LOYAL TO SWEETLAND.

Seniors of the High School Went Before
School Board in the Doctor's Behalf.

The members of the senior class, particularly the boys who are prominent in high school athletics, are very much displeased because the board of education did not see fit to engage Dr. G. J. Sweetland as superintendent of the schools for the coming year. A short time before the meeting Monday afternoon the boys went before the board in a body, asking that the doctor be retained. They explained that they considered him competent to fill the position satisfactorily and liked his method of conducting the school work.

However, the appeal did not carry sufficient weight to bring a majority of the board over to the doctor, as E. E. Scribner of Dunkirk, N. Y., won out, as stated in yesterday's paper. The boys are incensed and they have announced that they will play no more football and that they will not take part in the athletic meet to be held in this city on the 24th of May. Some of them have also announced their intention of quitting the school.

No Discredit to Sweetland.

That Dr. Sweetland did not get the position cannot be construed as a discredit to him. The members who stood for the New York man maintain that the doctor has not had the experience they consider necessary to fit a man for the task of managing Ishpeming's school system. It was extremely unfortunate for Dr. Sweetland that he was taken ill just when he had got only fairly installed in the superintendent's work.

Dr. Sweetland is not worrying any because he did not get the place. His friends are the ones who are dissatisfied. He has had offers of good positions within the past few weeks and it is said that he has in view one that will pay him as well, if not better, than the superintendency of the local school system.

Scribner a First-Class Man.

The board did not engage Mr. Scribner without some knowledge of his work as a school superintendent. George Hayden, a member of the board, went to Dunkirk and learned much about him and the work he has done as an educator. Mr. Hayden did his work secretly before anyone had spoken to Mr. Scribner about the position. He stated to the reporter yesterday that he had talked with a great many citizens of Dunkirk, asking them what kind of a school superintendent they had, and he said he did not hear a word against Mr. Scribner. This, together with the recommendations of Mr. Scribner received from some of the most prominent educators in the state of New York, satisfied Mr. Hayden that he is all right and will make an excellent man to place in charge of the schools of this city.

The school system of Dunkirk is about as large as that of Ishpeming. Last year Mr. Scribner had sixty teachers employed under him and four or five more are to be added next year. The Dunkirk school board tried to engage him for a term of years at a salary considerably larger than he has received during the four years he has served there.

WILL GIVE TWO LECTURES.

Rev. Father Lacasse, the noted French missionary, will give a couple of lectures at St. Joseph's church, one next Sunday evening in the French language, and one Monday night in English. The reverend gentleman has traveled extensively and his talks are of the most entertaining kind. He will speak on the habits, customs, etc., of the Indian tribes of Nas-kapi, also the Esquimaux. The lecture will begin Sunday evening at 7 o'clock and on Monday night an hour later. The admission will be twenty-five cents for adults and fifteen for children under fifteen years. The proceeds will go to the church. All will be made welcome.

WHAT THIN FOLKS NEED

Is a greater power of digesting and assimilating food. For them Dr. King's New Life Pills work wonders. They tone and regulate the digestive organs, gently expel all poisons from the system, enrich the blood, improve appetite, make healthy flesh. Only 25c at Stafford's.

The best ice cream on the market. Special attention to picnics, socials, etc. H. C. Cain. (5-7-1f)

When you are figuring to save money on your purchases remember we are here to help you out. Finnish Mercantile association.

STREET RAILWAY TAXES.

Members of Commission and Local Assessors Discuss Them in Ishpeming.

Manville Jenks and James Walker were in Ishpeming one day the latter part of last week. Mr. Jenks is a member of the state tax commission and Mr. Walker is in the employ of the commission as a street and steam railway expert. His work is to place values on railway property of different kinds. He has served many years in railroad work and there is no better posted man in Michigan than he on the particular line of work he has in charge. The object of Mr. Walker's visit to this section at this time was to discuss street railway valuations with assessors. He spent a few hours with Assessor J. H. Quinn of Ishpeming and Assessor T. A. Thoren of Negaunee. He gave the assessors several pointers on the factors that should be taken into consideration when placing a valuation on the local street railway company's property. Mr. Walker was in the city a few months ago, when he went over the books of the company, also obtained such information as he required in order to perform his duty intelligently and impartially.

Under the present system of fixing valuations the Negaunee & Ishpeming Street Railway & Electric people will pay higher taxes to the cities of Ishpeming and Negaunee than they have heretofore. Last year the assessed valuation of the company's property was \$22,000, but this year it will be somewhat higher. The Negaunee end of the valuation was \$20,000 and Ishpeming got taxes on a valuation of \$12,000.

Steam Railway Taxes Greater.

In a talk with The Mining Journal representative Mr. Walker stated that the companies operating steam railways throughout Michigan will pay about \$1,000,000 more taxes this year than these corporations have paid in the past. This is all due to the new law, which will go into effect next December. The law, by the way, is one which the late Hazen S. Pingree had enacted while he held the executive office of the state. In discussing the matter Mr. Walker called attention to the fact that many who opposed the passage of the law governing the steam railway corporation's taxes are now satisfied that it will prove a good thing for the state.

Mr. Walker has inspected all the railway properties of Michigan since he has been out in the interest of the commission. He stated that the tax commission is in possession of such complete data that it can tell every foot of track each company owns; it can also tell just what material is used in the different departments; what the buildings, machinery, etc., are worth. There are many other things of importance that the commission can obtain accurate information about by reference to the books. It cost the state \$70,000 to obtain the information referred to, but with an increase of \$1,000,000 in the amount of taxes to be collected from the railway corporations alone it must be conceded that the money was well spent.

Taxes Were Based on Earnings.

The old system of collecting the taxes the railway corporations paid taxes on the earnings of the roads. A certain percentage was deducted and in cases where the earnings were small, regardless of the valuation of the property the taxes were light. Under the new law all railway property will be taxed according to its assessed valuation. Fixing the valuation of these properties is in the hands of the tax commission, so that there will be no dodging the issue. The basis of assessing such is the same as on other property.

Mr. Walker stated that if the local assessors do their duty and assess all property according to their cash values, or what they consider the cash value, the railway corporations will have their full share of the taxes to pay.

The different cities and townships throughout the state will derive some benefit from the money received in taxes from the railway companies, though the state will get the big end of it. The only money that will come to the different municipalities will be added to their school funds. The amount will be based upon the assessed valuation of the railway property in that particular community.

Mr. Walker will be busy for some time visiting assessors in different parts of the state where street railways are operated, giving them pointers on how to fix their valuations. It is evident that the street railway people are not going to escape paying their full share of the taxes under the law now operative.

A UNIQUE TURNOUT.

Will Be That of the Maccabees at the Great Camp Parade in Marquette.

Local members of the Maccabee society are manifesting much interest in the biennial celebration to take place at Marquette in June. The parade on the 10th is a feature that they will turn out for in goodly numbers. The three tents have adopted a unique uniform, which all members are expected to wear in the parade. The outfit will consist of a hematite overalls and jacket, a miner's oil hat, with stick and candle in front.

Three hundred of the suits and hats have been received at Kahn & Skud's store, and the members are already calling there to make their selections. The officers of all the tents wish the members to call early, so that more suits can be obtained in case the three hundred are not enough to go around.

The knights will be headed by the uniformed Degree team of the Finnish tent, for which swell new parade suits were ordered a short time ago. A band will also be taken along, so that the turnout from this city will be quite attractive. To many who will witness the parade, especially people from the lower peninsula, the uniforms of the Ishpeming knights will be quite a novelty.

Will Recommend Change in Law.

At the last meeting of Ambrose tent, John Hooper was chosen delegate to the great tent session. John H. Williams is the alternate. The delegate was instructed to recommend to the great tent that the law relative to the selection of delegates be amended. It is the wish of the local Maccabees that no member except a commander or past commander be permitted to represent the society at the biennial conventions. The members present at the meeting seemed to think that the men who are either in the chair or have passed through it are the best qualified to represent the organization. In this they are doubtless right, as the officers of the subordinate organizations are usually the best posted members. The members of the local tent would be pleased to have this question taken up by other tents throughout the state with a view to having the proposed amendment acted upon favorably.

ROSE COGHAN TONIGHT.

That splendid artiste, Rose Coghlan, appears here tonight in "Forget Me Not," a well-written interesting play which delighted New Yorkers for three hundred nights. An adventuress, Countess Stephanie De Mohrivart, is the center of interest and main-spring of action. Miss Coghlan dominates the whole play by reason of the arduous nature and the superb dressing of her part, her buoyant spirit, vibrant voice and her beautiful form. Time has robbed her of none of the attributes that have made her famous, but has given maturity, finish, force and variety to her acting.

Miss Coghlan and company will be greeted by a good-sized audience this evening. The local theater-goers realize that to see her will be a treat.

WON'T FOLLOW ADVICE AFTER PAYING FOR IT.

In a recent article a prominent physician says, "It is next to impossible for the physician to get his patients to carry out any prescribed course of hygiene or diet to the smallest extent; he has but one resort left, namely, the drug treatment." When medicines are used for chronic constipation, the most mild and gentle obtainable, such as Chamberlain's Stomach & Liver Tablets, should be employed. Their use is not followed by constipation as they leave the bowels in a normal and healthy condition. For sale by The Stafford Drug Co.

MUNISING IN LUCK

PLANT TO COST \$450,000 TO BE BUILT THERE.

BOTH PULP AND PAPER MILLS

CLEVELAND CLIFFS COMPANY HEAVILY INTERESTED.

Over 200 Hands Will Be Employed and Daily Output at Start Will Be Forty Tons—Construction Begins Soon.

The good news has reached Munising, through H. R. Harris, general manager for the Cleveland-Cliffs company's railway lines, that negotiations for the construction of pulp and paper mills in that village have been closed by President W. G. Mather and H. H. Everard and associates, residents of Kalamazoo.

The plant will consist of five large brick buildings and will cost when completed \$450,000. Two million, five hundred brick will be used in the construction and are already contracted for. Architects are busily at work on the plans and construction work will be begun just as soon as the specifications are completed, which will be not later than June 1. It is expected that the mills will be ready for operation by Jan. 1 next.

The new industry will employ seventy-five persons night and day the year round in the mills, and besides these there will be from 150 to 200 more given employment in getting out timber, etc. The mills will use 15,000,000 feet of timber each year. The timber will be converted into pulp by the sulphide process. Machinery will be put in the mills to finish forty tons of paper daily, but the buildings will be constructed with a view to doubling this output whenever it is desired. All kinds of paper from the cheapest print to the best grades will be manufactured. The site selected for the new industry is the bay frontage between the Loud mill and the Ann river. Five acres of land, which has been donated by the Cleveland-Cliffs company, will be required for the plant.

According to the Munising Republican, the industry will be capitalized by the Cleveland-Cliffs Iron company and H. H. Everard and his associates. Mr. Everard is one of the best known and most successful paper manufacturers in the United States, and it is said that he will be in Munising to give his personal attention to the construction of the plant and that he will also give close attention to it after it is in operation. The new company becomes the owner of all the hemlock, spruce, fir, balsam, tamarack and all other timber suitable for pulp on lands owned by the Cleveland-Cliffs company.

The Munising News says: "It is safe to say the building of this plant will increase the population of the village by several hundreds and the bare announcement of the fact will help the town materially. The securing of this

enterprise by the Cleveland-Cliffs company is another proof that this great corporation means to do well by Munising.

"The fact that the company is offering the most liberal and unheard of inducements to outside concerns to locate here has, The News believes, only commenced to bear fruit. That other important wood-working industries will be secured for the village before the season is over there seems every reason for believing. The locating of this plant here means there will be far more building done here this season and consequently there will be better and busier times than was anticipated."

IS A DRAMATIC TREAT.

The coming of "Arizona" to the opera house Thursday evening is a dramatic treat long deferred. Kirko LaSelle did not desire to present to the coast cities one of the road companies which played the smaller towns of the Middle West last year, and the metropolitan company was kept in New York for a second long run, which terminated last November. Since then the company has played successful engagements in Philadelphia, Boston, Baltimore, Washington, Chicago, and St. Louis, and a special company has just awakened the wildest enthusiasm at the Adelphi theatre, London, where "Arizona" was first presented on Feb. 3. J. W. Cope,

Grace Elliston as "Bonita," in "Arizona."

Dustin Farnum, Frazier Coulter, Grace Elliston, Grace Thorne, Frank Campeau, and all the favorites who had part in the second long run at the Academy of Music, New York, will be seen here. The scenic setting of "Arizona" is said to be particularly picturesque. The sketches for it were specially made in the Aravaipa valley by Frederick Remington, the famous artist, who is a personal friend of Augustus Thomas, the author. Seats for "Arizona" are now on sale at Bigelow's.

For rent, with dishes and glassware for receptions and parties. Palmer's Bazaar. (3-5-4f)

EXCELLENT MATERIAL.

Strong Track Team Will Represent the High School This Year.

The Marquette High school will have a track team this season that will do to present indications. The boys are putting in considerable time these days in practice work, and some excellent material is being developed aside from the older members, who are this year showing up remarkably strong. The school will be represented at the upper peninsula meet to take place at Ishpeming in the latter part of May. Preliminary to that, a class meet will be held here, probably about May 10, and the winners in that will participate in the peninsula contest. The boys last year secured second place; this year they are after first and promise to surprise the other contestants for the honor.

DROWNED IN A TEST PIT.

Hiram Burt's Driving Horse Finds a Watery Grave.

Hiram Burt is mourning the loss of his faithful driving horse, which has met death by drowning in a test pit near Mount Mesnard. Mr. Burt, accompanied by Dr. Gregory of Menominee, drove to the vicinity on an inspection tour. There the horse was left to its own resources for a time while the gentlemen strolled about to get a better view of the country. Returning to the point where the outfit had been left, neither horse or phaeton were visible. Tracks, however, showed in which direction the horse had gone, and following these the gentlemen came to the test pit, an excavation of about thirty feet in depth. At the brink of this the trail disappeared, and while the two men were gazing down into the water the bubbles that came to surface explained the fate of the animal—horse, phaeton and all were at the bottom. Later a seat cushion came to the surface, and with this confirmation of the tragedy the gentlemen wended their way back on shank's mare. The supposition is that the horse went to the pit for a drink and in endeavoring to reach the water tumbled down into it, a number of feet below.

Harbor Gossip.

The steamer Melvin S. Bacon is in port with 1,200 tons of coal for F. B. Spear & Sons.

John H. Gillette has been appointed customs deputy at Presque Isle to succeed Henry J. Hopkins, deceased. The appointment is a good one.

The big schooner Warriner has been loaded with 4,000 tons of ore at the South Shore docks. She will be towed down the lakes by the steamer Plagg, which has been taking on a cargo of copper at Torch Lake.

She's radiant, wifthing, wondrous gem that beautiful, blushing wife of mine. She is an angel on earth, so you can, only take Rocky Mountain Tea. The Stafford Drug Co.

LARGER SEWER.

It Probably Will Be Laid in Rock Street to End the Trouble.

For some time the sewer in Rock street, between Third and Front, has been causing the residents of that locality considerable trouble. The sewer has a bad habit of becoming clogged, allowing the water and sewage to back up and flood cellars. Altogether, being of but six-inch pipe, the sewer is inadequate for the proper drainage of the territory concerned. The property owners in that vicinity have now petitioned the council for remedial action, and the matter has been referred to the street committee, which will investigate the conditions and make recommendation at next Monday night's meeting as to what shall be done. It is likely that the sewer will be taken up and replaced by one of eight-inch pipe.

It has been decided that a six-inch sewer be laid in Crescent street, between Third and Fourth streets, instead of an eight-inch sewer as the original profile called for. There is only one block to drain, and the smaller pipe is considered entirely adequate. The sewer will extend from the manhole in the Third street sewer to the curb line of Fourth street. In Third street it will connect with an eight-inch sewer.

THREE THOUSAND STRONG.

Copperdom Maccabees Coming to Marquette Convention in Force.

There will be over 3,000 copper country people who will attend the annual state convention of the Maccabees to be held in Marquette the early part of June. That many names, according to the Houghton Gazette, have been subscribed to the list of those who intend to go and for whom accommodations should be provided. Several trains will be provided by the South Shore road to take the copper country delegation to Marquette on June 10. Attorney Healy has returned from Marquette, where he completed arrangements for the transportation of the copper country delegation and their accommodations.

He was very successful in making the arrangements and it will be within the means of all to attend. The fare for the round trip from Calumet to Marquette will be \$3, from Houghton and Hancock, \$2.50. The South Shore road has agreed to furnish several special trains to carry the three thousand or more copper country people to Marquette June 10.

The copper country delegation will wear unique uniforms. The committee which was appointed to make some choice of a uniform will make a report at a future meeting. It is proposed to appear in regular mining garb.
