Remember! THAT UND WHEAT CRISPS IS SUPERIOR to any other breakfast food on the market today, being made from No. 1, sound, white Michigan wheat and best medicinal malt, rick in starch-digesting principles, which gives it a delicate nutty flavor. No human hand touches the food from the time the wheat enters the bins until the package is opened by the consumer, thereby making it free from germs, and absolutely clean and wholesome. Being a partially predigested food, a child two months old can digest it and thrive upon it; for invalids it is unsurpassed, as it is easily maintained on the most delicate stomach; it does not tax the digestive organs, but will stimulate their healthy development. We recommend it for the entire family.

Do not confound it with the other so-called malted foods.

GAVE INTERESTING TALK. Dr. Janes Makes Short Address Before High School Students,

Dr. S. M. Janes gave an interesting ad lress before the pupils at the high school Wednesday afternoon. He talked for thirty minutes on the general subject of physiology, hygienne and kindred topics and was attentively listened to, the lec ture containing much information that was new to its auditors and being of no little value from an instructive stand-

A feature of the talk was that portion which related to narcotics. Speaking of alcoholic beverages the doctor said their use was not without benefit when properly controlled, and that for some medicinal purposes they were particularly advantageous. However, alco-hol is not a food, but a stimulant, with great potentialities for evil. One of its greatest dangers lies in its effect in thickening the albuminoids, hardening the tissues and interfering with the peptic glands of the stomach.

The doctor in general deprecated the use of tobacco, which he said caused irri-tability of the heart and was disastrous to youthful organism, stunting growth and having like evil consequences. He mentioned the fact that at Yale statistics of the affect of tobacco on men bers of the senior class had been taken for the past eight years. These have showed that the non-users of tobacco average 20 per cent taller and 25 per cent heavier than the others, while their breathing capacity is 65 per cent greater. ten market:

He recommended the more general use of wool as the best fabric for clothing, and on the question of ventilation dwelled strengly of the necessity of fresh air at night as well as day. Lung trouble, he said, is often caused by imperfect ventilation, while for sedentary lives there is nothing more benetary lives the cells and tisated the more general use Co. wired W. H.

"Dear Mrs. Pinkham: — A while ago my health began to fail because of female troubles. The doctor did not help me. I remembered that my mother had used Lydia E. Pinkham's Vegetable

Compound on many occasions for irregularities and uterine troubles, and I felt sure that it could not harm me at any rate to give it a trial.

"I was certainly glad to find that within a week I felt much better, the terrible pains in the back and side were beginning to cease, and at the time of menstruation I did not have nearly as serious a time as the time of menstruation I did not have nearly as serious a time as heretofore, so I continued its use for two months, and at the end of that time I was like a new woman.
