

THE DAILY MINING JOURNAL.

NUMBER 6693.

MARQUETTE, MICH., MONDAY, APRIL 29, 1907.

PRICE 5 CENTS

FEW STRIKES ARE SCHEDULED

Labor Troubles of Importance Will Be Conspicuous by Their Absence in Most Portions of the Country May 1.

Building Trades Are Prosperous and Reassuring Conditions Prevail at New York and St. Louis, and in New England the Situation Is the Best in Many Years—San Francisco Faces a Crisis, However, and at Salt Lake Traction Service Is Suspended.

New York, April 28.—The opening of the outdoor construction season finds New York city lacking the usual state of apprehension of serious labor troubles. In the building trades, prosperous and reassuring conditions prevail.

Wages Increased at St. Louis.

Boston, April 28.—According to the union officials the industrial situation in New England May 1 will be marked by fewer contentions between capital and labor than for many years. While in the building trades small strikes are threatened in several cities, there promises to be little suspension of work in any branch of industry. The New England cotton mill owners may have some trouble with their employes next month.

Crisis at San Francisco.

San Francisco, April 28.—The approach of May 1 finds San Francisco facing serious labor troubles. Eleven unions, including every branch of the metal trades, have called meetings to be held between now and next Tuesday to consider the refusal of the employers to grant an eight-hour day with nine hours pay. A vote will be taken to decide whether they shall accept an offer of a continuation of the nine-hour day with a 5 per cent increase in wages, or go on a strike. About 10,000 men are involved.

Traction Strike at Salt Lake.

Salt Lake City, April 28.—A strike was declared on the street car lines of the Utah Light & Railway company today, 450 men walking out. Numerous scenes of disorder followed attempts made by the company to operate a few cars with non-union crews, and all efforts to maintain even a partial service were soon abandoned.

GERMAN LABOR WARNED.

Extensive Plans Made to Curb May Day Demonstrations.

Berlin, April 28.—All appearances indicate that May day this year will be observed less generally than ever in Germany. Many municipalities have forbidden street parades or other public demonstrations, and the employers' organizations as a rule have taken strict measures to prevent the workmen from celebrating the day, using the threat of a week's dismissal without pay if they absent themselves.

The Social Democratic national committee has issued the usual proclamation. It urges the local organizations to study the situation for themselves, and then only celebrate the day if they can do so without getting into trouble with their employers.

Precations at Paris.

Paris, April 28.—With a view to coping with the May day demonstrations, M. Lepine, prefect of Paris, will have an audience tomorrow with the commanders of the regiments stationed in the city. The entire garrison will be confined to its barracks on that day or will be posted in strategic positions so as to be in readiness for trouble. Serious disturbances, however, are not anticipated.

MANY CIGAR MAKERS IDLE.

Strike at Havana Throws Nine Thousand Out of Employment.

Havana, April 28.—The independent cigar manufacturers at Havana have decided to close their factories April 29, in sympathy with the strikers of the tobacco combine. Nine thousand cigar makers will be out of employment.

KINDERGARTEN CONVENTION.

New York, April 28.—About one thousand delegates are expected to attend the convention of the International Kindergarten union in New York city beginning on Monday and continuing for four days. Incident to the convention there will be an exhibition of the materials and methods used in kindergartens from their inception.

WILL UNDERGO OPERATION.

Spring Valley, Ill., April 28.—John Mitchell, president of the United Mine Workers of America, arrived home here last night from Chicago, and was at once taken to St. Margaret's hospital, where he will undergo an operation tomorrow for hernia. No serious results are anticipated.

SINGERS FROM ABROAD.

New York, April 28.—Three hundred members of the Vienna Mannergeorgverein are due to arrive at New York, May 4. Concerts will be given in New York, Washington, Philadelphia, Baltimore, Buffalo and Milwaukee.

PROPRIETOR HELD TO BLAME.

Prominent Illinois Woman Victim of Carelessness of Elevator Boy.

Peoria, Ill., April 28.—The coroner's jury holding an investigation over the death of Mrs. Mate Chester, grand state secretary of the Eastern Star, who was killed yesterday through the carelessness of an elevator boy at the Moyer Hotel, today placed the responsibility on Moyer, proprietor of the hostelry. The jury charged him with employing incompetent and inexperienced boys, under the age required by law.

PRESIDENT WILL SPEAK.

McClellan Statue at Washington to Be Unveiled Thursday.

Washington, April 28.—The most interesting feature of the thirty-seventh annual reunion of the Society of the Army of the Potomac this week will be the unveiling on May 2 of the heroic bronze equestrian statue of General George B. McClellan, who was the organizer and first commander of the Army of the Potomac. The statue occupies a prominent position at the intersection of Connecticut avenue and Columbia road. President Roosevelt will make the principal speech and addresses also will be made by Generals Sickles, Howard and Dodge. About 5,000 troops, regulars and militia, will participate in the ceremonies.

SEVEN MINERS ARE FACING DEATH

ENTOMBED BY A FLOOD OF WATER, WITH THE PUMPS MAKING LITTLE PROGRESS.

Johnstown, Pa., April 28.—Despite the fact that twelve large pumps have been in operation for two days at the Berwind-White company's mine at Foustville, where seven men have been imprisoned since Friday by a flood of water from abandoned workings, little progress has been made. All day the tapping on the compressed air pipes continued. The rescuing party is greatly puzzled over the manner in which these taps are given. Invariably the number is seven. Whether the miners mean they are in No. 7 heading or whether all seven men are living is merely a matter of conjecture. There is no way of reaching them in that heading until the main heading is dry.

ENGINE MEN ARE KILLED.

Wabash Passenger Train Goes Into a Creek in Pennsylvania.

Pittsburg, April 28.—A Wabash train jumped the track and plunged into Charles creek, forty feet below, near Bridgeville, Pa., today. Engineer Boyd and Fireman McIsaac were killed.

CLOSE CALL FOR KAULBARS.

Sixteen Bombs Found in Russian Governor's Summer Villa.

Odesa, April 28.—Sixteen bombs were discovered today in a villa which Governor Kaulbars had rented for a summer residence.

THOUSANDS OF CASES.

Scurvy on the Increase in Russian Famine Districts.

St. Petersburg, April 28.—Scurvy has increased greatly in the famine districts. An urgent meeting of the government relief commission has been called for tomorrow, following the receipt of a telegram from M. Korotichinsky, the zemstvo president of Ufa province, reporting 11,000 cases in the province up to April 25. He asks for funds and additional medical aid.

STROMBOLI VIOLENT AGAIN.

Messina, April 28.—The Stromboli volcano is active again. An explosion so strong that the concussion broke a window here was felt today. The extent of the eruption is not known here, as the cable line with the Lipari islands is interrupted. The only news received at Messina has been by means of signals.

APPEAL IS ISSUED AMERICAN PEOPLE

PEARY SHORT \$60,000 OF THE FUNDS NEEDED FOR ANOTHER DASH FOR THE POLE.

New York, April 28.—Lack of money, about \$60,000, may mean the abandonment of the dash to the North Pole which Commander Robert E. Peary has planned for the summer. The explorer, who has earned the distinction of having reached "farthest north," is deeply downcast at the possibility that he may not be able to try again.

THREATENS RADICAL ACTION.

Chicago, April 28.—The question as to who will rule Zion City is expected to come to an issue on Wednesday. Wilbur Glenn Voliva has issued an ultimatum declaring that unless the people of that community accept him as their head by May 1, he will take radical action to assert his control.

RIOTS IN ECUADOR.

Guayaquil, Ecuador, April 28.—The campaign for the congressional elections which begin May 5 is resulting almost daily in collisions between partisans of the government and the independent Liberals. A clash occurred today. A group of Alfariatas attacked a body of independents, and several persons were wounded. The executive has been invested with extraordinary powers.

HIS BIG FORTUNE ALL SWEEP AWAY

Real Cause of the Suicide at Sea of David Wilcox, Former President of the Delaware & Hudson Railroad.

Facing Comparative Poverty After Accumulating Great Wealth Only to Drop It in the Wall Street Panic, and on Top of This Being Deposed from His Official Position, He Put an End to His Career by Shooting While Enroute Home from Europe.

New York, April 28.—Fear of a life of comparative poverty because his entire fortune had been swept away by unfortunate speculation, is declared to have been the real cause of the suicide of David Wilcox, the former president of the Delaware & Hudson railroad and a close personal friend and adviser of E. H. Harriman and Henry H. Rogers. Wilcox shot himself in his steamboat on the North German Lloyd steamship Barbarossa last Tuesday, when the vessel was at sea. Not only had Mr. Wilcox's entire fortune been swept away, but he faced an indebtedness of \$200,000 which stands against him on the books of a prominent house in the financial district.

Forced Out of the Railroad.

He had practically been forced to resign the profitable Delaware & Hudson presidency a few weeks ago, and had nothing left but his directorships in a number of companies which would have yielded him a meager living. The clean sweep of the wealth of Mr. Wilcox took place in a few short months. At the beginning of the year he considered himself independently rich and generously signed away his interest in the \$500,000 estate of his brother Albert, who died about a year ago. He was a firm believer in the future of Union and Southern Pacific stocks and put practically his entire fortune in margins for great blocks of both.

The advance he expected did not come. Instead in its place was a steady decline.

All Goes in Rich Man's Panic.

Mr. Wilcox held 5,000 shares of Delaware & Hudson stock and was a member of a pool which was steadily forcing up the price. Becoming nervous over his Southern Pacific holdings he threw his Delaware & Hudson stocks on the market, carrying it to the lowest figure recorded last month.

The proceeds of this sale were added to the fortune he had already placed on the Pacific and everything was swept away in the March panic. Many of Mr. Wilcox's friends lost heavily, but with him the disaster was complete.

He was seeking to regain his health, which had gone in the nervous strain of speculation, when he was informed of the coming reorganization of the Delaware & Hudson.

Wanted a Practical Man.

It was intimated to him the new management would want a practical railroad man to direct the company. He never claimed to be anything but a lawyer and without notification, called his resignation on April 8. He put it on the ground of falling health, and in accepting it, the board expressed formal regrets.

The steamship Barbarossa, bearing Mr. Wilcox's body, arrived today.

spent in repairing the boat, and \$60,000 more will be needed for general expenses.

The Peary Arctic club, of which Morris K. Jessup is president, is caring largely for the refitting of the Roosevelt, and it has issued an appeal for contributions from the people.

COAL TONNAGE IS HEAVY.

Great Fleet of Boats Headed for Lake Superior Ports.

Oversee Voliva, of Zion City, Issues an Ultimatum.

Chicago, April 28.—The question as to who will rule Zion City is expected to come to an issue on Wednesday. Wilbur Glenn Voliva has issued an ultimatum declaring that unless the people of that community accept him as their head by May 1, he will take radical action to assert his control.

RIOTS IN ECUADOR.

Guayaquil, Ecuador, April 28.—The campaign for the congressional elections which begin May 5 is resulting almost daily in collisions between partisans of the government and the independent Liberals. A clash occurred today. A group of Alfariatas attacked a body of independents, and several persons were wounded. The executive has been invested with extraordinary powers.

MEXICANS EXCITED.

Their Legation at Guatemala Reported Stoned by a Mob.

San Antonio, Tex., April 28.—A special dispatch to the Express from Mexico City says: The most extreme indignation and wild excitement have been caused here by a report that the Mexican legation in Guatemala City has been stoned by a mob instigated to the act by agents of President Cabrera of Guatemala. No official denial has been made, though the federal authorities refuse to confirm it. Reports are also current here that Minister Gamba, representing Mexico in Guatemala, has left that country and crossed into Mexico as the result of friction with the Cabrera government growing out of the assassination of General Manuel Barrillas. Passports are said to be in preparation for Minister Manuel Giron, Guatemala's representative in this country, for his return to his own country.

DICTATOR CASTRO TO RETIRE.

Will Step Down Shortly, to Seek Health in Switzerland.

New York, Monday, April 29.—The Tribune this morning says: President Castro of Venezuela, according to information received in this city yesterday from two independent sources, is planning to retire from office May 23. The reason is his continued ill health. He will seek recuperation in Switzerland. Vincent Gomez, first vice president, will succeed Castro.

Columbus, 2; Kansas City, 0.
Toledo, 11; Minneapolis, 10.
Louisville, 3; St. Paul, 2.

TODAY'S WEATHER.

Washington, April 28.—The following is the weather bureau's forecast for Upper Michigan: Snow, Monday; Tuesday, fair; fresh to brisk north winds.

Lisbon, April 28.—The government officials announce that the treaty of arbitration between Portugal and Denmark has been signed. The differences will be submitted to The Hague tribunal.

GOULD TO SPEND HUNDRED MILLIONS

Improvements on a Huge Scale Planned for the Missouri Pacific System—Stuyvesant Fish Will Direct the Work.

Wall Street Has "Bit Off More Than It Can Chew" and Is Now Submitting to an Extraordinary Digestive Process, He Says in an Interview at St. Louis—Business Slowing Up, Asserts James J. Hill—Sees Dull Times Ahead, a "Healthy Relaxation."

St. Louis, April 28.—Stuyvesant Fish, recently elected a director of the Missouri Pacific and a member of its executive committee, has arrived here on a tour of inspection of the road.

In an interview, Mr. Fish said that Wall Street bit off more than it could chew and that it is now submitting to an extraordinary digestive process. "The financial strain," he said, "has made a postponement of railroad improvement compulsory."

The former Illinois Central president said that George J. Gould proposes expending \$100,000,000 improving the Missouri Pacific system. The intention is to invest \$10,000,000 every year for at least ten years. Mr. Fish, as chief financial adviser to Mr. Gould, will assist in financing the work.

Dull Times Predicted by Hill.

New York, April 28.—James J. Hill, chairman of the board of directors of the Great Northern railroad, declares that the business conditions of the country are good, but the outlook for the future is not so good. "There is plenty of business," he said, "the transportation companies are having all they can handle. It requires no great insight, however, to see a slowing up has set in. "You say the steel trade is not showing any signs of reaction. Very true. But the steel business is different from other kinds of business. Six months ago railroad men could not talk with car builders. The latter were too busy to talk and when they could talk they could not promise deliveries. Now I am told the car builders are seeking the railroad men."

"The same in many of the big manufacturing lines. Excess orders piled up months ago will keep the plants going until the fall. But now there is a falling off. Unless there is a change this means the big plants that have been running full blast will have to let men go. In that case it would not be surprising if we heard the rattle of a few empty tin dinner pails."

There will be two jobs for three men instead of three jobs for two men. "Now I would call this a healthy relaxation. It is far more healthful than the disastrous panic of ten years ago."

SAFE BLOWER CAUGHT.

"Gentleman Burglar" Edward Tate Is Captured in Chicago.

Chicago, April 28.—Edward Tate, known as the "Gentleman Burglar," who escaped from St. Francis hospital in Peoria, Ill., has been arrested here. Detectives who had led on the trail of Tate made the arrest as the alleged safe blower was about to enter a friend's residence.

Tate was in custody recently in Peoria for safe blowing, but owing to illness was confined at the hospital under police guard. By a ruse he escaped the guard and until now has been at large. The safe blower was in the office of the Peoria board of education, and the robbery alleged to have been committed to remove evidence against an alleged accomplice of Newton C. Dougherty, the convicted banker and school superintendent.

Tate had been in prison with Dougherty and the plot to remove the evidence is said to have been made there.

Efforts to secure the release of Tate will be made tomorrow by Attorney Erbein, representing Tate, and by State's Attorney Shotes of Peoria. The two men will act independently of each other. Erbein making a formal demand on Chief of Police Shippy for the release on the grounds that he is being held without a warrant, while the Peoria official will resort to habeas corpus proceedings. Chief Shippy declared tonight that he will hold Tate in Chicago until the persons who are alleged to have been robbed by him may have a chance to identify the prisoner. Tate told the police tonight that he was to have been paid \$5,000 by a Peoria banker as the price of his silence regarding the details of the safe robbery. He said that the money was to have been paid over to him last night at a downtown hotel on condition that he (Tate) would leave the country.

SUBMARINES TO COMPETE.

Washington, April 28.—A novel test to determine how to expend the \$3,000,000 which congress has appropriated for the purchase of submarine boats will be commenced off Newport, R. I., on Tuesday. The Holland boat Octopus and the Simon lake boat will take part. Tests for speed, quickness of diving, and ability to dive deeply will be made.

MARITIME EXPOSITION.

Paris, April 28.—The International Maritime exposition, organized by the French Naval league, will open at Bordeaux, May 1, and will continue until Oct. 21. The exposition is to commemorate the centennial anniversary of the invention of steam navigation.

LOYAL TO ROOSEVELT.

Central Labor Union of St. Louis Kills Resolution Attacking Him.

St. Louis, April 28.—The Central Trades & Labor union of St. Louis today refused to endorse a resolution by the pattern makers' organization attacking President Roosevelt for his denunciation of Moyer and Haywood, officers of the Western Federation of Miners.

New York Vote Is Divided.

New York, April 28.—The Central Federated union, instead of unanimously endorsing President Roosevelt for his action in the Moyer-Haywood matter, stood about evenly divided on the question today. After a three hours discussion the meeting ordered that the committee of three appointed at last Sunday's meeting visit the president at Washington.

DEMOCRAT DOWNED.

Gerrit Diekema Will Take Wm. Alden's Old Seat in Congress.

Grand Rapids, Mich., April 28.—Gerrit J. Diekema, of Holland, Republican, was elected to congress yesterday over George P. Hummer, of this city, Democrat, to fill the vacancy in the Fifth district caused by the resignation of William Alden Smith, recently chosen United States senator.

SAYS IT WILL BE ROOSEVELT AGAIN

PRESIDENT WILL BE RENOMINATED BY ACCLAMATION, DECLARES SENATOR LAFOLLETTE.

Political interest this week centers in the possibility of a definite announcement of his candidacy for the Republican nomination for president by Secretary Taft. Today the secretary is scheduled to address the Business Men's club at Cincinnati, but it is considered doubtful whether he will have anything to say in definition of his position at this meeting.

San Francisco, April 28.—United States Senator La Follette of Wisconsin, who arrived here today, gave it as his opinion that President Roosevelt will be renominated by acclamation at the next Republican convention.

Los Angeles, April 28.—United States Senator Flint, who has just returned from Washington, gave out an interview today in which he strongly advocated the renomination of President Roosevelt. The senator, speaking of a recent interview with the president, said that he told the president that the sentiment of this country at the present time seems almost unanimous that he should accept renomination. "Personal favoritism," he said, "his attitude does not seem to have changed since he announced that he would not again be a candidate. But the situation has changed since he made that announcement, and I told him that he should not be bound to it now. Every day he is receiving delegations and public urging him to take the nomination."

Secretary Taft at Dayton.

Dayton, O., April 28.—Secretary of War Taft delivered an address here today at the laying of the cornerstone of the new building of the Young Men's Christian association. He also handled the trowel as the stone was lowered into place. The secretary was given a flattering reception by a throng of about 5,000 people. He returned to Cincinnati this evening.

Boston, April 28.—Speaking here last night at the annual dinner of the French American club, Secretary Taft, general Bonaparte spoke in words of highest praise of the course taken by President Roosevelt in his attitude toward combinations of capital, and referred to Secretary Taft as "a man to whose character, abilities and public service only history will

Copper Country

U. P. FIREMEN'S TOURNAMENT.

Meeting of Executive Committee Held Saturday in Ontonagon.

The annual meeting of the executive committee of the Upper Peninsula Firemen's association was held at Ontonagon on Saturday. The committee meets annually in advance of the annual tournament in the town selected for that event to confer with the local firemen and businessmen as to the arrangements. The intention is that the committee shall select the date and arrange the program, but this is usually left by the program, but this is usually left by the program, but this is usually left by the program...

Chief Votsek will at the convention this year ask that in future conventions the chiefs of the various departments prepare papers covering the more important fires which they had to fight in the preceding year, explain the difficulties encountered and how they were overcome. Fort Brady at the Soo burned down three years ago because of a difficulty with the water works, the D. S. & A. roundhouse at Houghton was destroyed last fall for a somewhat similar reason. This might be a suggestion to the association to discuss at its conventions a supervision of the water mains by officers of the fire department.

The tournament at Houghton last summer was an example of what a district firemen's tournament should be. It was a success in every respect. It had a bigger attendance than did the races which were the excuse which the street had for being. The tournament increased the business of only one class of dealers. It left the streets dirty and the people tired.

The Ontario tournament will at least have no features which are not peculiar to fire fighting. It will be a good experiment and will doubtless be a move in the direction of making the Upper Peninsula Firemen's association actually stand for what it is supposed to stand for.

COPPER COUNTRY SPORTS.

Mutter and Brand Will Not Play Baseball This Season.

It is now definitely known in Houghton that Billy Mutter and Bill Brand, Houghton's well-known ball players, will not be in the game this season. Brand's move in the direction of making the Upper Peninsula Firemen's association actually stand for what it is supposed to stand for.

JAMES S. DUNSTAN Formerly of Hancock, Michigan, at New York Office.

WILL ORGANIZE AT ISHPEMING.

Dr. John Jackola of Hancock was in Ishpeping yesterday to make preliminary arrangements for the formation of a lodge of the Knights of Kaleva in that city. This is the largest and most prosperous of the Finnish benevolent and fraternal organizations in the United States.

CURED OF RHEUMATISM.

Mr. Wm. Henry of Chattanooga, Tenn., had rheumatism in his left arm. "The strength seemed to have gone out of the muscles so that it was useless for work," he says. "I applied Chamberlain's Pain Balm and wrapped the arm in flannel at night, and to my relief I found that the pain gradually left me and the strength returned. In three weeks the rheumatism had disappeared and has not since returned." If troubled with rheumatism try a few applications of Pain Balm. You are certain to be pleased with the relief which it affords. For sale by The Stafford Drug Co.

DARANTELA

Take Laxative Bromo Quinine. It fails. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

ONE ARMED POOL PLAYER.

Frank Burns is a Wonder With a Cue—Visits Houghton.

A youth with one arm strolled into the Board of Trade Palm Garden in Houghton Saturday night and sought a pool game with any one of the numerous habitués of the place. He was accommodated and he gave a big crowd of the cleverest exhibitions of the game that is ever witnessed. Pool "sharks" are numerous in the copper country in the summer, and this wonder did not excite much surprise, because he was expected to be just as good as he was.

The stranger made runs of seventeen and twenty during the session, and after the exhibition he identified himself as Frank Burns, who, with the exception of Sealroome, who has also been seen in the copper country, is considered the greatest one-armed pool player in the world. He is a professional and gives exhibitions or contests for coin.

Burns' left arm is off near the shoulder. He shoots with his cap or the rail as a rest when he does not shoot with a rest of any kind, which is a remarkable instance of steady nerves. He claims to have a high run of sixty-eight. George Sutton, the handless billiardist, was recalled to him, and he says he has beaten Sutton in a contest for \$25. He says that on this occasion some one wanted to bet him \$25 that Sutton could beat him at pool. The answer he could name. He put up the money and nominated finger billiards as the style, naturally winning the money. Burns expects to remain in the copper country for several days, giving exhibitions in various pool rooms.

EFFORT TO RAISE \$5,000.

Portage Lake Y. M. C. A. of Hancock Requires That Much.

The Portage Lake Young Men's Christian association of Hancock needs for the present year \$5,000, if the improvements deemed necessary are to be made and the usual annual pruning of the association's debt is to be done. The board of trustees has decided that this amount will be required, and some plan for raising it will be adopted very shortly. The Hancock Y. M. C. A. has put up a stiff fight against odds the last few years, and has been coming steadily forward. It has added several improvements to the building, has a new swimming tank and bath house and has kept its debt down to a safe point.

But the growth of the present country has made the natural depreciation of the equipment makes frequent expenditures necessary, and this year several improvements must be made. If the past is any augury of the future the association will be pulled out by its friends. The Portage Lake association can be expected to be as strong as the Calumet association, which draws from a larger and wealthier district. The Calumet branch will be one of the best in the country this year, when it has its new \$50,000 building. It will dwarf the Hancock association and a majority of the others in this state. Treasurer Ulseth has already received \$30,000 of the \$50,000 pledged, and the building is not even begun. This shows how the Y. M. C. A. is helping in the copper country and is a sort of indication of the treatment the Portage Lake association will receive when it goes out after its little \$5,000.

CONCERNING THE WEATHER.

Copper Country Had a Small Snowstorm Saturday Night.

The copper country still has a winter on its hands. There have been in the past week or so faint suspicions that summer was on the way, but Saturday night a little snow fell and it came down that night, so that yesterday morning the country was covered to a depth of half an inch on the level. Several prominent businessmen had returned from the coast on Saturday morning from the South, where they had spent the winter, or thought they had. It all depends on where you spend the winter, whether you spent the winter or not. In the copper country you are spending it yet. Talk about the weather in the copper country, it is the same fact that tomorrow is May day, a time when people are supposed to be dancing on the village green and waving garlands of flowers, is disheartening when reflections show that the question of the May in the copper country would have to wear furs and overcoats. If any prospective queen of the May asked her poor old mother Saturday night to "Call me early mother, dear, for tomorrow I'm to be queen of the May," she undoubtedly added, "And tell father to order a hole to plant a tree in the Huron dam right along and they assert that tomorrow they will cut ice there just to show that it is possible on the first of May. If present conditions continue they can have the ice cut into brilliant and set in rings and pins, because there is not much chance of its melting. For the same reason it is possible that coal will be used for jewelry this year, as it is scarce enough and dear enough. Coal comes by boat and the only boat which could get through to Houghton and Hancock was an air ship, with Walter Wellman twenty miles away.

ARBOR DAY CELEBRATION.

Governor Warner has named May 3, next Friday, as Arbor day. It is not believed that any particular observance of the day will be possible in the copper country. It is to die a hole to plant a tree in the copper country just now it would be necessary to use a diamond drill, and all the available drills are in use in Keweenaw county.

THE PALAESTRA AT LAURUM WILL OPEN FOR ROLLER SKATING WEDNESDAY NIGHT.

Howard Wright of Great Falls, Mont., is visiting at his former home in Hancock.

The Calumet & Hecla band will give a promenade at the army next Friday night.

Dr. J. L. McD. Gibson, formerly of Houghton, now of Republic, is visiting friends in Calumet.

W. A. Hartel, ticket agent at Calumet for the Mineral Range road, has returned from a western trip.

Carl Ehle, formerly proprietor of the Elks temple cafe in Hancock, has gone to Duluth to locate.

Joseph Champagne of Cananea, Mex., is visiting his parents, Mr. and Mrs. Clovis Champagne, at Hancock.

The Hancock city council will meet tonight for the purpose of considering applications for liquor licenses.

Representative W. J. Galbraith arrived in Calumet from Lansing, Mich., on Saturday. He expects to depart for the capital city tomorrow.

The Sigma Rho of the Michigan College of Mines gave a banquet at the Douglas House Saturday night to the new members.

S. R. Smith, assistant superintendent of the Ahmeek Mining company, has returned to Calumet from an extended Southern and Western trip.

David Benson, a Hancock clothing merchant, has made an assignment. Mr. Benson is at present out of the city. A Chicago firm is the assignee.

R. T. McKeever, vice president and general manager of the Copper Range railroad, has arrived in Houghton from the East on business with the road officials here.

Mr. and Mrs. Jacob Beer left yesterday afternoon for Chicago to attend the wedding in that city this evening of their son, Walter S. Beer, to Miss Helen Freund.

The examination of Charles Carlson, the alleged specialist in watches, will take place before Justice Jackola in Red Jacket this morning. He is charged with stealing three watches, each from a different person.

The Savoy theater of Hancock, which was partially burned Friday night, opened for business again last evening. The damage was slight, the loss of the moving picture machine being the most serious effect of the fire.

Engineer G. L. Clausen has submitted to the South Range village council an estimate of \$19,000 as the cost of building the proposed water works. A special election will be held in the village May 6, at which time the taxpayers will have opportunity to vote on the question of bonding for the purpose of installing the system. There is no question that the question will carry. The

HONOR LINNAEUS' MEMORY.

President Agassiz of the C. & H. to Attend Upsala Fete.

Alexander Agassiz, president of the Calumet & Hecla Mining company, has been selected by the Smithsonian institution as one of the American delegates to the celebration of the two hundredth anniversary of the birth of Carl von Linnaeus, the father of botany, who was born in the Province of Smoland, May 24, 1707, and died in Upsala Jan. 10, 1778. The invitation is printed in the Latin language in large letters upon a double sheet of parchment; the cover is ornamented with a handsome design in colors and a picture of the botanical institute at Upsala. It is supposed that similar invitations have been sent to other scientific institutions and universities and to the several Linnaean societies in this country and other parts of the world, which will respond in an appropriate manner. All scientists of all countries recognize the greatness of Carl von Linnaeus and what he did for natural history, and the science of botany especially.

It is understood that Professor Alexander Agassiz of Harvard University, Professor W. G. Farlow of the Smithsonian institution and William Trelease, superintendent of Shaw's Garden in St. Louis, will go to Upsala to participate in the ceremonies. The anniversary will be celebrated by the Linnaean Society of London, which owns the library and herbarium of the great botanist, and by the several societies in the United States. The Botanical Society of America will give a special meeting on May 23, when Dr. Edward L. Green of the Smithsonian institution will deliver a memorial address.

ORGANIZE RATHBONE SISTERS.

Ladies Taking Interest in Pythian Work in Hancock.

Mesdames Morgan, Liebert, McNally, Halls, Ingram, Hamilton and Crawford, wives of prominent Pythians of Hancock, have taken up the matter of organizing in that city a lodge of the Rathbone Sisters, the woman's auxiliary of the K. of P. A meeting of the ladies will be held at the Pythian temple in Hancock in June.

OPENING OF PICNIC SEASON.

Houghton people have every confidence that summer will come along most any time now. This confidence is shown by the fact that the Hermann Sons organization has arranged for a picnic at Hans' Park on June 16, and has already announced it. Making picnic dates with snow on the ground is about what might be expected of people who live in this climate.

COPPERDOM BREVITIES.

The Palaestra at Laurum will open for roller skating Wednesday night.

Howard Wright of Great Falls, Mont., is visiting at his former home in Hancock.

The Calumet & Hecla band will give a promenade at the army next Friday night.

Dr. J. L. McD. Gibson, formerly of Houghton, now of Republic, is visiting friends in Calumet.

W. A. Hartel, ticket agent at Calumet for the Mineral Range road, has returned from a western trip.

Carl Ehle, formerly proprietor of the Elks temple cafe in Hancock, has gone to Duluth to locate.

Joseph Champagne of Cananea, Mex., is visiting his parents, Mr. and Mrs. Clovis Champagne, at Hancock.

The Hancock city council will meet tonight for the purpose of considering applications for liquor licenses.

Representative W. J. Galbraith arrived in Calumet from Lansing, Mich., on Saturday. He expects to depart for the capital city tomorrow.

The Sigma Rho of the Michigan College of Mines gave a banquet at the Douglas House Saturday night to the new members.

S. R. Smith, assistant superintendent of the Ahmeek Mining company, has returned to Calumet from an extended Southern and Western trip.

David Benson, a Hancock clothing merchant, has made an assignment. Mr. Benson is at present out of the city. A Chicago firm is the assignee.

R. T. McKeever, vice president and general manager of the Copper Range railroad, has arrived in Houghton from the East on business with the road officials here.

Mr. and Mrs. Jacob Beer left yesterday afternoon for Chicago to attend the wedding in that city this evening of their son, Walter S. Beer, to Miss Helen Freund.

THE CONDITION OF JOSEPH SCHROEDER OF RED JACKET, WHO IS SERIOUSLY ILL AT HIS HOME ON OAK STREET, FOLLOWING AN OPERATION FOR APPENDICITIS, IS MUCH THAT SUPERINTENDENT RICHARDSON HAS ORDERED THE STREET TO STOP RUNNING PAST HIS RESIDENCE AFTER NIGHTFALL, A MOST UNUSUAL CONVESSION AND FOR WHICH THE HOUGHTON COUNTY STREET RAILWAY COMPANY IS BEING MUCH COMMENDED BY CALUMET PEOPLE.

William Brouette, a Chassel boy, was arrested Saturday for striking Postmaster Summer when being ejected from the postoffice. The postoffice has become a popular rendezvous for the youth of the town, so much so that the practice has become objectionable. The postmaster appealed to Sheriff Beck some time ago and he was told to throw the boys out, and if they made any disturbance to have them arrested. Brouette is to be made an example for the others.

MINING NEWS

COPPER PROFITS.

What One Cent in Price of the Metal Means to Producers.

The annual reports of the copper companies which have been issued so far show that the average price received for metal during 1906 was not over 19 cents per pound. The most conservative do not estimate the annual output approximately 1907 will be less than 22 1/2 cents, an increase of at least 3 1/2 cents a pound. It is interesting in this connection to note the effect of an increase in the price of copper of one cent a pound on the producing companies. The following table shows the annual output approximately 1907 and the increase in share earnings of one cent per pound of copper:

Company	Output (pounds)	One Cent Increase in Price
Calumet & Hecla	100,000,000	\$100,000
Tamarack	12,000,000	12,000
Oscoda	18,500,000	18,500
Calumet & Arizona	38,000,000	38,000
Wolverine	10,000,000	10,000
Quincy	18,000,000	18,000
Grainby	20,000,000	20,000
Unincorporated	220,000,000	220,000
North Butte	38,000,000	38,000
Mohawk	9,400,000	9,400
Copper Range	34,000,000	34,000
Anaconda	100,000,000	100,000
Tennessee Copper	15,000,000	15,000
Utah Consolidated	18,500,000	18,500
Franklin	4,570,000	4,570
Shannon	18,000,000	18,000
Butte Coalition	35,000,000	35,000
Isle Royale	3,000,000	3,000

No mention is made of Greene Consolidated on account of the transitory state in which it is at present. Thomas F. Cole says that the expenditure of \$7,000,000 will enable Greene to produce 100,000,000 pounds of copper annually. If this total is reached, with 2,500,000 shares outstanding, the fluctuation of one cent in the price of copper will mean forty cents a share to Greene Cananea, or the same as Shannon.

Such a table as the above gives rise to some interesting comparisons. Take, for instance, Calumet & Hecla and Anaconda, the two largest silver producing properties in the list, both with an estimated output of about 100,000,000 pounds of refined copper per annum. Anaconda has twelve times the capitalization of Calumet & Hecla. The cost of copper of the former is about nine cents of the latter nearer eight cents.

On a 25-cent copper market Calumet & Hecla is making \$170 per share, while Anaconda is making \$13.33 per share. The former is earning (not including custom smelting) 21 per cent on its selling price and the latter 19 per cent.

Another comparison is afforded by Butte Coalition and Calumet & Arizona with the same production, but the former having five times the capitalization of the latter. The cost of Calumet & Arizona copper does not exceed seven cents, including construction, while the cost of Butte Coalition is at least ten cents. On a twenty-five-cent copper market Calumet & Arizona is earning \$34.20 per share and Butte Coalition \$5.25 per share. The former is earning (not including custom smelting) 21 per cent on its selling price and the latter 19 per cent.

Three properties which have practically the same annual output but different capitalizations and costs compare as follows: Cost of copper, profit on a 25-cent copper market, profits per share and percentage earned on selling price being given:

Company	Cost	Profit	Per Sh
Oscoda	10.9c	14.1c	\$25.94
Quincy	11.0c	14.0c	23.31
Utah	7.4c	17.6c	10.64

It should not be lost sight of that while the companies' small capitalizations enable them to profit more largely by the advance of a single cent in copper prices than those with larger capitalizations, the converse is true.

NOTES OF COPPER NEWS.

The north drift at Arcadian has been lately working in some very fine looking copper ground which has steadily improved each day. The drift is now in 275 feet.

Leading interests in the North Butte company say that criticism of the North Butte reports is based upon the lack of knowledge of that company's operations the past year; that as a matter of fact, North Butte's mining costs last year were six cents per pound, but that the company added very materially to its acreage the past year, and installed almost a complete new plant, and the entire investment was charged against the cost of the copper, which materially increased the costs and reduced net earnings to \$9.40 per share. The March earnings of the company were \$457,000, which is at the rate of \$13.70 per share per annum, and April earnings will probably exceed the \$500,000 mark.

The grade of ore now running through the Shannon Copper company's concentrator is averaging 3 1/4 per cent copper. This was the average for the first quarter of 1907, or an increase in copper values of the concentrating ore of about 1/2 per cent, as compared with the average for the quarter of 1906. An increase of 1/2 per cent is equal to an increase of 1/4 per cent in the ton of rock. Shannon production for April will be between 1,400,000 and 1,500,000 pounds, for which the company will receive an average of 24 1/2 cents, and earn for the neighborhood of \$350,000 net, after charging all new construction against the cost of copper.

An excessive flow of water from the

THE CITIZENS' NATIONAL BANK

HOUGHTON, MICHIGAN

Thomas held in the original crosscut in the Davis-Daly Estates Copper company property has interfered somewhat with prospecting. Pumps are being installed, however, to take care of the water. According to last advices the crosscut was twenty-five feet in the Thomas hole ore body, with no hanging wall in sight, and assays should average values in copper and silver of \$15 per ton. As this ore body was cut at a depth of 1,800 feet and apexes on the surface in Davis-Daly ground, the strike gives that company an enormous tonnage of ore over the Boston-Cobalt territory. The Basin concentrator, controlled by the United Copper company, will probably be remodelled with a view of treating Davis-Daly ores.

Cobalt Gossip

The management of the Boston & Corbin company is planning to develop its properties in the Corbin camp upon a large scale. Orders have already been placed for compressor, drills, for the erection of bunk and boarding houses, etc., and orders have been given for the immediate sinking of a shaft to a depth of 1,000 feet. President Amster reports underground developments to date as encouraging. In the lower level, which is 175 feet below the main working level, a number of fissures have been crossed, all of which carry more or less copper, indicating a high state of mineralization, but the main vein will not be encountered on this level for the next sixty days.

The shaft is now down sixty-five feet and will take another 120 feet of core, to reach it. The management is sinking a winze from the main level to the lower tunnel. In upraising to meet this winze one foot of ore was encountered which averaged 4 per cent copper and nine ounces of silver. The management has planned to change the grade of the lower level tunnel so as to permit of self-drawing and permit of the transporting of all the ore through this tunnel instead of hoisting, which it is figured will effect a saving of 50 per cent in mining costs, and also permit of material increase in the shipment of ore. Ore shipments now more than pay operating costs.

Native silver has been found along the line of Firstbrook and Hudson townships, six miles north of the northwest corner of Coleman township, where a considerable rush is taking place for claims.

The Bailey Cobalt Mining company has ordered a complete outfit of mining machinery for the Bailey mine proper. The shaft is now down sixty-five feet and a large force of men will be put to work on further development.

Captain Peyton, formerly with the Silver Queen company, reports the sale of the Badger property to an English syndicate for \$800,000. The Badger property is situated in the extreme southeast of the Cobalt camp, south of the Teniskaming and Beaver claims.

Toronto brokers are under the impression that more interest will attach to developments in the Larier Lake district than to Cobalt during the coming summer. As far as prospecting goes there will be very little chance of doing anything, as already 200,000 acres have been staked.

The directors of the Empress Cobalt Mining company have decided to prospect various mines in the district this year already, and fifteen more are on order. Among the latter is one for the Right-of-Way Mining company, a ten drill compressor and a hundred horse power boiler in addition to drills, hoist and a small electric lighting equipment.

The Martin Larier Lake Gold Mines, Limited, will float its stock on the market in a few days. The company has been organized by Mr. John Martin, Calumet, and it possesses 480 acres north of Larier Lake. Some visible gold has been found, and assays from \$100 to \$300 a ton in gold. Provincial surveyors are looking over the property, and the claims are certified a stamp mill will be installed.

The Brady claim on the south shore of Cross lake has passed into the hands of the Silver Cross Mining company. A company called the Lawson bought it

Paul Humphrey MacNeil

ARCHITECT

Phone 648 L. Herman Bldg. Calumet, Mich.

from the original discoverer named Brady, but after sinking a shaft for twenty-five feet they abandoned work. The present company, as capitalized at \$300,000 and \$50,000 will shortly be offered to the public at a dollar per share. The property consists of forty acres in the vicinity of the King Edward mine and the new company has just commenced work.

Negotiations are now pending for the consolidation of a large tract of land adjoining the property of the Boston-Cobalt Mining company into the latter. The land referred to includes the holdings of the Cobalt Commercial Mining company and several individual interests, and embraces a tract of forty-two acres. This will give the Boston-Cobalt 125 acres in concession-1, of Bucke township. The managers of the Boston-Cobalt Mining company are well-pleased with the result of the diamond drilling on their ground. The core from the diamond drill shows mineralization in several different places, and has already crossed a number of veins carrying iron and nickel in the regular calcite formation.

Comprehensive reports on the Nipissing mine company by the several officials of the company give, in addition to reports of earnings, a general idea of the prospecting work done at Cobalt, and statements are made indicating the shifting character of the property's silver deposits. In W. H. Linney's report attention is called to the fact that the work done to date has not established any fixed rule as to the varying depth of the pay ore. Manager Linney says: "At places the values decreased rapidly with depth; at other places we find good ore below the surface, where no pay ore shows above. We have also found several blind veins or shoots which did not come to the surface. Any attempt to estimate the tonnage or value of the ore remaining in that portion where our mining has been carried on would be extremely difficult, while estimates on the large unprospected portions of the property would be guesswork." This in brief, was the reason assigned by the Guggenheims for giving up their option on 400,000 shares. Mr. Linney estimates that for the first three months of 1907, the gross production will be about \$240,000, and that there is now about \$400,000 to \$500,000 in sight.

STRAIN TOO GREAT.

Hundreds of Marquette Readers Find Daily Toil a Burden.

The lustre and worry of business men. The hard work and stooping of workmen.

The woman's household cares. Are too great a strain on the kidneys. Backache, headache, sideache, kidney troubles, urinary troubles follow.

A Marquette citizen tells you how to cure them all.

Frederick Pearson, upholsterer, formerly of 157 West Washington street, Marquette, Mich., says: "I can recommend Doan's Kidney Pills very highly. I used them for backache, a dull uneasy feeling and a constant misery in my loins and sides. There was also a miserable weakness across the small of my back. I was never laid up with it but my back was easily tired and that all gone feeling would come on. I tried pain killers, my back became strong, pains ceased, my back feeling left me and has never returned. I most freely give my name as an endorser of Doan's Kidney Pills and hope other sufferers may learn of them and be cured."

For sale by all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

PILES CURED IN 6 TO 14 DAYS.

Pain Ointment is guaranteed to cure any case of Itching, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cents.

City Brevities

Yesterday's temperatures: Seven a. m. 30 degrees; noon, 30; 7 p. m. 32. Maximum, 32 degrees; minimum, 30.

Booth Goodman, of Ishpeming, was in the city Saturday.

Charles G. Rogers, of Crystal Falls, is a Marquette visitor.

A regular meeting of the council will be held this evening.

J. W. Hughes, of Ishpeming, spent Saturday in Marquette.

Henry Skows, of Ishpeming spent Saturday in Marquette.

A. M. Lewis, of Newberry, is transacting business in the city.

Mrs. Fred W. Balke, of Munising, is the guest of Marquette friends.

V. S. Hilyer, of Ishpeming, was a business visitor in Marquette Saturday.

A marriage license has been granted to Jeffrey Lachapelle and Alvina Brunell, both of Harvey.

The Misses Marie McEnroe and Mayrose Ryan, of Ishpeming, passed Sunday as the guests of Marquette friends.

W. D. Smith, prescription clerk at the Stafford store for twenty-three years, is confined to his home with a bad attack of the grip.

Mort Getchell, cashier of the Superior Savings bank of Hancock, and wife were the guests here yesterday of Will H. Schweitzer.

The fire department was called to the home of John J. Kind, North Third street, yesterday morning at 9 o'clock, to extinguish a chimney fire. There was no damage.

A meeting of the committee on licenses and trade regulations will be held at the mayor's office in the city hall at 2 o'clock this afternoon. At this meeting the bonds of liquor dealers will be passed upon before being submitted to the council at its session for tonight.

Mrs. Moran Passes Away—John Siegel received a telegram from his wife at Lake City, yesterday morning, announcing the death of her mother, Mrs. Moran. Mrs. Siegel and her sister, Mrs. Fred Bureau, were called to Lake City several days ago by their mother's serious illness. Funeral arrangements have not as yet been made.

Copper Company Changes Headquarters—The Saux Head Copper Mining company has decided to remove its headquarters from Detroit to this city and an adjourned meeting of the stockholders will be held here at Siegel's Hall Monday evening, May 6, at 8 o'clock. A board of managers will be elected and other business transacted.

Independents Defeat North Ends—The Independents defeated the North Ends at the Fair grounds yesterday afternoon by the score of 1-0 in eleven innings. In spite of the low temperature and a heavy diamond the game was fast and many clever plays were executed. Brunzell and Robin were in the points for the Independents, and Greenleaf and Richter for the North Ends.

Annual Meeting Wednesday—The annual meeting of the Marquette Gold Mining & Milling company, which is developing claims in the Boulder county (Colorado) district, and in which many Marquette people are interested, will be held at the Clifton House the evening of Wednesday, May 1. Stockholders in general are requested to be in attendance. Reports concerning the operations of the company will be made.

Takes New Position—A. A. Matheson, who left Marquette last fall, after spending about a year here, in charge of the office of the Marquette plant of the Du Pont Powder company, has resigned his position as manager of the International Smokeless Powder and Chemical company, a subsidiary DuPont concern, to accept the position of manager for the E. J. Street company, real estate dealer, 150 Nassau street, New York. The change becomes effective May 1.

Standard Rock Crew Arrives—The crew of the Standard Rock Light station have arrived in the city and will go out to their post as soon as the weather will permit. Edward Chambers is again in charge. Robert Davenport is first assistant, C. W. Clifford second assistant and Fred Kohler third assistant. Mr. Clifford is from Detroit. The rest of the men are from Mackinac Island. There is still some ice in the vicinity of the station, but the crew hopes to take charge in a few days.

Will Prosecute Snuff Throwers—During the weekly dance of the Ideal orchestra at Fraternity Hall Saturday night, some individual or individuals distributed a quantity of Japanese snuff about the hall. As a result the doors had to be opened and the hall thoroughly aired. Secretary F. H. W. Bailey, of the Odd Fellows' Building association, in speaking of the matter yesterday, said: "The snuff may have been thrown as a joke but I am not inclined to regard it in that light. Any party or parties who will perpetrate a trick that will cause inconvenience or suffering to ladies has an abnormally developed sense of humor that should be checked. I am going to follow this thing up and make the perpetrators suffer. What is more I am willing to pay well for information that will lead to the arrest of the guilty parties."

Will Continue Another Week—The union evangelistic meetings at the Baptist church will be continued for still another week. This was decided last night when by a rising vote of the congregation assembled to hear what was announced would be the closing sermon of Dr. R. S. Killgore requested that he prolong his stay. The meetings in Marquette have been very successful, in this respect duplicating the experience of Mr. Killgore in other cities, and that of last evening was one of the most enthusiastic of the series. The attendance was of such proportions that the edifice was filled to overflowing, auditorium, gallery, lecture room and all. Dr. Killgore is a Virginian, but for some years has been stationed at Grand Rapids. His meeting tonight will be held at the usual time, which is 7:30 o'clock.

Milinery Trade Is Light—The failure of spring to set in earnest has proved a serious blow to the milinery trade, as the sales so far this season have been lighter than for many years past. The lightness of trade is felt the more as most of the milinery establishments have laid in exceptionally large stocks and counted on a liberal patronage. This spring has seen the inauguration of a new style which promises to become

popular. It is known as the "mush-room" and has had a large sale in cities further south. Except in the very set of more tailor hats, which are used almost exclusively for morning street wear, the styles this year are soft. The idea in trimming is to produce a drooping effect, never an upright or stiff one. Empire styles are more popular than ever and the barrel shape is one of the novelties which promises to meet with favor. The "Lamballe," named after the famous French woman, and bosom friend of Marie Antoinette, is one of the prettiest adaptations of the "mush-room." For trimmings, flowers, beads, though grass and cereals, arranged to droop, are in favor.

Deep Water Trout a Poor Fish—Though the fishing in this vicinity so far this season has been poor, most of the fish taken had been of good quality. The impression that all lake trout are alike except in the matter of size is entirely erroneous. The fish caught in forty-five fathoms of water or less are immensely superior to those taken at greater depth. The deep water trout are harder to market than those taken in shallow water and are not of so fine a flavor. Some of the deep water variety have as much as two inches of fat along the back and fish fat is not edible. The deep water trout and their brethren of the shallows may at one time have been of the same species, according to the fishermen, but environment has altered them greatly. As the water at 100 fathoms is much colder than water of half the depth the layers of fat on the fish taken at the former depth is presumably for protection against the low temperature in which they pass most of the year.

CAUSE OF FIRE IS A MYSTERY

RESIDENCE AT NO. 541 SPRING ST., OCCUPIED BY TWO FAMILIES, BADLY DAMAGED BY FLAMES SATURDAY MORNING.

Mystery surrounded the origin of a fire which badly damaged the residence at No. 541 Spring street Saturday morning at 3:30 o'clock. The house was formerly the property of Dr. Z. Vadmas, but had been transferred to Julius Gauthier the day previous. The building, a two-story frame structure, is at the eastern extremity of the street, and was occupied by two families, that of Thomas Braxton, a barber, living down stairs, while John Little and wife made their home in the upper portion.

The fire started in a room in the second story utilized solely as a storeroom. There was no fire in the room nor had a lamp, according to statements made by both families, been kept there for some time. Neither were there any electric light wires there. The room was filled with furniture and clothing belonging to both families. Mr. Little was awakened by smoke pouring into his bedroom, and gave the alarm. The fire had gained such headway at this time that it was impossible to remove much of the furniture in the upper rooms. It took the department almost an hour subsequent to its arrival to drown out the flames. The Little family were the more serious losers, most of their furniture being destroyed by fire and water. The Braxton family lost all the furniture stored in the room in which the fire originated and also suffered some damage from water. The walls of the house were not burned through, and the damage to the structure is estimated at about \$600, fully covered by an insurance policy for \$800. There was no insurance on the furniture of either family.

Though neither the Braxton or Little families can give a reason for the fire, neighbors believe it to have been a case of spontaneous combustion.

You're to be the judge; we leave it to you to decide; all we want is your verdict—Will Hollister's Rocky Mountain Tea make you well and keep you well! That's fair. Tea or Tablets, 35 cents. The Stafford Drug Co.

The American Yeomen will give a May party at Legion Hall, Wednesday, May 1. The committees in charge will overlook making that can add to the general enjoyability of the occasion. (4-29-24)

PROPOSALS FOR FURNISHING CEMENT.

The Park Cemetery and Street Commission of the City of Marquette will receive sealed proposals until 8 o'clock p. m. of April 30th, 1907, for furnishing 2,000 barrels of Portland Cement. All proposals should be marked "Proposals for Cement" and be addressed to the secretary. The commission reserves the right to reject any or all bids.

N. CADARETTE,
Secretary.

April 24th, 1907.

opportunity to deliver the loyal speech which he had prepared. St. Petersburg, April 28.—Count Witte, the former premier, in a characteristic speech in the council of the empire today, dealt with the question of the statutes in regard to experts assisting committees in the duma.

MICHIGAN'S FIFTH SUCCESSIVE VICTORY

FOUR-MILE RELAY RACE AT PHILADELPHIA WON BY ANN ARBOR RUNNERS.

Philadelphia, April 28.—A monster crowd of 18,000 people saw the University of Pennsylvania's thirteenth annual relay carnival on Franklin field yesterday afternoon and cheered its horse over scores of exciting finishes in the relay events and excellent performances in the field and special events.

The honors of the day were well distributed. The University of Chicago, after nearly ten years of trying, finally captured the one-mile relay championship, the westerners leading Pennsylvania to the tape by twenty-five yards in 3:25.5.

A Surprise from Columbia.

Columbia university proved the surprise in the two-mile race and romped away with the championship, after an exciting last quarter mile with Dartmouth. The fine sprinting of Zink of the New York team was what won the victory for Columbia.

The 120 yards brought out one of the finest quartets of hurdlers ever seen at these relays. The event was won by Shaw of Dartmouth in the fine time of 15:2.5 seconds, equaling the intercollegiate record held by A. C. Kraenzlein.

In the 100 yards two Princeton men, Rulon-Miller and Gamble, and Read of Anherst worked their way through the preliminary heats. Rulon-Miller won the final heat, beating Read by a yard and a half and Gamble by three yards.

There was an upset in the shot-put, which it was thought Garrels, the Michigan wonder, would win. But Garrels, who has been doing 45 and 46 feet of late, could not shove the missile out as far as Krueger of Swarthmore, and was beaten by 3 inches.

Garrels Loses the Shotput.

LIVESTOCK STAMPEDED

St. Louis, April 28.—Aeronaut Allen R. Hawley, of New York, made an ascension here yesterday afternoon in the balloon, the Orient, and was carried sixty-seven miles before coming to earth.

SNUBBED BY THE CZAR.

St. Petersburg, April 28.—The deputization of conservative members of the lower house of parliament which went to Tsarskoe-Selo yesterday have returned in a disappointed mood at the scant ceremony with which they were received by the emperor.

TO EXPLORE POLAR SEAS.

Paris, April 28.—France does not intend to be behind other nations in polar exploration. The other day mention was made in the newspapers of another expedition which Dr. Charcot proposes to lead in the Antarctic regions.

French Societies Will Organize Arctic and Antarctic Expeditions.

This expedition will be under the presidency of the Prince of Monaco, the minister of marine and public instruction, and Vice Admiral Gervais, at the sum of 55,000 francs has already been promised.

opportunity to deliver the loyal speech which he had prepared. St. Petersburg, April 28.—Count Witte, the former premier, in a characteristic speech in the council of the empire today, dealt with the question of the statutes in regard to experts assisting committees in the duma.

THIS CITY SHOULD HAVE IRON INDUSTRY

EDITOR NEWETT URGES THAT IT IS FAVORABLY LOCATED—ALL VARIETIES OF ORE ON THE MARQUETTE RANGE.

LENGTHY TRIAL ENDS IN ACQUITTAL

Writing in the current issue of the Iron Ore, George A. Newett, after referring to the decision of the officials of the U. S. Steel Corporation to erect a big steel plant at Duluth, asserts the opinion that this county has many advantages that can be urged in favor of the building up of a manufacturing industry in Marquette.

GOVERNMENT UNABLE TO PROVE THAT BINGER HERMANN DESTROYED RECORDS.

Washington, April 28.—Binger Hermann, former congressman from Oregon and former commissioner of the central land office, has been acquitted of the charge of destroying public records by the verdict of a jury. The trial had progressed for twelve weeks, and the jury deliberated twenty-one hours before reaching a verdict.

The specific charge under which Hermann was tried was the alleged destruction of letter press copy books, claimed to have contained letters which would have made clear the alleged land fraud conspiracy. Men have been at work in the general land office for the past three years trying to find some incriminating evidence overlooked by the person that destroyed the records, but according to the government claims, none was found.

In the absence of documentary evidence, the government tried to make out a circumstantial case, and brought several of Hermann's alleged fellow conspirators to Washington to swear that they received certain letters from Hermann while he was commissioner of the general land office. They swore to this effect, but the letters could not be found in the files.

It has been estimated that, if all those letters were really private, and if the same could be prosecuted for using the government's name illegally, he would owe the government a total of not less than \$5,000,000.

CREATING MORE LAND.

Washington, April 28.—The government is literally making sections of the desert land of the West "blossom as the rose." According to official figures just made public, workers have been wrought in law in 1902 since water was turned on.

SPECIAL COUNCIL SESSION.

Bonds of Liquor Dealers, Druggists and City Officials Approved.

It is expected that there will be thirty-nine saloons in Ishpeeming the coming year, though the bonds of only thirty-three, as follows, were presented to the council at the special session Friday evening:

Bruno Nardi, principal; Joseph Leffler, John Dahlstrom, sureties.
Alex. Carlson, principal; August Lundahl, Alex. Carlson, sureties.
Erick Erickson, principal; Charles Simons, Stephens Simons, sureties.
Frank Nardi, principal; John S. Olson, Ed. P. Beiler, sureties.
George Voelker, principal; Harry Adams, Alphonse Laxasseur, sureties.
Nicholas Cox, principal; John Dahlstrom, Peter J. Denn, sureties.
Antonio Dobbs, principal; Stephen Simons, Napoleon Robear, sureties.
Ingwald Oen, principal; Andrew Christianson, August H. Peterson, sureties.
Pabst Brewing Co., principal; Fred J. Eggan, Geo. F. Thoney, sureties.
Arthur La Plant, principal; August Lefebvre, John Heayn, sureties.
Louis Tontlof, principal; Robert Maxwell, Ludger Clement, sureties.
Thomas Gustafson and Peter Gummerstrom, principals; Andrew Christianson, August Lundahl, sureties.
Dennis Hickey, principal; Thomas Flanagan, Ed. Hickey, sureties.
Merrino Carso, principal; Michael Loselyong, Erik Anderson, sureties.
Jacob Lofberg, principal; John Gummerson, Andrew Kettunen, sureties.
John Talo, principal; Joseph Covio, Napoleon Robear, sureties.
Henry Kuppila, principal; John Westlund, Patrick McHale, sureties.
Herman Merto, principal; John Westlund, Demas Perrault, sureties.
Manley & Anderson, principals; Reinhold Magnuson, A. Kettunen, sureties.
George Thoney, principal; John P. Outhwaite, George Jones, sureties.
Charles Johnson, principal; W. C. Uren, George Thoney, sureties.
Andrew Talo, principal; Joseph Covio, Gust A. Saari, sureties.
Charles Simons, principal; Ludger Clement, Gust Olson, sureties.
Charles Wallenstein, principal; August Swanson, Emanuel Skoglund, sureties.
Charles Sandberg, principal; George Jones, August Swanson, sureties.
Edward Beckman, principal; Ole Aagaard, Isaac Walkama, sureties.
Antie Ekala, principal; Andrew Micklow, Erick Anderson, sureties.
Isaac Walkama, principal; Ole Aagaard, Konstu Pavalva, sureties.
Napoleon Lequia, principal; August Lofben, John Loselyong, sureties.
Charles Coveau, principal; Timothy Hughes, Dan Cain, sureties.
William Hawes, principal; M. L. Lee, P. J. Denn, sureties.

The druggists' bonds approved were: Henry Harwood, principal; E. C. Cooley and Theodore A. Felch, sureties.
Werner Sikander, principal; Andrew Kettunen and William Carlson, sureties.
Fred P. Tilton, principal; Louis Tontlof and Anson B. Miner, sureties.
Ludger Clement, principal; Louis Tontlof and Charles Simons, sureties.
T. A. Fuch and Joseph Vandevanter, principals; A. B. Miner and E. C. Cooley, sureties.

The sureties for Frank V. Sundberg, city treasurer, are Joseph Mitchell, George Thoney, John P. Outhwaite, Thomas W. Hughes, Otto Eger, Timothy Hughes, T. H. Barsh, Thomas Walters and Herman Jaedcke.

The bonds of five constables, Reinhold Magnuson, Donato Carso, Pasquale Russo, Charles Thebeaux and Michael Tasson, were approved.

PINE TREE A WINNER.

Directors Who Inspected Property Enthusiastic as to Its Failure.

O. D. McClure and James Clancey; Mayor J. H. Winter of Negaunee, and Fred Voland of Cuba City, Wis., directors of the Pine Tree Lead & Zinc Mining company, viewed considerable territory last week in their inspection of properties and mills in Missouri and Wisconsin. Messrs. McClure and Winter arrived home Saturday and Mr. Clancey yesterday. George A. Newett spent the latter part of the week in Wisconsin, where he inspected the Pine Tree, Baxter and other properties.

The Marquette county men found much to interest them in the Missouri field, which is more further advanced and has larger properties than are found anywhere in Wisconsin. The Missouri district has been active for many years. There are hundreds of mines working, and most of them have their own mills. In the Joplin district, where the largest mines are located, there is perhaps one mill for every ten acres of ground within the mineral area.

The members of the party who had not visited the Joplin district before were surprised at the extent of the mining industry there. Joplin is a well-built and excellently governed city, with a population of about 40,000. The country is booming and new properties are being opened. There are hundreds of mines and hundreds of mills. The more important properties include such equipment that can be found in Wisconsin; and they are being conducted as mines of that class should be handled.

The ores in the Joplin district do not run as high in mineral as the ores in Wisconsin, but are found in immense quantities and can be economically worked. Many of the Joplin properties are paying big dividends on ores that do not run about 5 or 6 per cent. There is practically no waste in the mill treatment.

PINE TREE RIVALRY.

The Marquette county men were pleased with the showing at the Pine Tree property. They realize that time and money have been saved by placing an experienced mining man in charge of the underground work. After looking over the Pine Tree workings thoroughly, the original mine and the Extension shaft, the Ishpeeming men went all through the Baxter mine and mill, observing the methods employed in mining and treating the ores. The Pine Tree and Baxter are about a mile apart and on the same range. The ores are identical in appearance and the deposits thus far proved up are about the same thickness as the deposits in the Baxter.

At the Pine Tree every drift and cross-cut in the original mine was in ore and the shaft being sunk on the Extension had penetrated to a depth of sixteen feet. The bottom of the deposit was not in sight. A station is being dug in the Extension shaft for a pump and ore of high grade was being taken from the point where this work was being done. The ore in the Extension assays a higher percentage of mineral than does the ore thus far mined at the original property, but it is said that the main ore body has not yet been reached in the old mine.

A location was selected for the mill and the plant is to be ordered without delay. Manufacturers have offered to give the company a guarantee that they will install a plant within sixty days after receiving the order.

STILL HAS THE HORSE.

Ishpeeming Merchant Held Number That Won Animal Donated to Fair.

Timothy Hughes, the Main street merchant, has a horse that he has used in his business for the past twenty-four years. In spite of the fact that he has been very much attached to the animal, Mr. Hughes donated it to the fair conducted last week by the ladies of St. John's congregation for the benefit of the sisters. Mr. Hughes was a liberal subscriber for centuries. Saturday evening Miss Margaret Shney, who sold just 400 chances at fifty cents each, was two or three shy of the desired number, and Mr. Hughes took another chance or two asking Miss Shney to select his numbers. When the chairman of the committee conducting the drawing announced to the 500 or more persons in the hall that Mr. Hughes held the lucky number that won "Stonewall Jackson," the name given the horse by Miss Shney, tremendous applause and laughter followed.

Woodmen's hall was not large enough to accommodate all who desired to attend the fair Saturday evening. Practically every article the ladies offered for sale was disposed of, and at times the rush at the refreshment tables was so great that all could not be waited on. The musical program was much enjoyed. Miss Tekla Farm, who arrived in the city Saturday evening, received four encores. Her songs, two of which were Irish ballads, were very much appreciated.

DEATH OF PIONEER RESIDENT.

Dennis Cleary, a resident of this city for many years, died Saturday evening at the home of his son, Frank Cleary, on West Superior street. He had been in poor health for several years, but his death came unexpectedly.

The deceased was one of the first employees at the New Butte mine over thirty years ago, having held the position of head blacksmith. From the New Butte at the property until operations were suspended, when he moved to town, taking a position with the Lake Superior Iron company. Mr. Cleary was forced to give up work at his trade several years ago, on account of ill health. His age was eighty-two years. He is survived by two sons, Frank of this city, and Michael Cleary, who is in the West; also two daughters, Mrs. Stephen Collins and Miss Ellen Cleary of this city. The funeral will be held tomorrow morning at 9 o'clock from St. John's church.

Father says: "Say, Mother, can't you make us some more of those fine doughnuts if I will bring home a pair of Cuddy's Peacocks, Lord, again?"

DEATH OF GLORY ROGERS.

Popular Ishpeeming School Teacher Passes Away in Milwaukee Hospital.

The sad news was received here yesterday of the death at Milwaukee of Miss Glory Rogers, who for years had been a teacher in the Ishpeeming schools. Miss Rogers had been ailing for upwards of a year. She left only last Monday for Milwaukee to undergo a surgical operation, and her demise occurred in a hospital in that city Saturday afternoon. She leaves a sister, Mrs. M. M. Ann Arbor and the other a school teacher in Ishpeeming. Both were with her when she died. The remains were received at Escanaba yesterday, and the funeral will take place there Tuesday or Wednesday. Miss Rogers formerly was principal of the Salisbury school, but for some time past she had been a grade teacher at the Central school. She was very popular in Ishpeeming and a large circle of friends had been sorrowed by her untimely passing.

ELKS' STATE CONVENTION.

Bay City Lodge Plans to Give a Good Time in June.

The Elks of Bay City have started to advertise the fact that the annual convention of the state organization will be held there June 5 and 6. The arrangement committee announces that the entertainment will be the best ever provided in connection with any state meeting of the order. The committee has leased Wenona Beach and its attractions for an entire day, and plans to turn the visiting Elks loose there after the big parade which is scheduled for the morning. Another feature will be the presence of the Turkish patrol team, from Detroit, which made such a hit at Denver last year and which also carried off one of the big prizes. The Bay City committee is offering special prizes for parade features, while every Elk is accompanied by a band will receive \$25. Ishpeeming will be represented by one delegate, and it is possible that a few other Elks may also attend from here. The Bay City committee expects to procure unusually low rates of fare over the several railroads.

The question of discharging the elk's tooth as a watch charm has been considerably discussed by members of the Ishpeeming lodge since President Roosevelt declared that the emblem should be discontinued as a means of saving the elk, many of which have been slaughtered for their teeth the past few years. It is generally conceded that the president was justified in making this declaration as the elk is too highly prized and is becoming too scarce to be sacrificed for this purpose. Hunters have found it profitable for some time past to kill them merely for the revenue the teeth will bring them. It is said that nine-tenths of the hunters who go out for elk leave the skin and meat, robbing the carcass of the teeth. Some of the subordinate lodges have already decided to discard the tooth as a watch charm.

FROM HOPKINS' CURB LETTER.

"Superior & Pittsburg has been a strong feature to today's curb market, with heavy transactions at a fractional advance over yesterday's figures. Opening sales were at 18 1/2, and a steady advance followed to 19 1/2. The diamond drill operations on the Wolverine & Arizona have not been productive of results the past week. Reports are current to the effect that the Chicago claim will be sold to the Standard Arizona people, but no confirmation can be had. The Calumet & Arizona directors will meet next month to act on the dividend for the second quarter of the year. Greens-Canaan has held steady today with buying only moderate. Persistent talk has been heard for the past couple of weeks to the effect that a dividend would be forthcoming during the next ninety days."

ISHPEMING IN BRIEF.

About three inches of snow fell here Saturday night and yesterday.

Miss Mae Cronin will leave some day this week for Butte, Mont., on a visit to Mrs. Susan Bennett, formerly of this city.

R. J. Wills left Friday evening for Rockford, Ill., where he expects to procure employment under his uncle, who is superintendent of a factory.

Simon Forsberg was over from Crystal Falls yesterday. Mrs. Forsberg had been in the city since early in the week, both returning to their home last night.

Will Redmond, who has been at Crystal Falls the past few months, has given up his position with one of the mining companies there and has returned to Ishpeeming.

The Misses Margaret and Genevieve Fitzpatrick arrived home yesterday morning from Chicago, where they spent the past three weeks visiting relatives and friends.

Gust Louma, who was killed Friday at the Oliver Iron Mining company's Lake mine, was buried yesterday, the funeral taking place in the afternoon from the Finnish Lutheran church.

The Cleveland-Cliffs and Oliver bowling teams, which recently bowled two

And the School-boy with his Bread and Butter

After all—there's nothing quite so good as bread and butter. It's a food that's good for the body. And the better the butter the healthier will be the person who eats it.

Silver Creek Creamery
Pasteurized Butter

has that smooth, delicious taste. Remember how we wanted butter when we came from school? Spread on thick. Now even grown folks want butter spread on thick—but it must be Silver Creek Creamery Pasteurized Butter—the healthful butter. Sold by all grocers in one pound prints wrapped in parchment paper. Your grocer can get it for you if he hasn't it now.

matches, one at the Cleveland-Cliffs alleys, the other at the Oliver alleys, will meet this evening in a three-game contest at the Bank street alleys.

The advance sale of reserved seats tickets for the Stetson's production of "Uncle Tom's Cabin," at the Ishpeeming theatre tomorrow evening, will open this morning. The prices for lower floor seats will be fifty cents, balcony seats thirty.

William Maloney, who has been in the employ of the Cleveland-Cliffs Iron company at Princeton the past few weeks, cut his hand with an axe Friday and has returned to his home here. It will be ten days or two weeks before he will be able to resume his work.

Glen R. Miner, a former editor of the Ishpeeming Record, and for nearly a year past editor of the Courier at Fenton, Mich., is now owner and publisher of the Otsego County Times in New York state, he having disposed of his Fenton paper.

William Kilbride, of the concrete contracting firm of Anderson & Kilbride, is in the city, and he will start a crew to work as soon as the weather will permit. Since arriving in the city Mr. Kilbride has secured a number of contracts in addition to several he has had since last fall.

Negaunee Department

TALKED TURBINE ENGINES.

Board of Public Works Will Receive Propositions from Manufacturers.

The manufacturers of turbine engines are already soliciting the order for the new machinery which the city of Negaunee may install this year at its electric light and water station. The board of public works Friday evening listened to arguments in favor of two makes of turbine engines by representatives of the manufacturers. R. Swan, representing the General Electric company, presented a case for the Curtis steam turbine equipment, and Donald Rosin, a steam expert with the Westinghouse Electric company, spoke in favor of the Parson turbine. Both gentlemen presented facts and figures regarding the operation of the machinery manufactured by their concerns. According to their statements a turbine set can be much more economically operated than the present equipment. Mr. Rosin said that he has known of instances where the Parson turbine has been operated for six months without stopping. Both agents were asked to submit terms, also giving a complete description of the machinery they can install.

With the new equipment it will be possible to provide the patrons of the electric lighting plant with both day and night service, running the machinery continuously, except when necessary to close down for repairs.

LIQUOR BONDS APPROVED.

Negaunee Will Have Thirty Saloons—One More Than Last Year.

At the special meeting of the Negaunee council Friday evening the bonds of thirty saloon keepers were approved, on recommendation of the committee on bonds and sureties. The bonds of three druggists, John M. Perkins, John E. O'Donoghue and Philip B. Kirkwood, were also approved.

There were twenty-nine saloons in this city last year. Thomas Corrigan has retired, Lacombe Bros. taking his stand in the Winter block on East Iron street. Kusti Ekali is the new man in the business. He starts in the Lobb building near the South Shore depot, where Joe Trathan has been located. The dealers whose bonds were approved are:

Nicholas Laughlin, Robert G. Jackson, Edward Hooper, Julius Johnson, Frank Larson, Charles Johnson, Christ Johnson, Henry G. Heisel, Ols Johnson, Donald McDonald, Louis Villeneuve, Napoleon Varina, Oril Lacombe, Joseph Trathan, Michael Basolo, Joseph Simondi, Joseph Bessolo, Michael Morietti, John Ghirdi, Matt Nuimi, Henry Kotilla, Anton Antio, Oscar Field, Edward Kaupinen, Frank Anderson, Swan Pilo, James Gaffney, John Parala, Richard Nesbitt and Kusti Ekali.

BOWLING MATCHES.

An Ishpeming bowling team was defeated Friday evening at Orr & Tompkins' alleys, the scores being as follows:

Pickers, Negaunee— Tot.
Defrain.....172 167 212 551
Johnson.....161 127 141 429
Hooper.....118 174 133 425

PARTNER SAW DANGER.

At the inquest Saturday the case of Oscar Matson, killed Thursday evening at the Cambria mine, a partner of the victim, testified that he had warned Matson just prior to the fatality that the ground looked treacherous. Matson replied that he did not think so and he started to bar some loose ground from the edges of the large chunk which later came down and crushed out his life.

The jury returned a verdict of accidental death, exonerating the company.

OLD RESIDENT DEAD.

Mrs. Thomas Greenway, a resident of Negaunee for a number of years, and well and favorably known, died Saturday. She had been ailing for two or three years past, and her death was not unexpected. Her husband died about four years ago. Her age was about forty years and she is survived by five children.

A WOMAN TELLS HOW TO RELIEVE RHEUMATIC PAINS.

I have been a very great sufferer from the dreadful disease, rheumatism, for a number of years. I have tried many medicines but never got much relief from any of them until two years ago, when I bought a bottle of Chamberlain's Pain Balm. I found relief before I had used all of one bottle, but kept on applying it and soon felt like a different woman.

Through my advice many of my friends have tried it and can tell you how wonderfully it has worked. Mrs. Sarah A. Cole, 140 S. New St., Dover, Del. Chamberlain's Pain Balm is a liniment. The relief from pain which it affords is alone worth many times its cost. It makes rest and sleep possible. For sale by The Stafford Drug Co.

All manufacturers and mine owners contemplating doing any roof-work either Gravel or Felts, or repairing and coating the old metal or felt roofs, will do well to write to the Enamel Roof Paint and Roofing Co., 169 Deming St., Kenosha, Wis. They will be in the copper county this spring. (3-7-2tm-6m)

"Let us have some Cudby's Peacock Bacon and calves liver for supper Mama," say young and old. (11-27-eod)

CHUBB GETS CONTRACT.

Chicago Architect Will Prepare Plans for Odd Fellows' New Block.

The building committee of Iron Mountain lodge of the Improved Order of Odd Fellows met Friday evening and awarded J. D. Chubb, the Chicago architect, the contract for the plans for the new block to be erected on the society's lot, corner of Iron and Tobin streets. Mr. Chubb has agreed to have the plans in the hands of the committee by May 15, when bids on the construction work will be called for. The building will be twenty-six feet wide by 100 feet in length, and will be constructed of pressed brick, with stone trimmings. It will have a front on both streets. There will be a basement under the rear half and the entire lower floor will be given up to a store room. On the second floor there will be a lodge room, twenty-four by fifty-six feet in size, with ante rooms, kitchen and dining room. The foundation will be built of concrete, the concrete walls extending to the grade level. Mr. Chubb left Saturday evening for Oconto, Wis. He will return to Negaunee tomorrow. The Negaunee board of education will meet today or tomorrow to discuss building matters, and it is likely that it will then decide to whom the contract for the plans will be given.

OLD TEACHERS REENGAGED.

Present Corps Will Be Retained in Local Schools Another Year.

The board of education held its monthly meeting Friday evening, when the applications for next year of the teachers now employed were accepted. There are forty teachers, including the superintendent, in the employ of the district.

At the March meeting the board gave Superintendent Schurtz at advance of \$100 per year in salary and Friday evening three members of the high school faculty were given a similar increase. L. O. Squire, the commercial teacher, is to be advanced from \$200 to \$1,000; John Erickson, teacher of mathematics, from \$800 to \$900, and Mrs. Marden, the music teacher, from \$1,000 to \$1,100. The salaries of seven of the grade teachers have been increased from \$45 to \$50 per month.

The board decided to engage a man to begin work on the census May 14. Under the law this work must be completed by the first Monday in June.

The school board does not contemplate any important improvements at the old schools this year. Its attention is at present entirely taken up with new school matters, and as all of the old schools were carefully gone over last year the only attention they will need during the vacation will be a general cleaning, with some varnishing and interior painting.

LOCAL LACONICS.

Clement Shea has gone to Green Bay on a visit to his aunt, Mrs. John Ward.

H. B. Goldberg and wife of Milwaukee were visitors in Negaunee Saturday.

Mrs. L. Donserson and family of Marquette are visiting her mother, Mrs. Catherine Brand.

Joseph Simondi, who conducts a saloon on Case street, is providing his place with new furniture and fixtures.

Louis Amino, who has been employed as a bartender for John Ghardi, has resigned, and is to take a position as surface boss at the Cambria mine.

T. C. Wells arrived home Friday from Chicago, where he was called early in the week on account of the death of his father-in-law, the late L. Buschnell.

The dwelling at the corner of Teal Lake avenue and Lincoln street, owned by the Winter estate, is being remodeled and generally improved.

Conductor John Ward is running on the Northwestern passenger train between Green Bay and Ishpeming, succeeding James Wall, who is off on a vacation.

The Passion Play will be reproduced in moving picture form a week from Wednesday evening, May 8, at the Mitchell Methodist church. Popular prices of admission will be charged.

The Juniors of the Negaunee High school hold their annual hop next Friday evening at McDonald's Opera House. Dancing will start at 8:30, continuing until 12 o'clock. The Negaunee orchestra will furnish the music and refreshments will be served.

The funeral of the late Oscar Matson, killed at the Cambria mine, was held Saturday afternoon from the Finnish Lutheran church. The obsequies of the late William Ammis Maki, killed at the Mary Charlotte mine, were held yesterday afternoon from the same church.

The funeral of the late Mrs. John Moll was held yesterday afternoon from St. Paul's church. The members of the German Aid society, of which the husband of the deceased has been a member for years, turned out in a body and the Lady Maccabees, to which the deceased belonged, also attended.

Mayor J. H. Winter arrived home Saturday from Joplin, Mo., and Cuba City, Wis. He accompanied other directors of the Pine Tree Lead & Zinc Mining company on a tour of inspection. They looked over a number of mines and mills in the Joplin district and also inspected some of the mines in the Wisconsin field.

HOW'S THIS.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

OCTOPUS AND KANSAS

STATE'S TWO-YEAR STRUGGLE AGAINST THE STANDARD.

The Independents Have Really Lost Ground and Many Investors Have Been Disappointed—Oklahoma Now Leads in Production in the Southwest and Is Gaining Steadily—The New State Will, However, Probably Fight the Standard, Too—Immense Storage in Tank Farms and Its Effect on Future Markets.

Independence, Kas., April 28.—Just two years ago the drastic laws adopted by Kansas to break the oil trust's grip on the Southwest oil field became effective. So severe were these measures that at the session of the legislature just adjourned practically the only improvement suggested by the producers was to raise the rates of freight in some respects to equalize shipping charges. Yet Kansas is far from having conquered the Standard Oil company and some phases of its warfare appear, in view of the events of the past biennium, almost discouraging to those who hoped to re-habilitate the prosperity of the oil field.

So far as the movement was intended to make oil production profitable it failed. There has been in the past two years no greater profit for the man who was interested in wells than before. Of the hundreds of companies and individuals with interests in the southwest Kansas field none has resumed profit-making. Instead, scores of companies have settled their affairs, accepted their losses and dissolved. As an example, take a company formed among business and professional men in a small interior town. Fifteen men put \$20,000 in an oil proposition when it looked like a tremendously valuable thing. They confidently expected to receive 50 per cent dividends annually and after visits to the leaseholds and inspection of the prospects were satisfied that they could not lose. That was three years ago. Last month the company disbanded. It had never received a dividend; the expenses had been more than the value of the oil pumped; the machinery was sold at a loss. The stockholders were assessed to make up a deficit and had lost all their principal. This was no worse than the experience of scores of other companies.

When oil went to fifty cents a barrel, scarcely enough to pay for pumping to the top of the ground, the speculation was gone. The law adopted by the state did not raise the price and it has been at or below fifty cents a barrel during all the time since the laws were passed. More than that, the production has decreased until the Kansas field has become scarcely a shadow of its former greatness as a producer. At the height of the oil fever, three years ago, the state was credited with producing 4,000 barrels daily. Now it yields only about 10,000 barrels and most of this is handled by the pipe-line company. The small producer cannot make enough to pay for getting the oil to the pipeline and has given up. The well that flows but ten barrels or less a day cannot be managed profitably and this has cut down the yield. The drilling outfits have been pulled out and the villages were hoping to be metropolises have abandoned the idea.

"But," say the enthusiasts, "it has lessened the price of oil to the consumers." It has—in Kansas. However, this has not injured the oil trust for the reason that there was adopted a maximum freight law that reduced the freight on oil within the state by approximately the amount of the reduction of price to the consumer. This reduction has been about four cents a gallon. It does not affect the price outside the state and the Kansas trade can scarcely affect the Standard's gross income materially. Another law, the law of criminalization has also been of benefit. It has stopped the practice of selling cheaper in one town than in another and has given the independent refiners a chance to compete fairly with the Standard. The law making pipe lines common carriers has had no effect on the market and has practically been inoperative.

During these two years the Standard has been buying oil. Some of it has been purchased as low as twenty-nine cents a barrel. Practically all the oil produced in the Kansas field flows into the pipe line or into the storage tanks. During 1906 only 900 wells were drilled in the Kansas field, not more than 240 of them being producers and they averaging fourteen barrels each. On July 1, 1907, the stored oil was worth 250,000 barrels. Now the tank farms—portions of prairie containing a score or more 25,000-barrel tanks each—hold 28,000,000 barrels of oil and more are being built and filled daily. The Standard seems to have an idea that a great oil drought is in prospect.

A few days ago the manager of the largest independent refiners started since the new laws went into effect was arrested on a grand jury indictment for missing the mails through his advertising. The Uncle Sam Oil company, which has been widely exploited and has taken in \$1,250,000 for stock, is to be thoroughly investigated. This is one of eight independent refiners stated in this state. All are on a small basis and their business is necessarily confined almost entirely to Kansas because it is only here that they can obtain the rates under the freight laws. They probably supply one-fourth of the oil used in the state, the Standard furnishing the remainder. In the larger towns they have their own delivery wagons, in the smaller ones some drayman carries the oil as a side line. They sell at exactly the same price as the Standard and the rivalry is based largely on the principle of patronizing home industry and of destroying or injuring the trust.

As an investment the refiners are not what it was expected by many they would be. The companies that advertised loudly and promised fortunes have been generally the ones doing the least effective work. Refiners that are owned by small companies of men with capital have done better. The field is not one that promises to make a fortune—it is divided into too many interests and the competition of the Standard is too great. The trust has kept up a newspaper campaign in a quiet way and the prospects are not bright for its being driven out of the state. The very fact that it is storing away millions of barrels of oil indicates that it is working

on a definite plan for its future control, and as this oil has cost such trifling sums, compared with the selling value, it seems unlikely that it will be embarrassed for material.

When Kansas passed its oil laws the field was already being shifted to Oklahoma. Now the territory is the center of the Southwest oil field. The Oklahoma field is new. In 1903 were completed 144 wells. While about 1,000 barrels a day were taken out on tank cars real development began only in the winter of 1904-5, just as the Kansas field was to decline. From the 144 wells producing 2,860 barrels daily the field has extended until it embraces 5,300 wells that give 70,000 barrels daily, and a total of 25,000,000 barrels annually. Of this the Prairie Oil company, the Western appellation of the Standard, has taken over 21,000,000 barrels for storage and for piping to its various refineries.

The restrictions in owning Indian Territory lands have been a hindrance to the oil production of the territory. The many difficulties in securing clear title, the government regulations to protect the Indian allotments, and the timidity of capital have made the investment less than it would otherwise have been. When the new state of Oklahoma is organized next summer, provided the constitution is adopted by popular vote, it is expected that a better chance will be given the oil promoters and the field will be yet further developed.

It was generally recognized at the beginning of the fight for the Kansas field that transportation of oil lay at the bottom of the problem. So long as the Standard owns a pipe-line from the Indian Territory to Whiting, Ind., it is independent of the railway charges and it cannot be fought successfully outside the states that prevent discrimination in prices. With no other outlet for the Southwest oil than by rail or through this pipe line, it was evident that nothing could be done to affect materially the monopoly. The market could not be reached. This lesson hundreds of investors throughout the West realized to their sorrow and many a man and woman lost the savings of years in finding out the truth.

Getting down into the territory it became possible to consider an outlet to the gulf for export and for ocean transportation to the Atlantic ports. Toward this outcome is the field tending. Pittsburg capitalists, co-operating with these of Texas, are planning a pipe line to reach from Tulsa to Sour Lake, Texas, and so to the gulf. The interior department has laid down such provisions as will, it is believed, prevent the line ever becoming the property of the Standard. These provisions were arranged by Secretary Hitchcock and Indian Commissioner Leupp, and are intended to protect fully the Indians' rights as well as to insure the investors in independent oil operations a protection from the power of the oil trust.

The interest taken by the small investor throughout the West in the oil industry has been less marked in the past year than in the previous half-decade. The enormous profits promised by oil wells failed and the refinery propositions came next to attract. These looked feasible because the state proposed to go into the business and would have done so had it not been declared unconstitutional. The advertising, however, of many of the companies gave the impression of the state being behind the refineries that were being started and this undoubtedly brought many investors into the list of the promoters' contributors. After all, for most of those who bought oil stocks the business was entered as a speculation, not as a permanent investment. While it was in this condition it was not to be wondered at that the promoter reaped a harvest.

That period has passed. The man now interested in the oil wells of the Southwest field are of more conservative sort. The refinery propositions are generally owned by a few capitalists rather than by numerous small investors, and to that degree are in better condition. The speculative era was unfortunate and millions of dollars went into the hands of unscrupulous or unwise managers. Most of it will never be regained because there is little prospect of high oil prices within a period when the oil leases can be revived and used again. The unfortunate part of the history is the loss that came to those who could not afford it—and this applies to investors East as well as West. It is to be hoped that the investors will learn a lesson about the violent exploitation of this sort of projects that will do them good in the end.

Those of the Western investors who made good eventually did so through the gas that came along with the oil. On almost every tract that produced oil was also some gas. The piping of gas to Kansas City, Topeka, Leavenworth and other cities of northern Kansas and Missouri had furnished a market for this product and at prices that return an income that is all gain, for the gas requires no pumping. Some of these wells have been sold for \$5,000 and more outright, and this has recouped the loss on the oil wells. Several companies have thus paid themselves clear and have withdrawn from the field.

The future of the territory field depends on the laws adopted by the new state when statehood is in action. If it begins a fight on the Standard such as has been waged in Kansas—and the probability is that such will be the case—the independents may have a revival. It is unlikely that the price of oil will increase, however, so long as the Standard has such immense stores in its tanks within or near the field. That throws the rise in price well into the future, for these stocks are sufficient to maintain a level of prices for a long time.

The fact that the territory wells are large producers makes it possible to sell the oil at a low price and yet have a good return, which cannot be done in the Kansas field where the wells are showing such small sums. Then, if the gulf pipe line is completed by next year, as is expected, there seems no reason why there should not be sufficient rivalry for export oil to give a stronger tone and perhaps make another lively and exciting era such as was manifested at the beginning of the Kansas rise. In the meantime Kansas is getting its reward in cheaper gasoline and fuel oil; Oklahoma is monopolizing the production, and the Standard is storing oil at the rate of 30,000 barrels a day.

GENTLE AND EFFECTIVE.

A well-known Manitoba editor writes: "As an inside worker I find Chamberlain's Stomach and Liver Tablets invaluable for the touches of biliousness natural to sedentary life, their action being gentle and effective, clearing the digestive tract and the head." RAILROADS SWAMPED

THEY CANNOT MEET DEMANDS FOR TRANSPORTATION.

Companies Do the Best They Can; but the Volume of Business is Too Great—Present Condition Likely to Continue as Long as the Country Continues Prosperous—Commerce Commission Is Powerless to Help—Many Reasons Why the Problem Cannot Be Solved—Development of Waterways Would Contribute to Relief.

Washington, April 28.—In the estimation of students of the country's political and commercial life the congested traffic problem has come to stay, or at least to be at hand until a new solution for it has been found and applied. Within the last six months organizations representing at least a half-million people have complained to the government and have asked for relief from a situation they say is intolerable. Last winter inhabitants of the Northwest states suffered from lack of fuel and food because the railroads were not able to move promptly these necessities of life. The coming of spring has relieved that particular situation, but according to the complaints that come to the federal government manufacturers in every section of the country are unable to get cars with promptness, and when cars are once loaded there is no assurance that they will reach their destination in reasonable time. In many localities grain that should have been shipped last fall is still in the bin. The effect of this condition of affairs is depressing on the commercial life of the country.

The Interstate Commerce Commission has not been unmindful of the complaints that have come to it, but it is practically powerless to lend a helping hand. Last winter it did by freely using the wire compel the Northwest roads to sidetrack much freight in order that necessities of life be rushed to the people who were in distress, but, generally speaking, it cannot relieve the situation. The railroads are doing the best they can. They are as anxious as the suffering business man or the indigent farmer to have freight moved promptly, but they cannot handle the volume of business that is coming to them. Persons who have made a somewhat careful study of the situation believe the present conditions will not last long as the country continues prosperous. A panic or a general failure in crops would make it possible for the railroads to handle the traffic with promptness, but, generally speaking, well informed men declare the country is face to face with a serious problem.

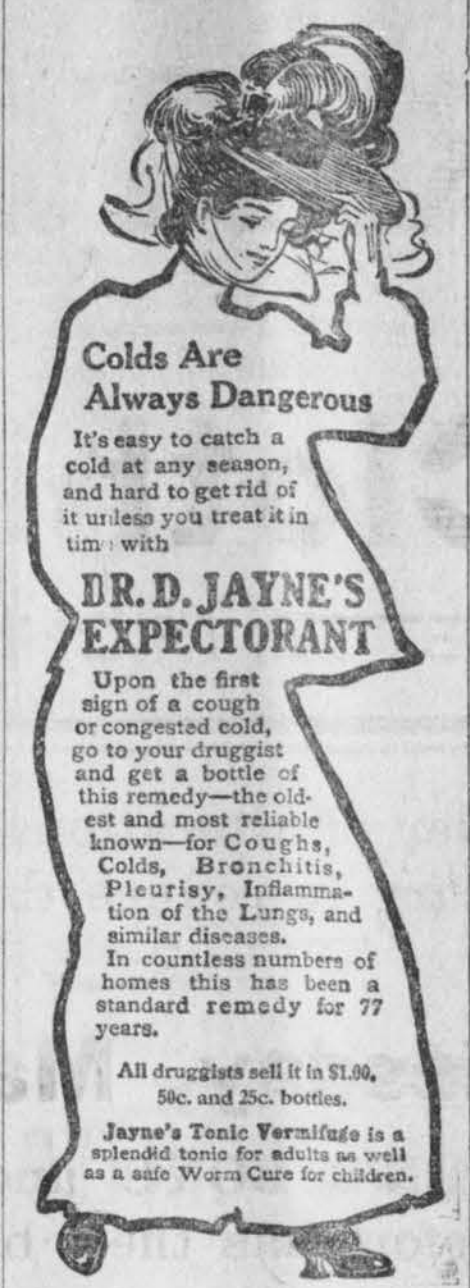

Can the railroads be depended on to solve the problem? Most persons think not. Dr. W. J. McGee of St. Louis, a member of the Inland Waterways Commission recently appointed by President Roosevelt, expressed some views on this phase of the situation in an address the other day which are attracting attention at the Interstate Commerce Commission. "In the last ten years the production of the northern two-thirds of the interior of this country has doubled," said he. "Railroad transportation facilities in the same time have increased only one-eighth, and that which we suffer today is only a forerunner of greater suffering in the future unless means are adopted to find relief. There are not cars enough, but as the railroads well know, even if the number of cars was multiplied the difficulty would not be met. There are not locomotives to draw a sufficient number of cars to meet our transportation needs, and still further, there is not enough freight facilities enough. Moreover there is not enough iron manufactured in the United States to build the railroad tracks and cars and locomotives required to provide our transportation facilities, and still further, there is not enough coal available in the United States to mine and manufacture the iron in sufficient quantities to meet our needs."

Almost every student of the transportation problem, including the members of the Interstate Commerce Commission, agrees in the main with what Dr. McGee says. President Roosevelt believes the railroads are unable to offer a remedy for the conditions that exist. In his letter appointing the Inland Waterways Commission he said among other things: "It is common knowledge that the railroads of the United States are no longer able to move crops and manufactures rapidly enough to secure the prompt transaction of the business of the nation, and there is small prospect of immediate relief. There is reason to doubt whether any development of the railroads possible in the near future will suffice to keep transportation abreast with production."

In that letter appointing the Inland Waterways Commission the president suggested that there should be only one complete remedy for this great problem—the development of a complementary system of transportation by water. Communications received here indicate that the solution proposed by the president meets with approval all over the country. It strikes a chord in the Central West—in the Mississippi Valley—that is particularly responsive. So unless all signs fail this movement for a system of inland waterways which shall relieve the overburdened railroads promises to become a most interesting feature in the political and commercial development of the country. Observers of the trend of events look to see both the great national conventions next year adopted resolutions favoring the development of inland waterway systems.

The appointment of the Federal Waterways Commission is a first step toward bringing about a solution of the transportation problem. Soon after Congressman Burton of Ohio returns from his trip to Panama, Cuba and Porto Rico he will, as chairman, issue a call for a meeting of the commission. It is the desire of the president that the body get to work at once. Its first investigations will have to do with the natural waterways of the country. For instance, it will take up the Ohio river and after a scientific study of the subject decide what sized channel the river will stand. If it shall find that there is water enough to warrant a nine-foot channel it will recommend that a channel that depth be constructed by the government. Heretofore much of the federal work on the natural waterways has been in a haphazard way. So much money was appropriated for a certain river because the congressman interested wanted

that amount appropriated. The new idea is that every improvement made from this time on shall be made after a thorough investigation and then in accordance with some well-defined policy.

Colds Are Always Dangerous
It's easy to catch a cold at any season and get a bottle of this remedy—unless you treat it in time with
DR. D. JAYNE'S EXPECTORANT
Upon the first sign of a cough or congested cold, go to your druggist and get a bottle of this remedy—the oldest and most reliable known—for Coughs, Colds, Bronchitis, Pleurisy, Inflammation of the Lungs, and similar diseases. In countless numbers of homes this has been a standard remedy for 77 years.
All druggists sell it in \$1.00, 50c, and 25c bottles.
Jayne's Tonic Vermifuge is a splendid tonic for adults as well as a safe Worm Cure for children.

Tone Up With Good Paint
It is good business to keep property "toned up."
A coat of Pure White Lead Paint not only makes things look better and gives them a higher selling value, but it makes things wear better and gives them a higher value for long wear.

Southern Pure White Lead
gives an opaque, durable coat that protects and preserves from the ravages of time and weather.
Prospective buyers of Pure White Lead have heretofore been subject to much attempted fraud in adulteration and substitution. You are now protected by the Dutch Boy trade mark which is found on the side of kegs containing only Pure White Lead, made by the Old Dutch Process.

DEGROAT PLAYED FINE BILLIARDS

GAVE GEORGE E. SPEARS, PROFESSIONAL, A CLOSE GAME AT CLUB SATURDAY NIGHT.

ENTERTAINMENT IS ENJOYED

Professional Plays a Steady, Effective Game, and Is Master of Amusing Tricks—Large Number Present.

A large company of members of the Marquette club were present at the club rooms Saturday evening to witness the exhibition of fancy shots and straight billiards furnished by George E. Spears, and it proved to be well worth while. Mr. Spears is a billiardist of fine attainments, and a master of an amusing bag of tricks with both billiard and pool balls. He is an expert and a professional billiard being his business and stock in trade.

In Marquette Mr. Spears met an amateur worthy of his best billiards, and a player much stronger than he is accustomed to encounter in the course of his exhibitions, in George DeGroat, who consented to play him, to add entertainment for the program. Mr. DeGroat acquitted himself admirably, and indeed at one stage of the principal game of the evening it was a question whether the honors were going to go to the professional or the amateur, and at that Mr. Spears only rallied them by a narrow margin.

This game was 200 points 14-2 ball-line. It was played with nice skill by both participants. Both struck their stride at the outset and executed their shots with certainty and apparent ease. Mr. DeGroat's best performance was a run of 74, his record run, Mr. Spears' best run being also over seventy. It was anybody's game until the last run by the professional, when, having gotten the balls together, he picked up enough points to close the count. The game was followed with close attention by the spectators who crowded the billiard room. Not a sound broke the stillness, except at the close of the runs or after particularly brilliant shots, when the players were generously applauded. Mr. DeGroat also essayed to play Mr. Spears a game of straight line billiards, the professional playing "100 or no count." This game, however, died a-borning, as Mr. DeGroat had but one shot, Mr. Spears picking up his 100 on the second shot, with a fine precision of play.

Following on the games Mr. Spears performed a series of fancy and trick shots on the billiard table, showing a

comprehensive idea of the possibilities of ivory balls and billiard cushions taken together. The actions of the balls under his clever manipulation were most surprising, he offering several new shots and tricks, as well as the old favorites. From the billiard table Mr. Spears turned to the pool table and demonstrated to the satisfaction of the members of the club that he was thoroughly informed in regard to its mysteries. Mr. Spears' exhibition was entertaining in a degree, and all present were much pleased to have had the opportunity to have seen him. It also afforded the club members much pleasure that Mr. DeGroat was able to put up such an excellent game against him at 14-2 ball-line.

Presents Piano-Pianola.

The membership of the club is indebted to the Hon. Peter White for a handsome addition to the furniture of its reception room. Saturday afternoon there was installed a piano-pianola, of standard make, given to the club by him without reservation. Accompanying the instrument is a cabinet for records, fully stocked. The instrument is cased in rich mahogany, harmonizing with the furniture of the room. As the piano which it replaced was left over from the old club, and was not in keeping with the new reception room, Mr. White's gift is doubly acceptable to the members.

PENDENNIS WHITE FIRST BOAT IN

LOADED WITH IRON ORE AT SOUTH SHORE DOCKS—HAS CLEARED FOR CLEVELAND.

MANY BOATS IN WHITEFISH BAY

Captain Fred Furlaw Says That Two Hundred Craft Are Being Held There by a Strong Wind from the Northwest.

Navigation was formally opened in this port Saturday morning at 8 o'clock, when the Pendennis White steamed up to the new dock of the South Shore. The Pendennis White left Milwaukee over two weeks ago and was held up at DePue. She was locked through Thursday afternoon at 4 o'clock and the trip to this port consumed just sixteen hours. This is particularly good time at this season of the year, as under the most favorable circumstances boats rarely make the trip in less than twelve hours. The boat cleared for Cleveland with 6,000 tons of ore Saturday afternoon. The Cambria, with coal from Lake Erie, made the South Shore docks yesterday afternoon. Agent Bell said that though the coal had held out well and at no time had the road been pinched for fuel, the supply is now about exhausted and the arrival of the Cambria is opportune. Had the opening of navigation been delayed a few days later serious inconvenience would have been experienced.

Captain Fred Furlaw, of the Pendennis White, said Saturday that he did not look for many boats to make this port for some time to come. He said that his boat was one of ten or twelve that managed to get through Whitefish bay and that they succeeded in finding a passage was more a matter of good luck than anything else. Captain Furlaw brought news of a rather startling nature from the bay. He said that there were at least 200 vessels caught in the ice and that if the wind from the northwest should increase great damage to the vessels might result. As it was, some of the vessels were being badly pounded. "The bay is still full of ice," he said. "It is not of the crumbly variety either, but good thick ice and it is being piled up at an astonishing rate by the wind. At least 200 vessels, as near as I can judge, have gotten in and there is little chance for a good share of them getting out for some time, unless the wind shifts. It is impossible to estimate the amount of damage that would result should the wind from the northwest strengthen, but it would certainly be serious. The Pendennis White was one of perhaps a dozen boats that found a passage and got through with little trouble. The holding of these vessels at Whitefish bay is liable to make traffic rather light for some days to come."

Whitefish bay has the reputation among vesselmen of being one of the worst traps on the lakes. A few seasons ago a number of vessels became icebound there, and a gale from the northwest occasioned a loss of thousands of dollars.

A good catch! You can reach for any one of our new Spring mixture suits with the assurance that it's cut on this Spring's pattern and made of the newest fabric. We keep in the game by lining up an entirely new stock each season.

Our Blue Serges and fancy Mixture Suits at \$20 are of the best catch of the season. Fancy Hosiery to go with your stylish oxfords will engage your attention at our prices, 25, 35 and 50c.
