The Hidden Fortune stock should do as well. This company has upwards of \$10,000,000 in sight, and will be on a dividend paying basis just as soon as the new mill is completed, which will be some time next month. A carload of ore has just been shipped from the property that, from tests, will net over \$30,000,00. This one carload is equal to a dividend of 1 cent per share on the outstanding stock. More of this ore will be shipped immediately, and there is no doubt but that the stock will show a wonderful advance in the immediate future, as all the treasury stock will be withdrawn from the market the latter end of this menth. This investment is absolutely safe, as there is about \$4.00 worth of gold ore in sight for every share of the stock issued. The stock is fully paid and non-assessable. Suggestion for our councils to consider is this: If it pays Marquette, after years and years of street building with a complete rock crushing and screening plant and a steam road roller, to expend over \$18,000 in street building every season, would it not pay here in Houghton, Hancock, Lake Linden, Laurium and Red Jacket.

It would pay. No reason on earth can be advanced to the contrary. Business men would find that it paid them in their business, the average citizen would find that it paid him and all would feel a pride in their community which they cannot feel today, except in dry or frosty weather.
