MRS. MAYBRICK NOT SET FREE

AMERICAN WOMAN IS STILL UNDERGOING SENTENCE FOR MURDER IN ENGLAND.

BUT IS NOT NOW IN PRISON

HAS BEEN REMOVED TO SOME OTHER INSTITUTION.

No Pardon Has Been Granted and There Is Much Mystery in the Case, but Early Release Seems to Be Indicated.

London, Monday, Feb. 1.—The newspapers this morning announce Mrs. Florence Maybrick's removal from Aylebury prison and express the belief that she will be released within two or three months. The Daily Mail says that Mrs. Maybrick is now in Liverpool and that the following conditions attach to her release from prison: That she will not appear on a public stage or write a book on her experiences and shall in no way endeavor to attract public attention to herself.

Is Still a Prisoner.
London, Jan. 31.—In spite of the mystery with which the officials shroud their action in connection with the reported release of Mrs. Florence Maybrick, who is serving a life sentence for poisoning her husband, it can definitely be said that she has been removed from Aylebury prison. At the United States embassy it was emphatically declared tonight that she had not been pardoned and that she was still a prisoner. Where she has been taken remains a mystery, but reports from Aylebury are to the effect that she has been removed to some institution in the north of England.

The home office and the governor of Aylebury prison refuse to make any kind of statement on the subject. If the ordinary course had been followed, Mrs. Maybrick would have been taken to Holloway, if her immediate release was contemplated. But she is not there and has probably been removed to some prison under less rigorous discipline where she can recuperate before her final release, or possibly she may have been conveyed to one of the government houses of detention, or to an asylum.

The details given in this morning's London weekly newspaper, regarding the visit of Mrs. Maybrick's mother, the Baroness DeRoques, to Aylebury prison on Jan. 25, appear correct. The baroness afterwards described Mrs. Maybrick as busy with work, in much better spirits and looking to release.

History of the Case.
James Maybrick died May 11, 1889, and his wife was charged with giving him arsenic with intent to kill. Maybrick, it seems, had been constantly complaining of dyspepsia, of deranged digestion and of nervous symptoms, which the doctors thought exaggerated. Nervine tonics were the common medicine his physicians ordered. More than that, he was given to doing himself. That he also took actively poisonous drugs was proved by the evidence of Sir James Fyfe, Dr. Hopper, and others.

On April 27 Maybrick went to the races at Wirral, got wet on the race track, and attended a race dinner, at which he was taken ill, and the result was symptoms of gastritis, the stomach after death presenting the appearance of inflammation. It was during the sickness Mrs. Maybrick called for some white powder. The wife went into Mr. Maybrick's private room and secured one of the papers. This she asked to be emptied into a bottle of beef juice. The act was never denied in the trial. Mrs. Maybrick admitted that she had done it, but did not know the nature of the medicine. She swore that she did not know that her husband was addicted to the arsenic habit—an affliction which was known to all of Mr. Maybrick's relatives, but had been carefully concealed from Mrs. Maybrick.

The poison was found by the police distributed all over the house. It was everywhere, in plain view and accessible. One large paper was found in a lat box in Mr. Maybrick's dressing room, one in a trunk in the linen closet, several in other localities. The greatest quantity was discovered in the dressing room used as a private apartment by Mr. Maybrick. The trial developed that none of this arsenic was in evidence before his death. It also developed that the police were conducted by Mr. Maybrick's brothers and servants to all of the places where it was found, and was also disclosed that the Maybricks and the servants were not friendly and had not been to Mrs. Maybrick. There was not a particle of poison found in Mrs. Maybrick's apartments.

It was found that Mrs. Maybrick might arsenic fly papers for use in her toilet. It was her custom, as she admitted and the judge doubted, to buy this manner of paper and have it soaked in water for a face wash. This was introduced, but there was no attempt to show that Mrs. Maybrick had administered the solution to her husband. In fact, it was proved that this solution could not have been used in the killing, as it would have contained a vegetable fiber. The fiber would have been found in the beef juice and also in the stomach of Mr. Maybrick by the physicians who made the examination. It was not found in either case. The prosecution then introduced evidence in which Mrs. Maybrick was directly concerned.

Accused by Husband's Relatives.
Mr. Maybrick was in bed for thirteen days. He steadily grew worse. Mrs. Maybrick was a constant attendant. She stood the strain for eleven days, and from sheer exhaustion at that time fell upon the floor in a swoon, which lasted for thirty-six hours. While unconscious Mr. Maybrick died.

The moment the end came, the brothers, Edwin and Michael Maybrick, who

"COLORADO FLYER" DITCHED.

One Man Killed, Other Persons Injured, on the Missouri Pacific.

Kansas City, Jan. 31.—The Colorado flyer on the Missouri Pacific, east bound, was derailed at Miller, Kas., today while running forty miles an hour. The locomotive and Pullman remained upright on the track. The other cars were thrown into a ditch, turning over. W. Brown of Ransom, Kas., was killed and thirteen persons were injured. The wreck was caused by the snapping of a rail, due evidently to the severe weather last week. Physicians reached the wreck soon and a relief train carried the injured to Kansas City.

CONVICTED OF MURDER.

Sentence of an Illinois Man Is Fixed at Thirty Years.

Edwardsville, Ill., Jan. 31.—After being out twenty-four hours, the jury in the case of Frank Greathouse, on trial for the murder of Mrs. Laura Bailey of East Alton and for an assault committed on her daughter Eliza, returned a verdict of murder tonight and fixed the punishment at thirty years in the penitentiary. Mrs. Bailey and daughter were found lying unconscious in the road last June. The mother died, but the girl revived and accused Greathouse.

HOSTILITIES PLANNED

BOGOTA CABLE DECLARES COLOMBIANS RESOLVED TO FIGHT.

Says Government Is Helpless to Prevent War and in Less Than a Month an Army Will Be in Panama.

New York, Monday, Feb. 1.—This cable was received last night from an official source in Bogota, according to the Sun:

"The government is helpless to prevent war. In less than a month 10,000 men will be on the isthmus."

This information, confirming rumors from Panama Sunday that Colombia intended to send an expedition against Panama, came as a surprise in view of the changed attitude of the Colombians, who had apparently accepted the inevitable and depended on General Reyes to save what he could from the wreck, says the Sun.

General Reyes intended to sail yesterday for Barranquilla, but for a second time he deferred his departure. The colleagues of General Reyes on the Colombian commission sailed yesterday, the story continues, and General Reyes remains because the negotiations with the state department have not been completely broken off and he has a tentative promise from this government that Colombia will be cared for with a pecuniary bail for injured feelings. No comments can be secured from General Reyes.

General Reyes, special envoy from Colombia regarding the above report, that Colombia was about to send an army to Panama: "If Colombia is thinking of going to war, I know nothing about it and have nothing to do with it." General Reyes expects to leave for home in a few days. He said that so far as he is concerned, his negotiations with the state department ended with the note of Jan. 15, delivered to Secretary Hay.

TREATY HAS RIGHT OF WAY.

Senate Will Consider Panama to Exclusion of Other Business.

Washington, Jan. 31.—The senate this week will continue to discuss the Panama question. Speeches will be made by Senators Fairbanks, Clarke of Arkansas and Clay, all in support of the treaty. There will be other speeches, but a temporary cessation may be expected later in the week, as there is a disposition by many Democratic senators to postpone further discussion of the question until the responses to the resolutions of inquiry are received from the president. The Democrats have given assurance to the Republican leaders that they do not seek delay merely for the purpose of postponing the vote of the treaty.

The urgent deficiency appropriation bill will be reported during the week and will receive attention if the Panama question is sidetracked to meet the request of the Democrats for delay to digest the information they hope to receive concerning the isthmian revolt. The canal question will be kept to the front even to the exclusion of appropriation bills.

The house this week will pass the diplomatic and consular appropriation bill, which was reported from the committee on foreign affairs last week. Mr. Hitt, chairman of the committee, will call it up at the first opportunity. District of Columbia business is the special order for tomorrow, private claims bills for Tuesday and pension legislation for Friday.

CHRISTIANS THREATENED.

War of Extermination Reported Urged by the Persian Priesthood.

Teheran, Jan. 31.—The legations of the Christian powers fear that a holy war may break out on account of the agitation of Persia's high priest, who travels about the country inveighing against the "unclean," that is, "Christians and Mohammedans. The high priest tells the people that Persia "will go to the Christian dogs" unless the foreigners are driven out. As a consequence fanatics are attacking Europeans and European sympathizers, even in the streets of the capital, stealing their collars and cuffs, to place around the necks of dogs, which animal is regarded as "unclean."

GERMANS IN SORE STRAITS.

Berlin, Jan. 31.—A dispatch from Swakopmund, German Southwest Africa, says that since Jan. 21 three men have been killed in sorties from Okahandja against the besieging rebel natives. The garrison at Omaruru repulsed a severe attack on Jan. 22. It is said that Ombingwe also is besieged.

FIRE WIPES OUT TOWN.

Edwardsville, Miss., Jan. 31.—Fire at Edwardsville yesterday burned every building in town except two dwellings. The loss is \$200,000.

POST TO BE ABOLISHED.

British Army to Get Along Without a Commander-in-Chief.

London, Jan. 31.—The report of the royal commission which was appointed to advise the government concerning the creation of a board for the administration of the business of the war office has been issued and it confirms the change foreshadowed by the Associated Press last November; namely, that the post of commander-in-chief of the army will be abolished.

With the approval of the king and acting on the recommendations of the commission, the government has decided to appoint an army council framed on the admiralty model, to abolish the office of commander-in-chief of the army and create a new post, that of inspector general, whose principal duty will be to inspect and report on the efficiency of the military force.

BECOMES A ROMAN CATHOLIC.

Rev. C. Schultz, Milwaukee, Renounces Allegiance to Episcopal Church.

Milwaukee, Jan. 31.—Rev. Charles Schultz, formerly rector of St. Stephen's Episcopal church, today publicly renounced allegiance to the Episcopal faith and entered the Roman Catholic church. A number of former parishioners witnessed the ceremony at Jesu church.

CORRUPTION ALLEGED

SIX ARRESTS ON INDICTMENTS ARE MADE IN MILWAUKEE.

Milwaukee, Jan. 31.—Six arrests were made today on indictments returned by the grand jury, as follows:

Former Alderman Charles Cook; bribery.
Henry G. Razall, stationary dealer; offering bribe.
Supervisor Julius Feig, obtaining county orders under false pretenses.
Former Alderman Rudolph; bribery.

Former Alderman J. J. Falsch, inspector of the house of correction; obtaining county orders under false pretenses.
Alderman Adolph C. Weisenborn; bribery.

In addition subpoenas were issued for Charles Eau, real estate dealer, perjury; A. Meixner, coal dealer, securing county orders under false pretenses, and Supervisor Albert C. Rade, securing county orders under false pretenses.

WHAT THE CATHOLICS ASK.

Bishop McFall Speaks at Detroit on the Question of Schools.

Detroit, Jan. 31.—About 2,000 persons were present in the Light Guard Armory today at a mass meeting closing the semi-annual meeting of the advisory and executive boards of the American Federation of Catholic Societies. Mayor Maybury delivered the address of welcome.

The meetings and conventions of the federation, said Bishop McFall of New Jersey, would answer the purpose of crystallizing and disseminating the opinions of the Roman Catholic church on such questions as divorce and education. "Retain the present public school system," said the bishop, "but do not bar Catholics out of their rights as citizens. The federation has taken an admirable stand on this question. Its platform is: There shall be no public monies paid out for religious instruction in any schools, but let the state examine our schools and, if on examination, it is found that we are giving the children an education which comes up to the requirement of the state, then let the state pay for it."

The executive board today changed the date of the annual convention at Detroit from July 19 to Aug. 2.

MANY FILIPINOS TO HANG.

Sentences of Death or Imprisonment Meted Out to 600 Bandits.

Washington, Jan. 31.—Military courts have been handing down sentences of death or imprisonment to 600 Filipino bandits, members of the terrible ladrone bands which have been operating in the province of Albay. Almost innumerable murders are charged against these prisoners. Few of the prisoners, it is thought will receive any mercy. They cannot be considered as specially deserving of any.

Piopo Tuis is a good example of the captives. He killed an American named Brown, cut off one of his ears, and sent it to the nearest American military force with an insulting letter. Another fine Filipino gentleman is Juan Villafuerte, who cut the throat of Sanitary Inspector Shanks at Lake Balu, sneaking into his room while he slept. Juan was so tough that even the ladrones could not stand him, and expelled him from their number.

COURT FREES UNION LEADER.

Case Against Chicago Federation of Labor Secretary Is Dismissed.

Chicago, Jan. 31.—Judge Gary yesterday discharged Secretary Edward Nockels of the Chicago Federation of Labor on the charge of contempt preferred against him by the grand jury.

"It is an unqualified fact that the grand jury cannot force the defendant to produce the books," Judge Gary made this declaration from the bench when Edward Nockels, secretary of the Chicago Federation of Labor, was before the bar where he had been brought for alleged contempt of court because he refused to bring before the grand jury, on a "John Doe" summons, all the books, records and papers of the organization he represents for their inspection.

Interrogatory evidence of Nockels before the inquisitorial body introduced in court showed that the books were desired for the purpose of investigating reports that inflammatory speeches tending to stir up lawlessness and disorder had been delivered in the federation meetings.

BEDFORD CASE STILL PUZZLES

IDENTITY OF THE MURDERER OF MISS SCHAEFFER REMAINS UNKNOWN.

TEN DAYS SINCE THE CRIME

DETECTIVES NOW HINT AT IMPORTANT DEVELOPMENTS.

Two Men, Members of the Social Set, Are Under Suspicion and It Is Said That One at Least May Be Arrested Soon.

Bedford, Ind., Jan. 31.—Ten days have gone since the murder of Miss Sarah Schaeffer, teacher of Latin in the Bedford High school. The Bedford police, six detectives and twenty reporters have been at the scene since the morning following the murder when the body was discovered, but the murderer has not been found.

On the night of Jan. 21, Miss Schaeffer left the supper table at the home of Mrs. Smith to go five blocks to the home of a pupil. She wore a cap, a short skirt and a jacket, and carried an umbrella. Half a block from the house she spoke to an attorney, remarking that she had been singing and did not hear him when he first spoke.

The next morning Miss Schaeffer's body was found in a carriage shed in an alley, a block from the boarding house. Some one had dealt her a blow, crushing her skull with a piece of brick. The body was found lying partly under a carriage in the shed. The skirts were disarranged, and part of the underclothing had been torn away and thrown on the ground. The body had been torn open and there were marks of a bloody hand on the young woman's breast.

The motive of the deed is not known, but it is supposed to have assault or robbery. Two persons have been arrested on suspicion and released with their innocence established, and the detectives have now turned their attention to the social circles of Bedford, of which two persons are under suspicion. So strong do the detectives think the evidence against one of these men that they have remarked that his arrest may follow shortly. The city police insist that he will not turn up. Half of Bedford thinks this man guilty, and the other half declares him innocent. If there is any tangible evidence against this man, it has not been made public.

The detectives declared today that they have secured evidence of vital importance in the last twelve hours, which includes an article found in the shed where the body was found. They refuse to say what the evidence is. The Bedford men under suspicion, it is said, had both been repulsed by Miss Schaeffer for advances.

DETECTIVE KILLS HIMSELF.

Worked Two Years on Murder Mystery and Lost His Mind.

Des Moines, Jan. 31.—Crazed over the unsolvable character of the case of the murder of the two Pearson children, which occurred two years ago, Gordon Bobby, a detective who had been working on the case, shot himself through the head today.

Engine Decapitated Him.

Albuquerque, N. M., Jan. 31.—W. A. Bliven, of Sioux City, Ia., who arrived several days ago, enroute in California, committed suicide today by leaping in front of a switch engine. He was decapitated.

Dijon, France, Jan. 31.—E. A. Arnold Comtesse, son of the president of Switzerland, committed suicide yesterday by shooting.

ACTRESS ASKS \$50,000.

Peter Duryea, Race Horse Breeder, Is Sued for Breach of Promise.

New York, Jan. 31.—According to the Herald, Peter Duryea, a breeder of trotting horses and stock farmer of Lexington, Ky., has been made the defendant in a suit brought by Sarah Madden, the actress, to recover \$50,000 for alleged breach of promise of marriage. The action has been begun in the supreme court of New York. Duryea's counsel says that Duryea is emphatic in the statement that he never promised to marry Miss Madden and that the action is an attempt to extort money.

POWDER IN CASE EXPLODES.

Five Miners Instantly Killed in a Pennsylvania Colliery.

Mahanoy City, Pa., Jan. 31.—Five employees were killed this morning in the Maple Hill colliery of the Philadelphia & Reading coal company by an explosion of powder in a steel cage in which the men were coming out of the mine. The explosion ripped the cage apart and the mangled forms of the miners fell three hundred feet to the bottom of the shaft. The head of one man was blown off.

DIED FROM THIRST.

Salt Lake, Jan. 31.—It is reported that the bodies of a score of men, who perished from thirst while attempting to cross the desert in Nevada, have been found within a few weeks. The men, it is believed, were mostly tramps.

GAS EXPLOSION KILLS TWO.

Pittsburg, Jan. 31.—An explosion of natural gas in the cellar of the home of Henry Magel, of West Liberty, today, caused the deaths of Magel and son, and severe injury to six others.

TODAY'S WEATHER.

Washington, Jan. 31.—The following is the weather bureau's forecast for Upper Michigan: Fair Monday, except snow in east portion; Tuesday, fair; fresh west winds.

(Continued on Page Four.)

DAILY MINING JOURNAL, A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

J. Adam Bede is nothing if not original. Who but he would have thought of calling the Wall street push "a little bunch of Populists"?

The interest that Michigan Democrats manage to keep up in the matter of nominations cannot be too highly commended. It testifies to wonderful persistence and undying optimism.

The Manistique Pioneer-Tribune twits the Courier with the fact that though it has been making such a great noise over primary election it has managed to see its way clear to support for re-election both Representative MacEachern and Senator Fuller, who were consistent opponents of the Colby bill at the last session.

The coal miners and operators in the bituminous fields are wide apart. If they are wise they will get together. The country can hardly afford another strike before it has finished paying the bills of the anthracite disturbance of a year ago last summer, and when general business is so generally depressed.

The Indianapolis postoffice is now to be reopened with a white postmaster, after being closed for about a year. Miss Cox, it may be noted, served out her term, indeed her second term. Now the white faction that persecuted her until she felt under the necessity of resigning claim to have won the issue, because the president has finally given them a white postmaster.

While the upper peninsula is engaged in discussing the question of the judicial nominations it might be well to send a delegation below the straits to ascertain whether or not the powers that be are seriously considering an upper peninsula candidate, at all. Possibly it is planned to fill all the places on the bench with lower Michigan aspirants; there are a sufficient number of them.

The strenuousness of the present winter is attested by the fact that at Ann Arbor last week ten freight cars fell forty feet through a steel bridge onto the Huron river, but failed to break the ice, and reposed on its service without further damage than was caused by the collapse of the bridge until the wreckers could get to work.

Ex-Governor Taft says that the first necessity in the Philippines is for railroads and that the reward for the capitalists who invest in these enterprises there will be very great.

SUPERIOR TRUST COMPANY. Hancock, Michigan Capital - \$150,000. This Company is under the supervision of the state banking department and is authorized by law to act as executor, administrator, guardian, assignee, receiver, or trustee.

I do not believe in starting prematurely on a campaign of that character. It will be some time before I make an announcement. Stearns is in Washington, where Railroad Commissioner Atwood has been a familiar figure for some days.

The Soo has just sustained another hard blow, one in which it will have the sympathy of the entire upper peninsula. The Central M. E. church, a fine brownstone structure erected at a cost of over \$30,000, was totally destroyed by fire, making the congregation homeless and wiping out the results of years of toil and denial.

J. Adam Bede is credited with winning his spurs in the national house of representatives. From the printed reports of his speech it is impossible to determine just what he was talking about or whether he was talking about anything in particular.

Probably in no county in the upper peninsula have the people paid their taxes so promptly as in Dickinson. All the city and townships have made returns to County Treasurer Lindahl and the showing is one which he points to with pride.

It will require about one week more for Whitney Bros. to finish their Escanaba breakerwater contract for the Michigan and Northwestern States. They have had a crew of men engaged in the work since the early part of November, and when finished will have driven about twenty-five thousand pieces round and sheet piling miles.

The annual report of the management of St. Joseph's hospital of Marquette, Mich., discloses the fact that during the past year there were 455 patients cared for, the largest number in the history of the institution. There were twenty-five deaths, two of them from typhoid fever.

The news that the service pension bill project is assuming great strength in the house of representatives is not startling. What its persistent advocates have needed is an opportunity to force it to the front at a time when it could be utilized to the best advantage as a political asset.

Bills introduced in both houses provide for a pension of \$12 per month to every man who served ninety days or more in the army or navy during the Civil war, who has an honorable discharge and who has reached the age of sixty-two years.

It has been generally admitted that a service pension bill would have to come sooner or later, yet it was expected that it would be deferred until payments under existing law had become less burdensome.

HOMESEEKERS' EXCURSIONS. To the Northwest, West and Southwest, and Colonist Low Rates West. Via the Northwestern line. Excursion tickets at greatly reduced rates are on sale to the territory indicated above.

Upper Peninsula

Dr. Holmes used to say he was "seventy years young." Some men are old at half that figure.

Age is not in years. It is in the blood. Scott's Emulsion helps to keep you young by keeping your blood young by supplying it with an abundance of rich, pure, vital nourishment.

Dr. Edward Bedloe, whose long consular experience in the east has put him thoroughly in rapport with international business as well as high politics, happened along and was immediately called upon to stand and deliver an opinion upon the situation.

The Cleveland-Chief Iron company and the Pioneer Iron company, through their solicitor, W. P. Belden, of Ishpeming, are contesting the payment of about \$400 personal taxes in Rock River township, which they claim was fraudulently and illegally assessed against them by Supervisor J. H. Gattis.

The fair fields grow green again where the feet of the destroyer trampled, the cotton whitens, the corn gives its gold. The one thing that perished utterly was the world that winter seed and soil never see again.

The Ante-Bellum Planter Was Not a Farmer, but a Baron. Sherman's army swept through the south from Atlanta to the sea like a blasting storm, leveling, dispersing, pillaging, leaving things that stood in its path. It was terrible, but necessary.

The fair fields grow green again where the feet of the destroyer trampled, the cotton whitens, the corn gives its gold. The one thing that perished utterly was the world that winter seed and soil never see again.

The fair fields grow green again where the feet of the destroyer trampled, the cotton whitens, the corn gives its gold. The one thing that perished utterly was the world that winter seed and soil never see again.

THE DAUGHTER OF PROF. RENO OF ELWOOD, IND., RESTORED TO HEALTH BY VINOL.

Mrs. Reno's Letter and Advice to Mothers, Published by Request of the Stafford Drug Co.

Mrs. Reno says: "Our daughter Marion was troubled with indigestion; she became fretful, could not sleep at night, lost flesh, and we feared that we should lose her. We tried different doctors, and many kinds of medicines, with no apparent success, until we tried Vinol. Two bottles cured our little daughter; she can eat anything, sleeps well and has gained flesh."

A reporter of The Mining Journal asked Mr. Stafford of the Stafford Drug Co. of this city, who are selling so much Vinol, regarding it. Mr. Stafford assured the writer that this is only one of a great many such cases that are constantly coming to their attention where Vinol has actually saved

the lives of children when all else had failed. "You know, of course," said Mr. Stafford, "Vinol is not a patent medicine, and it contains all the medicinal, curative elements of cod liver oil, without the nauseating oil; it is delicious to take, and will make rich, pure, red blood, sound flesh, and muscle tissue, and creates strength and health more surely and quickly than anything we have ever sold in our store."

In the strongest manner we unhesitatingly endorse and guarantee Vinol to increase the appetite, cure stomach troubles, give strength and renewed vitality to the aged, build up the run down, tired and debilitated, make the weak strong, cure chronic coughs, colds and build up the convalescent, or will return to the purchaser every dollar paid for it. We just wish every mother in Marquette who has a sick, puny or ailing child would try Vinol on our guarantee."

Seguines people will find Vinol at the City Drug Store.

night, Dick, pulled the strap, stepped to the sidewalk and walk-off through one of the side streets. There remained in the stage, only the husband and wife and the young man, who was obviously under the influence of liquor, and who sat in a crouching attitude in a corner of the stage under the dim flickering lamp.

After a while the husband noticed that the young man's head seemed to be drooping as if in sleep, and fearing that he might be borne beyond his destination, he rose, tapped him on the shoulder and called attention to the number of the street they had just passed. There was no response, and the husband repeated his words, leaning over and shaking him. He then suddenly straightened up, turned to his wife and said quickly: "We will get out here."

MARION RENO.

SPRING STYLES FOR THE MEN.

Pajamas Made of Madras, Flannel, Silk, or Silk and Linen.

Men's pajamas are made of madras, Oxford cheviot, French flannel, silk, and silk and linen, and have the monogram of the owner embroidered in black or white silk on the outside of the breast pocket.

Gold waistcoat buttons have assumed the proportions of a fad and the better class of shops sell them mounted on cards.

Silk and linen handkerchiefs for spring from French designers are displayed in marking, a deep buff color, chambragne, a pale buff, and havane, the natural color of the linen. The best trade, though, now demands plain linen in stead of silk and linen.

Belts for next summer will be the same widths as last year. The inch article in black and pigskin will be the most popular, while the five trade will take up Morocco and seal with heavy hand finished buckles.

Export duties are reduced one-third in the case of Russia. All Russian manufactured goods intended for the Chinese markets are charged lower transit duties than those shipped from non-Russian ports. Such an arrangement for the preferential treatment of Russia's trade is a serious matter for American manufacturers, who may profit by reference to the records of British and Russian trade in Khorassan and northern Persia.

The methods Russia has successfully applied in cutting into British commerce in other parts of Asia will, it is presumed be employed in China. Reasoning by analogy, we may profit by reference to the records of British and Russian trade in Khorassan and northern Persia. The commercial relations dealing with the foreign trade of Persia show how effectively the Russians can kill trade in products of which they desire to secure a monopoly in the markets of the world.

Thirty or forty years ago, long before skyscrapers and rapid transit were thought of, and New York was just a big growing town, they used to tell a story that was ghastly enough to curdle the blood of the most skeptical and to keep people of nervous temperament awake at night.

The tale went that of a summer night a husband and wife returning home from the theater entered a Fifth avenue stage far down town and for many blocks were the only occupants. A little above Fourteenth street, however, the stage came to an abrupt stop, the door was opened, and three young men entered. One of the three had evidently been drinking heavily, for his companions were obliged to help him to his seat. The door closed behind them and the stage continued its journey northward.

About ten blocks farther on one of the three men rose, and bidding his friends good night stopped the stage and alighted. A few minutes later the second of the three said, "Well, good

Copper Country

PEIER FALETTI CONVICTED.

Verdict of the Jury is Murder in the Second Degree.

The case against Peter Faletti, charged with the murder of Thomas Cox, a Laurium man, was given to the jury at 2:30 o'clock Saturday afternoon, the attorneys having finished their arguments about 2 o'clock. In charging the jury Judge Streeter was particular to explain the difference between murder in the first and second degree. In conducting the case for the People, Prosecuting Attorney Larson had asked for a verdict in the second degree, and the result was a legal triumph for him. The jury was out six hours, returning a verdict of murder in the second degree about 8:30 o'clock. Faletti was recommended to the mercy of the court.

The attorneys began their arguments before the jury at 9 o'clock in the morning, Mr. Larson talking first. The court room was crowded. More logical addresses were never heard in the Houghton county circuit court. Both the prosecution and the defense had carefully analyzed the evidence and no little detail escaped them. Both sides made notable efforts and the jurors appeared much interested. Cox, Faletti's victim, was portrayed by Mr. Larson as a peace-maker on the night of the shooting. Cox, he said, interfered in the brawl merely to stop what appeared a serious fracas. The prosecutor argued that Faletti himself started the row which ended in the fatality. The evidence, he stated, did not show that Cox or any one else hit Faletti or gave the defendant just provocation to shoot Cox. If Cox had any designs against Faletti he could have made short work of the Italian, but the test of the row which ended in the fatality was the brawling with any intent other than to restore peace and order.

Hon. John Power of Escanaba, who opened the argument for the defense, was eloquent and dramatic. His logic was good, but his delivery was better. He waxed enthusiastic and on any other occasion his oratory would have brought forth a storm of applause. The finale of his first argument when he stated that there never was a more perfect case of self-defense was a splendid effort.

Mr. Power told the jurors that they should put themselves in Faletti's place on the night of the shooting and they should judge the defendant according to the circumstances at the time, taking into consideration the environment. Faletti, he argued, was in imminent peril and shot to protect himself. Although the defendant went into the saloon with a friend, this friend, Mr. Power stated, made no attempt to aid him, and Faletti was a stranger in the saloon and practically alone. He was surrounded by several men when the row started, including Cox and a man named Kelly, who had hold of him, and was pushed back against the wall. The situation was, Mr. Power argued, one of great peril for Faletti, and under the circumstances the man had a perfect right to shoot, inasmuch as his life was in great danger.

The fact that Faletti carried a weapon had, the attorney said, no whit to do with any intent to kill Cox. Faletti had carried a revolver at different times, as he at one time had employment which made this necessary, that of collecting money. On the night of the shooting he went down town with money to pay bills and it was natural for him to take the revolver, owing to the fact that he had been in the habit of carrying a gun while he had money on his person. The revolver was not taken by Faletti, Mr. Power said, for the purpose of killing Cox. The fact was that Faletti had the revolver and had a right to use it, that under the circumstances the law gave him that right.

Mr. Power refuted the statement that Faletti started the quarrel. It was Lowney, and not Faletti, he said, who was at the bottom of the affair. Lowney so angered Faletti by calling the defendant an uncomplimentary name while both were standing at the bar, that Faletti threw a portion of a glass of beer into the Irishman's face. It was an act any reasonable man might have done, said Mr. Power. The fracas started immediately. Faletti was surrounded, and by Cox and Kelly was pushed back against the wall. Cox, according to the testimony, let go of Faletti for a minute or two and struck down another Italian, and then again took hold of Faletti. The shots were then fired. Previous to this, while against the wall, Faletti was menaced by bottles in the hands of men about him. It was a situation, Mr. Power argued, that made the shooting perfectly justifiable. He only wanted the jurors to picture the situation according to the evidence, and to consider that if Faletti was a man of influence in the county whether they would acquit him under the circumstances as given by the witnesses.

In answering the argument Mr. Larson told the jury that it should not be carried away by the eloquence of Mr. Power.

Power, that this was the only danger in the case. The jury should, he said, consider the evidence, and not the dramatic acting of the counsel for the defense. The evidence, he stated, showed that Faletti was attacked in the true sense and that he had no provocation to kill Cox. Mr. Larson brought up a good point by saying that Mr. Power in his argument outlined an entirely different defense than did Faletti in his own behalf on the stand. Faletti, Mr. Larson said, was not the aggressor, the shots were fired accidentally, that he did not intentionally pull the trigger. On the other hand Mr. Power stated that it was a clear case of self-defense and that Faletti shot to protect himself. Mr. Larson said that Cox was deliberately shot without just cause and that the verdict should be murder in the second degree.

Dunn Trial Next.

The jury has been excused until tomorrow morning when regular court sessions will be resumed. The case of the People versus Edward Dunn, charged with keeping his saloon open after hours, will be taken up. The complainant in the case is Landlord Loch, of the Central House, which is next door to the Dunn saloon on Fifth street, Calumet. Mr. Loch claims his boarders were bothered with noise in the saloon after 11 o'clock at night to the extent that they could not sleep. Complaint was made to him and he claims he was threatened with loss of business unless the saloon closed up on time. A jury will now decide as to Mr. Dunn's guilt. Following the Dunn trial just close and against Adolph Justia, charged with larceny from the person, will be taken up.

Naturalization Applications.

Today in circuit court will be devoted to the hearing of applications for full citizenship papers. Over one hundred applications have been made to County Clerk Richardson and Judge Streeter will give attention to as many of these as possible. Next Monday also has been set aside for the same purpose.

HIGH SCHOOL BASEBALL LEAGUE.

Proposed Organization Advocated by Principal Hall of Calumet.

Principal E. J. Hall of the Calumet High school is much interested in school athletics. At present he is perfecting plans for an upper peninsula high school baseball league which he hopes to see organized. The plans he has in mind are such as to have the schools agree to the project, providing the proper interest can be agitated among the various superintendents and principals, as well as among the athletic associations of the schools. As soon as the plans are approved at they will be presented to the schools for approval. It is quite early to be talking baseball with the peninsula and the thermometer many degrees below the freezing point, yet Mr. Hall believes that in order to make the proposed organization a success it should be agitated at an early date. The schools will have plenty of time to carefully consider the project and act upon it before spring. Then, if it goes through, everything will be in readiness to start the season early. Baseball is well thought of and approved as one of the best forms of athletic sport for young men, and Mr. Hall fails to see why a league among the peninsula high schools should not be a success. Although the distances are quite great he figures that the receipts would more than pay expenses and would leave a balance for the home team for other athletic uses. The schools that are in mind are Marquette, Negaunee, Ishpeming, Lake Linden, Hancock, Houghton and Calumet. Owing to the distance between the Soo, Menominee and Ironwood from the copper country, it is not thought probable that these towns although if satisfactory arrangements could be made they would gladly be included. The Calumet school is much interested in the project and the young men here to see it pushed to success. Mr. Hall believes that other schools in the peninsula will take the same interest. Most of them had baseball teams last season and a good article of ball was put up.

SOO BALL TEAM WILL BE FAST.

Lock City Manager Already on the Look-out for Speedy Players.

From present indications the Soo will have a fast bunch of baseball players in the field next season. The school at Soo News Arthur Lizzette, who officiates behind the bat for the Lock City aggregation and was recently made manager of the team, is hustling these days to get desirable material in general vacancies. He has a lot of good men on the string. The latest man to be heard from is Dave Tucker, a left fielder. Tucker has been with the St. Cloud aggregation the past two seasons and has a good record. Previous to this he was with the Dubuque organization in the Three I league. During the past two seasons he hasn't been out of the game a single day, which indicates that he is a man of good health and considerable action. He is an old time friend of Lizzette and says he would like to go to the Soo providing suitable terms can be arranged. At present he is in St. Paul.

FINNISH IMMIGRANTS' HOME.

The project to build a home for Finnish immigrants at some point in the copper country, either in Hancock or Calumet, in which prominent Finnish people in the copper country are interested, will be aided by the several Finnish societies, including the Finnish labor club of Hancock, the Finnish labor organization of Hancock and the Finnish Ladies' society of Calumet. The fund has already been started and will be added to in various ways. At the annual meeting of the ladies' society at Calumet last week Miss Maggie Walz was elected president for the ensuing year.

Kidney complaint kills more people than any other disease. This is due to the disease being so insidious that it gets a good hold on the system before it is recognized. Foley's Kidney Cure will prevent the development of fatal disease if taken in time. Desjardins' Pharmacy.

CONSIDERATION, \$24,000.

W. H. Hosking & Co. of Calumet Purchase the Caesar Building.

W. H. Hosking & Co. of Calumet, the dry goods concern, burned out a few months ago, have purchased the Caesar building at the corner of Fifth and Oak streets, adjoining the site of their former store, from Lorenzo Caesar. The deal was closed Saturday, the consideration being \$24,000. The transfer was one of the largest in Calumet in years. Shortly after the fire the firm moved into the Caesar block, which is one of the best business locations in the copper country metropolis. At the time it was the firm's intention to rebuild, but that course will not now be followed. The Caesar building will be remodeled to suit the convenience of the company and the new store will be on the second floor, now used for offices, will be converted into a gent's furnishing goods department. A third story may be added next summer to accommodate a furniture department. The first floor will be used for the dry goods business. The First National bank has purchased the site of the former Hosking store for \$7,500 and may some day enlarge the Caesar block and the bank.

HOCKEY AT HANCOCK TONIGHT.

The Hancock and Dollar Bay hockey teams will play in the Hancock City rink tonight. It will be the first hard game of the season for each team. Joe Linder, who is now a spare man on the Portage Lake seven, is captain of the Hancock aggregation and he expects his seven to win tonight. His team has not a game to date. The Bays are equally determined. They have played the game for years, Dollar Bay being the home of hockey in the copper country. The teams will line up as follows: Hancock, forward; Steinback, rover; Swyer, right wing; Waara, center; G. Linder, left wing.

CALUMET & HECLA COAL HOIST.

It is expected that the work of constructing the new coal hoist of the Calumet & Hecla company at its smelter at Hubbell will be resumed today. The severe cold weather of last week compelled a cessation of operations. The W. W. Hunt company of New York has the contract, and the Passaic Rolling Mill company is erecting all the structural ironwork on a sub-contract. The hoist has been in course of construction for some weeks, but much time will be lost before it is ready for use. All of the Calumet & Hecla coal for use at its mine, mills and smelter is unloaded at Hubbell and Lake Linden. The present hoist will be of large capacity and will permit an additional 100,000 tons of coal to be added to the present equipment, which includes ten other hoists of a similar character.

DEATH DEEPLY REGRETTED.

The remains of Mrs. F. N. Bosson of Calumet, whose death occurred Friday afternoon after an illness of several weeks, were shipped yesterday afternoon to Reading, Mass., for burial. A brief service was held at the residence. The body is accompanied east by Mr. Bosson, who is chief electrician of the Calumet & Hecla company, and his daughter, Miss Amy Bosson. Mrs. Bosson's death is deeply regretted. She possessed a rare, sweet voice and was often heard at musical functions. She was forty-three years of age and had resided in Calumet for the last thirteen years, that being the period of her husband's employment with the Calumet & Hecla people. For some time she had been in poor health.

TEN-DAYS MISSION.

Father Field of Boston opened a ten-days' mission at Trinity Episcopal church, Houghton, yesterday morning. He has the reputation of being a pleasing pulpit orator and his visit in Houghton was anticipated with pleasure by the members of the church. He spoke to the children yesterday at noon and last afternoon at 6 o'clock, and addressed the men. The program for the week is as follows: Holy communion at 7:30 am 9:30 o'clock in the morning; meditation, at 10 a. m.; children's mission service every afternoon, except Wednesday, at 4 o'clock; service for women only Wednesday afternoon at 4 o'clock; mission sermon and hymns at 7:30 p. m. each evening; service for men only at 4 o'clock next Sunday afternoon.

L'ANSE GIRLS WON.

The L'Anse High school girls were victorious in their basketball game with a team picked from the Hancock Central High school girls, played in the Hancock Y. M. C. A. gymnasium Friday evening. The game was a close one, as the count would indicate it was an exciting contest. Nearly three hundred spectators saw the match. It was the belief of many that the game was uninteresting, but the girls pulled out everything but their best. The local girls led by a good margin at the end of the first half, but the pace was too much for them and L'Anse had things easy in the latter part of the game. A considerable delegation accompanied the visitors.

WRESTLING MATCH ARRANGED.

Ole Olson and Eddie Trembath, Calumet wrestlers who have been negotiating with each other for a match during the past two weeks, have at last come to terms and have signed articles for a bout to be pulled off on the evening of Saturday, March 6. The place has not yet been selected, but it will be either the Italian hall or the old Light Guard Armory. The best two out of three falls will determine the contest and the winner will receive a purse of \$100 and the loser a purse of \$50. Both men are in the heavyweight class. Each is clever and a satisfactory exhibition likely will be the result of the meeting between them.

METHODIST PREACHERS' MEETING.

The Copper Country Methodist Preachers' association will hold its regular monthly meeting at Grace church in Houghton this forenoon. Rev. Frank Miner of Dollar Bay and Rev. J. H. DeLay of Trinity will be the speakers. Mr. Miner will read a paper on "The Son of God," while Mr. DeLay's paper will be entitled, "The Son of Man." Discussions will follow. Following the session the ministers and their ladies will dine at the Douglas House. Rev. Messrs. Miner and Ray will be the hosts. Rev. G. M. Thompson of Marquette, presiding elder for the district, will be in attendance.

Dr. Weaver's Syrup

Purifies the blood; Create (ointment) for the skin. The most reliable preparation for kidney troubles on the market is Foley's Kidney Cure. Desjardins' Pharmacy.

Mining News

FOREIGN COPPER STATISTICS.

James Lewis & Son of Liverpool in their annual review of the copper market for 1903 say: "Our statistics of consumption for the year show an increase in the United States of 2,700 tons, and in Germany of 7,500 tons, but a decrease in England of 17,740 tons and in France of 4,107 tons. The exports of manufactured copper (chiefly to India) and of sulphur have increased 6,130 tons. There is, however, little doubt that the actual consumption of England has not fallen off, but on the contrary has increased, the above apparent decrease being due to the greatly reduced stocks held by smelters and manufacturers. Much more copper has been used for electrical purposes; an increased quantity of sulphate has been consumed in Ireland.

"We may look for an increase of from 15,000 to 25,000 tons in the United States, and for some increase from Canada, Australia and Spain. Some shipments will probably be made from Mexico, but it will be some time before the large discoveries in Mexico in Central Africa can be exported to any great extent. Should war break out between Japan and Russia, the exports from the former country—about 20,000 tons per annum—will probably be curtailed. Consumption during 1904 is expected to fall off in the United States, but in England, France and Germany a considerable increase is probable in connection with the development of electric traffic, especially on existing railroads and motive power. India is so prosperous that she will probably take more copper in 1904 than in 1903, and the quantity of sulphate of copper required for the export and home consumption is likely to be larger than last year.

"The future of values mainly depends upon the quantity of copper available for shipment from the United States to Europe. An increase of fully 25,000 tons over the quantity sent in the past year will probably be required to maintain stocks even at their present low level, assuming that there is no increase in the European consumption and that there is no decrease in the supplies to Europe from Japan and other countries. A very small quantity of standard copper in the public stocks available for speculative purposes—not much more than 2,900 tons—lays the market open to easy manipulation, and makes bear sales very dangerous."

MILLION-DOLLAR DEAL.

Another important mining deal is on the tapis, says the Bisbee Review. From one of the interested parties The Review has it on good authority that the sum involved is a million dollars. L. C. Shattuck, who has figured in more important mining transactions than any other man in Bisbee, is at the head of a group of Bisbeeites who will transfer to Michigan and Duluth people a group of six or seven claims lying between the Calumet & Arizona and the Copper Queen ground, and situated above the Gardner shaft of the latter company. Six of these claims are being held at \$750,000 by Shattuck, and in fact he has more than once refused that amount. Negotiations are now under way and the titles are being investigated by a lawyer from Duluth, who represents capitalists in Minnesota and Michigan. Other parties interested are E. Marks of Bisbee and the Henninger brothers. The ground involved in the sale is considered by local mining men to be the most valuable for sale in the district, and in the event of the deal going through it means another company the equal of the Calumet & Arizona.

QUINCY STRIKE UNCHANGED.

There is still no change in the Quincy strike. Men are daily leaving for South range points and other mines in the district where they have secured employment, but the number is comparatively small in proportion to the number of Quincy employees. The situation becomes more serious as the strike increases. Miners as a rule do not have bank accounts to fall back upon and unless they receive aid from the employees of other mines there is bound to be much suffering. Hancock merchants are growing alarmed. They are carrying over accounts and it will at least be another month before they will have any money coming in. Some are losing hope, on account of the fact that the removal from town of a number of their best customers. The striking trammer are persistently sticking to their demand for their former wages and the miners are standing by them. The company has not intimated that it will make any further concessions and the hope for a settlement seems as far away as ever. Quincy's inactivity will cut quite a figure in its output for the year.

AMALGAMATED.

An authority on Amalgamated, close to Standard Oil interests, says: "I firmly believe the next dividend will be \$1. There was no question as to the ability to pay \$1 last week. We look for it for a favorable decision which will release a lot of accumulated profits of the sub-companies to the Amalgamated. Boston & Montana has been earning between \$25 and \$30 per annum and declaring \$8. Patut has declared nothing, but must have at least \$2,000,000 to be released. Butte & Boston hereafter will declare dividends oftener than once in two years for it is really making a fairly good showing and no apologies are needed.

WRESTLING MATCH ARRANGED.

Ole Olson and Eddie Trembath, Calumet wrestlers who have been negotiating with each other for a match during the past two weeks, have at last come to terms and have signed articles for a bout to be pulled off on the evening of Saturday, March 6. The place has not yet been selected, but it will be either the Italian hall or the old Light Guard Armory. The best two out of three falls will determine the contest and the winner will receive a purse of \$100 and the loser a purse of \$50. Both men are in the heavyweight class. Each is clever and a satisfactory exhibition likely will be the result of the meeting between them.

METHODIST PREACHERS' MEETING.

The Copper Country Methodist Preachers' association will hold its regular monthly meeting at Grace church in Houghton this forenoon. Rev. Frank Miner of Dollar Bay and Rev. J. H. DeLay of Trinity will be the speakers. Mr. Miner will read a paper on "The Son of God," while Mr. DeLay's paper will be entitled, "The Son of Man." Discussions will follow. Following the session the ministers and their ladies will dine at the Douglas House. Rev. Messrs. Miner and Ray will be the hosts. Rev. G. M. Thompson of Marquette, presiding elder for the district, will be in attendance.

MINING GOSSIP.

It is understood that the price paid by the Central for the Ardenian mill was \$225,000. The mill cost the Arcadian \$480,000. It is figured that the mill could not today be duplicated for less than \$600,000. At the Calumet & Bisbee, in the Warren (Ariz.) district, work is confined to the three drifts being extended on the 950-foot level. Two drifts, one north and the other west, are in a distance of sixty feet. In the first few feet considerable water was encountered, but the work is now progressing rapidly and the water is not giving much trouble. Some important news is expected from Calumet & Bisbee before many weeks have passed, as one of the drifts is making rapidly toward the large ore body opened at the Lake Superior & Pittsburg. Advice from the Calumet & Coehne is to the effect that the shaft is penetrating an encouraging formation which is heavily charged with iron. Sinking is progressing rapidly and it is now down to a depth of nearly 1,000 feet. It is expected that the diamond drill will arrive at the property shortly and it will be placed in commission underground immediately. Drifting is now under way on the 1,800-foot level of the Lake Superior & Pittsburg, at Bisbee, Ariz., to connect Nos. 2 and 3 shafts, which are about 750 feet apart. It is a well known fact that the ore body already exposed on this property is over 275 feet wide. In the center of this body of rich ore a winze is being sunk, and at a depth of thirty feet it is still in ore. Forty feet distant from the winze a force of miners is at work in a raise, where red oxide ore is opened averaging from 12 to 14 per cent copper.

COPPERDOM BREVITIES. Joseph Hodgson of Houghton left yesterday for Bisbee, Ariz. The Houghton Gun club indulged in a regular practice shoot yesterday morning. John E. Schwartz of Houghton, until recently the Calumet correspondent of the Mining Gazette, has taken a position as billing clerk in the Copper Range depot. Charles Borst is the fourth candidate to announce himself for the office of treasurer of the city of Hancock. He is the manager of the Hancock branch Nos. 2 and 3 shafts, which are about 750 feet apart. It is a well known fact that the ore body already exposed on this property is over 275 feet wide. In the center of this body of rich ore a winze is being sunk, and at a depth of thirty feet it is still in ore. Forty feet distant from the winze a force of miners is at work in a raise, where red oxide ore is opened averaging from 12 to 14 per cent copper. E. S. Averill of Chicago, general superintendent of the United States Express company, was a Houghton business visitor Saturday, inspecting the branch office of the company in the Dee block on Sheldon street. The Crystal Palace Bakery company, which has been conducted by A. E. Eddy and Charles Gunther in the Lutey building on Sheldon street, Houghton, has suspended business temporarily. The floral business will be continued as usual. The dates for the annual St. Joseph's church fair have been set. The fair will hold forth at the Lake Linden Opera House on Feb. 14, 15 and 16. Besides the numerous booths of fancy and useful articles the usual contests will be features. Entertainment of a varied nature will be arranged for each evening. Miss Lettie Gugin, daughter of Mr. and Mrs. James Gugin of Prede, and John M. Kaiser of Painesdale will be married Wednesday morning. The ceremony will be performed in the Catholic church at Atlantic by Rev. Father Richter. A reception will be held at the home of the parents of the bride in the evening. Justice Brand of Houghton on Saturday suspended sentence in the case of Isaac Linna of Trumount, arrested for non-support, on the promise that he would support his wife and children hereafter. Judge Brand secured employment for him at the Trumount mine and Linna left the court room to go to work. It is said that his wife and six children have been in needy circumstances for the past two weeks. HOMESEKERS' EXCURSIONS. Chicago, Milwaukee & St. Paul Railway, at Very Low Rates. On the first and third Tuesday of each month, December to April, 1904, inclusive, round trip tickets good for twenty-one days to points West and southwest for about one fare. For full particulars regarding rates, territory, etc., inquire H. E. STEWART, C. A. Phone, 339. Houghton, Mich.

RUSSIAN NOTE NOT YET READY

ANOTHER DELAY HAS OCCURRED IN FRAMING THE RESPONSE TO JAPAN.

CZAR HAS STILL TO APPROVE

FINAL ACTION NOT TO BE TAKEN FOR SEVERAL DAYS.

Fact Is Interpreted as Improving the Situation, Indicating That Extreme Efforts Are Being Made to Make the Answer Satisfactory.

Paris, Jan. 31.—Another delay has occurred in framing and forwarding the Russian answer to the latest Japanese note, and this will result in further averting the culmination of the crisis until the middle or latter part of the week.

THE LARGEST POLICY

ever written on a single life was placed as a result of the fullest investigation,—in The Mutual Life Insurance Company of New York.

A western business man took six months to determine where to place this policy of \$1,000,000, and it was written at no more proportionate risk than is assumed on a policy of \$1,000.

The history of this policy is interesting reading, and is described in "The Largest Annual Premium." This pamphlet is sent on application.

This company ranks First in Assets, First in Amount Paid Policy-holders, First in Age.

THE MUTUAL LIFE INSURANCE COMPANY OF NEW YORK, RICHARD A. MCCURDY, President.

R. S. DONALDSON, Manager, Marquette, Mich.

MAU

FURS are distinctively lustrous and beautiful, the workmanship the most perfect possible and the "style" assured.

Many of the best people of many States find it greatly to their interest to place their order with MAU in preference to any foreign or other American furrier.

A handsomely illustrated Catalogue of the goods is mailed free to any address.

STEEL STOCKS WEAK

This Had a Bad Effect on the General Market Saturday.

Paine, Webber & Co. said of the Boston market: "The bank statement showed a decrease in reserve, but was by no means a bad statement. There was a large increase in deposits and a gain of almost a million in cash. The worst feature of the market was the weakness of the Steel stocks. However, prices were an average of only about one-eighth lower. Amalgamated was hammered by bears, but they made very little progress in their attempt to depress the stock. We don't feel that the market will go much, if any, lower. At this level we would rather buy than sell."

The market was the same dull affair, without any feature. The trading in United States Mining and Utah and Amalgamated. We advise any trading to be in these stocks, as they have the broadest market and will be the first to go up. The metal was 12 3/4, with nothing doing."

Closing prices Saturday at Boston are reported by Paine, Webber & Co. as follows:

City Brevities

Yesterday's temperature: Seven a. m., 9 degrees above; noon, 7 above; 7 p. m., 3 below. Maximum, 9 degrees above; minimum, 3 below.

Mrs. Hanson and Miss Hanson leave this week for Washington, D. C., where they will spend several weeks.

Mrs. J. M. Hayden, who has been visiting her mother, Mrs. Williams, for a number of days, left for her home at Ravenswood, Ill., Saturday evening.

The warden of the prison and W. D. Calverley, of the board of control, will leave for Lansing Tuesday to submit the plan for the new cigar shop to the governor and board of auditors.

Mr. and Mrs. A. D. Campbell, Prospect street, were tendered a highly enjoyable surprise by a party of friends Saturday evening. Among the guests in attendance were Mr. and Mrs. Wellington Washburn, of Hancock.

There has been considerable skating on the bay the past few days. The harbor is pretty well clogged with rough drift ice, but there are left a number of places where the skaters can get a full sweep. The ice, where it is smooth, is in good condition.

Father J. G. Pinton arrived home the latter part of last week from a several days' visit at Davenport, Ia., and other points in that state. He went there to meet a number of former fellow students at Rome, whom he had not seen for some time.

Governor Bliss has granted paroles to Jerome Massey and Arthur Skillings, convicts at the Marquette branch of state prison who were recommended by the board of control a few weeks ago for executive clemency. They are both young fellows, and were sent up from Dickinson county in January, 1902, for larceny from the person.

Upper Peninsula council of the United Commercial Travelers delightfully entertained a considerable number of its friends at Fraternity Hall Saturday evening, the occasion being the second of the traveling men's series of hops. Dancing began at 8:30 and continued until nearly twelve. Four pieces of the ideal orchestra furnished music.

Chairman Walter Fitch, of the board of supervisors, and Prosecuting Attorney Bell were here Saturday executing the county bonds recently sold to the First Trust and Savings Bank of Chicago. They have been forwarded, together with a draft for the amount due the county on account of the sale, and the cash is expected within a few days.

James Reynolds and John Anderson, former convicts at the Marquette prison, who are suspected of entering the Escanaba postoffice and other upper peninsula robberies last year, are to have an examination at Escanaba today on a burglary charge, on which they were rearrested when the charge of grand larceny was dropped some weeks ago.

There is believed to be the guilty of the pair's guilt, but the officers are having much trouble proving it.

J. E. Burtless, who has represented the Woolson Spice company of Toledo for some time, looking after the business of the concern in the upper peninsula, has resigned the position to accept a similar place with the W. W. Veir & Co., teas and coffees, of New York. His territory will embrace Northern Michigan and the northern and eastern portions of Wisconsin. Mr. Burtless' many friends will be pleased to know that he will continue to make Marquette his headquarters.

The Marquette in-door baseball team will meet a nine from Marquette at that city Friday and Saturday of this week. The Marquette nine will be composed of good ball players and they will go down hopeful of making a good showing, although they realize that they will be under a bad handicap on account of having had no place for practice during the present season. The game has been held in Marquette, although there is still a great deal of interest taken in it here.

A. F. Koepcke attended the meeting of the Northwestern Theater Managers' association Friday. The only changes in the corps of officers was the selection of P. B. Haber of Fond du Lac, Wis., as secretary and treasurer, he having formerly been a member of the board of managers. His place on this board was given to C. D. Moon of Eau Claire, Wis. The association held an all day session. Mr. Koepcke says that the managers in attendance generally complained of unusually poor business this season, so that light houses are not the rule on the upper peninsula alone.

Grandpa—"I feel like a youngster, like a youth of 20 years, strong and healthy. I lay it all to Hollister's Rocky Mountain Tea." Good for the aged and infirm. 35 cents, tea or tablets. Stafford Drug Co.

Ask your grocer today for a sack of Gold Medal Flour.

Stafford's offers many good bargains in their 20 cent off sale of china. (1-4-f)

Gold Medal Flour is not like other flour, it is better.

Like a Comet

This famous remedy does for the stomach what which it is unable to do for itself, even if but slightly disordered or overburdened.

Kodol

supplies the natural juices of digestion and does the work of the stomach, relaxing the nervous tension, while the inflamed muscles and membranes of that organ are allowed to rest and heal. It cures indigestion, flatulence, palpitation of the heart, nervous dyspepsia and all stomach troubles by cleansing, purifying and strengthening the glands and membranes of the stomach and digestive organs.

Kodol Dyspepsia Cure

Your Dealer Can Supply You. Sold by Diamond Drug Co., Marquette, and R. A. Melocher of Ishpeming.

Ishpeming Department

PASCOE HOUSE FIRE.

Leading Hotel at Republic Burned to the Ground Saturday Morning.

The Pascoe House fire, briefly mentioned in Saturday's issue of The Mining Journal, created much excitement in the village, particularly after the flames the steamer got out, when the entire business district was threatened.

It is the opinion of all Republic people that the blaze was of incendiary origin, and reports last evening were to the effect that a certain party is suspected and that there is liable to be an arrest today.

Started in Vegetable Room.

Will Tobin, agent of the Chicago & Northwestern station at Republic, a boarder at the hotel, discovered the blaze. The members of a social club, some forty or more people of the town, were using the dining room and parlors on the second floor. Mr. Tobin had been over to Mrs. Fountain's confectionery store, and upon his arrival at the hotel office down stairs a few minutes to 12 o'clock he detected smoke. Observing that it was coming from the stove he immediately began an investigation. As soon as he opened the door leading to the vegetable room he discovered the blaze. He at once turned in an alarm. Mr. Rowland, the proprietor, was then found and advised of the fire. He coolly went upstairs to tell the guests that there was a blaze, and instructed them to put on their wraps without creating a panic and leave the building. Mrs. Rowland began handling the wraps out and helped her guests to put them on.

Mr. Rowland ran to the bedrooms to arouse the boarders and commercial men. He succeeded in getting all up, but some of them had barely time enough to get on their clothes. Miss Bertha Wright, principal of the high school, had a close call. Before her room could be entered the fire had reached the upper floors and was burning fiercely. She was carried out in her night robe, and none of her clothing, jewelry or other effects were saved.

Steamer Flues Give Out.

The flues of the steamer gave out just about the time the fire was under control. It then looked as though every business block in the neighborhood would go down. The fire was extremely hot, and had it not been for the excellent work of the firemen and the night shift men at the mine some of the buildings across the street would have been destroyed. The stores were thrown open and bucket brigades formed. Water was passed in several lines and was thrown against Jake Scholtzen's place and other neighboring buildings. Scholtzen's structure was badly scorched. The chief reason for the fire was the flues of the steamer. Chief Lacey of the Ishpeming department was reached by telephone and asked to send up an engine and other fire fighting apparatus. The chief responded, and within an hour or so the Ishpeming men were almost ready to leave by special train. By this time it was seen at Republic that the hotel and barn adjoining would be the only buildings destroyed, so the Ishpeming firemen were advised that their services were not needed.

Rowland Lost Everything.

About the only thing the Rowland family saved was the clothes they wore. Practically all of their furniture and effects went up in smoke. There was no time to get out bulky articles. The piano, which has been in the house for years, was also being saved. Mrs. Gauthier, who conducted the hotel up to a couple of months ago, when the Rowlands took it, had a lot of furniture in the house. A part of her outfit was stored in the upper story, but most of it was being saved. The Gary estate, owners of the building, also owned part of the furniture. Among the boarders the heaviest individual losers were Miss Wright and Mr. Tobin. The latter lost all his clothes and a fine new carpet. Mr. Rowland took the instrument from Mr. Tobin's room, but placed it on a dining room table, and did not have another chance to get it. A Finnish servant girl lost \$65 in currency, besides her clothing.

The hotel was insured in the Miners' National Bank agency.

John McCull, who has charge of the insurance business, was in Republic Saturday. Adjusters are expected this evening.

Take the Evenson Hotel.

The Rowland family will continue in the hotel business. Saturday they leased the Evenson House, which is now the only hotel in town. They have demonstrated during the few weeks they managed the Pascoe that they know how to conduct a hotel properly. All the boarders and transient patrons have had kind words for them.

Joseph Vidal, who recently leased the saloon in the Pascoe House, lost all his furniture, fixtures and stock.

Joe was doing well and it is possible that he will rent another place and continue in business.

'Phone Station Burned Out.

The Bell Telephone company's station was in the Pascoe House, being in charge of Miss Flossie Rowland. Manager Baker had been on the ground Saturday repairing the damaged wires and getting ready for a new start. The station will be located in the Evenson Hotel.

NOTHING EQUALS CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

Dr. P. R. Spear, of Pinchard, Ala., has become acquainted with the good qualities of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He uses it in his own family and in his practice. He says: "It beats any medicine I have ever seen for all bowel complaints. I do not think of recommending any other, and also use it with my own children."

STAFFORD DRUG CO., MICHIGAN, NEGAUNA.

A THOUSAND DOLLARS THROWN AWAY.

Mr. W. W. Baker, of Plainview, Neb., writes: "My wife had lung trouble for over fifteen years. We tried a number of doctors and spent over a thousand dollars without any relief. She was very low and I lost all hope, when a friend suggested trying Foley's Honey and Tar, which I did, and thanks to it, this great remedy, it saved her life. She is stronger and enjoys better health than she has ever known in ten years. We shall never be without Foley's Honey and Tar and would ask those afflicted to try it." Desjardins' Pharmacy.

A NIGHT ALARM.

Worse than an alarm of fire at night is the brassy cough of croup, which sounds like the children's death knell and it means death unless something is done quickly. Foley's Honey and Tar never fails to give instant relief and quickly cures the worst forms of croup. Mrs. P. L. Corlier, of Mannington, Ky., writes: "My three year old girl had a severe case of croup; the doctor said she could not live. I got a bottle of Foley's Honey and Tar, the first dose gave quick relief and saved her life." Refuse substitutes. Desjardins' Pharmacy.

ISHPMEMING IN BRIEF.

A son was born yesterday to George E. Myer and wife. Mrs. T. D. Dawson went to Houghton Saturday, on a visit to her daughter, Mrs. M. W. Youngs.

The Ishpeming Light Guard band held its first practice yesterday in the Swedish Home society's hall. Sixteen men were present.

Rev. Gust Anderson, pastor of the Swedish Mission church, has been absent from the city the past few days. He is at Ashland.

The funeral of the late Selbert Asgaard, who died Thursday, was held yesterday afternoon from the Norwegian Lutheran church, under direction of the Scandinavian society.

Ed. Coughlin left Saturday evening for Munising, where he will take a position as brakeman on the Munising line. He will return to his old job with the Lake Superior & Ishpeming Railway company in the spring.

Sister Annie, who has been at the local convent for a number of years past, left Saturday for Marquette, where she will be stationed. She is a favorite with the children.

The ladies of St. John's church are asked to attend a meeting tomorrow evening at 7:30 o'clock at the sacristy for the purpose of completing arrangements for a social to be given for the benefit of the church. The pastor will be pleased to see a very large attendance.

Ann Arbor correspondence in yesterday's issue of the Chicago Record-Herald states that the Michigan State University high school scholars are now attending the state university, as a very likely man in the pole vault. He is making over ten feet without difficulty, and is expected to develop in this event in a satisfactory manner.

MANCURIA AN EMPIRE.

Has Area of 370,000 Square Miles and Population of 8,500,000.

Mancuria is larger than Texas, plus twice the area of New York state. It embraces about 370,000 square miles. Its density of population is no greater than that of the United States if the census of 1902, giving it 8,500,000 inhabitants, is approximately accurate. Two-thirds of it, the northern half and a broad belt on the eastern edge, is mountainous, with rich valleys along the rivers and untold mineral wealth still locked up in the mountain strata. The development among the mountains and to the south and west of them are broad reaches of prairie lands, not so extensive as those of the upper Mississippi, but apparently just as favorable for cultivation; the extreme west is invaded by the waste of the Gobi desert. The development in the southern third of the empire, where the population is most dense, markets are most accessible, and agricultural pursuits are most easily carried on.

If we examine this region with some care and with the aid of a good large scale map, we shall find that other explorers have made possible, we observe some interesting things to which attention has not generally been called. The railroad and its southern branch, for example, have a noteworthy peculiarity. Where they follow the valleys through the mountain regions their course is necessarily tortuous, whereas where they have a level exposure before them they stretch away as straight as a line drawn on paper along a ruled edge. Some of these pieces of straightway tracks are over 100 miles in length, as those between the Cosack river and Harbin and the upper Sangari on the southern branch.

The roads do not touch the large towns like Tschihar, Kirin, and Newchwang, but cross the country without reference to the native settlements. This was in accordance with the stipulation that the large towns should be avoided, but it was agreed that the southern branch might pass through the environs of Mukden, and a branch now connects the port of Newchwang with the main line.

Many place names are found dotted along the tracks. Most of them represent nothing more than the posts of the Cosack troops, with their low, whitewashed houses, their rude stockade, and the high tower on which a Cosack is always surveying the surroundings. These posts are planted along the whole stretch of the railroad, and from the Russian point of view the Cosacks are the best possible guards they could place over the lines.

There are many Russian immigrants at the larger railroad stations, and Harbin, with 9,000 inhabitants, is the heart of Manchuria, as much a Russian town as Dally, created by imperial edict, is.

Mancuria is no longer the country of their race was, extended over China, before nearly three years ago, millions of them have been drawn to China to fill the garrisons of Pekin and all the principal towns. Their alien men have gone to China to take important positions under the government; and besides this stream of Manchu immigration has followed a counter current of Chinese immigration which has invaded Manchuria till the Chinese carry on nearly all the business of the country and swarm in every corner of population. It is chiefly the Chinese who are cultivating the wide areas of fertile land. One of the best writers speaks of the Manchus as a fading race; another believes that they form only about one-tenth of the population, but this is probably an underestimate.

Peo regions are better endowed with natural wealth. If the Russifying process is to continue, one of the finest plums in the Chinese empire will fall into the open mouth of Russia. The traveler scarcely sees an acre of prairie or valley that is not planted, that does not flourish with profitable crops kept free from every weed. As the Italian peasant stream over to Argentina, and the strong young men of Ontario throng to Manitoba for the harvest, so many thousands of Chinese swarm to Manchuria to help when the crops are gathered, returning home at the end of the season.

Since the war between China and Japan the island empire has become the largest foreign market for Manchurian produce. The exports to Japan exceed the shipments to southern China, and the Japanese have been trying hard, and with considerable success, to push their manufactures where they are buying freely.—New York Sun.

CARD OF THANKS.

Permit me to express my gratitude to the many friends who were so constantly kind and helpful during the long illness of my husband. Let me thank all and particularly the members of the A. O. U. W. for their many courtesies.

Iron Notes

The Marinette Eagle-Star says that an "iron mine is to be opened up on lands owned by Holmes & Son, west of Dunbar, in the spring, explorations in progress there for some months indicating to the parties interested that there are valuable deposits of good quality of ore. The parties interested have been conducting their explorations quietly and make claims of a good discovery. Little work will be done this winter, but in the spring a shaft will be sunk. Test pits were sunk and the explorations conducted under the direction of efficient mining engineers. The ore was found near the surface in large quantities. The body of ore is deep, the experts have reason to believe, and assays show high grade."

The Gust Carlson exploring company of Hibbing has a crew of men exploring on the extreme northern edge of the Mesaba range district for iron ore deposits. The operations of the crew are being conducted at a point a mile north of here on timber lands cleared by the Swan River Logging company. The explorations are being made for P. H. Nelson of the Swan River company. Both diamond and churn drills are being used. The result of the test pitting as far as completed has not yet been made known. The exploration operations are based upon the same assumption with regard to the extent of the iron ore formations as prompted the exploration of the Turney eighty near Wolf. The geological map does not show that the iron belt extends as far north as the property upon which the Nelson explorations are being made.

A leading interest in the steel trade states that the improvement now noticeable in many lines of finished products and which has resulted in a reduction of over 70 per cent in starting up the country is not essentially a temporary movement. It is admitted that a fair percentage of the new orders is for early delivery and from consumers who have been for months buying only when necessity compelled them, but a still greater percentage of the new orders is coming from the general trade in the usual way and is indicative of better business conditions. The most suggestive feature of the slowly expanding volume of business is the increasing stability of demand for bridge and structural steel, plates and heavy finished materials, which, along with steel rails, have sustained for months the brunt of the decrease in consumption. While the interest herein quoted expressly disclaims belief in an early boom or return to the conditions of 1902, yet the facts show business vastly better than in October, November or December of 1903.

The damage by fire at the Elizabeth shaft of the Crete Mining company, at Hibbing, Mesaba range, following the discovery which the lives of three men were imperiled, is not so great as was at first supposed. The method adopted to fight the fire proved most effective and the big timber lagging, holding back the heavy burden of earth from the shaft casing and walls was not reached by the flames. Two or three sections of casing at several of the ledgers leading down the shaft were destroyed and that alone constituted the total damage. The water sources in the mine are all more than one hundred feet deep. In order to operate and sink the shaft the miners have been obliged to keep pumps running regularly night and day. When the fire was discovered and the three men safely rescued the pumping was discontinued and the shaft allowed to fill with the water. More than one hundred feet of water seeped into the mine before it was thought the fire had been thoroughly extinguished. The water line was then lost to forty feet from the mouth of the shaft. Great difficulty has been encountered with water and quicksand in sinking the new shaft for the Pickands-Mather concern. It was feared that the mine might be unfit for resumption of work as a result of the fire and the first reports were to the effect that it had destroyed all woodwork in the mine. If such had been the case the quicksand and slime now held back by the timber structure would have caved in and filled the shaft. Such a calamity was, however, averted by allowing the water to come into the mine and smooth out the fire. It has been expected that the Elizabeth mine, which is an entirely new property, would be among the early shippers of the season. Sam-

WANTED—Competent girl for general household work. Apply to Mrs. J. H. Andrus, 612 North Pine street. (1-30-3d)

FOR SALE—House and lot, 715 North Main street. Eight-room-house, with modern conveniences; large corner lot. Axel Holter. (1-29-1w)

The tremendous pressure that is being brought to bear upon members of the steel rail pool to induce them to lower prices below \$28 per ton has had the beneficial effect at least of promoting a general inquiry as to what extent the present price of rails has checked consumption in other iron and steel lines. At this time the members of the pool have not publicly changed their views that rails should be maintained at \$28, but there comes from various other sources reports of growing sentiment among the rail men that the railroads should be brought back into the ranks of active consumers. As it is definitely understood that Edward H. Harriman and the powerful movement he represents in the movement for rails at reduced prices insist upon a reduction of \$2 to \$4 per ton, it is suggestive of a possible change in attitude that the rail pool has instituted an inquiry as to increased demand for rails to be expected from a cut. The statement is made by railroad interests that for every ton of steel rails made under a lower scale, there would be at least three tons of other iron and steel products which otherwise would not be ordered. As Mr. Harriman is understood to have promised orders for not less than 1,000,000 tons of rails, if the price should be reduced, it follows, therefore, that if the other estimate is approximately correct, a reduction in rails would give to steel companies probably 4,000,000 tons of new orders. Such additional tonnage added to the present volume of trade would mean increased activity in all branches of steel and iron making and could be secured, if the promises were carried out, at a net loss on steel rail profits probably not exceeding \$2,000,000, while the profits from the new business would aggregate many millions.

SPENCER AND LUNATIC.

Great Psychologist But of Unfortunate Jokes

To the late Herbert Spencer the minds of lunatics had an odd fascination. Spencer was a frequent visitor to a number of asylums, and he would never laugh so heartily as when recounting some unconscious witicism of a lunatic. "Sometimes he would tell of the criticism a lunatic woman made on a sermon that was preached in her asylum. This criticism was brief, but it was telling: "To think," said the woman, pointing toward the clergyman, "to think of him out and me in."

On another occasion Spencer and a friend were walking toward an asylum they proposed to visit. Their way led them across a railroad, and a cow near the track they saw a young man reading. This young man was a lunatic, but they did not know it at the time. "My friend," said Spencer, pausing, "where does this railroad go to?" "The lunatic looked up from his book and gave his interrogator a long stare of scorn. Then he replied: "Where doesn't it go anywhere? We keep it here to run trains on."—Chicago Record-Herald.

TO CURE A COLD IN ONE DAY Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

WHILE THERE IS LIFE THERE IS HOPE.

I was afflicted with catarrh; could neither taste nor smell and could hear but little. Ely's Cream Balm cured it.—A. Marcus G. Shantz, Rahway, N. J.

—Cream Balm reached me safely and the effect is surprising. As my own says the first application gave decided relief. Respectfully, Mrs. Franklin Freeman, Dover, N. H.

The Balm does not irritate or cause sneezing. Sold by druggists at 50 cts. or mailed by Ely Brothers, 56 Warren St., New York.

Negaunee Department

MRS. HANSEN'S ANTICS. ALBERT JOHNSON DEAD.

Insane Woman Disrobed on Iron Street, and Then Donned New Garments. Second Member of the Family to Pass Away in Three Weeks.

Mrs. Louis Hansen, a well-known Negaunee woman whose mind has been unbalanced for some years, created a stir on Iron street Friday afternoon. One of her dresses was taken from her, and she was put in a strait jacket.

HIGH SCHOOL ENTERTAINMENT.

Appropriate Program Will Be Given at Opera House Feb. 12.

Mrs. Marden, instructor of music in the Negaunee schools, is preparing for an entertainment to be given by the pupils at the opera house on Feb. 12.

EXCELLENT ART WORK.

Superintendent Orr Schultz informs The Mining Journal that the children of the schools are doing excellent work in Japanese and water color paintings.

WILL VISIT THE WEST.

Hon. Alexander Maitland and wife will spend the next few weeks in the West, possibly visiting California before returning to Chicago.

BEGLE'S SUCCESSOR NAMED.

R. W. Pattinell, late of South Dakota, has been engaged by the board of education to succeed N. G. Begle as principal of the Negaunee high school.

PERFECT CONFIDENCE.

Where there used to be a feeling of uneasiness and worry in the household when a child showed symptoms of croup, there is now perfect confidence.

JOHN D. CHUBB, ARCHITECT.

MARQUETTE, MICH. 818 CHICAGO OPERA HOUSE BUILDING.

THE PICTURESQUE VANDERBILT.

New Move in His Campaign for Beet Sugar.

Perhaps the most novel propaganda ever carried on by a big business man has been started by Henry F. Oxnard, the beet sugar king.

It will be recalled that some years ago he led the fight against the annexation of Hawaii, and later still he fought that of Cuba and the Philippines.

This is perhaps the most picturesque move of a very picturesque career. For, Albert Johnson was about thirty years of age, a quiet, unassuming fellow, but a very good business man, and popular.

CITY TEAM DOWNED.

The Negaunee city team lost its first game on the local diamond at the rink Saturday evening to the Unions.

EXCELLENT ART WORK.

Superintendent Orr Schultz informs The Mining Journal that the children of the schools are doing excellent work in Japanese and water color paintings.

WILL CONDUCT A FAIR.

The ladies of the Mitchell Methodist church have decided to conduct a fair some time in April, likely during the first week of the month.

LOCAL LACONICS.

A regular monthly meeting of No. 1 hose company will be held this evening.

The city council will meet in regular monthly session Thursday evening of this week.

John Makinen, formerly in the pop business here and at Ishpeiming, is in the city on a few days' visit.

The members of the Young People's society of the Methodist church entertained a large number at their anniversary Friday evening.

The International Bioscope company will entertain patrons of McDonald's opera house tonight with a motion picture.

Max Hirschowitz, who has been in business here off and on for some years, says that he will soon leave for the lower peninsula, where he will locate permanently.

Henry Wild has purchased the business formerly conducted by Benyas & Co. in the Caples block, Iron street.

MEXICAN SENORITAS.

Traditions and Habits of the Young Women.

The senorita is a word with which to conjure in Spanish speaking lands; and the Mexican senoritas are inferior in charms to her Spanish sister.

In fact, most of the upper class of Mexico is distinctly Spanish in appearance and bearing.

Often, however, there is slight mixture of Indian blood in the "white race" of Mexico, which very rarely detracts from the charm of the senorita.

Senorita signifies in Spanish a young unmarried lady.

In the past the ideas of Mexico with respect to women and especially young unmarried ladies, have been more Moorish than anything else.

These ideas prevail still to a great extent. Therefore, the habits of Mexican women are very different from those of women in the United States or England.

On account of excluding women of all ages as much as possible from appearing alone in the public streets, and of more or less isolating them within their own family, there grew up in Spain and in Mexico, among the middle and upper classes, the custom of all the windows of the houses facing the street for observation stations.

This was a long step in the advancement of women from the intolerant ideas of the Moors.

In Mexico in the cool of the evening, the windows of all the houses are opened along the streets, and hundreds of ladies, principally the young ones, appear there to view the carriages that pass by and to nod to their friends and thus keep in touch with a world into which they are likely to come in much closer contact for the young men, or old, for that matter, do not make a habit of visiting the families of their friends, and young men have to do their courting from outside the houses.

Most of the houses in Mexico were, but a short time ago, provided with windows of heavy barred iron.

Through these the lovers saw one another. And although many of the modern houses are without these bars to the windows, the custom of making love from the window is still preserved.

A young girl in Mexico could not commit a greater crime against social usage than to appear on the street alone with a man not of her own family.

She understands this, and she is careful not to go out of the house to see her lover, even though the windows have no bars—Modern Mexico.

A GUARANTEED CURE FOR PILES.

Itching, Bleeding, or Protruding Piles. You cannot wait for money. PAZO OINTMENT fails to cure you, in 6 to 14 days.

Winter coughs are apt to result in consumption if neglected. They can be soon broken up by using Foley's Honey and Tar. Desjardins' Pharmacy.

CINNAMON OF CIGAR BOXES.

And Baking Powder of Ground Rock—Some Adulterations of Food.

"Do have some cinnamon made of cigar boxes," said Dr. DeGuzne, chemist of the department of health, jokingly to a stranger who was paying a visit to the laboratory.

"That's what it is—nothing else but cigar boxes," he repeated, still smiling as he saw incredulity on the other's face. And so it proved on examination.

"What did you do about it?" asked the visitor. "I threw it out," answered the chemist, "the makers were down in Tennessee and we couldn't get it there. When we found out the fake they had gone out of business and disappeared."

"Just look at this, though," continued the chemist, as he took from the shelf a box labeled "honey." "What do you think that is? Nothing in the world but glucose and paraffin, with maybe a little flavoring. Why, four-fifths of the honey here in New York has never been a real bee honey than I am to New Jersey this minute."

From a bottle containing several dozen perfectly formed coffee beans Dr. DeGuzne took three, and four and displayed them in the palm of his hand.

"Sweep out the palm of your hand, and the proper liquids, cover with a coloring preparation—there you have your coffee. Good recipe, isn't it? By a little detective work we traced this stuff back to a small grocery store in New York and proved conclusively that it had been made of bakhouse sweepings.

He visited factory after factory, he looked at farms where the beets were grown, he even helped in the harvest, so that he would gain knowledge of the soil, the crop and the condition of raising a crop that can only be gathered from the field hands that sweat under the summer sun.

He found that he must have a suitable climate in the United States in which to grow his beets.

So, selecting from his agricultural friends three families that he had known for some time, he went to them and told them to come to America and just travel around until they found the climate and the soil that would be suitable for the growing of beets.

This they did, and in the far west they found what they wanted. They promptly returned to their land and started them in the beet raising business. Then he started to build his factories and put his product on the market.

"You will fail," said a friend to him. "The sugar trust will be too strong for you. You are not a business man."

"I cannot fail," he replied briefly. When pressed for his reasons he gave them in this manner.

"The world needs and uses far more sugar than can be produced from sugar cane. Therefore the people must come to the beet sugar industry, and that they cannot buy from the refiners of cane sugar."

How true this was was shown in 1900, when the world ate 23,900,400,000 pounds of sugar, and of that amount 15,366,400,000 pounds came from the sugar beet.

Of this amount 15,366,400,000 pounds were taken from packages which the chemist had had occasion to examine.

They showed varied evasions of the pure food laws. There is a statute requiring manufacturers to state on a label every foreign substance put into a food. Some comply with this rule by describing the chemicals in such small letters that it nearly takes a microscope to read them.

Consequently thousands of people buy jellies, preserves and such things and eat them, blissfully ignorant that chemical preservatives are not only in the food, but are described on the outside of the package the stuff comes in.

"Keep your eyes on the labels," was the parting advice of the chemist to his visitor. "Read the fine print—then eat the stuff if you want to."—New York Sun.

A WHOLE FAMILY.

Rev. L. A. Dunlap, of Mount Vernon, Mo., says:—"My children were afflicted with a cough resulting from measles, my wife with a cough that had kept her sleeping more or less for five years, and my White Wine of Tar Syrup has cured them all."

A state institution located in and making use of an active mining district. For Year Book giving list of graduates and their occupations, apply to President or Secretary, Houghton, Mich.

Attention Farmers.

Why remain in the North and stay in doors six months in the year consuming what you raise during the other six months?

Go South where you can work out doors every month in the year, and where you are producing something the year round. If you are a stock raiser you know your stock are not "eating their heads off" and, besides, have to be protected from the rigors of winter by expensive shelter.

Economical stock feeding requires the combination of both flesh-forming and fattening foods in certain proportions. Alabama and Florida produce in abundance the velvet bean and cassava, the first a flesh producer, and the latter a fat producer, and they are the cheapest and best fattening materials known to the world.

More money can be made and with less labor, in general farming, fruit and berry growing and truck gardening along our road in the South than in any other section of the Union.

If you are interested and desire further information on the subject, address G. A. PARK, General Industrial and Immigration Agent, LOUISVILLE & NASHVILLE R. R. LOUISVILLE, KY.

BIG AND LITTLE WELCOME HERE

Whether you buy a pound or ten, or a hundred times that much of groceries, you are just as welcome here. You will receive the same attention, the same courtesy, the same request to return. We look not for large patronage but constant custom, which we strive to merit by supplying first-class articles in a first-class way at reasonable figures.

Geo. Haupt's Grocery.

Whether you buy a pound or ten, or a hundred times that much of groceries, you are just as welcome here.

Bad Case of Diarrhea Cured.

Dan Garn of Three Rivers Tells a Remarkable Story.

Dan Garn of Three Rivers, Mich., and a well known railroad man, tells a remarkable story of his cure of army diarrhea, as follows:

In 1888, while at work as night man for the Michigan Central I was taken with a severe case of army diarrhea. When the train arrived the engineer appreciated my condition and gave me a good dose of Dr. Colwell's Magic Egyptian Oil; the effect was marvelous. It straightened me right out, and I have repeatedly used it in my family I can truly say that it is one of the best medicines on the market for bowel complaint or dysentery.

It only costs 50 cents to have a bottle sent round the house handy—and remember, every druggist in Michigan sells it and that every druggist is authorized to refund your purchase money on any bottle of Dr. Colwell's Magic Egyptian Oil that is not entirely satisfactory.

PROPOSALS. Applications to be received for the MICHIGAN STATE BOARD OF TRUSTEES OF THE MICHIGAN LAND GRANTS, at the Michigan State Building, Lansing, Mich., on and after Feb. 1st, 1904, for furnishing material and performing labor necessary for the creation of the following buildings:

One Administration Building. One Dormitory Building. One Factory Building.

Plans and specifications prepared by Clarence L. Cowles, Architect, Lansing, Mich. Said plans, specifications, drawings, etc., may be consulted at the office of Clarence L. Cowles, Architect, Lansing, Mich., and at the Michigan State Building, Lansing, Mich., on and after Feb. 1st, 1904.

Said proposals will be received at this office. Said proposals must be accompanied by a certified check for not less than 5% of the amount of bid. No bids considered unless accompanied with certified check. The above specified land reserves the right to reject any and all bids in part or entirety. J. P. HAMILTON, Secretary.

IN HIGH REGARD.

Deed Kaiser beer is justly considered the best beverage that can be consumed in conjunction with a roast or steak, because it is so satisfying and refreshing.

Satisfying for the reason that it's pure, palatable and never has had a drop of alcohol in it. Kaiser beer is a good beer to drink 365 days per annum.

U. P. Brewing Co., Marquette, Michigan.

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Fildner & Co., Elmhurst, N. Y., be sure and mention this paper.

DO NOT MAKE ANY MISTAKE, but remember the name, Swamp-Root. Dr. Fildner's Swamp-Root, and the address, Elmhurst, N. Y., on every bottle.

WILL IMPROVE
STONE SAWMILL

IMPORTANT WORK IN HAND AT
PLANT OF PORTAGE ENTRY
QUARRIES COMPANY.

CAPACITY TO BE DOUBLED

TWO NEW MACHINES FROM RUTLAND, VT., TO GO IN.

In Addition One of the Old Saws Will Be Completely Renovated—New Sand Pump and Boiler to Be Installed.

A stone quarry is ordinarily a very dead place at this season of the year, but a visit to the plant of the Portage Entry Quarries company at South Marquette shows a great deal of activity, despite the cold weather and the fact that no quarrying or sawing is being carried on. The management has a large force at work on extensive improvements.

Marquette is a distributing point for a great deal of sandstone from the Portage Entry quarries, being of central location and an excellent shipping point. Much sawing is done here in the course of a year and much finished stone is shipped out by rail. The stone is brought down from the quarries on scows, and in season a large quantity is quarried at South Marquette, where there is still a considerable available supply. The company has a sawing plant at the Portage Entry quarries, but it plans to do the largest part of this work at Marquette, and this will be more particularly true on the conclusion of the present improvements, when the local sandstone industry will be more important than ever before.

The present work is progressing at the sawmill, where the huge blocks are cut up for building operations, and is being carried on under the direction of W. G. Cooper, local manager for the Portage Lake Quarries company. It consists of a complete renovation of the plant, one which will greatly improve both its capacity and efficiency. There are at present in the mill two gang saws, which have seen many years' service. One of these gangs is being removed, and the other will be completely remodeled. Then the capacity of the plant will be more than doubled by putting in two new "twentieth century" gangs, the most improved stone sawing machines on the market.

An important feature of the improvements will be a modern sand pump, which will be employed to raise and distribute above the three gangs a continual flow of sand and water. This mixture, after falling on the blocks being sawed, falls onto the floor of the gang, V shaped, to be drained back to the pump and thus to be used over and over again a great many times. The sand pump will save the labor of two men at the mill, as hereafter one man will be able to take care of three gangs with less labor than was necessary for one gang under the old system.

The foundations for the new gangs are very substantial affairs, and appear to the visitor solid enough for a heavy building. They are made of concrete, and will assuredly be of a permanent nature. The new machinery is being

shipped from Rutland, Vt., and is expected within a few weeks. The improvements will also include a new boiler. Mr. Cooper informs The Mining Journal that he expects to have the new machinery installed and ready for operation by the first of April. He is confident that it will more than double the capacity of the old mill, besides admitting of faster, better and more economical work.

BOWLING NOTES.
Wolverines Lead in the City League by Nice Margin.

The week's play in the city bowling league resulted in the Wolverines settling into first place, with a very comfortable margin. This they accomplished by winning three straight games from the Magicians, a feat which gave them a hold on first place that promises to be good for some time to come. One peculiar thing to be noted in connection with the Wolverines' success is the fact that this team has not a single representative among the bowlers who are credited with averages better than 160. Good all-round team work seems to be its forte.

Another notable feature of the league play is the manner in which the tail-enders are strengthening their game as the season grows older. They are, apparently, just rounding into true form and now their opponents have to work for all they get, whereas previously they have been regarded as rather "easy marks." This change was evidenced last week by the performance of the Shamrocks in beating the Standards two out of three games and losing the third by but one pin. This performance was outdone, even by the Indians, who made it three straight from the Indians. This improvement of the tail-end teams is rapidly reducing the margin between the last teams and those in the first division, and if it continues for any time is liable to make the finish of the series very close and exciting.

Following are the team averages to date:

	P.	W.	L.	P.C.
Wolverines	36	23	13	639
Magicians	27	16	11	593
Standards	29	17	13	567
Superiors	30	17	13	567
Eagles	36	19	17	528
Shamrocks	30	12	18	400
Iroquois	36	14	22	389
Indians	30	11	19	370

The individual averages are:

	G.	Av.
Kimball, Eagles	36	183 24-36
Bowsher, Superiors	39	177 2-30
Hogan, Shamrocks	27	172 4-27
Anderson, G. Superiors	27	170 3-27
Herrmann, Magicians	30	168 21-30
Van Iderstine, Standards	30	168 15-30
Rose, S. Eagles	30	166 29-30
Plovnman, Indians	9	164 4-9
Cunningham, Magicians	29	162 22-29

Mr. LaCombe of Menominee broke the record for the Bowsher alleys Saturday evening, with 289 pins, an unusually fine score.

Last week on the Bowsher alleys were made no less than sixty scores of 200 or over, showing conclusively that Marquette bowlers are playing a pretty fast game.

Four doctors said I would die of stomach troubles and appendicitis; three packages of Hollister's Rocky Mountain Tea made me well and healthy.—Daniel Winston, Burlington, Vt. 35 cents, Stafford Drug Co.

MISS SHAY NOT MISS SHAY.
Understudy Had Her Place in the Cast of "The Bohemian Girl."

Inquiry Saturday confirmed a suspicion entertained by many people Friday night that the Miss Shay of "The Bohemian Girl" was not Miss Shay at all, but her understudy. Such was indeed the case, the part of the queen being sung by Miss Hattie Todd, while Miss Shay remained at her hotel. She might as well have been there. One Miss Shay would not have helped out Friday night. It would have required at least half a dozen Miss Shays to redeem the performance from hopeless mediocrity.

There was much condemnatory comment on "The Bohemian Girl" Saturday, and playgoers were generally of the opinion that it was the most flagrant case of "gold brick" that has ever been perpetrated on the local theater-supporting public. Miss Shay's absence from the cast only serves to make the whole affair more blame-worthy. The orchestra was of five pieces, and couldn't help itself. The leader, of whom so much was said, didn't lead, but allowed the opera to wander along in a listless sort of a fashion. It comes to be noted that the production works fail, and silence is the only safe recourse. It was a reasonably high priced bunco, too, as the victims on the main floor bought seats at the rate of \$1 and \$1.50.

Manager Koepeke, who was not in the city Friday night and who greatly regrets that the performance of the Shay company fell so far short of expectations, came down from Ishpeming yesterday morning, having gone up to consult with the management of the Shay organization. He says that the performance of "The Bohemian Girl" there appeared to give very fair satisfaction, and he is of the opinion that had the company done as well here there would have been much less fault found. For one thing Miss Shay sang. Then a new man was cast as Devilsfoot and Florestine was performed by another member of the organization. It is claimed that some of the company were left at the Soo, a fact which embarrassed it here. As far as is known no one who saw "The Bohemian Girl" in Marquette repeated the experiment at Ishpeming, but it can very readily be believed, that there was improvement.

BIG EXPENSE TO RAILROADS.
Cold Weather Caused Much Delay With All Traffic.

Seldom before in the history of railroads has the delay for traffic been so great and widespread as it was last week," said an officer of the South Shore road. "The roads in the East suffered more than we did in the West. Reports are that it was nearly as cold there as here and traffic was delayed on all sides. The severe cold was so widespread that it touched all portions of the country. The roads of the Northwest are better prepared for the cold spells and they did not suffer as much as those in the East, although all our trains were late and freight had to be hauled in much smaller quantities. In the East they were entirely unprepared for such a spell and consequently their loss was much more."

"The cold cost the railroads of the country millions of dollars. It was the cause of many accidents, was hard on motive power, meant a great increase in the amount of fuel necessary to haul a given amount of freight; much goods hauled by the companies was endangered and in many other ways the roads suffered severe losses."

"Snow delayed traffic, but we are never afraid of it for we can cope with it. Our line goes through the heaviest snow belt in the United States, but we are seldom delayed long by snow storms for we are prepared for them, but this severe cold is a different proposition. A peculiar frost forms on the rails and on

the wheels, which makes trains pull hard and slide. The oil in the journals quickly congeals or gums and causes friction. It takes three times as much coal to keep up steam and an engine which will ordinarily pull thirty loads is not good for more than twelve or fifteen.

WILL USE DIAMOND DRILL.
Marquette & Arizona Company to Try New Plan at Its Property.

The officers of the Marquette & Arizona company have decided to employ a diamond drill to pursue the further exploration of the property, and have ordered all work at the mine suspended for the time being, until the drill can be installed. It will be shipped at once to Arizona. Arrangements with a runner who will take charge of work have already been completed.

It is the purpose to operate the drill in the shaft, which is now 600 feet deep, and carries water for about the last 100 feet. The drill will be installed at water level, a standpipe run down to the bottom of the shaft and operations begun forthwith.

The advent of drills in the Warren district is something new. At first they were not looked upon with favor, the popular and general method of development being the sinking of shafts. One of the things that operated against the introduction of drills was the scarcity of water. Lately, however, the mining men have been turning to them as a comparatively cheap and effective means of exploration, and already several are at work. In addition the Sullivan company of Chicago has orders for a half dozen more to be set up in the Warren district.

The officers of the Marquette & Arizona company hope to have their drill set up within a few weeks, when work will again be pushed with the maximum speed.

MANISTIQUE MANAGER "RILED."
Says Soo News Man Made False Report of Baseball Games.

The manager of the Manistique baseball team has forwarded the following open letter to the Soo News to The Mining Journal, with a request that it be published, "in the interest of clean sport."

Gentlemen:—For unadulterated gall we think you have a king in the person who reported the two games of indoor baseball played here between the Soo club and the Manistiques. His report is not only false but ridiculous. The result of the first game was 13 to 12, in favor of the Soo team, not, as you reported it, 13 to 4, and if there is a truthful man in your team he cannot help but acknowledge that Manistique would have won but for the actions of the Manistique catcher, who has admitted that he threw the game, or, at least, wanted to make it as close as possible. The second game was won by Manistique by the score of 29 to 1, and if the two clubs played twenty games this score would be about an average. It was conceded by every outsider that saw the games that there was no comparison between the two teams. We have always had a friendly feeling toward the Soo, and have felt that you had the right kind of sportsmen, but if this is a sample we will be forced to change our minds. At the same time the writer knows that you have some true sportsmen who would not take any credit, or want any, through such misrepresentations as appeared in your reports of the two games of indoor baseball played here this week.

Yours truly,
PERRY G. WILLIAMS.
Manistique, Jan. 28.

Now is your chance to get china and cut glass at a bargain at Stafford's.
