

Copper Country

COPPER COUNTRY MORTUARY. AFTER THE HOCKEY PENNANT. Fatal Kick by a Horse—Deaths in Calumet and Hancock.

The remains of August Niemi of Portage Lake were buried at that place yesterday afternoon. Niemi died in St. Joseph's hospital, Hancock, Thursday night as the result of an injury received by the kick of a horse. An operation failed of effect, and Niemi died after great suffering. He leaves a family.

The Portage Lake hockey team left Houghton Saturday afternoon on a trip which will definitely settle its claims to the championship of the International league. The team plays the Pittsburgh seven tomorrow night, Thursday night and Saturday night. If it wins one game from the Smoky City seven, it will have to win the two contests yet to be played with Calumet. Two games from Pittsburgh will clinch the championship, as it is a practical certainty that at least one of the Calumet games will go to Portage Lake. If Pittsburgh wins all three games, Pittsburgh wins the pennant which has hung from the grids of the Amphitheatron for the past year. This trip is thus an important one to Portage Lake, and the returns of the games will be eagerly awaited.

Copper Country Games. The Calumet and Canadian Soo teams will play tonight again in the Palestra at Laurium.

The Northern Hardware company team of Duluth will play the Houghton Juniors tomorrow and Wednesday nights at the Amphitheatron. The Duluth boys will arrive this morning, and tonight at Calumet they will witness for the first time a professional hockey game.

PROFESSIONALS IN CANADA.

Manager DeBus, of the Berlin Team Writes on the Situation.

Dr. Gibson of Houghton has received the following letter from George M. DeBus, manager of the Berlin (Ont.) hockey team:

Thousands Have Kidney Trouble and Never Suspect It. How To Find Out. Fill a bottle or common glass with your water and let it stand twenty-four hours...

There is comfort in the knowledge so often expressed, that Dr. Kilmor's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage.

ON NIGHT SHIFT. When the sun goes to sleep, an Electric Sign goes to work. How well it works successful merchants know. Get one to work for you.

handling by Young, Ridpath's goal-getting, and Lidfton's speed were the features of the Toronto team's play. Ridpath scored four, Marmichael two, and Lidfton one. For Berlin Dumart got four, Knell two, and Schmidt one.

AGASSI'S NARROW ESCAPE. President of the Calumet & Hecla, in a Wreck Near Porto Rico.

President Alexander Agassiz of the Calumet & Hecla Mining company is now on an expedition in southern Atlantic waters. Concerning an accident which came near interrupting his trip permanently, a New York dispatch says: The Virginia, chartered by Professor A. Agassiz, of Cambridge, Mass., for a scientific expedition, narrowly missed going to the bottom after striking a submerged wreck nine days out, according to official reports received here from Captain L. A. Jeffrey. The position of the Virginia was latitude 25.22, longitude 68.36, and the time 2:20 a. m. on Feb. 11.

Some of Professor Agassiz's party left here in the Virginia on Feb. 2. She touched at Charleston for the professor and other members of the expedition. The trip was to include the Windward and the Leeward islands. A moderate wind was blowing from the west-northwest when the yacht hit the wreck. A hard beam sea was rolling. One crash followed another. The first blow seemed to shove the wreck down and the second was the shock when the wreck rose against the yacht's bottom. This was followed by a tearing sound. Two blades of the steamers' propeller were broken off and the remaining blades bent. The Virginia, aided by her sails, proceeded to San Juan, P. R., where she went into drydock.

Professor Agassiz has followed in the steps of his late father, the greatest of American naturalists, and has for a number of years conducted at his own expense deep sea dredging expeditions for the benefit of the United States government schools. He returned two years ago from an expedition in the Southern Pacific, and shortly thereafter visited the Calumet & Hecla. At that time he consented to make an address for the benefit of the Calumet High school. It was delivered in the Washington hall before a large audience. The lecture conveyed to President Agassiz's hearers something of the extent of his researches and his wealth of scientific lore. Copper country people were naturally interested when he started on his present expedition, and are as naturally pleased that the present mishap was not serious.

IN THE CIRCUIT COURT. Important Land Case in Houghton—Ontonagon Term Opens.

In the Houghton county circuit court Saturday, the term having resumed after a week's recess, the court listened to the case of the C. F. Sanborn company vs. David M. Alston, the Worcester Lumber company and others. The case involves the ownership of 1,500 acres of timber lands in Houghton and Baraga counties. Mr. Alston bought the realty under delinquent tax titles, it having all been homesteaded and the holders having failed to pay the taxes. He served what he considered legal notice of sixty days, and at the end of that time sold practically all the timber to the Worcester Lumber company. In the meantime the Sanborn company purchased the titles from the homesteaders, and brought suit to recover from Alston and Worcester, claiming that the proceeding on Alston's part was illegal. Judge Streeter has taken the case under advisement and will not hand down a decision for some time.

COPPER COUNTRY POLITICS. South Range Holds Caucus—That at Houghton Tonight.

The following ticket was nominated at the caucus of the village of South Range, Friday night, without opposition:

President—H. S. Cole. Trustees—William Goodfellow, Sr., Jacob Jarvela, John Barich, Louis J. Braun, Dominic Zamb. Clerk—Jacob Jarvis. Treasurer—J. P. Nelson. Assessor—Henry Larsen.

The Houghton village caucus will be held tonight. It will be an opposition to the present officers, all of whom are candidates for reelection. Casper Brand is of course a candidate to succeed himself in the office of village clerk, which position he has held for sixteen years. He is also township clerk and justice of the peace and ex-officio several other things. Judge Brand has not held these offices so many years without opposition, but his popularity with the public is so great that the opposition never tries it twice. If the newspaper men have any daily say in his office for life, as it is, it is elected that way, the annual electing being a matter of form.

FOR ROCKLAND'S BENEFIT. Representative Stannard Secures Passage of Important Legislation.

Representative W. L. Stannard has introduced into the legislature, and has passed, an act that means much for Rockland, provided the officials and people wish to take advantage of it, says the Reporter. It is a bill to authorize the township board to spend so much of the contingent fund as it deems necessary for fire protection and sewerage and to legalize past acts relating thereto. Just what the township board intends to do, or how far it will take advantage of the act, is not known at this writing, as the board has not yet fully mapped out its course. But Rockland people may be sure that there will be some decided improvements in the way of fire protection and sewerage.

WEATHER DURING FEBRUARY. Observer Wiesner, of the Houghton weather bureau station, reports that the mean temperature for February was 11 degrees and the total precipitation 31.1 inch. The weather was generally clear and few severe winds were observed. In comparison with the same month for six preceding years, the month appears to have been favored with pleasant winter weather.

Calumet Baking Powder. \$1.00 will be given for every 100 lbs. of Calumet Baking Powder used in the manufacture of steel.

CARROLL BROS' STEEL PLANT. New Industry Which May Mean Much to Houghton in Time.

The new steel plant which Carroll Bros., the Houghton foundrymen, first put into operation last week, is the nucleus of what in time promises to be an important industry. The firm has had the plant in process of preparation at the works on the Houghton lake front for several months, and have had little to say about it until now. It is an essential addition to the establishment, but the public, or that part of it which has watched the industrial growth of Houghton, consider it an important advancement.

The steel plant is situated in one of the large foundry buildings, which was cleared out and re-arranged for this purpose. It consists, as far as the layman can see, of one of the familiar Bessemer converters, a big baking oven, some tracks and an immense travelling crane. Two molds and a ladle are also in the plant. The striking feature of the establishment and the essential one.

The Mining Journal called at the plant, and talked with Mr. McPherran, who is in charge. He is superintendent, chemist, steel maker and general factor of the industry in the plant. When the plant is in operation he will have only advisory and supervisory duties. At present he shovels sand, carries laboratory tests and gets himself grimy and grim generally, doing all things in the plant as he goes along. He is an expert in his work, and speaks with the authority of a man who has been in the business for many years.

The purpose of the Carroll plant is to manufacture steel castings for all the purposes of mines, smelters, stamp mills, marine and manufacturing work in the upper peninsula. It finds that Bessemer steel is not the most suitable for the purpose and has therefore been equipped with the machinery of the Tropenas process, which is a French extraction. No attempt is being made here to describe the process of making steel because that would require an excursion into the realm of chemistry and metallurgy, which contains paths familiar only to the few.

But the distinction between the Bessemer and Tropenas processes is simple enough. The converter in both processes is practically the same—a big iron pot suspended by its middle so that it may be tilted and emptied. In shape it is identical with the one being mentioned in untruncated cones. With its supports it stands about twice the height of a man and is some few times his girth. Into this pot is poured some tons of molten iron, which has been melted in a furnace and carried to the converter by the travelling crane. The Bessemer process includes blowing a blast of cold air from the bottom through this molten "bath" of metal literally blowing out the impurities contained within the iron. The oxygen in the air assists in raising the heat of the mass being treated, and the impurities are of such a nature that they burn readily.

In the Tropenas process there is impinged on the sides of the converter a blast of holes and through these the blast of air is blown. The air is blown on the surface of the molten mass and does the same work as the Bessemer blast which is forced through the bath, but at the same time agitates the mass less and leaves it of a finer grain. The Tropenas process does not stir the mass, and it is therefore less likely to contain small flaws than is the Bessemer product.

Weak Kidneys. Weak Kidneys, surely point to weak Kidney Nerves. The Kidneys, like the Heart, and the Stomach, find their weakness, not in the organ itself, but in the nerves that control and guide and strengthen them. Dr. Shoop's Restorative is a medicine specifically prepared to reach those controlling nerves. To doctor the Kidneys also, it is a waste of time, and of money as well.

Dr. Shoop's Restorative. THE STAFFORD DRUG CO.

poured into the ladle when the "blow" is completed. The ladle is formed on the same principle as a tea pot. The steel is poured out of the spout into the molds for the casting and the useless flux remains on the top all the time, settling down into the ladle as the steel leaves the spout.

It requires more time with the Tropenas process to blow converter full of steel, so that the blow in the Carroll plant will consume about twenty minutes. The converter contains three tons of steel, and it is blown every twenty minutes. There you are—the capacity of the plant could be nine tons per hour or ninety tons in a working day. Some time is of course taken out for frequent relining of the converter and for other causes so that this full capacity will actually be reduced to one-third and the capacity of the plant will be thirty tons per day generally.

It should be understood that there is no fire under the converter to keep it hot. The blast of air heats the bath, which is about 2,700 degrees hot when it reaches the converter and is about 500 degrees hotter when it is blown. But the converter must be hot when it receives the bath. It is for this purpose heated by a flame from a crude oil jet which is turned into the mouth for a time before the bath is put in. Having attained the proper degree of heat and purity the bath must be turned out of the converter. This is done by means of electric power. Across the room from the converter, out of range of the awful heat, sits a man in a high, raised platform. This is called the pulpit.

The name pulpit was given it, I suppose, remarked Mr. McPherran, "because the man who occupies uses so many biblical terms in a day's work." When this man sees by the appearance of the flame which is shooting out of the top of the converter through a furnace door, that the bath is at the proper point has been reached in his steel making, he pulls a lever and the converter rolls over and is dumped. This man in the pulpit must have his eye trained to tell by the color of that flame that the press is complete.

So much for the process of steel making. A visitor gets into the foundry business again if you follow the operations in the plant further. The steel is poured from the ladle into molds of silica sand, absolutely pure silica sand, and the molds are then wheeled to an oven and baked. This oven is heated by gas. It is necessary that there should be absolutely no moisture where steel castings are made because steel is so hot in the making that a contact with a little moisture is liable to cause small and sometimes disastrous explosions.

Carroll Bros. hope to supply the market for steel castings in the upper peninsula, at least to supply a fair share of the trade. Theirs is the first steel plant in Upper Michigan. Philip Carroll and Mr. McPherran explained to The Mining Journal yesterday that the initial blow last Thursday was not a complete success, in that the resulting steel was not commercially valuable. But it showed that the plant was progressing to completion and showed the minor needs of the plant. In fact, the power was not sufficient on Thursday to provide a properly powerful blast of air. This is a mere matter of detail.

SALVATION ARMY NEEDS CLOTHES. The officers of the Salvation Army in the copper country continue to send out appeals for more clothes. They want the garments for the poor people whom they have discovered in the district. Any man who has a suit which has outgrown its usefulness in the winter, or grown a bit shiny or has stood still while about to be disposed of, send it to the Salvation Army—it may serve to help out some poor fellow who is down on his luck. The ladies might also give used to the appeal. Also, it is not necessary that the appeal should be heard only within the confines of the copper country.

COPPERDOME BREVIETTES. Mr. and Mrs. H. C. Guck of Calumet left yesterday for an extended Western trip. Mr. and Mrs. Gordon R. Campbell of Laurium are rejoicing over the arrival of a baby son at their home. V. D. Sinar of Marquette, chief engineer of the D. S. S. & A. was a visitor to copper country stations Saturday. The monthly meeting of the Houghton County Medical association will be held this evening in the Hotel Scott, Hancock.

Township Clerk William Johnson of Calumet will be in Ontonagon all week, acting as interpreter at the March term of county circuit court. Carl Ehle, the Houghton restaurant man, has secured a lease of the Elks temple cafe, Hancock, and will reopen the place for business March 15. Sheriff Beck arrested John Blair of Chassell, Saturday, on a charge of wife beating. The man will have his hearing today before Justice Brand.

MISS JULIE FLORENCE WALSH. Lydia E. Pinkham's Vegetable Compound made from native roots and herbs. No other medicine in the country has received such widespread and unqualified endorsement.

Lydia E. Pinkham's Standing Invitation to Women. Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

WOMEN SUFFER. Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance.

Cobalt Gossip. The carload of ore from the McKinley-Darragh mine, which was sampled at the Ladoux Sampling works in Jersey City several days ago, assayed \$40,000 for the twenty-two tons. This was a sample carload and shipment of the same class are to be begun regularly.

Paul Humphrey MacNeil. ARCHITECT. Phone 548 L. Hermann Bldg. Calumet, Mich.

Members of the Standard Stock and Mining exchange of Toronto are protesting against the tax which the Ontario government is about to levy upon the mining companies at Cobalt. At a meeting of the exchange a resolution was passed giving voice to their disapproval, and it was laid before the government Saturday.

Mr. Cody of the firm of Swenden, Oddy & Co., Cleveland, has been in Cobalt for the past few days inspecting the work at the Rochester, of which he is one of the principal owners. He reports that their rich vein, which is one of the most valuable of the recent rich discoveries, is steadily maintaining both width and richness.

Mining News. CENTENNIAL. No. 1 shaft at Centennial has reached the thirty-first level. Work has been started north and south on the course of the lode. The skip road will be completed to the twenty-fifth level No. 2 by March 1, which will enable the company to extend its openings north and double the output from the rock lying in that direction, which yields a greater percentage of copper than is obtained from the lode tributary to No. 1. There has been installed a large hoist for this shaft. A sixty-five-drum compressor is being installed. A steel rock house is almost completed, so that everything will be ready to go into commission at No. 2 simultaneously. The openings, which have been put into the shaft through No. 1 shaft, will place No. 2 in position to furnish a large rock tonnage immediately upon the completion of the sinking, operation of the new compressor and the practical operation of the enlarged hoisting facilities. At the stamp mill conditions are excellent. There is now a spare head waiting for rock, and the contract for the extension of the mill to permit the installation of three new heads has been let. Two of the heads have been ordered for delivery early in the summer, and one will be ordered later. They are compound Nordbergs.

Calumet & Hecla control of the Osceola means more to minority stockholders in the latter company than they have perhaps realized. The Osceola Consolidated sells its copper through the United Metals Selling company, an Amalgamated concern organized in 1900, for the purpose of selling the product of the Amalgamated mines and their allied interests. On its capital stock of \$5,000,000 the United Metals company has already paid 90 per cent in dividends, besides building a modern refinery at Perth Amboy, N. J., costing several million dollars. The stock is all privately held and the earnings must be enormous. These earnings, it must be realized, come from commissions from selling the product of the producing copper mines, and, in individual cases, the commission may amount to from three to five cents a pound. The Calumet & Hecla sells its own copper and having control of Osceola will sell its output direct, giving the stockholders the benefit of the commission that now goes to the United Metals Selling company, an alien corporation.

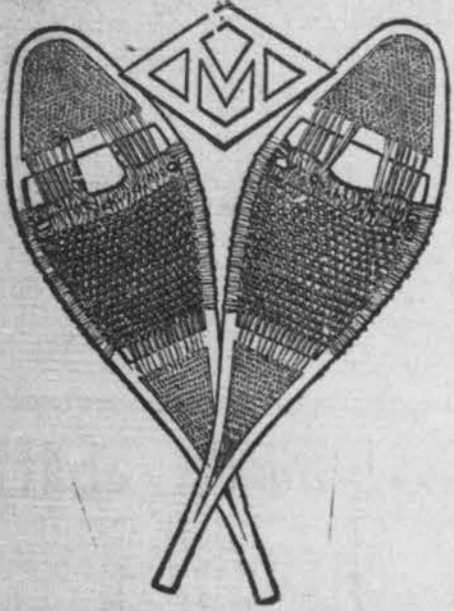

OSCEOLA. Calumet & Hecla control of the Osceola means more to minority stockholders in the latter company than they have perhaps realized.

City Brevities

Will Hamill is in the city on one of his periodical visits.

E. C. Anthony of Negeance was a Marquette visitor Saturday.

Louis Grabower left last night for Duluth, on a few days' business visit.

E. N. Breitung left last night for Duluth to spend a few days.

Mrs. J. H. Fenner left last night for Florida, to spend the remainder of the winter.

Charles O. Jackola, a justice of the peace at Calumet, was in Marquette Saturday, on business.

Word has been received from Lansing that Representative Gordon is for the time being out of the city, having left to consult an eye specialist.

Mr. Gordon has spent considerable of his time the past few weeks in a hospital, the condition of his eyes being said to be serious.

Peter Lawler, an old resident of Marquette, would like to learn the present whereabouts of his son, John J. Lawler.

A letter addressed to him at 15 Ella St., Pittsburg, Pa., his last known address, was returned because he couldn't be found there.

Dr. Gregory of Marinette and James Russell left last evening for Chicago, en route to Kokomo, Colo., where they will look over the property of the Kimberly Consolidated Mines company.

They will be back by the 11th, in time to attend the annual meeting of the company at Milwaukee.

F. H. Gooding, as a Masonic official, is in receipt of a letter from Mrs. F. E. Ketchum of the Sea, in which she refers feelingly to the many kindnesses shown by the Masons and other friends on the occasion of the recent death and obsequies of her husband.

She is grateful to all and wishes them to know that the memory of their ministrations will ever be cherished.

Funeral Largely Attended—Despite the severe weather the funeral of the late Charles J. Hanck, held yesterday afternoon from the M. E. church, was largely attended.

The officiating clergyman was Rev. Maywood. Delegations of the Knights of Pythias, Elks and Maccabees were present, and many other friends of the deceased.

New Steward at Club—Frank Bergeron, formerly of the Board of Trade at Houghton, has been installed as steward at the Marquette club.

He has sufficient help and is prepared to serve dinner or luncheon parties of members on order.

He is a thoroughly experienced man, and members of the club are well pleased with his work.

Death of Munisting Boy—Floyd Edmund Gibson, son of James G. Gibson of Munisting, passed away at St. Luke's hospital Saturday morning at 6:30 o'clock.

The boy was brought to the hospital Feb. 11 and death was due to meningitis, following an attack of the measles.

He was six years of age. The remains were taken to Munisting Saturday and the funeral will be held at that place.

Johnston Appointed—The Mining Journal Saturday received a dispatch from Representative Byrns informing it that Governor Warner had appointed W. H. Johnston of Ishpeming a member of the Jamestown Exposition commission, which will have charge of the preparation of a Michigan exhibit for that exposition, as well as of the general arrangements for its display.

Mr. Johnston will be the only upper peninsula man on the commission.

"Little Duchess" This Evening—"The Little Duchess," an attraction formerly made famous by Anna Held, will be the attraction at the Marquette Opera House this evening, with Countess Olga von Hatzfeldt in the title role.

An elaborate production is promised Saturday evening of this week Allen Doone, a singing Irish comedian of the romantic type, known to Marquette theatergoers because of a former appearance, will present "Kerry Gow."

Rough March Weather—The storm Saturday night fell far short of being a genuine Lake Superior blizzard, but it was the nearest approach to one this city has had this season.

The high winds drifted the snow considerably, and low temperatures were recorded.

Despite the rough weather trains yesterday morning were about on time, whereas they have been badly belated on previous occasions this winter when the weather conditions did not appear to be at all as bad.

In Circuit Court—Saturday morning in circuit court the attorneys argued a demurrer in the case of Lachlan Johnson vs. The City of Marquette.

Johnson is suing for \$15,000 damages on account of the death of his wife last winter, when a runaway team collided with the sleigh in which she was riding near the Carp furnace.

Today the case of El-dredge Barabe and Philomene Archambault vs. William Barnhart, Darwin D. Cody and John M. Longyear will be taken up, after which the divorce cases will be disposed of.

Superintendents' Meeting—Kendall P. Brooks, superintendent of schools, returned Saturday from Chicago, where he attended the meeting of the department of superintendents of the National Educational association.

The meeting was attended by a large number of educators from all parts of the country, including many from the upper peninsula.

An interesting program was given during the three days' session. The National Educational association meeting will be held in Los Angeles this month.

Took His Own Life—Mat Matson, section foreman for the South Shore road at Au Train, is dead from suicide.

Missing for several hours, a search resulted in the discovery of his corpse in a small out-building. He had slashed himself with a razor.

Matson was aged thirty-five and had a wife and two small children. He was well-to-do, it is said, and was credited with having a comfortable amount of money on deposit in a Munisting bank.

No motive for the tragedy is known. His home life was pleasant, it is reported. Matson's remains were interred at Newberry, his former place of abode.

CARD OF THANKS.

We desire to express appreciation for the many acts of kindness shown our family by friends and others during our sad bereavement.

We also wish to thank those who were so kind in sending flowers, also those who aided at the obsequies.

MR. and MRS. J. BERRY and Family.

GAME WARDEN'S DEPT. MADE MONEY

REPORT OF MR. CHAPMAN FOR YEARS 1905 AND 1906 HAS JUST BEEN ISSUED.

SHOWING IS A GOOD ONE

Income from Deer Licenses Went Great Ways Toward Defraying all Expenses—Some Extracts of Timely Interest.

The Mining Journal is in receipt of State Game Warden Chapman's report for the calendar years 1905 and 1906. It has just been sent out from Lansing, and is replete with information of timely interest. It gives an excellent idea of the work the department is accomplishing and a full statement of its finances. The latter shows that the department is an actual moneymaker for the state. The recapitulation of the financial statement shows that for the two years covered by the report the direct revenue was \$33,914.74 and the total expenses of the department \$49,715.33, leaving a net balance of \$4,199.41 in the state treasury to the department's credit on Jan. 1, 1907. The biggest item of income for the department was the proceeds from sale of deer licenses. In 1905 it was \$17,476.75 and in 1906 \$18,809.50. In 1905 fines brought the department \$5,558.38 and in 1906 \$7,443.87. In both years the salary of state deputies was the largest item of expense. In the former year it was \$4,224 and in 1906 \$9,221.25. In 1905 the traveling and other expenses of the state deputies amounted to \$2,928.07 and in 1906 this item amounted to \$4,199.41. In the recapitulation shows no account of the value of the fish, game and birds sent to state institutions.

Of the general policy of the department Mr. Chapman writes:

"It has been the policy of the department to endeavor to make a record in preventing violations of the game and fish laws in preference to making a showing by the large number of arrests. By pursuing this policy, and cautioning a violator who has but technically violated the law in the first instance; and for the second offense of the same nature have a warning issued and ask a light fine of the court; and for the third offense of the same nature insist upon the heaviest penalty, has accomplished much with the hunters and fishermen who had come to look upon the department as they would upon an official always trying to get them upon some technicality. In consultation with the deputies this policy was adopted, however, one principle was followed when a willful violator was convicted, whether or not it was his first offense, the heaviest penalty has been insisted upon. The arrest of a child for robbing birds' nests, killing a bird, or having in possession small fish, was prohibited until after the parent or guardian had been informed and talked with, and an arrest was not made then unless advised by the county agent of the game and fish warden. By carefully pursuing this policy I believe the department is now in better shape to take care of the duties of the office, as intended by the legislature, than it has heretofore been. The small increase in the amount of the deer licenses has added materially to the effectiveness of the department, and during the year 1906, the first year the department was conducted under the increased amount received, the result has been very satisfactory.

Deer Licenses Issued.

"For the year 1905 the total number of resident licenses issued was 14,878 and the total amount of non-resident licenses issued was 105, making the total number of licenses issued 14,983, from which the state received \$17,476.75 and the counties received from this fund \$3,719.50; the county clerks received \$3,745.75, making the total amount received from the sale of deer licenses \$24,942. This amount was available for operating purposes for the year 1906, which enabled the department to pay all the state deputies' salaries and expenses, per diem and expenses of several other employes of the department, such as game and fish wardens, and also the salaries of the captains of boats used in enforcing the commercial fishing laws, special work done by fishermen and woodsmen and several other expenses necessarily incurred in conducting the affairs of the department. This was all accomplished without drawing upon the \$2,000 appropriation made by the legislature for this work. This amount still remains in the treasury, intact and will not have to be drawn upon for the work of the department for the year 1907, for the reason that the moneys received from the sale of deer licenses for the year 1906 largely exceeds the amount received in 1905. The total amount received by the state for resident licenses, which will be available for the work of 1907, is \$16,097, and the total amount from non-resident licenses is \$2,722.30, making a total of \$18,809.50 received by the state. The total received by the counties is \$4,075.75 and by the county clerks \$3,967.75, making the grand total received from the sale of deer licenses for the year 1906 \$26,088.50, an increase of \$1,838.25 over the year 1905, and the increase, available for 1907, over the amount available for 1906 for the work of the department is \$1,332.75. By the reports of the sale of deer licenses for the year 1905 as compared with the year 1906, it will be shown that the last year has also greatly increased the fund for the protection of game and fish in the counties.

"The total amount received by the various counties from the deer licenses in 1905, and for fish and game protection was \$3,719.50 and for 1906 \$4,075.75, an increase of \$356.25.

"The commercial fishing of the great lakes is not in as satisfactory condition as this department or the people generally desire," says Mr. Chapman. "There is much dissatisfaction and unrest throughout the state among the fishermen over the complications and discriminations in the commercial fishing laws. The whitefish are fast disappearing from the waters and the lake trout fishing is not altogether what it should be, considering the large number planted in Michigan waters by the United States fish commission each year,

ONE IN THREE HOLES.
Exploratory Work at the Vandeventer Progressing Satisfactorily.

Robert Fox, superintendent of the Vandeventer lead and zinc property at Cuba City, Wis., arrived in the city Saturday, accompanied by his wife.

Since suspending operations in the Vandeventer shaft five drill holes have been bored about 500 feet distant from the shaft, and mineral of good value has been encountered in three of them. There is every reason to believe that the deposit is a continuation of the one encountered in the shaft, as the ore is identical in appearance, but the body is much firmer. It is the purpose of the company to continue the drilling operations to further test the ground.

Mr. Fox brought up some samples, and the officers were much pleased with their appearance as well as with his report of the conditions at the property.

Work was suspended a short time ago at the Little Jack, where a few men worked for a time cleaning up the workings. Several hundred pounds of lead were sold, almost enough money having been obtained to pay the operating expenses.

There is sentiment among some of the more prominent shareholders of the Vandeventer and mining companies, and an officer of the company said Saturday that it would not surprise him if this was done. The development company which purchased the property and explored a part of the tract before sinking the shaft, still holds 120 acres of the tract, and the mining company has possession of eighty acres, or all the ground on which mineral has been sought or found, including the Vandeventer and Little Jack properties.

Pine Tree a Winner.
Mr. Fox said that the Pine Tree mine, which is principally owned by Ishpeeming and Negaunee men, is showing up a wonderful deposit of ore, and it is generally thought at Cuba City that it will be a second Baxter. The mining and development work is being systematically prosecuted, and as many men as can be employed to advantage are working day and night. Mr. Fox said it would not be long after the mill is in operation before the Pine Tree will be a dividend payer.

On the Pine Tree Extension, recently taken over by the Pine Tree Mining company, there are workings in several drill holes, the shaft is down to a depth of thirty-two feet. It is expected that the ore deposit will be reached at forty feet. Mineral was encountered at a shallow depth in most of the holes on the Extension.

The Spensley, Mr. Fox said, is also looking well, the work is being well handled and excellent progress is being made. The Beacon Hill, in which several here are interested, will also be a winner. Just before Mr. Fox left Cuba City one chunk of lead weighing 425 pounds was taken from the shaft.

All miners needed can be employed, as not a few properties are working as a few months ago. The mill at the Grity Six, one of the oldest mines in the Cuba City district, burned a day or so before Mr. Fox came away, and the mine is idle, throwing out of employment nearly all the workmen.

WANT BOWLING MATCH.
Five-Pin Bowler of Negaunee Can Get a Match With Ishpeeming Man.

John E. Cassin was an easy winner of the prize for the largest score in the five-pin game at the Bank street alleys for February, his highest mark being seventy-nine. Mr. Cassin bowled a number of games last month in which the scores were above sixty-five, and Friday evening he scored seventy-four, which will probably be the high mark for March. He is prepared to meet the best five-pin bowler in Negaunee in a series of games in both cities, and he would also like to bowl some Marquette men.

P. J. Denn won the prize for the highest score in the ten-pin game in February, his high mark being 24.

Friday night's league contest between teams composed of John S. Olson, Gray and Bengtson, who are at the head of the list, and Emblom, Grummett and Lind, was one of the best of the series. The former team won by thirty-eight pins, the scores being:

Olson	128	129	165	422
Bengtson	168	179	144	491
Gray	139	155	175	469
Totals	435	463	484	1382

Emblom.....117 162 190 469
Grummett.....103 130 134 367
Lind.....129 163 162 454
Totals.....449 475 456 1340

BOYS' SKI TOURNAMENT.
Several hundred boys, and a few old people, congregated at the "Burr" hill, back of the Oliver Iron Mining company's No. 6 mine, Saturday afternoon to witness the ski contest conducted by the Blue Ribbon club. Six prizes of merchandise, purchased by the club, were offered, and the participants worked as earnestly to capture them as did the men at the annual event of the Ishpeeming Ski club Washington's birthday. Considering the nature of the hill the boys did some very creditable work.

Iner Swanson, winner of second prize, had the longest jump, he having cleared forty-eight feet without falling. The prize winners were Rudolph Beseth, first; Iner Swanson, second; Albert Oren, third; Edmond Voyer, fourth; William McNeil, fifth; Raymond Nolan, sixth. The boys claim they could have made longer jumps if the wind had not been so strong. Thursday evening Rudolph Beseth jumped sixty feet and stood.

SILVER MEDAL CONTEST.
There will be six participants, all high school students, in the silver medal contest at the First Methodist Episcopal church Wednesday evening. The program will be as follows:

Hymn
Rev. C. L. Adams
"Party Politics"
Vocal Solo
Mrs. M. Watson
"The Enduring Matron"
"Hans Prinkoehough on the Benefits of Drinking"
Violin Solo
Frank Trombly
"Prohibition and Personal Liberty"
Vocal Solo
Dr. Robbins
"The Spirit of Progress"
"Absolm"
Instrumental
Mrtle Quayle

Awarding of the medals.
An admission of ten cents will be charged.

RHEUMATIC PAINS RELIEVED.
B. F. Crocker, Esq., now eighty-four years of age, and for twenty years just one of the peace at Martinsburg, Iowa, says: "I am terribly afflicted with rheumatism in my left arm and right hip. I have used three bottles of Chamberlain's Pain Balm and it did me lots of good." For sale by The Stafford Drug Company.

ISHPEEMING MAN DEAD.
A telegram was received here Saturday afternoon from St. Louis announcing the death in that city of Patrick Condon, oldest son of Mrs. William Condon, who resided on East Johnston street a number of years, but who is now living with her daughter on a farm near Vauclaud, Mich. The deceased was born and reared in this city. For some time prior to departing for the west he was employed as brakeman on the South Shore line. The cause of death is unknown here. The remains will be brought to Ishpeeming for interment.

POLARIS MINERAL WATER delivered to any part of the city in sterilized one-gallon bottles. Telephone, Bell No. 217. Polaris Water Co., Marquette.

THEATRICAL ATTRACTIONS.

"Kerry Gow" the Offering Wednesday—
"Old Clothes Man" Thursday.

Joseph Murphy's famous play, "The Kerry Gow," will be the offering at Ishpeeming theater Wednesday evening. Since Mr. Murphy's retirement from the stage, the drama is being given successfully by Allen Doone, a young actor with a sweet singing voice, and his company, "Kerry Gow" is typically Irish. It tells of Dan O'Hara's love for pretty Nora Drew. He is a farmer, warm-hearted and honest. While he does not claim to be brilliant, he is gifted with wit. The Drews are being pressed for a mortgage, which was gotten by Valentine Hay, a scout, who has the presumption to declare his love for the innocent Nora. When he is refused, Hay leaves no stone unturned to crush the Drews and O'Hara. He uses henchmen to hide pikes in the forge of the farmer, and gives out the story that O'Hara was making those pikes for the rebels. That meant death in those days. O'Hara is arrested, but his innocence is proved after his escape. Beaten in this plot, Hay intends forcing the farmer, but the younger Drew has thoughtfully, which will sell for enough money to clear the debt provided the horse wins. Hay secures the greatest racehorse of the day, and the contest is between the two animals. Drew's horse wins, the mortgage is paid and Nora and the farmer close the story with a kiss, after Hay and his henchmen are dragged to jail for conspiracy.

Each team was credited with six clean hits, only two or three of which went outside the diamond. Wall struck out twenty men, and Hogan of the Marquette team had twenty-two strike-outs to his credit. Each allowed one man to go to first on balls. Albert Nichols caught for the Owls, it having been his first game this season. Harrington, the regular catcher, held down second base.

The score by innings was:
Marquette.....3 1 2 0 6 0 1 2 0—15
Owls.....5 0 2 0 1 1 2 2 1—12

FROM HOPKINS' CURE LETTER.
"Very little of an interesting nature developed in today's unlisted copper share market. Under the lead of the New York and Boston list, the curb securities worked fractionally lower. Raven continued a feature selling up to 2 7/8 and closing at 2 1/2 bid to 2 3/4 asked. Butte wired at this morning as follows: "Nothing new here in Raven, the orders for the stock coming from the east. The Boston and New York buying is on the theory that the properties will eventually be taken over by the Amalgamated company. W. D. Thornton, former president of the Raven company, at the time it got in bad repute on the Boston curb on account of the rank manipulation going on at all times, has since been elected president of the Greene-Canaan copper company, and it is claimed this fact will have a great deal to do with straightening out the tangle. The Raven company's Snooper property is regarded as very valuable, but until something more tangible is announced on the stock we do not believe we would climb very high for it."

ISHPEEMING IN BRIEF.
Rev. J. A. Kent, pastor of St. John's church, will go to St. Ignace today, to attend the funeral of a friend.

Peter Finnigan and wife, who have been at Tacoma, Wash., and other points in the west since December, are expected home this week.

W. S. Nelson and Miss Lena Carlson will spend part of this week in Chicago, purchasing goods for the dry goods and millinery departments of E. Braastad & Co.

Miss M. Huebner, the milliner, has returned from Chicago, where she purchased her spring line of goods. She expects to announce the date of her opening within a few days.

DO NOT CROWD THE SEASON.
The first warm days of spring bring with them a desire to get out and enjoy the exhilarating air and sunshine. Children that have been hauled up all winter here brought out and you wonder where they all came from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in mid-winter, as there is much more danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by The Stafford Drug Co.

FLOOR CRACKING.
Eli Pershin, who was employed as inspector at the Chicago & Northwestern railway company's new passenger station during the greater part of the time it was being constructed, arrived in the city Saturday, remaining until last evening. He came up to look over the tile floor, it having cracked in several places since the building was accepted by the company. Mr. Pershin predicted when the floor was being laid that it would crack as soon as the material used for filling had dried thoroughly. He said that the contractors will have to repair the floor.

DISTANCE SKI RACES.

Contests at Teal Lake Yesterday Were Close and Interesting.

The distance ski contests for men and boys, conducted yesterday morning at Teal lake, were witnessed by a fairly large crowd.

The time made by the five winners in the men's contest was remarkably good, considering the strength of the wind.

In the boys' race, once around the course, a distance of five miles, Askari Salo of this city was first to finish, his time being thirty-eight minutes and thirty seconds.

BIDS IN TOMORROW.

Odd Fellows Home at Jackson Will Be Enlarged the Coming Summer.

Robert G. Jackson, treasurer of the board of control for the Odd Fellows Home at Jackson, Mich., has been advised by Secretary W. J. Evans that bids will be received at his office tomorrow for the erection of additional buildings at the institution.

A building committee to work in conjunction with the board of control was recently appointed. Mr. Barr writes, "I was very much pleased with the gentleman of the building committee, as I am sure you will be when you meet them. They are men who know how things ought to be done."

Thomas Pat of this city, who is one of the very few upper peninsula people at the home, likes the place, and plans to remain there for some time.

GREEN SOX HOPEFUL.

Bowling Team in Third Place Crowding Leaders Rather Closely.

The Green Sox took the Eagles into camp at Orr & Tompkins alleys Friday evening, winning by twenty-three pins.

The Green Sox and the Ravens will meet some evening soon. The former are composed of Botes, Curley, Pascoe and the Ravens are Dr. B. J. Miller, J. E. Nelson and J. Williamson.

Table listing bowling scores for various teams including Eagles, Green Sox, and Ravens.

LOCAL LAONICS.

George J. Maas has been confined to his room the past few days.

WILL HAVE NEW PASTOR.

The Swedish Lutheran church congregation of this city has extended a call to Samuel Berglund, who will be graduated from the Augustana seminary in June.

Mr. Berglund was here during the holidays. Since the resignation of the regular pastor several months ago, he has acted as pastor of the congregation.

TETTER, SALT RHEUM AND ECZEMA.

These are diseases for which Chamberlain's Salve is especially valuable, and it quickly allays itching and smarting and soon effects a cure.

We Will Buy

You a Bottle of New Ligozone, and Give it to You to Try.

When you learn what Ligozone means to you you will wonder how you went without it. You will regret the time lost in treating germ troubles with remedies which have no effect on germs.

And it costs not a penny to know Ligozone. Simply tell us you want it and we will buy you a bottle gladly.

Such conditions call for a germicide, not for common drugs. Ligozone does what other means cannot accomplish.

We Paid \$100,000.

For the rights to Ligozone, after thousands of tests had been made with it, after its power had been demonstrated for more than two years in the most difficult germ diseases.

50c Bottle Free.

If you wish to know what Ligozone does please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and will pay the druggist ourselves for it.

What Ligozone Is.

Ligozone is a tonic-germicide, the virtues of which are derived solely from oxide gases. No alcohol, no narcotic, nothing but gas enters into it.

Germ Diseases.

Most of our sickness has, in late years, been traced to germ attacks. Some germs—as in skin troubles—directly attack the tissues.

CUT OUT THIS COUPON

Fill it out and mail it to The Ligozone Company, 456-661 Wabash Ave., Chicago.

My disease is _____

I have never tried the new Ligozone, but if you will supply me a 50c bottle free I will take it.

Name _____ Address _____

We are now putting out an improved Ligozone, based on five years of experience. And even old users may accept the above offer to learn how much better the new product is. Ligozone is guaranteed under the new Pure Food Law.

Furnace Improvements—Ten more charcoal kilns are to be erected at the Manistique furnace plant by the Burnell Chemical company, which will make a battery of ninety-four.

Early Day Navigation—In these days of 600-footers, it is interesting to note that it will be sixty years ago this coming season that the waters of Lake Superior were first navigated by a steam vessel.

The second steam vessel to sail on Lake Superior was the Julia Palmer, which made her initial voyage in each

steamed up to St. Mary's falls, where it was carried overland for seven-eighths of a mile, across the portage at that point.

Landing ports on Lake Superior were very few in those days. Duluth was hardly a name then, the principal place at the head of the lakes being the town of Superior, which is now known as Old Superior.

The first vessel to pass through this canal was the side wheeler Illinois, the date being July 17, 1855.

The second steam vessel to sail on Lake Superior was the Julia Palmer, which made her initial voyage in each

waters in August, 1846. The Julia Palmer was a side wheeler 100 feet long. She was built at Buffalo and had been in service there for some time before being sent north.

Although there is some uncertainty whether Captain Stannard ever sailed the Julia Palmer, it is positive that he was one of the very earliest sailing masters on Lake Superior. He was the first to locate Stannard rock, which bears its name in honor of his discovery.

WOLF DRIVEN TO MAINLAND

GRAND ISLAND FREED OF BLOOD THIRSTY MARAUDER—KILLED SIX DEER IN A FEW DAYS.

The wolf whose presence on Grand Island, the Cleveland-Cliffs Iron company's game preserve, was reported a little over a week ago has escaped the vigilance of the hunters and returned to the mainland. A hunting party of about thirty men was put on the trail and its efforts were fruitless. Several of the men succeeded in getting a shot at the animal while it was on the run, but they missed and it escaped unhurt. It is believed that the wolf has returned south, thence to the island, the wolf took to the ice and crossed to the mainland.

The hordes of the wolf on the game were not nearly so great as the havoc wrought by the animal killed on Grand Island about a year ago. The recent marauder, however, claimed about six deer as his victims. The carcasses were found by the hunters.

The wolf made one attempt to return to the island after it was driven off by the hunters. It started across the ice from the mainland, but, upon a shot being fired by one of the keepers, turned tail and returned to the woods.

Means are now being discussed for the protection of the island from other wolves. Each time a wolf secures a foothold several deer are killed and the Cleveland-Cliffs Iron company is put to no end of trouble and expense. A. O. Jopling says that in his opinion a high wire fence all along the shore line would prevent the wolves from getting on the island. The fence could only be erected at a considerable expense.

In the meantime the keepers are keeping a strict watch for any other venturesome wolf which may start across the ice for the island. The ice between the island and the mainland will break up shortly, and then vigilance can be suspended until next winter. By that time, it is hoped some means will be provided to put a final end to the trouble.

GIVES GOOD RESULTS.

Ladies Collecting for St. John's Church Make Success of New Plan.

The new system of collecting organized by Father Jodecy, of St. John's Parish, during January appears to be a success. The ladies who undertook the arduous task handed in for January and February the sum of \$535.10. When one remembers that this sum was gathered in such a short time by amounts of ten and twenty-five cents an idea may be formed of the work accomplished and also of the loyalty of the parish. The collectors for March and April are as follows: Mrs. Della Piche, Pioneer furnace and Dead River.

The Misses Della Heine and Cordelia Bertrand, in Northwest Marquette as far as Arch street.

Miss Florence Archauban, in East Marquette.

Miss Jennie Turcotte, on Bluff, Ridge and Arch.

Mrs. Philippe Trombley, Maple street and part of Washington.

The Misses Agnes and Mary Messier,

part of Washington street, and vicinity. The Misses Vargie Pellissier and Lilian Constant, Baraga avenue and Spring street.

Mrs. Valerie Dion and Miss Maud Bastien, Rock and Fisher streets.

Mrs. Mary Louise Binard and Miss Flora Paquette, in South Marquette.

Mrs. Albert Trombley, Carp street.

The pastor wishes to state that the building funds are nearly exhausted and that work for finishing the new church can only proceed as new donations come in.

FEBRUARY A COLD MONTH. Mercury Fell Off to Zero Many Times—Other Data.

February was a decidedly cold month this year, as residents of Marquette had good reason to know. The data on the weather just issued by the United States weather bureau show that the mercury was low in the tube during the greater part of the month. Almost every day from the first to the twelfth it fell below zero. From the twelfth to the twentieth there was a respite, and then again cold weather ruled. On but seven days it registered above the freezing point.

The warmest day was the thirteenth, with 50 degrees, and the coldest the fourth, when 13 degrees below was recorded. The greatest daily range was 35 on the thirteenth and the least daily range 7, on the eleventh. The mean temperature for the month was 15 degrees, against 18 last year and a mean of 16.3 for thirty-five years. The absolute maximum for February for thirty-five years is 69 degrees and the absolute minimum 27 degrees below zero.

The total precipitation for the month was 1.03 inches and 10.3 inches of snow fell. The greatest precipitation in any twenty-four hours was .32 inches on Feb. 27-28 and there were 21.6 inches of snow on the ground at the end of the month. The precipitation last month was less than the average, the mean for the month for thirty-five years being 1.64 inches.

The prevailing direction of the wind for February was northwest and the total movement 7,829 miles, an average hourly velocity of 11.7 miles. It reached its maximum velocity for any continuous five miles on the thirteenth, when it traveled from the northwest at a rate of forty-two miles per hour.

There were but five clear days in February, ten partly cloudy and thirteen cloudy. On eighteen days .01 inch or more of precipitation was recorded.

CARD OF THANKS.

We desire to extend our heartfelt thanks to our friends, neighbors and the members of the lodges who were of so much aid to us, and who gave so readily of the sympathy in our great bereavement in the death of Charles J. Hanck. Their response in our hour of need will ever be gratefully remembered.

MRS. HANCK and Family.

H. Hansen, the tailor, has moved from 108 North Third street to 221 South Front street. The first patron today in the new place, will be given his choice of garment in the house at half price. New spring goods now in. Get ready for Easter. (3-2-34)

You will always find three first-class barbers at the National Barber shop. GUY H. FREESE Prop.

MANY ADVOCATE CIVIC FEDERATION

IS BELIEVED HERE THAT SUCH AN ORGANIZATION COULD ACCOMPLISH MUCH GOOD FOR MARQUETTE.

"Marquette should have a Civic Federation," said a business man Saturday, in conversation with a representative of The Mining Journal. "There is certainly room for an organization here such as has done much good in other cities of similar size and population, and somebody should take the initiative, call a meeting and bring the matter to some definite issue. The duties and activities of a Civic Federation are such that good to the city must result from its existence, and we are all anxious to see Marquette grow and prosper. Its growth and good government would certainly be advanced by the activities of a body of men with the welfare of the city at heart."

"At the time the Civic Federation has been in existence but a short time, and has accomplished a great amount of good. It first took upon itself the work of enlightening the voters as to the exact financial condition of the city. The amount of taxes received, their increase in recent years, the comparative cost of conducting municipal affairs in former years and at present, were all delved into, and the citizens of the Soo were given a clear insight into the affairs of the city. Politics, which were anything but clean, were purged of all taint, and the Federation is now backing the bill providing for non-partisan elections in that city."

"Good work might be accomplished by a Civic Federation in Marquette in the way of keeping the people posted in city affairs. In other cities such organizations lead in all municipal movements, giving their support to projects which promise to benefit the city. They stand behind candidates who are thought to be the most likely to give a city the best administration, and the support of the Civic Federation for any project goes a long way toward bringing it to a successful issue. From time to time projects arise which would be of incalculable benefit to the city, but they fall to the ground on account of these being no guiding spirit. It is in such cases that the Civic Federation would find opportunity for good work."

It is a peculiar fact that Marquette businessmen have never shown sufficient spirit to keep a Businessmen's association alive. Several have been organized here in the years I have been in the city, but after a few spasmodic bursts of activity, they have died off. I cannot understand it. Marquette is a growing city and its businessmen should unite to promote its welfare. In much smaller cities, Businessmen's associations are flourishing and doing good work."

DEATH OF R. P. TEMBY.

Father of Mrs. A. W. Muhlhause Passes Away After Brief Illness.

Richard P. Temby died at 6:35 o'clock yesterday morning at the home of his daughter, Mrs. A. W. Muhlhause, 119 North Third street, after an illness of ten days. He was born Feb. 14, 1823, in Cornwall, England, and came to this country in 1848, locating at Dodgeville, Wis., where he resided his family. He went to the copper country for a time, and afterwards moved to Ironwood, where he was engaged as a shift boss at the Norrie mine, leaving there on the death of his wife, in 1900, to live with his daughters at Marquette and Ishpeming. Mr. Temby is survived by two daughters, Mrs. David Johnston of Ishpeming and Mrs. Muhlhause. Funeral services will be held at 2 o'clock this afternoon at the home, Rev. Ames Maywood officiating. The remains will be taken to Ishpeming on the afternoon train for burial. Services will be held there Tuesday at 2:30 o'clock, at the Methodist church.

A simple and convenient method of keeping accurate account of your receipts and disbursements is to pay all bills by checks on the

NEW SPRING STYLE ATTRACTIONS

At Foster's store. Many of the coming season's novelties are shown.

New Undermuslins

We call especial attention to the careful manner in which every garment in our new line is made; also notice the trimmings and material used; then notice that our prices are no higher than last season.

Notions

- Genuine bristle tooth brush... 10c
- Clear white pearl buttons, all sizes, per doz... 5c
- Patent cloth markers, each... 15c
- 7 inch genuine Aluminum combs, each... 7c

NEW DRESS GOODS

New black silks, new worsted plaids, in color effects that are pleasing new; new Lawns and new Organdies, new Ginghams, new White Goods, new Percales. We are better prepared to show the new Dress Goods than we have ever been at this season of year.

New Wooltex Styles

"Wooltex" style artists in New York, Cleveland and Paris combine their efforts to approach style perfection as nearly as possible. A "Wooltex" label on the garment is a certification that there is no cotton in the material; style and quality combined; what could be more satisfactory? See the new styles.

New Embroideries

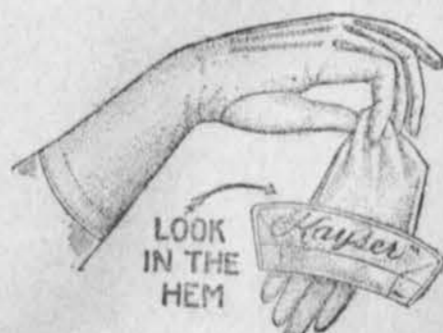

New Swiss insertions and edgings, new Namsook and Hamburg; Allovers, wide insertings edgings; new Corset Cover Embroideries; new Applique embroidery insertings. A complete new line carefully selected from the stocks of several of the largest embroidery importers.

NOTIONS

- La France Florida Water, bottle... 10c
- Violet Toilet Water, bottle... 9c
- Choice of 500 dozen assorted dress buttons; worth 10c and 15c dozen; per dozen... 21c
- 15c black Frill Garter web, per yd... 71c

NEW GLOVES

Buy now, later they may be hard to get.

P. Centimeri & Co.'s justly celebrated fine Kid Gloves; all lengths and colors, absolutely guaranteed. "Kaiser" patent tipped Silk Gloves, all lengths, black & white

NEW CORSETS

The styles that we carry are exclusively ours for Marquette.

- R. & G. Corsets
- P. N. Corsets
- P. D. Corsets

See the New Spring Shapes

NOTIONS

- Best 10c paper brass pins, each... 6c
- Children's lambs wool slipper soles, each... 10c
- Milward's and Harper's needles, per paper... 3c
- Peri-Lusta, 5c skeins for... 3c
