

ARRESTS FOLLOW INSURANCE PROBE

Inquiry of the District Attorney's Office into the New York Life's Election Is Productive of Sensational Developments.

Agent in the Employ of the Company Is Jailed on Charges of Forging Ballots, and, More Surprising Still, Three Members of the Policy Holders' Committee, Which Inspired the Investigation, Are Taken Into Custody on Allegations of Conspiracy.

New York, April 30.—Sensational results have quickly followed the inquiry made by the district attorney's office into the recent election of directors of the New York Life Insurance company.

George R. Serugham, manager of the International Policy Holders' committee, which inspired the present investigation, making grave charges against those who conducted the election, was himself arrested at Albany tonight.

Earlier today Jacob Frank, a New York Life Insurance company agent, was arrested, charged with forgery in the third degree.

Washington, April 30.—While the recommendation from Ambassador White, at Paris, to the effect that a tariff commission be appointed by the United States in an endeavor to effect an arrangement with the French government, such as made in the case of Germany, has not yet formally come before the state department, it can be announced authoritatively that if the French government desires such commission there will be no opposition in this country.

Washington, April 30.—Three companies bid today at the navy department for contracts for supplying as many submarine torpedo boats as can be built for the \$3,000,000 appropriated for the purpose by last congress.

San Francisco, April 30.—Carried into the stream by the army tug Slocum, with the Twenty-second infantry band playing martial airs and crowds on the quay cheering and waving farewell salutes, the government transport Buford sailed this afternoon for Chinkiang with 4,000,000 pounds of American flour on board for the famine sufferers in northwestern China, consigned and collected through the efforts of the Christian Herald.

San Francisco, April 30.—Carried into the stream by the army tug Slocum, with the Twenty-second infantry band playing martial airs and crowds on the quay cheering and waving farewell salutes, the government transport Buford sailed this afternoon for Chinkiang with 4,000,000 pounds of American flour on board for the famine sufferers in northwestern China, consigned and collected through the efforts of the Christian Herald.

HOUSE IS WITH THE GOVERNOR

Primary Election Measure Is Completed Just as Mr. Warner Wishes It, and It Passes to Its Third Reading.

Advocates of the Legislation Are Well Satisfied With the Situation—Bill Will Go to the Senate Shortly and They Believe It Will Win There Also Notwithstanding the Strenuous Fight Sure to Be Waged Against It—A Plan to Limit Marquette Saloons.

Lansing, Mich., April 30.—[Special.]—The primary bill was passed in committee of the whole today to the third reading just as the governor wished it. Here are some of the new things brought into the law.

Senatorial nominations by direct vote of the people. The 40 per cent nomination clause is stricken out, plurality nominations being sufficient.

In political districts where the majority party has adopted direct nominations, the minority party is required to nominate by the same method.

In political districts where the proposition may be submitted in the future, the submission will be to the electorate, not to a party, and the action will be binding on all parties.

Newspaper Advertising Tabooed. Part of the Allen-Pyle "corrupt practices" clause was added to the house bill today, and a new section forbidding the purchase of newspaper space was incorporated. Just how a man will be prevented from buying what he wishes was not outlined.

A proposition to reconsider the vote by which the 40 per cent clause was eliminated failed to pass, and the bill was ordered reprinted and placed on its third reading. It will take a two-thirds vote to amend it any more, and the advocates of reform are well satisfied with the situation. They figure that it will pass the house easily this week, or early next week, and think it will also pass the senate, though its foes are working hard to kill it there.

Representative John R. Gordon's bill allowing the negative council to borrow money for improvements passed the house under suspension of the rules today, and has gone to the senate.

Plan to Limit Marquette Saloons. Mr. Gordon has been asked to introduce a bill limiting the saloons in Marquette to twenty-five, with a provision that when the population increases to a greater extent than one saloon for 500 people, extra saloons may be added for every extra ratio of population. He has not decided to introduce the bill, but says that if he does he will make it take effect May 1, 1908, so as to give the men who would be affected by the reduction a chance to get out of business, or make other business arrangements. There are some forty-five saloons in Marquette now.

COPPER RANGE SUIT. Settled by the Payment of \$840,000, It Develops at Boston. Boston, April 30.—That the payment of \$840,000 was the basis on which the \$2,000,000 suit of the Copper Range Mining company against Albert C. Burrage was settled after it had come to trial last week became known today in connection with the publication of the annual report of President Paine of the Copper Range company. Mr. Paine's report said that all litigation between the company and Mr. Burrage had been settled by the payment of \$840,000 by Mr. Burrage.

SHUNS PRISON CELL. Sentenced for Automobile Scorching, Millionaire W. E. Dodge Appeals. Yonkers, N. Y., April 30.—Wm. E. Dodge, of New York, son of Philanthropist William Earl Dodge and son-in-law of Henry T. Sloane, the millionaire carpet manufacturer, was today sentenced to ten days in prison in addition to a fine of \$100 for automobile scorching. He was twice before fined for similar offenses. He gave notice of an appeal from today's sentence, and was released on \$1,000 bail pending the decision of the higher court.

MOVE AGAINST OIL TRUST. Ohio Independents Ask That Octopus Be Ousted from the State. Findlay, O., April 30.—George J. Phelps this afternoon filed a petition in the common pleas court, asking that the Standard Oil and subsidiary companies be enjoined from doing business in Ohio. It is understood that independent oil producers are back of Phelps.

FRIGID THE COUNTRY OVER.

Month Just Ended the Coldest April in Twenty-Six Years.

Washington, April 30.—The month ending today was the coldest April in twenty-six years, and within one degree of the coldest April experienced, according to the weather bureau. The bureau's report tonight says: "The month was characterized by a succession of cold spells which swept southward over the northeast Rocky mountain slope and gradually spread southward and eastward over the entire country west of the Rocky mountains. The cold was almost continuous except for brief intervals of a day or so of warmer weather and it closes with remarkably low temperatures in the interior valleys and the Southwest."

STRIKE AT SAN FRANCISCO. San Francisco, April 30.—Seven thousand men affiliated with the iron trades council will strike tomorrow. Of this number 4,000 are in San Francisco and the others are in San Francisco bay. The union of strikers will be considered tomorrow, overtures to this end having come too late to stop the plans for the strike.

SNATCHED FROM THE JAWS OF DEATH. SEVEN MEN ENTOMBED IN PENNSYLVANIA MINE ARE FINALLY REACHED BY RESCUERS. Pittsburgh, April 30.—After being entombed since last Friday noon in the Berwind-White coal mine No. 38, at Fernside, near here, the seven miners who were shut off from the world by a sudden rush of water, caused by the breaking of a wall in an abandoned mine, were rescued at 10 o'clock tonight. The men were greatly exhausted. Owing to their weakened condition it was decided not to bring them out until after the mine had been drained.

BASEBALL. STANDING OF THE CLUBS. National League. W. L. P.C. Chicago 13 2 867 New York 11 3 786 Pittsburgh 7 3 700 Philadelphia 8 5 615 Boston 6 7 462 Cincinnati 4 10 283 St. Louis 3 12 200 Brooklyn 1 11 983 American League. W. L. P.C. Summary: Philadelphia 010010001—3 5 1 Brooklyn 000002000—2 6 2 Batteries: Curridon and Jacklitsch; McIntyre and Ritter.

GERMANY WILL HOLD ALOOF

Will Take No Part in the Discussion at The Hague Relative to the Proposition of Limiting Expenditures for Armaments.

Policy of Securing Peace by Keeping Prepared for War Is Endorsed by Von Buelow in Speech in Reichstag, and His Sentiments Are Received With Significant Approval—Carnegie's Reference to the Kaiser Criticized as a Distortion of the Facts.

Berlin, April 30.—There was a general debate in the reichstag today on German foreign relations, and, incidentally, Andrew Carnegie's recent reference to the decision as between war and peace being in the hands of Emperor William was criticized and classed as a distortion of the facts.

At the opening of the debate the speakers of various parties pointedly suggested to the imperial chancellor that Germany should take no part in the discussion of the limitation of armaments at The Hague peace conference.

Germany will show by her course at The Hague that she sincerely favors all efforts calculated to practically promote peace, civilization and humanity."

MISER SOBS AS HE GIVES UP GOLD. Milwaukee, April 30.—Sobbing like a child, Adolph F. Just, a miser, handed over \$100 of his hoarded gold to Clerk of Courts Fred W. Williams yesterday afternoon. Judge Orrin T. Williams ordered the money deposited with the clerk to assure Dr. Fred R. Weber of payment for an operation on Anna Just, the miser's wife. Her husband had denied her the luxury of medical attendance.

FATE OF THE DUMA IS YET UNCERTAIN. St. Petersburg, April 30.—Minister for War Rudjig went to Tsararsk-Selo today to report to Emperor Nicholas concerning the incidents in the duma on Monday. A rumor is in circulation that he has persuaded the emperor to dissolve the chamber. The session of the cabinet tonight, however, was occupied with ordinary business, and one of the ministers said that there was no doubt the duma would reassemble on the date scheduled, May 10.

SESSION IS STORMY AGAIN, AND SITTING IS ADJOURNED UNTIL NEXT WEEK. St. Petersburg, April 30.—The morning session of the duma today was stormy, but less disorderly than that of Monday. M. Alexinsky, a Social Democratic member from St. Petersburg, was the principal speaker. He said that the socialists everywhere had refused to vote for military budgets because arms were used in the oppression of workers, and that there was much greater reason why they should refrain in Russia, where the soldier was employed to crush the whole people. He resented the imputation that this was not patriotism, and said if a German army appeared at the front the proletariat guard would as willingly move to the defense of the fatherland as it now was fighting its tyrants.

ENORMOUS AREA FLOODED. Many Thousand Persons Driven from Homes in Russian River Valley. Odessa, April 30.—One hundred thousand people are estimated to have been driven from their homes by the overflowing of the Dniester, Dnieper and Dvina rivers. The inundations are widespread and have caused extreme distress over an enormous area.

MONTEGRIN REVOLT IS SERIOUS. Vienna, April 30.—The revolutionary movement in Montenegro, where a military government has been proclaimed and armed bands are reported to be marching on the capital, is assuming a serious character according to dispatches arriving here by way of Ragusa.

ATTEMPTED EXTORTION DEFEATED. Mobile, April 30.—The United Fruit company's steamer Harald, from Ceiba, Spanish Honduras, today brought news of the frustration of a plan of the Nicaraguan officials in charge of Ceiba to increase the cost of clearance papers. Up to ten days ago it cost the agents of fruit importing companies five dollars in gold for clearance papers for a vessel. The report brought up by the Harald is that the provisional government demanded \$10, and a vigorous protest was filed.

ERUPTION TERRIFIC. Great Devastation Caused by Volcano on Stromboli Island. Messina, Sicily, April 30.—Some of the inhabitants of the island of Stromboli who have fled from there and reached this city describe the eruption of the volcano as terrific. Red, burning stones, ashes and cinders were thrown up, while about a thousand feet over the top of the volcano, which is 3,000 feet above the level of the sea, an immense dark, umbrella-shaped cloud was formed. The industrious population of the island, about 2,000 persons, had with great effort gradually cultivated the sides of the volcano, almost up to the crater, chiefly at vineyards, but the eruption had entirely destroyed everything within a radius of 1,500 feet of the crater and has seriously damaged the rest of the island.

JAPANESE STRIKERS RIOTOUS. Rout Police and Destroy Part of Big Shipbuilding Plant. Tokio, April 30.—Owing to the discharge of 600 workmen from the shipyards of Kuragata, disorders have broken out there, and part of the works have been destroyed. A detachment of police and eighty soldiers, sent from Yokosuka and Kuraga, has been unable to restore order, and more troops have been despatched to the scene.

REPUBLIC'S HEAD ESCAPES DEATH

President Estrada Cabrera of Guatemala Has Close Call from Assassination in Leading Street of the Capital City.

Guatemala City, Guatemala, April 30.—Estrada Cabrera, president of Guatemala, narrowly escaped assassination today. He left his private residence at 5:30 o'clock this morning for his customary drive, accompanied by his staff. While passing along Seventh avenue an explosion, at first supposed to have been caused by a bomb, occurred, killing the horses attached to the presidential carriage, wounding the coachman and injuring several of the staff officers, including General Orellana, chief of staff. The president, who was not injured, displayed great presence of mind. Alighting from his carriage, he inspected the surroundings, and then returned on foot to his residence.

ROUGHLY USED BY CUBAN POLICE. SAILORS FROM THE CRUISER TACOMA SERIOUSLY WOUNDED IN AN AFFRAY AT SANTIAGO. New York, Wednesday, May 1.—A dispatch from Havana to the Herald reports that a number of sailors from the cruiser Tacoma were wounded in an affray with the police of Santiago yesterday. Commander Tappan, in reporting the affair to the naval authorities here, wired as follows: "About two this morning a small party of liberty men from the Tacoma were attacked by the police of Santiago while on their way down to the city. One, Ensign Brislin, who was present in civilian dress, was also attacked by the police. These were injured: Henry Leo Lee, fireman, shot in lung; Clare Joseph Pember, electrician, cut on arm; Leslie Baldwin, dustman, arm fractured; all serious. Eight others in the party were injured. All is quiet now. An making a thorough investigation."

Small Steamer Pilgrim Probably a Total Loss at Port Huron. Port Huron, Mich., April 30.—The small steamer Pilgrim, valued at \$16,000 and carrying four passengers and a crew of twenty-six, was run ashore last night near the life saving station when in danger of foundering. The crew and passengers were safely taken off. The vessel probably will be a total loss.

Pioneer Vesselman Is Dead. Marine Mishap. Port Huron, Mich., April 30.—Captain George H. Cottrell, one of the pioneer captains on the Great Lakes is dead, aged ninety. He began sailing the lakes in 1826.

ATTEMPTED EXTORTION DEFEATED. Mobile, April 30.—The United Fruit company's steamer Harald, from Ceiba, Spanish Honduras, today brought news of the frustration of a plan of the Nicaraguan officials in charge of Ceiba to increase the cost of clearance papers. Up to ten days ago it cost the agents of fruit importing companies five dollars in gold for clearance papers for a vessel. The report brought up by the Harald is that the provisional government demanded \$10, and a vigorous protest was filed.

Copper Country

PROSPECTS FOR STRIKES.

Building Trades Alliance Will Ask Increased Scale Today.

There is a prospect that there will be a general strike in the building trades at Hancock and Houghton, if not the entire copper country today. May Day is the time for strikes all over the land, and the copper country may be included. The suspicion that strikes will materialize comes from the fact that for several weeks there has been an agitation for an increased wage by the building trades of Houghton and Hancock. All of the unions, those of the carpenters, plumbers, brick layers and stone masons, wiremen, steam fitters, painters—all trades engaged in building work, in fact—held meetings last night for the purpose of taking definite action concerning the scale of the wages. The result will not be known until this morning. However, it is known that the plumbers will ask for a general increase, and also that they will give a half holiday on Saturday, though without pay. The carpenters ask for a nine-hour day. The wiremen ask for an eight-hour day with the present daily wage scale.

The members of the unions in the

building trades say that conditions are good in the copper country, the employers are making extra good money and they should share it with their employees to some extent. There is no doubt that today there will be a demand for a general rise in wages by these trades. The attitude of the employers is not known. The building contracting business is pretty well tied up in the copper country. There have been a number of construction jobs which have been abandoned by the owners because of the high bids presented. So far this year there has been little activity in building. Work on a number of structures, such as the Houghton Presbyterian and Episcopal churches, begun last year, has not been resumed. The general belief is that the cost of labor and material is so high this year that building will be too expensive for a great many people.

Rheumatism

I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten distorted limbs of chronic cripples, nor turn grown backs to flesh again. That is impossible! I can now surely kill the pains and pains this dreadful disease.

ODD FELLOWS' GATHERING.

One Week to Elope Before State Encampment at Calumet.

The local committees of the Calumet lodges of Odd Fellows are putting in their hardest work this week to complete preparations for the reception and entertainment of the Odd Fellows who will come next week for the annual state encampment and grand lodge of the order to be held from Monday to Thursday, inclusive.

This is to be easily the largest assemblage in the copper country this year, the one with the widest interest because it will bring people from every important city and town in Michigan. It will be the grand canton meeting of the Patriarchs, Militant, the grand encampment of the Excelsior branch, the grand lodge of the Independent Order of Odd Fellows, and the grand lodge of the Daughters of Rebekah, the woman's auxiliary branch. The big affair will open Monday night when a special train from St. Ignace will arrive. The opening event will be a degree team contest for \$100 in prizes for visiting encampments. This will take place Monday night.

There will be much of interest to the public in the convention. There will be a public reception Tuesday morning and a parade of all visiting and local organizations in the afternoon. This will be followed by a prize drill of the cantons, with a number of copper country militia officers as judges. There will be a military ball Tuesday night, and a C. & H. band concert Wednesday night. All day Thursday will be devoted to taking the visitors on special trains to the mines, mills and smelters at Calumet and Lake Linden.

FATE OF THE BOARD OF TRADE.

Remored That F. M. Sackrider Will Return to Its Management.

There was a rumor current yesterday that Frederick M. Sackrider, at present in Chicago, will return to manage the Board of Trade, which had been removed from his hands last year. The rumor was given credence by the fact that Sackrider has been given an opportunity to consider the proposition if it is not believed it will result in his return.

History of Odd Fellowship.

The grand lodge and encampment were secured by Calumet in recognition of the great interest taken in the order in the copper country. There are fourteen Odd Fellows organizations in Houghton county. These are Copper City canton, Patriarchs militant, Calumet, Hancock and Calumet encampments, and Odd Fellows lodges in Houghton, Hancock, Soudh Range and Sidway, and Daughters of Rebekah lodges in Calumet, Hancock and Lake Linden.

The Odd Fellows now number about 1,000,000 in the United States, constituting the largest fraternal organization in the country. The order was of English origin in the Eighteenth century and was brought to the United States in 1818, at least that was the time the first Odd Fellows reached this country. They organized a lodge of Odd Fellows at Baltimore April 25, and up to 1843 the order in the United States was subordinate to the English grand lodge, but in that year the American organization withdrew from English control and declared itself a separate organization. It now controls the lodges of Canada and Australia, and practically the English-speaking world outside of England. The laws as at present constituted were framed in 1852, modeled after the government of the United States, the representation in the grand lodge being selected in much the same way as legislative representatives in the political world.

OPENING OF FISHING SEASON.

Rod and Reel Experts Find Weather Conditions Disheartening.

The trout fishing season of 1907 opens today. Whether the fishermen of the county will take advantage of it is problematical. The Mining Journal could not locate George Williams yesterday, so it is impossible to tell whether he will be out, but he is not. It is a certainty no other will. Mr. Williams is the best known and best informed fisherman of the copper country, a leader in the recent agitation for new fishing and game laws, and it is usual to open the trout season with an interview with him. This year it will have to go over for a day or so.

CARLSON BOUND OVER.

Calumet Watch Specialist Is Held—Hook Case, South Range.

Charles Carlson of Centennial, who was charged with burglary in having entered the home of James Lisa of Calumet and stolen a watch, as well as being accused of stealing two other watches, was bound over to the circuit court by Justice Curtis of Calumet Monday afternoon. He was remanded to the county jail in default of bail. Carlson was caught in Lisa's home, and at the time he was looking for a place to sleep. His work is considered coarse.

Charles Hook of South Range was taken before Justice Jarvis of that place yesterday morning on a charge of larceny from the person. He is charged with lifting \$42 from the pocket of his partner. Hook has been in the public eye before, as a man who would not support his family. His hearing was adjourned until Friday to await the transcription of the testimony. It is conceived that he will be bound over.

BASEBALL GOSSIP.

Arrangements are going ahead for the opening of the Northern Copper Country baseball league season in Winnipeg and Duluth on May 16. Houghton opens at Duluth and Calumet at Winnipeg. Reports from both cities tell of improvements at the parks, considerable local excitement, prospects for good business and generally a prosperous season of good baseball. Today Houghton will play at Oshkosh, Wis., with the State league team of that city, and Calumet will try conclusions with the St. Thomas college team at St. Paul. These will be the opening spring practice games for the copper country teams. Calumet announced on Monday the full line-up for the season, the first official declaration of Manager Mullen. The following players will report in St. Paul today: Catchers, Frank Mullane and Kurke; pitchers, Compton, Roy Newcomb, Schenkart, La Croix, Schroeder, Emond and Finn; infielders, "Biddy" Dolan, Ryan, Dan Burke, Kelly, Rousseau, Taylor, outfielders, Claude Pennell, John T. Bains, Mike O'Donnell, Keskey and Carlow.

MINING COLLEGE BILL WILL PASS.

Representative Galbraith Believes M. C. Money Assured.

The biennial appropriation bill for the Michigan College of Mines, which is an unusually large one this session, has been reported out by the senate committee on appropriations, of which Senator Charles Smith of Hubbell is the head. This is taken to mean that the senate will pass the bill. Representative Galbraith of Calumet, who led yesterday on his return to Lansing, said that he believed the bill would easily go through the house.

HOW'S THIS.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by this firm. WALTER KRANZ & MARVIN, Wholesale Drugists, Toledo, O. Hall's Catarrh Cure is a catarrh of the mucous surfaces of the system. Testimonials sent free. 50 cents per bottle. Sold by The Stafford Drug Co.

FILES CURED IN 6 TO 14 DAYS.

"What shall we have for breakfast?" "Why Cudahy's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year." (11-27-05)

Relieved in 24 Hours or Money Refunded.

RHEUMATISM

Relieved in 24 Hours or Money Refunded. If you have Rheumatism, Gout, Sciatica or Lame Back try Cudahy's Peacock Ham and Eggs. It stops the pain, removes the cause and when taken in this way you are free from the disease. It is a specific for Rheumatism, Gout, Sciatica and Lame Back. Sent by mail on receipt of 75 cents. No return required. At Drugists' 50c.

MRS. SARAH J. WINDROM

Mrs. Sarah J. Windrom of Chicago, cousin of Zachary Taylor, twelfth president of the United States, and granddaughter of Alexander Hamilton, who signed the Declaration of Independence, says:

"Vinol is a Godsend to old people. I am 76 years old, but have a hearty appetite, sleep soundly, and feel active and well today, thanks to Vinol. When I was young cod liver oil was dispensed in a greasy, unpalatable form, and it fairly gagged me to get it down. Vinol is entirely different, very palatable and nourishing to impoverished blood. It is the finest tonic and strength creator I ever used in my life."

Vinol is a real cod liver preparation, with all the vitamins that have been eliminated and none has been added. Try Vinol on your guarantee.

COPPER COUNTRY WEDDINGS.

Miss Ethel Weir of Houghton Becomes Bride of Canadian.

Miss Ethel Weir, daughter of Andrew Weir, and W. T. McKeever of Theford, Ont., were united in marriage yesterday afternoon at the bride's home in East Houghton. The ceremony was performed by Rev. Walter R. Fruit, pastor of Grace M. E. church, in the presence of relatives of the couple and a few guests. It was a simple home wedding. The couple was attended by Miss Mary Weir and Richard Weir, sister and brother of the bride.

Adams Township District Votes \$100,000 for New Structure.

Painesdale, the growing metropolis of the south range of Houghton county, is going to have a magnificent new high school building to be erected at a cost of \$100,000. The taxpayers of the Adams township district voted this at the special election held Monday night. It will be necessary for the district to sell \$100,000 worth of bonds, and permission to do this was the object of the election.

RELIEF FROM RHEUMATIC PAINS.

"I suffered with rheumatism for over two years," says Mr. Rolland Curry, a patrolman, of Key West, Fla. "Sometimes it settled in my knees and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain, and unable from it to get out of bed, I went to the store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by The Stafford Drug Co.

Mining News

LATE COPPER NEWS. Sparks from Paine, Webber & Co.'s Wire Yesterday.

GAS IS TURNED ON.

Gas was turned on yesterday by the Calumet Gas company for the first time. All the subscribers will not be using gas until today because it is first necessary for the company's inspectors to release the gas to the customers. But by tonight the entire system will be working and Calumet people will realize a hope which they have had for years.

SOCIETY ANNOUNCEMENT.

At the Miscowabick club, Calumet, yesterday afternoon a luncheon was given by Miss Agnes Ruppe, daughter of Peter Ruppe of Red Jacket. The event was for the purpose of announcing the annual picnic at Calumet, Michigan, to be held on July 1st and 2nd.

COPPEROM BREVITIES.

Mrs. A. E. Webb of Houghton has gone to Milwaukee to visit relatives. R. T. McKeever, vice president and general manager of the Copper Range railroad, will leave for Boston today.

COPERS AND THE METAL.

The extreme interest which the public has in the copper-mining industry is ample excuse for repeated discussion of the conditions obtaining in our metal trade, especially as there has been a great deal of uncertainty of late regarding the price of copper. Prices of other commodities of copper in London suffered a severe decline which was accompanied by somewhat lower quotations by the New York Metal exchange, which body, so has been commented upon, has no dealings whatever in copper. Naturally this weakness, although recognized as speculative to a high degree, occasioned a great deal of nervousness on the part of holders of copper stocks, who have been fearful of the integrity of the price of copper ever since the Amalgamated broke the price some years ago. The drop in copper was timed so that it came when the demand for the metal was very limited. Consumers were well stocked and producers were sold ahead, so there was no business except in a

THE BUTTE COALITION COMPANY.

The Butte Coalition company, according to its Butte friends, is able to pay an increased dividend in May. If the dividend is governed by the company's earnings during the past two months, the earnings of the company have been put in first class condition, and as a head official of the company, who is also prominent in the Amalgamated, has said, the properties of the Coalition have been sufficiently developed so that the company could mine for five or eight years without doing any more exploratory work. The mines were in bad condition when the Coalition took hold of them, but today there are no better mines in the Butte district. The daily output of ore is estimated at 4,000 to 5,000 tons and the average copper value is between 3 and 4 per cent. The ore includes a lot of the highest grade mined in Butte, but it also includes a great mass of concentrating ore that runs but 1 or 2 per cent. The company's mining in the Butte district is very extensive and includes some of the very high grade of the Boston & Montana company. A small vein of good ore has already been mined in the tunnel connecting these properties.

THE CANONIA ARIZONA.

The Canonaria Arizona Consolidated Copper company, recently formed by Duluth, Houghton, Minnesota, Chicago and New York men, has completed its organization. Its property at Globe covers a large area. The Arizona Commercial and Superior Boston shafts are not a thousand feet distant. One prospect shaft has been opened, the fact that at the shallow depth of seventy feet the copper values increase from 1 per cent on the surface to 5 per cent in copper. This Canonaria Arizona development shaft is about 900 feet from the Arizona Commercial shaft. The shaft is equally near the railway.

REMOVES S.S.S. BLOOD HUMORS

When the blood is pure and healthy the skin will be soft, smooth and free from eruptions, but when the blood becomes infected with some unhealthy humor the effect is shown by rashes, eruptions, boils and pimples, or other disgusting and annoying skin disease. The skin is provided with countless pores and glands which act as a drainage system to rid the body of impurities through the perspiration, that is constantly passing through these little tubes. There are other glands that pour out of the skin an oily substance to keep it soft and pliable. When the blood becomes filled with humors and acids these are thrown off through the pores and glands, burning and irritating the skin and drying up the natural oils so that we have not only Acne, Eczema, Salt Rheum, etc. but such dry, scaly skin affections as Tetter, Psoriasis, and kindred troubles. The treatment of skin troubles with salves, washes, lotions, etc. is not along the right line. True, such treatment relieves some of the itching and discomfort and aids in keeping the skin clear, but it does not reach the real cause of the trouble, which are humors in the blood, and it can therefore have no real curative effect on these skin affections. S. S. S., a gentle acting and perfect blood purifier, is the best and quickest treatment. It goes down into the blood and removes the humors, fiery acids and poisons from the circulation, cools the overheated blood, and by sending a fresh stream of nourishing blood to the skin permanently cures skin diseases of every character. S. S. S. is made entirely of health producing roots, herbs and barks, and is an absolutely safe remedy for young or old. S. S. S. cures Eczema, Acne, Salt Rheum, Tetter, Psoriasis, and all other disagreeable and unsightly eruptions of the skin. Special book on Skin Diseases and any medical advice desired furnished free, to all who write.

City Brevities

Muriel Sear, of Midland, passed yesterday in the city.

Miss Augusta Primeau made a visit to Negaunee yesterday.

Miss C. L. Olsen, of Mangum, is the guest of Marquette friends.

Richard Quayle, of Ishpeming, visited with Marquette friends yesterday.

City Attorney George E. Brown transacted business in Negaunee yesterday.

Philip J. Hogan, of Negaunee, transacted business in this city yesterday.

H. S. Nightingale, of Negaunee, transacted business in Marquette yesterday.

Miss Maude Burgess, of Negaunee, is the guest of Sheriff and Mrs. John Rough.

S. R. Kaufman has returned from a three weeks' visit at Atlantic City and New York.

The G. I. A. to the B. L. E. will meet this afternoon at 2:30 o'clock at Keough's Hall.

Miss Hilda Summers, of Crystal Falls, returned home yesterday, after a visit with Marquette friends.

The Carnation club announces a social dancing party for Friday evening at Legion Hall. The music will be furnished by Professor Sweet's orchestra.

Fred Bernard, who has launched out in business on his own account, will open his meat market this morning. His shop is in the building adjoining Fred Bureau's grocery, South Third street.

Emmons to Go to Lewiston—S. E. Emmons at one time postoffice inspector of the District of Marquette, and who established a wide acquaintance in this city during a residence here of several years, has resigned from the department to accept the position of assistant postmaster at his old home, Lewiston, Maine. Mr. Emmons has recently had charge of the district of Muskegon, Indian Territory, and the news of his change of position comes from there.

Many Applications for Fry—Frank G. Jenks has already received a number of applications for the trout fry which will arrive from the Soo hatchery Friday morning. The fry will be planted in Kellan's, Harlow, Cherry, Little, Glick, Ormsby, Morgan and Sweitzer creeks and Little Dead river. The fry is secured under an agreement entered into with the hatchery by the Gun club fifteen years ago. It has had a great deal to do with keeping up the trout supply in this vicinity.

Dwyer Winning Fame in the West—'Sonny' Dwyer, a wrestler well known in this city and throughout the entire upper peninsula, is evidently making good in the west, for he defeated Dan McLeod at Denver, recently. Either McLeod has gone away back, or else Dwyer has suddenly developed championship status. Dwyer is a Scot at one time an American champion and was ranked as one of the foremost mat artists in the world. Dwyer is a man of fair education and a good address, and was at one time wrestling instructor to President Roosevelt when the nation's athletic director executive decided that he was accumulating too much adipose tissue.

Marquette a Grand City—'Marquette is the grandest little city I have met with in Michigan during a tour of the state that has occupied several months,' said the Rev. Dr. Killgore yesterday. 'Judging from the character of my audiences I sense that the moral sense here has reached a high development. I do not want to be misunderstood as giving the impression that the people of Marquette are deeply religious. I do not think that they are. The spirit of the frontier is too prevalent here as yet. But the life of the community is an open one. Its sins and shortcomings are plainly visible upon the surface. I have never met with more open-handed hospitality or more cordial friendship in a career of many years upon the rostrum and my sojourn here will always remain a pleasant memory.'

Trout Season Opens Today—The trout season in Michigan opens today. A number of sportsmen left last night, despite the unfavorable weather, over the Marquette & Southeastern for the streams in Alger county and others have gone to Shingleton on the South Shore. Speak of that growing, luscious salmon, California trout and German brown trout, may be taken with hook and line from May 1 to Sept. 1, except in Maple river, Emmet county, where the season is from May 1 to Aug. 1. All fish less than seven inches in length must be thrown back. In the An Sable river and all of its tributaries brooks trout, speckled trout, rainbow trout or California trout must be eight inches in length. It is also unlawful to catch more than fifty fish of the species named in one day or to take or have in your possession more than fifty fish at any one time. Black bass can be taken only from May 20 to Oct. 1, and cannot be sold during the closed season. Protected fish must not be transported beyond the boundaries of the state at any time.

WOULD PROTECT GAME.

President Burgess, of Michigan Association, Asks Aid from Marquette.

The Mining Journal is in receipt of a letter from F. S. Burgess, of Detroit, formerly of this city, who was recently elected president of the Michigan association, an organization which has for its object the protection of the fish and game of the state. Mr. Burgess says in part:

'Since organization we have received many communications from sportsmen in different parts of the state advising us that they are anxious to enroll in our association. We are particularly desirous of enrolling the sportsmen of the upper peninsula, as the protection of the fish and game means so much to that portion of the state. Although we have been in existence but a few weeks we have already a membership of over 1,500. It is our desire to form branch organizations throughout Northern Michigan to have certain reforms inaugurated in the fish and game laws, as I have lived there and am thoroughly acquainted with the situation. The great trouble in the past is that every local organization had from one to two bills before the legislature and the multitude of measures killed any effective work in remedial legislation. What we wish to do in the future is to amalgamate the sentiment of the state into one comprehensive measure.'

HOPED TO SAIL TO WASHINGTON, D. C.

ARMY BALLOON LEAVES ST. LOUIS, MO., ON PROSPECTIVE LONG DISTANCE VOYAGE.

St. Louis, April 30.—With a sharp, raw wind blowing, and heavy clouds banking the sky, Captain Chandler, of the United States signal corps, and Aeronaut McCoy, of New York, started tonight on the long distance balloon trip they had been trying to take for three days. They hoped the wind would carry them eastward that they might land near Washington, D. C., but immediately upon leaving the ground the balloon took a southerly course, veering slightly to the west.

Captain Chandler is making aerial observations for the government, which is now interesting itself in balloons as an aid to the army in case of war. He carried instruments to show the altitude and the speed attained. Aeronaut McCoy hopes to win the Lahm cup offered for the longest distance continuous flight. Several carrier pigeons were taken along, and messages will be sent back to St. Louis. Captain Chandler said before entering the basket that they expected to be in the air about forty-eight hours. Provisions to last the two men three days were taken.

OLD SUPERSTITION DEMOLISHED.

Once Despised Tomato Is Now Found on All Tables.

'The market for canned tomatoes has increased faster during the past decade than the market for any other vegetable,' said F. W. Wilson, of Paris, Ill., at the Hotel Marquette yesterday. 'There are now more canned tomatoes sold than peas, beans and corn combined. This is a pretty good showing for a vegetable that not long ago was not thought to be edible and was popularly believed for some time after it had become a table delicacy to cause cancer. Paris is in the heart of a tomato raising district. Tomatoes are one of the great staple products of the farmers. There is hardly a grocery store in Marquette that does not carry Paris canned goods upon its shelves. But when I was a boy, forty years ago, few people ate tomatoes. They were then known as love apples and I can remember my good old mother warning me against them as something that would endanger my existence, if I so much as handled them. The belief that tomatoes caused cancer was probably derived from the fact that the veining of a tomato very much resembles that of a cancerous growth. Now many physicians claim that tomatoes are an excellent diet in many blood diseases. Tomatoes contain calomel, and calomel is a standard prescription in blood disorders of a virulent type. 'Very few people would ever imagine that desert sections of the west furnish a fine market for canned tomatoes. It is nevertheless a fact. There is probably not a city in the country of any where near its size that disposes of many cans of tomatoes as Goldfields, Nevada. Tomatoes being both food and drink are a fine thing to take on a prospecting tour or on a trip through the desert. A can of tomatoes will assimilate, heat much slower than a bottle of water and, taken without salt, will quickly assuage thirst. I have seen many men, before starting on a prospecting tour through a dry section, place two or three cans of tomatoes in their saddle bags. When they became hungry and thirsty both desires could be assuaged by opening one of the cans and drinking the contents.'

BOWLING SCORES.

In the special match of fifteen games, total pins to count, between Foard, Miller and Van Iderstine, the latter won by twenty-eight pins. The following scores show a remarkably well rolled match. The grand average of the forty-five games was 176 and thirty-seven pins over:

Table with 3 columns: Name, Score 1, Score 2. Rows include Foard, Miller, Iderstine, and their respective scores across multiple games.

Foard's average 177; Miller's 173; Van Iderstine's 179 12-15.

Ishpeming Department

SEASON STARTS STRONG.
Ore Movement From Mines of This City and Negaunee Will Be Heavy.

Ore is now being shipped from every mine in Ishpeming and Negaunee, though the movement is not as heavy as it will be a week hence. There is a shortage of cars on some of the lines. This, however, will be relieved within a few days. The Lake Superior & Ishpeming Railway line has a large number of cars scattered along the Soo line. It is expected that most of these will be available before the close of this week, when the shipments via that road will be considerably increased.

Six steam shovels were in operation yesterday, three in this city and two in Negaunee. The South Shore has three switch engines and engines at work in the yards; the Lake Superior & Ishpeming has five, and the Chicago & Northwestern has seven. The greatest number of crews employed in the Northwestern yards at any time last season was seven, out of it was reported from the office yesterday that it will require the services of ten engines and crews to handle the business this year. The Lake Superior & Ishpeming line will have from seven to ten crews as soon as the extra cars on the Soo line are brought into service.

The loss of the tracks at the Angelle crossing, where the curve in the line late in December, will cause much extra work and no little inconvenience for all the railway crews until such time as new spur lines are put in. All of the ore being shipped from the Lake Superior and Negaunee mines, the Cleveland Lake and the Angelle properties will have to be transported through the Oliver company's yards before it can be placed on either of the three railway companies' main lines. Heretofore all of the ore was taken "around the horn," with the present arrangement in force the trains will pass over the Oliver yard tracks in rapid succession so that that company will have little chance to use the tracks to assemble loaded cars from its various properties. There will be less work room all around. Plus most of the ore will have to start on its movement to the docks as fast as the cars are loaded.

The railway companies have not yet begun to put in tracks to take the place of those destroyed by the cave-in, but a start will be made as soon as the weather becomes more favorable for grading. The Lake Angelle company has a crew engaged in grading the ground over which a track will pass to connect with a spur from 1200 to 1300 feet in length that the Lake Superior & Ishpeming road will build.

The ore from the Section 21, Salisbury and Section 16 mines will pass over the "horn" tracks as usual. It will not be necessary to suspend shipments from any of the properties on account of the shortage of tracks.

FISHING WILL BE GOOD.
Lumberjack from North District Reports That Trout Are Plentiful.
A lumberjack who spent the winter in the woods north of here was in the city yesterday. He reported that trout are so plentiful in some of the streams, among them Dead river that they can be seen in the water at many points where he has never before seen fish. While the streams are unusually high on account of the late snow storms, he said that there would be good fishing at this time. The streams will be as high, if not higher, two weeks from now, the best fishing will be had by those who have boats, as the river banks have extended some distance into the swamps in many places.

The roads leading to the fishing streams are in worse condition than they have ever been at the opening of the season. In places they are practically impassable. There will not be many anglers going to the streams today, but if the weather is favorable it is a cinch there will be many out next Sunday. Among those who will hit the streams today will be C. G. Goodsell, associate secretary of the Y. M. C. A., George Skogberg and Alfred Rydberg. They will fish at North lake. The roads are so poor in that vicinity they will take snow shoes with them.

DID BIG BUSINESS.
Stetson's "Uncle Tom" Drew Over 1,000 Children to the Theater.
There was very little "doing" at the lower grades of the schools yesterday. Most of the children were either excited to do their work or they were absent. Stetson's "Uncle Tom's Cabin" was the attraction. Although the company did not arrive in the city until after dinner, many of the youngsters did not attend school in the morning, and judging from the number on the street while the parade was in progress the attendance at school was meagre. It was the first time in some years that an "Uncle Tom's Cabin" troupe has given a matinee in Ishpeming, and it was little wonder that the theater was packed to its capacity at the afternoon performance. There were over 1,000 children, besides a large number of older people, present. The evening performance was also largely attended.

COMES TO THE HOSPITAL.
Dr. R. A. Burke, son of Alderman Burke of the Ninth ward, will today take a position on the Ishpeming hospital staff. He arrived in the city yesterday from Coleraine, Minn., where he has been employed the past few months as Dr. N. D. Kean's assistant. The many Ishpeming friends of Dr. Burke will be pleased to know that he is to remain in this city permanently. Dr. Kean gives him the most flattering recommendation as to his ability as a surgeon and physician. Dr. Burke will be succeeded at Coleraine by Dr. Savage, who has been practicing for several months past at St. Anthony's hospital in Chicago, where Dr. Burke did service for some time before going to the Mesaba range.

SORE NIPPLES.
Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many treated nurses use this salve with best results. For sale by The Stafford Drug Co.

ISHPEMING IN BRIEF.

Miss Nellie Dwyer left Monday for Chicago and Milwaukee, where she will spend a few weeks with relatives and friends.

A number of dogs have been poisoned here the past few days. Yesterday the carcasses of four canines were found on Third street, near Ridge.

The snow on either side of the road at the Badger hill is about eight feet high. A week ago last Sunday the banks there were twelve feet in height.

The ladies of Grace church congregation will conduct a pantry sale next Saturday. The place at which it will be held will be announced later.

W. J. Williams, for some time past employed by the John W. Gately company as collector, has taken a position as solicitor with the Cable Piano company.

The Ladies' Aid society of the First Methodist Episcopal church will give a ten-cent social this afternoon between 4 and 6:30 o'clock in the parlors of the church.

Mrs. Martin Claven and family, who spent the winter at Santa Barbara, Cal., have left there for Los Angeles, where they will spend a week or two before returning home.

Charles Regstrom, who is in the employ of the Consolidated Fuel & Lumber company at Marquette, arrived in the city last evening, to remain a few days, visiting relatives.

An Ishpeming man who visited the hills north of the Carp river yesterday returned with a nice bunch of arbutus. With four inches of snow on Monday and arbutus on Tuesday there is reason to expect that spring will soon be here.

Rev. E. V. Isaacson, pastor of the Swedish Lutheran church, and Frank Bayard will represent the Ishpeming society at the annual convention of the Illinois conference in Chicago next week, opening Tuesday. They will leave for the city Monday evening.

Miss Felka Farm, who has been in the county the past few days, will be the principal attraction at a concert to be given in Calumet May 21. Miss Farm is engaged to play return engagements at a number of places she has been heard within the past two or three months.

The Reivers baseball team, which will this season be managed by William Huot, has ordered new uniforms. The nine is composed of boys between eighteen and twenty years of age, who play a fast game. The manager says the club will be prepared to meet any ball team in the county.

J. W. McCorkindale, manager of the Marquette County Gas & Electric company, left Monday evening for Chicago, where he will spend a few days. While there he will give full instructions as to the third year car for the local system. He plans to have this car made heavier than either of the present cars.

FROM HOPKINS' CURE LETTER.
"The copper share market has held well, and while the further advance of 10 shillings for both spot and futures in the London market was not reflected in the price of stocks to any extent, a decidedly better feeling is noticeable in all directions. Nevada Utah reacted somewhat from yesterday's best figures. Superior & Pittsburg was well taken at 19 this morning, with the buying well distributed. Greene-Canaan was well taken at yesterday's figures to a shade higher. Talk on Butte Coalition is very hot, and the interests who are close to the property claim that an increased dividend in May is possible, and that earnings at present are at a rate that would justify such a move. It is stated that the properties are sufficiently opened up that they could mine for five to eight years without doing further exploratory work. The daily output of ore is now near the 1,500-ton mark and averages 3 and 4 per cent."

The day's prevailing prices were:

American	8.50	8.75
Ariz. Com	24.00	25.00
Almbeck	80.00	90.00

OUR NAVY UNPROGRESSIVE.

Always Behind Those of Other Nations in Absorbing New Ideas.

Washington, April 30.—Historically speaking, the navy department has always been unprogressive. Bureaucracy the world over usually opposes advances and new inventions, and Washington has afforded few exceptions to the rule. Ericsson, the inventor of the Monitor, received no recognition until he was able to build his navy-saving ship by private means. The introduction of steam engines was opposed long after other nations had adopted them. Although torpedoes were known and used in this country 130 years ago and played a great part in the naval history of the Civil war, the navy department has ever been indifferent to their development. Now in older days, when the United States was committed to the policy of a navy for police purposes only, this was excusable; at present, when official Washington is convinced that the nation's safety and prestige can be secured only by a vast fleet of costly vessels, the failure of the navy department to keep abreast or ahead of the times becomes of moment to the taxpayer, and can be laid neither to the indifference of the administration and the people nor to the niggardliness of congress.

Examples of the way in which the government builds ships inferior to those already afloat are numerous. Take the case of the two 20,000-ton battleships, of which we have heard so much. The plans approved last week call for a speed of only twenty knots, although the Dreadnought, which they are supposed to rival, has made 22½ knots. By great effort, the department hopes to complete them in three years, which would surpass previous American building records by from one and one-half to two years. But, supposing these ships are afloat and in commission in three years, they will only be contemporaries of some British vessels which will be laid down a year hence. It is idle to expect that the English battleships of 1910 will have only the same speed as the Dreadnought; they may be counted on to be capable of at least twenty-three knots, for England is already building three armored cruisers of 22,500 tons, with a speed of twenty-five knots. Again, the object of the navy department was to have the "biggest ships afloat." So its experts are planning for vessels 2000 tons larger than the Dreadnought. But Japan is already ahead of them, since she has placed an order for two 21,000-ton ships, to say nothing of the British cruisers. Thus not even the title "biggest in the world" can be applied to our sea monsters.

So far as their engines are concerned, while no definite announcement has been made, it is understood that our newest boats are to be provided with turbines. Let anybody think that this is an original idea, we hasten to say that the navy department scoffed at turbines long after they had been tried by the British and found to be the engine of the future. Fully a year ago the admiralty announced that on most classes of ships, turbines alone would be installed hereafter. At this time, only one vessel of the sixteen now under construction for the United States navy is being equipped with turbine machinery. The nine first-class battleships now nearing completion

have reciprocating engines, and not one is planned for a speed of twenty knots. Even Germany has adopted turbines for her new vessels, and as is usually the case, the American merchant marine is ahead of the navy, for there are several turbine steamers, including the Harvard and Yale of the New York-Boston line, ready to go into commercial service. American submarine-boat inventors have had almost the same experience of did Ericsson. The Holland boat was finally adopted in this country after the inventor had gone abroad in despair; and Mr. Lake, whose submarine is thought by many, including an army trial board, to be the best this far built, found his first recognition in Europe. For several years he could get no hearing; not until the Holland lobby charges and counter-charges, in the ex-congressman Quigg figured, did his case progress. It is over three years since an army board rendered a favorable verdict for him; yet the first navy trial of the boat is scheduled for the first week in May. It is but fair to add that this delay is partially due to the lake company; but it can hardly be blamed for selling its first boat to Russia or moving its plant across the Atlantic, where appreciation of the special advantages of its type is lacking. Meanwhile, the navy is exhibiting, at the Jamestown exposition, Holland boats recently praised in the press as the "finest of their kind afloat." Yet they are but half the size of some foreign boats, and their above-water speed of seven knots hardly compares favorably with that of the new English submarine which recently ran from Barrow to Devonport at the rate of fifteen knots. Yet an American used a submarine in the Revolution.

What is true of the department's neglect of submarines is equally true of our torpedo boats. Everything is sacrificed to the craze for monster battleships, out-of-date when they are launched. The department has not on hand enough torpedoes to supply even the existing boats. Ten destroyers and six large torpedo boats are without any torpedoes. While the department has just decided to make over two of the older cruisers into mine laying ships, there are on hand no offensive mines, and no large supply of defensive mines for advanced bases. Finally, while we have but twelve submarines to England's forty-eight and France's eighty-nine, we have not a single torpedo boat building, and only fifty of all classes, as contrasted with England's 330, France's 443, Italy's 158 and Germany's 184.

GOOD WORDS FOR CHAMBERLAIN'S COUGH REMEDY.

People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mrs. Edward Phillips of Barre, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catherine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a dreadful cold myself, but I took Chamberlain's Cough Remedy and was soon as well as ever." This remedy is for sale by The Stafford Drug Co.

TURBINE BIDS RECEIVED.

Electrical Concerns Prepared to Install Plant in Quick Order.

The representatives of the General Electric company and the Westinghouse company, who were in the city last Friday, appearing before members of the board of public works that evening, were prompt to submit bids on the steam turbine engine and the other equipment the board proposes to install at the electric power station. Bids from both concerns were received yesterday, together with catalogues and specifications, and it is expected that the board will examine them within the next day or two. No other companies are expected to bid on the equipment, and if the board recommends that the improvement be made and the same is accepted by the council, one of the two concerns will be awarded the contract.

The representatives of both companies tried hard to land the contract while in the city last week, but neither was prepared to state within several hundred dollars of the probable cost of the equipment. The board has been assured by both concerns that the machinery will be delivered within a very short time after the contract is signed, and it will be installed without delay. Superintendent Pearce stated yesterday that both concerns have advised him that shipment of the machinery can be made within two weeks after the order is placed, and that the equipment can be installed and ready for operation thirty days after its arrival.

Mr. Pearce thinks well of the contemplated improvements. He stated yesterday that with a turbine engine the lighting plant would be improved more than 50 per cent, and he said that a great deal more business than possible now could be taken care of. The day service, he thinks, would result in a reasonably large percentage of increase in the receipts. The proposed equipment will include engine and generators complete.

MINERS LIKE NEVADA.

Quartet of Negaunee Men, Who Recently Left Here, Are Working in Tonopah.

Richard Kemp, William Gilbert, James Burns and James Rodgers, wellknown Negaunee miners, who left here for Nevada, have located at Tonopah. They planned to go to Goldfield, but were advised that the strike was still on and concluded to try the Tonopah district. There they met several former Negaunee men, including John Tonkin, John Trembath and John Hurst, who aided them in securing work. The weather has been favorable since their arrival and they are pleased with their employment. The miners in the Tonopah district are not as well paid as those in the Goldfield district, but the conditions there are more favorable.

ROCK ACCEPTS THE TERMS.

The board of education will get the John Rock property at its own price. This is the outcome of developments yesterday. The lot is part of the site selected for the new high school. Mr. Rock was offered \$5,500 by the board, but to retain the buildings now occupying the ground. He demurred to this, and submitted a counter proposition, demanding \$7,000. This figure was considered by the board and accepted. The actual worth of the property, and accordingly condemnation proceedings were instituted. The hearing was to have taken place yesterday. Prior to the submission of the matter to the jury, however, Mr. Rock concluded to accept the terms offered him, and the matter was closed by the board on that basis. The decision of the owner of the lot was advised by his attorney, Louis N. Legeris of Houghton, who after coming here and looking the ground over concluded that nothing could be gained by making a contest. The outcome will be satisfactory to the people generally.

FIRE IN PEACE BLOCK.

Harry Pearce discovered a fire in one of the store rooms in his block yesterday morning about 3 o'clock. Backache, head aches, and a severe toothache, followed him as he was investigating the floor and timbers beneath it burning. The blaze was extinguished with a few pails of water. The damage was light. The origin of the blaze is unknown, but Mr. Pearce thinks that some of the men working in the room during the day might have dropped a lighted match. The place is being fitted up for Joe Trathan, who will move his saloon business from the Lobb building near the South Shore depot.

DOING WELL HERE.

W. J. Harris of Ishpeming, who is soliciting business for the Marquette County Gas & Electric company, has disposed of a number of gas stoves in Negaunee the past week or ten days. He has also found a number who have offered him for illuminating purposes. The company is at present offering inducements in the way of low prices for gas stoves. The quality of gas being provided is now much better than it has been at any time since the completion of the new plant.

FOR WIVES AND MOTHERS.

Save the Loved Ones From Drink Evil—Orrine Guaranteed to Cure Can Be Given Secretly.

If your husband or son has fallen a victim to the drink habit, stop pleading, scolding and crying. Use Orrine which is recommended by thousands.

This successful remedy can be given secretly if desired, or the patient can take it of his own free will. It absolutely destroys the desire for strong drink, and builds up the run down system, strengthens the weakened nervous and soon restores the patient to his normal condition. Write for free pamphlet on cure of alcoholism to Orrine Co., Washington, D. C. Sent in plain sealed envelope.

The price of Orrine is \$1 a box. Orrine is sold by The Stafford Drug Co.

WILL CLOSE EARLY.

Public Schools of Negaunee to Wind Up the Year's Work June 13.

The Negaunee public schools will close a little earlier than usual this year, or on June 13. Arrangements are already being made for the commencement exercises, at McDonald's opera house on the evening of that date. There are thirteen boys and girls in this year's class. A prominent speaker will be secured to deliver an address. Superintendent Orr Schurtz believes that the students accomplish more by spending their last few weeks in school reviewing their work instead of preparing orations for commencement. The seniors will be the guests of the juniors next Friday evening at a hop to be given at McDonald's opera house.

"We are all much interested in new school matters," said Superintendent Schurtz yesterday. "With a new building in which we will have manual training and domestic science departments, our general school work will be much improved. Our commercial department, which has developed wonderfully since its establishment, will be made a prominent feature. We now have between sixty and sixty pupils taking the course in the department, one of the busiest in the school. I am much pleased with the progress our commercial students are making. We frequently have places offered to students and several who learn typewriting and bookkeeping in the school are now holding good positions. We have six typewriters in the department and they are kept almost constantly in use."

ICE WAGONS WIN A MATCH.

In the bowling league contest Monday evening at Orr & Tompkins alleys the Ice Wagons defeated the Wolves, the scores being:

Wolves.....	133	101	148	402
Sanders.....	100	92	92	512
Richel.....	152	155	149	456

We are now prepared to execute promptly all orders in our ladies' tailoring department, which is now in charge of Miss Mae Greiner, late of Milwaukee. H. J. Peterson. (5-1w)

LOCAL LACONICS.

Mrs. W. A. Garner visited friends at Michigan yesterday.

Miss M. Howard and Miss Bridget of Escanaba were visitors in Negaunee yesterday.

Engineer Murphy, a wellknown commercial man of Hancock, was in the city yesterday.

Will Parala and wife went to Crystal Falls yesterday, to spend a few days visiting friends.

Members of the Ladies' Aid society of the Presbyterian church met with Mrs. W. L. Bedford yesterday afternoon.

The Marquette County Gas & Electric company has disposed of one of the old street cars to Negaunee junk dealers. William Vodden, for several years in the employ of the Marquette County Gas & Electric company, now working at the Pioneer Furnace in Marquette, was a visitor in the city yesterday.

Additional railway tracks are to be put in at the Mary Charlotte mine. The ore shipments from this property will be heavier this season than last year, and the present trackage is inadequate.

Will Edwards, driver of the Western Express company's delivery team, had to have part of a finger amputated as a result of an injury. He was taking a trunk from a car and jammed his finger between it and the door.

The delivery men of the city, who make the country routes, report that the roads of the main thoroughfares are in wretched condition. It is impossible to haul a load of any weight over them.

F. Jandron, day operator at the Chicago & Northwestern Railway company's local office, is confined to his home with his arm as a result of blood poisoning. He scratched his hand Saturday with a pen.

STRAIN TOO GREAT.

Hundreds of Marquette Readers Find Daily Toil a Burden.

The hustle and worry of business men, the hard work and stooping of workmen, the woman's household cares, are too great a strain on the kidneys. Backache, headache, dizziness, kidney troubles, urinary troubles follow.

A Marquette citizen tells you how to cure them all.

Frederick Pearan, upholsterer, formerly of 157 West Washington street, Marquette, Mich., says: "I can recommend Doan's Kidney Pills very highly. I used them for backache, a dull uneasy feeling and a constant misery in my loins and sides. There was also a miserable weakness across the small of my back. I never laid up with anything but my back was easily tired and all gone feeling would come on. I tried a number of remedies, but in spite of all I became worse instead of better. Finally I saw Doan's Kidney Pills advertised and got a box at the Stafford Drug Co.'s store and used them according to directions. The result was far beyond my expectations as in a few days the pains ceased, my back became strong, all that uneasy miserable feeling left me and has never returned. I most freely give my name as an endorser of Doan's Kidney Pills and hope other sufferers may learn of them and be cured."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

AWNINGS.

The Kelly Hardware Co. can furnish you with awnings for stores, public buildings or residences. Any size.

KELLY HARDWARE CO.,
(8-27-11) Marquette.

MUCH WATER IN SOUTH SHORE R'Y

500 NEWS MAKES INTERESTING COMPARATIVE TABLE AND DRAWS SOME DEDUCTIONS.

The legislature of Minnesota and the people of that state have been astounded at the amount of water injected into the securities of the railroads operating in its territory, the facts concerning this condition having become public through the investigations of a legislative committee, says the Soo News. A study of the reports of some of the railroads of Michigan made to the railroad commissioner annually would reveal an equal amount of aqua pura in the stocks and bonds of roads operating in this state. This all leads to the query: "What is going to be done about it?" and the wise man who can point out an equitable correction of this abuse has not yet come out of the east, or the west either.

A ruthless reduction of capitalization and bond issues to amounts representing actual investment and real value would work a tremendous hardship on thousands of innocent investors, who have put their money into these securities and who are wholly without blame or responsibility for the conditions existing. If the punishment could be meted out to the Harrimans, the Morgans, the Rockefellers and the rest of the backers of frenzied finance, who are responsible, without at the same time compelling the innocent to suffer with them, but short shifts would be made of the matter; but this cannot be done, or at least no one has yet found a way of doing it. And yet to permit these conditions to continue is equally an injustice to a far greater number—the great public—who must pay excessive freight, express and passenger charges in order that interest charges may be paid upon stock and bonds issued far in excess of the legitimate value of the property against which the securities stand.

No better illustration of this execrable condition can be found than in the case of the Detroit, South Shore & Atlantic railroad of this upper peninsula. No road in Michigan has ever been given quite so rigorous a "water cure" as the South Shore. It is the perfect type of the "higher school" of frenzied finance in railroad building. It is so full of water that the wonder is that the craft is still afloat and that it is at least still can only be attributed to positive genius on the part of the management. Other railroads similarly mis-handled in their infancy have long ago had a new birth in which much of their aqueous matter was drained off, but the poor old South Shore carries the load put on it and the people pay the freight.

Why Rates Are High.

The stereotyped excuse for higher passenger and freight rates for this section is high cost of operation. That, pretty much "bunk" in the case of the South Shore at least. The real reason is that the road is required to pay interest upon an enormous indebtedness approximating fifty million dollars, and even the excellent showing made in both passenger and freight earnings does not avail to do this, and the road annually shows a deficit and the people continue to get it in the neck and will so long as that water stays in or until the upper peninsula is as densely populated as the lower portions of southern Michigan. That expense of operation does not constitute the actual reason for higher freight, express and passenger charges is shown in the percentage of expense to earnings, which in the South Shore is but 72 per cent, while the percentage of expense to earnings of the Grand Rapids & Indiana is 80 per cent, the Pere Marquette 80 per cent, the Soo Line 77 per cent, and the Detroit & Mackinac 74 per cent.

A comparison of two Michigan roads, both running through sparsely settled portions of the state, the South Shore and the Detroit & Mackinac, is illuminating. The former is a perfect sample of what frenzied finance can do to a good railroad proposition, while the Detroit & Mackinac is a beautiful illustration of a

TUMORS CONQUERED

Overwhelming Proof that Lydia E. Pinkham's Vegetable Compound Succeeds.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy Tumor.

The growth of a tumor is so insidious that frequently its presence is wholly unsuspected until it is well advanced.

So called "wandering pains" may come from its early stages or the presence of danger may be made manifest by excessive monthly periods accompanied by unusual pain, from the abdomen through the groin and thigh.

If you have mysterious pains, if there are indications of inflammation or displacements, secure a bottle of Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, right away and begin its use.

The following letters should convince every suffering woman of its virtue, and that it actually does conquer tumors.

Mrs. May Fry, of 836 W. Colfax Ave., South Bend, Ind., writes:
Dear Mrs. Pinkham—

"I take great pleasure in writing to thank you for what Lydia E. Pinkham's Vegetable Compound has done for me. I also took the Blood Purifier in alternate doses with the Compound. Your medicine removed a cyst tumor of four years' growth, which three of the best physicians declared I had. They had said that only an operation could help me. I am very thankful that I followed a friend's advice and took your medicine. It has made me a strong and well woman and I shall recommend it as long as I live."

Mrs. E. F. Hayes, of 26 Ruggles St., Boston, Mass., writes:

Dear Mrs. Pinkham—
"I have been under different doctors' treatment for a long time without relief. They told me I had a fibroid tumor, my abdomen was swollen and I suffered with great pain. I wrote to you for advice, you replied and I followed your directions carefully and today I am a well woman. Lydia E. Pinkham's Vegetable Compound expelled the tumor and strengthened my whole system."

Mrs. Perry Byers, of Mt. Pleasant, Iowa, writes:

"I have been under different doctors' treatment for a long time without relief. They told me I had a fibroid tumor, my abdomen was swollen and I suffered with great pain. I wrote to you for advice, you replied and I followed your directions carefully and today I am a well woman. Lydia E. Pinkham's Vegetable Compound expelled the tumor and strengthened my whole system."

proposition run solely as a business proposition without the slightest thought of Wall street or what it stands for. The total of stock and bonds issued against each mile of the South Shore is \$80,129.19, and against each mile of the Detroit & Mackinac \$18,929.13. For the most part the topography of the northern end of the lower peninsula does not differ greatly from that of the upper peninsula, but admitting greater cost of construction, here's a difference in stocks and bonds that is astounding and most of it is water of the Wall street-Harrimanized type.

Comparative Figures.

The figures in the following table are submitted purely in an educational way, in order that the people of this community may be more or less informed on a question which is sure to come to the front in the coming year, and which will probably offer the knottiest problem to congress and to the state legislature to solve since the greatest questions arising out of the slavery issue. Michigan will in all likelihood soon have a railroad commission. No community in Michigan stands in greater need of reduction in transportation charges, especially during the season of closed navigation, than the Soo, and it may want to appeal to the commission for aid.

The following table is made up from the annual reports of the railroads for the year 1905:

	D. S. S. & A.	D. & M.	G. R. & I.	Pere Mar.	Soo Line.
Stock issued, per mile.....	\$37,737.14	\$ 8,853.80	\$13,721.47	\$12,295.49	\$ 9,826.72
Bonds, etc. issued, per mile.....	48,383.05	10,075.33	36,161.58	26,585.94	23,222.78
Total indebtedness, per mile.....	\$86,120.19	\$18,929.13	\$49,883.06	\$38,877.44	\$33,049.50
Passenger earnings, per mile (in Mich.).....	1,927.57	809.43	2,756.41	1,541.63	1,034.73
Freight earnings per mile (in Mich.).....	5,556.98	2,199.12	4,089.34	3,871.91	2,781.68
Total earnings per mile (in Mich.).....	5,556.98	3,143.17	7,697.41	5,413.23	3,816.41
Operating expenses, mile, entire system.....	3,599.21	2,340.28	6,319.21	4,371.25	2,994.42
Net earnings, per mile, entire system.....	1,358.68	802.59	1,543.93	1,042.88	2,512.32
Percentage of expenses to earnings.....	72.58	74.46	80.78	80.78	77.86

Dear Mrs. Pinkham—
"I was told by my physician that I had a fibroid tumor and that I would have to be operated upon. I wrote to you for advice, which I followed carefully and took Lydia E. Pinkham's Vegetable Compound. I am not only cured of the tumor but other female troubles and can do all my own work after eight years of suffering."

Mrs. S. J. Barber, of Scott, N. Y., writes:
Dear Mrs. Pinkham—
"Sometime ago I wrote you for advice about a tumor which the doctors thought would have to be removed. Instead I took Lydia E. Pinkham's Vegetable Compound and to-day am a well woman."

Mrs. M. M. Funk, Vandergrift, Pa., writes:
Dear Mrs. Pinkham—
"I had a tumor and Lydia E. Pinkham's Vegetable Compound removed it for me after two doctors had given me up. I was sick four years before I began to take the Compound. I now recommend Lydia E. Pinkham's Vegetable Compound far and near."

Such testimony as above is convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for Tumor Growth as well as other distressing ills of women, and such symptoms as Bearing-down Sensations, Displacements, Irregularities and Backache, etc. Women should remember that it is Lydia E. Pinkham's Vegetable Compound that is curing so many women. Don't forget to insist upon it when some druggist asks you to accept something else which he calls "just as good."

Mrs. Pinkham's Invitation to Women.

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass., for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law, Lydia E. Pinkham in advising. Thus she is especially well qualified to guide sick women back to health.

PLAN MATINEE DRIVING CLUB

RACES BETWEEN COUNTY HORSES MAY BE WEEKLY FEATURE OF SUMMER SEASON.

MANY GOOD COLTS IN COUNTY

Promoters Plan to Secure Services of Mr. Shepard, of Standish, and Establish Training Quarters at Fair Grounds.

A number of Marquette horse owners are planning the organization of a matinee driving club, with the view of giving weekly matinees during the coming summer and fall. Only county horses will be eligible and in most instances owners will drive. In no case will the presence of a professional jockey on the sulkies be allowed, unless with the consent of the opposing entries. Races of this description have always furnished the highest type of sport. As there is no incentive to win save the joy of winning, and nothing to be gained through either jockeying or pulling, as neither purses nor stake money is dependent upon the outcome, they are invariably "on the level." Another thing that offends militates against the success of professional race meets is the fear by owners that they may mark their horses. Thus good animals are often held in when they have the field at their mercy in order to keep them in a class below that in which they rightfully belong. Marquette residents have had a taste of that kind of work in seasons past. In matinee races, however, where the heats are half-miles, and no admission is charged save for the grandstand, a horse can be driven out without danger of receiving a mark.

There are many good colts in this city. Ishpeming and Negaunee that with a little training, would develop into swift stoppers. Proper facilities for their training have, however, been lacking. There are several thorough horsemen in this locality, but none of them have taken up the development of young stock as a business. Within the past few days Marquette horsemen have been in correspondence with H. Shepard, of Standish, relative to the establishment of a training stable at the fair grounds in this city. Mr. Shepard is one of the best known horsemen in the state, and has been exceptionally successful in the development of colts. He has been assured that if he will locate here the Agricultural society will allow him commodious stabling room at the fair grounds and the use of the track. He has also been guaranteed a sufficient number of colts to make the venture a paying one. A prominent business man, in speaking of the matter yesterday, said:

"I have every reason to believe that a Matinee Driving club could be made a success in this city and from the impetus the move has already received I

have little doubt that one will be organized. I think it would prove a good advertisement for the city, as it would bring people here on race days. There are some good horses in the county, but not enough trained racers to put on a good program weekly. However, there are a number of standard bred colts that could be developed into fast half-mile stoppers in a short time. Most of them are owned by men who could well afford to pay for their development. We have written to Mr. Shepard, of Standish, and from his replies we are of the belief that we can induce him to locate here and establish a training stable at the fair grounds. The cost of training a colt is not nearly so expensive as is popularly believed. If Mr. Shepard could get a good string the price for training would amount to little more than board at an ordinary livery stable. The Marquette track is an excellent one and very fast under proper weather conditions. We have already had assurances that we can secure the necessary privileges from the Agricultural society."

APPROVES 51 LIQUOR BONDS.

Committee to Try to Secure Interest on City Deposits.

A regular adjourned meeting of the council was held last evening. Mayor Robertson and Alderman Downey were the only absentees. President Asire presiding. Langyear & Hoize presented a petition requesting permission to erect a storage warehouse on Lake street near Washington. It was represented that the building contained little combustible material and the petitioners were willing that the work be conducted under the supervision of the fire warden. Alderman Schaner stated that he had informed himself in the matter and the building was as near fireproof as it was possible to make it. The petition was granted. The committee on licenses and trade regulations submitted the liquor bonds for forty-seven saloons, two druggists, one beer warehouse and one wholesale house. The report was accepted and filed and the bonds approved.

A resolution that the city pay the premium on the bond of Treasurer R. P. Byrne, was carried. The amount is between \$225 to \$250 on the required bond of \$60,000. The committee on finance and taxation was instructed to see what could be done in securing interest on city deposits from the local banks.

The park, cemetery and street commission was instructed to build a sewer on Seventh street from Rock to Fisher in accordance with plans adopted at a previous meeting. The council adjourned to Monday, May 5.

A concert by the little folks will be given in the M. E. church Tuesday evening, May 7th, at 8 o'clock. The proceeds of the concert will be the children's contribution toward the Organ fund. The admission is 15 cents. (5-1-1d)

DOWNEY'S PLAN GOOD IN THEORY

HOWEVER, ATTEMPTS AT INDUSTRIAL ORGANIZATION HAVE BEEN TRIED IN MARQUETTE BEFORE AND ENDED IN FAILURE.

Alderman John Downey said that prior to bringing the matter of the organization of local advancement association to the attention of the council, he had gone to some pains to inform himself on the subject. Duluth, he said, had an association the intent of which was to secure new industries for the city and loan the town generally, and he had authentic data in his possession to prove that the organization had had much to do with the development and growth of Duluth in the past few years. He understood, he said, that businessmen's associations organized for the purpose of putting Marquette more prominently on the map had been launched before and had proved failures. They had, however, been entirely independent of the council, and he believed that a move sanctioned by that body would prove a success.

Mayor Robertson said yesterday that he was doubtful whether the council could take any official action in the matter. Should citizens organize a league or advancement association, it might be within the province of the council to assist in furthering the move, but the organization should, he believed, be promoted from outside sources. A gentleman who has been connected with several moves in the matter of industrial organizations to promote the welfare of the city, voiced the opinion that Alderman Downey's ideas were excellent, but that their practicability under existing conditions was much to be doubted. It had heretofore, he said, proved a Titanic task to secure a quorum subsequent to the initial meeting and impossible to collect dues. Advancement associations in other cities had been successful, but in Marquette the speculative spirit was too strong. The average Marquette resident with capital is more intent upon making money through a turn in the copper market than through the gradual rise in price of his real estate holdings and the general development of the city.

It's too bad to see people who go from day to day suffering with physical weakness, when Rocky Mountain Tea would strengthen them. Tea or Tablets 35 cents. The Stafford Drug Co.

NOTICE.

To horse owners and drivers. If you want your horses shod by the most up-to-date and scientific method, by one who thoroughly understands the anatomy of the foot, send them to 109 E. Spring street, or call up No. 379 red, Bell phone, and we will do the rest. Satisfaction guaranteed or your money cheerfully refunded.
