One feature of the unusually severe winter that might well claim attensportsmen are apprehensive that there are few birds left alive in Michigan today. At the close of the open season last fall it was admitted that there were fewer birds than in former years and scores of sportsmen returned from their trips empty handed. If the present fears are well founded, there will be for a few years to come. Under these circumstances those most directly interested might well begin agitation in favor of making a closed season for several years, until the fields and forests again become well populated with bird life. The legislature does not meet until next January, but the matter should not be left until the last minute for recommendations.

The Northwestern Theater Managers' ssociation should get its "protection" bureau in working order. This is the part of the organization in which the general sublic is most interested, but, unfortunately, the part to which the least attention is paid. The managers are quick enough to let one another know when the show is good, but when it is careworn and poor they preserve an awful silence on the subject. Too often, also, it may be said, the newspapers assist no doubt that newspapers are too tolerant of trash on the contemporary stage. Attention Farmers.

Why remain in the North and stay in doors six months in the year consuming what you raise during the other six months?

Go South where you can work out doors every month in the year, and where you are producing something the year round. If you are a stock waser you know your stock are not "eating their heads off" and, besides, have to be protected from the rigors of winter by expensive shelter. Economical stock feeding

requires the combination of both fleshforming and fatforming foods in certain proportions. Alabama and Florida produce in abundance the velvet bean and cassava, the first a flesh producer, and the latter a fat producer, and they are the cheapest and best fattening materials known to the world. More money can be made

and with less labor, in general farming, fruit and berry growing and truck gardening along our road in the South than in any other section of the Union. If you are interested and desire further information on the subject, address

BEAUTY OF SKIN PURITY OF BLOOD

These Interesting

UP-TO-DATE METHODS

For Purifying and Beautifying the Skin, Scalp, Hair and Hands.

Socrates called beauty a short-lived tyranny, Plato a privilege of nature, Theocritus, a delightful prejudice, Theophrastus a silent cheat, Carneades a solitary kingdom, Homer a glorious gift of nature, Ovid a favor of the gods. Aristotle affirmed that beauty was better than all the letters of recommendation in the world, and yet none of these distinguished authorities is to be perpetuated, or the ravages of age and disease defied. Time soon blends the lily and the rose into the pallor of age, disease dots the fair face with cutaneous disfigurations and crimsons the Roman nose with unsightly flushes, moth, if not rust, corrupts the glory of eyes, teeth, and lips yet beautiful by defacing the complexion, and fills the sensitive soul with agony. If such be the unhappy condition of one afflicted with slight skin blemishes, what must be the feelings of those in whom torturing humors have for years run riot, covering the skin with scales and sores and charging the blood with poisonous elements to become a part of the system until death? It is in the treatment of torturing, disfiguring humors and affections of the skin, scalp and blood, with loss of hair, that the Cutlcura remedies have achieved their greatest success. Original in composition, scientifically compounded, absolutely pure, unchangeable in any climate, always ready, and agreeable to the most delicate and sen-

It was Dance set forth that while the inclusion of the \$10,000 was an error and undoubtedly would mean, if the petition was not granted, the taxation of \$10,000 not really possessed by the bank, the error was the bank's, and under the circumstances doubt was expressed as to whether the loss involved should properly devolve on the city. The assessment against the \$10,000 amounts to \$208, some \$70 of which is owing to the state and county.

Alderman Donovan objected to the course of the finance committee in oringing the matter into the council without | Beneficiary Returns Money Given Him recommendation. He said the committee had plenty of time to look into the justice of the petition, while the aldermen were not, on the spur of the moment, competent to consider it. It is not unlikely that the council will decide to set a good example for property owners in general by moving to comply with this regulation. Ordinarily there is no great need of an escape at the city half, but latterly the building has been used for school purposes. Frequently its third floor is packed, on account of conventions and caucuses. The council chamber is on the second floor, the height of the room being two stories.
