PRICE 5 CENTS

SIX TOWNS WIPED OUT BY THE 'QUAKE

Devastation Wrought in Mexico Proves Much Greater Than Indicated by First Reports—West Coast Has Suffered Severely.

Tixtla and Three Smaller Cities Appear to Have Met the Disasterous Fate of the More Populous Chilpancingo and Chilapa, and at Acapulco Half the Port Is Submerged Over Breakwaters as the Sea Was Lashed Into Fury.

City of Mexico, April 16.—Heavy earthquake shocks continued on the west coast until four this morning.

Late news from the area of greatest destruction in the recent earthquake shows the devastation greater than at first supposed.

Besides the destruction of Chilpancingo and Chilapa, it is now reported that Tixtla, between the two cities, also named and containing about the same population as Chilpancingo, was levelled to the ground.

Messengers from the coast who have reached Chilpancingo say that the towns of Ayutla and Omotepec have been wiped off the map. Ayutla is fifty miles south of Chilpancingo, in Guerrero, and twenty miles west of the port of Acapulco. The population of Ayutla is small, and it is thought the loss of life there is insignificant. Omotepec is a town of 4,000, and it is feared that it has suffered many fatalities.

Tlapa, a town eighty miles west of Chilpancingo, is also reported wiped out. A report from Chilpancingo says that the whole west coast, from Acapulco south to Salina Cruz, has been badly damaged.

Details Hard to Secure. Owing to the remoteness of these points and to the fact that wire and mail communication is very poor, news from the stricken district comes very slowly. The Federal Telegraph company today gave the Associated Press the only wire working to Chilpancingo. The operator there, Ayutla, was making beyond the fact that he had seen about a dozen dead bodies and that there were some thirty persons wounded.

A dispatch from the bishop of Chiapas confirms the reports of the total destruction wrought in that immediate neighborhood. Fourteen persons are reported killed in one house, and the number of wounded is given as thirty-nine. In Tixtla, it is reported, twelve dead bodies have been taken from the ruins, and twice that number of persons were injured.

Up to 4 o'clock this morning the shocks continued with more or less severity in the vicinity of Chilpancingo, completing the work of destruction and destroying many of the most important public buildings of the city. The new municipal palace, which was erected in place of its predecessor, which was levelled by an earthquake four years ago, was almost destroyed by these last shocks. Hospitals, schools and the jail are in ruins. Up to this time the total deaths reported number thirty-eight, and the wounded ninety-three, but in view of the later reports it is thought that these figures will fall far short of the real number of fatalities.

Port Partly Submerged. It is reported that Acapulco is partly submerged from great waves which dashed over the breakwaters. Although no breath of wind was stirring the night of the first shock, the sea was lashed into fury, and as the shocks continued the harbor took on the appearance of a typhoon-swept ocean. Communication by rail to the port of Vera Cruz is entirely cut off owing to the sinking of the tracks.

NAVY NEVER SO STRONG.

Only England Has More Battleships Than Has the United States.

Washington, April 16.—When the battleship Kansas goes into commission this week at the League Island navy yard the United States will outrank all other nations except Great Britain in the number of first-class battleships in commission. France, whose sea strength on paper exceeds that of the United States, has four less battleships in commission at the present time than the United States. Germany, which is a close competitor of the United States in the relative strength of its navy, has sixteen battleships of 10,000 tons or more now in active service, but the United States when the Kansas is in commission will have seventeen in commission, and therefore exceed the battleship strength of Germany. Great Britain, with a total sea strength of fifty-three battleships, has at the present time thirty-three battleships in active service, and fifteen in reserve squadrons, making a total of forty-eight ready or instant duty. At no time has the actual fighting strength of the United States navy been as great as at present. This is in part accounted for by the fact that the Atlantic fleet has been kept up to its full strength for the exercises just concluded at Guantanamo, and the fleet is to be kept intact for the naval exercises at Jamestown. In armored cruisers the sea strength of the United States is high at the present time, although in that respect France leads. Japan at the present time is maintaining a great number of battleships in commission and is next to France.

TODAY'S WEATHER.

Washington, April 16.—The following is the weather bureau's forecast for the

per Michigan: Fair and continued cold, Wednesday; Thursday, fair, with slowly rising temperature.

BIG GOLD MINE DOOMED.

Fire in the Homestake Is Now Reported Beyond Control.

MILWAUKEE FIRE COSTLY.

Less of \$300,000 Caused in South Side Department Store.

Milwaukee, Wednesday, April 17.—Fire early this morning in Kroeger Bros. department store on the South side of the city caused a loss of \$300,000. The fire is now under control.

MONTENEGRIN CABINET OUT.

Cettinje, Montenegro, April 16.—Prince Nicholas of Montenegro has accepted the resignation of the entire cabinet.

BOLD ROBBERY IN SAINT PAUL.

UNION DEPOT EXPRESS CLERK FORCED TO YIELD \$25,000 AT THE POINT OF A PISTOL.

St. Paul, April 16.—One of the boldest and most successful robberies perpetrated in this city for many years occurred tonight when a clerk in the Union depot office of the Northern Express company was held up at the point of a pistol and compelled to open a safe and deliver a package containing \$25,000 in currency, with which the robber escaped.

About 10:30 o'clock a young man, believed to have been a pal of the robber called at the express office and by some pretext managed to get one of the clerks out of the office for a short time. Fred Zimmerman, the other clerk, soon afterwards found himself confronted by a masked man, who pointed a pistol at his head and ordered him to hold up his hands. The robber then took from him his revolver and commanded Zimmerman to open the safe. The clerk obeyed without hesitation. The bandit ordered Zimmerman to hand out a package of currency which was to go to Duluth on the midnight train. Zimmerman handed out the envelope, which the robber thrust into his coat pocket, and escaped. The second clerk returned about this time, and the alarm was given, but no trace of the robber was found.

Bank Burglary in Iowa.

Hazleton, Ia., April 16.—Robbers last night forced entrance to the State bank of Hazleton, blew open the vault with nitro-glycerine, secured \$4,000, and escaped.

FIGHT OVER WOMAN; NOW BOTH ARE DEAD.

ONE ITALIAN IS SLAIN IN DUEL; THE OTHER KILLS HIMSELF AS POLICE ROUND HIM UP.

New York, April 16.—After a quarrel over a girl to whom both were paying attention, two Italians fought a duel with revolvers in Ozone Park, Long Island, today, as a result of which, one—Dua Pinnacchio—was instantly killed. Vincenzo Cicca, the other duelist, was found hiding in a closet in the home of his victim. As the police burst in the closet door, Cicca shot and killed himself.

MURDER CONFESSED.

Story of Jim Cockeyll's Assassination Told in a Lexington Court.

Lexington, Ky., April 16.—John Smith, charged with the assassination of Dr. B. D. Cox, went on the witness stand today and fully confessed to the assassination of Jim Cockeyll, saying that he (Smith) and Curt Jett and John Abner killed the victim. Smith fired one, Jett four times and Abner three times.

WINTRY GALE IN NEBRASKA.

Early Fruit and Vegetables Reported Practically Destroyed.

Omaha, April 16.—Central Nebraska was visited by a snowstorm today, accompanied by a decided fall in temperature which is thought to have practically destroyed early fruit and vegetables. At Kearney snow fell at intervals and the temperature tonight is far below freezing. At Indianola, following the snowstorm today, the temperature fell to 22 degrees.

TWO COACHES DITCHED.

Six Passengers Seriously Injured in a Great Western Wreck.

Winona, Minn., April 16.—While running about fifty miles an hour, Great Western train No. 205 was wrecked near Altura, Minn., near here this afternoon. Two rear coaches plunged down a steep embankment. It is reported that six persons were seriously injured, and that one, a traveling man named Peterson, of Minneapolis, probably will die. A broken flange is said to have been the cause.

NOTED MEN RAISE VOICES FOR PEACE

Speakers at New York, Delegates to Carnegie's Congress, Appeal for Christendom's Emancipation from the Curse of War.

College Heads, Labor Leaders and Business Men Vie in Their Advocacy of International Agreement Putting End to the Carnage of Battle; Woman Workers Proclaim Like Sentiments, and Young People's Movement Is Launched in the Cause.

New York, April 16.—That intelligence, knowledge and culture are things which the universities can contribute to the cause of universal peace was the consensus of the opinion of the college presidents who spoke tonight at Carnegie Hall at the university meeting of the peace congress. A half dozen college presidents, including representatives of the Universities of Oxford and Cambridge, spoke in the interest of the movement, and showed college men what they could and should do to advance the cause of universal peace and the emancipation of Christendom from the curse of war.

GAMES PLAYED YESTERDAY.

National League.

Philadelphia, April 16.—A bunching of hits in the fourth gave the locals a good lead. Summary:

Club	R.	H.	E.	
Philadelphia	00040110	6	8	1
Boston	020000300	5	7	2

Batteries: Corridon and Jacklitsch; Flaherty and Needham.

Cincinnati, April 16.—Holly's playing at short was the feature. Summary:

Club	R.	H.	E.	
Cincinnati	000000000	0	9	1
Ct. Louis	001011000	3	10	0

Batteries: Oakley and Schlei; Carger and Marshall.

Brooklyn, April 16.—The visitors won by bunching hits early in the game. Summary:

Club	R.	H.	E.	
Brooklyn	100000000	1	6	5
New York	210000000	4	7	1

Batteries: McIntyre and Ritter; McGinnity and Bressnan.

American League.

Boston, April 16.—A 4-0 victory over Washington. Summary:

WEDDING DAY FIXED.

Corey-Gilman Nuptials Booked to Occur May 7 in New York.

New York, Wednesday, April 17.—The Herald this morning says: "Wm. Ellis Corey, president of the United States Steel corporation, and Mabelle Gilman, the actress, will be married in this city May 7, if present plans are not changed. Mr. Corey cannot be found to confirm or deny the story."

CONVICTIONS AFFIRMED.

Alton Road and Two ex-Officials Must Pay \$50,000 in Fines.

Chicago, April 16.—The United States court of appeals today affirmed the conviction in the district court of the Chicago & Alton railroad and John M. Fairborn and Fred A. Wann, former officials of the line, for granting rebates. The company and the two ex-officials were found guilty last year, and an aggregate fine of \$60,000 was imposed. The company was fined \$40,000, and the former officials \$10,000 each.

USE OF MILITIA THREATENED.

Indiana Authorities Determined to Stop Gambling on the Races.

Hammond, Ind., April 16.—Attorney General Bingham, who is making Hammond his headquarters during the raids on the Dearborn Park pool room at Clark station, today said that if necessary the state militia will be called to aid in the crusade. Gamblers over 1,000 strong operated as usual today. Another raid will be made tomorrow.

PUBLICITY LAW IS ADVOCATED

Full Light on Campaign Contributions Demanded at a National Conference in New York, Perry Belmont Presiding.

Bryan and Gompers Are Speakers, and Plans Are Laid for Legislation at the Next Session of Congress—A Resolution Not on the Program, One Seeking Information from Both Big Parties, Causes Debate and Finally Is Referred to a Committee.

New York, April 16.—The adoption of an effective national publicity law which would require the publication of the contributions to national and congressional campaign committees, as well as the expenditures of those committees, was the subject discussed today at a special meeting of the National Publicity Law organization. Perry Belmont, president of the association, was chairman of the meeting. The invited guests included Wm. J. Bryan and Samuel Gompers. Many states were represented.

A resolution intended to secure the publication of the contributions made to the Republican and Democratic committees at the last national canvass was offered. It was entirely unexpected and caused a lively discussion. The resolution, which was offered by Alexander Troup of Connecticut, a member of the Democratic national committee, requested the chairman and treasurers of the two parties who served at the last national campaign to make public a comprehensive statement as to how the campaign funds were raised. The attitude of President Roosevelt on campaign contributions was brought into the discussion by Mr. Troup's insistence that the president should favor throwing open the books of the last campaign, as well as those of the coming national contest. Mr. Troup attempted to secure immediate action of his resolution, but it was referred to the executive committee.

Mr. Bryan, who was the principal speaker at today's meeting, urged the passage of a law by congress providing for public declaration both by donor and recipient of all campaign offerings. He wanted all violations of this law punishable as criminal offenses. By this means alone, he held, could secret contributions given for sinister purposes be stamped out and a great hindrance to honest politics be overturned.

Other speakers were Samuel Gompers and Governor Edwin Warfield of Maryland. Plans were formed for renewing the efforts at the next congress for a publicity law of national scope.

URGENT BRYAN LEAD PARTY.

Speakers at Brooklyn Banquet Declare for Nebraska's Nomination.

New York, April 16.—With William Jennings Bryan as the chief attraction, the Democracy of Brooklyn tonight, in observance of the anniversary of the birth of Thomas Jefferson, engaged in an enthusiastic Democratic reunion and demonstration. The function was the annual dinner of the Brooklyn Democratic club.

Mr. Bryan, who concluded a day of vigorous action which embraced four public addresses, was given a splendid reception and delivered a characteristic discourse, taking for his subject, "Thomas Jefferson."

In an extended welcome to the guests, Ward M. Shepard paid a tribute to Bryan whom he welcomed with the words that the Brooklyn Democratic club and there "declared its strong and loyal hope that Bryan would lead the party in 1908."

Mr. Williams, of Massachusetts, discussed government ownership of railroads. He said: "I see no escape from the conclusion that if government ownership is right, it should be adopted now; if regulation is wrong, it should not be attempted at all." But Mr. Williams believed that regulation was not right, not possible and not expedient.

Speeches were made by several prominent Democrats, nearly all of whom urged Bryan as the Democratic candidate in 1908.

Promises a Statement Later.

It was midnight before Mr. Bryan began his speech. He was accorded a tremendous ovation. He said that his sole desire was that the Democratic party should enter the next campaign with the strongest Democratic strength it could in order to bring out a triumphant vote. It was not necessary for him, he thought, to be a candidate for any office, as there was joy enough for him in private life provided he could get his ideas put into operation.

"When I see so many Democratic principles put in operation by a Republican president," he said, "I can imagine what joy it would be to have those principles carried out by a Democratic president. At some time in the future I shall decide what my place is to be in the next campaign."

CONDUCTIVE TO WORLD'S PEACE.

American Young People Urged to Learn Foreign Languages.

New York, April 16.—Among the speakers at the young people's meeting at Carnegie Hall this afternoon in connection with the peace congress was Baron D'Estournelles De Constant of Paris. He advised the young people to learn foreign languages in order to prevent misunderstandings with people of other countries, which, arising from ignorance, he said, lead to war and catastrophe. He also spoke of a recent visit to the White House, where he be-

PROSECUTION FOR COLLINS?

Cook County Grand Jury Is Expected to Delve Into the Matter of the Alleged Debauching of the Chicago Police Department.

Civil Service Commission's Investigation Results in Further Disclosures—Inspector Wheeler Collected \$2,000 from His Patrolmen for Use in Dunne's Behalf, He Testifies on the Stand, and Then Was Criticized Because Sum Wasn't Larger.

Chicago, April 16.—Further disclosures were made today to the civil service commission, which is investigating the alleged debauching of the Chicago police department by former Chief of Police Collins and an effort to bring about former Mayor Dunne's re-election.

ASYLUM THE PLACE FOR HARRY K. THAW

THIS THE OPINION OF PRISONER'S HALF-BROTHER, EXPRESSED IN AN INTERVIEW IN ROME.

Rome, April 16.—The Tribune has an interview with Blair Thaw, half-brother of Harry K. Thaw, who is spending the winter here with his family. Mr. Thaw said he hoped the lawyers on both sides would agree in the request that Harry be sent to an asylum.

Trouble in the Legation.

New York, April 16.—The first open indication of the reported trouble between the array of attorneys who represented Harry K. Thaw in his recent trial came today when Henry C. McPike, the associate of D. M. Delmas, called on Clerk Penny, of the supreme court, and demanded the immediate surrender of some exhibits introduced by the defense during the trial. Mr. Penny responded that he could not surrender any of the exhibits unless directed to do so by supreme court order. Attorney McPike said he would endeavor to procure the necessary order. All the exhibits were locked in Clerk Penny's safe yesterday upon the request of Daniel O'Reilly, one of Thaw's counsel.

GERMANS IN U. S. NAVY.

Osterhaus, Father and Son, Officers on Big New Battleships.

Washington, April 16.—When Prince Henry of Prussia visited this country several years ago the president arranged a reception at the White House for his imperial highness when the officers of German descent in the army and navy who happened to be in or near Washington at that time were invited to meet him. It was a graceful compliment but it had also a deeper significance which was not known to the officers of German descent in the army and navy who happened to be in or near Washington at that time were invited to meet him. It was a graceful compliment but it had also a deeper significance which was not known to the officers of German descent in the army and navy who happened to be in or near Washington at that time were invited to meet him.

UNCLE SAM GIVING NO GUARANTEE

SHARP PRACTICE OF MANUFACTURING CONCERNS DENOUNCED BY SECRETARY WILSON.

Washington, April 16.—"If this outrageous misrepresentation does not cease the department will publish a list bearing the names of the manufacturers who are indulging in this campaign of deception."

This remark was uttered by Secretary Wilson in an authorized statement today and was brought forth by the fact that there had come to his knowledge information that a number of manufacturers of foods and drugs were freely advertising that the United States government was guaranteeing their products.

The secretary said that the serial number and guaranty required by the law to be placed on food and drug products were used by these manufacturers for this purpose. "The serial number," said Mr. Wilson, "is assigned to fix the responsibility where it belongs, upon the manufacturers, and to protect innocent dealers who have the right, under the law, to rely upon his guaranty. It is the guarantee of the manufacturer, not of the government."

ANDREW CARNEGIE'S GIFT.

Building of the Engineering Societies Dedicated at New York.

New York, April 16.—The beautiful new building of the engineering societies, presented to the United Engineering societies by Andrew Carnegie, was dedicated today. Letters from President Roosevelt and President Diaz of Mexico were read, expressing their regret at their enforced absence and congratulating the societies on the opening of the building.

JOSEPH CHAMBERLAIN DYING?

Mrs. W. C. Endicott Hurrying to Beside of Her Distinguished Son-in-Law.

Boston, April 16.—Having received word that the illness of her son-in-law, Joseph Chamberlain, continues serious, Mrs. W. C. Endicott, widow of the former secretary of war, accompanied by her son, William C. Endicott, and his wife, sailed for Liverpool today on the steamer Saxonia. The party is hurrying to Mr. Chamberlain's bedside.

(Continued on Page Five.)

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

Subscription Rates: Per month, by carrier, \$2.50; Per year, by mail, \$26.00

MARQUETTE, MICH., APRIL 17.

Entered as small matter of the second class in the postoffice at Marquette, Mich.

And then it snowed.

Can't we arbitrate these charter differences?

"To the vanquished belong the spoils" - an Ishpeming version of an old saw.

The business man can tell you, with a wide range of eloquence, about the backward spring.

The council is on its dignity. It does not propose to recant unless Judge Stone says it must.

By and by, perchance, the state legislature will get around to our proposed game law revision.

Wanted—An election recount statute about whose phrasing there can be no difference of opinion.

Meanwhile the light and power commission and the water board pursue the even tenor of their ways.

With three orchestras, and a brass band in prospect, Marquette should not lack for the lively strains of merry music.

Doubtless even the enemies of the park, cemetery and street commission would like to see it given enough rope to hang itself with.

But if Taft shouldn't go to Ohio, perhaps the president will himself. Doubtless his enemies fear that there might be some such outcome.

Mr. Stead is bearing out his reputation for being a man of rather lurid opinions, with a penchant for expressing them in a sensational manner.

We are left to conclude that former Mayor Dunne's re-election would have been among the probabilities, if only the police force had been large enough.

At this writing only one thing is necessary for the opening of navigation at the Soo canals. The one thing missing, however, is a very important one. It is boats.

At the present writing the probabilities all seem to favor the Big Nine trying to get along without Michigan, and Michigan trying to get along without the big nine.

The ultra-radical contingent in the support accorded Mayor Robertson in the recent election is said to be nursing a sore ear. Best sign in the world that the mayor will have a successful administration.

The keeper of the town dump, the master of the pounds and the janitor of the city hall having been chosen, we may now turn our backs on public affairs and give our undivided attention to our own private concerns.

Chancellor Day of Syracuse University continues in his state of magnificent dissatisfaction. In his humble estimation the only American institution that is being properly conducted is the Syracuse university.

There is no surprise at the revelation in regard to the levys on the Chicago police to secure the re-election of former Mayor Dunne. They were one of those things which everybody has known about for some years, but which up to the present had not been proved.

Mayor Robertson's desk was handsomely decorated with American Beauty roses Monday night. And now Mayor Robertson's friends want to see him so conduct his administration that there will be even more American Beauty roses when it comes time for him to step down.

Doubtless the public's joy at even the remote prospect that the Standard Oil company will have to pay any part of \$30,000,000 in fines is tempered by the thought that any penalty which the court might assess against it would sooner or later be subtracted from the purse of the consumer.

In H. R. Harris Mayor Robertson made an admirable selection as the new member of the light and power commission. Mr. Harris is a man schooled in meeting big practical problems, and one whose judgment will be a valuable asset to the board, which will be greatly strengthened by his presence on it.

The Mining Journal hopes that there will be no consistent opposition in the council this year. Such an opposition is conducive to bad feelings. Moreover it is an unheeding, shortsighted sort of thing, and never arrives anywhere. Differences of opinion we must expect from time to time, but we can very well get along without clique voting of any sort whatsoever.

Perhaps if the Escanaba Business Men's association could convince Judge Stone that it is really in earnest about its desire to clean up the city, he might help it. Some few years ago, after he had tried in vain to lead Escanaba into better ways, he answered an appeal for more help along the same lines to the effect that he was not paid for policing Escanaba; that it was impossible to make any community better than it wanted to be. And he was right.

Frank G. Jenks' resignation from the council leaves Marquette with a dozen aldermen. As ultimately it will have only ten, a dozen ought to be a sufficient number to get through the next two years with. Let us hope that the council will be content to accept Mr. Jenks' resignation without taking any steps to elect a successor. The Mining Journal has heard considerable discussion of the legality of such a step, anyway. Many people believe that there is no justification for it in the charter amendments.

Thirteen men received votes in the first ballot in the senatorial caucus of the Republican members of the Wisconsin legislature. Of the thirteen, however, only five can be said to be in the running unless developments bring one of the candidates polling but a vote or two to the front with surprising rapidity. These five are Esch, who was given sixteen votes; Hutton, fifteen; Lenroot, eighteen; Cooper, seventeen; and Stephenson, seventeen. A lineup like this carries promise of almost interminable caucusing. It will be noticed that Lenroot has the strongest support of any of the leading candidates, although the first five are so closely bunched that there is little choice between them.

An editorial reference in the Ishpeming Record insinuates that the Breitung people started the eight-hour day in the Mary Charlotte mine at Negaunee to further the interests of C. F. Button, a candidate for representative last fall. An official of the Mary Charlotte company asserts that the Record makes a false statement, which, if it had taken the trouble to ascertain the facts, it might easily have learned was false. "The eight hour day was started at the Mary Charlotte in June last," he says, "when there was no thought of the representative contest in the fall. It was started to develop the mine more rapidly, and with the express understanding that it was an experiment and that the company reserved the right to return to the former ten hour day whenever it was convinced that such a step would be wise. Any statement to the contrary is untrue and unwarranted by the facts."

THE FIGHT FOR DEMOCRACY. Governor Hughes of New York is engaged in a fight for good government in which the rest of the country cannot but be interested, not so much because success will make him a figure of national prominence as because the principle for which he is fighting is one that would improve government in every state and city of the Union. This principle is responsibility in office. When our government was founded the great fear was of a man power. At that time, too, the force of public opinion was little developed and less understood. So the founders gave us a government composed of a most elaborate system of checks and balances. That system long served its purpose, but in the course of time schemers found a way to turn it to their uses. Instead of having autocratic presidents and governors who could dominate over or dispense with the legislatures we got autocratic bosses who owned both governors and legislatures, and who, having no official position, could not be easily reached by the people. This was a logical development from the system of checks and balances, which made shifting of responsibility easy. The boss could reward, the people could not decide whom they should punish. Since the establishment of our government the people have advanced in ability to rule themselves. If the founders feared anything as much as they did one man rule it was mob rule. Consequently they sought to mitigate democracy by giving the people a most complicated method of expressing their desires. To that fear we owe our electoral college, which long ago ceased to perform the function for which it was created, and our party conventions, later in developing and later in decaying, which are now being relegated to the political junk heap by primary reform laws.

Now we are in the midst of establishing a new system. In some states we are beginning at one end of the problem, in other states at the other. In Michigan we have taken the primary reform end, in New York they are taking the checks and balances end. Neither one alone will solve the problem. Whichever we take first we must take the other next or we shall be worse off than before. For that reason we of Michigan are interested in Governor Hughes' fight in New York.

GENTLE AND EFFECTIVE. A well-known Manitoba editor writes: "As an inside worker I find Chamberlain's Stomach and Liver Tablets invaluable for the touches of biliousness natural to sedentary life, their action being gentle and effective, clearing the digestive tract and the head." Price 25 cents. Sample free at The Stafford Drug Co.

GIVE COMMISSION SWING.

It was supposed up to Monday night that the new park, cemetery and street commission had control of all the machinery and equipment pertaining to street building; that in addition to actually building the streets it would have direction of the operations at the crushing plant and of the work of the street rollers. It was supposed, in short, that it would command all the ramifications of street work, and therewith accept the entire responsibility.

But an ordinance passed Monday night confers on the park, cemetery, street and sewers committee of the council powers which would seem to encroach on what were supposed to be the prerogatives of the commission under the charter amendments, and which are certain to result in a conflict of authority, on occasions, and to divide the responsibility for the street work, which should be centered in one place, so that the people may know whom to hold to account if it should not be attended by success.

This apparent conflict between what it was thought the charter amendments covered and what they appear to cover in the light of the ordinance passed Monday night is due to the lawyers, between two of whom there is a difference of opinion in the matter. Mr. Hill, city attorney last year, who drew the amendments, asserts that the commission is empowered by them to take over all road making machinery and the crushing plant. Mr. Brown, the present city attorney, who wrote the ordinance passed Monday night, contends that the powers giving the council control of the roadmaking machinery and the crushing plant are reserved by the old charter provisions to the council and placed with the commission. Therefore, he maintains, they still lie with the council.

Both attorneys urge their opinions with arguments more or less convincing, as the point of view may vary. But the legal aspects of the question are of secondary interest to the average citizen. He is most interested in seeing plans for future street work laid on a safe and sane basis. And it is improbable that he will think very well of an arrangement by which a commission is asked to build streets, while a council committee has control of the road rollers and the crushing plant, the means of building streets. Right in the beginning we have divided responsibility, and a door opened for friction. It would be little less than wonderful if friction did not arise.

The Mining Journal believes it would be wise to give the commission full swing, with the idea of seeing what it can do. It believes it would be advisable to give it full control of all the road-making machinery. This could be done and the council would, through its control of money supplies, still have a large measure of authority over it. If, under the equivocal conditions we now have, the commission should appear to have failed, the blame for unsuccessful results would doubtless be landed between it and the council. If the commission has to lay its rock, after crushing it, and then roll it with rollers in its own charge, all the responsibility would rest with it.

Whatever the legal technicalities may be, there is no doubt of the power of the council to pass an ordinance giving over the road making equipment to the commission. As the commission has, in any event, to make the roads this would seem the wisest thing to do, and it is reported that many of the aldermen favor the step.

AN ORDINANCE.

An ordinance amending section four of an ordinance relative to meetings and proceedings of the common council.

The City of Marquette, Michigan, do hereby amend section four of an ordinance entitled, "An ordinance relative to meetings and proceedings of the common council," adopted March 8, 1892, be and the same is hereby amended so as to read as follows: Sec. 4. On or before the first Monday of May, in each year, the mayor shall appoint standing committees from the members of the common council, to consist of three members each, who shall serve until their successors shall be appointed by the mayor. The mayor shall also designate the chairman of each committee and shall fill by appointment all vacancies therein. Such committees shall be as hereinafter named, and the duties hereby prescribed for and required of them shall be as follows, unless otherwise specially ordered by the common council by a vote of two-thirds of the aldermen present, viz:

Finance and Taxation.—To supervise the auditing, allowance and payment of all claims against the city and, concurrently with the controller, to audit all claims against the city before the allowance thereof by the common council; to supervise, inquire into, verify and report upon the city funds and accounting; to consider the indebtedness, ways and means, revenues and expenditures of the city; to recommend measures relative to taxation, accounting and other fiscal concerns of the city; to inquire into and report upon the sufficiency of the sureties on bonds given by officers, employees and contractors; and to take such action and recommend such measures as are calculated to bring about equal and just taxation of all property taxable in this city.

Parks, Cemeteries, Streets and Sewers.—To inquire into and report concerning the plans, work and requirements of the park, cemetery and street commission; to consider, report and advise in relation to acquiring lands for park, cemetery, street and sewer purposes, and concerning the protection, maintenance, improvement, lighting, use and regulation of the parks, cemeteries and streets of the city, and the revenues and appropriations therefor; to inquire into and report concerning the location, opening, grade, boundaries, obstructions and encroachments upon streets, avenues and other public ways and concerning the trees, poles, bridges and other structures thereon; to supervise the operations of the rock crushing and road making and cleaning machinery and property of the city; to inquire into and report upon the need for and the condition of sidewalks and crosswalks in the city, and to

inquire into and report concerning the sewer system and drainage of the city.

Claims and Litigation.—To inquire into and report in writing upon all claims in favor of or against the city over which there is or is likely to be any legal controversy and all claims against the city for damages on account of injuries to persons or property; to investigate and report in writing concerning all other matters in relation to which the city may be or become involved in litigation, and to confer and advise with the city attorney in relation to the law affairs of the corporation.

Police and Public Order.—To inquire into and report concerning the plans, work and requirements of the board of police commissioners; to ascertain if the ordinances relative to the police are observed and complied with, and to advise and report thereon and upon measures for the enforcement of the laws and ordinances for the preservation of peace and good order.

Ordinances and Rules.—To consider and recommend the adoption, amendment, revision and publication of ordinances, except such as shall be presented by or referred to some other committee upon subjects in relation to which it is the duty of such other committee to consider and report; to consider and recommend for adoption rules of proceeding for the common council and amendments thereof.

Public Buildings and Property.—To supervise, inquire into and report concerning the condition, care, preservation, improvement, use and disposition of all real estate, statuary, fountains and other personal property belonging to the city which is not by law or ordinance placed under the supervision of any officer, board or other committee of the common council; to inquire into and report concerning the acquiring of real estate for city purposes; except for parks, cemeteries, streets and sewers; and concerning the erection, alteration, leasing, repairs, insurance, use, care, lighting, heating and supplying with water of the city buildings, and the care of the fixtures, furniture and property used in connection therewith; to supervise the conduct of the city market and city scales and to require the faithful performance of duty on the part of market keepers and weighmasters and their clerks and employees.

Purchases, Salaries and Wages.—To inquire into the needs of the city of officers and employees for stationery, stamps, books and other supplies, and to authorize the purchase thereof; to negotiate for and purchase other articles and property when directed by the common council; to inquire into the duties, services and labor performed by city officers and employees and to recommend in writing the salaries, compensation and wages thereof.

Licenses and Trade Regulations.—To inquire into and report upon all matters pertaining to the granting of licenses, the collection and rebate of license fees, the regulation of trades, occupations and businesses; the sufficiency of the sureties upon bonds given therein, and the enforcement of the laws and ordinances in relation thereto.

Railways and Public Conveyances.—To inquire into and report concerning the operation of railways, street railways, omnibuses, hacks, drays, steamboats and other public conveyances; and the enforcement of the laws and ordinances in relation thereto; and to recommend measures for the public safety and convenience in the use and employment of all public conveyances.

Public Health.—To inquire into and report concerning the sanitary condition of the city; to supervise the plumbing and severing of buildings and premises, the conduct and management of the city dumping grounds and the disposition of dead animals, garbage and refuse; to report and advise the means recommended for the abatement of nuisances, the disposition of dead animals, offal, garbage and refuse, the prevention of disease and of the pollution of the atmosphere and of the water supply of the city; to confer with, assist and direct the health officer in the enforcement of the laws and ordinances for the preservation of the public health and for the abatement of nuisances, and on the request of the health officer to authorize in writing the inclosing, in emergencies, of habitations for the suppression or prevention of the spread of communicable diseases in the city.

Harbors.—To inquire into, supervise and report in writing upon the maintenance, use and regulation of the harbors and the wharves, docks, structures and vessels therein; and to confer with and direct the harbor master to enforce the laws and ordinances in reference to the use and regulation of the harbors, wharves and vessels.

Pounds.—To inquire into, supervise and report upon the establishment and conduct of pounds and the enforcement of the laws and ordinances relative to impounding of animals, and to confer with and direct the poundmasters to enforce such laws and ordinances.

Adopted April 15th, 1907. DANIEL S. DONOVAN, Recorder. Approved April 15th, 1907. JOHN ROBERTSON, Mayor. (P1-21-F)

On account of overstock I must sell regardless of cost my large stock of wagons, carriages, buggies and harness at once.

Copper Country

MUNICIPAL LIGHTING PLANT.

Mayer Scott Wants One, Some Hancock Aldermen Do Not.

The Hancock common council talked over the municipal lighting question informally Monday night, during a hill in the regular proceedings. The discussion was illuminating and it practically resolved itself into a determination on the part of Mayor Scott to show the city...

Mayor Scott said that he had consulted an electrical engineer in Chicago who would come to Hancock for a small sum and give an estimate and plans for the plant. Then an electrical construction company in Chicago would furnish from this engineer's plans an exact statement of the cost of getting the plant in installed, wires strung, lamps burning. The mayor said that this company would demonstrate the value of the plant. He also asserted that the plant he had in mind would give each year twice as many lamps as the Houghton County Electric Light company now gives for the same amount of money.

Other Municipal Matters.

Engineer Craig presented the council at this meeting his plans for the retaining wall to be erected across the ravine at Front street. The plans were adopted, and Mr. Craig was instructed to ask for bids to be opened May 4. This wall is intended to hold in place a hill which the Hancock Real Estate and Improvement company is to make in the ravine, the southern terminus to be a portion of Front street and to take the place of the wooden viaduct at that point. The wall will be 120 feet long and 16 feet high at its eastern end, and at the other end will meet the slope

SCHOOLS ON LAST QUARTER.

Nine Weeks More for Teachers and Pupils of the County.

The schools of Houghton county have entered upon the last quarter of the present school year. Nine weeks will see the end of the term and the commencement exercises of another crop of sweet girl and manly boys graduates. The period is an important one as at this time the work is jointly a preparation for the end of the present year and the beginning of the next. The personnel of the grading classes is determined, and the teachers for the ensuing year are engaged.

In this latter department of their duties the superintendents are busily engaged. Applications for teaching positions are pouring in, and the superintendents have to give each one careful scrutiny. It is believed that teachers will be scarce next year, and in one high school in Houghton county the teachers generally have asked for an increase in salary of \$100 per annum, which a grant will be in the aggregate a heavy additional expense to the township.

All the superintendents in the county have been re-engaged for the ensuing year, except Mr. White, who this year steps out after being in charge of the Lake Linden district for most of a quarter of a century. Superintendent Kratz of Calumet, Superintendent LaRowe of Hancock, Superintendent Jeffers of Adams township, Superintendent Doelle of Houghton, Superintendent Pope of Osceola and the heads of the smaller school districts will be retained, which fact contributes to a steady advancement in the quality of the work. There promises to be many changes in the teaching corps. There are usually two causes which contribute to this condition, marriage and better positions. The changes now announced are about equally divided among these causes.

WORK OF JUVENILE "BANDITS."

County Agent Mason Will Have a Gang of Five to Investigate.

On the return of County Agent Mason from Lansing, where last week he took a boy to the industrial school, he will present at the hearing to be given by five small boys who were arrested in Hancock Monday. Until his return nothing can be done with them except keep them in jail, because the prosecution of such youthful criminals is under his charge.

This gang of boys seems to be the worst that the Hancock police ever struck. Chief Lee says so anyway. They are all twelve years of age or less and some of them have been in trouble before. They have been in the habit of robbing and robbery Sunday night, as the police allege, was a widespread one.

According to the officers, the youngsters first robbed a candle offering box in St. Joseph's church. This box is near a nest of pigeon holes, and these the altar first places the cost of the candle in this box. The boys broke the box open, but found nothing in it. They then visited St. Patrick's church and robbed a poor box, which contained, however, only a few cents. Next they broke into J. C. Donahue's paint store, broke in the rear door and robbed the cash drawer of \$8 or so.

The crowning deprecation of this night of infantile crime—again as the police tell it—was the robbery of Superintendent LaRowe's Central school building. The building was easy of access through a window. The boys found the safe closed, but the combination was open, and they easily swung the doors. The cash drawer was securely fixed within a pane of glass, and these the boys cut away. They tore out the drawer, and after taking a camera from a closet in the office went to a rendezvous where they broke the cash box with an axe. This netted about \$20. The last act of their wild career that Sunday night was breaking into Scott's laundry. Just what their haul was there was not learned. When Chief Lee arrested the boys he found on their persons about \$14. The boys had secured at least \$20 in their total haul, and had spent the difference.

Chief Lee says he believes that one of these boys takes delight in leading others into mischief. This youth has been in trouble before. In fact, the juvenile gangs have given the Hancock police trouble for many years. There have been robberies of business houses, robberies of freight cars, poor boxes and other places which might lead returns to the boy bandits. The recent movement of the Hancock school board in the direction of stopping truancy will lead to a shake-up among parents in Hancock, they being deemed largely responsible for the habits of their children.

There is talk of a curfew law which will empower the police to check children from the streets. The pool rooms of the city are also to be investigated. One has been reported to the police as a rendezvous for boys who are surely drifting into crime. A young man had to call at this place Monday night in search of his little brother, and he said that the room was reeking with smoke while the boys, some not more than six years of age, were indulging in talk which would shame the proverbial trooper. It appears that Hancock needs a Judge Lindsay.

DANGER IN HURON DAM.

Houghton People Seriously Alarmed Over a Possible Break.

The suggestion was advanced a week ago that there was danger of the old Huron dam breaking and precipitating a serious flood upon West Houghton. This was laughed at at the time, but the recurrence and persistence of the rumormake, people take the situation seriously. It is a fact that the spring thaws, which, however, have been mighty few so far, have filled the bed of the old Huron creek for four miles back of the dam. This is an unusually heavy weight of water against the structure, which is not modern by any means.

The Huron dam is thrown across Huron creek at a point on the hill back of West Houghton. Below it is the old creek bed, and a spring thaw precipitating a flood which washed out the old dam and created much damage in Houghton, killing at least three persons, who were asleep in a house which was washed away. When the dam was rebuilt it was in part of masonry, but not all of the quality of the dam at other points in the county now, huge structures of concrete.

The danger now lies in the excessive snowfall at the late season of the year. It is a certainty that the present heavy snow will melt unusually fast, and as the Huron dam is surrounded by hills, behind which the creek is the natural watershed it is certain that the stream will be given more water than it will accommodate. If the dam holds the water will flow over it undoubtedly and cause a minor flood, but for all practical purposes, if the dam breaks there will be a disaster.

NOTES OF VARIOUS SCHOOLS.

The junior class of the Houghton High school will give a dancing party in the Citizens bank hall Friday night.

The junior class of the Hancock High school announce a concert and reception in Germania Hall, April 30. The Michigan College of Mines Glee club will participate in the program.

Superintendent Jeffers of the Adams township school district has been elected school year will end June 14. This is the date of the commencement exercises of the High school.

NEW MOHAWK BANK.

Ed. G. Hecker, cashier of the newly organized Mohawk bank, stated yesterday that that institution would be ready for business May 1. The bank building, in process of construction, is rapidly nearing completion.

AIR PRESSURE IN MINE.

Figures Relating to Lowest Reading Ever Taken With Barometer.

Burrell Upham, science teacher in the Houghton High school, yesterday completed his compilation of the data obtained in a reading of the air pressure in the descent of the descent shaft last Saturday in the descent shaft in the world—one at the Tamarack mine. There is no question that this is the lowest, in depth, and the highest, in pressure, of any barometric reading ever taken.

The barometer was taken down in a man and readings were taken at various levels. At surface, which is 1,200 feet above sea level, the reading was 734.5 mm, or 28.92 inches. At sea level it was 762.5 mm, or 30.002 inches. At the eleventh level it had increased to 34.17 inches and at a little lower than 3,000 feet the reading was 82.7 mm, or 34.22 inches. The variation with depth for the 5,000 feet was 5.81 inches. This weight is something more than three pounds, which is the additional air pressure in which the men work at great depth in that mine. Mr. Upham explained that the extra air pressure is not felt by the miners because it is equalized, and the sensation which the extra dense air gives is rapidly dissipated in the case of a visitor to the mine if he has any means to give a low barometric reading.

The barometric observation in the Tamarack is of no particular scientific value, as it might have been computed almost as exactly without the descent. The trip was made to satisfy a natural curiosity. It is common knowledge that the smaller school districts will be retained, which fact contributes to a steady advancement in the quality of the work. There promises to be many changes in the teaching corps. There are usually two causes which contribute to this condition, marriage and better positions. The changes now announced are about equally divided among these causes.

GLASS POSITION UNIQUE.

Head of Baseball League in Which He Has No Residence.

The Northern-Copper Country Baseball league, presently in flux, has organized organizations throughout the country, a unique investment of the offices of president and secretary in one man and that man living in a town outside of the circuit. The honor of election to secretary of this league, which may be proud, and it is a tribute to the ability and reputation for faithful performance of duty, which have marked Dr. Percy R. Glass' administration of the office of secretary of the league.

Dr. Glass, thirty-third degree fan and lover of the game, who has been a baseball, broke into the magnum class about 1903, when Joe Ganzel and his full team were imported from Ionia, Mich., to represent Lake Linden in the Copper Country league. Dr. Glass was elected secretary of the league, and he has been the secretary of the league since then. He has been secretary of the league since then. He has been secretary of the league since then.

The annual meeting of the Lake Superior Congregational association will be held in Redbridge today and Thursday. Pastors and members of all Congregational churches in Houghton and Baraga counties, as well as from a number of towns of the upper peninsula, will be present. Interesting programs, consisting of addresses and discussions by pastors and members of all Congregational churches in Houghton and Baraga counties, as well as from a number of towns of the upper peninsula, will be present.

The first session will be held this afternoon, a business meeting. In the evening there will be a praise service conducted by Rev. Wm. Stevens of Chassell, followed by a sermon by Rev. W. B. Yokum of Hubbard. This will be followed by a communion service in which Rev. L. K. Long and Rev. H. Appleton of Calumet will preach. Ministerial reports will be given at this latter meeting.

CONGREGATIONAL ASSOCIATION.

First Session of the Annual Meeting to Be Held Today.

The annual meeting of the Lake Superior Congregational association will be held in Redbridge today and Thursday. Pastors and members of all Congregational churches in Houghton and Baraga counties, as well as from a number of towns of the upper peninsula, will be present. Interesting programs, consisting of addresses and discussions by pastors and members of all Congregational churches in Houghton and Baraga counties, as well as from a number of towns of the upper peninsula, will be present.

NOTES OF MARINE NEWS.

The Western line announced more than two weeks ago that the date of the first sailing from Buffalo for Portage Lake would be April 8. This first sailing is still prospective, and J. C. Thompson, Portage agent, has not yet stated yesterday that there was no telling when the start could be made. The 200 river is still impassable, and if Portage lake was all open water the condition in the other channel would continue sufficient blockade to the opening of navigation here, unless the water were being fitted out.

The tug Valerie of the Croze fleet crossed Portage lake Monday afternoon, the first boat to move in these waters this year. She was piloted across the lake directly opposite the Croze yard and picked up a crew on which some repairs will have to be made. The Valerie had been fitted out. The propeller Mastotte still lies under the water at the Ripley dock, but the Lloyds, her owners, are making preparations to raise her. Carpenter's yard is working on a number of small boats, and the proposed vessel added to the Portage lake mosquito fleet this season.

The tug Valerie of the Croze fleet crossed Portage lake Monday afternoon, the first boat to move in these waters this year. She was piloted across the lake directly opposite the Croze yard and picked up a crew on which some repairs will have to be made. The Valerie had been fitted out. The propeller Mastotte still lies under the water at the Ripley dock, but the Lloyds, her owners, are making preparations to raise her. HOUGHTON COUNCIL MEETING.

The Houghton village council held a special meeting yesterday afternoon. It was to act on a petition for the transformation of a residence into a store. The building is a frame structure, within the fire limits, and it required action before the proposed work could be undertaken. The special meeting was called because the owners of the building desired to commence operations at once.

JOE HAMILTON TO IONIA.

Sheriff Beck and County Physician Jackson left yesterday morning for Ionia, having in charge Joseph Hamilton, murderer of his mother, and who was committed to the asylum for the criminal insane by Judge Streeter. This closes the case. It is doubtful if Hamilton will ever leave the asylum. He is considered hopelessly insane.

RHEUMATISM

Relieved in 24 Hours or Money Refunded.

If you have Rheumatism, Gout, Sciatica or any other form of Rheumatism, you will find relief in 24 hours or your money refunded. This is no exaggeration. It is a fact that is proved by the thousands of testimonials that are daily received at our office. It is a fact that is proved by the thousands of testimonials that are daily received at our office.

some ice to break through, and when she started down the lake to the east she found the ice too solid for her to force her way through. She returned to the shipyard to await a more general opening of navigation.

EARLY WORK ON THE BALTIC.

A. Meads Tells of Past Operations on Ontonagon County Belt.

In a communication to the Ontonagon Herald, Alford Meads of Marquette, tells of some of the early operations on the south range sandstone formation in Ontonagon county. It is as follows: The location by diamond drill work at the Belt mine of the southern belt of sandstone and the Baltic copper lode, bids fair to revolutionize the copper mining industry of Ontonagon county. The so-called new find is on the southeast corner of the southeast quarter of section 31 and the trend of the formation carries it across the southeast forty of the southeast quarter of section 4, one mile to the southwest of the Belt mine, where the old Toltec Mining company owned three-quarter sections of land, being the north half and southeast quarter of section 4, now owned by a well-known Calumet lode.

Joseph James of Calumet left Sunday for the East. It is understood that Mr. James will bring back a bride, a well-known Calumet lady.

Rev. K. Selin, pastor of the Swedish M. E. church of Calumet, has returned from Two Harbors, Minn., where he had been conducting a revival.

Chief of Police Lee of Hancock has been advised of the death of Mr. Brock's father.

John Schroeder of Houghton, chemist at the Isle Royale stamp mill, has returned from St. Joseph's hospital, Hancock, where for the past two weeks he has been suffering with a mild attack of typhoid fever.

Exalted Ruler Stevenson of the Hancock lodge of Elks has appointed his standing committee for the year. The entertainment committee has arranged the first social session of the new regime for May 2. It will consist of a miniature minstrel show, such as has come to be a distinguishing feature of the lodge's entertainments.

W. F. Traves, for the past six years editor of the Hancock Evening Journal, has resigned his position to accept a similar post on the Menominee Herald-Leader. He will be succeeded by George A. Sheard, for the past four years editor of the Journal. It is rumored in Houghton and Hancock that the Evening Journal is shortly to be sold, and that it will discontinue publication.

The reports of the present weather conditions here have reached many copper country people who are summering away the winter in the south and abroad. The result is that they have decided to stay away a while longer. One copper country man, whose family have spent the winter in Bermuda, a land of perpetual sunshine, was advised that they were preparing to come home. He immediately mailed a picture of Sheldon street, Houghton, taken last Friday, and he thinks that will hold them in the Isle of onions and blues for a while.

"Jimmy" Duggan, the luckless boxer and trainer for the Portage Lake hockey club, has opened a physical training school in the Amphitron, utilizing the hockey team's training quarters. Jimmy has a large class and is making a hit. One of his pupils, who happens to have money, is going to erect a handball court near the Amphitron for the benefit of the class. Readers of Sewell Ford's "Shorty McCabe" stories will find a prototype of that "professor" in Duggan, which suggests that this is a good opportunity to study a little action in the flesh. Professor Duggan has definitely given up the profession of boxing and will hereafter devote his time to relieving the ills which come to others who have too much money and too little work.

KEWEENAW COPPER.

No. 1 Shaft on the Medora Now Down More Than 500 Feet.

An excellent copper showing is in evidence in the Keeweenaw Copper company's No. 1 shaft at the Medora property in Keeweenaw county. In fact, for the extent of opening work accomplished few mines in the Lake Superior district have ever made a better showing. No. 1 shaft on the Medora property is sinking on a dip of 24 degrees, the lode being some 100 feet below the surface. The shaft is now under way below the 500-foot level, and the shaft is bottomed in the richest rock thus far opened. Main levels are being opened at 225 and 375 feet, respectively, and owing to the flatness of the lode it is planned to open sub-levels at points midway between the main levels.

Drifting east on the first main level, at a depth of 225 feet from surface, has progressed 200 feet. At that point the drift broke into an old adit that was driven in a southerly direction 900 feet on a fissure vein many years ago, when the property was worked by its former owners. A good current of air is obtained through the old adit, which greatly improves the atmosphere in the shaft and ventilates the connecting workings.

HOUGHTON COUNCIL MEETING.

The Houghton village council held a special meeting yesterday afternoon. It was to act on a petition for the transformation of a residence into a store. The building is a frame structure, within the fire limits, and it required action before the proposed work could be undertaken. The special meeting was called because the owners of the building desired to commence operations at once.

JOE HAMILTON TO IONIA.

Sheriff Beck and County Physician Jackson left yesterday morning for Ionia, having in charge Joseph Hamilton, murderer of his mother, and who was committed to the asylum for the criminal insane by Judge Streeter. This closes the case. It is doubtful if Hamilton will ever leave the asylum. He is considered hopelessly insane.

For Catarrh, let me send you free, just to prove merit, a trial size box of Dr. Shoop's Catarrh Remedy. It is a new white, creamy, healing antiseptic balm that gives instant relief to Catarrh of the nose and throat. Make the free trial and see. Address Dr. Shoop, Racine, Wis. Large jars 50 cents. Sold by The Stafford Drug Co.

THE CITIZENS' NATIONAL BANK

HOUGHTON, MICHIGAN

OFFICERS. DIRECTORS. Graham Pope, President. R. F. Chynoweth, J. H. Jaeger, C. V. Seeber, Vice-President. A. M. Schutte, John G. Stone, C. H. Moss, Cashier.

Paul Humphrey MacNeil

ARCHITECT. Phone 548 L. Herman Bldg. Calumet, Mich. 6-24-17

The drift on the 225-foot level to the west is in a distance of 200 feet. At a point 175 feet from the shaft the lode was thrown out of its regular course by a fissure vein intersecting it at that point. It is planned to start a drift there, following the direction taken by the lode, and it is expected that the formation will return to its normal course at some little distance further on. Both the east and west drifts show good copper rock for the greater part of their length.

At the 300-foot level a shaft has been cut preparatory to the starting of drifts there, this point being a sub-level. At a depth of 375 feet the second main drift is in sixty-five feet and the west drift has progressed seventy feet. Excellent copper rock has been encountered in the openings on each side of the shaft. At a depth of 450 feet from surface a sub-level has been established, and drifting on the lode has progressed twenty-five feet in each direction from the shaft.

The 500-foot level, which will form the third main level, was reached only a short time ago, and drifting at that point has not been carried forward very far, but will be well under way in a short time. The lode is well impregnated with copper, and is richer than where exposed in the openings near the surface. Captain Thomas Houston of Calumet, who is mining director for the Keeweenaw company and general manager of its operations, is very enthusiastic over the showing in the deepest openings, and Captain Houston is the finest judge of copper rock having spent the greater part of his life in the Calumet & Hecla mine.

The Medora lode averages about ten feet wide near the surface, but it widens to fifteen feet at the 225-foot level, and will probably average fourteen to sixteen feet in width in the bottom workings. It furnishes an excellent stamp rock, the main portion of the lode being a soft, dark brown amygdaloid, with some calcite, quartz and pyrite, fine copper being freely disseminated throughout it. Some small copper is found in this portion of the lode. The formation is especially well charged with copper for about two or three feet from the foot wall, where it has a darker color, and contains considerable heavy copper, or barret work.

At a point in the shaft 240 feet from the surface, the lode was thrown about eight feet into the hanging by a crossing. This brought the richer portion or footwall side, into the hanging of the shaft. At greater depth, however, the lode dropped back to its normal position. The shaft on the Medora property is well equipped, the surface plant comprising the following buildings, substantially built: Combined boiler and engine house, shafthouse, supply house, dry house, machine shop, blacksmith shop and powder house. The hoist will carry sinking to the 1,000-foot level. No. 1 shaft is sinking at the rate of seventy-five feet a month, this including timbering, flat cutting, etc. There are nearly 10,000 tons of good stamp rock on the stockpile. At the present time six drills are in use, two sinking and the remainder drifting, but the number will be increased to ten, the capacity of the present plant, as soon as sufficient depth has been attained.

At the Empire property, about two miles east of the Medora, work was started a short time ago on a two-compartment shaft upon the Montreal lode. Trenching at that point showed the lode fifteen feet wide at the surface. Diamond drill cores extracted from the lode there reveal an excellent mineralized lode at depth. The Montreal lode was encountered in three holes, in the first at a point near the surface, in the second at a depth of about 600 feet, in the third about 1,000 feet deep. A complete surface plant for the Empire shaft has been ordered. It will be very similar to that now in use at the Medora shaft. Some time during the coming summer, after the Empire shaft gets down to a good depth, it is proposed to drive a crosscut to reach the Calumet conglomerate bed and investigate it at this point. The conglomerate is 400 feet from the Montreal lode and diamond drill cores showed the formation to be well charged with copper.

Drifting east on the first main level, at a depth of 225 feet from surface, has progressed 200 feet. At that point the drift broke into an old adit that was driven in a southerly direction 900 feet on a fissure vein many years ago, when the property was worked by its former owners. A good current of air is obtained through the old adit, which greatly improves the atmosphere in the shaft and ventilates the connecting workings.

S.S.S. 40 YEARS OF CURES

The value of S. S. S. as a blood purifier has been thoroughly proven by its forty years of successful service in the treatment of blood and skin diseases of every character. It is the best known and most generally used blood medicine on the market today, because in the forty years of its existence it has not disappointed those who have used it, and as a result of its universal success in curing disease it has made friends EVERYWHERE. It has been on the market for forty years, and its record in that time is one of which we are justly proud—it is a record of forty years of cures. As a remedy for Rheumatism, Catarrh, Scarcia, Sores and Ulcers, Skin Diseases, Contagious Blood Poison, and all diseases arising from an impure or poisoned condition of the blood, S. S. S. has made it a great into the circulation and thoroughly cleanses it of all impurities and makes a complete and lasting cure of these troubles and disorders. It furnishes to weak, polluted blood, rich, health-giving and health-sustaining qualities, and as this pure, fresh stream circulates through the system, all parts of the body are invigorated and made strong and healthy. S. S. S. is the only blood medicine on the market that can claim absolute freedom from minerals in any form. This great medicine is the product of nature's forests and fields, and is made from the healing, cleansing juices and extracts of roots, herbs and barks. It is, therefore, in addition to being a certain cure for blood troubles, an absolutely safe medicine for young or old. It is not an experiment to use S. S. S.; it is a remedy with a record and one that has proven its worth and ability by its forty years of cures. If you need a blood remedy begin the use of S. S. S., and write our physicians and they will send you a book concerning your trouble, and will give you, without charge, any medical advice.

IS YOUR BLOOD ALL RIGHT?

In a little while people will begin to have "Spring Fever." You may have it. Why not take something now and purify your blood and tone up your system. When the spring fever strikes you you will feel drowsy, lose your appetite, have no ambition and just drag yourself around. That is a bad way to start in the Spring work. We make a Compound Blood Purifier and Tonic which we have been selling for a number of years and recommend highly as a spring remedy for people who are not in good condition. It cleanses the whole canal, tones up the digestive organs so that the blood nourishes it right. It stirs up the liver and kidneys so that they take the impurities out of the blood. If you are moping around now, you may be surprised at the different feeling which will come over you before you finish one bottle of this remedy. We don't want you to buy it unless you need it, but we do want you to buy it in place of patent medicines of the "Blood Elixir" type.

City Brevities

Today's weather: Snow flurries; stationary temperature. Yesterday's temperatures: Seven a. m., 32 degrees; noon, 32; 7 p. m., 28. Maximum, 33 degrees; minimum, 25.

T. K. Hatch, of Calumet, spent yesterday in the city.

Daniel Sullivan, of Grand Marais, was a Marquette visitor yesterday.

S. A. Bush and F. LaLonde, of East Jordan, are Marquette visitors.

James Russell left last evening for Milwaukee, on a few days' business trip.

Miss Louise Nelson has gone to Negaunee for a visit with friends and relatives.

The G. R. A. to B. of L. E. meets this afternoon at 2:30 o'clock at Keough's hall.

Eugene V. Cassidy, of Ishpeming, transacted business in Marquette yesterday.

Mr. and Mrs. R. Swisher have returned to Marquette, after a four months' visit in the south.

Mrs. E. Harold Withey, of Hibbing, Minn., is being entertained as guest of Mrs. F. E. Withey, Pine street.

Mrs. M. Loden and daughter, Miss Agnes, have returned to their home at Escanaba, after a two weeks' visit with friends in this city.

Mrs. John O'Connor of Grand Rapids and little son, Clyde, left this morning for Seattle, Wash., to meet Mr. O'Connor, and make their future home there.

The Knights of Calumbus will give a dancing party at Keough's Hall this evening. Sweet's orchestra will furnish the music, and supper will be served.

Frederick Talbot, drunk and disorderly, sentenced to the county jail for thirty days, was brought down from Champion, yesterday afternoon, by Deputy Sheriff Charles Lavigne.

F. Lapire, first assistant at the Manitowish light station, is in the city, on the way to his post of duty. Mr. Lapire was second assistant last year, and received his promotion this spring.

Leo McGuire has returned from Wheeling, West Virginia, where he has for some time past been studying the art of scientific horseshoeing with S. Baumberger, one of the greatest experts in the country.

Frank G. Jenks, designated by Judge Stone to succeed County Clerk Elliott, is spending considerable time each day at the office, learning the ropes. He will assume active charge the first of next month.

Will Meet for Organization—The first meeting of the new board of supervisors has been called by Chairman John Treblosk of Tilden, township, for April 24. An organization will be perfected and committee appointments made.

Horse Thief Brought to Prison—Sheriff Zimmerman, of Flint county, brought John Johnson to the Marquette prison yesterday afternoon to serve an indeterminate sentence of from seven to fifteen years for horse stealing. This was not Johnson's first offense, as he was released from the Jackson prison about a year ago.

Ishpeming Saloon Man Coming—A. Paris, an Ishpeming saloon man, is planning to open a place on Third street, between Baraga avenue and Rock street, May 1. It is said that Leisen & Hennes, Marquette brewers, are interested in getting Paris located here. Leisen & Hennes have a considerable business at Negaunee and are now credited with the plan of invading the Marquette field.

Storm Has Narrow Range—According to the local weather bureau the present storm is very restricted in its range. Fair, with the exception of snow flurries along Lake Superior, is an exceedingly common weather bulletin. South of Escanaba the sun was shining yesterday morning and there was not the slightest indication of either rain or snow, while Marquette was experiencing a miniature blizzard.

Banquet for Elliott—Invitations have been issued for a farewell banquet to be given the evening of Friday, April 26th, at the Hotel Marquette, in honor of Mark Elliott, who has resigned the office of county clerk to accept the superintendency of the Mesaba range interests of the Interstate Iron company. The banquet is expected to be attended by 100 or more guests, many of them from the western end of the county.

Deeds of Iron Furnace Filed—The deed transferring the title of the old blast furnace from the former owners to Joseph H. Berry, Detroit, and William G. Sharpe, Elyria, O., was filed with the register of deeds Saturday. Yesterday Messrs. Berry and Sharpe reconveyed the property to the Northern Charcoal Iron company, a Michigan corporation. The description is given as Block D of the village of Harvey and the locality has taken on quite a boom.

Many Marriage Licenses—Cupid has evidently been working overtime in this locality the past few days, as the largest batch of marriage licenses of any day this spring was issued at the county clerk's office yesterday. Licenses were secured for the following: Forest Kibby and Maggie Brindel, West Branch; Osmann Smith, Big Bay, Louise Cain, New Dalton; John Porkemer, Dearborn, Anna Maria Lehtanen, Marquette; John J. Longstron and Marie Johnson, Negaunee; Ernest John H. Swanson, Annie J. C. Swanson, Ishpeming.

Sentenced to Reform School—Two boys who have not been regular in their attendance at school were rounded up yesterday by Truant Officer E. C. Quarters and were taken before Justice Byrne, where they were given a hearing in the presence of County Agent Blanchard. On the recommendation of the latter the court sentenced the youngsters to the reform school, the sentence to take effect on the first occasion the culprits are again reported absent from their class rooms. There has been considerable truancy of late, and the school authorities are determined to put an end to the practice.

Strong Musical Attraction—Copperdom playgoers have repeated the verdict of Duluth on "Forty-Five Minutes from Broadway." It was presented with much success at Calumet Monday and at Houghton last evening, it being the general opinion that it is one of the strongest attractions of the kind ever seen on this circuit. The company, with Corinne and Scott Welch, and others, is rich in talent—unusually rich—while the mountings for the production take up two baggage cars, with such complete-

ness is it presented. The seats for Thursday night's engagement are going rapidly, and the attraction will doubtless draw a capacity house.

To Be Examined Today—Paul Moilanen, a resident of Negaunee, will be examined as to sanity by Drs. A. W. and H. J. Hornbogen in probate court this morning at 11 o'clock before Judge Potter. Owing to the crowded condition of the state asylum at Newberry, Moilanen has been held at the county jail since March 9, in the hope that his condition might warrant returning him to his friends. The man, however, has grown no better, and as he is obviously in need of skilled medical treatment he will be committed today. Moilanen is a young man of about thirty, of good appearance and evident education. He sits silently in his cell for hours at a time, paying no attention to visitors. His arrangement is said to have been due to a disappointment in love.

Week of Self-Denial—The Salvation Army, throughout the United States, is this week observing a annual period of prayer and self denial. During less than twenty-six years' work in America the Army has demonstrated that it has an important mission to fulfill in reclaiming the lost, rescuing the outcasts, lifting the fallen and ministering to the needy as well as the souls of men. It is the aim of the Marquette corps during this week of self denial to raise sufficient funds with which to clear its indebtedness. The corps was unable to meet expenses during the winter, largely because of the relief work undertaken, and this week its members are denying themselves still more that they may secure the sum that is needed. It is the hope that the general public will assist in raising the fund. Ensign Corliss and his wife have done good work here, and they are deserving of all financial assistance that comes their way.

Championship Game Friday Night—The Northern State Normal basketball team will clash with the Crystal Falls High at Fraternity Hall Friday night, in what will virtually be a game for the championship of the upper peninsula. Crystal Falls will come here with an unbeaten string of victories. Both at home and abroad the team has so far proved invincible. Composed of a number of fine individual players, its team work is said by those who have seen it in action to be remarkable. Its latest victim was the Calumet team, which claims the championship of the copper country, which was easily defeated Friday night by the score of 39 to 12. Crystal Falls defeated the locals earlier in the season at Crystal Falls by a close score, in a hard fought contest. Since then the Normals have trained hard, greatly improving their team work. As they are now in fine form they are confident of reversing the result of the previous struggle.

Wrestler Wants a Match—Adelbert Chapin, of Oshkosh, Wis., at one time featherweight champion wrestler of America, is in the city and it is probable that Marquette sports will arrange a match for him. Chapin can easily make 122 pounds ringside, but declares himself willing to take on anyone up to 135 pounds. Chapin has beaten among other things, the little John McCue, of Racine, Wis.; Billy Murphy of Chicago, and Eddie Schwan, of Milwaukee. Four years ago at the Smith Opera house, Grand Rapids, he met M. K. Bely, of Detroit, in the longest match on record, the boys struggling on the mat for over four hours without either one being able to gain a fall. Wrestling used to be a great sport in the upper peninsula, but Duncan McMillan, King, Carkeek, and other men of note killed it by their unscrupulous fakery. In the game of grudge and get away a counterfeit sometimes looks surprisingly like the real thing when the men are clever.

PICTURE OF COLLEGE LIFE.

Is Ade's Great Play, at the Opera House Saturday Night. The greatest of all George Ade's comedies, "The College Widow" will delight a Marquette audience Saturday night. Some idea of the hit scored by this piece can be gained from the fact that two seasons ago it did a record-breaking business for more than eight months at the Garden theater, New York.

The scene of the play is laid in a Western college town. Hiram Bolton, a captain of industry, on his way to his alma mater, Bingham college, drops off to pay a call on his old college chum, President Witherspoon, of Atwater college, and is accompanied by his son Billy, the great half-back of the west. Billy's fame as a football player has preceded him, and the Atwater students make plans to capture him for their team. Witherspoon's daughter, known as "The College Widow," uses her charms and wins the football player for Atwater. Bolton's father is off for Europe, but before he sails he hears of his son's perfidy to Bingham. He rushes back, and arrives in time to see the great match between the two colleges in full swing. He attempts to take his son out of the game, but is kidnapped by the Atwater students and Billy is permitted to kick the winning goal in the last minute of play. The football match takes place in the third act. In the fourth and last act, "The College Widow" confesses her trickery to Billy, but this leads to mutual confessions, and the love spark, which has been kindled by "The College Widow's" subterfuge ends happily and consistently.

The comedy bristles with bright lines, teems with familiar types of college life, which we all recognize quickly, and gallops through from curtain to curtain. The piece has been staged with the care and attention to artistic detail which is a feature of all Henry W. Savage's attractions, and the cast is a large and efficient one.

BOWLING SCORES.

The three-men contest at the bowling alleys last night had this result:

Hoboes—					
Anderson	148	171	179	498	
Stafford	167	183	129	479	
H. O. Bell	182	182	154	528	
Totals	497	536	462	1505	
Hoodlums—					
Kriefeld	241	164	155	560	
Van Keuren	156	197	128	481	
Milner	159	148	176	483	
Totals	556	509	459	1524	

No other remedy on earth is so good for children as Hollister's Rocky Mountain Tea; makes them eat, sleep and grow. Bright eyes, rosy cheeks. 35 cents, Tea or Tablets. The Stafford Drug Co.

This is an attractive group because of the clothes the boys are wearing. The boy on the left has a Norfolk suit with Knickerbocker pants, ages 8 to 17; the next child a Russian, ages 3 to 8; the next the popular blouse suit, ages 3 to 10; the boy on the right a D. B. Jacket and Pant, ages 7 to 17.

In selecting Children's Clothes you want the best quality at a fair price. With us quality is more than an advertising term. It means clothing that at every point, from one end to the other has the utmost value of material and workmanship. It's the XTRAGOOD kind. SEE WEST WINDOW.

We've lots of snappy long pant suits for the older boys, ages 16 to 21, at \$8.50 up to \$16.00

NOTED MEN RAISE VOICES FOR PEACE

There has been a great deal of talk about peace in the world since the war broke out. Many men of high standing have raised their voices in protest against the war.

Monroe Doctrine Sacred. Returning to the subject of American control of American territory Mr. Van Cleave declared that there can be no arbitration of that principle through the Hague tribunal or any other peace body.

Your Hair Going? Stop it, then. And why not? Falling hair is a disease, a regular disease, and your own doctor will tell you the remedy.

of the National Grange, delivered a brief address. Five thousand young people responded to the invitation to a young people's meeting at Carnegie Hall this afternoon.

NEW YORK'S TANGLE. MANY COMPLICATIONS IN THE REAPPORTMENTMENT PROBLEM.

In Any Case It Is Likely to Result in Litigation—New Turn Has Strengthened Hughes. Albany, N. Y., April 16.—A problem in politics with ever-increasing possibilities, the re-apportionment situation at present promises to obscure everything else in the legislature for the next few weeks.

But if the governor declines to call an election there is still an opportunity for an election of the secretary of state as a Democrat. Believing that the defeat of Hughes' program by a Republican legislature may offer a chance for a Democratic victory, he may issue his call for an election.

There is the other phase to the tangle. The opinion in the recent court decision, which declared the existing apportionment unconstitutional, specified two districts in which the law had been violated and limited to those.

There has been a great deal of talk about peace in the world since the war broke out. Many men of high standing have raised their voices in protest against the war.

NOTED MEN RAISE VOICES FOR PEACE

MARKETS

DOWNWARD TENDENCY CHECKED. New York Stocks Rally, Then Become Extremely Dull.

New York, April 16.—The most conspicuous feature of the stock market today was the extreme dullness into which it fell. The downward tendency of the last few days was checked, and some recovery ensued.

Copper stocks had the advantage of a sharp rebound from the recent depression of copper metal in the London market, and these shares, if American Smelting were included, were conspicuous in the day's upward movement in prices.

Western Gold Stocks. Western stocks yesterday closed as follows, Paine, Webber & Co. furnishing the quotations.

Chicago Grain Markets. Chicago, April 16.—Rain and snow in Kansas caused general selling in the wheat pit today, and brought about a decline of almost a cent.

Copper Metal Prices.

New York, April 16.—Copper had a partial recovery in London today, with spot and futures both quoted at 496 lbs. Locally the market was dull and nominal, with Lake quoted at 24 1/2¢.

Boston Stock Quotations.

Closing prices were: Adve. 3 1/4 @ 3 1/2, All. 1 1/2 @ 1 3/4, Am. 1 1/2 @ 1 3/4, etc.

Vinol builds you up and keeps you up. Our delicious Cod Liver preparation without oil. Better than old-fashioned cod liver oil and emulsions to restore health for.

THE KILLGORE MEETINGS.

There was a meeting of great interest at the Baptist church last night. It was largely attended. An unusual man with an unusual message is now in our city, and plus his arrows of wit, sarcasm and criticism, which are shot in showers, heavy enough to hit every hearer, the speaker has a big heart, earnest and true.

SALOON LICENSE THE ISSUE.

Conditions in South Dakota Little Changed by the Municipal Elections. Sioux City, S. D., April 16.—Municipal elections were held throughout South Dakota today, the prevailing issue being the liquor license question.

CARNEGIE PENSIONS.

None to State Teachers, the Idea of President Pritchett. New York, April 16.—The Carnegie foundation for the advancement of teaching has just issued bulletin No. 1, which contains papers relating to the admission of state institutions to the system of retiring allowances of the Carnegie foundation.

Chicago Grain Markets. Chicago, April 16.—Rain and snow in Kansas caused general selling in the wheat pit today, and brought about a decline of almost a cent.

Copper Metal Prices.

New York, April 16.—Copper had a partial recovery in London today, with spot and futures both quoted at 496 lbs. Locally the market was dull and nominal, with Lake quoted at 24 1/2¢.

LAND TRANSFERRED.
Vandevanter Company Increases Holdings of Mining Corporation.

At a meeting of the directors of the Vandevanter Development company Saturday evening it was decided to transfer from the Development company to the mining corporation the forty acre tract on which one of exceptional richness has been discovered during the past two weeks. This is news that will greatly please the stockholders of the mining corporation. All of the original tract of 160 acres is now under contract. The only property still held by the Development company is the forty acre tract which lies one-half or three-quarters of a mile distant from the main farm. The latter has not been explored, nor is it likely that any work will be done there until the original tract has been thoroughly exploited.

Samples of ore procured from the drill holes have been received here and many shareholders have called at Carl Telfer's office to inspect them. Superintendent Fox reported that ore has been encountered in four holes, three of them at a depth of twenty-six feet and one at twenty-one feet. In the latter hole the deposit was eight feet thick while in the former it was six feet. Mr. Fox is following the trend of the formation in a southeasterly and northwesterly direction, in a direct line with the shaft put down last fall, about 1,900 feet of more from where the exploratory work is now being conducted. It is his intention to prosecute the drill work in the direction of the shaft, keeping as closely to the outer edge of the formation as possible. The width of the deposits judged from the holes already bored, is not less than thirty-two feet and it is possible that it may be forty feet in width. All of the holes thus far put down are on the north side of the creek, but a second drill started a few days ago, is now working the south side. It is found that the formation extends across the stream a series of holes will be put down extending to the southwest line, a distance of several hundred feet.

HAS A BUSY SHOP.
Ishpeiming Boiler Maker Is Turning Out Important Work for Mines.

W. T. Cole, the boiler maker, has one of the busiest places in the county. Besides doing outside work he is employing a good-sized force in the shop. The rush has been steady for months past and from present indications there will be no cessation, as he has a large number of orders booked.

Mr. Cole is building eighteen large oil tanks for the Oliver Iron Mining company. Nine of these are to be installed at the new oil house to be erected at the Lake Superior mine. The foundation of the structure was started last fall and it was the intention of the officials to complete the building then, but bad weather set in and the work was deferred. Operations will be resumed as soon as the weather modifies and Mr. Cole expects to have the tanks completed by the time the Oliver company is ready to use them. The other nine are for a house of similar size and design to be erected at one of the company's mines at Ironwood.

Another important piece of work soon to be turned out of Mr. Cole's shop is a breeching seventy feet in length by nine and a half feet high, for the Oliver company's Chapin mine at Iron Mountain. The breeching will connect a battery of six boilers.

A carload of material shipped from Cleveland, O., for Mr. Cole the latter part of last month, has been delayed in transit on account of the floods on the Ohio river. Some of the material is badly needed.

WEATHER INJURING TRADE.
Merchants Have Had Two Weeks of Exceptionally Dull Business.

"The grocers and the meat dealers are the only merchants who are doing any thing like their normal business," said a business man yesterday. "In most of my many years' experience here I have never seen such weather in April as we have had during the past ten days. Business has certainly been knocked on the head. The merchants who put in large lines of spring goods will surely be heavy losers, as the trade, starting late, will not be as heavy as it would have been ordinarily. The conditions are discouraging, to say the least, and it is not at all surprising that the merchants are disgruntled."

"During my thirty-four years' residence in the upper peninsula I have never seen such weather. I have seen snow in April, and in May, with good sleighing in April, but the present abundance of spring goods will surely be heavy losers, as the trade, starting late, will not be as heavy as it would have been ordinarily. The conditions are discouraging, to say the least, and it is not at all surprising that the merchants are disgruntled."

TURNED THE TABLES.
Oliver Bowling Team Won Second Series of Games from C. C. Team.

The second of the three series of three games each between bowling teams composed of office employees of the Cleveland-Cliffs Iron company and the Oliver Iron Mining company took place Monday evening at the Oliver alleys, and was won by the Oliver team, the first of the series having been taken by the Cleveland-Cliffs bowlers one evening last week. Following the contest a dainty lunch was served by the Oliver boys. The scores were as follows:

O. I. M. Co.—	Watters	147	145	147	439	Tot.
	Keese	133	127	133	393	
	Lokken	144	163	155	462	
	Hooper	146	147	141	434	
	Thompson	185	170	114	469	
Totals		755	752	690	2197	Tot.
C. C. L. Co.—	Fitzpatrick	150	148	137	435	
	Cummings	109	105	140	354

	Ramsdell	88	150	147	385	
	Shaddick	145	116	150	411	
Totals		624	667	715	2006	

MILITARY HOP.
The members of Company I, Michigan National Guard, are making extensive preparations for the second of their series of hops, which is to take place Friday evening at the armory in the Brantford block. Several hundred invitations have been issued, and it is expected that there will be a large attendance. All of the members of the company will appear in uniform and refreshments, including wafers, lemonade and other dainties, will be served. Fromby's orchestra will furnish the music.

HOW'S THIS.

PILES CURED IN 6 TO 14 DAYS.
Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cents.

ISHPEMING IN BRIEF.
M. F. E. Harris of Menominee spent yesterday in the city.
A daughter was born yesterday morning to Mr. and Mrs. Joseph H. Hooper.
Mrs. Harry Hulst and children left Monday evening for Milwaukee, on a visit to relatives.
Mrs. A. P. Gray of Traverse City, Mich., is here visiting her daughter, Mrs. Guy Canfield.
Erick J. H. Swanson and Miss Anna J. C. Swanson, both of this city, have been granted a license to wed.
Mrs. Dennis Sullivan will return to her home in Houghton today, after a week's visit with relatives here.
George F. Ruez, the locker, is ill with tonsillitis and the grip, and has been confined to his bed the past few days.
Mrs. J. E. Lindholm gave a linen shower yesterday afternoon in honor of A. Tekla Farm, who is spending a few days in the city.
Erick Erickson yesterday sold his residence property on North Sixth street to Henry Ohila, the consideration being \$1,100. The dwelling is on leased ground.
W. J. McCorkingdale, manager of the Marquette County Gas & Electric company, has leased the Donahoe dwelling on East North street, and his family will occupy it shortly after the first of May.
J. C. W. Chipman and Ben Mizen, a former resident, who has been in New York for some time past, left Sunday night on a Western trip. They will visit the more important points in Colorado, Utah and other states.
The members of Epworth League of the First Methodist Episcopal church will hold a penny social in the church parlors at 8 o'clock this evening. The charge for each article will be only one penny. A musical program will be rendered.
A large number of new dump cars for the Oliver Iron Mining company, manufactured in Detroit, have passed through the city en route for the Mesabi range during the past few weeks. From a dozen to two dozen cars have been passing through here daily.
Charles Sanders, who has been in the city the past few days visiting his folks, will leave this evening for points in Wisconsin. In a few weeks or so he will start west on a business trip for the Atlantic & Pacific Tea company, for which he has traveled for several years past.
E. R. Myers, who was in the city Monday looking for machine operators for a lead mine in Missouri, spent yesterday at Iron Mountain. He had a few callers here, but none of the men who called agreed to accept a position with his company. Mr. Myers will be in the city again today.
The camps of the Modern Woodmen of America and Royal Neighbors will conduct an entertainment and hop next Monday evening at the Woodmen's hall.

WANTED—Four or five convenient rooms, not furnished. Top man and wife. Advise Mining Journal branch office. 4-17-07.

REO 1907

REO 1907 TOURING CAR \$1,250
F. O. B. LANSING

18-20 horse-power, 94-wheel-base. Five passengers. Detachable tonneau. Two speeds and reverse. REO disc clutch. 40 miles an hour. Full lamp equipment. Top \$75 extra.

The car that beat 60 cars of double and triple its price, at hill climbing—
The car that won more than 20 cups, medals and trophies from bigger and costlier cars—
The car that holds its class record up Mt. Washington, and that crossed Mt. Hood, and the 12,000 foot Raton Range, in New Mexico—
The car went from Denver to Boulder, Colorado, (30 miles over rough hilly roads) in 15 minutes better than the railroad schedule—
The car that carried four passengers 1,050 miles over rough roads without stoppage, motor-repairs or car repairs—
The car that won the National Economy trophy and four other prizes in the same contests and that carried its passengers at a total cost of 30 cents each per 100 miles—
The car that was penalized 30 per cent, and practically barred out of the great 2-Gallon Efficiency Contest—
The only car that ever crossed this continent and back again on its own wheels—
The \$1,250 car which does all that the average \$3,000 car does—and more than most of them—
That is the car whose merit and real economy are self-evident. That is the car which you cannot afford to overlook. Write for the book that tells why.

STRONG COMIC OPERA.

Negaunee High School Glee Clubs Will Produce "The Mikado" Friday Evening.

Gilbert & Sullivan's most popular opera, "The Mikado," which the Negaunee High School Glee clubs have been rehearsing, will be produced Friday evening at McDonald's opera house. The story of the opera is interesting. The following is a brief outline:

Yanki-Poo, the son of the mikado of Japan, upon being required to marry Katisha, an elderly lady of his father's court, fled from home, disguised as a second trombone player, and joined the Titipu town band. Here he met and fell in love with Yum Yum, who is engaged to marry her guardian Koko, a cheap tailor, afterwards raised to the rank of Lord High Executioner. The Mikado, being struck by the fact that no executions have taken place in Titipu for a year, decrees that, unless somebody is beheaded within one month, the post of Lord High Executioner shall be abolished, and the city reduced to the rank of a village. Koko is already under sentence of death for flirting, and as Yanki-Poo has decided to take his own life because of his hopeless love for Yum Yum, he offers himself as a substitute for Koko and if Koko will allow him to marry Yum Yum, immediately, in a month's time, he will be beheaded. Not knowing that Yanki-Poo is the heir to the throne of Japan, Koko accepts his offer. The Mikado and Katisha arrive in Titipu searching for Yanki-Poo, who has married Yum Yum and gone off on his honeymoon. A false certificate of Yanki-Poo's death falls into Katisha's hands. A terrible condition of affairs ensues, but everything is satisfactorily explained. Koko marries Katisha, and all ends as merrily as a marriage bell. The cast of characters will be as follows:

The Mikado of Japan, Sidney Williams
Yanki-Poo (his son disguised as a wandering minstrel in love with Yum Yum) Edwin Ethier
Koko (Lord High Executioner of Titipu) John Erickson
Pooh-Bah (Lord High Everything Else) Ralph Yonker
Pish-Tush (a Noble Lord) John Thoms
Yum Yum (3 sisters) Julia McAuliffe
Pitti-Sing (wards) Elsie Koob
Peck-Bee (of Koko) Elsie Koob
Katisha (an elderly lady, in love with Yanki-Poo) Minnie Harris
Chorus consists of the following pupils:
Marion Reidy, Angeline LaMer, Loreta Helmsdorfer, Veronice Poley, Mattie Wiggins, Myrtle Lehman, Ella Reidy, Ellen Pello, Carrie Sterling, Elvira Ostrom, Mildred Yates, Lena Smedman, Junetta Heinonen, Edgar Williams, Gerald Flynn, Walter Sterling, Louis Townsend, Sam McKimmon, Philip Coombs, John George Dunstan, James McAuliffe, Harry Lee.

The members of the Mandolin club are as follows:
Minnie Harris, Lydia Mitchell, Goldie Harris, Marion Bedford, Ruth Miller, Mildred Yates and Angeline LaMer.

MIDSUMMER CELEBRATION.

Scandinavian Societies of U. P. Will Be Invited to Negaunee.

An important meeting of the Negaunee branch of the Scandinavian society will be held this evening, when committees will be named to take charge of the celebration to be conducted on Midsummer Day, June 24, at the Cleveland park, midway between this city and Ishpeming. The committee will send invitations to every Scandinavian lodge in the upper peninsula.

The Negaunee society conducted a most successful reunion at the Cleveland park three years ago. All the Scandinavian societies of the county were represented, and it was the unanimous opinion of the home people, as well as of the visitors, that the picnic was one of the most enjoyable ever held in the county. The Negaunee City band has been engaged. The program is to open with a parade, immediately following the arrival of the train from points in the western end of the county. The Ishpeming band, and one or two other bands are expected.

At the grove the ladies will serve dinner and supper, and lunches will be obtainable. There will be speeches by prominent members of the society, and a short program of vocal numbers. The bands will be heard at intervals. Dancing on the pavilion will be a prominent feature of the amusements. The platform is to be improved by the Marquette County Gas & Electric company.

DARANTELLA

CITY EMPLOYEES' SALARIES.

Wages Paid Municipal Officers and Workmen as Good as the Average.

Nearly all of the employees of this city are now working under a new wage scale. At the February meeting some of the workmen feeling an advance, and at the annual meeting of the council last week others were given more money. The following salaries were adopted, on recommendation of the committee on salaries:

	Salary per year	Salary per mo
Treasurer	\$ 480.00	\$ 40.00
Recorder	840.00	70.00
Marshal	840.00	70.00
Janitor (city hall)	600.00	50.00
Teamster (fire dept)	780.00	65.00
Assessor	400.00	33.33
City attorney	420.00	35.00
Chief fire dept	150.00	12.50
Night watchmen	720.00	60.00
Health officer	200.00	16.66
Librarian	600.00	50.00
Poundmaster	600.00	50.00
Clerk claims and nec.	90.00	7.50
Supt public works	1,584.00	132.00
Clerk of public work	840.00	70.00
Engineer at water wks	840.00	70.00
Lamp trimmer	840.00	70.00
Line man	840.00	70.00
Roadmaster	1,080.00	90.00
Teamster work team	650.00	54.16
Team work	1.50	1.25
Street laborers	4.80	4.00
Water works	900.00	75.00
Superintendent of public works	\$120 per month.	
Engineer at station	\$70 per month.	
Clerk	\$70 per month.	
Roadmaster	\$90 per month.	
Lamp trimmer	\$70 per month.	
Lineman	\$70 per month.	
Fireman	\$65 per month.	
Teamster	\$55 per month.	
Water works	\$75 per month.	
Street laborers	\$1.80 per day.	
Team work	\$4.50 per day.	

STORM STILL CONTINUES.

With the sun shining brightly and not a cloud visible in the sky early yesterday morning Negaunee people felt that the end of the storm period, which has continued for ten days, had passed, and that the snow would surely begin to disappear. But they were again disappointed, as it began to snow about 9 o'clock and by noon several inches had fallen. The street cars were out of commission at 7 o'clock Monday evening. The line was opened again yesterday morning, but the cars were not operated on schedule time as the track was in poor condition. The morning passenger from the south on the Chicago & Northwestern system arrived about one hour late, and some of the other trains were also delayed.

GORDON COMING HERE.

City Attorney T. A. Thoren has prepared the text of the changes in the Negaunee city charter ordered at the annual meeting of the council last Thursday, and would have sent them to Representative Gordon before this had not Mr. Gordon advised him that he will be in Negaunee some day soon, perhaps next week. There are only two provisions which the council desires amended, one giving the board power to bond the city in a sum not in excess of \$100,000. The other will permit the council to advance the monthly salary of the city recorder from \$40 to \$75.

A GOOD PIANO BUSINESS.

The Kimball Piano people are doing an excellent business in town this week. Chas. Laity purchased a beautiful piano, one that cannot be better unless duplicated. James Gleason, of the L. S. & L. got one of the finest instruments that is turned out of these wonderful factories, and Charles Letcher selected a duplicate of Chas. Laity's. On account of the condition of the weather this has been a good year for two days, although the Kimball Piano Co. leads wherever it takes hold. It speaks well of Mr. F. B. Leonard, the factory salesman, who has closed these sales. All of these instruments have been on exhibition at J. E. O'Donoghue's drug store, where they have been admired by everyone who has seen them. The one that will be sold from these this afternoon is another specimen of art.

AWNINGS.

The Kelly Hardware Co. can furnish you with awnings for stores, public buildings or residences. Any size. KELLY HARDWARE CO., (3-27-1f) Marquette.

"Let us have some Cudahy's Peacock Bacon and calves liver for supper Maas," say young and old. (11-27-eed)

SALOON IS OUTLAWED.

Temperance Advocates Believe Indiana Decision Helps Their Cause.

The current issue of the Home Herald contains a review of a liquor case in Indiana in which Samuel R. Artman, judge of the circuit court of Boone county in that state, rendered a decision declaring the granting of a liquor license unconstitutional, not only in the state because of the bad character of the business. Temperance advocates here believe that the decision furnishes ample grounds for the institution of a fight along similar lines in this state, and it is not improbable that a test case will be made.

The Hoosier jurist bases his decision principally on the ground that the sale of intoxicating liquors at retail to be drunk as a beverage is destructive of the public morals, the public health and the public safety, and is therefore inherently unlawful and cannot be licensed under the constitution of the state of Indiana or the constitution of the United States. He held that the police power of a state is exercised in order to promote the health, safety, comfort, morals and welfare of the public, that, measured by the common law the saloon business is unlawful and therefore without a legal existence. He found that common-law prohibition exists and prevails except where revoked and nullified by statute.

The counsel for the applicant argued that it was the exclusive province of the legislature to determine what measures are appropriate and useful for the protection of public morals, the public health and the public safety, and that its determination of the question, and the character of the measure, cannot be inquired into by the courts. Judge Artman held that to maintain that federal or state legislatures possessed such powers would be a political heresy, altogether inadmissible in a free republican government. The council for the applicant held that to strike down the state law legalizing the saloon would subject society to the innumerable woes and woes of an unrestrained liquor traffic, without any means of protection. That in such case there would be no criminal law by which it could be suppressed. Judge Artman argued that counsel's position was to maintain that an unlawful business must be legalized before it can be suppressed. If it were legalized, he declared, the most that could be done would be to regulate and control it as a lawful business; but, treating it as unlawful, it can be suppressed, abated, prohibited and absolutely annihilated, and this can be effectually done without any criminal statute. It is said that the decision of Judge Artman was the most important that had been rendered in Indiana in fifty years. It is also said that the decision coming at this time, is a great victory for the temperance advocates in Indiana, and the fight for the suppression of the liquor traffic has as a result stimulated the temperance workers in other states to more persevering efforts. Anti-saloon league leaders in this district believe that Judge Artman's decision will be a boon to their cause, and that public opinion will stand strongly in favor of his decision. A prominent temperance worker yesterday stated that the supreme court of this state will perhaps

LOCAL LACONICS.

The municipal electric lights were out of commission Monday evening, as a result of trouble at the power plant.

The board of public works has been authorized to purchase twenty-five additional water meters, which will be installed as soon as convenient after their arrival.

Many Negaunee people will attend the production of "Forty-Five Minutes From Broadway" this evening at Ishpeming theater. Special street cars will leave here at 7:30.

The employees of the Cleveland-Cliffs iron company's three mines in this city, the Jackson, Negaunee and Maas, will be paid today. The Oliver company will pay its start-of-workmen tomorrow and the employees of the Regent group Friday.

The schedule of bowling matches at the Orr & Tompkins alleys the remainder of this week will be the Ice Wagon and B. G. K's, tonight; the Wolves and Green Sox tomorrow evening; the Indians and Ravens Friday evening, and the prize contest Saturday evening.

M. H. Foard of Marquette and George B. Dufrain of this city will compete ten series of bowling games this afternoon at 4:30 o'clock, at Orr & Tompkins alleys. Five games are to be bowled. In a similar number of games bowled at Marquette a few weeks ago, Mr. Dufrain finished with a lead of thirty pins over Mr. Foard. Mr. Miller of Marquette will bowl a five-game contest this afternoon with Arthur Erickson, a member of the Ice Wagon's team.

The beautiful Kimball piano used at the musicale given at Levine Bros.' grand opening last night will be on exhibition at a great inducement for cash or on easy payments. F. B. Leonard, factory salesman, will be there from two until five this afternoon.

CATTLE RUSH STARTS SOON.

Ruling Opening Oreg Pastures Pleasing to Texas Ranchmen.

Quanah, Tex., April 15.—The annual spring rush of Texas cattle northward to pastures in Kansas and Oklahoma will soon begin. Already the railway companies are making preparations to handle the traffic. The ruling of Indian Commissioner Leupp throwing open the big pastures in the Osage Indian country to Texas cattlemen was received with rejoicing by the cowmen, for a bitter fight had been made against it by farmers and cattlemen of northern Oklahoma. The leases will expire early next March, and it is the general opinion that this will be the last year that the Osage lands will be leased. The work of allotting the lands is now in progress and with that completed there will be no longer any pastures to lease. The fight waged by the Kansas and Oklahoma cowmen against the incoming of the Texas herds has always been backed by the assertion that the south-err cattle brought fever ticks, deadly to the native stock. This led to experiments by the government to secure a

remedy, and, consequently, throughout the pasture lands and along the Texas border numerous dipping vats were constructed, where the southern herds were dipped in crude petroleum.

Federal Dip Is Opposed.

The use of the government dip, however, has been opposed by the Texas cattlemen, who allege that it is almost as destructive to their cattle as the fever tick is to the northern stock. Consequently from time to time other experiments are being made, looking toward the solution of the fever tick eradication in some other manner. Both government and state inspectors are participating in these experiments, believing that eventually they will discover a dip that will be effective in killing the ticks, and at the same time not be so hard on the cattle.

The government authorities, however, have always maintained that the majority of deaths of cattle, after being dipped in the crude oil, were due either to carelessness in the dipping or to the fact that cattle were so weak and poor that they were unable to stand the shock. An arsenical preparation is the latest substitute for the crude oil dip to receive the approval of the Texas livestock sanitary commission, and in all probability many of the cattle sent northward this spring will be dipped in this.

Mining News

Less Than 14 Per Cent of the Men Reported to Have Quit.

The Bisbee Review says: The number of employees of Warren district who have quit work and drawn their pay for the first nine days of April during the past two days, numbered less than 50.

The above number is the total of the employees actually on strike, those who have drawn their time and who do not intend to return to work for the Warren district companies unless the union is recognized.

These men were drawn from the mining companies of the district as follows: Copper Queen 328, Calumet & Arizona 92, Superior & Pittsburg 80, Shattuck & Arizona 80, Denn-Arizona 20.

Total 564. Estimating the total number of employees of Warren district companies to be 4,000, less than fourteen per cent of the number of employed have quit and drawn their pay.

Mechanics Will Stick to Work. At the meeting held last evening in Tammany Hall, pursuant to a call by the committee chosen at an informal meeting of the mechanics, forces of the mines, after an ineffectual attempt was made by union sympathizers and strikers to control the meeting, it was unanimously voted not to quit in sympathy with the striking miners.

This action conclusively moves that the mechanics will not recognize the right of the Western Federation to brand them as seabs even though they refuse to quit with that miners' organization.

The mechanics have occupied the pivotal point about which revolved the critical feature of the strike, it being thought by many that in the event of their quitting much weight would be thrown in favor of the striking miners. Without the mechanics' sympathy it is thought that the Western Federation must lose their fight. Now that this sympathy is materially lacking, and the crisis passed, no general shut down of the mines is looked for.

One hundred and thirty odd strong, the mechanics have turned down the request of the Western Federation sympathizers, and while a few of their number have taken it upon themselves in their individual capacity to leave their work, the rank and file and great majority of the mechanics will remain at their posts.

Mining Companies' Position. It has been hinted on several occasions that the mining companies would eventually effect a compromise with the organizers and be willing to treat with the union committee. In union quarters the statement has been made that the mining companies were making a pretended opposition to the efforts of the union in the Warren district and after some show of resistance, would accept the new conditions proposed to be inaugurated by the Western Federation.

A Review man yesterday afternoon made the rounds of the offices of the mining companies, including the Copper Queen, Calumet & Arizona, Superior & Pittsburg, American-Saginaw, Shattuck and Denn, and put the question direct to the several managers, as to what their position would be. The result of those interviews was in brief, from each and every manager, that this matter had been most seriously considered and the conclusion arrived at, in view of the fact that Bisbee had enjoyed for twenty-seven years unusual prosperity and peace, operating as an open camp, that under no circumstances would the companies accept a change in conditions looking toward the making of Bisbee a union camp, even though the alternative be a complete shut down for an indefinite period. These statements were made without reservation and without a single exception.

It was plainly noticeable that the vast majority of the men who went to work were miners who had hit a mill in almost every camp in the west, and are acquainted with conditions. They are mostly men in the prime of life, and past middle age, while on the other hand, those who obeyed the command of the organizers were mostly young men, and many of them headless boys, unexperienced in mining, lately admitted to a union, and anxious for the adventure of a strike.

GREENE-CANANEA.

The general expectation that an important increase in Greene-Canaanea Smelter production would not come about under a couple of years is likely to prove erroneous, writes a Cananea correspondent. The success that has been had with the rehabilitated No. 1 furnace since it blew in two weeks ago has demonstrated the correctness of the lines which have been worked on in arranging for the raising of the output of the plant to the maximum. As a result it is now confidently expected by Superintendent Shelby of the reduction division that not later than September the smelter will have made an increase in handling capacity of 40,000 tons over the 60,000 tons per month now worked. This will be accomplished within the same space the smelting plant now occupies, and solely through the rehabilitation of the other seven furnaces. No. 2 furnace is now going through the same manner of overhauling that No. 1 received and will be followed by the balance of the furnaces in order as rapidly as possible.

Newest Cananea Acquisition.

The most important deal since the flotation of the Cananea Central in July last is announced by John Talbot in the disposal of a controlling interest in the Bonanza de Cobre denouncement of 700 pertenencias to Thomas F. Cole and associates through L. W. Powell of Calumet & Arizona. The ground was acquired in June last by Mr. Talbot and L. Lindsay, the vendors of the America property of the Cananea Central. It lies north from the Greene smelter, extending to a point nearly opposite from the Puerco's mine at the Greene. Proceeding done on the ground last fall disclosed important conditions promising for the making of some great mines.

The formation extends about 200 pertenencias north from the upper end of Bonanza de Cobre to the granite core of the camp. This latter ground is held by Bisbee interests which have floated a close holding corporation under the name of the Cananea Northern Mining & Development. Figures involved in the

Bonanza de Cobre sale have not been made public, but are known to be in excess of \$750,000, as Messrs. Talbot and Lindsay were offered that sum in cash during the winter by other interests and turned down the proposal.

It is stated by Mr. Talbot that with Mr. Lindsay he holds an interest in the new flotation and that it is the understanding that the latter will allow of only a very limited issue of stock to subscribers. The deal has been known to be under negotiation for the last two months, during which time the Cole people have been flooded with applications for stock in the new flotation.

OLD DOMINION.

The Old Dominion No. 3 drift is reported still in the same character of ore as the No. 2, and the management sends word that it is at least as good as anything that has been encountered in that opening. No. 4 is being run to connect it with the other openings. The company, as soon as this work is done will start sinking the winze which will permit an exploration of the sulphide body at the 1900-foot level—200 feet farther down than the present openings. Geologists who have examined the deposit state that it has all the appearance of growing wider with depth. The ore body which the management has all along claimed would be the big producer of the property and which the company has been unable to do any work upon since the five and a half year ago still remains to be developed. This is the heavy body of silicious carbonates and oxides in what is known as the "West country" and which the company has already entered at the 800-foot level when the flood prevented further operations. This body has been showing as assay copper values of 10 per cent and to be a strongly defined permanent deposit. The company is waiting for the completion of shaft C before starting operations on the West country.

It has been a half price for the company that the United Globe has run into sulphides under Buffalo hill. This goes to prove that the mineralization extends in that direction. The vein showed 3 per cent copper and 17 per cent sulphur with a considerable percentage of iron. The vein itself was narrow, but the discovery is most encouraging for the reason that it shows this portion of the property has possibilities. The company also has a sulphide producer in the Continental property on which no small amount of work has been done. It is a steady shipper. Lack of ore therefore is likely to be one of the things that is least likely to trouble the company from this time forward. At the present time the Old Dominion is treating a greater percentage of its own ore than at any other time in its history. The company will have the use of its new furnace about June 1 and by that time work will have been started on the sixth furnace, which will be completed Aug. 1.

The company has finally disposed of all the old debts that were outstanding against it, which will leave both of the subsidiary companies, the Old Dominion Mining & Smelting company of New Jersey and the United Globe, entirely free from incumbrances. Owing to the good showing of ore made in the United Globe property, it is more than likely that this concern will spend all its funds hereafter in the development of the ground in the direction of the Buffalo hill, instead of distributing small dividends to the shareholders.

ONTONAGON NOTES.

Stephen A. Prince, for eight years clerk of the Adventure mine officials, has resigned and has been succeeded by J. W. Harrington, who has been acting as supply clerk. Mr. Prince left for Eveleth, Minn., having been tendered a good berth at one of the United States Steel company's mines on the Mesaba range.

Crooker Bros. have started a new industry on their place on the Norwich road. Some time ago they purchased the machinery which was used in Yirsa Bros.' factory at Rubicon and are turning out canthook and peevie stocks. They have an abundance of timber for this purpose and are manufacturing these goods advantageously.

But Hawley has purchased the cargo of coal on the Panama, which went on the rocks at Mineral Point last fall. It consists of a little more than 3,000 tons of the best quality of bituminous coal and is valued at \$12,000. The stranded steamer has not been effected by the heavy storms during the past winter nor by the movement of the ice. It appears to be securely imbedded on the rocks and will probably remain there until the cargo is removed. It is Mr. Hawley's purpose to handle the coal with scows during the spring and take it to Duluth, Houghton or some other point for disposal.—Ontonagon Herald.

For Coughs and COLDS

Nearly all other Cough Cures are constipating, especially those containing opiates. Kennedy's Laxative Cough Syrup moves the bowels. Contains no opiates.

Kennedy's Laxative Cough Syrup

CONTAINS HONEY AND TAR.

"A cold or a Cough nearly always produces constipation—the water all runs to the eyes, nose and throat instead of passing out of the system through the liver and kidneys. For want of moisture the bowels become dry and hard." Kennedy's Laxative Cough Syrup relieves Colds by working them out of the system through a copious action of the bowels.

Conforms to National PURE FOOD & DRUG LAW

THE PEOPLE'S DRUG STORE, Marquette, Mich. ——— Ishpeming.

GOOD BLOOD CLEANSER.

Mix one-half ounce Fluid Extract Dandelion, one ounce Compound Kargon, three ounces Compound Syrup Sarsaparilla, Take in teaspoonful doses after your meals and at bedtime. Also drink plenty of good pure water.

These ingredients can be obtained from any good drug store, and are easily mixed by shaking in a bottle.

This is said to be the simplest though safest and most powerful mixture known to purify the blood and rid the system of acids and other waste matter, which produce skin eruptions, sores, boils and other diseases. It is recommended very highly in all Kidney and Bladder affections, overcoming the most chronic urinary difficulties. Now is the time to take it, if you wish to insure good, sound health all summer.

AHMEEK.

Rock output at the Ahmeek mine has increased to 1,400 tons per day and this amount will be increased still further inside of two weeks. The product for the month of April will run at least 350 tons of mineral. Thirty-four drills are in operation, two shafts sinking steadily and fifteen drifts all working in fine copper ground. Electricity enters almost entirely as motive agent, and Ahmeek experiences are so successful that other mines are to adopt them. When the system now in such good working order was first suggested at Ahmeek the very radical changes resulted in general accusations of failure.

The shafts are now bottomed at 1,200 feet. First station at No. 1 was cut at a depth of 225 feet. Each succeeding level is 125 feet lower, the dip of the vein making it advantageous to place the levels at this distance apart. Sinking is going forward at the same pace in both shafts, although No. 1 will eventually run into Allouez at a depth of 3,900 feet. The combination rock house for the two shafts is working admirably. The rock house is located midway between the shaft houses. Endless cables on a high trestle carry rock cars from the shafts to the rock house, the automatic arrangement making the loaded cars handle the empties on the way back. There is a unique system for filling the cars for shipment to the stamp mill. As the rock passes through the crusher it finds its way to an electric shaker which feeds an endless conveyor to the rock bin. This is about thirty feet away and has a capacity of 1,600 tons. A tunnel is built in the bottom of this bin and permits the passage of rock cars to the bins of a single level attendant in charge can fill one of the forty-ton cars in less than twenty seconds. This rock bin is unquestionably one of the best of the kind ever perfected.

In No. 1 engine house is the compressor as well as the hoisting engine. The entire system is actuated by electricity. Compressors have capacity of forty drills. Power furnished for both engines No. 1 and No. 2 by battery of four boilers. Two additional boilers are ready for use when needed.

OLD DOMINION.

According to a Globe correspondent labor conditions there are better than any other camp in the Southwest. The camp is unionized through the Western Federation of Labor, but the relations between employer and employee are highly harmonious and the scale of wages now paid in Globe is the highest in the country (\$4 per day to miners). To allay any possible fear of labor troubles, however, the Globe Miners' Union have authorized the statement that they have no grievances against the camp. The companies operating in the Globe camp and no thought of a strike has been entertained. Mine development in the district is very active, more men are employed than ever before and greater confidence is felt in the stability of the camp.

Operations at the Old Dominion continue satisfactory. The fourteenth level drift to connect Nos. 2 and 3 crosscuts driven in the vein will be completed in two or three days, when the development of the sulphide ore chote through No. 2 crosscut will be resumed. A station is being cut in the foot wall opposite No. 2 crosscut, to sink a winze to develop the sulphide vein 200 feet deeper. An electric hoist and other equipment has been ordered for this and work will proceed rapidly. It is estimated that the sinking of B shaft below the tenth level and crosscut on this level to connect A and B shafts will be completed about May 1. The Globe-Kirkey vein near the dividing line of Old Dominion and United Globe is eight feet wide and averages 8 per cent copper and high in sulphur. It is now opened on the tenth level and is being opened on the eleventh. This vein has widened with depth, from a few inches higher up, to eight feet. This is one of the Old Dominion's important sulphide veins. The Old Dominion smelter is now running to full capacity. The fuel supply is adequate, and 1,200 tons of coke have been ordered and are on the way.

COPPER PRODUCTION.

The Boston News Bureau figures the production of copper in the United States, Mexico and Canada for the month of March at 102,495,230 pounds compared with 96,490,081 pounds in March, 1906, an increase of 6,015,149 pounds. The production for the first quarter of this year compared with 1906 has shown a net falling-off of about 10,000,000 pounds of copper as follows:

Table with 2 columns: Month, 1907 and 1906. Rows: January, February, March.

March was the first month of normal production this year, the output being about 17,000,000 pounds more than in February. This increase was contributed by all the leading camps. The Arizona production for March was 25,810,000 pounds, as compared with only 22,088,000 pounds in February. Butte, the Lake, Utah and Canada all increased their outputs. Utah did not increase as much as was expected, principally because the Bingham mines were seriously handicapped by inadequate transportation facilities.

Butte is now at about high record mark. The record Butte production was in January, 1906, with 31,068,200 pounds. The Boston & Montana strike may have affected upon April figures, as the Boston & Montana produces about 250,000

points of copper per day. The Amalgamated company reinstated 25 Butte the 3,000 men discharged in February who were employed in development work.

SHANNON.

The Shannon will have its new big furnace operating by May 1. All the parts were delivered thirty days ago, just in time as the new furnace is in operation the two furnaces now operating will be built together and they thrown into one. This work will take only three or four days after the building in part is complete. The company will use the same system as that employed at the Anaconda, where the entire plant was changed over by throwing the old furnace heads together. The Shannon for the past year has been offered more custom business than it could attend to and the extension of the furnace plant will enable it to take more of this kind of business. The New England & Clifton, particularly, is dependent upon the Shannon for the extension of its operations, and now that the train on that property is finished the company is in a position to deliver the Shannon an ever-increasing tonnage of ore. Production to date at Shannon has been much better than for the corresponding period of last month, and the company hopes to send its monthly output over the mill in a half mark this month and to keep there permanently, barring accidents. The coming on of steadily good weather will enable the company to do some exploration work, which press of others operations has prevented to date. The company has plenty of territory which has scarcely been touched up to the present time.

DAVIS-DALY.

Butte advices say that good progress is being made in the opening up of the Davis-Daly property, and the mines should be on a producing basis within the next few months. Crosscutting south from the 400 and 600-foot levels of the Moriah shaft was commenced last week. At the 400-foot level the vein will be reached, but cutting this time of not more than fifty feet from the shaft, and with dip continuing the same as at the upper levels—about 72 degrees—it will be reached easily at the 600-foot level. The Silver King shaft is now down 1,000 feet and sinking is going forward steadily. It being the intention to put the shaft down to 1,000 feet, the Colorado shaft has reached a depth of 700 feet and will be continued until a depth of 1,000 feet is reached. At that point the crosscutting will be commenced to intersect the Smokehouse vein, on which the company is drifting. The completion of this work will, it is estimated, require about three months. The crosscut from the 1800-foot level of Senator Clark's Original mine has now reached a distance of 1,500 feet and several promising veins have been cut. The Thomas vein will probably be cut within the next thirty days.

NOTES OF COPPER NEWS.

Benjamin B. Thayer, assistant to President Rogers of Amalgamated, is in Butte examining the mines of the company. He says that the work of development is to be greatly extended and the output increased. The Washoe smelter is now treating ore to its full capacity of 10,000 tons per day. Mr. Thayer says there is nothing in the metal situation that can possibly result in a reduction of the price of copper, as the output of the mines and smelters cannot supply the present demands. He says the Amalgamated mines are in splendid condition for production.

The annual statement of the East Butte company shows that the company has been in active operation a little more than a year. Since the time it has sunk 1,200 feet of shaft. The main shaft is now down 800 feet and the other 600 feet. Both shafts are 16 by 4 1/2 feet in the clear and are among the biggest shafts in the district. Five thousand feet of drifts and crosscuts have been made since the company began operations and ore bodies have been opened on the 200, 400, 600 and 800 foot levels. The company has issued 210,000 shares of stock and has cash and stock in its treasury amounting to \$1,000,000. During the year it increased its holdings from seventeen acres to 132 acres. The company owns a \$40,000 precipitating plant, the royalty from which is about \$2,000 per month. Total earnings during the year have averaged about \$30,000 per month.

The United Copper company's Lexington ton mine, operated by the La Flexing company, which in turn is owned by the United Copper company, is producing copper above the 500-foot level and sending the ore to the shaft turned out to the Anaconda smelter. The Lexington, which was formerly operated as a silver mine, has one ore silver, copper and zinc. Before the Montana Zinc company was placed in bankruptcy, some months ago, a contract existed between this concern and the United company whereby the zinc ores from the Lexington were to be treated by a patented process owned by the Montana Zinc company. Since the failing of the Montana Zinc company, however, the zinc ores have been allowed to accumulate awaiting their disposition by another process. The shaft of the Lexington is down 1,400 feet and some months have been consumed in unwatering it. At the 500-foot level the water flowed into the Alice mine of the Butte Conditon and it was also necessary to draw the water from that mine. As well as eliminating the water from underground, considerable retrimbering has been made ready for full operation. The plant of the Basin Reduction company, owned by the United Copper company, it is stated, will undoubtedly commence operations within sixty or ninety days on Lexington and possibly custom ore.

For the first time in the history of the Globe district the Old Dominion company has been forced to refuse shipments from various producing mines because of its inability to reduce other than its own ores, with the exception of sulphide shipments from the Arizona Commercial and Gibson mines. Custom ores are piling up, with no early prospect of their being reduced to bullion. The Lake, Utah and Canada is due to the fact that the Old Dominion is now extracting from its own mines more ore than can be treated at the smelter with its present capacity. The surprising developments of the past month have been made apparent by the fact that the capacity of the smelter is inadequate for the ores from the company's own mines, and further enlargement of the smelter has been determined upon by the management on a larger scale than at first con-

templated. No. 5 furnace will be installed and in operation June 1. The sixth blast furnace has been ordered, which should be in working order by August.

Development work accomplished within the past two weeks has proved the strike in the Black Oxide tunnel of Superior & Boston much more important than supposed. Drifts have been encountered, and, as anticipated, the hanging-wall proved to be only a small strip, which the drill went through on Saturday. Since then they have been in good ledge matter—principally iron, with some copper. President James Chynoweth and Secretary W. C. Rice visited the property this week and, according to President Chynoweth, the ledge in the tunnel is twenty-two feet wide, with breast in the same character of vein matter. President Chynoweth was strongly impressed with the importance of the strike and instructed Superintendent Snell to increase the force of miners, drift both ways on the vein, and as soon as possible also rise and sink, immediately extend the pipeline to supply power for the drills, and push development as rapidly as possible. Seventeen feet have been made in the crosscut from the 160-foot station of Great Eastern.

WELL DESERVED.

The Praise That Comes From Thankful Marquette People.

One kidney remedy never fails. Marquette people rely upon it. That remedy is Doan's Kidney Pills. Marquette testimony proves it always reliable.

James Rivers, teamster, of 159 West Washington street, Marquette, Mich., says: "I have used Doan's Kidney Pills and know from experience that they cure backache. I hurt my back a few years ago. I limped around for several days, but seemed to get all right again so I did not pay attention to the trouble. About six months after I noticed every once in a while I would have a catch in my back if I would change my position quickly. If standing or sitting for a while, and moving suddenly this catch would be the result. This generally affected the small of my back. I paid no attention to it at first but the attacks became more frequent and lasted longer than before and would always leave a dull pain which became a source of annoyance. It finally became so bad that I could scarcely stoop forward to pick up anything. I put on a kidney plaster and it gave me temporary relief but the weakness soon returned. I read a great deal about Doan's Kidney Pills and the cures they effected, so when my back was real bad I went to the Stafford Drug Co's store for a box and began their sale. They went straight to the seat of the trouble and gave me relief in a very short time. I used only two boxes and was cured. I can lift as much today as I ever could and have had no backache since I took Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name Doan's—and take no other.

THREE EPOCHS IN A WOMAN'S LIFE

MRS. ELVA BARBER EDWARDS. MRS. GEORGE WALTERS.

There are three critical stages in a woman's life which leave their mark in her career. The first of these stages is womanhood, or the change from a care free girl to budding womanhood. The second is motherhood, and the third is Change of Life.

Perils surround each of these stages, and most of the misery that comes to women through ill health dates from one or another of these important crises.

Women should remember that Lydia E. Pinkham's Vegetable Compound made from native roots and herbs has carried thousands of young girls over the critical period of puberty, has prepared mothers for childbirth, and in later years carried them safely through the change of life more successfully than any other remedy in the world. Thousands of testimonials from grateful persons, two of which are here published, substantiate this fact beyond contradiction.

Mrs. George Walters of Woodlawn, Ill., writes: "Dear Mrs. Pinkham:— I feel it my duty to tell you of the good Lydia E. Pinkham's Vegetable Compound has done me in preparing for childbirth. After suffering and losing my children a friend advised me to try your valuable medicine, and the result was that I had very little inconvenience, a quick recovery and

During its long record of more than thirty years its long list of actual cures, entitles Lydia E. Pinkham's Vegetable Compound to the respect and confidence of every fair minded person. Lydia E. Pinkham's Vegetable Compound Makes Sick Women Well.

Upper Peninsula

Reappointed at Higher Salary— E. J. Willman, superintendent of the Gladstone schools, has been reappointed for a term of three years. His salary will increase \$100 each year.

Superintendent Will Not Return— A communication has been received by the L'Anse board of education from Superintendent W. J. Morrison, stating that he does not desire to retain his position another year. His decision comes as a great surprise.

Iron River Salaries— The salaries of the several Iron River officers have been fixed as follows for the ensuing year: Engineer at water works, \$150; clerk, \$100; treasurer, \$100; assessor, \$50; attorney, \$100; health officer, \$50; fire warden, \$50; marshal, \$65.

Killed on the Mesaba— Thomas McDonald, a former well known resident of the Gogebic range, was accidentally killed at Chisholm, Minn., where he was employed at steam shovel work. McDonald was employed as a lumberman at Ironwood many years and left but a short time ago for the Mesaba range.

Captured Two Cubs Alive— J. H. and Robert Hunter, Newberry men, while looking over a piece of cedar land north of town stumbled upon a bear's den in which were a mother bear and her three cubs. They succeeded in bagging the four. In shooting the old bear one of the cubs was also killed, but the other two were captured alive.

Trial of Suit Postponed— The case of Morris Jensen vs. the Dessau Mining company, an action for personal damages in the sum of \$10,000, which was noticed for trial last week at Iron Mountain, has been postponed until the next term of circuit court. Messrs. Ball & Ball, attorneys for the Dessau company, were unable to attend court.

Hit the Nail on the Head— In the Dickinson county circuit court, today, an Austrian, who was an applicant for citizenship papers, was asked, among other questions, by the United States district attorney, "Who elected the governor of Michigan?" With commendable promptness the applicant responded: "The Republicans."

Opponent's Majority Increased— Louis Cristinelli was a candidate for supervisor in Third ward of Norway against Gordon Murray. According to the returns he was defeated by one vote. He petitioned the city council for a recount. It was granted, but to his surprise the recount proved he had lost the election by three votes instead of one.

Arm Horribly Mangled— The limb coming in contact with two gear wheels, every inch of the left arm of George McCastle, who operates a saw mill in Hiawatha township, Schoolcraft county, was broken and mangled before the machinery could be stopped. It was a terrible injury. The arm has been amputated, and McCastle will recover.

Dickinson County Timber Deal— Janquet Brothers, loggers, of Green Bay, Wis., have purchased the timber on eleven tracts in Section 35, 43-29, township of Sogola, Dickinson county, from the Keweenaw association. The timber is mostly pine and cedar. The firm has five years in which to clear the land. The consideration was \$8,500.

Former G. P. Man— Dr. M. R. Parmelee, a former upper peninsula man, has been appointed to a professorship in the Harvard Military academy at Los Angeles, Cal., at a large salary, together with many privileges. The institution is the finest of its kind on the western coast. Dr. Parmelee was the first graduate from the schools of Iron Mountain, of which city his patients are still residents.

Appeal Asked in Damage Suit— Judge Stone has informed the attorneys in the case of the estate of Stefano Cristinelli vs. the Saginaw Mining company that he will be prepared to hear arguments on the motion for an appeal at the next term of court at Marquette. At the January term of court the jury returned a verdict for damages in the sum of \$3,000 for the plaintiff. Cristinelli was killed by falling down a shaft at the Saginaw mine.

Ironwood's Orators Chosen— At the preliminary oratorical and declamatory contest at the Luther L. Wright school building at Ironwood, first place in oratory was won by Elwin Hendrickson and in declamation by Marion Williams. These two will represent Ironwood in the Eastern division contest to be held in that city Friday evening next. Mellen, Ashland and Ironwood will be represented.

Logger's Successful Season— Robert Grestner, who operates a logging camp at Carey's Spur, in the Menominee range country, has suspended operations for the season. During the winter he banked on the St. Paul road 50,000 logs, 10,000 poles, 150,000 feet of hardwood posts and 400 cords of pulpwood. He has sold the cedar to the Hugel company and the pulpwood to a

Green Bay paper mill. Mr. Grestner still owns considerable timber in that vicinity and will continue his operations another year at least. He intends spending the summer on his large farm near Green Bay.

Novel Damage Case— The case of E. N. Kraemer vs. Edward Martin, tried in the circuit court for Dickinson county, has resulted in a verdict for the defendant. The action was a novel one. The plaintiff alleged that buildings valued at \$2,000, located on his farm in the township of Waunakee, were destroyed by a grass fire started by the defendant, and judgment was asked in that amount. Two days were taken up with the trial.

Wins Honors in the West— Alex. Main, a former well-known resident of Newberry, and for many years judge of probate of Luce county, has just been elected to the office of city clerk and police judge at Coeur D'Alene, Idaho. It is one of the best paying offices in the municipality. This was the first election under the new city charter of Coeur D'Alene and Mr. Main showed the kind of political training he had received in Michigan by walking away with the largest majority of any candidate on his ticket.

Electricity Will Do the Work— Electricity is to be made to do the work of handling products in and about the Manistique blast furnace and chemical plant of Barry Bros., of Detroit, the biggest producers of charcoal pig iron in the country. A complete haulage system is to be installed. At present the supply of charcoal is transported from the kilns to the furnace on push cars, and the same primitive methods are used in moving pig iron from the casting house to the yards. The new method will save time and money.

Frightened at Rutledge— Every saloon was closed Sunday, that is to all outward appearances, and the streets were as orderly as any town in the state, says the Crystal Falls Drill. There was no noise heard by the persons passing saloons and no drunken men appeared upon the streets, yet at the same time any person desiring a thirst quencher could get one without any difficulty. It was to his surprise the proprietors of a city town and orderly town. Explanation: Rutledge was here. (?)

Bridges Will Be Erected Anew— The investigations of the causes of the destruction of the bridge connecting Wallace and Wagner and the bridge at Wausaukee, have been completed. The Menominee and Marinette county boards and the Nelsie Construction company have come to a settlement. The settlement favors the counties in every particular. The Joliet people, through their representatives, have agreed to replace the structures at the company's expense and will immediately take a force of men to both places to pull the bridges to the shore. As soon as the snow leaves, the real work of reconstruction will be begun.

New Curtains for Theaters— H. C. Chevalier, representing a Detroit scenery company, has been in St. Ignace for some days past. While there he has repaired all the old drop curtains at the Nelsie scenery in Open House, and also a new drop curtain containing a very pretty center scene and twenty advertisements of merchants lettered around it. In addition he is painting curtains for the opera houses of Escanaba, Newberry, Gladstone, Marquette, Marquette, Charlevoix, Boyne City, Alpena, Bellaire, East Jordan, Central Lake, Ishpeming, Lake Linden and Negaunee, the work being done at St. Ignace.

Postoffice Shows Large Gain— The business of the Iron Mountain postoffice shows a large advance for the year ending March 31st. The receipts from box rents, stamp sales, etc., were \$13,618, an increase over the previous year of nearly \$2,000. The money order department receipts were \$63,309.52, an increase of \$37,700.14, making the total receipts \$81,990.62. The Iron Mountain postoffice is the depository for a number of small offices in the vicinity and the receipts from this source were \$204,914. If this sum is added to the income from rentals, stamps, receipts for money orders, etc., the total reaches the large sum of \$288,904, a greater sum than is handled at any other postoffice in the upper peninsula.

Blacksmiths Boost Prices— Under the presidency of Alexander McDonald, of Sault Ste. Marie, the blacksmiths of Chippewa county have perfected an organization designed in the main to maintain an increased scale of prices. Gustaf Kirvan is secretary. The charges for horse-shoeing have been advanced from 20 to 25 per cent. The rate for shoeing a horse now is \$2 instead of \$1.50 as before, and that for setting old shoes is \$1 instead of seventy-five cents. The former price for bar shoes was eighty cents, and the present rate raises it to \$1. Prices in other and less important branches have been increased proportionately. Affiliation will be had with the national association of blacksmiths.

Won in All Courts— The case of the Ohio Mutual Fire Insurance company vs. the Weston Lumber company, which has been pending for a number of years last past, has been decided in the supreme court of the United States in favor of the defendant.

Back in 1890 the Weston company obtained two policies of insurance covering \$10,000 worth of lumber in the yards at Manistique, and shortly afterward the insurance company went into the hands of a receiver. An assessment of \$800 was levied against the Weston company and suit was brought in the circuit court of Schoolcraft county to recover. Judge Steere decided the case in favor of the Lumber company and the state supreme court affirmed the judgment. A writ of error was then taken to the nation's highest tribunal, and the case has finally been disposed of with still another decision adverse to the insurance concern. The case was important in that numerous other assessments against policyholders hinged on the outcome.

Need for More Teachers— The board of education at Newberry has engaged the following teachers for the public schools for the next ensuing year: Superintendent H. G. Warne and the Misses Reese, Anna Besley, Emma Wilson and Grace Holt. There are still a number of positions to be filled before the corps will be complete. The principal man, who has held the principalship, will not teach the coming year, and it is the intention of the board to engage a man for this position. The old corps of teachers at Dellaville were re-engaged. They are: Principal Lewis, Miss Anna Grant and Miss Rachel Brown. Miss Cassie McKay was engaged as teacher of the Wood camp school.

Boy Loses Both Legs— Despite the fact that physicians thought they would be able to save the injured limbs of Master George Berg, of Baraga, who was run over by a train, circumstances so developed that it was found that amputation would be necessary, consequently one of the injured members was removed and the other was taken off two days later. It was found that blood poisoning had begun to set in, which made it necessary to remove both limbs a few inches above the knees. As the little fellow is in a very weak condition grave fears are entertained for his recovery.

Indications of Oil— Oil having been found there on the surface of small bodies of water, and investigation having disclosed geological conditions indicative of the existence of petroleum at depth, a corporation known as the Upper Peninsula Gas & Oil company has been organized for the purpose of conducting drilling operations on Drummond's island, at the mouth of St. Mary's river. Chase C. Osborn, former state railroad commissioner, is among those interested. Much of the work was completed last year by Firms from the copper country, headed by Miss Maggie Walz, and leases are now being secured by the oil company from these settlers, permitting the exploitation of the oil homesteads for possible petroleum deposits.

Suicide at Menominee— Carl Olson, sixty-six years of age, was found in the bedroom of his home, 515 Parmenter street, Menominee. Temporary insanity from despondency, the intimate man had committed suicide by hanging himself. He had been deaf several years, and had been in the hospital for some time. The body was discovered by Police Officer Charles Van Doover, who had been notified of the suspicious of the family living down stairs. After forcing in the door, the officer entered the bedroom and found the man hanging from a rafter by his neck. A note pinned to the wall read, "I am sorry, but I cannot live any longer. I am sorry, but I cannot live any longer. I am sorry, but I cannot live any longer." A pencil circumstance is that the clock was stopped at twenty minutes past ten.

Garbage Collection Proposed— Alderman Edward C. Voght of Escanaba will father a resolution to be introduced in the common council there providing for the establishment of a garbage collection system, such as has been needed for many years, but to establish which all attempts in the past have failed. Alderman Voght is convinced that one of Escanaba's most urgent needs at this time is the adoption of some plan which will prevent the jumping of garbage and refuse of all kinds in the alleys and rear yards throughout the city, and that a general cleaning movement with the coming of each spring and causing general insanitary conditions. Garbage collection systems have been established in every progressive city of the country—Marquette and some others excepted—and that Escanaba has failed up to this time in its adoption of modern methods for disposing of its refuse of this kind is not considered there to be creditable to the municipality. What plan should be adopted has not yet been decided, but from investigation it is up to this time it is believed that garbage cans should be provided by the city and the department supported from the general fund.

Fire's Origin a Mystery— The Bouscher building on Maple avenue at Manistique caught fire owing to the gas blowing at the time was badly gutted before the department got it under control. The building in question has a frontage of eighty feet and depth of ninety-two feet, and was occupied by Lundstrom & Sanberg, liverymen, and by Mr. Willough for saloon purposes. The losses incurred are covered by insurance. The fire was first discovered by Mr. Lundstrom, who was awakened by the noise of the fire. Upon investigation he found the south portion of the second floor burning fiercely. He sent in an alarm, and with those that came to his assistance, removed the horses, buggies, harnesses, office fixtures, etc., from the building. However, the cutters as well as a large quantity of hay and feed stored on the second floor were destroyed. The Willough bar fixtures and some of his stock of liquors were removed. At this time no chimneys located in the portion of the building where the fire had its origin there is some speculation as to how it gained its start. Mr. Bouscher carried \$3,100 insurance on the building and contemplates rebuilding same as soon as possible.

Whooping Cough— I have used Chamberlain's Cough Remedy in my family cases of whooping cough, and want to tell you that it is the best medicine I have ever used.—W. F. Gaston, Posco, Ga. This remedy is safe and sure. For sale by The Stafford Drug Co.

ISHPEMING

RATES FOR THE ELKS.

Trunk Lines Grant Reasonable Fares for National Event.

Members of the Benevolent & Protective Order of Elks of this district who contemplate attending the national convention and reunion at Philadelphia, July 15 to 23, inclusive, will be pleased to know that the Trunk Line association, which controls the rates on a single fare plus \$1 for the round trip from all points beyond 100 miles from the convention city, tickets will be issued from July 1 to 23, inclusive, and will be good for return passage until July 31. In addition, special rates will be given from cities within a radius of 100 miles of Philadelphia, and the Elks' arrangement committee sends word to the secretaries of the various lodges that particular care will be paid to the transportation of visitors from all points. It is understood that the railroads running between Philadelphia and the Atlantic seashore resorts will agree upon a special rate of fare to prevail during the convention week. It further stated that all things considered, the concessions that will be made to the Elks will be the most liberal ever given to any order conducting a national meeting at any of the more prominent cities in the East.

FROM HOPKINS' CURB LETTER.

"Copper shares failed to reflect an advance of 2 pounds 5 shillings for spot and 2 pounds for futures in the London market today, although a firm undertone existed at all times, and the leading issues exhibited considerable strength. North Butte failed to reflect the bullish statement issued today. For the fiscal year ending March 31st, the company produced 32,565,007 pounds of copper. The average price received for the metal was 20.67, an increase over the previous year's price of 4.20. Operating expenses amounted to \$3,081,513, an increase of \$790,395. Surplus amounted to \$2,151,850, an increase of \$447,920. Superior & Pittsburg exhibited very inferior support in scattered and very indifferently.

The day's prevailing prices were:

Table with columns: Bid, Asked, American, Warren, Wolverine & Arizona, Deere Mining, U. S. & A., Superior & Pittsburg, Ariz Com, Shattuck, Cananea Central, Globe Cons, Superior, Calumet & Globe, North Butte Exten., Butte Exploration, Butte & London, Black Mountain, East Butte, Hancock, Superior, Keweenaw, Nipissing, Columbus, Davis Daily, Boston & Corbin, Boston Ely, National Mining, Comanche, Raven, Troy-Man, Nevada Utah, McKinley, Ely Cons, Silver Leaf, Silver Queen, Cum. Ely, Nevada Utah, Old Hundred, Helvetia, Utah Apex.

NOTES BY C. H. RUTLEDGE.

Three Years on the Anti-Saloon Firing Line Has Taught Some Lessons.

These lessons may be classified under two heads—those which relate to law and those which relate to men. Our law has not wholly designed to protect the people from the ravages of the saloon. On the other hand, many loopholes were either purposely or accidentally left through which the saloon keepers could escape. The company constitution and the righteous indignation of the people. Our law-makers tell us that we already have more laws on this subject than we enforce, but their subterfuge is revealed when they deny a majority of the voters in any community, village or city, their right to exclude the saloon by petition.

We have repeatedly been confronted with the problem of insufficient bonds which have been presented by the saloon keepers and accepted by those who are ostensibly "for property." A legitimate requirement, as stock cannot be issued except for property, without being first offered to stockholders. In this instance the property purchased was a third interest in the Sheridan group in Shasta county, Cal., adjoining the Balaklala, which consists of three claims of about forty acres. It is now claimed that the above 25,000 shares were put out before the recent issue of 100,000 shares. We understand that the Sheridan property actually cost the Balaklala company but \$20,000, although it received \$27,500 from the sale of the 25,000 shares in addition to the \$50,000 the company received from the sale of 100,000 shares. The Balaklala company now has outstanding 525,000 shares of stock.—Boston News Bureau.

Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments, must be combined. One is constitutional, but both are important, both essential. Dr. Shoop's Night Cure is the Local, Dr. Shoop's Restorative, the Constitutional.

The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood ailments.

The "Night Cure" has, as its name implies, does its work while you sleep. It soothes sore and inflamed surfaces, relieves local weakness and discharges, while the Restorative, eases nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Tablets or Liquid—as a general tonic to the system. For positive local help, use as well

Dr. Shoop's Night Cure

THE STAFFORD DRUG CO.

of every piece of realty in the county with the probability of being confronted in the end with a fake deed given by some brewery company and antedated to cover the emergency.

The state law does not compel bondsmen to schedule their property under oath, but it provides that the township, village and city boards shall be satisfied that the bond is sufficient and that plainly makes it their duty to obtain the knowledge in some way or reject the bond. In the future, the men charged with this duty do not want the facts, and we actually know the council in Ishpeming to forbid the city recorder to make known the names of bondsmen until after they were accepted. This outrageous conduct on the part of the public officials deserves the careful attention of every liberty-loving subject. If the property was required to be scheduled and attention was given to the value as shown by the tax roll, the bondsmen for the saloons might mean something in the future. Some other laws need attention; they can be considered at some future time, but this one deserves special notice at this particular season of the year.

Now as to the men: These are the commodities that cause the bulls and bears to reform to bellow and growl, but unlike other stocks the more there are of them the greater the demand and the more active the market. Have you ever thought how really scarce men are? We don't mean organized bipeds which live and move and talk and vote and aspire to office, but real men who are not owned and cannot be bought or sold—men who respect their oath of office and believe in the protection of home against the saloon and its emissaries; men who know they are right and are brave enough to stand alone in the midst of the conflict and would rather suffer defeat in the right than succeed in the wrong. They may never hold the great offices of the nation but they will inspire the characters of those who do. They would be diamonds in the pulp and pure gold in the pew. We should have persons of this type for teachers in our schools, and they might well be expected to develop pupils who would be invincible in any struggle. We have plenty of fillings enough of the ordinary plenty of men for the easy places with fat salaries. We need men which like the storm-petrel will be at home on the billows and who will thrive and prosper and succeed where ordinary men will fear to tread.

This is no fancied picture; the material for these characters is already forging in our schools, young people's societies and churches, and the measured tread of their triumphant march may be heard by any one who keeps his ear to the ground and his eyes to the written page. Legislators and senators who say there is no organized movement in favor of local option on the liquor traffic know very well that there is a demand, and it should not concern them whether that demand comes from an army or a mob. And if our representatives continue to treat these requests as coming from a mob, they will shortly find themselves confronted by a force that will dispose of them without inquiring their opinion of its personnel.

Two years ago the temperance people of the state sent in petitions signed by about 13,000 voters asking for the passage of the Hudson local option bill, but it died under the watchful care of the same public officials who are sending out thousands of letters to their constituents telling them that there is no organized effort in favor of the Lagers-Hudson local option bill. It looks very much to us as if some persons are lying, and if we are compelled to publish some letters which have been sent to constituents in different parts of the state it will cause some men to appear in their true light.

NOTES OF COPPER NEWS.

Diamond drill work is under way at the Victoria property exploring a lode to the south of the mine. With the opening of the spring weather Victoria plans to build a dam that will give it the assurance of a steady flow of water during the entire year. At the present time the company has ample water at all stages for the operation of its entire capacity, but with the addition of the dam it will be able to handle a much increased plant, which is being contemplated to get sufficient ore from its mines to fill the demands of the utmost capacity of the stamp mill, but in the very near future it plans to explore some other lodes that are known to exist on the property.

It has been developed that in addition to the Hudson, shares of new Balaklala stock which have recently offered stockholders at \$10 per share and underwritten at \$5.00 per share through Hayden, Stone & Co., 25,000 shares were also issued to Hayden, Stone & Co. at the same price. These latter 25,000 shares were ostensibly "for property." A legitimate requirement, as stock cannot be issued except for property, without being first offered to stockholders. In this instance the property purchased was a third interest in the Sheridan group in Shasta county, Cal., adjoining the Balaklala, which consists of three claims of about forty acres. It is now claimed that the above 25,000 shares were put out before the recent issue of 100,000 shares. We understand that the Sheridan property actually cost the Balaklala company but \$20,000, although it received \$27,500 from the sale of the 25,000 shares in addition to the \$50,000 the company received from the sale of 100,000 shares. The Balaklala company now has outstanding 525,000 shares of stock.—Boston News Bureau.

Health Insurance at little cost. CALUMET BAKING POWDER. \$1,000.00 reward is offered to anyone for any substance injurious to the health found in Calumet Baking Powder. Parity is a prime essential in food. Calumet is made only of pure, wholesome ingredients combined by skilled chemists, and complies with the pure food laws of all states. It is the only high-grade Baking Powder on the market sold at a moderate price. Calumet Baking Powder may be freely used with the certainty that food made with it contains no harmful drugs—it is chemically correct and makes Pure, Wholesome Food.

PRINCIPLES OF COPPER SMELTING.

The importance of this question cannot be too greatly emphasized as the economic running of the smelter depends upon it to a great extent, especially where the ore is of a variable composition. This is followed by a discussion of the important commercial product, the matte, which is practically a mixture of the sulphides of copper and iron, acting as a collector for the gold and silver values the ore may contain and which in many instances decides whether the mining enterprise is a paying one or not, as for instance at many of the low grade copper properties of Bingham, Utah, where the gold and silver make the mining profitable.

The various methods in use for obtaining the copper from the matte, including the Bessemerizing, and the refining of the copper is then taken up, the principles for every step being clearly gone into. A practical discussion of principles governing the furnace building is then entered into and will prove of value and interest, as will also a chapter on commercial considerations. A chapter on thermochemistry by Prof. Joseph W. Richards of Lehigh University has been added to the book, and is instructive.

As a whole the book is a treatise devoted to the reasons why instead of the means how and as such it certainly fills a "long felt want" admirably. This book and the eminent author's Modern Copper Smelting are standard references which should be in the hands of every man interested in copper smelting. The book just published will also prove of a great deal of interest to the general public.

O. C. LINDBERG.

CURE FOR DRUNKENNESS.

Orrine Treatment is to be Used at Home Without Publicity, or Loss of Time from Business.

Thousands of persons who really want to quit the use of whiskey or beer, realize that they cannot do so without medical help, yet they can not afford the time or perhaps the money to go to a sanatorium. Happily a new cure for drunkenness has been discovered which is to be taken at home and costs less than the average drinker will spend in a day for drink.

In using Orrine there is absolutely no publicity, as the remedy is sold by the leading druggists in nearly every city and town, or it can be sent by mail. Sure relief is positive when Orrine is used. So uniformly successful is this treatment that in every box is a registered guarantee which entitles you to a refund of your money if Orrine fails to effect a cure.

Orrine is in two forms, No. 1, a secret remedy, absolutely tasteless and odorless which can be given in food or drink without the patient's knowledge; No. 2 in pill form for those who wish to be cured. The price of either form is \$1 a box. Send the money to go to a Dr. J. D. C. for free booklet and consultation blank.

The desire for liquor is soon destroyed after Orrine treatment is commenced, and before long the patient is freed from the terrible drink craving, and the drink will not be missed.

Orrine is for sale by The Stafford Drug Co.

All the Heat Where it's wanted. When it's wanted.

A hot stove in a hot kitchen makes a hot cook. Use a stove that gives concentrated heat—that cooks the meal quickly without making an overheated kitchen. With the New Perfection Oil Stove you get a working flame at moment of lighting. The NEW PERFECTION Wick Blue Flame Oil Cook-Stove is the new oil stove. Embodies new principles. Gives best results. Chimneys are enameled in blue, which makes them rust-proof and easily cleaned. Made in three sizes, with one, two, and three burners. Every stove warranted. If not at your dealer's, write to our nearest agency for descriptive circular.

The Rayo Lamp is the best lamp for all-round household use. Made of brass throughout and beautifully nickelled. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's, write to our nearest agency. STANDARD OIL COMPANY (INCORPORATED).

Your shoe money will go twice as far if you buy the strong, well-made and hard-to-wear-out Mayer SCHOOL SHOES for boys and girls. They are made of the best seasoned upper leather and tough solid soles and have fewer seams than other shoes. Mayer School shoes are shaped to prevent injury to growing children's feet. They WEAR LIKE IRON. Your dealer has them or will get them for you—take no other. The Mayer trade-mark is stamped on every sole. We also make the "Honorbill" shoes for men and "Western Lady" shoes for women. F. Mayer Boot & Shoe Co. Milwaukee, Wis.

ATHLETE'S LIFE MUST BE CLEAN

L. D. LAMBRAKIS, GREEK CHAMPION LONG DISTANCE RUNNER, TELLS OF HIS SUCCESSSES.

IS IN MARQUETTE TO RESIDE

Has Defeated All of His Countrymen in Long Distance Events Under Auspices of Chicago and St. Louis Clubs.

Labros L. Lambrakis, Greek champion long distance runner of America, who came here from Minneapolis to take charge of the soda water department of the Stafford Drug company within the past two weeks, possesses an individuality of unusual interest in that he is a thoroughly expatriated Greek who has adopted not only the customs but the religious belief of the land of his adoption. Mr. Lambrakis does not claim to be the greatest long distance runner in America, but he does claim superiority to any of his countrymen who have crossed the water. In all of the great events in which he has participated there have been many Greeks entered and none of them have come anywhere near approaching his time.

"I believe that athletics have been the saving not only of my body but of my soul," said Mr. Lambrakis yesterday. "The man who makes a success of athletics must live a clean physical life, and a clean physical life is incompatible with any but a clean moral life. I am a member of the Congregational church at Summerdale near Chicago, and have always given my best efforts toward the uplifting of my countrymen. But as far as possible I have associated with Americans. This is not due to any contempt for my nationality, but simply because to live among the Greeks who have come to this country means contamination. Very few of the Greek upper classes ever emigrate. America is the dumping ground for the peasant and the criminal. The high class Greek is as cultured a gentleman as any in the world and probably possesses a higher appreciation of art and literature than any other people. Judging the Greek nation by the Greeks who settle in this country would be like forming an estimate of Americans from a visit to Pike county, Missouri, or the mountains of Tennessee."

Home Was at Sparta. Mr. Lambrakis' appearance bears out his expressed views of life. He is a

clean-cut young fellow, exquisitely neat in garb, and while he speaks with a slight Grecian accent his English is unusually pure. He comes naturally by his taste for athletics, as his father was a great amateur wrestler.

His parents resided at Sparta, the home of athletics for many centuries, and, though of good blood, were in reduced circumstances. There were nine children, three boys and six girls, so when an uncle in New York wrote that he would take one of the boys, Lambrakis, though but twelve years of age, was sent to him. He made the trip from Sparta to New York alone and landed in the great American metropolis unable to understand or speak a word of English. In three months, however, he had mastered English sufficiently to carry on an ordinary conversation. His uncle owned a confectionery and soda water stall and the boy was so valuable to him in his business that he had little opportunity to attend school. After being with his uncle three years he went to Europe, visiting France, Germany, Italy and finally reaching his old home in Greece, where he remained less than five months, when he returned to America, bringing with him his brother, George, two years his junior, who now resides in Chicago, and is noted as a wrestler. The boys started in business together in Columbus, Ohio, but after a short time Lambrakis disposed of his interests and went to St. Louis. This was in 1898. He secured a position with the Judge & Duff Drug company, one of the largest drug stores in the great southern metropolis. When the Greek athletes, who were to compete in the Olympic games, reached the city, the Greek consul appointed Mr. Lambrakis official interpreter.

In Many Long Distance Events. "It was these games that gave me the idea of taking up athletics as a profession," said Mr. Lambrakis. As interpreter I was present at all the events and there wasn't a more interested spectator than I in the vast crowd that witnessed them. The climax came when I saw Tommy Hicks, of Boston, win the Marathon road race, twenty-five miles, in 3:28:58. I made up my mind to become a long distance runner and I spent my leisure time in training. I had wrestled some before that, winning a few medals, and was in pretty fair condition. In the spring of 1903 I went in to my first great race. It was conducted

under the auspices of the Missouri Athletic club, twenty-five miles with twenty-four entries. I finished eighth. Then went to Chicago and ran in the New Illinois club's long distance event finishing sixth in a field of thirty-five. I got a gold medal for my showing on this occasion. In the spring of 1906 I finished fourth in a field of thirty in a twenty-five mile event pulled off by the Missouri Athletic club. In Chicago on June 30, 1906, I finished sixth in a field of fifty. On September 29 I was seventh in a field of sixty-four in a race given by the New Illinois club.

It is the intention of Mr. Lambrakis to promote the running game in this vicinity, if possible, and he expects to go into training shortly.

LAST SAD RITES HELD.

Funeral of the Late Maxamillian Bielenberg Occurred Yesterday Afternoon.

The funeral of the late Maxamillian Bielenberg was held from the house, corner of Park and High streets, at 2:30 o'clock, and from the Swedish Lutheran church at 3 o'clock, yesterday afternoon, the Rev. A. Andre officiating. The church was crowded and in the audience were many who had known the deceased for nearly a score of years and who gathered to pay a last tribute of love and esteem to an unselfish and manly life. The first service in Swedish was repeated in English, and in his sermon Rev. Andre characterized the deceased as a man who like St. Paul, had run his race and kept the faith. The floral offerings were numerous and handsome. Mail Carriers Henry Brittel, Thomas Cleary, Edward E. Homeier, Thomas P. Carey, P. L. Pelissier, Frank Nies, Frank A. Wentworth and Albert J. LaFortune were the pall bearers. Interment was in Park cemetery.

CONFLICTING ACTS CAUSE TROUBLE

HAVE RECENT AMENDMENTS TO CITY CHARTER CREATED THE OFFICE OF ALDERMAN AT LARGE?

There is some talk that an attempt may be made to dispossess Alderman Williams of his seat in the council, on the ground that he is holding an office that has no status under the law. Prior to the passage of the charter amendments eight aldermen were elected at the annual spring election for a period of two years. On March 7 the governor signed an act doing away with the annual election and providing that thereafter elections should be held every two years, at which aldermen should be elected for the two years ensuing. As there were eight hold-over aldermen it was specially provided that they should remain in office until the next regular election.

On the same date another act was signed redistricting the city into five wards and providing that the aldermen elected last spring should remain in office two years as aldermen at large. "Now the question arises whether this act, based on the ground that he is holding an office at large, so that death or resignation creates vacancies. If the city has no power to fill vacancies what would be its position should the entire eight aldermen at large resign their offices?"

Prior to the passage of the amendment, Alderman Cadarette resigned from the council and, as that body took no steps to fill the vacancy, both parties nominated aldermen at large and Alderman Williams was elected. City Attorney George P. Brown said yesterday afternoon that he was not yet in a position to either affirm or deny that Mr. Williams was entitled to a seat in the council. It all depended upon whether the acts amending the charter had created the office to which he had been elected. Another problem, he said, to which he should have to devote considerable time had been presented by the resignation of Alderman Jenks to accept the position of county clerk. As Mr. Jenks was one of the eight aldermen at large he will have to give an opinion as to whether his resignation created a vacancy and whether or not a special election will have to be held to fill it. It is readily apparent that one opinion will cover the cases of both Alderman Williams and Mr. Jenks.

COMMUNICATED.

To the Editor of The Mining Journal: Kindly allow me a little space in your paper, as I wish to say a few words to the music-loving public of this city. I have been watching a little game lately which is played by a certain class of people who are trying to get a good musician and man out of this town. For seven years Marquette has had in Professor Kluge one of the best musicians which the country can show and who understands to perfection his profession, from a Paganini concerto to a piece of rag-time. This man has had, to my knowledge, more than twenty-five years' experience in music, in solo, concert, teaching and dance work, and should get the full support of everyone who loves good music. It is not cheapness, but quality that counts. Professor Kluge has shown himself an exception from his predecessors. He has made a musical as well as a financial success. He is a man of good, straight habits, whose only fault may be that he is a hustler.

Marquette people may well remember the sad experiences it had with previous leaders, nearly every one leaving the town with debts, or some other bad record. In this case it is entirely different. We know now what we got, but do not know what we might get in case of a sudden change. Every city or town which has good musicians and a good orchestra or band ought to be proud of them and give them their full support.

A LOVER OF GOOD MUSIC.

A marvelous preparation containing the constituent elements of life. Hollister's Rocky Mountain Tea cures when all else has failed. 35 cents, Tea or Tablets. The Stafford Drug Co.

TURGES WARFARE ON THE WOLVES

T. H. NOBLE BELIEVES IN HIGHER BOUNTIES BOTH ON THESE ANIMALS AND CATS.

THEIR INROADS ARE SERIOUS

Cruiser Home from Ontonagon County Found Many Evidences of Their Destructive Work—Numerous Deer Slain.

The necessity for prompt and vigorous legislative action for the protection of our deer is again brought prominently to notice by the intelligent report of a well-known cruiser, a resident of Marquette, who has just returned after a three months cruise in Ontonagon county, in the region of Peapack mountain. This section of the country is infested with wolves, but that it is well known by our informant and members of his party that one band of five, and another of four, besides others which traveled singly, or in twos and threes, had played sad havoc among the deer in their yards.

The snow conditions were most favorable for this wanton destruction. Deer, which were overtaken in considerable numbers by these men, would make a few bounds and turn at bay to fight or die, as progress through the crusted snow was impossible. One large buck was found soon after being killed, and from which only a small portion had been eaten, and the snow-story told plainly that this woodland tragedy had been committed by a single wolf, although the victim had made a brave fight as evidenced by his broken hoofs. The remains of eight deer which had been killed by wolves were found in a comparatively small area. In nearly all of these cases, the vandals had eaten only very little of the venison, indicating that there was no appetite for more, or that the killing was done for pure eviltry, and the lust for the chase. All obtainable information is to the effect that during the harvest season of heavy crust, the number of deer killed is fifty times greater than sufficient to maintain the wolves, but that this sentiment for the deer is good, carcasses are wholly devoured. The destruction of deer life which a single wolf may execute was fairly demonstrated one year ago, when the she wolf, which was finally killed on Grand Island, after killing several deer and one caribou in a short time, was under the close observation of no less than twenty-five of our best sportsmen.

Cats Do Deadly Work.

Besides the destruction of deer by wolves in Ontonagon county, just noted, three dead deer were found which our informant insists were killed by cats. The theory seems to be borne out by the snow signs about the kill. Cats cover their dead by heaping snow or leaves over it, and there is the absence of wounds about the muzzle of the deer which are usually found when deer have been killed by wolves. If it is true that cats kill deer, then they may be considered as formidable an enemy as the wolves, for though they may be fewer in numbers their method of attack—springing from trees—permits them to conduct their ravages the year round. By this as it may cats are strictly carnivorous, and work awful destruction among our small game and birds, and the grounds for a more liberal bounty on their heads is apparent to every thoughtful woodsman.

We were much impressed with the earnest indignation of our informant that such wanton destruction of our deer is permitted to continue, while, as he claims, it might in a measure be averted by a wolf bounty of sufficient amount to warrant men in making a business of destroying the wolves. It will be found that these strictly carnivorous, and work awful destruction among our small game and birds, and the grounds for a more liberal bounty on their heads is apparent to every thoughtful woodsman.

Proposes Larger Bounties.

It is generally conceded that the number of wolves new in the upper peninsula is not so great but that they might be exterminated in a few years by persistent and skillful hunting for them. This can only be induced by offering a bounty which will keep men in the woods in constant pursuit of them. Let the bounty be one hundred dollars. It is not too much. Wolves are hard to get. A skilled wolf hunter would not make more than a decent living even at this rate, and it is worth the money. At the same time offer a bounty of twenty-five dollars for a cat, and your wolf hunters would also become a cat hunter. Those of us who are much in the woods know that our game is being rapidly decimated not by the sportsman who conforms to the law, and not by the settler who is a good shot and always gets his deer and uses it for the maintenance of himself and family, although unfortunately, the law can not be made to discriminate in his favor, but by the man who gets \$45 per month and his board at a good boarding house, and who often panches a deer and lets it rot in the woods, and by the ne'er-do-well who sells venison to camps, than whom there is no more despicable being on earth, and who should be classified with sneaking wolf, and the loathsome bob cat, who are scoundring him in this work of destruction.

In the course of business, we find it necessary to provide for a heavy business in business suits. The result is, you'll find an exceptional variety of fine mixtures and neat effects especially selected for business wear. From the way in which they fit, it's evident the tailors who made these suits knew their business.

The Verdict

IN THE CASE OF A. E. ARCHAMBEAU, Plaintiff, AGAINST The People of the County of Marquette, Defendant.

We, the jury, find that the claim of A. E. Archambeau, the plaintiff, to the effect that "The Clothing That Makes Rochester Famous" cannot be excelled for workmanship, style and fit is fully proven by the evidence submitted. Costs are assessed against defendants, which we know will be very reasonable.
