J. Sterling Morton, George S. Boutwell, Charles Francis Adams, W. D. Howells, Mark Twain, Rev. C. H. Parkhurst, W. Bourke Cockran, Robert Treat Paine, T. K. Boyesen, Bishop Huntington, Bishop Vincent, Anson Phelps Stokes, John Burroughs and William Lloyd Garrison.

Included in the list are the names of thirty-six professors in the Chicago University and a number of other educators.

ELECTIONS IN PHILIPPINES.

Natives, in Most Cases, Are Chosen Governors of Provinces.

Manila, Feb. 4.—Returns indicate the election, in most cases, of natives as governors of the provinces. Captain Bandholz, of the Second infantry, defeated Major Cornelius Gardner, of the Thirtieth infantry, the present governor of Tayabas province.

At Balanga there are only eighty-four voters, but eighty-nine votes were cast and another election was ordered.

A meeting of business men interested in tobacco and sugar, to discuss legislation desired by both industries, urged a reduction of 75 per cent in duties. The speakers said it would mean the instant pacification of Batangas, which is wholly devoted to sugar growing.

RAILROAD CONTRACT LET.

Fort Dodge, Ia., Feb. 4.—The contract for the grading on the Omaha extension of the Chicago Great Western from Harlan to Council Bluffs was let today to Winston Bros. of Minneapolis. This firm also contracted for the grading from Carroll to Harlan and will commence work early in the spring. The grading contract for the entire line from Fort Dodge to Omaha is now let.

The sky looks bluer, the sun shines brighter, a feeling of youth and strength creeps over the soul after taking Rocky Mountain Tea made by the Madison Medicine Co. 35 cts. Stafford Drug Co.

The sky looks bluer, the sun shines brighter, a feeling of youth and strength creeps over the soul after taking Rocky Mountain Tea made by the Madison Medicine Co. 35 cts. Stafford Drug Co.

FIRST FROM SHAW

LETTER ON FINANCIAL LEGISLATION BY NEW SECRETARY.

CONCERNS GOVERNMENT DEPOSITS

OPINION GIVEN ON REPRESENTATIVE SULZER'S BILL.

Provision for Deposit of Surplus Funds With the National Banks Upon Security Other Than the Government Would Be Wise.

Washington, Feb. 4.—Secretary Shaw's first communication on financial legislation is contained in a letter to Representative Sulzer of New York concerning the latter's bill to deposit government funds of interest in the national banks throughout the country. The letter says:

"If the surplus of money in excess of \$50,000,000 working capital had been deposited in the clearing house cities in proportion to the relative capital of each bank therein, with no other security than a prior lien upon the bank's assets, the government would have lost nothing, and if the government had realized two per cent upon the funds so deposited it would have received \$2,000,000.

Aided in this way, the banks referred to would have been able to increase the credit accommodations to people in the sum of \$200,000,000. This computation was made at the instance of my predecessor (one year ago) and was based upon quarterly, rather than daily balances.

I think some provision for the deposit of the surplus funds belonging to the United States government with the national banks upon security other than the government, would be wise, though I doubt the limitations as to the amount of capital and surplus contained in the bill. I also question the wisdom of mandating provisions of law, recognizing, in the financial district that is generally a fair latitude of discretion. The authority to act in a given line is generally sufficient."

RAILROAD MEN WILL STRIKE.

All Classes of Employees on the B. & O. to Go Out.

Cumberland, Md., Feb. 4.—It is reliably stated that a general strike of the brotherhoods of railroad trainmen, conductors, engineers and firemen on the Baltimore & Ohio, especially along the Pittsburgh division, is imminent.

The above information comes from a prominent member of one of the local brotherhoods, who said the different brotherhoods had been notified this morning that President Loeve of the Baltimore & Ohio had refused to recognize the above brotherhoods, giving as his reason that the road was now under the control of a different company.

BOX FACTORY COMBINE.

Incorporation Papers to Be Filed Within a Few Days.

Green Bay, Wis., Feb. 4.—The incorporation papers of a box factory combine will be filed within a few days, probably in New Jersey. The head office will be in Chicago. As far as can be learned the following concerns are members:

Goodwill Bros., Wausau; Yawkey Lumber company, Hazelhurst; Wausau Box & Lumber Co.; Stevens Point Box company, Murphy Box company, Green Bay; M. & M. Box Co., Marquette; Kabser Box factory, Muscatine, Ia.; and probably another in Eau Claire.

BIG PRICE FOR HEIFER.

"Black Cap Judy" Is Sold at Chicago Auction for \$6,300.

Chicago, Feb. 4.—The Aberdeen-Angus heifer, "Black Cap Judy," was sold at auction at the stock yards this afternoon to C. H. Gardner of Blandineville, Ill., for \$6,300. This makes the female record price of all breeds since 1873, a short horn heifer selling for \$6,000 in Chicago, Dec. 5 last. The previous high record was \$2,800.

CHICAGO GRAIN MARKETS.

Features of the Day in the Wheat, Corn and Oats Pits.

Chicago, Feb. 4.—The wheat market today was largely lower, closing with losses of 3/4 to 5/8 for the day. May sold between 78 3/4 and 79 1/4, opening 78 3/4 and closing 78 3/4. The movement in corn had more or less influence on wheat. The seaboard news was weak and low talk unfavorable. No cash sales were reported at Chicago and only eight boatloads on the coast. At Liverpool spot was unchanged to 1/4 lower, with the futures 1/4 to 1/2 higher. The local receipts were twenty-two cars.

In corn there was a loss of 3/8 in the price, May losing nearly 1/2 late on the predictions of milder weather in the West. The trade was mainly professional. The local crowd were sellers. The cables were higher—3d at Liverpool and 1/2 at London. The receipts were small—seventy-five cars.

Oats ruled dull. At the start the prices were a shade higher, but weakened toward the end and closed at a low point with a net loss of 1/4. There were no new features. The provision interests were fair buyers and the selling was scattered.

The leading futures ranged as follows: May wheat opened at 78 3/4; highest, 78 3/4; lowest, 78 3/4; close, 78 3/4; 3/4. May corn opened at 64 1/4; highest, 64 1/4; lowest, 64 1/4; close, 64 1/4.

DON'T ACCEPT A SUBSTITUTE.

When you ask for Cascarets be sure you get the genuine Cascarets Candy C. C. Don't accept fraudulent substitutes, imitations or counterfeits. Genuine tablets stamped C. C. C. Never sold in bulk. All druggists, 10c.

SOAP DIGNITY.

IT IS easy to find a pure soap; it is easy to find a cheap one. The problem is to find both combined; a soap that is pure yet inexpensive. Ivory Soap is the best solution of that problem. It is an original product, evolved after years of experiment and research. It is the most of pure soap for the least money. It stands approved to-day by a second generation of Ivory Soap users.

WALL STREET STOCKS.

Market is Affected by Announcement of Engagements of Gold for Export.

New York, Feb. 4.—There was an attempt on the part of an element in the professional operators to awaken some speculative interest in the market this morning, but the general disposition was to acquiesce in the dullness and neglect after yesterday's disappointment of expectation of a decision in the Northern Securities case. It is the general opinion in the financial district that any pronounced activity must await the delayed decision of this case or some striking new development in general conditions.

The professional element, which attempted to contest this obvious tendency this morning, were making very modest progress when the announcement came of the engagements of gold for export on Thursday to the amount of \$3,750,000. The market then immediately flattened out, the greater part of the gains being lost, and was neglected and lethargic for the rest of the day.

The engagements of gold for export had only a slightly hardening influence on the money market, but the doubt as to the extent to which the movement may reach caused some uneasiness over the outlook. It is believed last week's large loan expansion represented a shifting of the obligations due to foreign creditors to local banks, and the gold outgo is in payment of the loans.

The market closed dull and heavy, the tone being somewhat accentuated by the report of the rejection of peace overtures by the British government. Closing prices of stocks are reported by Paine, Webber & Co. as follows:

Wabash Pfd. 42 1/2, Union Pac. 94, N. Y. Central 102 1/2, St. Paul 101 1/2, Southern Ry. 84 1/2, Mex. Pacific 103, Atlat. 40 1/2, N. J. M. 135, Rock Island 61 1/2, Southern Pac. 51 1/2, St. Paul 101 1/2, Reading 87 1/2, Rubber 14 1/2, B. & O. 40 1/2, C. & W. 35 1/2, O. G. W. 23 1/2, Illinois Central 137 1/2, Pennsylvania 149 1/2, U. S. Steel 40 1/2, Cap. Foundry 20 1/2, C. & N. W. 44 1/2, M. & E. T. 53 1/2, Peoples Gas 90 1/2, M. & E. T. 53 1/2, Atlat. 40 1/2, Western Union 91 1/2, Northern Pac. 97 1/2, Snider 40 1/2, Pfd. 101 1/2.

Range of Money Rates. Money on call, steady, at 2 1/2 to 3 per cent; closed, bid and asked, 2 1/2 to 2 3/4. Prime mercantile paper, 4 to 4 1/2 per cent. Exchange, about steady, demand at 4.87 1/2 to 4.88, and sixty days at 4.84 1/2 to 4.85 1/2. Bar silver, 55 1/2.

ASHLAND, WIS., Feb. 4.—The body of Patrick Corrigan, a well known contractor and logger of Mineral Lake, was found today near Mendota. Corrigan has been missing since Sunday. It is supposed he succumbed to the intensely cold weather and was frozen to death. There are no marks of violence upon the body.

CLUBS INVITE ROOSEVELT.

Chicago, Feb. 4.—A joint invitation to President Roosevelt to visit Chicago was decided upon tonight at a meeting of committees representing the Hamilton, Lincoln and Marquette clubs. No definite time was named but it is understood the president will not be able to come West before fall.

ACTION AGAINST SAVAGE.

Lincoln, Neb., Feb. 4.—Mandamus proceedings were begun in the supreme court this afternoon to compel Governor Savage to appoint a new board of fire and police commissioners for Omaha in accordance with the recent ruling of the court, but of which the governor declined to take advantage.

CORNER IN PINEAPPLES.

Chicago, Feb. 4.—The Record-Herald tomorrow will say: Mills Bros. of South Bend, Ind., who, it is claimed, operated a peanut corner last year with success, are said to have a corner in pineapples. The reported pineapple deal involves \$5,000,000.

BUYS IRON ORE LAND.

Duluth, Minn., Feb. 4.—It is reported that the purchaser of the valuable iron ore property near Hibbing is the Deserog Harvester works of Chicago. While the rumor lacks confirmation, it is circulated in places in close touch with the iron ore business.

MR. WHEELER GOT RID OF HIS RHEUMATISM.

"During the winter of 1898 I was so lame in my joints, in fact all over my body, that I could hardly hobble around, when I bought a bottle of Chamberlain's Pain Balm. From the first application I began to get well, and was cured and have worked steadily all the year.—R. Wheeler, Northwood, N. Y. For sale by The Stafford Drug Co.

Winter coughs are apt to result in consumption if neglected. They can be soon broken up by using Foley's Honey and Tar. Sold by People's Drug Store.

WANTED TO SEE BABY BURN.

Five-Year-Old Boy Sets Fire to Clothing of Infant Brother.

San Jose, Cal., Feb. 4.—The five-year-old son of August Nelson of Evergreen, with a desire to play with fire, made a bonfire of his fourteen-months-old baby brother. The victim was only discovered by the mother when he was in flames. The child lived only four hours. Its burning clothes set fire to the room, and the mother had hard work to save the house from destruction. The boy has always had a mania for setting things on fire, but has never before done any harm, and he acknowledged setting his brother on fire just to see him burn.

ROOT TO VISIT PHILIPPINES.

Secretary of War Will Depart for Islands in August.

Washington, D. C., Feb. 4.—In case it can be arranged, Secretary of War Root will visit the Philippine islands during the coming summer to make a personal inspection of existing conditions. He had intended to go with Adjutant General Corbin and other bureau officials last year, but was prevented by ill health and the press of business. Unless something unforeseen prevents, the secretary will start for the Philippines soon after the adjournment of congress, and arrangements are now being made with a view to his departure in August at the latest. It is predicted that the secretary will be able to straighten out the tangle of the government of the Philippines arising from the divided responsibility between the civil and military authorities.

REFORM MOVEMENT IN CHINA.

Empress Practically Forbids Custom of Binding Girls' Feet.

London, Feb. 4.—The dowager empress of China has just issued an edict, in which she directs all officials, by diplomatic means, to discourage the binding of the feet of Chinese females, saying the custom is barbarous.

As a suggestion of this nature is tantamount to a command, the unspeakable cruelties inflicted upon the Chinese women, dwarfing not only their feet, but their intellect, are to cease.

In addition, she has decreed that bright young men between fifteen and twenty years of age are to be selected and sent abroad to the best seats of learning of the world, to be employed then as instructors when they return.

The dowager made it plain upon her return to Peking that vital reforms were to be inaugurated. The first indication was the unusual and unheard-of attention to the foreigners, who were not only permitted to witness the triumphal entry of the court, but were provided with the choicest house along the line of march.

Then followed the first formal reception, when the ministers, for the first time in history, were received by the emperor as representatives of monarchs equalling himself in rank. A few days later the dowager entertained the ladies and children of the foreign representatives, according them all the privileges granted in any court in the world. She not only shook hands and conversed with the ladies, but warmly greeted the children and bestowed valuable presents upon them.

Dispatches from Peking announce that she has issued an edict abolishing the prohibition of inter-marriage between Manchus and Chinese, a rule that has been enforced with the utmost rigidity ever since the beginning of the dynasty.

To realize the tremendous effect and importance of these reforms, one must remember that each of them does away with some feature which heretofore has stood between China and the civilized world. They show that the imperial court means to get in close communication with the outside world and learn the best it has to offer.

At the same time China is casting off customs and rules which have hampered her for centuries.

NEW RAILWAY LINE.

Guthrie, Okla., Feb. 4.—The Alaska Southern Railway company was chartered here today to operate a line from Burrows bay, Alaska, to Laketon, U. C., 250 miles. The capital is \$2,000,000 and the offices will be at Guthrie, Okla., and Danville, Ill.

LUMBERMEN IN CONVENTION.

Muscatine, Ia., Feb. 4.—The 6th annual convention of the Northwestern Retail Lumber Dealers' association was held today. One hundred and six lumbermen of southeastern Iowa were present.

TODAY'S WEATHER.

Washington, Feb. 4.—The following is the weather bureau's forecast for Upper Michigan: Fair Wednesday; Thursday, snow, rising temperature; fresh westerly winds.

BIG FIRMS ASSIGNS.

Cleveland, O., Feb. 4.—The F. Muehlhauser company, manufacturers of cloth, made an assignment today. The liabilities are \$275,000.

When you lack energy, do not relish your food, feel dull and stupid, after eating, all you need is a dose of Chamberlain's Stomach & Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by The Stafford Drug Co.

HAS MANY VIRTUES.

NOTICE To the Insuring Public

and more particularly to OUR CUSTOMERS.

Read the following extract from printed conditions on your policy:

"This entire policy, unless otherwise provided by agreement indorsed hereon or added hereto, shall be void if illuminating gas or vapor or generated in the described building (or adjacent thereto) for use therein, or if any usage or custom of trade or manufacture to the contrary notwithstanding (hereinafter referred to as 'the above') be kept, used, or allowed on the above described premises, benzene, benzole, dynamite, ether, fireworks, gasoline, kerosene, or petroleum or any of its products of greater inflammability than kerosene oil of the United States standard (which last may be used for lights and kept for sale according to law but in quantities not exceeding five barrels, provided it be drawn and lamps filled by daylight or at a distance not less than ten feet from artificial light); or if a building herein described, whether intended for occupancy by owner or tenant, be or become vacant or unoccupied or so remain for ten days. Provided, a loss shall occur on the property insured, when such breach of condition continues or such breach of condition is the primary or contributory cause of the loss."

These conditions appear in every policy issued by companies authorized to do business in Michigan.

If you are using gasoline or acetylene gas for illuminating you should have permission for same endorsed on your policy. It is not sufficient that a certain device or lamp has been approved by the underwriters. Permission to use the lamp must be endorsed on your policy.

IN "MERCHANT OF VENICE."

Walker Whiteside's Company at the Opera House Tonight.

The visit here this evening of Walker Whiteside and his splendid company to present in a sumptuous manner "The Merchant of Venice" has been awaited with pleasurable anticipation by theatre-goers.

It would seem that the interest in the grand old comedy to be produced will never die out. There is an indescribable charm about it from its beginning to the final fall of the curtain.

Mr. Whiteside's wonderful portrayal of Shylock is too well known to need any advance comment. It is a characterization which stands on a level with his famous portrayal of Hamlet. Among the members of the large cast are Miss Lelia Wolstan, whose Portia is one of the most delightful creations on the American stage; Mr. Mack, who will play Gratiano, and Mr. Laurence as Bassanio. The gowns, costumes and scenery are all new, this production being a recent revival of the play by Mr. Whiteside.

The remarkable large receipts played to this season by Mr. Whiteside has caused a little comment in theatrical circles. In St. Louis, Indianapolis, Baltimore, Montreal, St. Paul and Minneapolis and other large cities, the audience tested the capacity of the theatres. Through one night stands crowded

than could be made by any individual lodge. According to the Escanaba Iron Port, each lodge will soon be asked to send a committee to some centrally situated city within the designated district for the purpose of making arrangements for the trip.

TOO MUCH SNOW. Construction Work on Munising Railway Is Stopped Until Spring.

The work of laying the steel on the east branch of the Munising railway was suspended last week on account of the snow. The steel is laid as far as the crossing with the South Shore road at Shingleton and it will be a matter of but few days to complete the road to Moberg when the snow leaves in the spring.

COPPER MARKET WEAKER. Metal Declines a Little and Traders Sell Stocks.

Hayden, Stone & Co. yesterday wired the Laidley Commission company: "The tone of the copper market has changed, and the selling of Amalgamated has taken effect. We hear the next dividend will be further reduced, and that houses usually representing insiders are large borrowers of the shares. Locally, the feeling is not confident and the traders are likely to sell on all bulges

Why We Find It Easy to Talk on a Subject Which Is of Constant Interest.

Some people have hobbies. Every one has a certain subject on which they talk with enthusiasm.

There is one which we touch upon every day in our business, and that is the unusual and well-deserved success which has met Smith's Green Mountain Renovator in Marquette. We have handled this splendid blood cleanser and nerve strengthener for some time with a remarkable and increasing demand for it.

We are prepared for a great demand for our Smith's Green Mountain Renovator this spring. The success it has already earned in Marquette and its record of cures, leads us to announce with perfect confidence our belief that it is the very best, safest, surest and quickest cure for diseases of the blood, nerves, liver and kidneys which exists.

We hope that any one who is not satisfied with their present condition of health will let us sell them a bottle of our Renovator together with our promise that we will refund the money paid us if a trial is not satisfactory.

cents bid. There are no bids on Lake or electro, and the market is weak.

WOOD ALCOHOL. It Will Be Important By-Product at the New Furnace Here.

The following description of the chemical plant at Manistique will be of interest to Marquette people, since it is also the intention to manufacture wood alcohol as a by-product at the Pioneer Iron company's new furnace here. In itself the North Marquette chemical works will be an important industry and will employ a good-sized force of men, probably more than does the plant at Manistique, where the furnace capacity is but two-thirds of the product to be turned out here.

The chemical plant is one of the main industries of Manistique. It runs night and day, Sundays included, the year round. The plant manufactures wood alcohol from the smoke of the burning charcoal which is condensed into a liquid form as it runs through hundreds of feet of pipe and is then distilled by steam process, coming from the pipes 98 per cent alcohol. The plant employs sixty men and has twelve boilers to furnish steam with a combined capacity of 1,300 horsepower. It turns out 22,000 gallons of the product every month. The alcohol is used in the manufacture of liniments and for medicinal purposes. The works are run in connection with the adjoining blast furnace, and practically the interests of one are the interests of both, as one manager has the charge of both plants. The furnace employs 100 men around the works and 250 men in the woods. Barry Bros. are the owners of the chemical works.

"Traders sold a large amount of Amalgamated at the opening this morning, their selling being instigated by a decline in the London quotations. New York bought Amalgamated and Boston sold and there was excellent buying in all of the home coppers on the decline. Lake copper is not offered below 13 cents and bids of 14 for year contracts have been refused. We do not for a moment think that the upward movement in the coppers is over and we strongly favor the purchase of the best stocks on this reaction."

Chicago Wheat and Corn. W. H. Laidley & Co. said of the grain markets:

"Wheat opened firm and a trifle higher upon fair cables, light receipts and a continuance of the cold weather. The market was very narrow and dull during the entire session. It turned weaker toward the end and closed at a loss of 3/8¢ from yesterday's closing prices. The primary receipts were about the same as last year, the shipments were less and the clearances were fair. No export business was reported. Bradstreet's reported a decrease in the world's visible of 731,000 bushels as against an increase last year of 1,616,000. The estimates for tomorrow are very light. There is absolutely no outside trade and until the demand is better a dull and a dragging market may be expected."

Corn opened strong and slightly higher upon good cables and a little better demand. There was very fair buying by locals during the early part of the session that held the market slightly above yesterday's prices. The market, however, lacked all outside support, and, easing off, closed 3/8¢ under last night. The primary receipts and shipments were light. Bradstreet's reported an increase in the world's supplies of \$30,000. There is one thing to be considered—corn is being used in the most economical manner. Those who have a new crop will not be available until next November, and for the present we do not expect to see much of a break in prices."

Wall Street Stocks. Dick Bros. in a wire to Paine, Webber & Co. said of the Wall street stocks: "Stocks were dull and highly irregular today. The news had little effect—not even the \$3,750,000 gold engagements or the rejection of the Boer peace proposals by the British government. There were some unfavorable reports, principally those from Pennsylvania and Frisco, for December. The leading stocks received fairly good support. There was good buying of Metropolitan Street Railway and the stock promises to do better. Exchange eased off after the gold engagements. Money was at the central exchange copper closed lower, at 1/2 cent decline for all grades. Lake copper is offered at 13 cents, electro at 12 1/2 and casting at 12 1/2, with 12 1/2

Don't neglect an aching back. It will get worse every year. Backache is really kidney ache. To cure the back you must cure the kidneys. If you don't, other kidney ills follow. Urinary troubles, diabetes, Bright's disease.

An Escanaba citizen tells you how the cure is easy. Mr. John Fallman of 820 Wells avenue, Escanaba, boiler maker, says: "Backache and I have been close acquaintances for many years. I believe all my trouble was caused by constipation, for I noticed when irregularly excited on the bowels my kidneys always acted improperly, and backache was a certain and sure visitor. Ever anxious to obtain some preparation which would cure radically and not temporarily as those in the past I tried Doan's Kidney Pills. They relieved the last attack of backache. They are a good medicine for the kidneys and I have no hesitation in recommending them to anyone annoyed with that too prevalent trouble, kidney complaint."

Just such emphatic endorsement can be had right here in Marquette. Drop into the Stafford Drug Co. and ask what its customers report.

Sold for 50 cents per box, for sale by all dealers. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name Doan's and take no other.

Foley's Honey and Tar cures the cough caused by attack of grippe. It heals the lungs. Sold by People's Drug Store.

SUCCESS GIVES CONFIDENCE

AU TRAIN FALLS.

Valuable Water Power Purchased by Cleveland Cliffs Company.

The Munising News learns from what seems to be a reliable though not an official source, that the two forty-acre tracts on each side of Au Train falls have been purchased by the Cleveland-Cliffs company. The popular belief is there is very little timber on either of the forty acres and that the company has secured control of the falls on account of the abundant water power which they can furnish. It is thought this power would be considerable enough to turn the wheels of several large manufacturing plants.

Picked It Up Cheap. Says the Munising Republican concerning the reported deal: The Cleveland-Cliffs Iron company has purchased from August Boegen of Au Train and John R. Wright of Avon, Mich., the forty acres in which the Au Train falls are located, for a consideration of \$1,200. There is something significant in this deal and the company certainly has some object in acquiring this splendid water power. The timber on the forty is practically valueless, so it must be that it is the power the company wants. Au Train falls proper are about sixty feet high, but in about one mile above the falls and the same distance below there is a fall of two hundred feet or more. The advantages for harnessing the power are unsurpassed. It is not at all improbable that the company intends to utilize this splendid power.

ENGINE ON FIRE. Peculiar Mishap to a Locomotive on the South Shore.

The Munising News, chronicling the fact that one of the Munising road trains arrived three hours late one day last week as a result of delayed connections at the Junction, gives this explanation of how it came that the time was lost:

"The weather was, in fact, so cold it was necessary to keep everything almost red hot in order that a full head of steam should be maintained. When the South Shore passenger train reached Au Train the engineer and fireman were almost suffocated with smoke. An investigation resulted in the discovery, for the fact that some of the woodwork on the engine, exposed to the remarkably severe heat, had taken fire. The danger was threatening, but finally it was concluded to run the engine back to the water tank, where a flood of water was let down on her and the fire was extinguished. This move proved effectual and the progress of the fire was arrested before any considerable damage was done."

MANY QUEER BANK NOTES. Collection Exhibited in London Has Interesting Peculiarities.

On Aladdin's principal of giving new lamps for old, Moberly Phillips, an associate of the Institute of Bankers, is preparing at any moment to give new notes, of their equivalent in gold, for old notes which have some interesting history attached to them. Mr. Phillips is the only collector of bank notes in the country, and probably out of it, and his collection amounts to 800, more or less. Some of the more valuable of his specimens he exhibited last evening at a meeting of the Institute of Bankers in the London institution.

One of the most interesting was a note issued by Maj. Gen. Baden-Powell during the siege of Mafeking. It is numbered 766, dated March, 1900, and printed in green ink on an obviously primitive machine. Another, with, if possible, a still more fascinating history, was a currency note, with Arabic lettering, printed by Gen. Gordon when he was besieged in Khartoum. Of Bank of England notes Mr. Phillips has specimens of the face value of \$5 not unlike in appearance to the Scotch 20-shilling notes of the present day.

In times of emergency, when coin was scarce, paper money of as low a value as 5 shillings was issued by traders. But there has been a lower depth even than this, cards and paper tickets having been resorted to in some places for as small a sum as 1 shilling. Another interesting special issue, shown by Mr. Phillips was that of the Birmingham workhouse.

These notes were circulated by the overseers for various small amounts, "for the convenience of paying the poor," and payment was made when eight, 2 shillings, 6 pence, or four 5-shilling notes were brought together. In one corner of one of these notes is a picture of Charity nursing young children. As showing the length of time during which notes may remain in currency, Mr. Phillips mentioned that he had a Scotch note for £12, dated 1770, and the bank which issued it offered to change it for him. Being a collector, Mr. Phillips preferred to keep his ancient bit of paper.

In the matter of diminutive bank notes, a correspondent sends an account of a curious note which he has in his possession. It is a card measuring 2x2 1/2 inches, on one side of which is twice printed the word "twopence," while on the other side the sum is printed in words and figures around the border. In the middle is the following: "I promise to pay the bearer, on demand, twopence." By virtue of the Corporation of the City of New York, Feb. 20, 1790, D. Phoenix, City Treasurer.—London Chronicle.

BREATHING COMPRESSED AIR. Entering the Lock of the East Boston Submarine Tunnel.

We were in the tunnel about fifty feet below ground, but still on dry land and in the ordinary atmosphere. It arched above us exactly like the subway. All over the bottom of it were rickety little car tracks, to carry out the earth which is still being excavated, and just beyond us the tunnel was partitioned off—bricked up with a solid wall—through which, however, ran a hollow cylinder about as big and as long as the boiler of a locomotive, and through that tube we were to go.

"But when we entered compressed air before," asked my guide.

"No."

"Heart ever been seriously affected?" I called to mind an ethereal lyric

It Takes the Place of the Doctor.

Hinkley's Bone Liniment often saves lives and doctor's bills.

In many cases of illness, where the doctor is not needed, cannot be reached, or must be waited for, Hinkley's Bone Liniment is invaluable. It is prompt, sure and safe. It relieves pain of every kind, soothes and quiets.

Sold everywhere in 25c, 50c, and \$1.00 bottles.

HINKLEY BONE LINIMENT CO., Saginaw, Mich.

HINKLEY'S BONE LINIMENT FOR INTERNAL AND EXTERNAL USE

dedicated when I was even younger than I am now, but answered: "No." With this assurance we entered the cylinder with a few cars for company, the little steel door closed behind us with a hollow bang—which made me feel like a rat in a trap—and then came a deafening roaring and hissing as the valve from the under water part of the tunnel rushed through the pipes into our small compartment to make our atmosphere pressure equal to its own.

"Keep swallowing!" shouted my guide, with his mouth close to my ear. So I kept swallowing. "Hold your nose and blow." I held my nose and blew out my cheeks, so as to force the air into those tiny canals that lead from the throat to the inner side of one's eardrums, and thus equalize the pressure on them. And along with the roaring of the air came many strange new roarings and sibilings in my head as the pressure went up and the air grew warmer and heavier, like the atmosphere in a hothouse, and more difficult to breathe. Finally the roaring ceased, the door at the opposite end of our tube, which but a moment ago could not have been forced open by any twenty men, now swung easily back, and we stepped out into an atmosphere which, could it have burst through the door upon us, instead of coming to us gradually through small valves, would have blown us bodily out of the tube and into the next world like so many crimson and yellow autumn leaves.—Boston Transcript.

Steps the Cough and Works Off the Cold. Laxative Bromo-Quinine Tablets cure a cold in one day. No Cure, No Pay. Price 25c.

Don't waste your money on worthless imitations of Rocky Mountain Tea. Get the genuine made only by the Madison Medicine Co. A great family remedy. 35c. Stafford Drug Co.

MARSHAL'S NOTICE. In the District Court of the United States for the Western District of Michigan, Northern District, at Marquette, Michigan.

Whereas, a libel has been filed in said court on the 24th day of January, A. D. 1902, against the said Hinkley Bone Liniment, and whereas, a writ of attachment issued out of and under the seal of said court, said Hinkley Bone Liniment has been seized and is now in my custody; and whereas, the first Tuesday in March, 1902, has been fixed as the return day of the attachment, and for the hearing of the said libel;

Now, therefore, the master, owners and claimants of said dredge, Pan American, and all persons interested therein, are hereby notified and advised to appear in the district court of the United States for the western district of Michigan, at Marquette, Michigan, on Tuesday, the fourth day of March, 1902, at the hour of ten o'clock in the forenoon of that day, to answer to the said libel, if not then, on the next day of jurisdiction thereafter, then and there to answer said libel and make their allegations in that behalf.

A. O. WHEELER, U. S. Marshal. By JACOB DOLE, Deputy U. S. Marshal.

HENRY F. METZGER, Professor for Libellant, Sault Ste. Marie, Mich. QUANER, SPENCER & QUANER, Attorneys for Libellees, Milwaukee, Wis.

NOTICE! Comfort and pleasure, time and money saved for contractors and masons. Kelley brand lime upon the market again, which has been long wished for by contractors and masons for its unsurpassed qualities of quick slaking and the greatest producer of mortar of any lime manufactured. I handle the Peninsular Portland Cement, the Standard of America. A guarantee is given by the Peninsular Cement Co. that there is no cement manufactured that can surpass it for masonry, cross and sidewalk purposes. Also handle Gypsum hard wall plaster; it is as cheap as lime mortar, wall, fire, brick, sewer pipe, beach sand, saw dust, wood of all kinds; also tanning and glueing contracts work. Figures quoted on car lots or less on any material in my line. E. FRENCH, Both 'Phones. Marquette, Mich.

Ishpeming and its Environs.

LARGE CROWD THERE. HAS GOOD PROSPECTS.

The auditorium of the new school at the Winthrop location was not large enough to accommodate all who wished to attend the exercises held there Monday evening.

SOMETHING THAT WILL DO YOU GOOD. We know of no way in which we can be of more service to our readers than to tell them of something that will be of real good to them.

ISHPEMING IN BRIEF.

The regular monthly meeting of the city council will be held this evening.

The closing of local business houses at 6 o'clock on four evenings a week will go into effect tonight.

Louis Biegler, who held a position at the Nelson House for the past several months, has accepted a clerkship at the Ishpeming postoffice.

Mrs. C. F. Moll and her two children, who visited relatives here during the past week or so, returned to their home at Kenton yesterday.

The nine-year-old son of Louis Johnson of the Winthrop died Saturday afternoon from pneumonia.

The demonstrators in the employ of Carpenter-Cook company are at S. Johnson & Co's store.

The reserved seat tickets for the production of "The Confederate Spy" at the opera house tomorrow evening will be sold at Sackler's palm garden at Tilsen's drug store.

Eva Carlson, the little girl living on Jasper street whose hands and face were frozen a week ago last Monday, is improving.

Ensign Conlay of the local corps of the Salvation army was tendered a social surprise at the barracks on Monday evening.

A very artistic piece of Harry Nelson's burnt wood was displayed yesterday at J. Sellwood & Co's dry goods department.

There is more catarrh in this section of the country than at other diseases put together, and until the last few years was supposed to be incurable.

There promises to be a large attendance at the hop to be given at Anderson Hall tonight by the Trombly orchestra.

A number of the young ladies of the Swedish Lutheran church congregation are meeting at regular intervals to practice basket ball at the Ishpeming Light Guard armory.

The Garfield House, Ishpeming, is offered for sale. The property is a very desirable one and is in first class condition.

Rare bargains in winter goods of all kinds, including skirts, jackets, shirt waists, blankets, comforters, etc.

Upper Peninsula.

Three spile drivers have arrived at North Escanaba from Chicago and work on the extension of the St. Paul company's ore dock has been commenced.

A school teacher in a rural district of Schoolcraft county raised seventy-five bushels of potatoes in the school yard last year, and the board has given him permission to use the building as a home during vacations.

The Manistique Brewing company has secured an injunction against the new concern which recently bought the property. It was specified in the articles of transfer that certain debts should be paid before possession was given.

Several men were busy last week blowing out the Forster dam in the Anna river, near the electric power house at Munising.

An ancient claim of Thomas Chambers, who many years ago carried mails on dog sleds in the upper peninsula, and who asked for \$3,000 additional compensation because he had to tote Canadian mail under his United States postoffice contract, has been passed upon favorably by the senate at the instance of Senator McMillan.

About seventy-five saloon men met the other evening at Escanaba to discuss the straitened condition of their trade in that city.

The contract for the erection at the Soo of the large ice house for the Pittsburg Steamship company has been awarded by the George Kemp Coal company to Contractors Shirley & LeBlanc.

The contract for the erection at the Soo of the large ice house for the Pittsburg Steamship company has been awarded by the George Kemp Coal company to Contractors Shirley & LeBlanc.

J. W. Wells, general manager of the I. Stephenson company, in an interview at Menominee says of the report his concern has decided to build a paper mill at Wells: "We are contemplating something in the near future but nothing definite has yet been decided upon.

A couple of young men prominent in several of the best clubs of this city have been quite diligent in consulting the authorities and diagnosticians of poker since last September.

Several of the young men prominent in several of the best clubs of this city have been quite diligent in consulting the authorities and diagnosticians of poker since last September.

The New Yorkers saw little choice between a Utica and a Mohawk and Malone coach so they decided to make the best of the night's ride, seeing they would begin shooting so much the sooner.

Eight hour laws are ignored by those tireless, little workers—Dr. King's New Life Pills. Millions are always at work, night and day, curing indigestion, biliousness, constipation, sick headache, all stomach, liver and bowel troubles.

Is it a burn? Use Dr. Thomas' Electric Oil. A cut? Use Dr. Thomas' Electric Oil. At your druggists.

A NIGHT ALARM. Worse than an alarm of fire at night is the brassy cough of croup, which sounds like the children's death knell and it means death unless something is done quickly.

Beauty is Health.

Walnut Lake, Ark., June 3, 1900. I thank you for the benefit I received from your advice and the Wine of Cardui I took in my terrible condition. My life was no pleasure to me at all and I was of no use to anybody.

WINE OF CARDUI

is giving thousands of women health, beauty and freedom from the dragging pains which made their lives so miserable. Wan faces, haggard eyes and emaciated forms are the results of suffering.

HOTEL PROPERTY FOR SALE!

The Garfield House, Ishpeming, is offered for sale. The property is a very desirable one and is in first class condition.

COURT HOUSE SITE

COUNTY CAN HAVE ANY THE CITY CAN GIVE.

COMMON COUNCIL TAKES ACTION

MEANS TO DEAL DIRECT WITH SUPERVISORS.

Authorizes the Tender of Washington Street Park or Any Other Location That May Be Preferred to the Present One.

The common council has determined to deal direct with the board of supervisors on the court house proposition, instead of delegating that matter to the park and cemetery commission, and has further manifested its willingness to tender any site for the proposed new structure that the county board may wish and which it is in the power of the council to offer.

At the meeting held Monday evening the council rescinded the resolution adopted some time ago which authorized the park commission to offer as a suitable location the Washington street park. The vote was eleven to seven. Alderman Ward then moved that the city recorder be instructed to tender, in writing, and on behalf of the city, the Washington street property as a site for the proposed new court house, if that location be preferable, and if not, then any other site the county board desires and which the council is in position to grant.

The resolution was adopted by the vote of ten to four after but very little discussion. The contention of the minority, who did not express hostility to the Washington street location if that be wanted, was that the supervisors had so far not taken any official action which gave the impression they contemplated the selection of a new site, and that if the present location was finally decided to be undesirable, it would then be time enough to tender the board the park property or any other that might be preferred. It was the feeling of all, however, that direct negotiations should be had, and incidentally a resolution was adopted providing that hereafter no city property should be disposed of without the consent of a majority vote of the council.

AFTER THE STREET RAILWAY.

Council Appoints a Committee to Draw Up New Franchise Terms.

The alleged practice of the street railway company in piling up in the middle of the roadway the snow it removes from its tracks was again made the subject, at Monday evening's meeting, of considerable aldermanic discussion. The city, it appears, has been compelled to take away the surplus snow for the reason that otherwise it is dangerous to the public safety, but so far has obtained no financial settlement with the company.

The taxes of which the railway is still delinquent also figured in the discussion, and finally it was decided as the best solution to amend the company's franchise so as to provide that the personal taxes assessed against the company and all expense incurred by the city in the removal of the snow or in other work of like nature be made a first lien on the property of the company.

NEW LOBBY APPOINTED.

"The lightning committee," as Alderman Shea called it, which was appointed some time ago to consult with the bridge committee of the county board in an endeavor to secure a further appropriation from the supervisors in aid of the construction of the proposed steel bridge across the Carp, on the road to Sand, but which has done no "lobbying" at all, has been reorganized by a new body, Alderman Jones, Siegel and Bush being named by the mayor to serve as the members. The excuse made by the two members of the old committee who were present at the council meeting Monday evening for the failure to take action was that they were waiting on the chairman to call them to arms. The county board some time ago appropriated \$400 toward the new bridge, but as the structure is now proposed to build is more elaborate than the city at first contemplated, it is hoped the donation will be materially increased.

DUBE WANTS A MATCH.

Peter Dube, the Escanaba skater who has taken part in the three-hour race this week, is now desirous to arrange for a match for \$50 a side with Dan Galagher, also of Escanaba, the contest to take place at the Marquette rink on Saturday evening. The race will probably be arranged, and with that skated Dube will be ready for engagements in the copper country. When Dube and Gallagher met last winter the latter won. This season Dube is considerably speedier, and he believes victory would go to him. The conditions of the proposed contest call for a mile race, with the skaters starting from opposite sides of the rink.

WHILE THE SHORT HAND

of the clock travels twice around the dial Perry Davis' Painkiller will cure a cold, will ease the tightness across the chest and hence will banish the fear of pneumonia. "Just a little cold" does not become a misery that clings with you, unless you have recourse to this never-failing help. There is but one Painkiller, Perry Davis'.

CAR LINE TO SUSPEND.

Installation of New Engine Will Tie Up Traffic on Sunday.

Street car service will be suspended about 11 o'clock Saturday night, when the last car reaches the barn, and will not be resumed for a day or two. No cars will be running on Sunday and probably on Monday, although of course it is the intention to make the interruption to the traffic as short as possible.

The suspension will be because of a change to be made at the power house. It is proposed to put into commission the new engine which was installed last summer but which as yet has not been connected up, and it is this latter work that is now to be done. The men will start at the task Saturday night and the work will be continued without cessation until it has been completed and the new machinery is in motion. All the arrangements preliminary to the change will have been made by Saturday, and if good luck is met with the railway will again be in service some time on Monday.

The new engine is one of about 200 horsepower, or nearly 100 greater than that in use at present, and will enable the company to give its patrons still better service. At times the company has felt the need of more power, but with the new machinery in motion the plant will be adequate for some time to come.

BASEBALL SCHEDULE.

The schedule of games adopted by the newly organized indoor baseball league has been revised as follows:—February—

Tuesday, 11th—A. O. U. W. vs. Macabees.

Friday, 14th—Beavers vs. Queen City Hotel.

Tuesday, 18th—A. O. U. W. vs. Queen City Hotel.

Friday, 21st—Beavers vs. Macabees.

Tuesday, 25th—A. O. U. W. vs. Macabees.

Friday, 28th—Beavers vs. Queen City Hotel.

—March—

Tuesday, the 4th—A. O. U. W. vs. Queen City Hotel.

Friday, 7th—Beavers vs. Macabees.

Tuesday, 11th—Macabees vs. Queen City Hotel.

Friday, 14th, Beavers vs. A. O. U. W.

Tuesday, 18th—Macabees vs. A. O. U. W.

Friday, 21st—Beavers vs. Queen City Hotel.

Tuesday, 25th—Macabees vs. Queen City Hotel.

Friday, 28th—Beavers vs. A. O. U. W.

TRAINS LATE.

With the exception of the evening train from the copper country, all the trains arriving here yesterday pulled in behind schedule time. The Northwestern's morning passenger was over two hours late and the St. Paul train about an hour, the delay in each case being due to cold and stormy weather. The afternoon train from Calumet, due at 1:15, was about half an hour behind time, snow having caused trouble in the copper country, while the train from the east, scheduled to arrive at 2:50, got here about 5:25. The delay was because a wait for the car ferry was made at the straits, which the boat finally succeeded in crossing yesterday morning. The St. Paul's evening train was a few minutes late. It was cold here yesterday but in contrast to the conditions in other portions of the peninsula there were no indications of storm.

FRANK MITCHELL WON.

The skating race came to a close last evening after the participants had contested for half an hour, it having been mutually agreed to shorten the time from three hours, as originally arranged. The medal was won by Frank Mitchell, the scores being:

Frank Mitchell, 37 1/2 miles; time, 2 hrs., 12 min.

Louis Frazer, 36 1/2; time, 2:20.

Clifford Mitchell, 36 1/2; time, 2:20.

Louis Dublotte, 33 1/2; time, 2:30.

Peter Dube, 31 7/8; time, 2:05.

The apparent poor showing of the latter was because of the mishap he sustained on the previous evening, when he lost twenty minutes. George Mitchell did not compete last night, his injury preventing. The wind-up of the match was very exciting and was witnessed by a good-sized crowd. Patrick Meahan was the judge.

SALOONS TO MOVE.

The common council has granted John Plattenberg permission to remove his saloon from its present location on South Front street to the vacant store room in the Michel T. L'Hullier block, adjoining Delf's grocery on Washington street. Like sanction has been given to Wm. J. Rivers, whose place of business has been on Superior street near the old passenger station, to hereafter sell liquors in the Britner block, corner of Third and Superior streets. Mr. Rivers will occupy the quarters in the basement. In both cases, as provided in the city charter, the filing of new bonds will be necessary.

THE "PRODIGAL'S" RETURN.

Hon. Timothy Nester, who founded Munising and then moved to Chicago, left behind him those who said: "Aha! There he goes. The ex-speaker of the 'third house' at Lansing will be swallowed up in the maelstrom of Chicago and we will never see him more." They were mistaken. Mr. Nester allows that he might "Travel this wide world all over. And then to another night go." But Michigan would still be his choice. He is coming back in the spring, it is said, to observe how well the chicken he hatched has grown, and will build a house and reside in Munising and be still the same old ex-member of the "third house." Welcome to Tim.—Detroit Tribune.

"I have used Chamberlain's Cough Remedy for a number of years and have no hesitancy in saying that it is the best remedy for coughs, colds and croup I have ever used in my family. I have not words to express my confidence in this Remedy.—Mrs. J. A. Moore, North Star, Mich. For sale by The Stafford Drug Co.

CITY BREVITIES.

Today's weather: Partly cloudy with snow; warmer; diminishing northwest winds.

Yesterday's temperature: 7 a. m., 1 degree; 12 noon, 2 degrees; 7 p. m., 2 degrees; maximum, 3 degrees; minimum, 1 degree.

Frank Gooding left last evening for Chicago.

Lieutenant Governor Robinson of Chassell is in the city.

G. W. Shaw got back yesterday from a visit to his brick yard near Munising.

Busy queen hive of the L. O. T. M. will hold a meeting Thursday afternoon.

St. Mary's guild will meet this afternoon at 2 o'clock with Mrs. J. Courtney, East Ohio street.

Rev. W. F. Kerney, Episcopal rector of Ironwood, was a caller at the bishop's residence yesterday.

County Treasurer Walter Bell and daughter returned to Au Train yesterday after several days spent here.

H. H. Eversard of Kalamazoo, interested in the Big Bay Lumber company, is in the city on business with the new railroad people.

Mrs. C. T. Fairbairn returned last evening to her home at Ishpeming after a several days' visit at the residence of E. M. Watson, Cedar street.

Marriage licenses were yesterday issued to James Jacobs and Annie Stephenson of Ishpeming and Thomas McGuire and Bridget Cain of Marquette.

A meeting of the Woman's auxiliary of the O. L. A. to the Brotherhood of Locomotive Engineers will be held this afternoon at 2 o'clock at the A. O. U. W. hall.

Among the visitors in the city yesterday were Marshal John Form of Ishpeming, W. S. Prickett of Sidnaw and Frank Maciarr and Alexander Kubick of Calumet.

The Euchre club will entertain a number of invited friends at the Snowshoe clubhouse tomorrow evening. Music, dancing and refreshments will be the order of entertainment.

Mrs. S. S. Ormsbee gave a delightful euchre party yesterday afternoon at which seven tables were played. The favors were taken by the Misses Beatrice Hansom and Bessie Thiel.

A social dancing party will be held in the A. O. U. W. hall tomorrow evening under auspices of the newly organized Workmen's orchestra of five pieces. The admission will be twenty-five cents.

The pay roll of the city employees in the street commissioner's department was about \$625 for January. The great bulk of the amount is for the removal of snow from the streets and sidewalks.

Stephen Yerebeck has been appointed to the police force, to serve without compensation from the city. He is in the employ of the South Shore and will act in his official capacity about the shops.

Dr. Austin Deadman, the veterinary surgeon, carried back to Ishpeming last evening a well-defined limp as a memento of his day's visit here. He was treated in the leg by a horse he was treating.

John M. Longyear of Marquette, who owns a good part of the upper peninsula of Michigan, was an arrival on the South Shore this (Monday) morning, and is stopping at the Spalding.—Duluth Herald.

The Merchants' association is scheduled to meet at the Snowshoe clubhouse this evening. Refreshments in the form of a "Dutch lunch" will be served. Members are requested to take the 7:30 or 8 o'clock cars.

Business pertaining to a timber land deal brought these gentlemen to the city yesterday: W. B. Jeffs of Rockland, J. E. Bush of Ewen, Jerome Brown of Matchwood and John Hawley, W. R. Adams and J. H. Haight of Ontonagon.

County Clerk Ross announces that all bills against the county should be handed in not later than Thursday evening if action on them is desired at the forthcoming meeting of the board of supervisors. The auditing board will go over the claims at a session to be held Saturday afternoon.

Last evening at the residence of Miss Catherine Maloney, Superior street, Miss Lucy Fitzgerald was tendered a pleasing surprise by a merry party of about forty of her young friends. The time until a late hour was happily spent, with dancing, various games and refreshments as the features.

The next meeting of the council—a special session—will be held next Tuesday evening. The aldermen generally convene on Monday, but as a "show" is booked for the 10th and the councilman who made the motion desires to attend it, there is a suspicion that the theatrical attraction figured in the setting of the date.

About twenty young people participated in a very pleasant surprise party given Miss Bertha E. Sherman of Munising at the home of Captain George Smith, North Third street, Tuesday evening. The function was greatly enjoyed by all who attended it, and the evening was very happily spent by the young lady and her friends.

The snow in that locality has been too much for the committee of aldermen appointed some time ago to measure the concrete sidewalk put down last summer at the Superior street property of Michael Hennessey. The figures of the street commissioner and Mr. Hennessey did not agree, hence the appointment of the official measurers. The committee was granted further time.

Grenit Judge J. W. Stone has apportioned to the several counties of this circuit the salary of the official stenographer of the circuit, for the year 1902, as follows: Marquette county, number of law cases, 149, \$514.64; Menominee county, 135 cases, \$496.24; Delta county, 132 cases, \$485.32; Dickinson county, 78 cases, \$286.84; Iron county, 59 cases, \$216.06; total, \$2,000.

Charles Laurier, the Canadian government agent here in the interest of emigration to the Northwest territory, has removed his office from the Savings bank block to the store room in the Vierling block until recently occupied by the fish market. The reason for the change is that Mr. Laurier desired a

place where next summer he can display to better advantage growing grains and other products of the Canadian farm.

A decision has been rendered at the local land office in the homestead contest case of Peter Van Valkenberg vs. Peter Sullivan, involving 160 acres of land in the southern part of Marquette county. The decision is in Mr. Van Valkenberg's favor. The ground of the contest was abandonment, lack of cultivation and lack of residence.

The scenes about the new passenger station last evening were rather more metropolitan than usual. The train from the east—a double-header—arrived about the time the St. Paul's Chicago train pulled in, while standing on another track and about to depart was the evening train for the south. All was hustle and bustle for a time, with many reminders of the scenes at union depots in larger railroad centers.

Monday was the tenth anniversary of the marriage of Thos. W. Cleary, the popular mail carrier, and wife, and in commemoration of the event they were that evening visited at their home on Washington street by a party of over fifty of their friends. The visitation was an entire surprise to the recipients, but it proved an extremely happy one. The party came well laden with tinware, symbolic of the anniversary, and with good things to eat, while Professor Kluge was there with his violin. Music, dancing and cards made the occasion until 3 o'clock yesterday morning one thoroughly enjoyed and it was with regret, even at that hour, that the gathering dispersed. Along about midnight the party sat down to an elaborate spread.

It has always been somewhat of a mystery to The Mining Journal why so few on-lookers turn out to the meetings of the common council. Comfortable quarters are provided for them in the gallery and the proceedings and discussions of the aldermen are by no means dry—in fact, the "doings," always interesting, are often lively and exciting—yet outside of the session in the council chamber the policemen are appointed, the attendance of spectators is practically nil. Last Monday evening, for instance, there was one lonely man in the public gallery. Evidently a plausible solution would be that the citizens generally have so much confidence in the councilmen that they consider no manifestation of their interest, at least to the extent of attending the deliberations, unnecessary.

SEASON OF LENT.

In a Few Days Social Gaiety Will Be Interrupted for 40 Days of Fasting.

The season of Lent is now close at hand. In a few days the season of social gaiety will be interrupted for forty days and in its place will come a season of quiet, and religious observance. Lent, observed to commemorate the forty days' fast of the Lord in the wilderness, begins this year on Feb. 12—Ash Wednesday. It ends with Easter Sunday—the day of spring costumes. The period of fasting is forty days, with all the churches which observe Lent, except the Greek churches, which have kicked in the most solemn days. Sundays are not counted in the fast. Pope Gregory, the Great, in 590, directed that the season should begin on the sixth Sunday before Easter, and that on all the intervening weeks days fasting should be practiced. Afterwards, either by Pope Gregory II, four days were added to make the whole fast forty days.

The six Sundays included in the Lenten period are observed as festivals, never as fasts, and are therefore called Sundays in Lent. The last, or Passion week, is considered the most solemn portion of the season and is generally known as "holy week."

The ancient observance of Lent was of the most rigorous character. Non-observance frequently resulted in severe punishment and often ex-communication. All flesh and even the so-called "white meats" were excluded. Modern customs, however, have caused a relaxation of the old and severe methods of observing the period. But the principle of permitting but one meal, and a slight collation, is still everywhere retained.

Wrinkles are smoothed away by its healing touch. Brain tired and depressed people will find a cure in Rocky Mountain Tea. 35 cts. Stafford Drug Co.

Foley's Honey and Tar is best for croup and whooping cough, contains no opiates, and cures quickly. Careful mothers keep it in the house. Sold by People's Drug Store.
