ALGER IS SWORN IN

MICHIGAN'S NEW SENATOR GETS A FLATTERING WELCOME.

At a meeting of the New York delegation in the house this afternoon, it was unanimously decided to support Representative Cannon of Illinois for speaker.

Representative Dazell of Pennsylvania has withdrawn from the contest for the speakership in favor of Mr. Cannon. This practically assures the latter the unanimous vote of the Republican caucus.

of the District of Columbia to the extent of allowing it representation in congress and in the electoral commission.

Senator Lodge introduced a bill amending the Philippine civil government bill so as to admit Philippine goods into the United States at one-fourth the tariff of the Dingley rates.

New York Endorses Cannon.

At a meeting of the New York delegation in the house this afternoon, it was unanimously decided to support Representative Cannon of Illinois for speaker.

Representative Dazell of Pennsylvania has withdrawn from the contest for the speakership in favor of Mr. Cannon. This practically assures the latter the unanimous vote of the Republican caucus.

LONDON VIEW OF THE MESSAGE.

Press Looked for Revolutionary Document and is Disappointed.

London, Dec. 3.—Some of the London morning papers regard President Roosevelt's message disappointing inasmuch, according to their view, "he adopts a cautious and conservative policy, rather than a revolutionary one, in dealing with the trust question and the tariff."

The general impression is the president has been influenced by the warning echoes of the last elections and that he seeks to attract rather than attempt to compel the support of congress.

The president's enunciation of the foreign policy of the United States and his advocacy of a strong navy met with warm appreciation and the message generally is welcomed as a tranquilizing one by providing that no organic change of policy is intended.

ROOSEVELT ENDORSES IT.

Congressman Foss Has Plan to Increase the Number of Naval Officers.

Washington, Dec. 2.—Representative Foss of Illinois, chairman of the house committee on naval affairs, had an extended conference with the president today about naval matters and especially respecting the lack of officers to man the big fighting ships properly.

Mr. Foss has a plan for increasing the number of naval officers with which the president is impressed favorably. It is that congress enact a law doubling the number of cadets annually appointed to the naval academy, during a period of twelve years. The operation of such a law, it is said, would furnish a sufficient number of officers to meet the needs of the service and at the end of twelve years the number of cadets annually appointed could be reduced with safety to the present number. Mr. Foss regards it as quite likely his committee will endeavor at the present session to meet the existing deficiency in the number of naval officers.

SLAIN IN COLD BLOOD.

Murder of Kate Hasset, the Actress, Premeditated by Actor Johnstone.

Philadelphia, Pa., Dec. 2.—Developments today in the murder of Kate Hasset, who was shot and killed last night by Harry Johnstone, formerly with Richard Mansfield's company, indicate the crime was premeditated. Johnstone, who after he had shot the woman attempted suicide, is tonight in a critical condition. Everett Beekwith, husband of the murdered actress, is on his way here from Chicago.

The police learned today that shortly after Miss Hasset left her boarding house for the theatre last night, Johnstone forced an entrance into her apartment. He carried a coil of rope which he attached to a post of the actress' bed. The police believe it was the murderer's intention to await the return of Miss Hasset and shoot her in her room, hoping to escape through the window by means of the rope. His presence in the room was discovered by other boarders. They assert the actor was greatly excited and that he had torn to shreds all the woman's clothing which he found in the room. Fearing he meant to harm the actress, boarders intercepted her at the door of the house and related what had transpired. As Miss Hasset turned to seek other quarters for the night, Johnstone, it is said, rushed from the house and joined her. They had not proceeded far before he shot her and turned the weapon upon himself.

The murderer left a letter addressed to Robert H. Johnstone, Syracuse, N. Y., which was a check for \$200 and giving directions for the disposal of his effects and the burial of his body. Friends of the dead woman say that Johnstone had been persecuting her for a week and that she frequently expressed fear of him. Of course, when the conditions have favored the growth of so much that was good, they have also favored somewhat the growth of what was evil. It is eminently necessary that we should endeavor to cut out this evil, but let us keep a due sense of proportion; let us not in fixing our gaze upon the lesser evil forget the greater good. The evils are real and some of them are menacing, but they are the outgrowth, not of misery or decadence, but of prosperity—of the progress of our gigantic industrial development. This industrial development must not be checked, but side by side with it should go such progressive regulation as will diminish the evils. We should fall in our duty if we did not try to remedy the evils, but we shall succeed only if we proceed patiently, with practical common sense and with resolution, separating the good from the bad and holding on to the former while endeavoring to get rid of the latter.

TWO ALASKAN SHIPS LOST.

Port Townsend, Dec. 2.—The United States revenue cutter Bear arrived today from Dutch Harbor, Alaska, after one of the most tempestuous voyages ever experienced during the thirteen years the vessel has been detailed for the Arctic service. Captain Tuttle thinks little hope can be entertained of ever hearing of either the schooner General Siglin or the steamer Dawson City.

EX-SPEAKER REED ILL.

Washington, Dec. 2.—Former Speaker Reed had a sudden and quite severe attack of gastritis this evening. He was prostrated for a time, but the physician succeeded in relieving him. His sudden illness caused considerable alarm to his friends, but at a late hour Mr. Reed was getting on better than had been feared earlier in the evening.

MISSOURI BREWERS HARD HIT.

Kansas City, Mo., Dec. 2.—The Kansas city court of appeals has decided that the combination of brewers in this city is an unlawful trust, forbidden by the statutes of Missouri, and that any man who owes one of the brewers in the combine need not pay his bill. The brewer cannot collect the debt, even by going to court.

JACKIES TO REPLACE STRIKERS.

Paris, Dec. 2.—The council of ministers, at its meeting today, decided that owing to the serious interruption of traffic due to the sailors and stokers' strike at Marseilles, the government will organize immediately a provisional service by requisitioning the companies' vessels and manning them with sailors from the navy.

SENDS IN MESSAGE

PRESIDENT RECOMMENDS MUCH LEGISLATION TO CONGRESS.

ANTI-TRUST IDEAS NOT EXTREME

PROPOSES, NOT TO DESTROY, BUT TO EFFECTUALLY REGULATE.

Warns Against Any Radical Revision of the Tariff and Urges Reciprocity—Asks a Bigger Navy and Suggests a More Elastic Currency.

Washington, Dec. 2.—President Roosevelt's message to congress, read at today's session, is as follows:

We still continue in a period of unbounded prosperity. This prosperity is not in the creature of law, but undoubtedly the laws under which we work have been instrumental in creating the conditions which made it possible, and by unwise legislation it would be easy enough to destroy it. There will undoubtedly be periods of depression. The wave will recede; but the tide will advance. This nation is seated on a continent flanked by two great oceans. It is composed of men the descendants of pioneers, or, in a sense, pioneers themselves, of men winnowed out from among the nations of the Old World by the energy, boldness, and love of adventure found in their own eager hearts. Such a nation, so placed, will surely wrest success from fortune.

Now a Great World-Power.

As a people we have played a large part in the world, and we are bent upon making our future even larger than the past. In particular, the events of the last four years have definitely decided that, for woe or for weal, our place must be great among the nations. We may either fall greatly or succeed greatly; but we can not avoid the endeavor from which either great failure or great success must come. Even if we would, we can not play a small part. If we should try, all that would follow would be that we should play a large part ignobly and shamefully.

But our people, the sons of the men of the Civil war, the sons of the men who had iron in their blood, rejoice in the present and face the future with high heart and resolute will. Ours is not the creed of the weakling and the coward; ours is the gospel of hope and of triumphant endeavor. We do not shrink from the struggle before us. There are many problems for us to face at the outset of the twentieth century—grave problems, abroad and still graver at home; but we know that we can solve them and solve them well, provided only that we bring to the solution the qualities of head and heart which were shown by the men who, in the days of Washington, founded this government, and, in the days of Lincoln, preserved it.

Well-Being Unprecedented.

No country has ever occupied a higher plane of material well-being than ours at the present moment. The well-being is due to no sudden or accidental cause, but to the play of the economic forces in this country for over a century; to our laws, our sustained and continuous policies; above all, to the high individual average of our citizenship. Great fortunes have been won by those who have taken the lead in this phenomenal industrial development, and most of these fortunes have been won not by doing evil, but as an incident to action which has benefited the community as a whole. Never before has material well-being been so widely diffused among our people. Great fortunes have been accumulated, and yet in the aggregate these fortunes are small indeed when compared to the wealth of the people as a whole. The plain people are better off than they have ever been before. The insurance companies, which are practically mutual benefit societies—especially helpful to men of moderate means—represent accumulations of capital which are among the largest in this country. There are more deposits in the savings banks, more owners of farms, more well-paid wage-workers in this country now than ever before in our history.

Of course, when the conditions have favored the growth of so much that was good, they have also favored somewhat the growth of what was evil. It is eminently necessary that we should endeavor to cut out this evil, but let us keep a due sense of proportion; let us not in fixing our gaze upon the lesser evil forget the greater good. The evils are real and some of them are menacing, but they are the outgrowth, not of misery or decadence, but of prosperity—of the progress of our gigantic industrial development. This industrial development must not be checked, but side by side with it should go such progressive regulation as will diminish the evils. We should fall in our duty if we did not try to remedy the evils, but we shall succeed only if we proceed patiently, with practical common sense and with resolution, separating the good from the bad and holding on to the former while endeavoring to get rid of the latter.

CONTROL OF TRUSTS URGED.

Legislation That Will Curb and Regulate Combines is Recommended.

In my message to the present congress at its first session I discussed at length the question of the regulation of those big corporations commonly doing an interstate business, often with some tendency to monopoly, which are popularly known as trusts. The experience of the past year has emphasized, in my opinion, the desirability of the steps I then proposed. A fundamental requisite of social efficiency is a high standard of individual energy and excellence; but this is in no wise inconsistent with power to act in combination for aims which cannot so well be achieved by the individual acting alone. A fundamental base of civilization is the inviolability of property; but this is in no wise inconsistent with the right of society to regulate the exercise of the artificial powers which it confers upon the owners of property.

(Continued on Page Two.)

BOLD BANK ROBBERY.

Cashier of a Montana Institution is Held Up for \$2,000.

Bridge, Mont., Dec. 2.—The Stock Growers' bank here was held up and robbed of \$2,000 today. Two men entered the bank and, pointing revolvers at Cashier Frank, ordered him to hold up his hands. A third stood guard at the door. Mail Carrier Williams entered at this time and was covered by the robbers' pistols. He and the cashier were placed against a wall, with their hands up. One robber took all the money in sight. The three then left the bank, mounted horses and fled. A posse pursued them and exchanged shots with the robbers until timber was reached, when the robbers disappeared and have not been seen since.

RAILROAD MEN WANT INCREASE.

Conference in Chicago is Formulating Demands for More Pay.

Chicago, Dec. 2.—With the purpose of formulating requests for increases of 10 to 20 per cent in the pay of 170,000 railroad employes, committees from the brotherhoods of engineers, firemen, trainmen and conductors are now meeting in Chicago. They are to present their demands to the railroads early next week. It is the first time in eight years the four organizations are working in harmony and they may be counted upon to stand together in the possibility of trouble. It is announced that the demands will be made upon every railroad system in the middle northwest. The Eastern roads entering the city will be similarly dealt with. The railroads will be given one month to meet the demands.

STRIKE HEARING RESUMES TODAY.

Miners to Again Go on Presenting Their Side of the Controversy.

Seranton, Pa., Dec. 2.—The entire membership of the strike commission is now here, ready to resume the hearings. An informal conference of the commissioners was held this evening and the sub-commission made a report of what it had done during the recess. The commissioners are a little disappointed at the failure of the two parties to agree during the recess. They will now proceed and listen to all information either side has to present.

When adjournment was taken ten days ago for the purpose of permitting both sides to work on a mass of figures to be presented to the commission and incidentally to try to patch up their differences, the miners were still presenting their side of the controversy. It is now the intention of the attorneys for the mine workers to take up the conditions in the middle Hazleton district. For this purpose about twenty Italians and Poles, among them some women and children, were brought here this afternoon from that region. All, including the children, will take the witness stand and tell of the conditions prevailing among their people in that territory.

Indiana Miners to Demand Increase.

Brazil, Ind., Dec. 2.—The miners of each district, representing the block coal fields of Indiana, met here today in a secret session. It is understood that they demand a ten-cent increase, and it is believed the demand will be granted.

COLD WAVE MOVING EAST.

Zero Weather and Severe Snow Storm Experienced in the West.

Cheyenne, Wyo., Dec. 2.—A severe snow storm reached here today and is moving south before a high wind. The temperature has fallen to zero.

Denver, Dec. 2.—The cold wave which struck Colorado today has developed into a regular blizzard. Much damage to cattle on the ranges is feared.

Lincoln, Neb., Dec. 2.—Eastern and central Nebraska this afternoon and tonight experienced the first heavy snow fall of the season. It has not drifted enough to interfere with traffic.

Omaha, Dec. 2.—A rainstorm which began at noon today turned to snow tonight and three inches had fallen at midnight. The storm has paralyzed telegraph communication. The storm is general throughout eastern Nebraska and western Iowa.

Fierce Gale at Chicago.

Chicago, Dec. 2.—One of the heaviest storms of the year struck this city late today. The wind is blowing fifty-two miles an hour, and rain is falling in sheets. Since daylight not a boat of any description has arrived. The wind has caused considerable damage to telegraph and telephone wires. It is predicted the gale will continue through tomorrow.

La Crosse, Dec. 2.—A heavy snow storm was swept by a heavy snow storm tonight. Telegraph service is crippled and trains are late.

Bad Storm in the South.

Louisville, Ky., Dec. 2.—A severe storm wind and rain swept a portion of the South today, causing considerable loss of property and several casualties. Southern Louisiana, northern Mississippi, western Tennessee and southeastern Alabama were the chief sufferers. The storm was especially severe at New Orleans.

Washington, Dec. 2.—The weather bureau today issued the following bulletin: "A cold wave will overspread the districts west of the Mississippi tonight and Wednesday. In the central valleys there will be rain in the southern and snow in the northern districts, to be followed Wednesday by a decided fall in temperature. In the lake region high northeast winds, with snow, will be followed Wednesday and Wednesday night by colder and clearing weather."

MICHIGAN TEAM'S NEW CAPTAIN.

Ann Arbor, Mich., Dec. 2.—Curtis G. Redden, left end, was this afternoon selected captain of the University of Michigan football eleven for next year.

San Francisco, Dec. 2.—The University of California football team has decided to play no more this year. If the Wisconsin team comes to the coast, a game with the southern California team and possibly another Eastern team will be played at Los Angeles.

PLOT TO KILL THE MIKADO.

Victoria, B. C., Dec. 2.—The steamer Kiag Maru, today brings news of an attempt on the life of the emperor of Japan when the imperial train was at Otakan, enroute to the scene of the army maneuvers. A number of conspirators had gone there and arranged to blow up the emperor's train, but the police learned of the plot and the would-be dynamites escaped.

Difficult Digestion

It is dyspepsia. It makes life miserable. It suffers eat not because they want to, but simply because they must.

Hood's Sarsaparilla

Hood's Pills are the best cathartic.

MARQUETTE, MICH., DEC. 3.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

This is not only a great country but one added in proportion to its greatness to the luxuries and dissipations of life.

According to the internal revenue reports, the production of distilled spirits for the fiscal year amounted to 104,804,651 gallons.

Permented liquors to the amount of 44,478,832 barrels were produced.

The cigars numbered 6,864,469,625 and the cigarettes 2,651,618,797.

Of chewing and smoking tobacco 298,048,329 pounds were prepared and of snuff 17,671,135 pounds.

Chief Deputy Game Warden Brewster thinks that the use of high power guns should be prohibited by state law, and there are many who will agree with him.

It is coming to be believed among a wide circle of hunters that the high power gun is a mistake, and that it only increases the danger of hunting without increasing the chance of getting game.

It is claimed that the type of rifle it replaced was, altogether, just as efficient a weapon in the chase.

In any event, as there seems to be no question that the high power gun is responsible for the increase in the number of accidents and fatalities observed during the past two seasons it is apparent that its use should be discouraged.

Charles Moore, for many years private secretary to the late Senator McMillan, will become the right hand man and confidential adviser of F. H. Clergue of the Soo, entering on these duties next April.

It is the general opinion that Mr. Clergue has shown excellent judgment in availing himself of Mr. Moore's services.

The latter has a reputation for a wonderful amount of business sagacity, while his constant contact with Mr. Moore has made him a man of broad views and great resource in accomplishment.

In fact he is an ideal lieutenant for the Soo promoter. In addition to his business ability, Mr. Moore is a student who is regarded as an authority on the history of Michigan and the Northwest.

His book "Under Three Flags" stands high as a historical record.

The man who had handled more actual money than any other in the world died the other day in New York.

Francis G. Meyers was his name and he was chief of the coin division of the New York sub-treasury. It is estimated that during the last twelve years of his life the enormous sum of \$2,888,000,000 in gold passed through his hands.

He was employed in the sub-treasury for twenty-three years and during that time actually handled some \$8,000,000,000 in gold and silver money.

He never made a mistake in counting the millions of dollars passing under his supervision and no counterfeit escaped him.

He was a famous coin expert before he entered the sub-treasury and the New York Herald quotes George W. Marlor, cashier of the sub-treasury, to the effect that in all probability Mr. Meyers was the greatest genius in that line the world ever produced.

As poets are born, not made, so Francis G. Meyers seemed to have been born for the work to which he was called, for his skill seemed to be an intuition; he could not explain it.

Secretary Root's report is notable for his insistence on the general staff, to which he is firmly wedded. He states that it is the logical arrangement of the president being the commander in chief of the army, and he asserts that the results from its adoption could only be highly satisfactory for the service.

There is a good deal of opposition to the secretary on this point, and if the matter is brought up in congress it will be threshed over with some warm debates.

The secretary's reference to the canteen question may be described as colorless, insofar as it does not recommend the canteen restoration, although it is easy to infer that he is in favor of this step.

His report outlines the manner in which discipline and the personnel of the army has suffered since its abolition, it going on to say:

Referring to the operation of Section 38 of the act of February 2, 1901, which prohibits the sale of beer and light wines in post exchanges, I said in my report that a great body of reports had been received which indicated that the effect of the law was unfortunate, but that I thought a sufficient time had not elapsed to give the law a fair trial and that the observation and report of its working would be continued during the ensuing year.

A great number of additional reports have now been received, and they confirm the impression produced by the earlier reports. I am convinced that the general effect of prohibiting the use of beer and light wines within the limited

SCHOOL GIRLS.

'Tis a pretty age—that time in a girl's life when she has all the beauties of womanhood without the later lines of care and worry.

But here and there even among school girls appear pale and drawn faces.

Pale blood is at the bottom of the trouble and Scott's Emulsion can cure it.

Scott's Emulsion brings back the beauty to pale girls because it is blood food.

SCOTT & BOWNE, Chemists, 409 Pearl St., N. Y.

SENDS IN MESSAGE

(Continued from Page One.)

under the name of corporate franchises, in such a way as to prevent the misuse of these powers.

Federal Supervision Necessary.

Corporations, and especially combinations of corporations, should be managed under public regulation. Experience has shown that under our system of government the necessary supervision of the corporations is not being exercised.

It must therefore be achieved by national action. Our aim is not to do away with corporations; on the contrary, these big aggregations are an inevitable development of modern industrialism, and the effort to destroy them would be futile unless it is accompanied by the shifting of the utmost mischief to the entire body politic.

We can do nothing of good in the way of regulating and supervising these corporations until we fix clearly in our minds that we are not to let the corporations do as they please, but to let them do as we wish them to do.

We are not hostile to them; we are merely determined that they shall be so handled as to subserve the public good. We draw the line against misconduct, not against wealth.

The capitalist who, alone or in conjunction with his fellows, performs some great industrial feat by which he wins money is a welder, not a wrongdoer, provided only he works in proper and legitimate lines.

We wish to favor such a man when he does well. We wish to prevent him from doing ill. Publicity can do no harm to the honest corporation; and we need not be overdone about sparing the dishonest corporation.

In curbing and regulating the combinations of capital which have become so injurious to the public we must be careful not to stop the great enterprises which have legitimately reduced the cost of production, not to abandon the place which our country has won in the leadership of the international industrial world, not to strike down the means of the result of closing factories and mines, of turning the worker idle in the streets and leaving the farmer without a market for what he grows.

Insistence upon the impossible means delay in achieving the possible, exactly as, on the other hand, the stubborn insistence of what is good and what is bad in the existing system, the resolute effort to obstruct any attempt at betterment, betrays blindness to the historic truth that wise evolution is the sure safeguard against revolution.

Regulation of Interstate Commerce.

No more important subject can come before the congress than this of the regulation of interstate commerce. This is not a subject to be left to the plea that under our peculiar system of government we are helpless in the presence of the new conditions, and unable to grapple with them or to cut out whatever of evil has arisen in connection with them.

The power of the congress should not be allowed to sit idle, and absolute and unqualified grant, and without limitations other than those prescribed by the constitution.

The congress has constitutional authority to make all laws necessary and proper for executing this power, and an adequate power is not afforded to sit upon the statute books. It is evident, therefore, that evils restrictive of commercial freedom and entailing restraint upon national commerce fall within the regulatory power of the congress, and that wise and reasonable laws could be a necessary and proper exercise of congressional authority to the end that such evils should be eradicated.

I believe that monopolies, unjust discriminations, which prevent or cripple competition, and the over-concentration of power, and other evils in trust organizations and practices which injuriously affect interstate trade can be prevented under the power of the congress to regulate commerce with foreign nations and among the several states through regulations and requirements operating directly upon such commerce, the instrumentalities thereof, and those engaged therein.

I earnestly recommend this subject to the consideration of the congress with a view to the passage of a law reasonable in its provisions and effective in its operations, upon which the questions can be finally adjudicated that now raise doubts as to the necessity of constitutional amendment.

It is proved impossible to accomplish the purposes above set forth by the present law, and we should not shrink from amending the constitution so as to secure beyond peradventure the power sought.

The congress has not heretofore made any appropriation for the better enforcement of the antitrust law as it now stands. Very much has been done by the department of justice in securing the enforcement of this law, but much more could be done if congress would make a special appropriation for this purpose, to be expended under the direction of the attorney-general.

Tariff Revision Not the Remedy.

No proposition advocated has been the reduction of the tariff as a means of reaching the evils of the trusts, which fall within the category I have described. Not merely would this be wholly ineffective, but the diversion of our efforts in such a direction would mean the abandonment of all intelligent attempt to do away with these evils.

Many of the largest corporations, many of those which should certainly be included in any proper scheme of regulation, would not be affected in the slightest degree by a change in the tariff, save as such change interfered with the general prosperity of the country. The only relation of the tariff to big corporations as a

IS KEYNOTE OF PROSPERITY.

President Warns Against Any Radical Revision of the Tariff.

Stability of economic policy must always be the prime economic need of this country. This stability should not be fossilization. The country has acquired in the wisdom of the protective-tariff principle. It is exceedingly undesirable that this system should be destroyed or that there should be violent and radical changes therein.

Our past experience shows that great prosperity in this country has always come under a protective tariff; that that the country can not prosper under a tariff which changes at short intervals. Moreover, if the tariff laws as a whole well, and if business has prospered under them and is prospering, it is better to endure for a time slight inconveniences and inequalities in some schedules than to upset business by too quick and radical changes.

A Business Proposition.

It is most earnestly to be wished that we could treat the tariff from the standpoint of our business needs. It is, perhaps, too much to hope that partisanship may be entirely excluded from consideration of the subject, but at least it can be made secondary to the business interests of the country—the interests of our people as a whole.

Unquestionably these business interests will best be served if together with fixity of principle as regards the tariff we combine a system which will permit us from time to time to make the necessary re-application of the principle to the shifting national needs.

We must take scrupulous care that the reapplication shall be made in such a way that it will not amount to a dislocation of our system, the mere threat of which (not to speak of the performance) would produce a business standpoint, having in view the community. The first consideration in making these changes would, of course, be to preserve the principle which underlies our whole tariff system—that is, the principle of putting American business upon a level with that of a full equality with interests abroad, and of always allowing a sufficient rate of duty to more than cover the difference between the labor cost here and abroad.

The well-being of the wage-worker, like the well-being of the tiller of the soil, should be treated as a constant factor in shaping our whole economic policy. There must never be any change which will jeopardize the standard of comfort, the standard of wages of the American wage-worker.

Reciprocity Treaties Favored.

One way in which the readjustment sought can be reached is by reciprocity treaties. It is greatly to be desired that such treaties may be adopted. They can be used to widen our markets and to give a greater field for the activities of our producers on the one hand, and on the other hand to secure in practical shape the lowering of duties toward us as a necessary corollary. They can be used to widen our markets and to give a greater field for the activities of our producers on the one hand, and on the other hand to secure in practical shape the lowering of duties toward us as a necessary corollary.

They can be used to widen our markets and to give a greater field for the activities of our producers on the one hand, and on the other hand to secure in practical shape the lowering of duties toward us as a necessary corollary.

INTERESTING CASE.

Sale of the Barge Wilbor's Lumber Aired in Houghton Court.

Prosecuting Attorney Larson has not yet set the date for the hearing of W. J. O'Brien, who, with Gordon C. Blair, was arrested in Chicago and brought to Houghton to answer to a charge of securing money under false pretenses from John C. Pryor. The hearing of Mr. Blair, who posed as an insurance adjuster when the deal was made for the transfer of the lumber cargo of the barge Wilbor, was commenced in Justice Brand's court at Houghton Monday afternoon. Four witnesses were examined. They were John Pryor, complainant; Frank H. Osborne of Chicago, adjuster of the Acta Insurance company; Joseph O'Neil of the E. S. Hartwell Lumber company of Chicago, to whom the lumber was assigned, and Captain O'Brien of the Wilbor. Mr. Pryor told of the deal. Mr. Osborne related this course in having the cargo removed and brought to Houghton and of chartering the steamer Osceola to take the lumber to Chicago. He said he knew nothing about the deal between Blair and O'Brien and Mr. Pryor. Mr. O'Neil stated that the lumber was assigned to his firm and that Messrs. Blair and O'Brien had no authority to sell it. Captain O'Brien's testimony was the most interesting. He said that when Wilbor was beached he was stranded in Houghton without funds and that he had to have money. He went to Mr. Osborne, the insurance adjuster, but Mr. Osborne could do nothing for him. He then went to Captain Chamberlain, of the steamer Wainwright, which had the Wilbor in tow, and who was at the head of the Chamberlain line, owning the boats. Captain O'Brien was informed, he said, that as master of the Wilbor he was privileged to sell the lumber. The deal with Mr. Pryor was subsequently made and Captain O'Brien took \$500 in currency out of the \$3,000 received and procured a draft for the balance of the amount. He said he paid several bills in Houghton and signed over the draft for \$2,500 to Captain Chamberlain, giving him \$100 in cash additional. That was the last Mr. O'Brien saw of the draft. When it was later presented for payment at a Chicago bank payment was refused and he was informed with word from Houghton, Captain O'Brien did not sign the draft over to Captain Chamberlain, he stated, until he had conferred with the latter in regard to the payment of the \$2,000, but Captain Chamberlain thought the bills too high and that the matter would be settled later in Chicago. Captain O'Brien says the Chamberlain line owed him \$500 at the time he took the \$500 in cash out of the \$3,000 received by the sale of the lumber. Both Captain O'Brien and Mr. Blair are well groomed and fine looking gentlemen. They appear to take their trouble philosophically, but at the same time are deeply perturbed by it. Captain O'Brien apparently tells a straight story and seems honest in his statements.

SAVED AT GRAVES BRINK.

"I know I would long ago have been in my grave," writes Mrs. S. H. Newson, of Deatur, Ala., "if it had not been for Electric Bitters. For three years I suffered untold misery from the worst forms of Indigestion, Waterbrash, Stomach and Bowel Dyspepsia. But this excellent medicine did me a world of good. Since using it I can eat heartily and have gained 35 pounds. For Indigestion, Loss of Appetite, Stomach, Liver and Kidney troubles Electric Bitters are a positive, guaranteed cure. Only 50c at Stafford's drug store.

Don't be imposed upon by taking substitutes for Foley's Honey and Tar. People's Drug Store.

DRITTLERS IN THE LEAD.

Standing of Bowling Teams Materially Changed—Verville's Great Record.

The bowling games played Monday by teams of the county association quite materially changed the standing. The Drittlers, by defeating the Lakes in straight games, jumped to the top, while the Lakes went down to third place. By winning two out of three games, the Mitchells took second place, the Lindens, who were tied with them, going back by losing two out of three. The Lindens and Calumets are tied with the Lakes for third place, while the Red Jackets and Lauriums are tied for sixth place. Verville, a Drittler player, played wonderfully well Monday evening, scoring 204, 225 and 141 pins, respectively. His record showed his season's average up to 162. He now heads the list of individual bowlers, passing ahead of A. A. Barbeau, of the Lakes, who was the high man up to Monday. Mr. Barbeau's average is 160. But two series of games remain to be played, one tomorrow evening, and the other next Monday evening. A fine gold medal will be given the player having the highest pin average. At present the race appears to be between Messrs. Verville and Barbeau. Cash prizes of \$25, \$15 and \$10 will be awarded the teams standing the three highest in the league.

TWO DEATHS IN SAME HOUSE.

The funeral of Mrs. Lettie Jackman, who died at the home of her son, Edward Jackman, at Calumet, last Sunday night, was held from the Calumet M. E. church yesterday afternoon. Mrs. Jackman was one of the oldest pioneers of the copper country. She is survived, aside from her husband, by four children. A sad coincidence was the death of Thomas McGuire in the Jackman home Monday morning, a few hours after the demise of Mrs. Jackman. Mr. McGuire succumbed to typhoid pneumonia. He was forty-three years of age. He was well known in Calumet. The remains were taken to the Wisconsin town for interment.

TIM SULLIVAN GOES TO JAIL.

Timothy Sullivan, who was wanted at Calumet for non-support upon complaint of his wife, was located at the Arcadian location by Sheriff Willis. The man was given a sentence of thirty days in the county jail by Justice Jackola, of Calumet. Sullivan was unable to furnish a bond to guarantee that he would support his wife, Elias Salo, another Calumet man arrested for non-support, had to sign the pledge to abstain from liquor for ninety days or go to jail for thirty days. The jail sentence is still in force in event Salo breaks his promise.

LIFE-SAVERS QUIT SUNDAY.

Captain McCormick and his crew of life-savers at the canal will quit for the season Sunday at midnight unless an order is received to the contrary. Most of the men will come to Hancock the next day to take the train for their respective homes. Captain McCormick lives at the canal year in and year out. The crew was no busier than usual during the season.

DREDGES QUIT FOR THE SEASON.

Pryor's dredges, No. 1 and 2, which have been working on a government dredging contract in Portage river, have stopped operations for the season and have been towed to Houghton. The firm expected to complete work on the river but was unable to do so. An extension of time has been secured and the contract will be completed in a few weeks next spring.

OLD HANCOCK RESIDENT DIES.

John Dwyer, one of Hancock's oldest residents, died at 2 o'clock yesterday morning. He was the father of Professor M. J. ("Sonny") Dwyer, the well known wrestler, who will arrive in Hancock today. He also leaves a wife and a daughter, Mrs. Michael Driscoll of South Lake Linden. Mr. Dwyer was a well known character in Hancock, where he lived since 1859.

TOOK HIS SENTENCE HARD.

Sheriff Willis will take John McLachlan, convicted of arson and sentenced to ten years at hard labor in the branch state prison, to Marquette this morning. McLachlan took his sentence very hard. He shed a few tears and appeared much affected, but shortly recovered his old time composure. McLachlan was given the same sentence as William Werner, the self-confessed burglar, who divulged the arson plot and implicated McLachlan.

NEW YEAR'S EVE BALL.

The Hancock Mannerhor Lerra will give its fifteenth annual concert in Germania Hall on New Year's eve. Big preparations are being made for the event, which is always a notable event in Hancock each year.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. Cheney & Co., Props., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligation made by their firm. West & Traux, Wholesale Druggists, Toledo, O. Waldin, Kinnan & Marvin, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c per bottle. Sold by all druggists. Testimonials free. Hall's Family Pills are the best.

Recovered Speech and Hearing

Messrs. Ely Bros.—I commenced using your Cream Balm about two years ago for catarrh. My voice was somewhat thick and my hearing was dull. My hearing has been fully restored and my speech has become quite clear. I am a teacher in our town.

L. G. BROWN, Granger, O.

The Balm does not irritate or cause sneezing. Sold by druggists at 50c. or mailed by Ely Brothers, 56 Warren St., New York.

COPPERDOM BREVITIES.

Circuit court adjourned without date Monday.

Mrs. Christ, Messenger, aged thirty, died at the Atlantic location Monday morning after a long illness.

Napoleon Huot and Samuel Huot and wife, who visited Lake Linden friends for a few days, left for Ishpeming Monday afternoon.

Joseph Asselin of Calumet has been appointed administrator of the Fred Weider estate. Mr. Asselin is one of the creditors.

A "Chinese" social will be given under the auspices of the League of the Hancock M. E. church at the residence of J. A. Fuller Friday evening.

The Knights of Macabees of Greenland will give a grand masquerade ball at the Grand Opera House on the evening of Dec. 28. Extensive preparations are under way for the event.

The Hancock barbers have decided to give a banquet next Monday night in honor of the fifteenth anniversary of the organization of the National Barbers' association.

It is said that Sheriff Willis has been asked by the Calumet Civic Federation to take action against fourteen saloon keepers against whom the society claims to have evidence of liquor law violations.

J. Q. McKernan of L'Anse is in the copper country, undergoing treatment for his eyes. He is dividing his time visiting E. R. Penberthy at Houghton and his son-in-law, James McCrea, of Dollar Bay.

A well-known Calumet architect is of the opinion that the copper country will see an unusually busy season in the building line next summer. He believes next season will equal any preceding one in that respect. Plans are already being made for several large office and flat buildings.

"Barbara Fritchie" was the attraction at the Calumet theatre last evening, a large audience witnessing the stirring drama. Mary Elizabeth Forbes, the talented young actress, is seen in the title role. The play will be presented at the Kerredge theatre at Hancock tonight.

The indoor baseball team of the Houghton Light Infantry will soon play the Calumet city team a return game. The Calumet Light Guard team also wants a game. Pitcher Murphy, of the Houghton club, is slightly under the weather and the team will not play again until he is in good condition. Murphy will be his old self again in a few days.

A portion of the county road from Hancock to Lake Linden at Dollar Bay has been removed several rods north, the grading for the same being done by the Copper Range company. The change was necessary because otherwise the highway would lie between the tracks of the Mineral Range and the Copper Range. The Copper Range will use the old road for its extension at that immediate point.

If the chicken thieves who looted Ferdinand Hood's henry at Lake Linden last Sunday night can be found, it will go hard with them. Mr. Hood, who is an old resident, and his aged wife are mainly dependent upon the sale of their chickens for a living. Out of thirty-five choice hens the thieves took twenty-five and in so doing deprived the old couple of a large part of their means of subsistence.

Even though Prosecuting Attorney Larson is through with his circuit court duties for the term just closed he is still a very busy man. He was busy the greater part of Monday and all yesterday with the hearings of Gordon C. Blair, arrested for non-support, under false pretenses, and Elmer Thompson, the Calumet young man held for security.

The Lake Linden office of the Western Express company is now located in the new Guck building, on Calumet street. The structure was recently completed and the present office will have to hunt for some other string on which to work their discord.

The Adventure is a good property and as soon as its mill is working to its full capacity the returns will be ample to meet all operating expenses and still give the shareholders a fair profit on their money invested.

THAT OSCEOLA FIGHT.

The concerted movement now making by the Lake shareholders of the Osceola Consolidated Mining company, looking to the securing of a change in the policy of the management, is beginning to attract widespread attention, says the Boston Journal. They will, they assert, fight their cause out in the courts if necessary to accomplish their purpose.

A Lake correspondent who is thoroughly familiar with the situation, writes to the Journal in this wise: "This movement is really the first step toward a vigorous and well-defined protest against the policy of the management of curtailing production when the mine could be making money and liquidating its indebtedness, which is now estimated to amount to over \$500,000.

"The policy of the Osceola as well as those of the Tamarack and Isle Royale, is accredited to Amalgamated dictation. Just a year ago Osceola paid its last dividend, amounting to \$3 per share, while the annual report of the company for the year ending Dec. 31 showed a cash indebtedness of \$1,000,000.

"It operated to its full capacity Osceola is credited with being capable of producing to exceed 1,000 tons of refined copper per month, while under present conditions the output is not more than one-half of this amount. Gossip has it that both Osceola and Tamarack will ere long be taken into the Amalgamated, but such a movement promises to meet with deadly opposition from the Michigan stockholders, many of whom invested in the securities at double their current selling price. The dissatisfaction existing at the conduct of Osceola affairs is by no means confined to the Lake Superior district, as already various outside interests are allied with the movement started at Houghton."

MINING GOSSIP.

The Quincy's output for November was 1,087 tons, that of the Atlantic was 287 tons and the Baltic produced 406 tons. The Franklin output is reported at 360 tons. The Champion product was 420 tons.

The statement to the effect that the management of the Franklin had accumulated \$5,000,000 pounds of copper is declared to be without foundation by officials of the company. The product of the mine is now, as in the past, being sold as fast as made.

It is gossiped in high financial circles that a Boston operator was again obliged to liquidate last week. The story is that private sales were made of some 10,000 shares of Sugar stock at \$2,000 shares of copper interests. Havemeyer is credited as buying the buyer of Sugar

MINING NEWS

MALCONTENTMENTS AT WORK.

Affairs at the Adventure Being Criticised Without Apparent Cause.

The affairs of the Adventure are being freely discussed, both in the copper country and in the east, and one would almost be led to believe that the property is on its last legs, to speak in the parlance of just entering the producing list, under what generally is conceded to be very favorable conditions, says the Ontonagon Herald.

The action of the directors in levying the recent assessment started the malcontentments and they have not neglected to give the eastern management a dig at every opportunity. This was followed with the announcement that a change would soon be made in the local management of the property, which added fuel to the fire, and it has since been kept burning fiercely by reports that the stamp mill would have to be remodelled to some extent to meet the requirements.

The reason for the recent assessment is easily explained. The company found that it would need more funds to finish paying for the equipment to meet the operating expenses until the returns from the property were adequate for these requirements. The history of any of the producing mines is that it has cost considerably more than was anticipated to place the property on a self-sustaining basis. The Adventure experienced these same conditions and perhaps to a greater extent owing to the delay in installing the equipment of the mine and the completion of the mill. These are conditions which the management was unable to overcome.

The resignation of P. R. Robert, superintendent of the mine, and Henry Krays, superintendent of the mill, have both been freely discussed. Mr. Robert tendered his resignation last May but was persuaded to remain with the company until the equipment was completed, and he is still serving, but how much longer he will remain is not known. To Henry Krays, however, the company will find it difficult to secure a man who will work more faithfully or handle the property better than Mr. Robert has been doing. But then it is safe to say that some one will be secured for this important position who is capable of filling it.

There ought to be nothing startling in the fact that the mill at first did not work as perfectly as it should. In fact, it was expected that possibly some changes would be necessary in order to secure the best results from the Adventure rock. These changes are now being made by the company which installed the plant and as soon as they are completed the mill will have to hunt for some other string on which to work their discord.

The Adventure is a good property and as soon as its mill is working to its full capacity the returns will be ample to meet all operating expenses and still give the shareholders a fair profit on their money invested.

THAT OSCEOLA FIGHT.

The concerted movement now making by the Lake shareholders of the Osceola Consolidated Mining company, looking to the securing of a change in the policy of the management, is beginning to attract widespread attention, says the Boston Journal. They will, they assert, fight their cause out in the courts if necessary to accomplish their purpose.

A Lake correspondent who is thoroughly familiar with the situation, writes to the Journal in this wise: "This movement is really the first step toward a vigorous and well-defined protest against the policy of the management of curtailing production when the mine could be making money and liquidating its indebtedness, which is now estimated to amount to over \$500,000.

THAT OSCEOLA FIGHT.

The concerted movement now making by the Lake shareholders of the Osceola Consolidated Mining company, looking to the securing of a change in the policy of the management, is beginning to attract widespread attention, says the Boston Journal. They will, they assert, fight their cause out in the courts if necessary to accomplish their purpose.

A Lake correspondent who is thoroughly familiar with the situation, writes to the Journal in this wise: "This movement is really the first step toward a vigorous and well-defined protest against the policy of the management of curtailing production when the mine could be making money and liquidating its indebtedness, which is now estimated to amount to over \$500,000.

GREATEST OF WAR DRAMAS.

The first act of "Barbara Fritchie," that greatest of all war dramas which will be presented in Hancock this evening at the Kerredge theatre, shows a street scene in Frederick. It is a beautiful picture of the old city. The act ends by Barbara Fritchie becoming engaged to marry Captain Trumbull, a Union officer.

"It operated to its full capacity Osceola is credited with being capable of producing to exceed 1,000 tons of refined copper per month, while under present conditions the output is not more than one-half of this amount. Gossip has it that both Osceola and Tamarack will ere long be taken into the Amalgamated, but such a movement promises to meet with deadly opposition from the Michigan stockholders, many of whom invested in the securities at double their current selling price. The dissatisfaction existing at the conduct of Osceola affairs is by no means confined to the Lake Superior district, as already various outside interests are allied with the movement started at Houghton."

MINING GOSSIP.

The Quincy's output for November was 1,087 tons, that of the Atlantic was 287 tons and the Baltic produced 406 tons. The Franklin output is reported at 360 tons. The Champion product was 420 tons.

The statement to the effect that the management of the Franklin had accumulated \$5,000,000 pounds of copper is declared to be without foundation by officials of the company. The product of the mine is now, as in the past, being sold as fast as made.

It is gossiped in high financial circles that a Boston operator was again obliged to liquidate last week. The story is that private sales were made of some 10,000 shares of Sugar stock at \$2,000 shares of copper interests. Havemeyer is credited as buying the buyer of Sugar

and the Standard Oil people of the copper shares.

Wolverine is securing thirty pounds of refined copper from every ton of rock stamped. The increase is due to improved ground and greater saving from the new mills. The mineral smelts 77 per cent refined copper. No Lake mine is producing copper cheaper than Wolverine.

A leading stock exchange trader, one who is naturally of a bearish disposition, is exceedingly bullish on copper shares for the long pull. A \$2 broker, who often operates for large interests, also expresses faith in a higher level of prices for the copper shares.—Boston News Bureau.

In regard to the various unfavorable reports that have been circulated of late in regard to the Adventure mill, it is learned from official sources at Boston that the trouble is no different from what is experienced by all mills in starting. Some parts of the machinery do not run smoothly as yet, but the necessary changes are trifling and can be made while two heads of stamps are kept running and they are now in process. The mill is stamping about 800 tons of rock per day at paying mining expenses. While the management is confident that the cost of copper will not exceed 10 cents per pound on estimate of cost or percentage will be given until there has been a sufficient test to give a basis or a conservative estimate.

NOTES OF MARINE NEWS.

Many of the line boats are at the end of their string, the receipt of package freight for Lake shipments being closed by several of the companies at various ports on the lakes. The Union Transit company has given notice that as fast as its boats arrive at Buffalo they will be placed in ordinary. This week will find many boats going out of commission.

It is announced that the new Anchor line steamer Tionesta, now being built at the Wyandotte yards of the American Shipbuilding company, will be launched Dec. 13.

Captain W. H. Singer of the White Line Transportation company, says of the proposed steambot merger: "There is nothing particularly new about it. There is a movement to get some of the Lake Michigan and Lake Superior lines together in the interests of better service and to do away with rate cutting. The latter the latter end of this month. This investment is absolutely safe, as there is about \$4.00 worth of gold ore in sight for every share of the stock. The stock is fully paid and non-assessable. SEND FOR finely illustrated prospectus."

should be fat, juicy, tender and well browned in the baking, and then you have a dish fit for the gods. We have ordered a special lot of extra bred turkeys, corn fed, rice fed and even chestnut fed, which will be of that delicious flavor that will make your mouth water before you have tasted it. Order your turkey before Thanksgiving if possible, and we will furnish you with any kind of a bird that you may desire.

FRANK W. HATHWAY,
 PALACE MEAT MARKET.

COPPERS A LITTLE OFF.

They Were Expected to Improve, but Disappointed Their Friends.

Paine Webber & Co. said of the Boston market:

"The good effect of the president's conservative message to congress appeared to have been discounted in advance, and after its publication the general market sold off. The coppers declined in sympathy with the other stocks. Copper was stronger in London today and the volume of transactions was larger than for some time past. If prices run off a little further the better class of coppers should be a purchase."

Hayden, Stone & Co. said:

"United States Mining was the feature again today, about 10,000 shares being traded in. The buying of late has been by people very close to the management. We think it a purchase, but expect a reaction from this price. The rest of the coppers had a tendency to be weak, especially Calumet & Hecla, with sales at \$20, with the exception of Amalgamated and Copper Range, which were fairly strong."

Wheat Makes Gain.

W. H. Laidley said of the Chicago markets:

"Yesterday the selling of an immense long line, variously estimated at from five to ten million bushels, the reaching of which and feeling out small accounts was the order of day, and, after this was through, the market was 1/4 lower than the night before. Today, while cables failed to reflect our break of yesterday, the receipts and estimates were both small, and the weather was hardly what wheat requires. The bearish feeling continued to such an extent as to open the market off somewhat, and to hold it lower during the early part of the session. The appearance of Bradstreet's increase in the world's visible, and clearance of 1 1/2 million wheat and flour turned the tide, and the market went up more in five minutes than it had gone down in two days. The northwest receipts are somewhat lighter and the southwest also reports lighter receipts. Long lines of wheat have been eliminated and the market is now in condition to see much higher prices. Buy it upon every break."

"Corn opened strong and higher, and had the same firm undertone it had yesterday. The receipts and estimates are small. Our reports from the country continue worse than heretofore, and we continue to feel bullish on May and believe it will sell 10c higher. A mistake cannot be made in buying around the present figures."

"Oats continued strong and higher, following wheat and corn. May showed the best buying and gained a little on December. December, however, was in better demand than for several days. People from the country talk extremely bullish and higher prices should be seen."

"Provisions opened lower on rather heavy receipts and a lower hog market. Later they turned strong in sympathy with the grains. We believe in higher prices."

Effect of Message Discounted.

Walker said of the New York market:

"The market today opened steady and inclined to be strong, and in the country trading, there seemed to be some very good buying. The transactions were particularly active and scored good advances. In anticipation of the message, traders covered shorts. When it was published the market was dull, and although it seemed to be rather favorable, there was a great deal of selling, and prices broke sharply. In the afternoon there was liquidation and the prices of money had a bad effect. The close was at lowest point, and with a lot of pressure. Traders caught many tops."

You've got to hustle all the time to keep in the swim. If you are slipping down the ladder of prosperity, take Rocky Mountain Tea. Makes people strenuous. Stafford Drug Co.

KEEPING PROMISES.

Marquette Appreciates Always When Promises Are Kept.

Every time you read about Doan's Kidney Pills you are told they cure every form of kidney ills from backache to urinary disorders. How are our promises kept? Ask any citizen who has tried the treatment. Ask the man who makes the following statement:

Mr. John Brennan, of 230 McLeod ave., employed in the grocery department of the Ironwood Store Co., says: "I have no hesitation in recommending Doan's Kidney Pills as a thoroughly reliable remedy in all cases of aches and pains through the joints and kidneys. It is also a fine tonic, strengthening and refreshing the general system. I was bothered on and off for a long time with spells of dull heavy aching through the small of my back just over the kidneys and at times I felt all run down. I was advised to try Doan's Kidney Pills and got them at a drug store and used them. They thoroughly and effectually relieved me of all the trouble and since in fact never felt better."

Just such emphatic endorsement can be had right here in Marquette. Drop into the Stafford Drug company and ask what their customers report. For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name, Doan's, and take no substitute.

CITY BREVITIES.

Today's weather: Snow and colder; brisk to high easterly, shifting to northeasterly, winds.

Yesterday's temperature: 7 a. m., 33 degrees; 12 noon, 34 degrees; 7 p. m., 34 degrees; maximum, 36 degrees; minimum, 32 degrees.

E. H. Towar has arrived home from a couple of weeks' absence from the city.

The G. I. A. society of the B. of L. E. will meet this afternoon at 2:30 in the A. O. U. W. hall.

St. Genevieve's guild will meet this evening at the home of Miss Genevieve Morneau, corner of Superior and Third streets.

The Wednesday afternoon circle will assemble this afternoon at the home of Mrs. Fred Kern, 1008 North Third street, at the usual hour.

Superior high, No. 217, L. O. T. M., will meet Thursday afternoon at 2 o'clock sharp, the time having been set half an hour earlier than usual because officers are to be elected for the ensuing year.

The Pioneer was at the Pickands coal dock yesterday, and her cargo of soft coal was being removed at a lively rate. The Michigan anthracite, which will take her place this morning and following her the Choctaw.

Captains York and Gooding have finished up their marine inspection work for the season of 1902. They made their last trip, to Manistique, the latter part of last month. One of the most important parts of their winter duties is the examination of applicants for licenses.

The funeral of the late William Hicks, held yesterday from the Methodist church, was largely attended. Rev. E. A. Elliott officiated and the choir of the Baptist church rendered several selections. Interment was in the cemetery. The floral offerings were numerous and beautiful.

The Andrews-Meloche case was dismissed in circuit court yesterday, the parties having agreed to call it off. This case grew out of a spirited fight for the nomination for mayor at the hands of the Labor party at Ishpeming last year. The worthy doctor and Mr. Andrews being opposing candidates.

D. M. Clark and bride have returned from Ishpeming, where they spent their honeymoon. They were married Nov. 1. The couple are well known. Mr. Clark has been in the timing business for many years. His bride, formerly Elizabeth Wilson Macknight, did substitute work last year in the North Marquette school.

"When We Were Twenty-One," announced for the opera house Thursday evening, is one of the best comedies that has been presented here in many a day, and it is said that it will be given by a capable company. The play did a great deal to popularize Nat Goodwin. It has never before been staged in the Marquette Opera House.

No boats took out ore from this port yesterday. The Presque Isle and Pioneer are being loaded at the L. S. & I. dock and the Manola and Saxon are taking on cargoes at the South Shore docks. The Castalia was loaded in the lower harbor yesterday, but spent the night in port for shelter from a severe northeast gale predicted by the weather bureau.

County Clerk Ross, Sheriff Pengase and Judge Kelsey, the board of district canvassers, canvassed the vote in the late senatorial election at the court house yesterday. It was as follows: Moriarty, Marquette county, 3,141; Baraga, 538; Dickinson, 1,936; Alger, 642; Iron, 789; Andrews, Marquette county, 253; Dickinson, 253; Alger, 253; Iron, 108. Total, Moriarty, 7,056; Andrews, 1,315.

At midnight the vessels in port, including several which came in for shelter, were the Manola, Saxon, Pioneer, Choctaw, Andaste, Griffin, Castalia, Wilhelm, Galatea, Nirvana, Presque Isle, Massachusetts, and an unknown loaded steamer anchored near the breakwater. A fierce blow was raging and a couple of the boats making shelter were considerably shaken before they reached the safety of the harbor.

A county physicians' organization, similar to that perfected here a few weeks ago by the medical men of this county, will be formed by the M.D.'s of Chippewa this week. Dr. T. A. Felch of Ishpeming, in his capacity of counselor of the Twelfth district for the Michigan Medical society, which is superintending the work of forming county societies, will be present at the So to help start the new organization. As was the case in Marquette county, the medical men will be practically a unit in joining the local society.

The case of Julian Giff vs. A. F. Brown occupied the circuit court yesterday. In the morning W. S. Hill, plaintiff for the defendant, argued a special plea, questioning the jurisdiction of the justice court from which the case had been appealed. Justice Stone overruled the plea, and gave Mr. Hill twenty-four hours in which to plead. Yesterday afternoon he filed a plea in abatement to the jurisdiction, under which the same point that was in question yesterday morning will be practically a unit in joining the local society.

The funeral of John Rowe was largely attended Sunday. The deceased is mourned by a great many friends, and he was highly thought of by all who knew him, and as his acquaintance among railroad men was large. He had been an engineer and fireman on the road for

years. He came here from Pennsylvania some eighteen or twenty years ago. Mr. Rowe was an enthusiastic hunter and fisherman, and in company with his friends spent much time after game and on neighboring trout streams. Those who knew him best speak most regretfully of his death.

F. H. Gooding rounded out another year of his life yesterday and in honor of the event he was last evening tendered a very enjoyable surprise party at his residence, East Howitt avenue. A score or more friends were present and several happy hours were whiled away, with dancing, music and cards as features. The serving of an elaborate luncheon, at which Frank Moore and J. I. Bradford, of Ishpeming, officiated as "toast-masters," brought the festivities to a conclusion. The favors at cards went to Miss Lotta Egan and Frank Ketchum of the Soos. Mr. Gooding was the recipient of numerous felicitations.

The Mining Journal force, not to be behind in the procession, has decided to enter the indoor baseball field. It has plans for forming a nine that cannot be sneezed at, and it would like to make arrangements for a couple of games. It would be pleased to take on the teams representing the Negaunee Business men, the Negaunee-Ishpeming printers, the Negaunee-Ishteping Traveling men, the Marquette Traveling men, or any other regularly organized team that has not achieved too formidable a reputation. The Mining Journal nine will be composed of both side employees, and it will play for fun or marbles, this and other details to be arranged on the acceptance of the challenge.

GOLD FOR DESERTED CHILDREN.

Omaha, Dec. 2.—The three small children of William Hager, who deserted them two years ago in North Platte, are now being searched for to be placed in possession of a \$100,000 gold mine at Cripple Creek, which their father discovered after he left them. Hager died two weeks ago, leaving the mine to the children. The children were taken in charge by the Nebraska Children's Home society, and by it given to farmers in different parts of the state.

WHILE THE SHORT HAND

of the clock travels twice around the dial Perry Davis' Painkiller will cure a cold; will ease the tightness across the chest and hence will banish the fear of pneumonia. RHEUMATISM

CANNOT BE RUBBED OUT

But a good liniment or plaster will often give temporary relief because it produces counter irritation or reduces the inflammation and soreness. But no sort of external treatment can have any effect whatever upon the disease itself, for **rheumatism is not a skin disease**, but is due to an overacid condition of the blood, and the deposit of irritating matter or Uric Acid salts or sediment in the muscles and joints, and no amount of rubbing or blistering can dislodge these gritty particles or change the acid blood. Rheumatism often becomes chronic, and the muscles and joints permanently stiff and useless and the nervous system almost wrecked, because so much time is lost in trying to cure a blood disease with outside applications or doctoring the skin.

Rheumatism must be treated through the blood, and no remedy brings such prompt and lasting relief as S. S. S. It attacks the disease in the blood, neutralizes the acids, and removes all irritating or poisonous substances from the system.

S. S. S. strengthens and enriches the thin acid blood, and as it circulates through the body, the corroding, gnawing poisons and acid deposits are dislodged and washed out of the muscles and joints, and the sufferer is happily relieved from the discomforts and misery of Rheumatism.

External remedies are all right so far as they go, but they don't go far enough, and you can't depend upon them to do the work of a blood purifier, and those who pin their faith to liniments and plasters as cures are bound to meet with disappointment, and will be nursing a case of Rheumatism the greater part of their lives.

S. S. S. is a purely vegetable remedy, does not contain any Potash or mineral of any kind, and can be taken with safety by old and young.

Rheumatic sufferers who write us about their case will receive valuable aid and helpful advice from our physicians, for which no charge is made. We will mail free our special book on Rheumatism, which is the result of years of practical experience in treating this disease. It contains in a condensed form much information about Rheumatism.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

SENDS IN MESSAGE

Continued from Page Four.

magnitude of this increase will best appear from the fact that the entire postal receipts for the year 1899 amounted to but \$8,518,067.

Rural free-delivery service is no longer in the experimental stage; it has become a fixed policy. The results following its introduction have fully justified the congress in the large appropriations made for its establishment and extension. The average yearly increase in postoffice receipts in the rural districts of the country is about two per cent. We are now able by actual results, to show that where rural free-delivery service has been established to such an extent as to enable us to make comparisons the yearly increase has been upward of ten per cent.

On November 1, 1902, 11,650 rural free-delivery routes had been established and were in operation, covering about one-third of the territory of the United States available for rural free-delivery service. There are now awaiting the action of the department petitions and applications for the establishment of 10,748 additional routes. This shows conclusively the want which the establishment of the service has met and the need of further extending it as rapidly as possible. It is justified both by the financial results and by the practical benefits to our rural population; it brings the men who live on the soil into close relations with the active business world; it keeps the farmer in daily touch with the markets; it is a potential educational force; it enhances the value of farm property; it makes farm life far pleasanter and less isolated, and will do much to check the undesirable current from country to city.

It is to be hoped that the congress will make liberal appropriations for the continuance and extension of the service established and for its further extension.

IRRIGATION OF ARID LANDS.

President Much in Favor of This Policy of Uplifting the West.

Few subjects of more importance have been taken up by the congress in recent years than the inauguration of the system of national irrigation in the arid regions of the far West. A good beginning therein has been made. Now that this policy of national irrigation has been adopted, the need of thorough and scientific forest protection will grow more rapidly than ever throughout the public-land states.

Wants Butchery of Game Stopped.

Legislation should be provided for the protection of the game, and the wild creatures generally, on the forest reserves. The senseless slaughter of game, which can be by judicious protection be permanently preserved on our national reserves for the people as a whole, should be stopped at once. It is, for instance, a serious count against our national good sense to permit the present practice of butchering of such a stately and beautiful creature as the elk for its antlers or tusks.

So far as they are available for agriculture, and to whatever extent they may be reclaimed under the national irrigation law, the remaining public lands should be held rigidly for the home builder, the settler who lives on his land, and for no one else. In their actual use, the desert-land law, the timber and stone law, and the commutation clause of the homestead law have been so perverted from the intention with which they were enacted as to permit the acquisition of large areas of the public domain for other than actual settlers and the consequent prevention of settlement. Moreover, the approaching exhaustion of the public ranges has of late led to much discussion as to the best manner of using these public lands in the West, which are suitable chiefly or only for grazing.

The sound and steady development of the West depends upon the building up of homes therein. Much of our prosperity as a nation has been due to the operation of the homestead law. On the other hand, we should recognize the fact that in the grazing regions the man who corresponds to the homesteader may be unable to settle permanently if only allowed to use the same amount of pasture land that his brother, the homesteader, is allowed to use of arable land. One hundred and sixty acres of fairly rich and well-watered soil, or a much smaller amount of irrigated land, may keep a family in plenty, whereas no one could get a living from one hundred and sixty acres of dry pasture land capable of supporting at the outside only one head of cattle to every ten acres.

In the past great tracts of the public

Louisville, Ky., March 27, '02.

Gentlemen:—I am glad to say that S. S. S. has cured me of Rheumatism. About two years ago I suffered from Rheumatism in my knees and feet, my ankles swelling so that I could not put on my shoes. This continued for several months, during which time I was applying liniments and going by my physician's directions, but derived no benefit. I was told of S. S. S. and tried it. I immediately got relief, and continued the medicine until I was entirely well.

2108 Floyd St. D. J. DUANE.

AGRICULTURE DEPARTMENT.

Its Work Commended in High Terms and Briefly Reviewed.

In no department of governmental work in recent years has there been greater success than in that of giving scientific aid to the farming population, thereby showing them how most effectively to help themselves. There is no need of insisting upon its importance, for the welfare of the farmer is fundamentally necessary to the stability of the Republic as a whole. In addition to such work as quarantine against animal and vegetable plagues, and warring against them when introduced, much efficient help has been rendered to the farmer by the introduction of new plants species fitted for cultivation under the peculiar conditions existing in different portions of the country. New cereals have been established in the semi-arid West. For instance, the practicality of producing the best types of macaroni in regions of an annual rainfall of only one or two inches has been conclusively demonstrated. Through the introduction of new rice in Louisiana and Texas the production of rice in this country has been made to about equal the home demand. In the raising of new men, com, of regressing overstocked range lands has been demonstrated; in the north many new forage crops have been introduced, while in the East it has been shown that some of our choicest fruits can be stored and shipped as far away as to find a profitable market abroad.

Smithsonian Institution.

I again recommend to the favorable consideration of the congress the giving of the Smithsonian Institution for making the museum under its charge worthy of the nation, and for preserving at the national capital not only records of the vanishing races of men but of the animals of this continent which, like the buffalo, will soon be extinct, and specimens from which their representatives may be renewed are sought in their native regions and maintained there in safety.

DISTRICT OF COLUMBIA.

President Says It Should Be a Model and Suggests Legislation.

The District of Columbia is the only part of our territory in which the national government exercises local or municipal functions. It is imperative that the government has a free hand in reference to certain types of social and economic legislation which must be essentially local or municipal in character. The government should see to it, for instance, that the city of Washington is not a model in the worst sense of the word, and that the sanitary legislation affecting Washington is of a high character. The evils of slum dwellings, whether in the shape of crowded and congested tenement-houses districts or of the back-alley type, should never be permitted to grow up in Washington. The city should be a model in every respect for all the cities of the country. The charitable and correctional systems of the district should receive consideration at the hands of the congress to the end that they may embody the results of the latest and best thought in these fields. Moreover, while Washington is not a great industrial city, there is some industrial here, and our labor legislation, while it may not be important in itself, might be made a model for the rest of the nation.

RESIGNED HIS POSITION.

Fred Nightingale, head bookkeeper of the Iron and Steel company, has resigned to take effect Dec. 10.

LOCAL LACONICS.

Alexander Maitland went to Escanaba Monday.

Henry J. Farby was here from Calumet yesterday.

The Catholic Order of Foresters will meet tomorrow night.

Chris Rasmussen is the new delivery man at Muck's meat market.

Ralph McKenzie left Monday night for the Mesaba range, where he will do diamond drill work.

Daniel Harrington, alderman of the Third ward, will be moving to Ishpeming. His residence will be occupied by Harry Broad.

A number of Negaunee men have gone to the lumber camps of the Dead River Lumber company, located twenty miles north of Ishpeming.

Thomas Collins, John Roberts and Richard Roberts all went to Chicago Monday night to attend the International Livestock show.

At the sale to be conducted Friday by the ladies of the Presbyterian church a fifteen-cent luncheon will be served from 2:30 until 8:30 p. m.

The annual meeting of the firemen, which was to have been held Monday night, was postponed one week, owing to the absence of a number of the members from town.

The Trombly orchestra will conduct a ball tonight at the Anderson hall, Ishpeming. A street car will be held until the close of the party for the accommodation of Negaunee patrons.

Mrs. Thomas Hodge, a former resident of Negaunee, but more recently of Butte, Mont., returned here Monday night with her mother and two younger children. Mr. Hodge is at Hibbing, Minn., with the older boys.

The vestrymen of St. John's Episcopal church met Monday evening, but took no definite action in regard to calling another pastor. Rev. Green of Escanaba will fill the pulpit Dec. 13, and will possibly conduct the services here next Sunday.

Many Negaunee people who have seen the display of Navajo Indian rugs in the window of the store at Ishpeming say that they have never seen a more beautiful collection. The rugs are made by hand by the Navajo Indians of New Mexico, and are the first ever placed on sale in this peninsula. They are of all sizes and sell for various prices.

Negaunee and Vicinity.

(Subscribers to The Mining Journal will please remember that carrier boys are not allowed to receive money on subscription account.)

STOCKPILES EXHAUSTED.

Gre Shipments About Completed—Great Record of the Negaunee.

The stockpiles at the local mines have nearly all been shipped out, and the great heaps of ore that were piled up about the mouths of the shafts have disappeared with a speed that has rarely been equalled. Now the great shovels have been lowered and all the cars are loaded from the pockets. In a week or ten days, at the most, shipments will be discontinued entirely. The past season has been in marked contrast to last season, in fact, any preceding season. Last year so much ore was left in the piles when shipping stopped that it was feared that the forces of men would have to be reduced or some of the mines closed entirely because of the lack of space for stocking the winter's product.

The great change is due largely to organized management, and the withdrawal of the independent operator, whose success is taken by great concern, backed by millions of capital and capable, in a measure, of creating a demand for the ore, by virtue of their control of the sources of demand.

The Negaunee has made a wonderful record during the past season. Though hampered by appalling accidents and expensive delays, it has turned out more ore this year than in any other since the workings were opened. If all goes well, the output will be another record breaker, surpassing even this year's output. The lease of the present company expires next September, and during the intervening time every energy will be put into making the Cleveland-Cliffs people have leased the mine, and will work it in connection with the Maas.

LIGHT AGAIN.

Monday night the arc lights were burning again as usual. The new armature arrived Monday afternoon, it was immediately placed on the dynamo, and the plant was in operation. The plant was disabled early Saturday morning and the armature was ordered by telegraph from the Fort Wayne Electric company of Fort Wayne, Ind. The order was filled in about forty-eight hours. The accident was expensive for the city, as the new armature cost \$400 and it will cost \$100 to get the damaged one repaired. However, the streets will probably not be left in darkness again, for the plant will be kept ready to be put into commission in case of an accident similar to that which occurred Saturday.

A POWERFUL ORATOR.

The Alkalest Entertainment course was brilliantly opened last night at the Y. M. C. A. auditorium by the Hon. G. M. Taylor of the North. The lecturer's theme was "The Coming Man," which was handled in a masterly manner. For two hours he held the closest attention of the large audience, and he was the strongest they had ever heard in Atlanta.—The Constitution, Atlanta, Ga., Oct. 7.

TEAL LAKE LOW.

The water in Teal Lake is fully two feet below its usual level. Since the frosty weather has come on people have begun to use the water in much greater quantities than during the warm months. The cold seems to relieve the disagreeable taste, and on this account the water is thought to be all right. Some have suggested that the lake is being drained by the surrounding mines, which are pumping out enormous quantities of water from their shafts.

STRANGER AND TWO GUNS MISSING.

A man giving his name as Wm. Wilson arrived at Crystal Falls a short time ago and secured employment at R. H. Darling's farm. The other day while the other men at the farm were at work he went to the house and took Hiram Friley's Savage rifle and a shot gun belonging to one of the other men, together with several boxes of cartridges, and left for parts unknown. Up to last accounts no trace had been found of him.

BEAR FEAST ON DEER.

Beyond all doubt the two most distinguished hunters who have visited Iron county this year were two men from lower Michigan, whose headquarters were practically on the Michigan railway. These gentlemen killed two fine deer and hung them up out of doors near their sleeping quarters. In the night they were disturbed by a bear prowling around the house, but not till morning did they know how mean a trick had been served them. As soon as it became daylight they found that his bearship had eaten or destroyed the hickories of both deer.

THIEVES RAID NEWBERRY HOTELS.

Sneak thieves raided the three hotels at Newberry one night, and secured considerable plunder. The boarders at the McLeod House were the heaviest sufferers, four or more persons being touched for whatever amounts they had in their pockets. One gentleman reported the loss of a solid gold watch and \$30 in cash. At the Hotel Murphy the thieves did not have such good success, only one person reporting a loss, and that of \$15. At the Harris House a valuable stolen one of the office and the charity box belonging to the Children's Home was purloined.

KILLED IN PECULIAR ACCIDENT.

Michael Harbour, aged thirty-seven and single, was instantly killed near Shingleton last week. The accident occurred while he and others were loading William's sleigh onto a car on a siding about a mile and one-half south of Shingleton. A gin pole was used for raising the heavy sleighs and guy ropes extended from its top, one of them being over the railroad track. The cable of an ore train passing caught the gin pole, breaking it and causing the gin pole to fall, the boom and tackle block hitting Harbour, throwing him nearly twenty feet. His neck was broken and his skull was crushed.

CLOSE CALL FOR NORWAY FAMILY.

Last Thursday night Peter Lefrenier and family of Norway were almost asphyxiated by gas from a coal stove. Some time in the night Mrs. Lefrenier was aroused by the crying of one of the children. She arose to attend to it, but fell to the floor in a helpless condition. She was able, however, to waken the rest of the family, and the opening of doors and windows soon brought relief. It was found that a defective chimney flue was the cause, the gas from the coal stove having escaped into the room. It was a close call and every member of the family suffered much from the effects of the gas for a day or two.

LOGGERS COMPLAINING.

Logging contractors have not experienced the most favorable conditions so far this season. When operations were started early in the fall it was found difficult to secure the required amount of help and while this retarding factor has been largely overcome by paying bigger wages and employing many in-

EVASION OF LIQUOR STATUTE.

A Clever Scheme to Get Around the Local Option Law.

The upper peninsula has never been bettered by a more audacious and profitable law and this has been saved from some interesting experiments in sociology illustrating the fact that people will generally be supplied with their favorite brand of liquor even in a prohibition town. Cities and counties in the region below the straits have frequent epidemics of temperance agitation and "dry" counties are not entirely unknown. But the path of the temperance reformer is not strewn with roses, and he has to be constantly on the alert to hold his ground when once he has gained an advantage over the liquor people and thinks they have been completely ousted from his territory. The following from the "State Issue," the organ of the Anti-Saloon league, tells of one of the latest devices for outwitting the reformers:

"In towns that outlaw the saloons, Grand Rapids brewing companies have a scheme whereby they endeavor to evade the law. They send their agent into the town and organize a club. This club is incorporated and has its president and other officers. In order not to conflict with the United States government they pay the internal revenue tax. The club rents a room, fits it up with billiards and gaming tables. They furnish it with a bar and a stock of all kinds of liquors. Each member has a key, he enters alone, he cannot even take a friend with him, he helps himself to anything that he wishes, or visits with those who have entered in the same way as himself. For these privileges he pays \$50 per month. These clubs are legal or not, we shall endeavor to find out. They are, preferable to a saloon. No minor can enter the place, and evidently those who patronize the place are habitual drunkards. The clubs, comparatively, have \$50 to put in such places for fees. If the saloon devil has got to have a stopping place in the town, to have it jugged and stoppered in this way is better than to have a saloon."

UPPER PENINSULA.

His Lower Limbs Paralyzed.

George Schaffer, the two-year-old son of John Schaffer of Escanaba, was seriously injured last week by falling down stairs and is now suffering from paralysis of his lower limbs.

Sailors' Scuffle is Fatal.

Patrick Donohoe of Gravesend, England, was instantly killed in a scuffle on board the steamer Maryland at Escanaba Monday morning. George Belero of Grand Marais, Mich., had his collar bone broken and Joseph Malarky of Darling's farm, the other day while the three men were having a friendly encounter on the deck and fell into the hold.

Military Election a Surprise.

The annual election just held by Company M, Third regiment, M. N. G., at Crystal Falls, was a surprise to many of the following: Captain, Charles Follis; first lieutenant, Charles Mathews; second lieutenant, Ora Easterday. The election was a surprise, as it had recently been conveyed that Captain Murray would be returned to the command of the company. Lieutenant Follis and Captain Murray were the only candidates for the double bars and the younger man won out handily. The others were practically overlooked with the exception, Captain Follis is a member of the postoffice staff of mail carriers in civil life. Easterday is raised to a commission from the grade of corporal. He was a dark horse in the election, and it was not till the first ballot was taken that it was generally known he was out for the office. He is the only son of Rev. Thos. R. Easterday.

Bit Off the Sheriff's Finger.

William Shilson, a young man employed at the Manistique Chemical plant, while crazed from the effect of liquor, went into the postoffice, smashed a large pane of glass near the general delivery window, and when being arrested, bit the end off the little finger of Sheriff Moody's left hand. He went into the postoffice, inquired and received mail and asked for a "money" letter. Being informed there was no registered letter for him, he began to abuse Fred Paulsen, assistant postmaster. He then became troublesome with others who entered the office, even demanding their mail, and when refused he would reach for his hip pocket as if to pull a gun. William Taylor, whose car he accosted had to use his fist to keep him from taking his mail and a young lady had to run to get away from him. He then went to Baker & Bassford's store to buy a revolver and when being shown one he said he would take four of that kind. Chief Ekstrom and Sheriff Moody were telephoned for. Moody found Shilson at the hardware store and when attempting to pacify the young man, Shilson, by some means, got the little finger of Moody's left hand in his mouth and severed it. Chief Ekstrom arrived later and assisted the sheriff to place him in jail.

AN HONEST STATEMENT.

Mr. William Acton of 212 Fourth St., Lincoln, Ill., says: Our daughter, aged sixteen, was suffering with a severe cough and cold on her lungs. Common remedies seemed to afford no relief and myself and her mother feared pneumonia or consumption. She began taking Harts' Honey and Horehound and in less than two weeks was entirely cured. We always recommend Harts' Honey and Horehound to any one suffering with a deep seated cough or cold. Sold at the People's Drug Store.

experienced men, yet there are other obstacles which are not so easily contended with. The continued warm weather and the consequent lack of snow are among them. Operations are not only retarded to considerable extent, but there is an increased cost for every day under these conditions.

Hunters Got an Involuntary Bath.

Dolph and Julius Miesler, Charles Davidson and William Owens of Crystal Falls had a narrow escape from serious injury one day last week. They were on their way to the Fence river for a few days' hunt and when crossing the bridge which spans the Deer river about a mile from its mouth the bridge gave way, throwing them into the water. Miesler's horses were caught between the logs on the bridge and great difficulty was experienced in getting them out. They returned the next morning after spending a very cold night along the road, the buckboard being in such a condition that they could not continue on the way to their destination.

Iron County's Champion Shot.

George Premo of Amasa was defeated in the shooting match at Stambaugh for the championship of Iron county by Joseph Kelly of Iron River, the latter getting thirty-five birds out of a possible fifty, while Premo's score was twenty-nine. Each man shot at twenty-five birds with the gun at the hip and at twenty-five from the shoulder. In the latter Kelly made a score of twenty, while Premo's score was wasteful. With the gun at the hip Premo succeeded in scoring seventeen against Kelly's fifteen. Neither man made as good a score as was expected. The other day Kelly was defeated by Premo in another match and the chances are that one will be arranged between these two gentlemen in the near future.

MUCH STREET WORK

IT WAS DONE IN MARQUETTE DURING PAST SEASON.

TWENTY-FOUR BLOCKS BUILT

EXPENDITURES ON HIGHWAYS AGGREGATED \$18,000.

Over Three Miles of Cement Walks and Almost a Mile of Cement Curbing Were Laid This Year.

According to the report of the street committee presented to the council Monday evening the year 1902 has marked one of the greatest advances in municipal improvements in the history of the city.

There has been expended for highway purposes, exclusive of sidewalks, about \$18,000 since the first of May; this according to the street commissioner's report presented Monday evening.

Twenty-four blocks of street, averaging 422 feet in length and 34 1/2 feet in width, were being laid in the city.

Some 4,800 feet of cement curbing has been laid. About 3,000 of this amount was made in molds and laid independently of the sidewalks.

The activity in municipal improvements was nowhere greater than in cement sidewalk building.

The street commissioner has on hand at the crushing plant some 800 yards of crushed rock, ready for use on the streets.

As the above figures indicate, the season recently closed has been one of the busiest for the street commissioner and his force in the city's history.

The street commissioner's pay rolls have been large, and every man on the force has been needed to keep abreast of the work.

Important Recommendations. The recommendations which the street committee presented to the council Monday evening suggested the advisability of purchasing a new road roller.

Chairman Shea, in connection with the suggestion of the purchase of the new road roller, stated that the present crusher is able to supply two rollers without difficulty.

Until further notice keno, with chickens as the prizes, will be played each evening at the Grand saloon, opposite the city hall.

not to be compared in economy of operation with the work that could be obtained from two rollers operated in the day time.

More Sprinkling Advisable. The street committee believes that an enlargement of the zone for street sprinkling will also be an economy.

These recommendations will come up for discussion and action later, when the aldermen have had ample opportunity to digest them.

Another recommendation of the street committee merits attention, and will doubtless be adopted.

The street and sidewalk committees on which devolved much of the work outlined above have given the city excellent service.

The members of the former are Aldermen Michael Shea, James Donovan and Andy Anderson.

The members of the latter are Aldermen John Siegel, Ernie Bush, and James Donovan.

They have given the street and sidewalk work much personal attention, and have been in almost continual consultation with the street commissioner.

Monday evening President Asire, who presided at the meeting, paid the street committee an unqualified compliment.

Contractor Plattberg Finished Work on It Yesterday.

The Maple street sewer is now in commission. Contractor John Plattberg being finished work on it yesterday.

The construction of this sewer is said to have been one of the most difficult contracts of the kind ever undertaken in Marquette.

At the outset the waters of Harlow's creek were encountered. At Fourth street the sewer was built on the railroad property between the South Shore's main track and the wall of the Harlow property.

At this point the difficulty of the task was increased by quicksand, which was encountered in liberal quantities.

However, the work proceeded without interruption. Despite the proximity of the track and the fact that numerous switches were raised the operations of the railroad were not interfered with in any degree whatsoever.

Old stumps and various obstructions were removed from the trench, and, as a whole, the work was much harder than the contractor anticipated.

Notwithstanding he made some money on the job. The sewer was inspected by John Dwyer during the progress of the work.

So there is every guarantee that the job is first-class.

I desire to express my sincere thanks to the members of the B. of L. F. B. of L. E. B. of R. T., and the Macabees; also the Lady auxiliaries to the different societies and the many friends for the kindly attentions during the illness and after the death of my husband.

MRS. JOHN ROWE, Marquette, Mich., Dec. 3, 1902.

That sealbrown taste of a canton dannel tongue speaks from the liver and tells you to take Rocky Mountain Tea at night, genuine 35 cents. Stafford Drug Co.

Only eight days more before the stock of the Marquette Gold Mining & Milling Co. will advance from 10 cents to 15 cents per share.

COLD WAVE COMING.

Temperature Slated to Drop Close to the Zero Mark Today.

Observer Patrick of the weather station, was informed by wire last evening from Washington that a cold wave was on the way and was due to strike Marquette today.

The temperature, it was stated, would fall to probably ten degrees above zero by this evening.

Crew of the Hebard Safe. Master of the Ill-Fated Craft Wires Good News to the Local Inspectors.

Captains Gooding and York, the local inspectors, received the good news last evening that, instead of having been lost, as was reported, the crew of the steamer Charles Hebard, wrecked at Point Mainaine, Ont., were all saved.

This information was wired from the Soo by Captain George D. Ryan, master of the ill-fated craft. The captain added that the steamer is a total loss, that no word has been heard of the barge Aloha, which broke away from the steamer during the gale, and that on other two tows, the Warrington and Francomb, were safe at the Soo.

Are Safe in This Port. An Asland (Wis.) dispatch last night stated: "Fear is generally expressed here tonight that the steamer S. S. Wilhelm and tow, which left the Soo Sunday noon, have fallen victims to the storm which swept Lake Superior Sunday night.

The boats were bound for Ashland and are long overdue. It has come that they have reached shelter at any place since leaving the Soo." The Wilhelm and her tow are safe in Marquette harbor, having arrived here late last evening.

Lights Out Too Early. Vesselmen Make Indignant Complaints on That Score.

The annual complaint of vesselmen regarding the early closing of some of the lake lighthouses for the season is now being registered.

Several of the lights are reported out for the season, but there are few indications at present of the movement of boats ceasing.

Lights at isolated places are abandoned always about the time of the year, so lighthouse keepers and their families may be taken off before it gets so late they may not be reached by boat.

They are usually taken ashore by the government lighthouse boat, and in some cases they sail in their own boats to the nearest point at which boats touch.

Among the lights which are abandoned early are Stannard Rock, Carbon Island and Spectacle Reef lights. Carbon Island light is considered of much importance by sailors.

It is maintained by the Canadian government. The vessel interests of Lake Superior in the United States have taken up the matter of keeping the lights burning until the boats quit running.

They are also trying to have the lighthouse department of the United States make arrangements to have all of the lights to which the sailors have become accustomed continue until navigation is ended.

MASONIC LODGE ELECTION. Marquette lodge, No. 101, F. & A. M., at its meeting last evening elected the following officers: J. H. O'Meara, worshipful master; C. L. Brainerd, senior warden; H. B. Bell, junior warden; F. M. Moore, treasurer; W. J. Ellison, secretary; O. E. Brown, senior deacon; Frank Monroe, junior deacon; J. N. Williams, Tyler.

SOO CANAL PASSAGES. Sault Ste. Marie, Dec. 2.—(Special).—Up—Andaste, Zenith City, 9:40 last night; Coralia, Maderia, 11:30; Watson, 7 a. m.; Griffin, 7:20; Saturn, Eddy, Neptune, 10:40; Marquette, 11:30; Pratt, Athens, 1 p. m.; Bessemer, Krupp, 3.

BETTER THAN A PLASTER. A piece of flannel dampened with Chamberlain's Pain Balm and bound on the affected parts, is better than a plaster for a lame back and for pains in the side or chest.

Pain Balm has no superior as a liniment for the relief of deep seated muscular and rheumatic pains. For sale by the Stafford Drug Co.

AT DESCHAINES'S BAKERY. Cream and Rye Bread fresh every morning. (11-14-1f)

STORM SASH. Now is the time to order. F. W. Read & Co. (10-23-1f)

Only eight days more before the stock of the Marquette Gold Mining & Milling Co. will advance from 10 cents to 15 cents per share. Jos. J. Wirtz, secretary. (12-1-10d)

DEATH OF MR. MORRISON.

It Occurred at St. Luke's Hospital Yesterday Afternoon.

Marquette people were shocked yesterday to learn of the serious illness of Edward R. Morrison, traveling agent of the Standard Oil company, and a little later of his death, which occurred at 4:40 p. m. at St. Luke's hospital.

Mr. Morrison first became indisposed at Iron Mountain Thursday. He ate something which did not agree with him, presumably an oyster stew.

He received medical attention there, and that night had a chill. Friday morning he felt very ill and determined to come on to Marquette.

He was met at the train by a physician, and it was judged best to take him to St. Luke's, where he could receive the best of care. It was thought at that time that he would be only a few days regaining his former health.

However, pneumonia, with the other complication set in, and Sunday his condition was such as to occasion his friends serious alarm.

They hoped for the best, but there was no improvement in his condition and he sank steadily. Yesterday it was realized that he could not live.

Mrs. Morrison is herself ill at Shelbyville, Ills. She was notified of her husband's death last evening, after being prepared for the shock by telegrams setting forth his serious condition.

Charles Pollock, of Duluth, who has charge of the Standard Oil company's business in this section, and who has been a close personal friend of the deceased, will be here today.

Mr. Morrison had been on the upper peninsula some twelve years, during which time he made his headquarters in Marquette. He has held a position as traveling representative of the Standard Oil company all this time.

His territory has been this county, the line of the South Shore to the Soo and the line of the Northwestern, down to Iron River, and including Florence, Wis. In this territory he was unusually well known and thoroughly liked and respected.

Mr. Morrison had a host of Marquette friends who will feel a deep regret at his passing away, and who will feel much sympathy for his family in their bereavement.

The deceased was about forty-eight years of age and was a K. of P., although not a member of the local lodge, and a member of the Upper Peninsula council of United Commercial Travelers.

The funeral arrangements will be announced later.

HIGH POWER GUNS. Chief Deputy Game Warden Thews Their Use Should Be Prohibited.

Chief Deputy Game Warden Brewster has just returned from the northern peninsula and he comes back fully impressed with the idea that a law should be passed to prohibit the use of high power guns in deer hunting.

He came back on the same train which bore the body of a man killed during the week previous. "At least a dozen men have been killed by mistake in the upper peninsula this fall," said he, "and most of them have been victims of high power guns.

This man killed near Newberry was shot by an intimate friend and the slayer was nearly crazed with grief. He told me that he would willingly change places with the dead man if he could in that way bring him back to life.

He said that he shot at a deer and missed him. The bullet glanced off a tree, went on and entered the heart of his friend. If he had been using an ordinary gun, with an ordinary load, this would not have happened.

"Some of the old hunters declare that a man who goes into the woods with one of these high power guns ought to be sent to state's prison. There is really no use for such guns. Most of the deer are killed at a distance of not exceeding ten rods, and yet men will carry these guns which shoot two miles. As such guns get into more common use, the tragedies will increase and this state will eventually have to act in the matter. In Maine they have a law regulating the size of the charge which can be used and it is made expressly to prevent these murderous loads. I am going to send for a copy of the law."

FOILS A DEADLY ATTACK. "My wife was so ill that good physicians were unable to help her," writes M. M. Austin of Winchester, Ind. "but was completely cured by Dr. King's New Life Pills." They work wonders in stomach and liver troubles. Cure constipation, sick headache. 25c at Stafford's drug store.

STATEMENT OF CONDITION The Marquette County Savings Bank, Marquette, Michigan. WE WANT YOUR BUSINESS. Condensed from Statement to the Commissioner of the Banking Department at the close of business Tuesday, November 25th, 1902. RESOURCES. LIABILITIES.

Some dealers are over-anxious to save your money. We think you are wise enough to do your own saving. Our anxiety lies in the direction of how we could still better serve your interests—still better the quality of our merchandise. That's why we carry none of those humdrum makes of shoes that sell at 25c to 50c less in price and are of \$1.00 less in shoe value. Large showing of evening and dance slippers of the correct kind at \$2.50, \$3.00 and \$3.50. Very appropriate Christmas gifts. JACOB ROSE, 304 Front St., MARQUETTE.

PITTSBURG WALL PAPERS are the most notable success of the new season. F. W. READ & CO., (INCORPORATED.) LUMBER GENERAL OFFICE, MARQUETTE, MICHIGAN.
