WORN OUT EXPRESSION

Every druggist ever known advertises "Pure Drugs." Of course, druggists themselves know that there is a whole lot of substitution and adulteration being done all the time, not to speak of downright buying of cheap, stale stuff and known to be so—but labeled "Pure Drugs." But the general public also knows that there's "lying" somewhere; for no class of men is perfect. When every last druggist says that he sells "Pure Drugs," there's certainly a screw loose in the honesty valve.

The question is, "Who can you believe?"
Come in and let us show you our back room and down stairs, and behind our prescription counter and everywhere through the store—then judge of the quality and freshness and purity of our drugs.

ROOSEVELT'S TOUR COMES TO AN UNTIMELY END

President Is Forced to Undergo a Surgical Operation at Indianapolis.

DANGER OF BLOOD POISONING IS DISCOVERED

Swelling on Leg as Result of Recent Trolley Accident Alarms Physicians and Knife Is Resorted To—No Fears Now of Serious Results, and the Train Is Headed Back to Washington.

Indianapolis, Sept. 23.—President Roosevelt's Western trip came to an untimely end today. He was found to be suffering from a swelling in the left leg, between the knee and ankle, that required immediate surgical attention, and instead of being taken to a train to continue his journey to Fort Wayne and Milwaukee he was conveyed to St. Vincent's hospital, where he was operated on.

The operation occurred at 3:45 o'clock and lasted only a short time, when he was taken to a private room in the hospital to rest. After taking a light luncheon, at 7:50 p. m. he was conveyed on a stretcher to his train, which had been backed up on a "Y" near the hospital, and the train left for Washington.

Many Rumors Set Afloat.

The first intimation that anything was wrong came in the form of rumors to the great crowd patiently waiting around the Columbia club and the Soldiers and Sailors' monument for the president to appear.

It was about half past two o'clock, half an hour after the time set for the president to leave the city, that a few favored ones in the crowd received intimations that the president was sick and that the rest of the trip would probably be abandoned. These statements were denied as fast as they gained currency, but soon the rumors began to take on a more serious character. One was that he had been shot.

The rumors, however, did not appear to reach the crowd, and the thousands stood patiently after the speech by the president from the balcony to the National Guard was drawn up along the street, just in the rear. Secret service men and the local police and detectives crowded the sidewalk in front of the club, keeping back the people. A command was given to make room, and a path was cleared to the carriage. Then, as if in answer to the rumors of his illness, the president, accompanied by Senator Fairbanks, with a quick, sturdy gait came down the steps and hastily entered the carriage. Senator Fairbanks, Secretary Cortelyou and Governor Durbin took seats in the carriage with the president. The carriage started immediately. A carriage containing secret service officers followed closely in its wake, and a third one, containing Assistant Secretaries Loeb and Barnes and Drs. George J. Cook and J. J. Richardson, closed up the rear.

No sooner had the carriages started than Captain Callon, with twenty mounted artillerymen, and Captain Hyland, with as many mounted police, surrounded them and in a few seconds the cavalcade swung at a rapid gait down Meridian street. The crowd in the circle had hardly got a glimpse of the carriages before they were gone. Much to their surprise, the soldiers were left behind, and also a number of carriages. Yet they sent up a cheer and apparently took it for granted that there was nothing unusual in this method of leaving-taking.

Trip to Hospital Quickly Made.

The cavalcade started south on Meridian street between rows of banked-up humanity. The falling rain appeared to furnish the reason why the president's carriage should be entirely closed. The people cheered as the president passed. When the depot was reached slight delay arose in crossing the tracks because of a train that was about to leave. The engine was stopped as it started on its way across the street, and the carriages went galloping over the tracks and on to South street. The crowd at the depot looked upon this maneuver with wonder, but the carriages turned sharply to the east and in a few minutes the distance to St. Vincent's hospital was covered.

Soon as Captain Hyland, of the police, arrived there, he alighted and, running to the door of the president's carriage, assisted him to alight and walked with Senator Fairbanks and Governor Durbin up the steps of the hospital. The occupants of the third carriage quickly followed. At the same time Captain Callon had stationed his men about the entrance and a squad of police, who had been sent to the hospital before the president left the club, formed a cordon about the building. Everything was done with dispatch and the gathering crowds were kept at a distance. No one was allowed to enter the hospital except those belonging to the president's party or those who had special business there.

After the president entered the operating room, he sat down on a stool and waited for instructions from the physicians and surgeons, watching their preparations with keen interest.

"I am awfully sorry I cannot continue my Western trip," said he. "Can't you let me go ahead with it after this thing is over?"

Suffers Without a Murmur.

One of the surgeons told him it would be very indiscreet, assured him the operation was not serious and strongly advised the discontinuance of the trip. The president then consented to follow their advice and prepared for the operation. It proceeded without delay. The president suffered some pain, but he said nothing.

Afterwards he was taken to a room, where he was served with a light luncheon, chatting pleasantly to those in the room. At 7:45, lying on a stretcher and escorted by a company of infantry, he was carried to his train.

It was noticed, however, that he walked with a slight limp.

The detachment of soldiers which guarded the hospital consisted of men who served in the Spanish-American war under command of Colonel Russell B. Harrison. Colonel Harrison was instructed to arrange for the sisters in charge of the hospital that no information as to the president should be given out by telephone. As the news spread throughout the city the telephones were kept busy, but the same answer was returned to all—that nothing could be told over the wire.

Train on a Slow Schedule.

Richmond, Ind., Sept. 23.—President Roosevelt's train arrived here at 9:45 p. m. The president is cheerful and is lying in bed with his leg propped up on a pillow. The train will run on a slow schedule and is due in Washington at 6:30 tomorrow evening.

Washington, Sept. 23.—The illness of the president and the consequent abandonment of his Western trip came as a total surprise to everybody in Washington. An official report of the president's condition was received from Dr. Lung, who accompanied the president. A most favorable view is taken here of the outcome of the operation.

Mrs. Roosevelt Joins Him Today.

Oyster Bay, N. Y., Sept. 23.—Mrs. Roosevelt received the news of the president's indisposition in a telegram which assured her there was nothing alarming about the operation. She will go to Washington tomorrow.

Chicago, Sept. 23.—Secretary Shaw left for Washington at midnight tonight. He said his return was because of the illness of the president. There was no other reason, he declared, for his return.

Sympathy Expressed at London.

London, Wednesday, Sept. 24.—The papers this morning publish the details of the operation on President Roosevelt. Much sympathy is expressed.

HAY'S PLAN IS CRITICISED.

Russian Paper Thinks Roumanian Jews Better Off Than Filipinos.

St. Petersburg, Sept. 23.—The first comment here on Secretary Hay's note to the powers on the subject of Roumanian treatment of the Jews appeared today. The St. Petersburg Zeitung says: "One may well rejoice if the American intervention letters the sad lot of the Roumanian Jews. However, one doubts the unselfishness of the American step, since the Roumanian Jews are probably much better off than the Filipinos." The same paper approvingly quotes German newspaper criticism of Secretary Hay's action.

Favorable Comment at Berlin.

Berlin, Sept. 23.—The Vossische Zeitung today quotes a Roumanian paper as saying that "the new law contains no provision not already in the existing trade law" and as calling for an energetic protest against foreign interference in the Roumanian trade law controversy.

The Vossische Zeitung, commenting on this, suggests that while every other state can justify objection to a foreign state mixing in its affairs, Roumania cannot, because its independence was dependent upon complying with the conditions of the Berlin treaty. It also calls attention to the fact that Secretary Hay's note is addressed to the signatories of the Berlin treaty, and not to Roumania. The Zeitung considers it highly probable that the signatories will exchange views in order to reach a common action, and that this action will not consist in a simple rejection of the American note.

STILL DENIES THE MURDER.

Killing of Mrs. Pulitzer Laid by Young to Another Man.

New York, Sept. 23.—William Hooper Young, the alleged murderer of Mrs. Annie Pulitzer, reached the city from Derby, Conn. this morning. There was a large crowd at the station, but no demonstration was made.

At the close of an interview between Detective Captain Titus and Young, Mr. Titus said that Young had made a statement to the same effect as the one made at Derby, Conn. last night. He claimed that a man named Charles Simpson Eiling had done the killing in Young's flat during the latter's absence. In the hope of avoiding the disgrace of the affair if he informed the police, Young said he started to cut the body of the woman to pieces but the odor was so awful he was forced to desist.

DAN PATCH EQUALS RECORD.

Paces a Mile on the Readville (Mass.) Track in 1:59 1-4.

Readville, Mass., Sept. 23.—Dan Patch went against the world's pacing record of 1:59 1/4, made by Star Pointer on the Readville track five years ago, this afternoon, and equalled the record. The horse went a warming-up mile in 2:13. In his race against the record not a skip was made in the whole mile, but it was not until the third quarter that everyone felt convinced the record was in danger. Up the stretch came the pacer, beating out the runner and flashing under the wire a worthy mate for Star Pointer, his time being 1:59 1/4. The time by quarters was: 30 1/4; 59 1/4; 1:29 1/4; and 1:59 1/4. Driver McHenry was wildly cheered and the crowd rushed to the rails to see the horse blanketed and led away.

HIS ACCOUNTS SHORT \$73,000.

County Treasurer in Pennsylvania Is Arrested for Embezzlement.

York, Pa., Sept. 23.—County Treasurer William O. Thompson, charged with the embezzlement of county funds to the amount of \$75,000, was arrested today and placed under \$50,000 bail.

HAZELNUTS KILL A CHILD.

Carthage, Ill., Sept. 23.—The eleven-year-old daughter of C. X. Martin died today, after a few hours' violent illness, from eating green hazelnuts.

URGES BIGGER NAVY

PRESIDENT PLEAS FOR STRENGTHENED POWER AT SEA.

FLEET RIGHT ARM OF NATION

TOO MUCH CANNOT BE DONE TO INCREASE EFFICIENCY.

Monroe Doctrine Declared the Cardinal Principle of Our Foreign Policy and Country Must Be Ready to Back It Up With Vigor.

Indianapolis, Sept. 23.—In his speech at Tomlinson Hall today, the president, speaking to the veterans of the Spanish war, urged the need of preparedness. Modern war is determined quite as much as by what the antagonists have done in advance of the outbreak as by what they do afterwards. Modern conditions have brought our frontier many times nearer the old world than in the days of sailing ships.

Large Army Not Needed.

Owing to our position, we do not need a large regular army. We must depend for an army upon volunteers, and every encouragement should be given the National Guard and every means placed at their disposal to reach the highest point of efficiency. The average American is always ready, and all that is necessary to make a good soldier of him is to give him a chance in the open.

But in the navy it requires much more time. A modern warship cannot be built under three years, and without necessary previous training the officers and men aboard her would be absolutely helpless to make use of her formidable engines of destruction. Under these circumstances, he urged the careful training of men for the navy.

Powerful Fleet Absolutely Essential.

"I believe in the Monroe doctrine with all my heart," said the president. "I believe in asserting it because I believe the American people are willing to back it up. But it never can be backed up by words alone. If it became the interest of some great power to violate it, most assuredly that great power would do so if it was thought that we would only bluster and threaten or if it was believed our force was too weak to be formidable in a fight. A good navy is absolutely essential if we intend to treat the Monroe doctrine as we should treat it, that is, as a cardinal feature of our foreign policy."

The fleet is in a peculiar sense the property of the nation as a whole. Every American, whether living inland or on the sea coast, if he is both far-sighted and patriotic, should be peculiarly jealous about the efficiency of the navy. It would be the right arm of this country in the event of foreign trouble. Disaster to it would send a thrill of mortal anguish through the heart of every good citizen; and the triumph won by it would in the future, as they have in the past, make every American hold his head higher in pride and joy.

"The navy must be built up, and it must be continually exercised and trained so that the officers and men may attain the highest degree of excellence in handling the great war engines entrusted to their care."

OPPOSED TO TARIFF REVISION.

Iowa Plan the Subject of Roosevelt's Address at Logansport.

Logansport, Ind., Sept. 23.—President Roosevelt and party reached Logansport at 7:15 o'clock this morning. They were transferred from the Wash to the Pan Handle tracks. A large and enthusiastic crowd was at the station. With an escort of Spanish war veterans and G. A. R. members, the party was driven to the high school, where the president delivered a five-minute speech from a platform built on the lawn. The party left at 8:40 o'clock for Kokomo.

Rain fell quite heavily while the president was speaking. His speech dealt on tariff revision. He said that no nation can stand radical readjustments of the tariff schedules at short intervals. Continual sweeping changes cannot be disastrous, but where industrial needs shift as rapidly as they do here, where we often do in one year what Europe does in ten, we need a reapportionment of established principles to the changed conditions. We must readjust without resorting to a violent surgical operation, the dread of which alone would paralyze the business of the country. We must solve this problem with partisanship as a secondary consideration. The president said his own personal preference would be for a tariff commission.

Greets by School Children.

Noblesville, Ind., Sept. 23.—President Roosevelt reached here at 11 o'clock and was greeted by 3,000 people. After a stop the train started for Indianapolis. At Tipton, the stand from which the president spoke was directly opposite his train. Immediately in front of his stand were grouped school children, each one carrying a small American flag. The president devoted his short address to the subject of good citizenship.

Indianapolis, Sept. 23.—The special train bearing the presidential party arrived here shortly before noon. The party were driven directly to Tomlinson Hall, where the president addressed the Spanish-American war veterans after which he had luncheon at the Columbia club. At 2 o'clock the president addressed a large and enthusiastic crowd in Monument place from the Columbia club balcony. All along the route to Tomlinson Hall the chief executive was

(Continued on Page Four.)

Thousands Have Kidney Trouble and Don't Know It.
 How To Find Out.
 Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains your linen it is evidence of kidney trouble; too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

What to Do.
 There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and swelling pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in 50c. and \$1. sizes. You may have a sample bottle of this wonderful discovery and a book that tells more about it, both sent free by mail, absolutely free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper.

MARQUETTE, MICH., SEPT. 24.

Entered as second matter of the second class in the postoffice at Marquette, Mich.

Labor Commissioner Carrol D. Wright addressed the National convention of employers and employees at Minneapolis Monday, his subject being, "Is there any solution of the labor problem?" Judging from his report on the disturbances in the anthracite fields, Mr. Wright was a poor man to whom to assign such a topic.

Detroit has apparently acquitted itself most creditably in its reception and entertainment of the president and his party. His visit to Detroit was unmarred by a single untoward incident, and it was remarkable for the spontaneity with which the people entered into the spirit of the occasion. The president left Detroit for Indianapolis, the next place on the itinerary of his round of the northwestern states.

C. J. Byrns is slated for re-nomination at the convention for the second legislative district for Marquette county at Ishpeming today. Wells and Byrns should make a team in the next house that will be abundantly capable of looking after the interests of this county, whenever they may be affected by measures before the legislature. Byrns knows the ways of the house and Wells' friends predict that he will show considerable aptitude in learning them.

Something ought to be done to save the Alpine tourists from themselves. This year's death toll is appalling. Up to the first of September sixty-three deaths had been recorded and several accidents have occurred since then. The annual average of fatal accidents, as published by the Alpine club at Berne, embracing a period of eleven years, from 1890 to 1901—is twenty-seven, so that this season seems to have established a record. Most of these accidents have been due to the carelessness and ignorance of tourists who think they can dispense with the service of guides, but several casualties have been reported of experienced climbers and guides. The increase is due primarily to the ever-growing crowd of "trippers" from Germany, and it is this class which has suffered the most. At the next meeting of the Swiss Alpine club the question of introducing measures to prevent this terrible death toll will be discussed and new regulations will be made to safeguard the tourists.

By the assessment of the war tax it has been possible for the first time to secure with approximate accuracy a general census of the Chinese Empire. The figures thus secured show that the present population varies surprisingly little from that recorded by various European statisticians in the middle of the last century and is considerably greater than that given by statisticians in the last few years. A half century ago a majority of experts placed the population between 425,000,000 and 450,000,000. In the present time it has been set at a considerably lower figure (about 400,000,000) in this, because of the better sources of information, was considered to be about correct. According to the latest official figures, the total population is 426,000,000, which includes 8,000,000 in Manchuria, 2,580,000 in Mongolia, 6,430,000 in Tibet and 1,200,000 in Chinese Turkestan. Shantung,

Salt Rheum
 You may call it eczema, tetter or milk crust.
 But no matter what you call it, this skin disease which comes in patches that burn, itch, discharge a watery matter, dry and scale, owes its existence to the presence of humors in the system.
 It will continue to exist, annoy, and perhaps agonize, as long as these humors remain.
 It is always radically and permanently cured by
Food's Sarsaparilla
 which expels all humors, and is positively unequalled for all cutaneous eruptions.

with a population of 38,247,900, is the most densely peopled province of China. Kiangsu, in which Shanghai is situated, has a population of 1,398,235. On an average China proper is not more thickly settled than the German Empire.

The county ticket placed in nomination by the Republicans assembled in convention here yesterday is one that will find favor with the electorate. The incumbents of the several offices were, without exception, endorsed for another term. The nature of their services in the past is a guarantee for their work during the next two years. If the county ticket was strong two years ago, it is much stronger this fall, inasmuch as the several officers have had an additional opportunity to demonstrate their ability in their several capacities. The ticket placed in nomination yesterday should receive one of the largest majorities in the history of the county.

Twenty weeks of the strike in the anthracite fields will be completed in a few days, and the immediate future promises no settlement of the bitter struggle between miners and operators. Despite the fact that a little of the hard fuel is being mined here and there, and hunger, and the utmost ingenuity of the mine owners have not availed to make any appreciable impression on the steadfastness of the men, who appear as determined as ever. A threatening phase of the situation is an increasing tendency toward lawlessness. It is probably indicative of increasing severity of the hardships that the men are undergoing. It will be strange if the struggle is brought to a conclusion without an outbreak that will shock the country.

AN AMERICAN INDUSTRY.
 A fine, great industry in which the United States leads the whole world is handsomely described in the Census Bulletin on Locomotives, prepared by Edward H. Sanborn of Philadelphia, Expert Special Agent, and just published under the supervision of Mr. S. N. D. North of Boston, chief statistician for manufactures. It is significant that there are only twenty-eight locomotive manufacturing establishments in the whole country, a gain of nine since 1890. One secret of the success which locomotive-building has attained in America is that the work is performed by large, financially powerful and thoroughly equipped establishments, and not by many small and weak concerns. These twenty-eight locomotive-building plants have the very large capital of \$40,813,000, a notable increase over the \$24,516,000 of 1890. These twenty-eight establishments employ 19,039 wage earners, many of them highly skilled workmen, who earned in 1900 total wages of \$10,899,000. These concerns use material valued at \$20,174,000, and turned out finished products valued at \$35,209,000, a large gain over the \$24,922,000 of 1890. In the year 1890, 2,400 locomotives were built in the United States; in 1900, 2,774. This is no very great increase in numbers, and no such increase was to be expected. For the modern railroad practice is to employ larger, more powerful and, therefore, more costly locomotives, instead of many of them. It is safe to say that the average freight or passenger locomotive of the present will do twice the work of the old, relatively crude machines of twenty or thirty years ago.

Locomotive building is chiefly an industry of the middle states. Pennsylvania, in 1900, made 48 per cent of the total product of this industry. New York was second, with 27 per cent. The very first locomotives used on railroads in this country were of British make. But our railroad managers and their government had the wisdom to see that it would not be safe for the United States to depend upon Europe for this indispensable machinery of national transportation. American locomotives, therefore, for many years have been American-built. The swift extension of our railroads has developed a thorough American type of railway engine, radically different from that of England and the continent, and apparently superior. For our exports of locomotives have grown from 161, valued at \$1,280,000 in 1890, to 825, valued at \$5,592,000 in 1900. These American locomotives have not only gone into relatively undeveloped countries, but they are being used in large numbers in England, France and Russia. The merits which have won them their high reputation abroad have been not only their low cost, but the high quality of their material and workmanship, and the promptness with which they can be delivered. Our locomotive works have applied the principle of interchangeability of parts. They have had the stimulus of a great and steady demand from American railroads. They have, therefore, operating continuously on a large scale, reduced the cost of production to a figure which enables them to compete with the cheaper wages of Europe.

The contrast between American locomotive-building and American ship-building is most significant. The American people have just as much native aptitude for the one as for the other. Because we have used foreign ships chiefly to carry our goods overseas, our shipyards have not grown with the growth of the nation. But we have not used foreign locomotives. We have built our own, and, building so many, we have been able to construct

them so cheaply that the shriek of the American whistle and the clang of the American bell are making themselves heard around the world.

LAKE MARINE AND RAILWAYS.
 The Cleveland Plain Dealer has the following interesting discussion of the successful efforts of the lake marine men to keep abreast of the demands of the constantly growing business and the comparative failure of the railroads to do the same thing:

Within a few days orders have been placed with the American Shipbuilding company for the construction of eight first class steel steamers for the lake trade. That company has now in its yards under construction, or orders placed with it for construction as soon as room can be made for them, thirty-four steel steamers, of which all but one are freight carriers, and orders for two large passenger steamers are under consideration. Taken in connection with the large additions that have been made to the lake marine during the past two or three seasons, this is one of the most extraordinary shipbuilding booms in the history of the United States for very many years. It is a conclusive answer to the pessimistic predictions of a few years ago that lake commerce had seen its best days, that there was no more money in lake vessels, and that railroads had practically put the lake marine out of business.

The statistics put out by the United States treasury bureau a few days ago are impressive of the lesson taught by the unprecedented activity of the shipyards on the lakes. The figures for 144 ports on the lakes for the first seven months of the year 1902 show an increase of over 30 per cent in receipts over the corresponding months of last year, and of 37 per cent in shipments. When it is remembered that 1901 was itself a banner year, the significance of this remarkable increase can be understood. More noteworthy still is the fact stated in the treasury returns that the lake traffic tonnage in American bottoms during the first seven months of 1902 was nearly double that of the total foreign traffic of the seven principal ports on the Atlantic and Pacific coasts for the twelve months of 1901. American and foreign bottoms combined. The total registered tonnage entered on the lake during the seven months was 35,087,876 tons, and cleared 35,701,701 tons. In the twelve months of 1901 the combined registered tonnage in the foreign trade of New York, Boston, Philadelphia, Baltimore, New Orleans, San Francisco and Puget Sound was 18,808,808 tons entered, and 18,487,246 tons cleared.

While the lake marine has thus been enlarged to meet the rapidly increasing losses of commerce and the manufacturing interests, it has been seriously hampered by failure of the railroads to make similar progress. The freight car and locomotive service has become more and more inadequate to the demands upon it of the traffic to and from the lake ports. This entails heavy losses to the lake interests. During the present season vessels have been detained in the lake Erie ports on an average four or five days, entailing a loss to the large steamers of not less than \$500 a day. One carrier arriving from the upper lake ports have to wait for trains into which to discharge. In the case of the smaller craft, they are compelled to return light, while long trains of coal are left on the tracks between the mines and the ports. As a consequence there is danger of a famine in the upper country, not only of anthracite but also of soft coal, notwithstanding the additional tonnage of the latter.

That is not the only loss due to the shortage of car and locomotive supply. There is a coke famine, not because there is not sufficient coke at the ovens, but because it cannot be hauled to the furnaces. This has compelled the banking of ten to fifteen furnaces from the lack of coke, entailing heavy losses on the furnace owners, or the banking of a furnace costs from \$1,500 to \$3,000, or \$7,000.

There is another feature of the situation of this great fleet of steamers under contract at the lake shipyards will require a large amount of steel. The lake marine has done its best toward providing the steel by bringing down more ore than in any previous year. But the railroads have been unable to give the ore quick dispatch to the furnaces, or to bring the coke with which to convert it into steel. As a result, there is so little prospect of getting a sufficient supply of steel for all the vessels that the shipbuilding company will probably have to buy part of its supply from abroad. Pig iron has already been purchased abroad to meet pressing needs. With an unlimited supply of ore and coal, unbanded energy and enterprise in transportation, and an enormous demand for the finished product to be used in the building of steamships for the lakes, in the making of railway tracks, in engineering works, and in other forms of steel manufacture, it seems inconceivable that our shipbuilders have to import foreign steel for their ships, and railroads buy foreign rails for their lines, thus giving employment to foreign labor which would have been retained by our own people had the railway freight service kept pace with the lake vessel service in supplying the needs of our rapidly developing industries.

A PARSON'S NOBLE ACT.
 "I want all the world to know," writes Rev. C. J. Bullion of Ashaway, R. I., "what a thoroughly good and reliable medicine I found in Eberle's Bitters. They cured me of jaundice and liver troubles that had caused me great suffering for many years. For a genuine, all-around cure they excel anything I ever saw." Electric Bitters are the surprise of all for their wonderful work in liver, kidney and stomach troubles. Don't fail to try them. Only 50 cents. Satisfaction is guaranteed by Stafford Drug company.

"I had kidney trouble so bad," says J. J. Cox of Valley View, Ky., "that I could not work. My feet were swollen to twice their normal size, and I was confined to my bed and physicians were unable to give me any relief. My doctor finally prescribed Foley's Kidney Cure, which made a well man of me." People's Drug Store.

PLEASANT TO THE TASTE.
 One of the most important requirements in a medicine to be given to small children should be that it is pleasant to take. Bad tasting medicines disturb the stomach, destroy the appetite and it is extremely difficult to get children to take them. The pleasant flavor of Dr. Geo. Tonic Laxative Syrup, the certain cure for dyspepsia, constipation, and biliousness, pleases the most sensitive persons and is the ideal laxative for young children. Sold by The People's Drug Store.

Upper Peninsula.
 The Western Hay Fever association of the United States, capital \$10,000, headquarters St. Ignace, has been incorporated at Lansing.

Maggie Kehoe, a little Menominee girl, while playing on a sidewalk caught the heel of one of her shoes in a crevice between the planks. She was thrown heavily, fracturing her left arm and also dislocating it at the elbow.

Homer Brown, aged eight years, of Stephenson has through accident lost the sight of one of his eyes. He was playing "shimmy" with a tin can. His stick broke in two and one of the pieces struck him in the eye, destroying the optic.

The Soo Hardware company's retail store on Ashmun street was visited the other night by burglars who got away with a small amount of cash and several knives and revolvers. The thieves effected their entrance through one of the rear windows of the store.

A number of the players of the Riverside Golf club of Menominee went to Iron Mountain Saturday and played match games with members of the club from that city. All but two of the Menominee players beat their opponents and H. T. Emerson succeeded in lowering the best score that had been made on the Iron Mountain links. Until that time it was twenty-four, but on the second time around Mr. Emerson made it in twenty-one.

A suspender buckle saved the life of Edward Hovey, a young farmer living about a mile north of Talbot, near Menominee, Saturday. He was working in his potato patch when a bullet struck his suspender buckle with such force that he was knocked down and stunned. The buckle was bent almost double and the mark of the bullet was plainly visible. It is thought that the bullet came from the rifle of some hunter in the woods near by, although none was seen.

Ex-Congressman S. M. Stephenson of Menominee has on exhibition in the window of his office in the Stephenson Hotel building, some samples of the apples and corn grown on his Pine Hill farm, near the city. The apples average about twelve ounces in weight, some of them being a pound. There are a thousand apple trees at the Pine Hill farm. Magnus Nelson, another of Menominee country's leading farmers, and perhaps its most extensive fruit grower, has shipped several crates of apples to Pontiac for the state fair. He expects to display only two different varieties. Mr. Nelson has already won a number of blue ribbons for his fruit at Michigan state fairs.

The announcement at Menominee that F. C. Nowack, a well known coal dealer, was contemplating the experimental work of manufacturing a variety of fuel composed of refuse coal dust and a certain grade of clay, a quantity of which he already has on hand, has caused considerable comment in the city. Mr. Nowack will begin his experimental work at the earliest possible moment, and if his efforts meet with success he has more than sixty tons of first class coal dust as a basis for the manufacture of the new fuel. It has been practically demonstrated through trials made in other sections of the country that the fuel made by this process will give almost as much heat as anthracite coal in its natural state and is much cheaper.

The company which will erect a big paper mill at the Soo has its plans so far advanced that work on the plant will begin about the middle of next month and be completed some time next June. The mill proper will cost \$800,000, producing 125 tons of paper a day, and will be one of the largest and most modern of similar plants in the country. Funds for the big mill have been provided for by an \$800,000 issue of bonds, which have all been taken by Detroit capitalists, arrangements for this having been recently completed. With construction work going on at the paper mill, the car-bide plant, the white metal works, Hatch Electric company plant and the many varied industries which are practically assured, Sooties as a rule are taking a rosy view of the future.

George H. Fromm, the man who assisted in the capture of Neil Sinclair, the murderer of E. W. Keyes, 47, Officer on last week, again distinguished himself a day or two later. Officers were unable to find Dan Sinclair, brother of the murderer, who is charged with murder as an accessory to the crime, and the sheriff deputized Fromm with instructions to arrest him. Fromm said he would do it, and started out. He came upon Sinclair camped in the woods with a party of friends as a bodyguard. Sizing up the situation Fromm decided to wait awhile. Going to the camp again at 1 o'clock in the morning he found that many of Sinclair's friends had gone and the others were asleep. Walking into the tent he placed the hands on Sinclair, and without a protest from the bodyguard walked out with his prisoner.

Fred Pearn of the Soo has been arrested on a warrant sworn out by Andy Bros. the Syrian merchants of Ashmun street, charging him with the theft of \$400 in cash and checks. Andy Bros. claim that the money was taken from the till; that Pearn had been in their store and purchased a shirt, some collars, etc. Pearn was rolling a cigarette when another customer came and Andy went to the other side of the room to wait on him, leaving Pearn near the till. Andy says that when he returned to that side the money was gone; that Pearn was the only one on that side of the store, and accuses him of taking the contents of the till—cash and checks amounting to \$400. Pearn was arrested in front of the Victoria saloon half an hour later. The accused is an upholsterer and protests his innocence.

Copper Country Department

ENDS THE SEASON OCT. 1.

Steamer Iroquois to Be Taken to the Lower Lakes for Alterations.

The steamer Iroquois, of the White line, plying between Duluth, Port Arthur, Isle Royale and Houghton, will end its first season on the run on Oct. 1. The boat will then be taken to one of the lower lake ports for a number of alterations and will winter there. Captain Singer is well pleased with the business done this year. The placing of an fine boat as the Iroquois on the Duluth-Houghton run has been in the nature of an experiment, but the traffic secured has proven satisfactory and the Iroquois will ply on Lake Superior again next season. It is the intention of the company to increase the number of berths on the boat from fifty to seventy-five; this work will be done during the winter. After Sept. 26, the Iroquois will discontinue its trips to Isle Royale and Port Arthur. The summer hotels at Isle Royale will be closed for the season the latter part of this month.

Passenger Season About Over.

J. C. Thomson, local agent of the Anchor line, which owns the popular passenger steamers India, China and Japan, plying between Buffalo, Houghton and Duluth, said yesterday that the tourist business this summer has been good while it lasted, but that on the whole it has been poor on account of the short season. "The boats are still carrying a few passengers," said Mr. Thomson, "but the season is practically closed; in fact, it ended fifteen days ago. We consider a good season from June 15 to Sept. 15, but this year the season was late in opening and early in closing. It has fallen short about a month. It did not open until the first of July and it has been considered closed since shortly after the first of this month. The unusually cool summer was the cause for the late start, but when the season did open the passenger traffic was very good. The India, China and Japan still have a few passengers."

DEMOCRATS WAKE UP.

Will Put Up a Full County Ticket and Work Hard for It.

A call was issued yesterday by Edward Ryan, chairman of the Democratic county committee, for a county convention to be held Oct. 1. The Democrats have decided to put a full ticket in the field and to get into the campaign in earnest this fall. Before the Republican county convention was held there was some talk of an independent Republican ticket in the event that prosecuting attorney Larson went through, however, all rumors of another ticket have vanished in thin air.

PLAYED TO CROWDED HOUSE.

First Production of "A Night in Bohemia" a Pleasing Success.

A telephone message from Calumet to The Mining Journal late last evening stated that the initial performance of "A Night in Bohemia," produced by the Calumet Elks at the local theatre, was a pleasing success. The Elks and others participating making a decided hit. The company was greeted by a crowded house, as likewise was the case again this evening. The audience seemed to enjoy every minute of the production. The feature of the comedy are the musical specialties, the play being brim full of bright, clever songs and dances. Encores last evening were numerous. The Salvation Army act is one of the best in the show. The proceeds of each night's performance will go into the local Elks' charity fund.

WILL LOCATE AT THE SOO.

W. J. Light Resigns as Manager of Tamarack Co-Operative Store.

W. J. Light resigned yesterday as manager of the Tamarack Co-operative store. He has been considering doing so for some time, it being his desire to remove to Sault Ste. Marie to take charge of his lumber business there. The directors of the co-operative society will accept the resignation. Mr. Light's lumber business at the Soo has grown to such proportions that he has decided to devote his entire attention to it in the future. He will remove to that city with his family shortly after the first of the year. He has been the manager of the Tamarack store for the past twelve years, ever since the society was organized, and the success of the enterprise has been largely due to his efforts.

RAILWAY WORK HAMPERED.

The street railway company is meeting with a slight delay in the construction work on its extension from Calumet to Lake Linden because of the non-shipment of Oregon fir for use as bridge stringers. There is a scarcity of that kind of timber. The company has been notified not to lay its tracks for the extension on Lake Linden avenue at Calumet, which will also cause some delay. Another street will have to be taken.

MAY WRESTLE AT BUTTE.

Tony Harris of That City Out With a Challenge to Dwyer.

The Butte Inter Mountain has come out with a challenge issued to "Sonny" Dwyer, the well-known wrestler, by Tony Harris, a former Lake Linden man, but now of Butte. Harris is very desirous of a match with Dwyer for \$1,000 a side. Harris, it is said, has a good reputation as a wrestler and in Butte, a town that has good sport, he has plenty of backers. It is thought in Hancock that the match may be arranged as Dwyer is willing to meet Harris under certain conditions. Harris wants the contest held in Butte and Dwyer will not protest that point.

COPPERPORT BREVITIES.

Denny Clark of Hancock has returned from Delaware, O.

Miss Bertha Wright, of Hancock, has returned to Oberlin college to complete her last year in the classical course.

The steamers India and Japan, of the Anchor line, were in port yesterday, the India bound down and the Japan up.

Calumet hunters are looking for a bear reported to have been seen recently near the Desjardinsville school house.

Shorif Will returned from Newberry yesterday after placing the negro Smith, the "wild man," in the asylum for insane.

During August there were 107 deaths in Houghton county, the death rate being 17.6. Forty-five of the deaths were those of children under one year of age.

The jury in the case of John Newby, of the Peaback location, whose body was found in Portage lake, brought in a verdict of death by accident while temporarily insane.

The inquest in the case of John Sullivan, who died Sunday night from injuries received by being run down by a street car, will be held in Justice Oliver's court Thursday afternoon.

Houghton is to have another dentist. The gentleman is Dr. W. E. Gaskin, a graduate of the University of Pennsylvania. The doctor will be the fifth dentist in the county seat.

The picture of last year's indoor baseball team of the Houghton Light Infantry will be seen in the new Spalding guide soon to be published. The team will be organized soon. There will be but few changes in the line up.

Dr. E. T. Abrams of Dollar Bay, who is visiting at Washington, D. C., has been made a member of the American Gynecological and Obstetrical society, an exclusive organization which has but 150 members in the whole country.

"The Eleventh Hour," a new play by Lincoln J. Carter, will be played at the Kerredge theatre, at Hancock, Friday evening. The stage is plenty large enough for the special scenery carried by the company, and all of it will be used.

There are several vacancies in the ranks of Company E, Calumet Light Guard, and a meeting of the company will be called for Oct. 6 to act on a number of applications for membership. There are more applications than vacancies.

The plant at which the asphalt to be laid on Quincy street, Hancock, will be mixed was tested yesterday. The work of laying the concrete foundation for the pavement is completed for the greater part of the street, and the first asphalt will be put down next Monday.

Under Sheriff Beck took Gust Johnson, who is charged with taking indecent liberties with a child of John Peterson, a Calumet saloonkeeper, to Calumet yesterday morning for trial in Justice Curtis' court. Johnson claims innocence. He is being defended by Attorney George Power.

The hotel facilities at Lake Linden and Hancock are totally inadequate for the season. The principal hostleries of the town are closed, the Northwestern at Hancock and the Lincoln at Lake Linden. It will be a question of a short time only, however, before both hotels are reopened.

Professor Freeman, leader of the Quincy band, met with a peculiar accident recently. While attempting to board a crowded street car, he stumbled and fell into the street, striking his mouth on one of the bricks alongside the track. He had six front teeth knocked out. It will incapacitate him from regular band work for a week or two.

The remains of John Sullivan, who was killed by a street car Sunday night, were shipped yesterday to Ironwood for burial. Three sisters and a brother of the deceased reside at that place. The Franklin location baseball club sent a beautiful wreath along with the casket. When Mr. Sullivan worked in the machine shop at the Franklin Junior mine he was a member of the team.

The Spanish-American war veterans of Houghton and Hancock, interested in the organization of a branch of the Society of Santiago are talking over the project and as soon as certain matters are settled a meeting will be called to launch the camp. The veterans approached thus far favor the movement and are convinced that of the various societies organized as a result of the late war, the Society of Santiago is by far the best. The Houghton branch will be organized with a charter membership of between forty and fifty.

IMPURE DRINKING WATER is always a source of danger; dysentery and other troubles follow its use, every person should have handy a bottle of Fankler's (Ferry Davis), which will quickly cure these distressing ailments. Be careful and see that the storekeeper does not pass off some worthless substitute upon you as is sometimes done. Each bottle costs 25c extra profit. Large bottles 25 and 50 cents.

BEWARE OF THE KNIFE. No profession has advanced more rapidly of late than surgery, but it should not be used except where absolutely necessary. In cases of piles for example, the best and most reliable is DeWitt's Witch Hazel Salve cures quickly and permanently. Unequaled for cuts, burns, bruises, wounds, skin diseases. Accept no counterfeits. "I was so troubled with bleeding piles that I lost much blood and strength," says J. C. Phillips, Paris, Ill. "DeWitt's Witch Hazel Salve cured me in a short time." Soothes and heals. H. Harwood, Ishpeming. Stafford Drug Co., Marquette.

DOCTORS COULD NOT HELP HER. "I had kidney trouble for years," writes Mrs. Raymond Conner of Shelton, Wash., "and the doctors could not help me. I tried Foley's Kidney Cure, and the very first dose gave me relief and I am now cured. I cannot say too much for Foley's Kidney Cure. People's Drug Store.

COPPER MINING.

MICHIGAN WILL MAKE BIG MINE.

The many stockholders in the Michigan copper mine would be very much encouraged if they could talk with H. R. Stubbensky, clerk of that concern, who is in Detroit for a few days on a vacation, says the Free Press. Mr. Stubbensky brought with him a few samples from the mine, which are certainly as rich as anything that ever came down from the upper peninsula. Some of these samples are from the Calico lode, B shaft of the Michigan, and it is said Mr. Stubbensky says the lode grows richer as greater depth is attained. "Masses of copper running from 600 to 800 pounds are being taken out of the mine every day," said Mr. Stubbensky. At least 25,000 tons of rock is now piled up, and by the time the stamp mill is put into commission next year there will be plenty of it to keep the mill going at a good jog. The officers of the company are not paying any attention to stock manipulation. They are going ahead to make a good, big mine. As a matter of fact, it certainly looks as if they would succeed.

Thinks Victoria a Winner. A Boston broker who is on a visit to the copper country, says of the Victoria: "I have been particularly impressed with the outlook at the Victoria mine. I found two hundred or more men actively employed, and an amount of development work done that was a surprise to me. Shaft No. 2 is nearly 2,000 feet deep and there are between three and four miles of development work. It is thought that the rock will average close to 2 per cent copper and it runs very uniform. It has grown richer with depth and the vein has widened out to some 45 feet in places. The steel and cement dam is nearing completion and will furnish ample power for running the mine and the mill. The market price of Victoria is astonishingly low compared with that of other Lake properties which are just beginning production. In fact, so far as supplying good rock for stamp mill is concerned, Victoria is much better situated today than some of the mines the stock of which is selling for three or four times the price of Victoria. It is evident that the public, at least in the East, has not come to appreciate the great amount of work which has been done at Victoria. The saving of coal alone, at last year's prices for coal, will when the mine is in active operation, mean a saving of \$100,000, or more, a year. As a matter of fact, if it came to a survival of the fit among Lake mines, I believe Victoria could make money and pay dividends when many of the other Lake properties could not pay expenses."

Cost of Refining Lake Superior Copper. According to Charles Kirchoff, in Census Bulletin No. 124, the refineries engaged in the treatment of Lake Superior "mineral" handled 121,243 short tons in 1899, which yielded 137,940,824 pounds of fine copper, the average yield per ton of mineral being 63.1 per cent Cu. The low grade of the mineral is explained by the increasing utilization of the finer slimes of the stamp mills. In other words, the percentage of copper recovered in the smelter, even with same depth and in the East, has not come to appreciate the great amount of work which has been done at Victoria. The saving of coal alone, at last year's prices for coal, will when the mine is in active operation, mean a saving of \$100,000, or more, a year. As a matter of fact, if it came to a survival of the fit among Lake mines, I believe Victoria could make money and pay dividends when many of the other Lake properties could not pay expenses."

Copper Gossip. The directors of the Mass Consolidated Mining company yesterday called an assessment of 82. One dollar is due Dec. 1 and the other dollar after April 1 of next year.

Copper ruled inactive in the New York market yesterday and while the price changes were immaterial, the undertone appeared rather weak. Lake was quoted at 11.00@11.75, castings at 11.37@12.00, electrolytic at 11.37 1/2@11.50 and standard at 10.60 bid. At London copper advanced 8s. 9d. closing at £32. 10s for spot and £32. 15s for futures.

A. B. Turner & Brother of Boston say: The copper situation is slowly recovering from the effects of bad management. Copper mining stocks have passed through a long period of liquidation and are now in strong hands. They are depressed at the moment by tight money, the same as other securities, and we believe that as soon as money is easier the coppers will advance with the rest of the market.

The Trimountain mill will likely begin stamping with two heads in two weeks. The last part of the mill pump - the water end of the low pressure section - was shipped from Milwaukee Monday. It is all that is needed to put the mill in condition. The equipment for two heads is complete, while most of the machinery for the other two heads is on the ground. The last section of the intake pipe, extending out under the bed of the lake for the mill's water supply, has been put down.

The Lake Superior Smelting works at Dollar Bay, which has been experimenting for a year as to the best method to take care of the waste slag from the cupola of the plant, has solved the problem to its own satisfaction. The slag will hereafter be granulated and conducted by means of a launder to convenient dumping grounds. The slag being spread over a considerable area and the dumping grounds will not fill up so fast as has been the case in the past. The slag slime will be used to fill up low places about the works. The slag of the plant has generally been carried away in wheel pots. The slag is granulated by means of a jet of water while the waste is molten.

DOCTORS COULD NOT HELP HER. "I had kidney trouble for years," writes Mrs. Raymond Conner of Shelton, Wash., "and the doctors could not help me. I tried Foley's Kidney Cure, and the very first dose gave me relief and I am now cured. I cannot say too much for Foley's Kidney Cure. People's Drug Store.

How a Jas. Boss Watch Case is made

Gold Outside Shiny Inside Gold Inside

The Jas. Boss Stiffened Gold Watch Case is made of two layers of Solid Gold with a layer of Stiffening Metal between welded together into one solid sheet of metal. The Jas. Boss Case is a Solid Gold Case for all practical purposes. The Stiffening Metal simply adds strength and durability. The Boss Case is guaranteed for 25 years by the largest watch case makers in the world, who have been making it for a full half century. Every Boss Case has the Keystone trade-mark stamped inside. Ask any dealer to show you one. Write us for a booklet telling the whole story.

FOR SALE—Choice building lots in Nester Addition for sale cheap for cash, or on time. Low rate of interest. For particulars inquire at office of Peter White. (8-6-02)

SOFT COAL.
The Scientific American Tells How It Should Be Burned.

The scarcity of hard coal and the prices of high prices for whatever anthracite may be shipped up into the Northwest is causing householders who are not supplied to scratch their heads and ponder over what appears to be a most difficult problem.

Many Marquette people are solving it by burning soft coal, and the air in the air in various parts of the city shows.

The Scientific American, in its latest issue, has an article that will be of much interest to householders who are experimenting along this line. After discussing the use of kerosene and the use of the article takes up soft coal, and proceeds to show that it can be readily used both for range and furnace. It says in part: "There is no quality in soft coal which renders it unfit for domestic use. Indeed, practically all soft coal is used or has been used for domestic purposes in Great Britain, and while the cooking ranges differ somewhat in design from those used in this country for anthracite coal, it will be quite possible for the householders, by using a little judgment, to burn soft coal to their advantage in the ordinary American cooking stove."

The most important fact to remember is that the great quantities of gas thrown off when soft coal is first ignited render it necessary to supply considerably more air above the bed of fuel than is the case with anthracite coal. This, in replenishing the kitchen stove, will not do to fill the grate entirely full of fresh fuel, since this would result in the rapid lowering of the oven temperature, which would not be restored until the mass had become ignited and the gases had been somewhat cooled off.

It will be found that the best method is to feed small quantities of fuel to the fire at frequent intervals, keeping the lower drafts closed more than they would be in burning anthracite coal, and keeping the upper draft constantly open.

"For use in the heating furnace, soft coal gives good results when once the proper manipulation of the furnace has been learned. It should be understood at the outset that more constant attention will be necessary, for the reason that soft coal burns more quickly and will not remain unburned for so long a time as anthracite. During the day time the attendant will have no difficulty in keeping a steady fire if he is careful to feed the furnace frequently; to keep the bottom drafts open but slightly, and to give a liberal feed of air through the air inlet in the furnace door. Owing to the rapidity of combustion of bituminous coal, it will not be possible to bank up the furnace for the night and leave it with a certainty that there will be a live fire remaining in the morning; but this difficulty can be overcome by the use of an anthracite laid in with the winter's supply of coal, and the anthracite used only for banking up the fire over night. A ton of anthracite used for this purpose should suffice to tide the households over the period of high prices."

The article then speaks of a feature that may be an element of danger unless safeguarded. Soft coal causes a heavy deposit of soot in the flues, and unless swept out at intervals, this soot may catch fire in the chimney. This risk may be obviated by sweeping out the chimney every two months.

Pure Food Store and Cafe.

The Adventists may establish a pure food store and cafe here. This is the prospect that may be taken to indicate that the committee was impressed with Marquette. The members discussed the food store and cafe proposition with General Passenger Agent Hibbard, of the South Shore, Monday. They considered that the store lately occupied by the Bracher Dry Goods company, on Washington street, would be a good site for the proposed business. Mr. Hibbard will see Mr. Van Alstyn, on his return from New York, and ascertain on what terms the Adventists can have the store. He will then communicate with the committee. It is considered likely that the store and cafe will be opened. It would, also, be used as a point from which to distribute Adventist literature.

Another suggestion made by Mr. Hibbard will likely be carried out. He drew the committee's attention to the advisability of having the head of the Battle Creek sanitarium come to Marquette to address the people on the work done by the Adventists at that point, so as to impress them with the considerable importance of the proposed branch. This suggestion was favorably received, and the members of the committee will take the matter up with the Battle Creek people when they return to lower Michigan.

So Comment.

The Soo is after the proposed branch, but, judging from the following from Monday's News-Record, it is not very sanguine concerning the prospects for landing it:

"The members of the Battle Creek sanitarium committee left for Marquette and Houghton Saturday evening without reaching any decision as regards the location of a branch of their institution here. It is evident that they intend to locate in the town that will give the largest bonus,

China Sale

Our annual sale on China is now on. Every piece is marked in plain figures at just about

HALF PRICE.

There are a number of very handsome pieces that are astonishingly low in price. The sale will last about 10 days.

Come in early and take your choice.

BIGELOW & CO.,
Jewelry and Chinaware
Marquette, Michigan.

and while it is by no means certain that they will not come here the prospects are not the brightest.

"Besides a site, it is said, they want free water, free power, exemption from taxation, a guarantee of a fund to erect the main building of the institution and it is said will be so long that those who might have explained their utility are dead and forgotten, and no one living pretends to know what particular purpose they served. The engine has worn out three boilers, and the fourth one is now in use. It was the proper paper in our grandfathers' days to build machinery that would last a lifetime, a new model every year or two being considered useless expense.

The Witch never carried a crew that did not take pride in the old craft, and when in the spring fitting out she was treated to a new dress of paint, great care was taken in the blending of the colors and the touching up of the stripes, and when the work was done the painters would stop off on the dock, light their pipes, take a long and critical squint, and venture the observation: "Well, ain't she a bird." And the service of the Witch has not always been that of merely puffing and pulling away at the end of a tow line. Many and many a dark stormy night, in the fall of the year the Witch has hugged the lee side of the north shore of Saginaw bay or lurked in the vicinity of the Charities waiting for a tow, with the big swells rolling over her decks.

And the Witch has worn out a lot of men. Those who were children when her keel was laid are now gray haired, and those who trod her decks forty and fifty years ago have mostly, if not all, dropped anchor in the final home port forever.

Carpenters, engineers and firemen by the score have been employed by the Witch of the whistle of the old Witch is still a familiar sound along the river, and her prow still plows the placid waters of the sluggish Saginaw.

A PRIMITIVE COMMUNITY.

Among the strange and primitive communities in the far northern woods of Maine, none is more interesting than the settlement of farmers and lumbermen that was founded sixty years ago at the confluence of Clementine creek with the St. John river. The settlement is in township 16, range 12, owned by the Great Northern Paper company, but the matter of ownership does not seem to worry the settlers at all—they go on with their farming and other pursuits just as if they were the lords of the soil.

The twelve families are about equally divided between Montreal French and Nova Scotia Scotch, and formerly their religious differences made a great deal of trouble. Long ago, however, they effected a compromise, agreeing to get on as well as they could, and ever since that time they have dwelt in peace and harmony, with neither priest nor minister.

Nearly a century ago, as it is told on the St. John, a few families from Scotland took up meadow lands along the bank of the St. John, and the English king to hold as much territory as they could enclose within the span of a moosehide cut into narrow strips and fastened end to end. They killed a huge bull moose, and all one winter the women worked at paring and stretching the strips of skin so as to make the moose skin as far as possible. When the work was done in March to survey the land to which they were entitled by the deed of gift they made the shredded moosehide encompass 90,000 acres, equal to four full townships of township six square miles each. Then they built a village of logs and cleared up land for farming.

All went well until 1840, when Edward Kent, the whig candidate, was chosen governor to succeed Reuben Fairfield, the Democratic incumbent of the office. A hot presidential fight was in progress, and the Democrats, wishing to get the state in November, called a special session of the legislature and organized a new form of municipality, called plantations, each of whom was given the right to vote in state and national elections. It was hoped that, as the inhabitants of the plantations were strongly Democratic, their vote, added to the regular party vote in the cities and towns, would stem the Whig tide and redeem the state, but when the November returns came in, and Maine was found to have cast her vote for Harrison, nearly every settler in the Allegash settlements became a Whig "of spite," and those few who refused to do so were forced to emigrate. Three families packed up and moved to township 16, range 12, where they have ever since resided. Although they cannot vote under their present form of government, every man of voting age is a Democrat, showing that these exiles have remained steadfast in their political faith. In the Allegash plantation at the last election every one of the fifty-three votes was cast for the Republican ticket, which shows that the great turnover of 1840 is still in effect.

Allegash has a state line, a postoffice and a root and herb doctor as evidences of civilization, but township 16, range 12, is still in primitive innocence. The nearest doctor, lawyer or clergyman lives at Fort Kent, sixty-two miles away to the northeast. There is no church nor postoffice, nor store of any kind in the township. A two-acre plot on a sunny hillside serves as a common burying ground for the villagers, whose graves are surrounded by a strong stump fence. The residents are all farmers or lumbermen. The farming raises fine crops of hay and oats, which they sell at high prices to the lumber operators of the region. For six months after April and for three months in midwinter supplies are brought to the settlement from Fort Kent or by canoes or on sleds over the ice. During the other three months the place is inaccessible as the back side of the moon.

The ruler and supreme dictator of township 16 is Alexander Castleton, the richest man in the village, who owns a farm of 1,500 acres, yielding annually 2,000 tons of hay, which is sold from the mill to lumbermen at \$18 a ton. "King" Castleton, as he is called, fixes the amount that each resident must pay in money or in labor for the support of schools and roads and to meet general expenses. He makes the assessments and his subjects never question his decisions.

John Beyer, one of the leaders of the French contingent at township 16, does

with the tugboat engines of the present day. On the frame there are hangers for rock shafts to drive a feed pump, also a bilge pump, and in the frame are many bolt holes apparently placed there for the purpose of affording the inquisitive an opportunity to ask questions. They have been there so long that those who might have explained their utility are dead and forgotten, and no one living pretends to know what particular purpose they served. The engine has worn out three boilers, and the fourth one is now in use. It was the proper paper in our grandfathers' days to build machinery that would last a lifetime, a new model every year or two being considered useless expense.

WITCH OF THE WEST.
Interesting Facts Concerning Oldest Craft on Fresh Water.

The Saginaw Courier-Herald has published the history of the old tug Witch of the West, which, with the exception of the old gunboat Michigan, is probably the oldest craft on fresh water. Fifty years ago this year the keel of the Witch was laid at Pettit's island, N. Y., and at the same time there was laid the keel of a sister craft, which was christened the Shenandoah. The latter has long since disappeared but the Witch is still doing business. She was first employed on the Atlantic coast, and from there was taken to Buffalo, where she engaged in the general business of towing. Later she was sent to Toledo. About thirty years ago she was sold to Mosher & Green of Bay City, Mich., where she has been continuously since, though her ownership has changed several times. She was last purchased by Captain William Gordon of Bay City, who died about two years ago. The Witch is now owned by his widow, Mrs. Mary Gordon of Bay City.

It is reasonable to suppose that many of the timbers that were placed in the hull of the Witch fifty years ago have been replaced from time to time with others. A ship is like a lady's watch, always out of repair, and there is always a lot of work necessary to be done on a tug after she has been doing hard duty for even a single season. The engine in the Witch, built by Neale & Levy of Philadelphia, is 10 by 17 cylinder, and of peculiar design compared

AN OLD SORE

months of diligent and faithful use of external remedies that the place remains as defiant, angry and offensive as ever. Every chronic sore, no matter on what part of the body it comes, is an evidence of some previous constitutional or organic trouble, and that the dregs of these diseases remain in the system; or, it may be that some long hidden poison—perhaps Cancer—has come to the surface and begun its destructive work.

The blood must be purified before the sore will fill up with healthy flesh and the skin regains its natural color. It is through the circulation that the acid, corroding fluids are carried to the sore or ulcer and kept it irritated and inflamed. S. S. S. will purify and invigorate the stagnant blood when all sediment or other hurtful materials are washed out, fresh rich blood is carried to the diseased parts, new tissues form, and the decaying flesh begins to have a healthy and natural look; the discharge ceases and the sore heals.

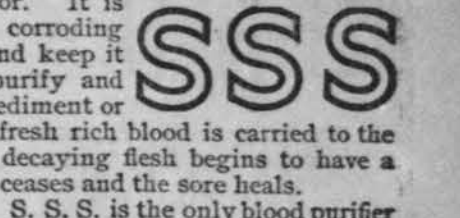

Will soon the sweetest disposition and transform the most even tempered, lovable nature into a cross-grained and irritable individual.

If impatience or fault-finding are ever excusable it is when the body is tortured by an eating and painful sore. It is truly discouraging to find after the use of external remedies that the place remains as defiant, angry and offensive as ever. Every chronic sore, no matter on what part of the body it comes, is an evidence of some previous constitutional or organic trouble, and that the dregs of these diseases remain in the system; or, it may be that some long hidden poison—perhaps Cancer—has come to the surface and begun its destructive work.

The blood must be purified before the sore will fill up with healthy flesh and the skin regains its natural color. It is through the circulation that the acid, corroding fluids are carried to the sore or ulcer and kept it irritated and inflamed. S. S. S. will purify and invigorate the stagnant blood when all sediment or other hurtful materials are washed out, fresh rich blood is carried to the diseased parts, new tissues form, and the decaying flesh begins to have a healthy and natural look; the discharge ceases and the sore heals.

Several years ago, my wife had a severe sore leg and was treated by the best physicians but received no benefit. Our druggist advised her to try S. S. S. which she did. Fourteen bottles cured her and she has been well ever since.

J. R. MAROLD, 232
Cochran, N. Y.

S. S. S. is the only blood purifier that is guaranteed entirely vegetable. It builds up the blood and tones up the general system as no other medicine does. Book on Blood and Skin Diseases free. **THE SWIFT SPECIFIC CO., Atlanta, Ga.**

a prosperous business at cutting timber for the Fort Kent mills. Having no sons to assist him he has trained his three daughters to the business and takes them every winter to the camps, where each has charge of a crew of loggers. The three Boyer girls are skilled in the use of the axe and can handle an axe or canthook better than most of the men.

The company that owns the township makes no objection to the presence there of these squatters, or to their clearing up farms and using what wood and timber they need, but is convenient to have them up there, partly as a safeguard against forest fires getting beyond control, and partly to raise crops of fodder corn for woods horses, thus saving the heavy expense of sending supplies so far into the wilderness.—Bangor Correspondent of New York Tribune.

SAM'S WATERMELONS.
A Man Who Would Not Let Weeds Grow on His Farm.

"Well, how's crops?" said one jovial-looking gentleman to another jovial-looking gentleman.

"Crops are booming," the suburban dweller answered. "You just ought to come out and see how things on the farm are climbing along. We will have home-grown watermelons before you have time to turn around. I've planted an acre in watermelons this year."

"Ha! ha!" laughed the other man. "Watermelons always remind me of Sam."

"What about Sam?"

"When Sam began to farm he declared that he was going to keep weeds off his farm if it took every cent he earned and worked him to death besides; he simply was not going to have a weed on the place. He lived up to his high ideal, too, and his farm was as neat as a parlor—not a stick or a stone out of place. Everybody that went out to see his farm came back and said that it was the neatest and best kept farm they had ever seen. People that they had never laid eyes on went out to see them—said they had heard so much about his tidy farm that they couldn't resist driving out to look at it.

"Just like you, Sam planted watermelons. Weeds always grow like mad in a watermelon patch, and Sam's weeds nearly drove him crazy. But he routed them; there wasn't a leaf to be seen in that patch, but watermelon leaves. When the watermelons came on, however, they got as big as little gourds and wouldn't grow another bit just dried up and dropped off. Of course, Sam was mightily worried at the way his watermelons acted, and didn't know what to do, but he kept on weeding—no weeds got a chance, even if the melons did not queer."

"One day an old Dutch woman came along and leaned on the fence while he was weeding his melon patch.

"'Misther Sam,' she cried, 'wat for you do dat, hey? Shust you let dem weeds alone; watermelons won't grow 'less dey got some weeds for shade—de sun burns 'em up. Mine watermelons grow big and dey grow big. Shust you let dem weeds alone, Mister Sam!'

"Sam took the hint from his kind old country neighbor, and his watermelons then came along all right."—Detroit Free Press.

CYCLONE CELLARS.
In Western Kansas They Are Ordinary Sod Houses.

When the summer days bring waves of heat across the stretches of hot soil, then the residents of the prairie west begin to cast their eyes to the window-sill. They are watching the formation of the clouds, and he who could not distinguish a cyclone bank from any other is indeed a tenderfoot. Then the cry of warning is carried across the plains, and the members of every family make for their cyclone cellars. These cellars differ in various communities. The popular cyclone cellar on the plains of western Kansas, where cyclones a few years ago were almost a daily occurrence, are ordinary sod houses, built low and strong.

In the Russian communities of Kansas these cyclone houses serve as the family residence the year around. They are about seven feet high, and built exceptionally strong. The roofs are slanted, and the houses are set to the wind, that is, the ends are faced toward the east and west.

In Oklahoma every farm house is backed up by a cave, a hole dug into the ground and covered by an earthen roof. Some farmers have gone so far in protecting themselves against cyclones that they have a small cannon loaded with salt and buckshot, which is fired into the whirling clouds as they approach. This has been known to turn the course of a storm. It is a common event to dismiss school on the plains of Oklahoma when a bank of clouds begins to arise in the southwest. These wind and rain storms are becoming more uncommon every day, and it is believed that the planting of trees and settlement of the barren soil has had much to do with it.—Before

Oklahoma was thoroughly well settled dozens of cyclones were reported every day in the hot months. The writer was in Newkirk one day in the early period of that town's existence and saw seven cyclones form in the afternoon. All of them followed the course of the Arkansas river and "struck" in the Osage Indian reservation, far to the westward.—New York Tribune.

WHY SHOULD YOU ALWAYS REMAIN POOR?

When a few dollars a month invested in a good gold mining company will bring you a comfortable income within a very short time! Our gold mines are in the well known Gold Hill mining district, Boulder county, Colorado. We have ten very valuable claims on which we are now sinking two shafts and one tunnel, and the ore in all them is showing very good values, assays from \$10.70 to \$172.50 per ton according to different reports that we have had made. If you intend to invest in a safe and profitable gold mining company then you cannot do better than to buy stock in this company. At any rate, write us for prospectus and information at once, as we intend to sell only a limited amount of stock to place the mines on dividend-paying basis. FROM A REVOLVER.

Stray Bullet That Struck the Late Mrs. Clucas Was of 32 Calibre.

The hospital physicians held an autopsy on the remains of the late Mrs. Clucas yesterday, and extracted the bullet. It is a 32 short, and the doctors are of the opinion that it was fired from a revolver. It went in at the right side of the chest, just above the breast, passing through both lungs, and shattered the edge of the third rib on the left side as it passed out. The bullet passed between the third and fourth ribs and lay just outside of the ribs. It cut the ascending aorta, which probably caused death.

The doctors believe that the woman was not shot with a rifle fired on the other side of the lake, but that she was killed from closer range. The side of the bullet would seem to indicate that it came from a revolver, in which case the person who fired the shot must have been within two hundred yards of the house. Mrs. Clucas was walking north when she was hit, and the bullet came from the direction of the lake in the east so that it must have come from the hill on this side of the lake. It is said that there were some boys in that direction at the time of the shooting. After she was shot, she turned and took a few steps towards the house, then staggered against the fence and fell.

WAS KNOWN HERE.

The following announcement of the death of Mrs. Edward Hughes, who was known to many Ishpeming people, appeared in last week's Diamond Drill of Crystal Falls:

"News was brought here last Wednesday morning of the death of Mrs. Edward Hughes at the Iron Mountain hospital where she had been taken from her home at Quinnessee several days previous. Mrs. Hughes is a sister-in-law of Captain Chas. Hughes of the Hemlock mine and was for a long time a resident of Amasa, where she was held in high esteem by the people of the place. When her husband took charge of the Vivian mine, the family removed to Quinnessee and have made that place their home for a year back. The funeral occurred at Quinnessee. She was buried in the cemetery there."

GLADSTONE COMING.

A game of football has been arranged for Union Park Saturday between the high school and the Gladstone city teams. It will be called at 2 o'clock, and the admission will be twenty-five cents. This is expected to be one of the best games of the season, as the Gladstone team is said to be one of the strongest on the upper peninsula. The expenses of bringing the visiting team here will be about \$50 and there should be a big turnout to the contest.

Two games will probably be arranged with the West Superior Normal team, one to be played here and one in West Superior. The local eleven played this team a tie game last year, score, 0 to 0.

THE ELEVENTH HOUR.

Lincoln J. Carter, author of so many popular successes, will present "The Eleventh Hour" at the local opera house next Wednesday evening, Oct. 1. This is the third successful season of this piece. Mr. Carter has succeeded in his production in doing what few authors seldom do, that is, blend consistently pathos and comedy in a manner that pleases the entire audience, holding their interest throughout the entire play. The presenting company is away above the ordinary, and elaborate scenic effects and nicety of detail which Mr. Carter is so justly famed for are a feature.

CONVENTION THIS AFTERNOON.

So little interest is manifested in the Republican convention to be held here this afternoon for the nomination of a candidate to the state legislature from the Second district of the county that some of the delegates chosen from the townships will not be here. It is pretty well understood that Hon. C. J. Byrns, the present member of the legislature, will receive the nomination by acclamation and that the convention will be a mere matter of form. It will be held at the Nelson House and will be called to order at half-past one o'clock.

FINNISH CONCERT SUNDAY.

The Finnish Glee club of Calumet, under the leadership of Professor S. Mustonen, will give a concert at the Finnish Mercantile hall Sunday evening. The prices of admission will be twenty-five and thirty-five cents. Professor Richard Moyle, formerly of Ishpeming, will be heard at the concert. The program will consist of ten numbers, including selections by the double quartet which has become noted in the upper peninsula. Sunday afternoon the club will give a concert at the Finnish Temperance Hall in Negaunee.

CARD OF THANKS.

I desire to publicly express my appreciation of the favors extended me during my recent bereavement. I wish to particularly thank my friends and neighbors who came to my aid and who did so much to lessen my sorrow. I feel under lasting obligations to officers of the Cleveland-Cliffs Iron company, who rendered assistance.

MRS. JOHN LARSON.

New line of handkerchiefs. All prices, including the very fine qualities. The Finnish Mercantile association.

COAL GIVEN AWAY.

Manager of the Grand Union Tea Company Becomes Extravagant.

Ed. R. Nelson, manager of the Grand Union Tea company's store here, is nothing if not original. In one of the windows of the store can be seen a display arranged by the manager. It consists of a tin can of hard coal, surrounded by several dozen cans of baking powder. On a card in the window is the startling announcement that one piece of the nut coal will actually be given away with each can of baking powder.

Ed. has not found it necessary to guard the coal with a gun, but he says he intends to lock the remaining pieces in his safe every evening before closing up. He regards the coal as about the most valuable thing in the city at this time. The display attracted no little attention yesterday, and many asked Ed. where he got the coal. Some insinuated that he must have stolen it, as there is none on sale in the city.

Wood Stoves Higher.

There will be a very heavy demand for wood stoves all over the country this fall and winter. In places where the weather has been chilly the sale of stoves has already been lively. Most of the stove dealers are putting in large lines of wood burners, and very few of them are buying many coal stoves. In some of the stores may be seen ten wood stoves to one coal burner.

Wood stoves have advanced about 15 per cent. in price within the past couple of weeks. A local dealer recently stated that he thought the wholesale prices would take another upward jump before the winter sets in. In case there is no coal on the market there will be thousands of wood stoves sold in the upper peninsula.

ISHPEMING IN BRIEF.

J. M. Pearson of Calumet was here Monday.

Allie Watters is working in the Lake Superior office.

Trembath Bros. are painting the Majhannu block.

Lucy Stark has taken a position as bookkeeper with Ferguson Bros.

Mrs. T. A. Felch entertained a number of invited guests Monday night.

An adjourned meeting of the city council will be held tomorrow night.

Eman and Swanson are giving the West printing house a fresh coat of paint.

Mrs. Joe Leffler and Mrs. Frank Olson are visiting in Champion, Norway and Iron Mountain.

Reserved seats for the minstrel performance Saturday night will be on sale Thursday at Tillson's drug store.

Mrs. Helen Thredewey, formerly employed at F. Braastad and company's store, has taken a place with Ed. Clark.

Miss Kate Bremick and Miss Bridget Russell of Hancock are visiting in the city. They recently returned from Milwaukee.

G. A. Berglund of Milwaukee, who has recently acquired lumber interests at Lake Gogebic, was in the city Monday, visiting F. Braastad.

Captain Arthur Buzzo, who has charge of the Helen mine in the Michigan district, is here for a few days. Mr. Buzzo's wife and family, who have been visiting him there, returned with him.

The traveling men of Ishpeming and Negaunee will meet in the opera house Sunday afternoon and arrange to organize an indoor baseball team, to meet Marquette in a series of games during the coming winter.

The Trombly orchestra will give a dance tonight at Anderson's hall. The hop will be preceded by a class, which begins at 7:30. A special car will run late to accommodate those who attend from Negaunee.

Ed. Clark will occupy the store on First street adjoining his present stand and will tear on the wall between them, throwing the rooms into one. Mr. Clark's growing business has made it necessary to secure the additional room.

Five new books for young people were received at the library this week. Following are their titles: "Light of the Morning, Wild Kitty, Out of the Fashion, Deb and the Duchess, and Captain of the School." The books are by L. T. Meade.

The funeral of the late Mrs. Clucas, killed by a stray bullet at her home at Mad lake, will be held Thursday afternoon at 2:30 o'clock from the Swedish Methodist church, Cleveland avenue. The services will be conducted by the Rev. Mr. Polkinghorn.

Rev. Ludwig Johnson is here from Escanaba to attend the wedding of his brother, John Johnson, who will be married this evening. Rev. Johnson's wife has been here for the past two weeks, visiting her parents, Mr. and Mrs. Joseph Graverock.

The statement published in this department recently to the effect that the library committee of the city council would select the site for the proposed Carnegie library, was erroneous. The location is to be chosen by a committee of citizens who were appointed Sept. 12 by the library committee and the mayor. This committee consists of W. H. Johnston, chairman; Tom Walters and M. M. Duncan. The committee will make its report to the library committee.

OSTEOPATHY.

Hon. H. F. Pingree, ex-governor of Michigan, who signed the bill legalizing osteopathy in this state said after a thorough and careful official investigation: "Osteopathy is a science entitled to the respect and confidence of all, as a distinct advance in medicine. I know that it is doing a vast amount of good in relieving suffering and deformity that is not amenable to benefit from drug medicine."

For free books explaining osteopathy, address Dr. J. L. Shorey, room 8, Harlow block, Marquette, Mich. At Ishpeming, Tuesdays and Fridays, 212 W. Ridge street. (8-22-11)

ST. VITUS' DANCE Sure Cure. Circular, Dr. Fenner, Fredonia, N.Y.

TESTING A GUN.

Indians Proved the Efficacy of the Pale Faces' Thunder Stick.

"I will tell you the story of how the first shotgun was brought to Lake Superior, as it was told in my presence by old Chief Muskwa (Bear) one night years ago in a tepee near Grand Portage on the north shore," said an old timer.

"We were out on an exploring trip when we ran across Muskwa's band. Among the Indians was a big half-breed called Joe Piskew. He was a native born graffer and when he found that he could not buy, borrow or steal our tobacco and whisky, he proceeded to bargain for a little. We were all tenderfist and had the usual curiosity of this species of human beings as to the legends and doings of the Indians, so we arranged with Big Joe to have a seance that night in Muskwa's wigwam.

"The seance was really impressive and not untinged with romance. On one side of the fire sat the aged chief on a pile of bear skins and blankets. Around him were seated the sub-chiefs and warriors, and facing him the young men and boys of the tribe. The squaws, girls and dogs rustled for themselves outside the tepee, they not being considered worthy of being instructed in the traditions of the tribe. Piskew acted as interpreter and the seance lasted until the early dawn.

"The old chief himself, over 100 years of age, began to speak in short, slow sentences: 'Many years ago,' he said, 'when my grandfather was a young brave, the Blackrobes came to visit the Chippewas of the big lake. With them were many voyagers and they had guns and much tackle to take fish. The Blackrobes would not allow a gun to be taken from their case, telling us that their mission was peace, not war. We were curious about the guns, but we held our tongues. Some of the voyagers could speak our tongue and they told us of the great trading post far beyond the rapids at the end of the great sea water (probably Mackinac Island), where the Indians could buy guns, cloth, beads and other wonderful things, if they had furs of the mink, beaver and other animals found in great plenty. After some days the Blackrobes left us and went off down the lake.

"It was the end of the summer. A great council was called near this spot and long consultations were held and it was finally decided to send two great canoes to visit the trading post described by the white men. All that winter the Chippewas hunted and trapped for furs as they never had before, and in the spring great packs of pelts lay in the head chief's wigwam. Two great war canoes were built by the squaws and a band of picked men was sent away to meet the traders.

"My grandfather was a great hunter and he went along with heavy packs of beaver skins that he had got during the winter. Late in the fall the canoes returned and they brought with them many wonderful things from the traders, but only one gun. No more could be obtained, and only about twenty charges of powder and ball could be bought. To procure this gun beaver skins had to be piled up alongside of it on one side until the pile was of equal height with the muzzle of the gun when resting with the butt end on the floor, and mink, fisher, marten and other skins had to be similarly piled up on the other side. My grandfather had enough peltry to do this, and he it was who obtained the much-coveted gun.

"The Indians then held a great dance and feast, and the proud owner of the gun demonstrated how it was loaded and fired off. As the powder flashed, amid the smoke and roar of the discharge, the Indians fell on their faces, trembling with fear, but seeing that no harm followed the alarming explosion, they were clamorous for a further demonstration as to the use of the piece for destroying their enemies like the Sioux.

"The gun was loaded this time with a bullet, and then a target was sought for.

"Away near the shore of the lake sat an old squaw upon a rock. She was so old that she had no relations or friends left. She was nearly blind and had lost her teeth, and during the coming winter she must have been left upon the trail to die. So it was decided by the chiefs that the gun should be tried upon her. Silently my grandfather crept up behind the old woman, and when about twelve paces he fired the charge into her back. She fell off the rock, kicked once or twice and then lay dead. Thus were the people shown the power of the hottingen, or thunder-stick of the white men, and greatly did they marvel and fear it.

"During the relation of the story of the butchery of the old squaw not a sign of disapproval was visible upon the stolid faces of old Muskwa's aboriginal hearers. The old chief himself seemed rather to enjoy the recital, as he was silent for a few moments, displaying his toothless gums in a ghastly grin. Big Joe was visibly delighted with the story, and evidently enjoyed the distinction of being the one to convey the tale of the heartless deed to the white visitors. Piskew himself was afterward killed by a white man named Jim Ruttle, after a desperate fight on Mayhew's dock, at Grand Marais. Ruttle stood his trial for murder before Judge Stearns in this county and was sent to Stillwater, but

was subsequently pardoned. He also is now dead.

"When Muskwa had finished his tale, he remarked that he was weary and rolling over on his blanket, dropped into slumber. The seance then closed, and whites and Indians filed out of the tepee."—Duluth Herald.

DEMOCRATIC COUNTY CONVENTION

A Democratic convention for the county of Marquette will be held at Andrew's hall in the city of Ishpeming, on Tuesday, the 30th day of September, A. D. 1902, at 1:30 o'clock p. m. for the purpose of nominating candidates for the following county offices, viz: Sheriff, treasurer, county clerk, register of deeds, prosecuting attorney, two circuit court commissioners, two coroners and one county surveyor, and for the transaction of any other business brought before said convention.

Immediately upon the adjournment of the county convention the delegates from the Eastern and the Western representative districts shall convene separately for the purpose of nominating a candidate for representative in the state legislature from each of said districts.

The several cities and townships of the county will be entitled to representation as follows: Marquette city, 19 delegates; Negaunee city, 11; Ishpeming city, 23; Champion and Tilden townships, 3 each; Republic township, 4; Michigan township, 2; Chocoma, Ely, Forganue township, 2; Chocoma, Marquette, Negaunee, Richmond, Sands, Scandia, Turin and West Branch townships, one delegate each.

Dated, Ishpeming, Mich., Sept. 10th, 1902.

T. J. DUNDON,
Chairman Democratic County Committee.

MRS. IDA McDONALD,

Supreme Deputy of the Maccabees of the World.

MRS. McDONALD, No. 477 Benubien Street, Detroit, Mich., is a prominent woman who was greatly benefited by the great woman's medicine, Wine of Cardui. Mrs. McDonald is the supreme deputy of the Maccabees of the World, and one of the most widely known women in the United States. Thousands of women gather to hear her lecture everywhere she goes. The great work she has done for the Maccabees is appreciated by every member of the order. She was so absorbed in her work that she neglected to give her health proper care—failed to take warning that the symptoms of approaching kidney trouble gave her, the sallow complexion and torpid liver. But Wine of Cardui cured her the same as it has cured thousands of others and Mrs. McDonald has written this letter in order that other suffering women may secure from Wine of Cardui the same relief she got from it.

that I must do something to regain my health. A friend advocated your Wine of Cardui treatment so strongly that I decided to try it, although I had little faith in patent medicines. I am now very thankful that I did so, for within ten days blessed relief came to me, and in less than three months I was cured, and have enjoyed fine health ever since. I know there is nothing better for a sick woman who wishes to enjoy perfect health and an very pleased to give my hearty endorsement."

Do not delay in securing this medicine. There is nothing to gain and everything to lose by delay. The choice is before you. Will or will you not secure relief now by taking Wine of Cardui? All druggists sell \$1.00 bottles of Wine of Cardui as well as 25¢ packages of Theford's Black-Draught.

A million suffering women have found relief in Wine of Cardui.

Eugene Field's

Views on Ambition and Dyspepsia.

"Dyspepsia," wrote Eugene Field, "often incapacitates a man for endeavor and sometimes extinguishes the fire of ambition." Though great despite his complaint Field suffered from indigestion all his life. A weak, tired stomach can't digest your food. It needs rest. You can only rest it by the use of a preparation like Kodol, which relieves it of work by digesting your food. Rest soon restores it to its normal tone.

Strengthening, Satisfying, Enervating.

Prepared only by E. C. DEWITT & Co., Chicago. The \$1. bottle contains 2 1/2 times the 50c. size.

Burlington Route

Compartment Sleeping Cars

Run every day on our Limited, leaving Minneapolis 7:30, St. Paul 8:25 p. m., arriving in Chicago 9:20 next morning.

These cars are 70 feet in length and contain seven state rooms and two drawing rooms. Each is a separate room in itself, complete with all toilet facilities, and furnished and decorated in the highest style of art. Upholstery and carpet materials are of different pattern for each.

So far as privacy is concerned, no room in the best hotels can have more. Electric reading lamps in the berths, and electric and gas lamps in the ceiling supply abundant light.

LOCAL LACONICS.

Charles Frost, Upper Peninsula Pioneer, Is Visiting in This Section.

Charles Frost, who was "one of the boys" of the Twin Cities from the early seventies to the early eighties, is spending a few days in the copper country. He is now located at Escanaba, whither he moved from this city nearly twenty years ago. On his way home from copper country Mr. Frost will spend a few days visiting old friends here.

In a talk with Mr. Frost yesterday a representative of The Mining Journal observed that he still possesses his happy disposition. He is the same Charles he was when he played baseball with the local men who long since retired from the diamond. He was a member of Negaunee's first city team. Mr. Frost played in the first upper peninsula tournament ever held, and was in 1874, at Ishpeming. The games lasted four days and were played on grounds where the Ishpeming Co-operative society's store now stands.

Mr. Frost came to this county in 1871, in which year he was employed in the Chicago furnace. After remaining there a short time he moved to Negaunee. Later he was at Ishpeming, but again came to this city. He is one of the few men in the upper peninsula at this time who assisted in the construction of the old concentrating works near the power house at the Negaunee and Ishpeming Electric Light & Street Car company. He says there is in the neighborhood of 1,000,000 feet of the finest kind of pine timber, at that time, in the building. The structure was erected with the greatest of care. There is practically not a nail in it, all the timbers being held with bolts. With timber advancing steadily in price, the pine in the building is now worth a snug sum.

Mr. Frost has a good recollection of many of the happenings that occurred here during the early days. He remembers all the old landmarks and he possesses much information about the mines, etc., not known by men who have spent all their lives here.

TONES OF THE SCHOOLROOM.

It is difficult to define "tone" when applied to the schoolroom, but everyone familiar with teaching knows what it is. Some schools look upon the teacher as a kind of police officer, put in his place to keep order and to secure the proper amount of study; other schools look upon him as a friend and helper, and treat him as an elder brother, or, better, as a considerate and respectful parent. "Tone" comes from the teacher—that is, when he has been long enough in the school to impress himself upon his pupils. When a new teacher enters upon his work he soon perceives the "tone" left by his predecessor, and sees at once what his work outside the text-book is to be. "Tone" is always moral or immoral in character; it cannot be neutral, for the teacher is not like a shoemaker or carpenter. There can be no such thing as an immoral shoe or house, neither can there be such a thing as teaching in an immoral manner. Every day's work makes the teacher and his pupils either better or worse. There is often more moral uplifting in a recitation in geometry than in a sermon. Even the calling of the roll may be done in a happy or miserable manner. The same may be said of every school exercise. Moral tone is not always connected with mental ability; on the contrary, many highly intellectual teachers have been harsh, cruel and exacting. There was once a teacher who could sing with great effect. His voice was his music, and his bearing that of a refined gentleman. One piece he used to sing so effectively that tears would moisten his cheeks during its performance, and many of his pupils would be visibly affected. It is needless to say that he attached his music to his pupils in a remarkable manner. But he was so poor in arithmetic that frequently he would ask help from his advanced pupils; yet the memory of that teacher remains in the minds of his pupils after many years, as a bright spot in their early years, when teachers were as a rule harsh and unbending and the schoolroom was rarely a place of happiness.—Educators' Journal.

FARMER ARISTOCRATS.

Tales of sudden wealth are quite common in the famous Kansas and Oklahoma wheat belt; fine houses, modern in every appointment, are the rule; rubber-tired buggies and automobiles are nothing to attract attention. In certain communities even the farmer has grown metropolitan to the extent of building an opera house on a school lot and securing some of the best attractions in the theatrical line. It was not until the present winter that Wichita could afford a guarantee for certain notable singers. Among those occupying front seats were well known wheat growers, farmers' daughters and farmers' sons form a goodly part of the Kansas society element, while piano salesmen look to them for their quick deals. It is nothing uncommon for a farmer to come to town and buy two or three rubber-tired buggies, or even place an order for an automobile. D. W. Blaine, a rich farmer of Pratt county, superintends all his harvesting in an automobile. Many others are equally to be commended.

One of the richest farmers in the Kansas wheat belt is John T. Stewart, who came to the state five years ago. He borrowed \$50 from a friend, rented a quarter section of land in Sumner county and began work. Today he is worth \$2,000,000, and his income from wheat in 1901 was \$84,000. He is known as the wheat king of Kansas. There are twenty-three millionaires in Kansas, fifteen of whom are farmers living on farms and running them as an investment. Perhaps they have not all their fortune invested in land, but a goodly portion of it is. Solomon Besley of Wellington placed \$31,000 in wheat last year and realized 30 per cent. on his investment, or ten times as much as he received from money loaned in Illinois.

Rheumatism

of 33 years' standing

Cured

For 33 years I suffered from rheumatism until I became so crippled that I could hardly feed myself. Seven physicians had tried their skill in vain. My last doctors told me that it was useless for me to take more medicines, claiming there was no cure for me. My family also discouraged me from taking more medicines, but when my church paper endorsed Gloria Tonic, I resorted to that and the systematic use of this excellent specific completely cured me. G. Jacob Saxauer, Fountain City, Wis.

Gloria Tonic sells at all drug stores at \$1.00 a package. Trial Box, also illustrated book on rheumatism containing many stippled drawings from actual life and which explains every form of Rheumatism to science free by sending name and address to JOHN A. SMITH, 624 Germania Street, Milwaukee, Wis.

to the line while Dunn smashed the fish's head with a rock.

On the big hook was a drumfish about a foot long and eight inches wide, weighing possibly three pounds. When this fish was half way in it had been struck by an enormous gar of the round-head variety. It was too big for the gar to swallow and had stuck in the big fish's throat. Its fins fastened in the gills. The gar weighed more than a hundred pounds. Thus two fish were taken on one hook.

Conversely, Edward Kimball of Chicago, whipping a Michigan stream last month, fastened a trout and fought it to a finish. When he got the fish into the net he found that it was hooked upon both the upper and lower leaders.

The lower leader was very far in. The only explanation is that the trout rose to the lower fly, took it, did not feel the pain and struck immediately at the upper fly, grabbing them both. This was an instance of one fish caught on two hooks.

On Channel Lake, Ill., not long ago, Dr. W. D. Blackman of Geneva and his friend, Dr. Greene, were fishing for bass. They fished from early morn to dewy eve and got mosquito bites.

At dewy eve, however, having decided to return to the hotel in disgust, they reeled in their lines, laid the rods in the bottom of the boat and lit their pipes. Then a minnow came leaping frantically from the water, going up six inches from the surface. It dived under the boat.

Just then a three-pound bass rose behind the two feet high, described a beautiful curve and landed in the boat, where it flapped in a vain effort to get out. Blackman looked at Greene; Greene looked at Blackman; Blackman stooped, grabbed the fish and threw it back into the lake.

George R. Silsbee went fishing on Peawassee lake, Wis., with W. S. Smythe. Luck was poor. Later in the afternoon Silsbee yelled that he had a strike; a moment after Smythe yelled, "Me, too!" They reeled in hard, their fishes making little flight. Their lines ended simultaneously and tautly. In the water near the boat was a bass weighing half a pound.

Silsbee's spoon was in one side of his jaw. Smythe's minnow and single hook were in the other side. This bass had struck the two baits together or so nearly together that there was no appreciable difference of time. It was one fish caught on two lines.

Feeling a slight tug, not much more than a nibble, Frank Harris, on Long Lake, Price county, Wisconsin, in June last, struck hard, then reeled in a fish which made little resistance. He found a handsome bass attached which had been hooked through the tail about half an inch from its end. The fish had run into the hook while swimming by it.

On the south fork of the Flambeau river, Wis., last fall Ed. Reich and some friends were trolling for muskellong.

The guide had a pair of short ears, copper tipped and made of soft white pine. A muskellong of fifteen pounds struck the end of one ear and hung on, either because its teeth were fastened in the soft wood or because it was stunned by the shock. One of the men shot it with a small pistol.—New York Sun.

THEY ARE THANKFUL.

We desire through The Mining Journal to extend thanks to the friends and neighbors who came to our relief during our recent bereavement. The kind deeds and cheering words rendered at that time were most thoroughly appreciated and their recollection will be cherished in our memories for a long time to come.

PETER LEMIRE AND FAMILY.

FISH WILL DO QUEER THINGS.

Experiences That Have Actually Happened to Certain Anglers.

Strange things happen to fishermen and when fishermen are around. They are so many and are backed by such evidence that most anglers of long experience stand ready to believe almost anything that may be told them of the funny doings of fish. The tyro may always be recognized by his unflinching hunt at anything beyond his own limited knowledge.

Quite recently Professor V. A. Pinkley of the Cincinnati College of Music and a friend were fishing from a boat on Lake Mendota in central Wisconsin. They were after bass.

The friend had a violent strike, hooked his fish with an exclamation and began to reel in. A moment afterward the line went limp in the water and he said regretfully: "He's got away." Bringing in his line he remarked further: "He got my hook and minnow."

Menhville Pinkley, having a strong strike on his own hook, was paying little attention. He reeled and fought and fought and reeled and finally worked his fish, exhausted, near the boat's side and the guide lifted it out with a dipnet. Attempting to unfasten the fish he turned to Pinkley and said: "You are the only man around here who ever caught a fish without sticking a hook in him."

Examination showed that the friend's line had parted just above the swivel. The bass darted away. The small eye of the swivel caught on the point of Pinkley's hook and stuck in.

The bass was thus landed on the hook with which it was first struck transferred under the water to another line.

Fishing with a hand line below Mt. Carmel, Ill., last fall, Rob. Dunn, a boy fourteen years old, felt a bite and hooked a fish and began to haul in. When the line was half in he felt a mighty surge and was pulled nearly to the river's edge.

He hung on desperately and, being unable to land the fish, called to a negro boy fishing some yards away. Together they tugged at the line and finally got the fish in to the bank. When the line was half in he felt a mighty surge and was pulled nearly to the river's edge.

He hung on desperately and, being unable to land the fish, called to a negro boy fishing some yards away. Together they tugged at the line and finally got the fish in to the bank. When the line was half in he felt a mighty surge and was pulled nearly to the river's edge.

ALL RENOMINATED

OLD SLATE OF COUNTY OFFICERS WENT THROUGH INTACT.

UNUSUALLY HARMONIOUS CONVENTION

FOURTEEN DELEGATES CHOSEN TO GO TO GRAND RAPIDS.

Proceedings Yesterday Afternoon Were Wound Up in an Hour—Brief Addresses by Two of the Nominees.

County Clerk—W. A. Ross. Register of Deeds—Joseph H. Primeau. Treasurer—Emmanuel Skoglund. Sheriff—John Penglose. Prosecuting Attorney—Frank A. Bell. Circuit Court Commissioners—George P. Brown and Theodore Thoren. Coroners—L. P. Cray and William Pryn. Surveyor—George P. Cummings.

The above ticket was placed in nomination yesterday afternoon at one of the most expeditious and uneventful conventions ever held in Marquette county. The entire old slate was renominated, without a hint of a contest, by acclamation, the proceedings being characterized by the utmost harmony and good feeling, and, withal, being concluded in less than an hour. It is said that the convention was the shortest for the county on record. At that the credentials committee used up most of the time.

Succeeding the renomination of all the old officers, County Clerk Ross and Register of Deeds Primeau addressed the delegates briefly, thanking them for past favors and eulogizing the party and its leaders. Mr. Primeau said, in the course of his remarks, that, despite the fact that a fight had been made on him, he had no hard feelings and that his hatred was buried.

Hon. H. O. Young was called on for some remarks, but he excused himself, stating that he was desirous of catching the 3:05 train, as it was necessary for him to return home to prepare to go to Grand Rapids to attend the state convention on the twenty-fifth. However, he assured the convention that he intended to make an active canvass of the district for the Republican tickets, and that he would do all in his power to keep the majorities on the upper peninsula up to former standards.

Proceedings in Detail. In the absence of M. M. Duncan, chairman of the county committee, A. J. Yungbluth called the convention to order. M. J. Sherwood of Marquette was nominated temporary chairman, and William Peters of Ishpeming temporary secretary.

On motion, the chairman appointed C. J. Byrns, Tom Gribble and E. W. MacPherran a committee on credentials, and J. H. Rough, D. T. Morgan and A. J. Yungbluth a committee on permanent organization and order of business.

A recess was taken to give the committee an opportunity to prepare their reports.

The committee on credentials reported that the following delegates were entitled to seats in the convention:—Marquette City—

First ward—Ed McCarthy, William Rivers and Mike Shea.

Second ward—James Donovan, J. D. Mangum, J. Flanagan.

Third ward—B. O. Pearl, M. J. Sherwood, E. W. MacPherran.

Fourth ward—C. E. L'Huilier, W. A. Jellison.

Fifth ward—Thomas Otterson, Louis Anderson, Alfred Fleury.

Sixth ward—Olat Flodin, Ensebe Bertram.

Seventh ward—A. E. Archambeau, John A. Williams.

Eighth ward—C. A. Laurier.

—Ishpeming City—

First ward—A. A. Lind, Frank Baird.

Second ward—Joseph Hodgson, Luke Demarse.

Third ward—H. O. Young, Leonard Sundblad, Richard Nichols, Wm. Peters.

Fourth ward—Alfred Collick, Frank Lindberg, W. E. McKee.

Fifth ward—C. J. Byrns, Lars Hoyseth.

Sixth ward—Henry Routhier, Gus Lyman, Charles Johnson, Jr.

Seventh ward—R. T. Smith, Charles Kruse.

Eighth ward—Edward Corey, Charles Gustafson.

Ninth ward—A. J. Yungbluth, G. C. Johnston.

Tenth ward—Arson Nault.

—Negaunee City—

First ward—Louis Peterson, John Nelson.

Second ward—Tom Gribble, Mike Scanlan.

Third ward—Sam Hooper, Patrick Nickolson.

Fourth ward—J. H. Rough, John Wasmuth, Joe Barabe.

Fifth ward—Captain Richard Roberts, John Bodilly.

—Townships—

Champion—No delegates.

Choslay—Clifford Berdeau.

Ey—Philo P. Chase.

Forsyth—George Sarasin.

Humboldt—J. W. Allen.

Ishpeming—Joseph Charles.

Marquette—Roderick Campbell.

Michigan—G. J. Murray, P. H. Trezise.

Negaunee—No delegate.

Republic—D. T. Morgan, E. E. Exstrom, Thomas Pascoe, George McDonald.

Richmond—A. E. Hodgkins.

Sands—B. J. Goodman, Sr.

Seandia—No delegate.

Tilden—John Trebbleck, Henry Johnson, Jabez Trebbleck.

Turin—No delegate.

West Branch—Addison G. June.

The temporary organization was made permanent, on the recommendation of the committee on permanent organization and order of business.

Chairman Sherwood appointed H. O.

Young, J. D. Mangum and P. P. Chase a committee on the selection of delegates to attend the state convention to be held at Grand Rapids this week, on the 25th. They shortly reported the following list: Gad Smith, John R. Gordon, J. D. Mangum, J. E. Ball, Alexander Maitland, J. Q. Adams, Samuel Mitchell, T. M. Wells, H. O. Young, John James, O. G. Young, A. J. Yungbluth, Emanuel Skoglund and James Russell.

E. W. MacPherran moved that the entire old slate of county officers be renominated by acclamation, a motion which was passed with a rush.

STEAMER YAKIMA CLEARS.

Takes On Ore and Leaves in Tow of the Volunteer.

The steamer Yakima, which was released from the rocks in Bete de Gris bay by the combined efforts of four steamers and the harbor tug Schenck, cleared from Marquette late last night for Cleveland. She is loaded with ore and is bound for Cleveland in tow of the steamer Volunteer, which also took on a cargo at the L. S. & I. dock. It had been the intention to tow the Yakima to Duluth for repairs, but, although her rudder is badly damaged, it was found that she could be towed to the lower lakes without losing time in dry dock.

COPPERS IN BAD WAY.

Money Rates Were Responsible for the Manner in Which They Suffered.

Paine, Webber & Co. said of the Boston market:

"It was a question of money today, and all stocks suffered, the coppers with the most. Money rates ran between 12 and 20 per cent, and there was heavy liquidation. Taking everything into consideration, the market acted remarkably well, and the coppers were among the strongest stocks on the list. Relief for the monetary situation is already in sight, and if prices run off sharply in the morning we believe good stocks, especially coppers, should be bought."

Bad Day in New York.

Walker said of the New York market:

"The market today was weak, and there was heavy liquidation through the entire day. Prices broke sharply, and there was little support. The money rates continued as high as 20 per cent and this had a bad effect. Pool selling in Southern Pacific and Pennsylvania caused these stocks to decline. The only buying seemed to be by the shorts and this did not amount to much. The close was weak, with a most unsettled feeling."

FOR U. P. TRAFFIC.

Wabash and Pennsylvania Roads May Be Competitors.

A Soo special to the Detroit Free Press has the following discussion of the plans of the Wabash and Pennsylvania railroads, which are said to be prospective rivals for upper peninsula trade:

Unless all signs fail, and all good things seem to be coming the Soo's way, there will be some lively work in the way of railroad construction in Chippewa county during the coming year, and this fall may see work started on at least one, if not two, lines that are headed for the Soo, while next year will see some great hustling on the part of two rival systems, the Wabash and Pennsylvania, to get into the Lock City.

It is well known two lines of road are already surveyed from this city to St. Ignace, and they were recently held here a meeting attended by Messrs. Pennington and Fitch, of the lines that, in short stretch between the Soo and St. Ignace, and a gentleman representing the Consolidated Lake Superior Power company, at which the situation was very thoroughly discussed and a plan outlined to bring all factions together in an endeavor to build a short cut to the straits that could be used to the mutual advantage of all.

But another line that Sooites and Chippewa county is deeply interested in is that projected from here to Detour, which gives promise of early development. This line has also been surveyed and some right of way secured, but it is the connection with an eastern outlet that is at present attracting attention, and that will, in all probability, give the project new life.

The St. Ignace line when built will undoubtedly be constructed with money furnished by the Pennsylvania system, while the Detour line will be built by a rival company that has been looking for an opening to get into the upper country for several years. This company is the Wabash. For some time past, it is stated, the Wabash has been quietly buying stock of the Detroit & Mackinaw road with this very purpose in view and has finally got enough to swing matters its way.

The D. & M. is already built to within about eleven miles of Cheboygan, and has secured terminal grounds and dock frontage in the latter city. No move has been made to build, for the reason that under present conditions the road gets the benefit of a long haul on a great tract of lumber through which it passes, whereby if the line was extended to Cheboygan, the haul would be in that direction and boats would gobble up a big share of profits. But it is the Soo and the upper country that the Detroit & Mackinaw is really aiming for. From Cheboygan to Detour it is about thirty-two miles by water, and there is no point on the lakes that presents a more inviting opening for a line of ferry boats. The water there is almost entirely free from ice during the most severe winter weather, and the difficulties that confront ferry boats across the straits is almost entirely avoided by the proposed route.

EVEN A STOIC GROANS

under the treatment of neuralgia, when every nerve in the face or limb throbs and jumps. Philosophy cannot endure this agony but Ferris' Electric Painkiller relieves it. Bathe the affected parts freely, keep them warm and do not expose yourself to cold and dampness. The electric current marches right along, but it has not found the equal of Painkiller in the treatment of neuralgia.

DEAL IS CLOSED UP

CLEVELAND-CLIFFS PEOPLE ACQUIRE PENDILL PROPERTY.

IT IS LOCATED AT NEGAUNEE

TRANSFER INCLUDES TITLE TO THE VALUABLE LUCY MINE.

The Consideration Is \$85,000—A \$20,000 Transaction Between C. C. I. Co. and the South Arm Lumber Company.

The deal between the Pendills and the Cleveland-Cliffs Iron company for the sale of the Negaunee mineral lands, including the Lucy mine, of the first named party has been closed, and the deed recording the transfer has been filed with Register Primeau. The consideration is \$85,000.

This deal has been on the tapis for the past few weeks, and by it the Cleveland-Cliffs Iron company gains possession of some mineral tracts of great promise. It is generally remarked by men who claim to know something of the mining industry that the Cleveland-Cliffs people made a good bargain.

The description of the land transferred follows: The northwest quarter of the southwest quarter of section 6, including the entire of Iron plat, or Pendill's subdivision of the City of Negaunee, embracing lots 1 to 198 inclusive, and lot 198 marked "depot" on the plat; the southwest quarter of the southwest quarter of section 6 and the northwest quarter of the northwest quarter of section 7, all in township No. 47 north, range 6 west.

The exceptions are (1) Lots 1 to 87 inclusive of the Iron plat. (2) The surface rights of lots No. 95, 96, 97, 192, 193 and 198, marked "depot" on the plat of said addition, all in said Iron plat, or Pendill's subdivision; also a parcel of land owned by William Penglose. (3) The city streets on the land and the "state" road, so-called, across it. (4) The rights of way of the Duluth, South Shore & Atlantic, Chicago & Northwestern and Lake Superior and Ishpeming railroads.

The Lucy mine, probably the most valuable part of the land transferred, was last operated in 1898. It was opened in 1870, and is one of the oldest properties at Negaunee. It is credited with total shipments of 516,159 tons of ore. Under Cleveland-Cliffs management it is regarded as likely that it will develop into a highly valuable property.

Another Important Deed. Another important deed, just filed with the register, records a transaction, involving \$20,000, between the South Arm Lumber company and the Cleveland-Cliffs Iron company. By its terms the former corporation transfers to the latter the following property:

"A railroad right of way, 100 feet wide, across sections 8, 14, 15, 16, 17, 23 and 24, known as the upper line of the Dead River railroad, upon which a railroad of standard gauge has been constructed and operated and is now being operated, all in township 48 north, range 26 west, including the right to maintain and operate forever a railroad thereon, with all its necessary structures, also all existing side tracks occupying the land adjoining to said right of way; also including all railroad tracks, structures and property now located on said right of way, except the log hoist known as Dead River hoist."

MARINE MATTERS.

Soo Canal Passages.

Sault Ste. Marie, Sept. 23.—(Special).—Princeton and whaleback, 9 last night; Genoa, 12; Niagara, 2 a. m.; Flagg, Warriner, 3; Wotan, Turret Chief, Frontenac, 5:40; Wolvin, 7; Bessemer and whaleback, 8; Gogebic, Biwabie, Houghton, Maderia, 9:40; Naples, Pasadena, Northern Queen, 11; Nicholas, Brazil, Tecumseh, Marquette, 1 p. m.; Advance, 2; Stone, oil tank, Northern King, 3; Chocataw, 4:30; Turret Cape, 7:30.

CITY BREVITIES.

Today's weather: Possibly showers; brisk winds, mostly northeast.

Yesterday's temperature: 7 a. m., 50 degrees; 12 noon, 50 degrees; 7 p. m., 51 degrees; maximum, 57 degrees; minimum, 49 degrees.

The schooner McGregor is in the harbor, with a cargo of coal.

Miss Cecil Grylls and Miss Lottie Pendill left for Chicago last evening.

George J. Shining and T. H. Noble of Gladstone were in Marquette yesterday.

Miss Davis, who will teach in the high school during the ensuing year, arrived here yesterday.

There is a big attendance nightly at Fraternity Hall, where the St. Peter's fair is in progress.

The Buell was in port yesterday. She unloaded a consignment of 2,000 bags of cement for F. B. Spear & Sons.

The Marquette Light Infantry will give a ball at the Casino rink next week. The date is Wednesday, Oct. 1.

Miss Mary R. Powers of Hastings arrived in Marquette yesterday. Miss Powers is an instructor in the high school.

Rev. E. A. Elliott has been acting as secretary of the Lake Superior district at the annual Methodist conference at Saginaw during the past several days.

Mrs. W. J. Pettie, who has been visiting her parents, Mr. and Mrs. E. B. Palmer, during the summer months, left last evening for her home in St. Louis, Mo. She will be joined at Chicago by her father.

There was a small blaze on the bridge just below the Savings bank building early yesterday morning. A spark from an engine working on No. 4 dock

is supposed to have started it. The fire was noticed before it had gained much headway and was quickly subdued by some laborers on the dock. No material damage was done.

The Ladies' auxiliary to the Brotherhood of Railroad Trainmen will give a social hop this evening at the A. O. U. W. hall. The admission price will be twenty-five cents for each person. The public generally is invited.

The frames of four of the double houses being built by the Pioneer Iron company at its north Marquette location are up, and others are about to be raised. Contractor Chaussee of Negaunee is employing a good force of carpenters on the job.

The fair weather of the past several days has permitted Powell & Mitchell, the contractors on the Pioneer Iron company's intake, to make good progress. The second section has yet to be laid, but it is to be put in place shortly, as the excavating is well advanced.

The decorators began work at the new high school yesterday. They are to decorate the assembly room. It is said that upwards of three weeks will be required for their work. No date has yet been set for the resumption of high school work. The carpenters will be out of the building by Saturday, but the sway of the decorators will cause an additional delay.

A large delegation of up-the-road people attended the county Republican convention yesterday. If they were after excitement, they returned home greatly disappointed. A few prospective candidates were on the scene at the convention, but the decision to put the old slate of officers through intact eliminated them from the situation, and their names were not even presented to the delegates.

There was a strike yesterday morning at the houses being built by the Pioneer Iron company at its north Marquette location. The union men went out, demanding that Contractor Chaussee discontinue the services of the non-union men. The strike was of short duration, as the contractor at once acceded to the men's request. Some six or seven non-union men were let go. The union carpenters are greatly pleased at the support Mr. Chaussee gave their organization.

H. O. Young of Ishpeming yesterday informed a Mining Journal representative that he will open his congressional campaign at Menominee on the 10th of next month. Mr. Young expects to make an active canvass of the district prior to the date of the May 6 election. He has not made an itinerary for a formal tour, but he will speak wherever his services are in demand. He expects to visit every county in the district, with the possible exception of Keweenaw. Mr. Young is an unusually effective campaign orator and his work prior to the election will do a great deal to stir up Republican enthusiasm in the various counties of the upper peninsula.

Overtures, having in view the organization of an upper peninsula indoor baseball league, have been made by Manistique "fans" to local devotees of the game. The scheme finds considerable favor here. The Marquette players are agreed to, to the point of doing all that can be done to bring the proposed organization about. The idea is to have an association embracing teams from Manistique, the Soo, the Marquette county cities and the copper country, which shall play a regular schedule of games.

The sport attained much popularity here last winter, and whether the proposed league is launched or not, it is stated that at least three Marquette clubs will be in the field the coming season.

Captain Thomas Richardson, one of the owners of the Bloomer Girl, and who sailed the excursion steamer the greater part of the summer, died Sunday at his home in Milwaukee. He was seventy years of age. Captain Richardson left Duluth last Tuesday and his death comes as a shock to his many friends here and at other ports along the lakes where he is well known. Captain Richardson has sailed the lakes for thirty-five years and in 1896 built the Bloomer Girl, bringing her to this city in 1900. The deceased was the oldest Knight of Pythias and Old Fellow in the state of Wisconsin. Dr. M. Morrison, the manager of the excursion steamer, with members of the crew, sent a message of condolence to Mrs. Richardson as soon as the news of the old sailor's death was received.—Duluth Evening Herald.

How often, after exposure, we find ourselves in the throes of a severe cold, which may be followed by pneumonia. To cure the one and prevent the other take a dose of Ferris' Honey and Honeybound. Sold by The People's Drug store.

It stands alone, it towers above. There no other, it's nature's wonder, a warning poultice to the heart of mankind. Such is Rocky Mountain Tea. 35 cents. Stafford Drug Co.

NOTICE TO CONTRACTORS.

City Controller's Office.

Marquette, Mich., Sept. 22, 1902.

Pursuant to resolution of the common council of the City of Marquette, notice is hereby given that sealed proposals will be received at my office until 8 o'clock p. m., Sept. 30, 1902, for furnishing all labor and material required to make the following improvement, in accordance with the profiles thereon on file in my office, to-wit: The construction of an eighteen-inch tile sewer from manhole in trunk sewer in Maple street through Maple street and railway property to the center of Fifth street, and a twelve-inch tile sewer from proposed manhole in Fifth street to the center of Spring street, with necessary "x" for lateral sewers, in accordance with the profiles thereon, with manholes shown on said profiles.

Proposals for said improvement must be in sealed envelopes marked "Maple Street Trunk Sewer" and must be accompanied by a contractor's bond with two good sureties, in a sum at least twice the amount of bid; conditioned for performance of contract, payment for labor and materials, etc., in accordance with form on file in my office.

The aforesaid streets must be left in good condition at the completion of said sewer.

The common council reserves the right to reject any or all bids.

FRANKLIN E. BAY,

City Controller.
