

PRIMARY BILL GOES TO SENATE

Reform Measure of Governor Warner Passes the House, Seventy-Four to Seven—It Gets but Few Upper Peninsula Votes.

Lansing, Mich., May 2.—[Special.]—The primary election bill passed the house today with one amendment which is regarded by many as an effort on the part of the Townsend men in the senatorial contest to take a "sweep" at Wm. Alden Smith.

Representative Farrell tried to amend the bill by bringing in all the state officers, and he got forty-six votes for thirty-eight against—not the necessary two-thirds vote.

Representative Waters tried to get an amendment calling for 20 per cent of the vote cast in order to nominate governor, lieutenant governor and United States senators, but did not succeed.

The friends of the bill claim that it will have eighteen votes in the senate as it now stands. It is said that the Townsend men have joined with Atwood in trying to get the 40 per cent clause kept in the bill.

Three Men Killed, Three Fatally Hurt, at Mine in Pennsylvania. Johnstown, Pa., Friday, May 3.—Three men were killed and six injured, three fatally, in an accident late last night at a mine at Hiddlesburg, Bedford county.

Washington, May 2.—The following is the weather bureau's forecast for Upper Michigan: Cloudy, Friday, probably low clouds; Saturday, partly cloudy; fresh northwest to north winds.

ELOPED WITH YOUNG GIRL.

Rev. Jure Cooke, Episcopalian, Is Deposed from the Ministry. New York, May 2.—Rev. Jure Cooke, who recently left Homestead, L. I., where for five years he had been rector of the St. George Episcopal church, was tonight deposed from the ministry by Bishop Burgess.

FIVE YEARS IN PRISON.

Two Former Bank Employes in Chicago Sentenced for Embezzlement. Chicago, May 2.—Charles Thornton and Wm. B. Baker, formerly note teler and bookkeeper, respectively, of the Hamilton National bank, today pleaded guilty to the embezzlement of \$10,000 from the bank. Each was sentenced to five years' imprisonment.

UNIONS AT ODDS; MANY MEN IDLE

LOCKOUT AT PHILADELPHIA INVOLVES 30,000 WORKMEN IN THE BUILDING TRADES. Philadelphia, May 2.—After vainly trying since Friday last to settle their trade dispute, which involves the question of the granite cutters' right to set stone which they have finished, journeymen bricklayers of this city to the number of 2,400 were locked out tonight by the master bricklayers.

St. Louis, Friday, May 3.—The issuance of any morning papers in St. Louis is uncertain early this morning. The Republic will endeavor to publish an eight-page paper, but has no experienced men to handle the presses.

BREWER GETS OFF WITH SMALL FINE

WASHINGTON LIFE'S FORMER PRESIDENT PAYS \$500 FOR MAKING FALSE REPORTS. New York, May 2.—Wm. A. Brewer, Jr., former president of the Washington Life Insurance company, was sentenced today to pay a fine of \$500 for making a false and fraudulent report to the state superintendent of insurance in regard to the financial condition of that company.

CAR HURLED FROM TRESTLE.

Three Men Killed, Three Fatally Hurt, at Mine in Pennsylvania. Johnstown, Pa., Friday, May 3.—Three men were killed and six injured, three fatally, in an accident late last night at a mine at Hiddlesburg, Bedford county.

Washington, May 2.—The following is the weather bureau's forecast for Upper Michigan: Cloudy, Friday, probably low clouds; Saturday, partly cloudy; fresh northwest to north winds.

MACHINE MEN WIN AT ALBANY

Governor Hughes Defeated in His Effort to Bring About the Removal of State Superintendent of Insurance Kelsey. Albany, N. Y., May 2.—One year to a day from the time of his original appointment by Governor Higgins, the senate tonight reconfirmed Otto Kelsey in the office of state superintendent of insurance, giving only twenty-four of the twenty-six votes necessary to sustain Governor Hughes' recommendation of his removal from office.

NOTE IN BOTTLE TELLS OF DISASTER

"BOAT TURNED TURTLE," THE POSTHUMOUS MESSAGE OF TUG SEARCHLIGHT'S FIREMAN. Harbor Beach, Mich., May 2.—The superintendent of the life saving station here has received a note found on the beach which explains the fate of the lost fishing tug Searchlight.

BASEBALL

Table with columns: National League, American League, Standing of the Clubs. Lists teams like Chicago, New York, Philadelphia, Boston, Cincinnati, St. Louis, Brooklyn with their respective records.

WISCONSIN SITUATION UNCHANGED.

Madison, Wis., May 2.—Five ballots were taken at the Republican senatorial caucus tonight, the last one, the forty-eighth, resulting as follows: Cooper, 17; Esch, 17; Hatten, 14; Johnson, 13; Stephenson, 13; Baensch, 3; Winkler, Hoard, Spooner, Wyle, Leroy and Ingram, 1 each.

MORE WINTRY WEATHER.

Cold Wave and Snow in Colorado, Nebraska, Minnesota and Iowa. Colorado Springs, Colo., May 2.—A blinding blizzard prevailed here this afternoon.

EFFORTS TO CAP GASSER FAIL.

Jumbo of Kansas Field Pitches Heavy Tools Around Like Feathers. Independence, Kan., May 2.—All the efforts to cap the big gasser brought in near Caney or get it under control have so far failed.

Washington, May 2.—The following is the weather bureau's forecast for Upper Michigan: Cloudy, Friday, probably low clouds; Saturday, partly cloudy; fresh northwest to north winds.

VOICE GONE, CUTS OUT TONGUE.

Rossi, Tenor, Attempts Suicide—Is in Critical Condition. Milan, May 2.—Arangelo Rossi, the tenor who was with the Comed Opera company in San Francisco during the earthquake, and who has as a result of the fright he experienced has not since been well, endeavored to commit suicide here today.

MANY LIVES JEOPARDIZED.

Attempt Made to Wreck Heavily Loaded C. & N. W. Passenger Train. Racine, Wis., May 2.—An attempt was made last night to wreck a passenger train on the Chicago & Northwestern railway, heavily loaded with passengers, bound for Milwaukee and Racine for Chicago.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Subscription Rates: Per month, by carrier, \$1.00; Per year, by mail, \$10.00

MARQUETTE, MICH., MAY 3.

Official reports show the weather in April to have been as bad as we thought it was.

The native police evidently must be taught that "Cuban libre" does not embrace the privilege of pounding up Uncle Sam's bluejeans.

Doubtless Representative Gordon will let Ishpeming and Negaunee in on his proposed liquor traffic bill, if they feel alighted at being left out.

Already the inquiry into the manner in which Pennsylvania's new capitol building was erected justifies the conclusion that it is not all it seems to be.

If Negaunee erects a high school building commensurate with its \$30,000 site and the high ideas of its people, it will have a structure that will speak for itself.

Judging from the trend of dramatic criticism on that starchy offering, the Northern circuit has never been compelled to accept anything quite as bad as Rev. Dixon's "Clansman."

The Wisconsin senatorial deadlock is still securely deadlocked, and there is no reason for expecting an early break in the present alignment, though, as a matter of fact, every day brings the end just a day nearer.

The rival theatrical syndicates, the trust syndicate and the independent syndicate, have merged, but it is as yet too early to say whether or not the development will help the Northern circuit.

Surely Mayor McClellan ought to know whereof he speaks when he discusses the reported peace between him and Tammany. Therefore we may credit his statement that the reports we have had are premature, and that no peace pact has as yet been arrived at.

Ex-Senator Spooner and Senator La Follette are both mentioned as presidential possibilities. It might as well stop right there. Before either of them could round up the Wisconsin delegation some third candidate would have rallied a majority of the national convention.

The voting machine will be always with us, and we can have a flock of agents here in forty-eight hours, by simply giving notice that we contemplate buying. Therefore let's not tie any of our money up until the time arrives when we expect to need the machines for practical purposes, rather than as exhibits.

We are pleased to learn that an upper peninsula member has succeeded in leaving the impress of his ideas on the proposed legislation for holding the constitutional convention. It is reassuring to be informed that in such a session as the one now in progress an upper peninsula legislator has been able to leave the impress of his ideas on anything.

The Downey house bar is not, after all, to be an arid spot the ensuing year. The Lansing court held up O. C. Downey's request for a license, because he had been convicted of a violation of the liquor law, and a vista of a dry season opened up before the frequenters of the Downey. But the difficulty has been gotten around by having Charles P. Downey, instead of Oscar, apply for the license, and peace and quietude once more reign among the habitués of the place.

Although it is not attended by wrecks, or strandings, or loss of life, the fact remains that the kind of an opening of navigation we have had this spring is a good deal of a disaster. The boats, instead of getting under way slowly and orderly, were held up at St. Mary's river until there was a big congestion of traffic. This has resulted in veritable blockades at the principal ports. Duluth is the greatest sufferer. Its harbor contains a navy, with scores of coal laden steamers waiting their turns at

the docks, while the costs mount up and while valuable days are consumed—for time is money in the shipping business more than anywhere else. There will be a big loss attendant on these early season delays. The conditions surrounding the opening make it as disastrous as if a number of fine carriers had been stranded or sunk.

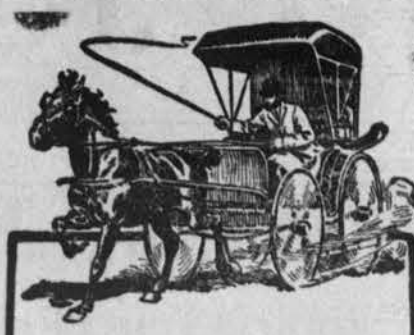

At the behest of the state board of instruction, a lower peninsula representative has introduced a bill aimed at contract jumping school teachers that has met with a chorus of approval from school trustees the state over. Teachers have, as a rule, shown little regard for the presumed sanctity of a contract. They observe its articles as long as it suits their convenience to do so, but let a new position be dangled before their eyes, at a slightly better salary, and, presto, they flit, leaving their former employers to find their way out of their dilemma as best they may. Some boards have freed themselves from this nuisance by holding back a small proportion of the teachers' salaries, with the proviso that the amount retained shall be forfeited in case of violation of contract, but this course has not been generally followed, perhaps because it increases the difficulty of getting teachers when, at the best, they are already difficult to get. The proposed bill would be a measure of real relief to the majority of school boards, and is along the lines of good public policy. Among other things, it would prevent further degeneracy in the ideas of contract jumping teachers, in whom there must be a strange moral twist, or they would regard their obligations more carefully.

"The Clansmen" has been one of the main subjects of discussion at Detroit this week. The advance agent worked his usual game to create a public interest that the play could not claim on its dramatic merits. The negro people of Detroit were led to protest to Mayor Thompson against its production. The mayor appointed a committee of three prominent Detroiters to report on the point of presentation. The burden of their opinions was that "The Clansman" was a wretchedly poor drama, indifferently acted, and that it was entirely out of place in a first class theater, but beyond these considerations no particular reason was found for recommending its suppression. Of the wretched thing one critic said: "I am at a loss to understand how among the intelligent of both races it can excite any feeling but one of disgust. Too much has been made of the play. It is trash, not entitled to serious criticism. It is not worthy of the time or serious thought of intelligent men or women, white or black." Bishop Williams wrote, "It looks to me as if the popular agitation which has been raised about it has been deliberately incited as a clever advertising dodge. If our colored citizens could have possessed their souls in patience and ignored the whole thing the play would soon have passed into innocuous desuetude." That would have been the best fate for it. It hardly seems worth suppressing. The play is being allowed to finish out its week's engagement, a vital exhibit of how the Lord's clergymen occasionally go about the devil's work unashamed.

When the people voted on the bonds asked by the water board they did so generally understanding that a vote for the bonds was tantamount to a vote for the extension of the intake, as it was generally understood that the board had decided that intake extension was the most feasible way of solving the city's water problem. Apparently, however, the board has decided nothing of the sort, as it failed to adopt the recommendations of a special committee which reported finding intake extension practicable and promising sure relief from the trouble with the water supply. Indeed the board members appeared to have widely different ideas on the subject. In the light of this fact the likelihood that any remedial measures will be undertaken this year seems to be remote. If the intake is to be extended immediate action is demanded, as the open season is, at best, not a long one. One alternative plan—that of severing the tar products into the lower harbor—is also, if practicable at all, a relief for the remote future, as North Marquette has not yet been provided with a sewerage system. It will be generally hoped that the board will grapple with its problem and stay by it until it has decided on some plan of action. Any disposition of the members to go to sleep on their jobs will probably provoke another outburst of criticism similar to the one that aroused their ire some months ago.

HAS WELL DEFINED IDEAS. The Chicago Tribune, one of the most influential Republican newspapers in the west, has been setting forth some vigorous opinions in connection with the early discussion of the presidential campaign of 1908. It has taken a flat stand against the third term idea. It assumes that the president meant just what he said when, the night of election in 1904, he announced that he would not be a candidate for the great office again. The Tribune believes that the unwritten law against third terms is good law, and that there is now no excuse or reason for contemplating any violation of it.

Going a step further the Tribune, which it may be remarked, has usually stood squarely behind the president and his policies, takes the position that the presidential race is an open affair and

When You Need The Doctor In A Hurry

and he cannot get to you quickly, that is when Jayne's Expectorant proves of invaluable assistance. Pneumonia often comes with a sudden chill or a sudden congestion of the lungs—frequently at night. It is then that DR. D. JAYNE'S EXPECTORANT may prove effective in saving life by preventing an attack of pneumonia. For 77 years this well-known remedy has proved successful in relieving and curing Coughs, Colds, Bronchitis, Pleurisy, Croup, Whooping Cough, Inflammation of the Lungs and diseases of like nature.

Get it TODAY, and keep it on hand for an emergency. Three size bottles, \$1.00, 50c., and 25c. Jayne's Tonic Vermifuge is a splendid tonic for adults, as well as a safe Worm Cure for children.

and will doubtless be very popular again with guests from Chicago and from the middle states. The Inn is situated on a pretty island, whose improved grounds and beautiful shade trees make it one of the prettiest spots of Northern Wisconsin. The car shops at Peshigo are especially busy this spring. All the boats have been thoroughly overhauled and renovated and the road is now in better condition than at any previous time in its history.

Search for Oil in the U. P.—

Within the next three months the eastern end of the upper peninsula will learn whether oil lies under that part of the country. It is planned to sink several wells in different localities in quest of oil. Two companies are already in the field and several other organizations are talked of. Work at the Pickford well, which was sunk to a depth of about 1,300 feet last fall, will be resumed in a few days. This well will go down 3,000 feet into the oil-bearing surface. Water and oil have been running from the well steadily and it is claimed the oil has been so thick at times that it was possible to set it on fire. Several oil men from Ohio and Pennsylvania have been through the area and all profess to see "millions in it." The Upper Peninsula Gas & Oil company, which is made up mostly of upper peninsula capitalists, has secured a large tract of land on Drummond island and other localities in the southern part of Chippewa county and drilling operations are expected to commence within a few weeks. All the land in question is in direct line with the Manitowish fields and the rock formation is the same. The state geological map recently issued gives this territory as an oil-bearing formation.

See Postoffice's Growth—

The free delivery system at the Soo is nine years old this week. When established in 1898, Postmaster Webster had four assistants. Now there are eighteen persons employed in the office in addition to the postmaster. As a result of the receipts can be safely taken as a basis from which to estimate the volume of business done in a town or city, and for the amount of work done in any designated post-office. But the postoffice at Sault Ste. Marie is probably the greatest exception to that rule in the country for the following reasons: First, there are several departments of the government there, to-wit: Fort Brady, a four company post, the United States engineers in charge of the lake survey, river improvements and ship canal locks, lock offices; signal service and weather bureau; hydrographic office; immigration and customs offices. All these departments transact a large volume of business through the postoffice from which no revenue is received or credit given, as it is all franked or free. Second, the different railroad lines, steamboat lines, and other outside corporations that maintain offices, and do a large volume of business through the postoffice there all pay their stamps and have their receipts stamped at the home office is located, and send them to the Soo to be used. Their mail all passes through the Soo office, but it does not receive any revenue from the business, or credit for the amount of work done. As a result of these conditions the Soo does not show as large a revenue as one or two other towns in the peninsula, although the volume of business from the office is declared to be considerably larger than that of any other city in northern Michigan.

Ex-Senator in Hot Water—

While attempting to serve a warrant upon Willis N. Mills, former state senator, ex-district attorney and a well-known Menominee lawyer, Deputy Sheriff Julius Rupprecht alleges, says the Menominee Herald-Leader, that he was assaulted and struck several times about the head by the ex-lawyer, who incidentally refused to admit service of the suit papers, which would cause him to furnish a \$2,000 bond for his appearance in court when a damage case brought by a former domestic would be called. The alleged assault was committed at the residence and went to his home, informing Prosecuting Attorney Doyle of what had happened by telephone. It is said that Mr. Mills then placed his family in a hack and that they were driven to the Northwestern depot, where it is believed they took a train to Detroit. The popular impression is that Mr. Mills went to Marinette immediately, and took the same train.

Miss Jennie Nelson, who was formerly employed by Mills as a domestic, had been contemplating a damage suit and finally retained attorneys Doyle & Tracy to formally begin proceedings against Mills for \$5,000 damages. It being known that Mills contemplated leaving the city, the papers were issued and a capias, asking for the lowest possible bond obtainable in a northern Michigan town, was issued. The papers were placed in the hands of Deputy Rupprecht. The officer went to John Adams' saloon, where Mills had been during the afternoon, but found that he had left. Shortly 6 o'clock the officer, armed with the capias, went to the Underwood home. According to the deputy, he approached the attorney, called him in the hall and informed him of his mission, when, he alleges, Mills suddenly struck him several blows over the eyes, uttering an oath concerning a political matter while doing so. The officer withdrew and notified the prosecutor.

Ashes Utilized for Fuel—

The discovery perfected after years of experimenting by John Elmore, an Altoona (Pa.) cobbler, by which it is possible to utilize coal ashes for fuel, is being followed with great success by several Menominee citizens and it is probable that in a short time many people there will be cutting their coal bills in half by taking advantage of the discovery. During the past few weeks, John Wistrand has used a solution of a pound of salt, one part coal, three parts ashes, two ounces of oxalic acid and one ounce of water in a furnace, and has found that the mixture not only gives as much heat as four times the same amount of coal, but finds that instead of having six buckets of ashes as a residue each day, there is less than a full bucket full of waste from the newly discovered hot compound. Attorney Joseph Cuddy, who lives in Mr. Wistrand's flats on Grand avenue, has carefully watched the results of Mr. Wistrand's experimenting. In an interview he gives his views regarding the discovery, and he claims that the use of the newly prepared solution is bound to result in "For more than a week, I have

"Bring Me A Good Cigar"

Recently a State Senator on a dining car asked the waiter to bring him "a cigar." The waiter brought two boxes—one was a Triangle A cigar, and the other an unknown brand.

"Which is the better?" asked the Senator. The waiter recommended the unknown brand. "Why?" the Senator demanded. The waiter grinned. "Boss says that's the one to push," he said.

You don't want to depend on what "the boss" wants to push—you'd rather choose for yourself.

How do you know a good cigar?

You can now buy cigars with the maker's guarantee on every box—a mark of merit that distinguishes scientific methods systematically applied to cigar production—a mark that stands for improved quality—better, riper tobacco, thoroughly matured and actually blended—smooth, even-smoking cigars, absolutely clean—without increased cost.

Whatever you pay, whatever your taste, the "A" (Triangle A) mark is your guarantee of superior and reliable quality and unquestionable value.

The New CREMO 5 cents

affords you a fine opportunity to prove it by the smoking test.

Every box is extra-wrapped in glassine paper, sealed to maintain perfect smoking condition and cleanliness until the box is opened.

AMERICAN CIGAR COMPANY Manufacturer

watched the course of Mr. Wistrand's experiment, and we have found that it works like a charm," said Mr. Cuddy. "Mr. Wistrand has a furnace in which he burned last winter some \$40 worth of coal and he is entirely satisfied that if he had installed this new discovery during the winter he would have saved 50 per cent of his coal bill. A mixture of three parts of ashes and one part of coal is sprinkled with a quantity of this preparation and shoveled into the furnace. It burns with a heat apparently greater and with a steadier flame than pure coal would burn and leaves a very small residue of ashes, probably only the ashes that comes from the one-third of the coal. The balance of the ashes is consumed. No effort has been made thus far to determine what chemical action takes place in the new compound. The only information gained, is that ashes will burn. If it is true that the first burning of coal consumes only 20 per cent of the carbon contained, it will be apparent at once to any one that it is a paying proposition to use the ashes over again. Whether this experiment will work in a coal stove has not been determined as yet. We have made no tests in that direction, but it is difficult to see why it would not work."

Manager Elmer, of the Cobalt Central Mines company says: "The ore in both the shaft and the drift is showing great improvement. Before I left an assay was taken of the six-inch seam at a depth of 130 feet in the Big Pete shaft. The result of three assays run 4,500 ounces, 4,800 ounces and 4,900 ounces. Besides this, there is a foot of diabase carrying sheet silver. The balance of the four feet is highly impregnated with sheet silver running 400 and 500 ounces to the ton."

Some choice samples of silver ore are being shown from the St. Denis mine, in Lorraine township. The St. Denis was bought by a Philadelphia syndicate for \$250,000 and now forms part of the holdings of the Philadelphia Cobalt Mining company. This company also owns the Gamey claim in Bucke township, one other in Lorraine, two in Coleman and twenty at Larder Lake. The capital of the company is \$2,000,000. A shipment from the St. Denis mine is looked for in a few weeks.

On one occasion when he was busy President Lincoln received a delegation of men who were endeavoring to hurry the passing of some petty bill. When they entered Lincoln looked up gravely and said: "If you call the tail of a sheep a leg, how many legs will the sheep have?" "Five," said the spokesman. "No," said Lincoln, "it would only have four. Calling the tail a leg wouldn't make it one."

The delegation departed in discomfiture.—Exchange.

Cobalt Gossip

Three veins have been located on the property of the Big Ben Cobalt Mining company. The finds were made on the northeast corner of the claim adjoining the Greene-Meehan. The veins comprise nicotite and calcite. A force of twenty men is now at work on the property.

It is understood that one of the large Cobalt companies is attempting to make arrangements with one of the concentrator companies lately organized to handle all the low-grade ore mined on

DARANTELLA

A Lincoln Anecdote. On one occasion when he was busy President Lincoln received a delegation of men who were endeavoring to hurry the passing of some petty bill. When they entered Lincoln looked up gravely and said: "If you call the tail of a sheep a leg, how many legs will the sheep have?" "Five," said the spokesman. "No," said Lincoln, "it would only have four. Calling the tail a leg wouldn't make it one."

S.S.S. KILLS THE GERMS OF SCROFULA

Through the blood, diseases are carried from one generation to another. Parents transmit them to their children, and so it goes on down the family line for years and years unless the taint is removed from the blood. Especially is this true of Scrofula, for it is a disease that is "bred in the bone," and unless the blood is purified and every trace of the trouble removed the miserable disease will finally undermine the entire health and wreck the life of its victim. The usual symptoms of Scrofula are enlarged glands or tumors about the neck, which often burst and become discharging ulcers, weak eyes, Catarrh of the head and throat, skin diseases, etc. The trouble being so firmly entrenched in the blood often attacks the bones, resulting in White Swelling, or hip disease, while a waxy, pallid appearance of the skin, loss of strength and energy, and often lung affections, show that the disease is entirely destroying the bright red corpuscles and rich, nutritive qualities of the blood. Scrofula being a constitutional disease, one affecting the entire circulation, must be treated with a remedy that builds up and strengthens every part of the system, which has so long been denied the strength and nourishment it should have received from the blood. S. S. S. is the best of all blood purifiers and the greatest of all tonics, and is therefore the ideal remedy for Scrofula. S. S. S. searches out and destroys all germs, taints and poisons, gives strength, richness and vigor to the blood and cures Scrofula permanently. It so thoroughly removes the trouble from the blood that no signs of it are ever seen again, and posterity is started out in life with a clean, pure blood supply, which is their rightful inheritance. S. S. S. while thorough, is gentle in its action, and the healing vegetable ingredients which compose it build up every part of the system. Book on the blood and medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

AWFUL PSORIASIS 35 YEARS

Terrible Scaly Humor in Patches All Over the Body—Skin Cracked and Bleeding—Itching Unbearable—Cured by Cuticura in Thirty Days at Cost of \$4.75.

ANOTHER WONDERFUL CURE BY CUTICURA

"I was afflicted with psoriasis for thirty-five years. It was in patches all over my body. I used three cakes of Soap, six boxes of Cuticura Ointment, and two bottles of Cuticura Resolvent. I bathed with the Soap, applied the Ointment once a day, and took the Resolvent as directed. In thirty days I was completely cured, and I think permanently, as it was about five years ago."

"The psoriasis first made its appearance in red spots, generally forming a circle, leaving in the center a spot about the size of a silver dollar of sound flesh. In a short time the affected circle would form a heavy dry scale of white flaky appearance and would gradually drop off. To remove the entire scales by bathing or using oil to soften them the flesh would be perfectly raw, and a light discharge of bloody substance would ooze out. That scale crust would form again in twenty-four hours. It was worse on my arms and limbs, although it was in spots all over my body, also on my scalp. If I let the scales remain too long without removing by bath or otherwise, the skin would crack and bleed. I suffered intense itching, worse at nights after getting warm in bed, or blood warm by exercise, when it would be almost insupportable. To sum it all up, I would not go through such another ordeal of affliction for thirty-five years for the State of Kansas. (signed) W. M. Chidester, Hutchinson, Kan., April 20, 1905."

Copper Country

BOOMING THE REUNION. MYSTERIOUS NEW CONCERN.

Hancock and Houghton Pythians Will Meet Jointly Tonight.

The Hancock and Houghton lodges of the Knights of Pythias will meet jointly tonight for the purpose of discussing ways and means to raise funds for the entertainment of the visitors to the forthcoming reunion of the Upper Peninsula Pythian league and the grand lodge of Michigan, which will be held at Hancock early next month. The conference will discuss the advisability of giving a benefit concert at the Kerregge theater. It has been suggested that for this the Calumet & Hecla band be secured and that it be assisted by a number of the more prominent singers and musicians of the copper country.

The Hancock has already carried to a successful conclusion two enterprises looking toward the end of augmenting the expense fund, but that fund must necessarily be a large one and the public must be appealed to often. Discussing the matter along this line yesterday, Chancellor Commander Ingram of the Houghton lodge said: "The reunion is not a Hancock matter especially. These delegates from all over the state are coming to visit the copper country. None of them know the copper country except as a district, and they create no distinctions between the towns. We should entertain them in the same way. All copper country lodges should consider the delegates as their visitors and give them a pull together. The reunion will undoubtedly be a success, and the degree of that success will be greater or less according as the lodges and the copper country public contribute to it."

ODD FELLOWS' REUNION.

But before the Pythian reunion comes the Odd Fellows' big gathering will take place in Calumet next week. It opens Monday. There is little that can be done in connection with it except that all preparations are going forward and will be complete when the visitors arrive. The committees lack now is weather. There is still considerable snow and ice in Calumet streets, which several parades are considered. However, the Red Jacket street council yesterday ordered Street Commissioner Ethier to clean off the block of Seventh street between Elm and Oak for the purpose of having a clear stretch of pavement for the prize drills. The drills will take place next Tuesday, which gives the commissioner ample time to get the street into the desired condition. The announcement of the big parade of Odd Fellows, also set for next Tuesday, was made yesterday afternoon. The following is the order of march: Henry Fliege, marshal. Fred Breslin, James Mellary, aides. Commander, Patriarch Militant, and staff.

ITS LARGEST CLASS.

The commencement exercises of the Michigan College of Mines class of 1907 will be held tonight in the hall of the college gymnasium building. The class will number forty and is the largest in the history of the institution. The officers are: President—J. M. Drake Jr., Chicago. Secretary and Treasurer—C. B. Kelly, Grand Rapids. Executive Committee—Mr. Drake, Mr. Kelly, Wilbur Van Evert of Marquette and A. L. Gerry of Danbury, Conn.

JUVENILE INCORRIGIBLES.

Two Chassell Boys Under Arrest for Row in the Postoffice. Under Sheriff Vivian of Houghton went Chassell yesterday and arrested two boys who are charged by Postmaster Summer with creating a disturbance in the postoffice. One of them hit the postmaster last week while he was trying to hear before Justice Brand and County Agent Mason in Houghton yesterday afternoon.

TROUBLES OF THE SHERIFF.

Houghton County Official Finds Extradition Difficult. Sheriff Beck had not returned to Houghton with Alex. Colombe yesterday. He went up to Duluth for the man on Tuesday, having a warrant for his arrest on a charge of desertion, and was armed with extradition papers from Governor Warner. Colombe started to flight, and his attorneys compelled Sheriff Beck to go to St. Paul to interview Governor Johnson. It was alleged that the papers with which Sheriff Beck had been provided were insufficient to secure the aid of a freck professor such as the Chicago university possesses, is the Michigan College of Mines at Houghton. Its roster contain students of mineology from all parts of the United States and all the diploma from this institution is a guarantee of the fitness of the possessor in the line of work for which he has prepared himself. A young man who has taken the course not only receives a theoretical, but is also given a most complete practical training in the mine. This is thoroughly understood by mining men that graduates do not have to be aided in their efforts to secure employment, as is the case with many schools of technology. On the contrary, they are sought after by capitalists in every part of the world who desire to bring down from the ground, northern Michigan is justified in feeling proud of the Michigan College of Mines and the members of the class which graduates next Friday will undoubtedly become important factors in increasing the mineral production of the world.

TALKING ABOUT THE WEATHER.

Record of the Meanest Month—To Say Nothing About Yesterday. Observer Weisner of the Houghton meteorological yesterday gave out his monthly report of the weather for April, which will go down in history as the meanest month on record. This is hard on April because yesterday the weather was for May 2. There was a lazy snowstorm all day. Copper country people generally are disheartened though some are still holding out hope that there will be at least a short summer. To return to April: The highest temperature was 52 and the lowest one below zero. In one day the temperature varied 39 degrees. The heaviest snowfall was 29 inches. The temperature for the month was 29 degrees, which was the coldest average for April of any year of the seven on record. The total snowfall was 388 inches (nearly) the greatest ever recorded at the office in April. The wind was fair, never having traveled faster than thirty-five miles an hour during the month. The days were evenly divided—ten clear, ten partly cloudy and ten cloudy. There were no phenomena. The weather was just consistently mean.

FIRST LAKE SHIPMENTS.

Steamers Will Take Out 1,500 Tons of Copper This Week. The steamer North Wind of the Mutual Line, sailing this week, pulled out of Houghton with 250 tons of copper for the eastern market, the first lake shipment of the red metal this year. Other steamers are taking on copper at Portage Lake ports this week, and while it is impossible to secure an accurate statement it is estimated that the cargoes will amount to 1,500 tons. With copper selling at twenty-five cents a pound the value of this shipment would be \$750,000. The exports of the district are represented almost entirely by copper, such lumber as is shipped out being of little consequence. Thousands of tons of coal and merchandise and machinery and manufactured products are brought into Portage lake annually to distribute to the various copper country points, engaging the services of a large fleet of steamers. Balancing this is the small tonnage of copper, which could be handled easily by one or two large steamers.

ICE BLOCKADE CONTINUES.

Big Portage Still Impassable for Boats—Marine Notes. The ice in Big Portage, as reported by United States Watchman Van Laner at Portage Entry, continued firm yesterday, with no prospect of a change. The fleet of boats is still icebound, and Mr. Van Laner expresses the belief that the condition will continue for several days yet. There is however considerable marine activity in Portage lake, the steamers finding it convenient to round Keweenaw point to enter the lake rather than to await the opening through Big Portage. The steamer Easton of the Booth line arrived Wednesday night, opening navigation to the westward. The work on the government tug Circle, rebuilding at Croze's yard, has been delayed by the non-arrival of material. A shipment of oak plank arrived Wednesday, and now the repairs will be pushed. The work will be completed within a week it is hoped.

TWO SPECIAL ELECTIONS.

Houghton and South Range Councils Ask Bonding Permission. Special elections will be held Monday at both Houghton and South Range. In the first case the election is on the question of bonding the village in the sum of \$50,000 for the purpose of constructing a sewer system in West Houghton. In South Range the question is that of bonding for \$25,000 for the purpose of constructing a waterworks and sewer system.

PRaise FOR THE M. C. M.

Editorially, the Escanaba Mirror says: An educational institution which is one of the most prominent of its kind in the world and which turns out many men expert in their profession, without the aid of freck professors such as the Chicago university possesses, is the Michigan College of Mines at Houghton. Its roster contain students of mineology from all parts of the United States and all the diploma from this institution is a guarantee of the fitness of the possessor in the line of work for which he has prepared himself. A young man who has taken the course not only receives a theoretical, but is also given a most complete practical training in the mine. This is thoroughly understood by mining men that graduates do not have to be aided in their efforts to secure employment, as is the case with many schools of technology. On the contrary, they are sought after by capitalists in every part of the world who desire to bring down from the ground, northern Michigan is justified in feeling proud of the Michigan College of Mines and the members of the class which graduates next Friday will undoubtedly become important factors in increasing the mineral production of the world.

GOOD IDEA TO VACCINATE.

The county physician of Houghton advises The Mining Journal that there are a number of cases of small pox scattered about in Houghton, Keweenaw and Baraga counties. He therefore suggests that it would be a good idea for any who had not been successfully vaccinated in the last seven years to become so now. The helpful vaccination and advances the suggestion as a measure of personal and public safety.

COMMENCEMENT ORATOR.

Albert E. Peterson, of Calumet, prosecuting attorney of Keweenaw county, has accepted an invitation to deliver the commencement address at the Lake Linden High school. The exercises will take place in the opera house June 29. Twenty-two graduates will receive diplomas.

COPPEROM BREVITIES.

Daniel McIntyre of Lake Linden has taken a position as bookkeeper in the Calumet State bank, succeeding William Davidson, resigned.

Mr. and Mrs. John T. McNamara of Houghton have returned from an extended trip which included a visit to Mr. McNamara's old home in Canada.

Dr. L. O. Houghton of Trimountain, announces that he has decided to locate in Ironwood and will leave shortly for that place to take up his permanent residence.

The roller skating season in the Palstra, Laurium, will open tomorrow night. The season in the Amphidrome will not start for several days, as the work of replacing the floor has not yet been undertaken.

News of the death of Mrs. Willard, mother of Mrs. Allan F. Rees of Houghton, has been received. The death occurred at South Wood, Wis., and the funeral was held at Boston, Mrs. Rees was at her mother's side when she died.

W. H. Johnston of Ishpeming, upper peninsula member of the Michigan commission to the Jamestown exposition, returned home Wednesday evening. Messrs. Sargent and Lyle of the commission, remained in Houghton and will be here for several days completing a mineralogical collection.

William Gillilan, master mechanic of the Quincy mine for the past four years, has tendered his resignation. His plans for the future have not been made known. Mr. Gillilan is one of the most popular mining men at Portage Lake, and if his plans include a departure from the district it will be regretted by many persons.

Howard B. Durkee, for the past year secretary of the Portage Lake Y. M.

But as all the shipments received in the copper country were to be used indirectly in the production of copper, whether they include machinery or fuel for the miners, the shipments of copper out of the country must more than balance the receipts of other freights if the copper country as a whole is to show dividends to the producers of copper. Thus the tonnage received in the copper country is enormous in comparison with the tonnage going out, and it is necessary to talk values to arrive at the balance. It is possible that in the early weeks of the season the receipts would exceed in value the shipments of copper, but throughout the season copper, small in bulk, but high in value, has the advantage.

ICE BLOCKADE CONTINUES.

Big Portage Still Impassable for Boats—Marine Notes. The ice in Big Portage, as reported by United States Watchman Van Laner at Portage Entry, continued firm yesterday, with no prospect of a change. The fleet of boats is still icebound, and Mr. Van Laner expresses the belief that the condition will continue for several days yet. There is however considerable marine activity in Portage lake, the steamers finding it convenient to round Keweenaw point to enter the lake rather than to await the opening through Big Portage. The steamer Easton of the Booth line arrived Wednesday night, opening navigation to the westward. The work on the government tug Circle, rebuilding at Croze's yard, has been delayed by the non-arrival of material. A shipment of oak plank arrived Wednesday, and now the repairs will be pushed. The work will be completed within a week it is hoped.

RELIEF FROM RHEUMATISM PAINS.

"I suffered with rheumatism for over two years," says Mr. Roland Curry, a patrolman, of Key West, Fla. "Some-times it settled in my knees and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain, and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by The Stafford Drug Co.

Mining News

DAILY JUDGE. Net Earnings of Over \$500,000 Reported for the Year. President John J. Daly of the Daly-Judge Mining company says in his annual report for 1906: At the beginning of the year the company had an indebtedness of \$220,976.08 represented in \$20,000 worth of out-standing bonds and an overdraft at the bank of \$21,976.08. Through it was well along in the year before the mill was brought up to the regular working capacity it will be seen from the financial exhibit that the year closed with an indebtedness of \$21,976.08. The net earnings of the year were \$500,015.05, or 61.2 per cent of the gross earnings. During the year 63,322 tons of ore were mined. The amount of grade ore treated in the mill was 58,345 tons, which was reduced to 9,338 tons of lead concentrates and 8,320 tons of iron and zinc middlings, showing one ton of concentrates produced from each 3.2 tons of grade ore. The average amount of ore treated per day has been 165 tons, the results obtained in the way of recovery and value of product, being very satisfactory. During the year approximately 2,000 feet of development work has been done. This is exclusive of the prospecting work done in the ore bodies. The drifting was done mostly on the 1,500-foot level, and two raises were put up from that level to connect with the 1,400. In doing this work some fine ore bodies were encountered, notably one on the 1,500 level where a strong shoot was opened, showing a width of from ten to thirty feet by 250 feet in length. This ore is quite freely free from zinc but high in iron, making it very desirable for the smelters as well as for concentration. A great part of the grade ore shipped during the year came from this shoot, and as there are ore bodies very similar in character.

GOOD WORDS FOR CHAMBERLAIN'S COUGH REMEDY.

People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mr. Edward Phillips of Baraga, Mich., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catherine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. After a most agonizing and contracted a dreadful cold, myself, but I took Chamberlain's Cough Remedy and was soon as well as ever." This remedy is for sale by The Stafford Drug Co.

DARANTELLA

It is the one remedy that never fails. When reduced with water and sweetened it is pleasant to take. For sale by The Stafford Drug Co.

What "Blue Flame" Means

It means the hottest and cleanest flame produced by any stove. This is the flame the New Perfection Oil Cook-Stove gives the instant a lighted match is applied—no delay, no trouble, no soot, no dirt. For cooking, the

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

is unequalled. It gives quick results because its heat is highly concentrated. Cuts fuel-expense in two. Made in three sizes. Every stove warranted. If not at your dealer's write to our nearest agency.

The Rayo Lamp is the best lamp for all-round household use. Made of brass throughout and beautifully nickelled. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's, write to our nearest agency.

Yesterday's temperatures: Seven a. m., 48 degrees; noon, 51; p. m., 50. Maximum, 55 degrees; minimum, 29.

W. Seville, of Ishpeming, is a Marquette visitor.

Dr. R. E. Drake, of Negaunee, spent yesterday in the city.

Ira E. Randall, of Houghton, was a Marquette visitor yesterday.

Mrs. Charles Roberts is absent in the copper country, on a visit.

A Bell telephone has been installed at the blacksmith shop of McGuire & Son.

Miss Belle Greenleaf has returned to her home at Green Bay, after a visit with Marquette friends.

St. Mary's guild will meet with Mrs. M. C. Scully No. 902 West Bluff street this afternoon at 2 o'clock.

The Woman's guild of St. Paul's church will meet in the chapel this afternoon at 2:30 o'clock.

Mrs. J. Siegel and Mrs. F. Bureau have returned from Lake City where they were called by the death of their mother.

The Young Woman's guild of St. Paul's church will meet this afternoon with Mrs. William Maul, 212 East Arch street.

The Ladies' Aid society of the M. E. church will meet with Mrs. Brunner, South Front street, at 2:30 o'clock this afternoon.

The National League of Veterans and Sons enjoyed a "smoker" subsequent to the regular meeting Wednesday evening. A supper and "smoker" will be given Wednesday evening, May 15.

The Woman's Missionary society, Ladies' Aid and Young Woman's society of the Baptist church will meet this afternoon at 2:30 o'clock with Mrs. P. B. Spear and Mrs. Northrup, 461 Ridge street.

Miss Emma Coles will conduct the regular weekly "story hour" at the library building tomorrow morning at 11 o'clock.

Her selections will be fairy tales and woodland myths. All pupils up to the sixth grade are invited to attend.

N. J. Fezzy has resigned his position as clerk at the Brunswick Hotel, and will leave for his home at South Range Monday. Mr. Fezzy leaves the hotel with the best wishes of the management, as he proved himself a competent and courteous employe.

Rev. Robert Coventry, of the Omaha Theological seminary, is the guest of Joseph Coventry at the Hotel Superior, this week. He is on his way to Mackinac county to take the pastorates of the Presbyterian churches at Engadine and Gould City for the summer.

The "Shaking Quakers," who are coming all the way from Quakerstown to appear in the Little Folks' concert at the M. E. church next Tuesday evening, are assured a hearty welcome. The indications point to an attendance that will pack the church.

Many Marriage Licenses Issued—From January 1 to May 1, 101 marriage licenses were issued from the county clerk's office. April was the banner month with thirty-three licenses. This is the best record in some years.

To Throw No More Snuff—The Mining Journal has received a communication signed "the guilty parties" setting forth that the Japanese snuff thrown at Fraternity Hall Saturday night last was thrown not to cause great annoyance, and giving a promise that the occurrence will not be repeated.

Chocolay Experiences a Boom—A number of buildings are in process of construction in the village of Chocolay. Twenty years ago, before the iron furnace closed down, the village was a thriving one and property in the vicinity commanded a good price. When its main industry stopped, however, its population soon decreased and it presented a desolate appearance. With the reopening of the furnace old residents are looking for it to regain all its pristine prosperity.

Ball Game for Sunday—The Marquette Junior will play a picked team at the fair grounds Sunday afternoon. The Juniors have been practicing daily and are already showing excellent form. Scholtes, last season's star, will be in the box for the Juniors, and LeFevre will catch. A pitcher from Ishpeming will probably throw for the "Job Lots." There are a number of good players about the city who are anxious to get into Sunday's game, so the line-ups of both sides should be reasonably strong.

Bowling Season Closes—The bowling season at the Association alleys ended Wednesday and the alleys will remain closed until October 1. Manager H. O. Bell says the season was a most successful one, far surpassing in the matter of receipts last year. The alleys were first opened several years ago and the first season's play was much larger than in any succeeding year. The game languished for a time, but was taken up with renewed interest last year. Marquette has a number of excellent players, and are getting together a team capable of making it interesting for any city in the state.

Could Not Effect Landing—The Mining Journal erred in yesterday's issue in announcing that the crew had taken possession of the Standard Rock light station. The crew went out in the Ethel J. Winne-may, but was unable, after repeated efforts, to make a landing, owing to the immense amount of ice still surrounding the pier. The top of this pier is twenty-five feet above the surface of the lake and the ice has piled about it, forming an impenetrable barrier. Men in the crew who have been at the station several seasons say that the ice barrier is larger than they ever before saw it and it is doubtful if a landing can be effected within ten days. The ice might be cleared away through the use of dynamite, but such an attempt might result in serious damage to the pier.

Takes Photographs at Night—G. A. Werner, No. 115 Main street, is taking photographs both day and night. Through the medium of what is known as the "Aristo lamp" as good results are obtained as under bright sunlight. Shading is one of the great arts of photography and cloudy weather has until recently been one of the worst handicaps with which photographers have had to contend. The Aristo lamp has deprived bad weather of any terrors to the photographer. In galleries equipped with this apparatus, photographs can be taken at any time

and under any conditions. In speaking of it yesterday Mr. Werner said: "This lamp is undoubtedly the best invention ever put on the market for the photographer. It gives clearer prints on dark days than daylight. It is really the only light for platinum printing. It makes the photographer absolutely independent of sunshine or dark. It also has an excuse for not getting work out on time."

CONCERNING NATURALIZATION.

Judge Stone Advises a Certain Instruction of Applicants.

To the Daily Mining Journal:—Permit me a few words in the interest of applicants for naturalization. The United States government is paying special attention to the subject of naturalization. The United States attorney, or his assistant, will attend the May term of our circuit court for the purpose of examining each applicant, under oath, to ascertain the intelligence of the applicant, and his general fitness and qualification to become a citizen.

The examination is quite general, and yet the answers in many cases in other counties have shown such a dense ignorance that admission has been refused by the court. In the application, already made, the applicant has sworn that he was not an anarchist, and yet some are unable to state what an anarchist is. He has sworn that he was not a polygamist, nor in favor of the practice of polygamy. Yet many are unable to state what they mean by this statement. He has sworn that he is attached to the principles of the constitution of the United States. Yet many have to admit that they have never read the constitution, nor heard it read, and they have no idea of the form of our government, whether a monarchy or a republic. The time has come when applicants must inform themselves along these lines if they expect admission.

A little intelligent instruction from some of their own nationality upon the matters indicated would enable most of the applicants to answer all questions that will be asked them by the district attorney. One applicant at Iron Mountain could give no idea as to who elected the president and members of congress, but when asked who elected the governor of Michigan answered "the Republicans." He had no idea what was meant by personal or religious liberty, but his sole reason for coming to this country was, as stated by him, because it was a better place to get a living. These suggestions are made for the benefit of applicants for naturalization, and it is hoped that they will be benefited by them.

J. W. STONE.

TWELVE MILLIONS EXPENDED.

American Capital Interest in Big Railroad Enterprise in Guatemala.

New York, May 2.—Within fifteen or twenty weeks New York City will have been brought within five days of Guatemala City through the completion of a railroad that has been pushed across the summits of the Cordilleras from Porto Barrios, a seaport of Guatemala on the Atlantic ocean. The successful execution of the project has been brought about by private capital. The funds were furnished by a syndicate, the leading members of which are Sir William Van Horne, who built railroads in Cuba, General Thomas H. Hubbard, president of the Pacific Improvement company, and Minor C. Keith of the United Fruit company.

The road is held by a New Jersey corporation known as the Guatemala railway. About \$12,000,000 has been spent on the construction of the line. The work on the railway from Porto Barrios was begun about fifteen years ago, under President Barrios. About 135 miles of the line had been built and the heavy mountain work had been reached. Further attempts to complete it were abandoned, following the death of Barrios. In consideration of the completion of the line to Guatemala City, the Guatemala government has turned over to the railroad company the 135 miles of road already constructed.

Sir William Van Horne said today: "The railway now being built extends from Porto Barrios to Guatemala City, a distance of 194 miles. This line is now very nearly completed, something less than thirty miles of rails remaining to be laid, and some steel bridges to be erected. The line is expected to be in operation within fifteen or twenty weeks. This line will bring Guatemala City within two and a half days of New Orleans and five days of New York.

The United Fruit company is building three line and fast steamships, for passengers and fruit, to ply between Porto Barrios and New Orleans in connection with this railway, and the Hamburg-American company intends to establish a line between Porto Barrios and New York and Europe. Guatemala's chief product as yet is coffee, but very extensive plantings of bananas are now being made by the United Fruit company and by individuals, and it is expected that within a year or two the importance of the banana trade, will overshadow the coffee trade."

You're to be the judge; we leave it to you to decide; all we want is your verdict—Will Hollister's Rocky Mountain Tea make you well and keep you well? That's fair. Tea or Tablets, 35 cents. The Stafford Drug Co.

MARKETS

NEW YORK STOCKS.

New York, May 2.—The stock market today again showed itself responsive to the course of Union Pacific and not much to any other development. The tone was heavy during the early part of the session, in continuation of the depression under which the dealings ended yesterday. Union Pacific shared to some extent in the decline. The better tone which ensued when the Harriman stocks turned upward was not wide spread and was not decided outside of the immediate group.

The strength of Union Pacific was as much without explanation in any special development as it has been from the first, and the movement continued in consequence the subject of a great variety of rumors for which no authoritative confirmation could be had. The lack of authentic information to account for the Union Pacific movement makes it somewhat unconvincing as a reflection of general market conditions. The sympathetic influence of the action of the Harriman stocks was most distinct in other transportation stocks and others that have been joined in previous movements in the group. The copper industries showed some independent strength due to the strength of the metal.

The unfavorable effect of the proposed issue of \$25,000,000 of Atchison convertible bonds seemed to be modified to some extent today. Some benefit accrued to the late stock market from the failure of the wheat market to hold its extreme rise. The fact that money conditions have remained tranquil all through, in spite of the extra requirements, has helped to confirm the growing confidence in the real and substantial nature of the relaxation in the world's money markets.

Union Pacific was pushed to above 150, but the even figure was evidently the objective point of the day's movement, and the stock closed there, holding the general market firm.

Tamarack Board Re-elected.

Boston, May 2.—At the annual meeting of the Tamarack Mining company, held today, the old board of directors was re-elected.

W. A. Paine says on the general copper situation: "I do not anticipate any early change in copper prices one way or the other. The United Metals Selling company is quoting the market for electrolytic at 25 1/2 and lake at 25 1/2. The company has sold no lake above this price. Buyers will probably appear in the market this month to cover their requirements for August and September. Consumption of copper is keeping pace with production at the present time.

"The continued demand for copper and the better outlook for general business created a bullish feeling all through the list. Quincy was again the favorite in the early dealings and the scattered demand was sufficient to take care of all liquidation and closed the stock four

PROPOSE TO CONNECT VATICAN WITH THE SEA.

Wealthy Catholics May Buy Strip of Land 6 1/2 Miles Long.

New York, May 2.—If Pope Pius can visit the sea coast, the sea coast will be brought to Pope Pius. This is the interesting project revealed by Richard C. Kerens, the St. Louis churchman, capitalist and politician, who has just returned from a trip to Europe which included a visit to Rome.

The plan outlined by Mr. Kerens, who has also interested several wealthy Catholics in it, is to buy a narrow strip of land six and one-half miles long, from the Vatican to Civita Vecchia (Old City) on the Mediterranean coast, to inclose and beautify this land and present it to the pope as an addition to his present tiny temporal domain.

Visitors to the Vatican have uniformly reported the desire of Pope Pius for exercise and change of air, and to not a few his long stay in Venice having indicated an intense fondness for the sea air. The pope's physicians have also stated that his health has suffered greatly because of his inability to secure the desired change of air.

It is for this purpose that the purchase of the strip of land leading to Civita Vecchia is projected. The initial cost, it is stated, would exceed \$1,000,000.

CHICAGO GRAIN MARKETS.

Chicago, May 2.—Trading in the wheat pit today was on a very broad scale, commission houses, shorts and bulls competing fiercely for grain. The selling was chiefly by holders. The principal cause of the decline was the growing conviction that the wheat crop of 1907 will be greatly lessened because of unfavorable weather conditions. Reports were received today from Nebraska and other portions of the winter wheat belt that frost last night had heavily damaged the growing crop. The predictions of the weather bureau that similar conditions would prevail tonight intensified the bullishness. A sharp advance in prices at the chief grain centers of Europe led additional strength to the market. Late in the day the edge was taken off the market by weakness in the coarse grains, but the sentiment continued bullish to the close. July opened at 84 1/2 to 1/2 highest, 85 1/2; lowest, 84 1/2; closing, 84 1/2.

The strength of wheat caused some firmness in the corn market early in the session, but elevator interests soon caused weakness, which continued the remainder of the day. Clear weather in the corn belt, which will facilitate planting, helped create a bearish sentiment. The close showed the July 1/2 at 50 1/2, July opened at 50 1/2 to 1/2 highest, 50 1/2; lowest, 49 1/2; closing, 49 1/2.

Oats—Reports of damage to the crop by frost caused a good demand at the start. The prices made a substantial gain, but later the advance was checked on profit-taking. The close was weak, the July down 1/2 to 1/2. July opened at 43 1/2 to 44; highest, 44; lowest, 42 1/2; closing, 42 1/2.

Receipts and shipments were as follows: Receipts, Shipments

Wheat, bushels	29,000	47,000
Flour, barrels	39,000	106,000
Corn, bushels	165,000	302,000
Oats, bushels	207,000	309,000

Logan & Bryan's Wheat Summary.

Logan & Bryan wired Paine, Webber & Co. concerning yesterday's wheat market:

"It looks as if the public is in the grain list to stay. There was an enormous volume of trade in wheat today, perhaps the largest for a single day in years, as it was equally distributed on both sides of the market, and there were no sensational changes in the price. The wheat trade started very bullish, encouraged by a large volume of outside buying orders, by a very strong Liverpool market, and by sharp upticks in prices on the part of outside buyers. On the 26th of Wednesday, the market opened for 3/4 @ 1/2 higher. The strong opening was followed by a very large volume of selling orders, chiefly local in the way of profit-taking. When this sort of selling orders was at an end, the market started up a second time and recorded the highest price of the day, with July at 85 1/2 and the September over the 87c mark, a gain of about 1 1/2 over the close of yesterday; and at that top prices the advance was more than 3c in a little over forty-eight hours, and a reaction of 1c, which occurred before the close, was only a temporary check. Great damage has been done to the crop in the Southwest, and late reports indicate that recent freezing has been even more serious in Michigan. The damage from bugs is spreading. Wheat prices were sharply advanced at Kansas City and St. Louis today. King of Toledo wires that complaints are very numerous from the best wheat sections of Ohio, Indiana and Michigan. North Dakota has a fresh blizzard and the spring wheat acreage is sure to be reduced. The foreign crop is badly hit in many cases. We believe wheat a purchase on any setback of this kind."

BAD TREATMENT FOR BURNS.

New York, May 2.—While at work over a tub of boiling lye in Newark John Enjeck, aged 18 years, faintly and fell partly into the huge cauldron. He was lifted out terribly burned and unconscious. His fellow workmen held Enjeck under a stream of cold water, thinking they could wash off the sticky, scalding fluid. But the water only served to harden the lye, so that it literally encased the suffering man in a shell. Then they tried to pick off the lye, but each piece brought the skin with it. At the hospital a chemical solution was used to dissolve the lye. It was said the young man might recover.

BIGGEST ELK IN WORLD MARRIES GEORGIA GIRL.

Waycross, Ga., May 2.—W. T. Brinson, who weighs 585 pounds and is claimed to be the largest member of the order of Elk in the world, was married this evening to Miss Lucia Allen of Sopepton, a daughter of W. G. Allen. The wedding took place at the Methodist parsonage. Brinson is a wealthy turpentine operator and was a widower.

SNAKE'S BITE KILLS WOMAN.

Bianco, Tex., May 2.—Mrs. James McConan died today from the effects of a rattlesnake's bite at her home near Dripping Springs. She was picking berries when bitten. The poison quickly spread to all parts of her body and produced death in a few hours.

FOR STOMACH TROUBLES, BILIOUSNESS AND CONSTIPATION TRY Chamberlain's Stomach and Liver Tablets.

Many remarkable cures have been effected by them. Price, 25 cents. Samples free. For sale by The Stafford Drug Co.

STRIKE OF GUSHER EXCITES.

Land Values Go Skyward in the Indian Territory.

Oklmulgee, I. T., May 2.—This city is still the scene of the wildest excitement ever known in the history of the territory, as a result of the gusher brought in this week. Land values have advanced rapidly and there are many sales. As much as \$400 per acre was offered, following one of \$200 made for a tract of 120 acres. Well No. 1 was drilled to a depth of 1,615 feet and up to the time of being capped in was flowing eighty barrels an hour. The grade of oil is about the same as exists throughout Glenn Pooland the Muskogee field.

One of the strangest acts of prosperity has been the thrusting of wealth on the Snake Indians who have been dealing with the Mexican government for land in that country to which the tribe might move. The land of Chitto Harjo, or "Crazy Snake" is just south of the new well, and developments tend to show that where these people have been endeavoring to sell their land for a song they will now receive offers of hundred of thousands of dollars. Only the failure of the committee for the Snake government to report favorably on the project is responsible for the present enriched condition of these people.

TEXAS OIL GOBBLED UP.

Manufacturers May Be Forced to Close for Lack of Fuel.

Galveston, Tex., May 2.—With another decline aggregating 10,000 barrels in the Texas production of crude oil since the first of this month, the demand for oil for refining purposes has increased, and today the refineries offered five cents a barrel more for oil.

It is admitted by the producers that the Standard controls the market and is taking every barrel it can buy for refining. The prices paid are so high that the producers can not afford to sell the crude product for fuel, and in some instances they have violated their contracts rather than furnish the oil for fuel when they can get 35 per cent more for it from the refineries, delivered direct to the pipe lines, every one of which is controlled by the Standard.

With oil advanced to \$1.17 a barrel in west Texas, many manufacturers are compelled to return to coal for fuel. But the railroads can not furnish the cars, and advises say that 100 plants will be compelled to shut down unless they can secure a supply of coal shortly. Orders for 500,000 tons were placed four weeks ago, but the railroads have not furnished the cars for its transportation from the mines.

DIVORCE FOR FORMER DUKE.

Austrian Who Renounced Title for Love of Swiss-Bathing Wife.

Vienna, May 2.—It is announced that the wife of Leopold Woelfling has agreed to a divorce. The couple met in the judge's chambers, after a separation of six months. The wife, who is a private in the Swiss army, where the former major general scrubbed floors and did other menial work like the rest of the soldiers.

Mrs. Woelfling, however, offended her husband by joining the Asson Anclorites, in accordance with whose tenets she became a vegetarian, went without clothes in taking "sun baths" and acquired other eccentricities, as Woelfling called them in his divorce complaint. He temporarily became tired of it.

HAS DRAFT FOR A CENT.

Illinois Man Will Have to Go to Law to Secure the Money.

Chicago, May 2.—For the last sixteen years the Chicago post office has had a surplus of one cent on its books. No one has been able to find the source of the surplus or to whom the money was paid until recently when W. L. Clucas, a special agent of the North American Life Assurance company, notified the postoffice authorities that he held a draft for one cent on the office. It was issued January 5, 1891, to his father, W. J. Clucas of Lebanon, Ill.

W. J. Clucas was postmaster of Lebanon, Ill., in the administration of Grover Cleveland. At the end of Cleveland's term of office Mr. Clucas sent in his statement. It then appeared that he had sent in one cent too much. It was reported to him that he had a draft for Mr. Clucas, wishing to keep the draft as a remembrance, never cashed it. After his death in 1899 the draft was turned over to his son, who kept it as a relic.

After the settlement of the estate Mr. Clucas found it was one cent too much as his father had not indorsed it in his name. For this reason the post office auditor never will be able to balance his books unless Mr. Clucas takes the matter into court.

REO 1907 TOURING CAR \$1,250

F. O. B. LANSING

18-30 horse-power, 94-wheel-base. Five passengers. Detachable tonneau. Two speeds and reverse. REO disc clutch. 40 miles an hour. Full lamp equipment. Top \$75 extra.

The car that beat 60 cars of double and triple its price, at \$750.

The car that won more than 20 cups, medals and trophies from digger and costlier cars.

The car that holds its class record up Mt. Washington, and that crossed Mt. Hood, and the 12,000 feet Raton Range, in New Mexico.

The car went from Denver to Boulder, Colorado, (30 miles over rough hilly roads) in 15 minutes better than the railroad schedule.

The car that carried four passengers 1,650 miles over rough roads without stoppage, motor-repairs or car repairs.

The car that won the National Economy trophy and four other prizes in the same contest; and that carried its passengers at a total cost of 30 cents each per 100 miles.

The car that was penalized 30 per cent, and practically barred out of the great 2-Gallon Efficiency Contest.

The only car that ever crossed this continent and back again on its own wheels.

The \$1,250 car which does all that the average \$3,000 car does—and more than most of them—

That is the car whose merit and real economy are self-evident. That is the car which you cannot afford to overlook. Write for the book that tells why.

TO CURE A COLD IN ONE DAY.

Take Laxative Bromo Quinine. Ten days, Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

Dr. Sloop's Restorative

THE STAFFORD DRUG CO.

HAD CATARRH THIRTY YEARS.

Congressman Meekison Gives Praise To Pe-ru-na For His Relief From Catarrh.

CONGRESSMAN MEEKISON COMMENDS PE-RU-NA.

"I have used several bottles of Peru-na and I feel greatly benefited thereby from my catarrh of the head. I feel encouraged to believe that if I use it a short time longer I will be fully able to eradicate the disease of thirty years' standing."—David Meekison.

OTHER REMARKABLE CURES.

Mr. Jacob L. Davis, Galena, Stone county, Mo., writes: "I had been in bad health for thirty-seven years, and after taking twelve bottles of your Peru-na I am cured." Mr. A. E. Kidd, well-known architect, 547 Jefferson Ave., Chicago, Ill., writes: "I have had catarrh over half of my life. I tried nearly every catarrh remedy advertised, beside a great many physicians' treatments, all of which failed. I had heard and read of Peru-na and decided to try it. I have taken seven bottles of it and weigh 172 pounds."

A SINCERE RECOMMENDATION.

Mr. D. C. Prosser, R. F. D. No. 2, Shelby, Oceana Co., Mich., writes: "Two years ago I was badly afflicted with catarrh of the stomach. I had had a run of typhoid fever, was very debilitated. I could find nothing I could eat without causing distress and sour stomach. Finally I came to the conclusion that I had catarrh of the stomach and seeing Peru-na advertised, began to take it. It helped me soon and after taking three or four bottles I was entirely cured of stomach trouble and can now eat anything."

REO 1907

REO 1907 TOURING CAR \$1,250

F. O. B. LANSING

18-30 horse-power, 94-wheel-base. Five passengers. Detachable tonneau. Two speeds and reverse. REO disc clutch. 40 miles an hour. Full lamp equipment. Top \$75 extra.

The car that beat 60 cars of double and triple its price, at \$750.

The car that won more than 20 cups, medals and trophies from digger and costlier cars.

The car that holds its class record up Mt. Washington, and that crossed Mt. Hood, and the 12,000 feet Raton Range, in New Mexico.

The car went from Denver to Boulder, Colorado, (30 miles over rough hilly roads) in 15 minutes better than the railroad schedule.

The car that carried four passengers 1,650 miles over rough roads without stoppage, motor-repairs or car repairs.

The car that won the National Economy trophy and four other prizes in the same contest; and that carried its passengers at a total cost of 30 cents each per 100 miles.

The car that was penalized 30 per cent, and practically barred out of the great 2-Gallon Efficiency Contest.

The only car that ever crossed this continent and back again on its own wheels.

The \$1,250 car which does all that the average \$3,000 car does—and more than most of them—

That is the car whose merit and real economy are self-evident. That is the car which you cannot afford to overlook. Write for the book that tells why.

HEART STRENGTH

Heart Strength, or Heart Weakness, means Nervous Strength, or Nervous Weakness—nothing more, no, nothing less. It is a matter of fact, not of theory. It is a matter of fact, not of theory. It is a matter of fact, not of theory. It is a matter of fact, not of theory.

Negaunee Department

MAY LET CONTRACT SOON.

Sketches Prepared for Improvements at Bank Building.

The directors of the First National bank of Negaunee will meet within a few days, or as soon as Alexander Maitland returns to the city, to consider plans for the alteration of the bank block, formerly the Muek building, acquired last fall. Pencil sketches have been prepared and the officers have about made up their minds what changes will be made. The improvements will be of a substantial character and will cost several thousand dollars.

The block is one that can be improved to excellent advantage, and it can be made one of the finest buildings in the upper peninsula. The ground floor space is larger than the bank will probably need, or will use, at the start, but it will be left out so that it can all be used by the bank if necessary.

The architect who has examined the block has told us that it can be remodelled to excellent advantage," said Cashier T. C. Yates yesterday. "We intend to make our banking rooms convenient and attractive, but it would be hard to say at this time when the improvement work will be completed. We hope, however, to be able to move before winter sets in. We may let some of the contracts within a few days. The first work will be the repairing of the foundation. It is, I believe, in pretty bad condition. I presume it will take four or five months to get the new vault in position. We will have tile floors and the interior decoration will be elegant." The improvements will make the structure a fine office building. Several applications for rooms have already been received. The building will be equipped with a steam heating plant and modern conveniences.

FARMERS BEGIN WORK.

Change in Weather Has Caused Much Activity Near Negaunee.

"I wish I could find a good man or two; men who understand farming," said a Negaunee man yesterday. "With the season so backward we are now going to be hard pinched to get our crops in. We have done little work this spring, because of the unfavorable weather. Now most of the farmers are short of help. I have been looking for a reliable man and I have asked a number to aid me in finding one to take charge of my place, but everyone seems to be busy. I had difficulty securing help last season, but I never wanted men as badly as now. We have so much work that will have to be done in a hurry that I am afraid our crops will go in late."

There are now a large number of farms in and near Negaunee. There is very little available farming land within from five to ten miles of the city that has not been taken up. Under ordinary conditions the yield of farm produce should be reasonably large this year. Aside from a few varieties of vegetables, last year was a fairly good one. A number of new farms are to be opened this spring. Several farms have secured places in the Palmer district, and a number are to break ground east and southeast of the city.

LOCAL LACONICS.

Charles Johnson received a new safe yesterday.

J. F. Coon of Laurium spent yesterday in Negaunee.

Hugo Muek and wife visited friends at Princeton yesterday.

A daughter was born yesterday morning to Mr. and Mrs. Harry Gribble.

George E. Spears, billiardist, of Minneapolis, will give an exhibition this evening at Allison's billiard hall.

Rev. J. Pascoe, presiding elder of the Houghton district of the Methodist church, was in Negaunee Wednesday. He left for his home that evening.

George J. Maas was out Wednesday for the first time since he was taken sick several months ago. He visited his mother, who has also been ill the greater part of the winter.

Ira E. Randall of Houghton visited his son, G. L. Randall, in this city yesterday. The young man is employed in the land department of the Cleveland-Cliffs Iron company.

Alex Bashaw, the Chicago & North-western man who was seriously injured at the Ohio mine near Michigan Wednesday afternoon, is well known in Negaunee, as he spent the greater part of his life here. He moved to Ishpeming a few years ago, when he was given a permanent position on the train running between Ishpeming and Marquette and Ishpeming and towns in the western end of the county.

Thomas Curley, who has been in Nevada the past ten or twelve years, arrived in the city yesterday, and will spend a short time here visiting relatives. His brother Michael was down last week from the Mesata range and expected to see him, but he was obliged to return before his arrival. Mr. Curley is now located at Goldfield, where he conducts a drug business.

Marshal Gribble located the two boys who broke the windows in the South Shore and Chicago & Northwestern passenger trains as they passed through the eastern part of the city Wednesday morning. One of the youngsters is twelve years of age and the other nine. Neither of them seemed to realize that they had done anything wrong.

The Juniors will conduct a hop to-night at McDonald's hall in honor of the Seniors. A number of the townspersons have received invitations and the function will be largely attended. Dancing will start at 8 o'clock, continuing until 12. Tickets will be \$1 per couple, including refreshments. The Negaunee orchestra will furnish the music.

AWNINGS.

The Kelly Hardware Co. can furnish you with awnings for stores, public buildings or residences. Any size.

KELLY HARDWARE CO., (3-27-11) Marquette.

We are now prepared to execute promptly all orders in our ladies' tailoring department, which is now in charge of Miss Mae Gerner, late of Milwaukee. H. J. Peterson. (5-1-11)

RUTLEDGE IN THE CITY.

Temperance Advocate Here Yesterday, But Was Not After Saloon Men.

C. H. Rutledge, the anti-saloon league organizer, who was here roughly treated in Negaunee Tuesday night of last week, was a visitor here again yesterday. Mr. Rutledge said he had not remained away from Negaunee so long because he was afraid to come to the city, but because of his absence from the county. His mission yesterday was to meet a man from one of the townships, who wanted to confer with him regarding a violation of the law by a liquor dealer in his district.

"The mob did not scare me sufficiently to keep me away from Negaunee," said Rev. Rutledge. "I have been mobbed many times before. Such treatment on the part of my enemies injures their cause and helps mine. The news of their assault upon myself and Mr. Kaminen spread to the corners of the state, and nearly every paper in Michigan had something to say about it. In nearly every article I have seen Negaunee is criticized because its police officers failed to protect us. It has been said that the mob did not make sufficient noise to attract any particular attention, but this is not true. The disturbance at the depot could be heard for some blocks."

"If the Negaunee saloon keepers and their sympathizers knew who was back of me in this movement they would be more careful to observe the law. Some of these days they will hear from us in a manner that will surprise them. I have co-workers not only in Negaunee, but in every city and township in the entire upper peninsula, and I can give you a complete history of every man who engaged in the liquor traffic in my district. I do not have to enter the saloons or ascertain by personal inspection if they are doing business in violation of the law. I have been in Negaunee when the saloons should have been closed and I kept positively that they were doing business, but I did not take steps to cause the arrest of the violators. However, one of these days we will begin a more active campaign than we have ever before conducted here."

SUFFERING FROM INJURY.

Louis Miller, who was a passenger on a Rock Island train wrecked by running into an open switch a few weeks ago, when he was returning home from Hot Springs, Ark., is still suffering from the injury of his right arm. His physician has found that several of the larger cords were stretched and he says the arm will not be better until they settle back into their proper places. Mr. Miller is losing interest in his work, and has received letters from officials of the Rock Island company asking question about his injuries, but they have not yet intimated that they would like to settle the case. He lost his grip in the wreck, and has not yet recovered it.

LEAGUE BOWLING CONTEST.

The Eagles defeated the White Sox in a league match Wednesday evening at Orr & Tompkins alleys, the scores being as follows:

Eagles—Maitland.....159 129 165 453
Yates.....114 148 169 421
Perkins.....130 152 196 488

Totals.....403 429 530 1302

White Sox—Berglund.....122 119 147 388
Johnson.....179 147 153 479
Wentala.....156 172 120 406

Totals.....457 438 420 1315

FINE CATCH OF TROUT.

Richard Nesbitt was the first Negaunee man to bring in trout. He spent Wednesday at Birch Meadow in the Carp river, few miles out of Negaunee, where he caught forty-two trout, from eight to twelve and one-half inches in length. Mr. Nesbitt said that in places he could see from 200 to 300 fish in the stream but that it was difficult to induce them to bite. He was in one place, where the fish were unusually numerous, he said he worked for nearly two hours and only caught eight.

MUNISING

COUNCIL PUT ON SCREWS.

Bonds of Seven Saloon Men Are Rejected—Eventful Session.

It was announced during the recent village campaign that gilt edged bonds would be required for saloon licenses. That the present council is making good this pledge was fully demonstrated at the special meeting Monday evening to consider the saloon bonds. Twenty applications were filed, eleven of which were rejected until the sureties should have shown their qualifications before the council.

There was a large attendance at the meeting. In the crowd were many anxious faces, as the committee quietly passed upon the bonds. These faces became more of a study when the report of the committee was read by Chairman Baldwin. It recommended the acceptance of only nine bonds, as follows: Hans Hansen, A. C. Hartho and Sam Marks, sureties; J. E. McBrady, John Levy and Hans Hansen, sureties; A. A. Christofferson and Wm. J. Carmody, sureties; Ed Robinson, Julius A. Ward and Andy Simon, sureties; Jay T. Coury, Jas. Jasper and D. W. McDougall, sureties; John A. Nelson, Robert Burrows and R. E. Brissette, sureties; and Wm. J. Lyman and Hans Hansen, sureties; Geo. Schell, R.

So far only one license has been issued, that of Joseph Kasanette. His saloon is near Cusino. There were six applications in the township last year, out of the city of Munising. Three at Shingleton, two in Cusino and vicinity, and one at Wetmore. It is more than likely that Shingleton and Wetmore will go dry under the \$6,000 bond requirement, and that Cusino will lose one of its saloons. The liquor men of the city and township feel that they are receiving pretty severe treatment.

Danderine

GREW MISS CARROLL'S HAIR

AND WE CAN

PROVE IT

Beautiful Hair At Small Cost.

WITHIN the last decade great and rapid strides have been made in Materia Medica. Many diseases that were considered incurable fifteen years ago are now cured in a few days, and in many cases prevented altogether. The scientists of late years have been delving for the cause, the foundation, the reason and the starting point of disease, fully realizing that the actual and true cause must be ascertained before the remedy can be located. Hair troubles, like many other diseases, have been wrongly diagnosed and altogether misunderstood. The hair itself is not the thing to be treated, for the reason that it is simply a product of the scalp, and wholly dependent upon its action. The scalp is the very soil in which the hair is produced, nurtured and grown, and it alone should receive the attention if results are to be expected. It would do no earthly good to treat the stem of a plant with a view of making it grow and become more beautiful—the soil in which the plant grows must be attended to. Therefore, the scalp in which the hair grows must receive the attention if you are to expect it to grow and become more beautiful.

Loss of hair is caused by the scalp drying up, or losing its supply of moisture or nutriment, and when baldness occurs the scalp has simply lost all of its nourishment, leaving nothing for the hair to feed upon (a plant or even a tree would die under similar conditions).

The natural and logical thing to do in either case is, feed and replenish the soil or scalp as the case may be, and your crop will grow and multiply as nature intended it should.

Dr. Knowlton's DANDERINE

is the only remedy for the hair ever discovered that is identical with the natural hair foods or liquids of the scalp. It feeds and nourishes the hair and does all the work originally carried on by the natural nutrients or life-giving juices generated by the scalp itself. It penetrates the pores of the scalp quickly and the hair soon shows the effects of its wonderfully exhilarating and life-producing qualities.

One twenty-five-cent bottle is enough to convince you of its great worth as a hair growing and hair beautifying remedy—try it and see for yourself. Now on sale at every drug and toilet store in the land. Three sizes, 25c, 50c and \$1.00.

FREE To show how quickly Danderine acts we will send a large sample free by return mail to any one who sends this advertisement to the Knowlton Danderine Co., Chicago, with their name and address and 10 cents in silver or stamps to pay postage.

MISS J. CARROLL
2807 Irving Ave., Chicago

R. Stewart and R. E. Brissette, sureties; Ivan Samuelson and Gust Bloom, Robt. Burrows and Anton Bjornstad, sureties.

The following bonds were rejected until sureties should qualify before the council: Jay T. Coury, W. A. Lennox and Fred S. Case, sureties; Edwin A. Storrs, Ed Robinson and Geo. W. Prior, sureties; Sylvester Raymond, Dennis Fargate and Thos. G. Sullivan, sureties; Ole Shang and Chas. Johnson, Anton Bjornstad and Victor Johnson, sureties; Matt M. Mattson, A. Christofferson and Emeda Jerry, sureties; E. P. Kling, W. A. Lennox and A. C. Hartho, sureties; Joseph Paris, Peter Murry and Benjamin DeGarry, sureties; Ed Robinson, G. W. Prior and Jas. Tracy, sureties; Abraham Artibe, Benjamin DeGarry and John Levy, sureties; Frank Casquette, Ebery Jerry and Wm. H. Carmody, sureties; John Levy, Jos. Tracy and D. W. McDougall, sureties.

The drug store bond of O. R. Tredway, with R. G. Elliott and H. B. Freeman as sureties, was accepted.

The council adjourned after the report of the committee had been read and approved, to meet at 8 o'clock Tuesday evening to hear the sureties who had been on rejected bonds. Geo. W. Prior, keeper of the Grand Island lighthouse, was the first to appear before the council. He was closely questioned by City Attorney Freeman and the testimony taken down by his stenographer. Prior refused to place a definite estimate on his respective pieces of real estate and failed to make good his qualification. Emeda Jerry was then examined. He had considerably to say with the English language, but finally made his qualifications clear. The others failed to put in an appearance. The saloon men whose bonds were rejected put in a busy day. The final report of the committee accepted four more, the bonds of E. P. Kling, F. H. Casquette, John Levy and Matt Mattson.

Thirteen saloons will be granted a license. The sentiment that twenty saloons is out of proportion to the size of the village has grown strong and become pretty general. It is believed that not all of the seven saloon men whose bonds have been rejected will be able to secure acceptable sureties.

INCREASED BOND REQUIRED.

Munising Township Fixes It at \$6,000 Instead of \$3,000.

The township board has raised the size of liquor bonds from \$3,000 to \$6,000, the maximum amount allowed by law. When the board was called to order by the chairman, Supervisor John McMillan, a petition was presented, asking the board to make the raise. It was signed by the heaviest taxpayers in the township and a long list of the most influential citizens. The opposition was conducted by Attorney R. R. Stewart, who fought the petition to the last. The discussion became so warm and exciting that adjournment was taken until the next night. R. R. Stewart held that even if the township board were to raise the bonds to \$6,000 according to his interpretation of the law it would not affect the applications already in its hands. As the majority of the board wished further legal advice on the question a recess was taken, and H. B. Freeman summoned to give his views. When the point had been settled against the petition of Stewart, the bonds were raised with only one dissenting vote.

So far only one license has been issued, that of Joseph Kasanette. His saloon is near Cusino. There were six applications in the township last year, out of the city of Munising. Three at Shingleton, two in Cusino and vicinity, and one at Wetmore. It is more than likely that Shingleton and Wetmore will go dry under the \$6,000 bond requirement, and that Cusino will lose one of its saloons. The liquor men of the city and township feel that they are receiving pretty severe treatment.

FORMAL OPENING.

Y. M. C. A. Quarters Are Now Ready for Occupancy.

The Young Men's Christian associa-

tion has announced the formal opening of its building. The last of the apparatus and furnishings has arrived and been installed. Invitations have been sent to the contractors and a general invitation is extended to the public to inspect the building, its equipment and conveniences Saturday evening, from 8 o'clock until 10.

The building is now well equipped from the dormitories on the third floor to the shower baths in the basement. The gymnasium on the first floor is especially well fitted up. The baskets for basketball have been hung and the courts marked out. The room is not large enough to make the courts official size, but yet a great deal of enjoyment is anticipated by the many admirers of this indoor game. The entire gymnasium floor will be used when the game is played. Physical culture classes will be started next week.

The reading room on the second floor presents a very inviting appearance. An excellent line of periodicals has been subscribed for and the local paper and Chicago Record-Herald have been contributed. A room for games, two class rooms and the secretary's private apartments are also found on the second floor. Hearty support has been given the association by business men and much interest is being manifested by the young men. In fact the outlook is very bright for a thoroughly live and wide awake organization.

FOUCHARD WON CONTEST.

Joseph Fouchar, a member of the junior class in the high school, won the Munising oratorical contest. His subject was "Our Nation's Greatest Menace," and the theme was child labor. The oration showed much preparation and careful thought, and the delivery was excellent. As there is to be no district contest this year the winner of the Munising contest will be the representative from this district to the state contest, to be held in Muskegon Friday, May 10. Mr. Fouchar is making preparations to attend. It is believed that he will make a creditable showing.

James Gibson won second place in the Munising contest, with the subject "Theodore Roosevelt." Miss Regina Drolg took third place, with an oration on "Woman's Rights and Evil."

William Harris, a former shift boss at the Lake Angelina mine, who was taken to the university hospital at Ann Arbor two or three weeks ago, is improving. A letter received yesterday from his physician brought the information that he was getting along exceedingly well and that it was now thought a permanent cure could be effected within the next three or four months. Mr. Harris had been in poor health for several months before his departure for Ann Arbor.

LEAGUE BOWLING MATCH.

Following are the scores of teams participating in a league bowling contest at the Bank street alleys Wednesday evening:

Tot.

VISIT IN ENGLAND.

Mrs. William Andrews and her daughter, Mrs. William Ripper, have departed for England, where they will visit a few months. They are to spend a short time on their way east with relatives and friends at Bristol, Conn. Mrs. Charles Durt left the city Wednesday evening and will join Mrs. Andrews and Mrs. Ripper, all crossing the ocean together. It is likely that they will also return together.

George Depew is suffering from an attack of appendicitis. His friends will be glad to learn that it will not be necessary to have an operation. He is im-

proving as rapidly as could be expected.

The eighth grade examination for Munising township will be held in the seventh grade room of the Central school building next week, Thursday and Friday. All the pupils in this township who wish to write the examination should report to the school on Thursday morning at 9 o'clock.

The art exhibit last week was much appreciated by those who attended, although it was not as big a financial success as was expected. The comedy given in connection with the exhibit was humorous throughout and kept the audience in an uproar. Excellent talent was displayed by the girls.

The ice in the bay is beginning to break up, and if the warm weather continues may soon start out into the lake. Ed Vandien, captain of the Lyle D, says that the ice will be out by Monday and the boat will be launched for the summer. Last year the ice went out of the bay April 17. The Lyle D has been newly painted and put in fine condition for the summer work.

The Epworth league will hold a business meeting and social at the home of Misses Ethel and Ruth Baldwin. All members and friends are invited. At the meeting last Sunday evening a subscription was taken to help support Rev. J. Gates, who is at present a missionary in Rhodesia, Africa. Thirty-seven dollars were subscribed which will be increased by the league to forty dollars. Rev. Steindinger roomed with Mr. Gates at the Garret Biblical Institute, Chicago.

Pete Kay was a little the worse for drink one day this week, and while in this condition insulted the dignity and proceeded to disgrace the village of one of the local justices. He was promptly arrested and jailed for the night. The next morning he was arraigned and pleaded guilty. A fine of one dollar and costs was imposed, and Pete paid up and went his way.

GLASS WORK ONE OF THE FINE ARTS

A. F. STERNBERG, WHO HAS STARTED A STUDIO HERE, TALKS OF HIS PROFESSION.

ESTABLISHED 1,000 YEARS

Monk Theophilus First Wrote Regarding It—Marquette Artist Preparing Set of Windows for St. John the Baptist Church.

A. F. Sternberg, a graduate of the Royal Art Institute of Munich, Germany, has recently located in this city and established a stained glass studio at No. 117 West Ridge street, where he is now engaged in making the windows for the church of St. John the Baptist on Washington street. Mr. Sternberg has at different times been connected with several of the most prominent firms in stain glass work in the country, and during the world's fair at St. Louis designed a number of windows which attracted wide attention. While he has done some work in the copper country, his home has properly been at Milwaukee for some time past. Mr. Sternberg was undecided whether to locate here or in West Superior, but finally decided upon Marquette as offering the better field, as he is well acquainted with the clergy hereabouts. Most of the stained glass that has been used in this vicinity, he says, has heretofore been secured from St. Paul, Milwaukee or St. Louis. Since establishing a studio here but little over a month ago, Mr. Sternberg has, however, received orders enough to keep him busy until late in the fall. Though he has so far been without assistance in his intention to within a few weeks secure two workmen. His wife is a painter on china and a colorist.

"Without undue egotism," said Mr. Sternberg, yesterday, "I think that I can truthfully assert that residents of this city will see a higher class of work in the stained glass windows I am preparing for the church of St. John the Baptist than any that have heretofore been placed in Marquette buildings. I use only the highest grade of glass and do all my own drawing, coloring, glazing and baking. There are to be one large front window and fourteen smaller ones, emblematic of different events in the history of Christianity, in the church of St. John the Baptist. I expect to have one window completed in about two weeks. I recently executed a fine window for the Baptist church at Birmingham, Ala. The order came to me while temporarily located in the copper country. Another order, recently completed, went to Mobile.

Is One of the Fine Arts.

"Stained glass work when properly executed is one of the highest of arts. Genes can be as much in evidence in its creation as in sketching, painting or sculpture. Stained glass came into existence in the eighth century. From the writings of the monk Theophilus, in the tenth century, we learn of the high development the stained glass art attained in the prior two centuries. Then for nearly a thousand years the art laid dormant, hardly any changes or radical improvements being made in the general practice in all that time, and even today in England, France, Germany, Italy, Turkey, Persia and Greece. Subsequently he mined for gold in Australia, sought diamonds in the Transvaal, took part in several revolutions in South America and finally went to the front as the captain of a company in Roosevelt's Rough Riders in the war with Spain.

STRAIN TOO GREAT.

Hundreds of Marquette Readers Find Daily Toil a Burden. The hustle and worry of business men, The hard work and stooping of workmen, The woman's household cares, Are too great a strain on the kidneys. Backache, headache, sideache, Kidney troubles, urinary troubles follow.

A Marquette citizen tells you how to cure them all. Frederick Pearson, upholsterer, formerly of 157 West Washington street, Marquette, Mich., says: "I can recommend Doan's Kidney Pills very highly. I used them for backache, a dull uneasy feeling and a constant misery in my loins and sides. There was also a miserable weakness across the small of my back. I was never laid up with it but my back was easily tired and that all gone feeling would come on. I tried a number of remedies, but in spite of all I became worse instead of better. Finally I saw Doan's Kidney Pills advertised and got a box at the Stafford Drug Co.'s store and used them according to directions. The result was far beyond my expectations as in a few days the pains ceased, my back became strong, all that uneasy miserable feeling left me and has never returned. I most freely give my name as an endorser of Doan's Kidney Pills and hope other sufferers may learn of them and be cured."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

FAMOUS ATHLETE VISITS MARQUETTE

CAPT. DUNCAN C. ROSS, WHO HAS WRESTLED AND FOUGHT IN EVERY CLIME, PLANS TO START SCHOOL OF PHYSICAL CULTURE HERE.

Captain Duncan C. Ross, wrestler, swordsman, boxer, horseman and jiu-jitsu artist, is in the city at present and may make his home here for some time to come. Captain Ross is probably the best all-around athlete the world has ever known. Few men have ever excelled in more than one branch of sport. Ross adapted them all, and excelled in all. As a wrestler he opposed such men as Evan Lewis, Dan McLeod, Farmer Burns, Matsuri Suraki, the Jap; Joe Acton, "the demon," Melny, Sebastian Miller, Ernest Rober, and came out of the struggles with honors unimpaired. With the broadsword and rapier he defeated the French and Italian fencing masters, at one time holding the championship of Europe with both weapons. As a jiu-jitsu artist he beat the Japs at their own game.

But he is not only an athlete, but as a soldier as well that Captain Ross has won name and fame. He has fought with or against nearly every nationality and visited almost every spot save the North pole. He comes from a family of no little note, his father being a general in the English army. A brother, Alexander Ross, was chief of the Chicago police force for eight years, inclusive of the period of the world's fair. Duncan was born at Scentari, Turkey, near Constantinople, but came to this country in his youth and adopted athletics as a profession. After giving exhibitions and taking part in contests in nearly every city of note in the United States, he made a tour of Europe, meeting all comers with the sword and on the mat. He wrestled and fought in England, Ireland, France, Germany, Sweden, Italy, Turkey, Persia and Greece. Subsequently he mined for gold in Australia, sought diamonds in the Transvaal, took part in several revolutions in South America and finally went to the front as the captain of a company in Roosevelt's Rough Riders in the war with Spain.

Captain Ross has secured the Legion hall on Front street and intends to start a school of physical culture, giving lessons in wrestling, fencing and jiu-jitsu. In order to bring himself before the Marquette public he intends to stage an athletic show Monday night, the wind-up of which will be a wrestling match between himself and Tom Connors, former wrestling champion of England. Connors is one of the cleverest men in the world at the grappling game, and the match should prove a splendid exhibition of science and strength. There will also be boxing and fencing bouts. Marquette wrestlers who wish to try their skill will be given twenty-five cents for every minute they can stay with either Ross or Connors and are given their choice of an opponent.

ADVISES BROTHER TO CORNER ASHES

ALTOONA, PA., MAN WRITES THAT RECENT DISCOVERY PROMISES TO REVOLUTIONIZE THE FUEL MARKET OF THE COUNTRY.

It is the family ash pile a veritable mine of wealth. Without attempting to per-petrate a pun, this might be said to be a burning question. Common salt, one pound; oxalic acid, two ounces; water, one gallon. Mix with one part coal and three parts ashes and according to an Altoona, Pa., cobbler, you have got a compound that will make a fire that would melt a salamander. All the ingredients are cheap, especially the water.

This "discovery" has been going the rounds of the press for some time, but hasn't been taken too seriously in this vicinity. An Altoona man, however, who most labor under the impression that most of the residents of Marquette converse in the sign language, in a letter to a brother in this city, received yesterday gives the latter a few tips which he incidentally believes are of more value than authentic information on the copper market. After giving the formula, which he says he has tried and found all right, he says in part: "Buy ashes! Buy all the ashes in sight! Buy all the ashes of the factories in your vicinity for as soon as the general public catches on ashes are going to be as scarce as whiskers on the back on an angle worm. Just now you can get ashes mighty cheap. Some people will give them to you for carting them away, but in a short time hunting for ashes will be like digging for beer. Papa and Uncle Willie will take turns setting up nights on the ash pile with a shot gun. Salt is cheap; oxalic acid isn't high, and there is no danger of the water supply in Lake Superior running dry. Ashes have boomed so in Altoona

that now they are keeping them under the beds.

"If we had only realized the value of ashes as a fuel the people of this vicinity wouldn't have suffered so during the recent cold spell. It was so cold that the smoke used to go up straight four or five hundred feet and then freeze and fall down in chunks knocking holes in the roofs. Some of the poorer people froze the flames on their candles and used them for strawberries. But since ashes have been used for fuel the temperature has risen to about 97 in the shade. Roses are in bud and robins twitter on the house-tops. Get ashes!"

Upper Peninsula

Assessments Held Legal.

That the assessment levied by the city of Escanaba against property owners on Sarah street to provide for the pavement of that thoroughfare is legal and must be paid by the property owners, is the decision rendered by Judge John W. Stone, after a lengthy review of the situation. Five property owners had filed objections, claiming that the assessment had not been legally made, that the pavement was not constructed according to plans and specifications and making other allegations. It was held by the court that the records were conclusive in their proof that the assessment had been levied according to benefits and that the council had taken all of the necessary steps to make the assessment a legal one. The allegation that the pavement had not been constructed according to contract and other charges concerning the actual construction were matters outside of the court's jurisdiction and could not be considered. The decision will have a far reaching effect as it comes as practical proof of the legality of all street paving assessments levied under the old plan and which had been questioned by property owners in different parts of the city. Several property owners had refused to pay the assessments in the hope that the assessments would be declared illegal, and the decision favorable to the city will now result in all delinquents hastening to settle the claims against their property.

Building Work at the Soo.

Something like \$125,000 will be expended at the Soo this season in new construction work in the business district. At the Soo Woolen mills July I will see a completed brick building at the corner of Ridge and Douglas streets, the site of the present establishment, three full stories in height with a street frontage of 125 feet and a depth of about 110 feet. As soon as the building is completed a large amount of up-to-date machinery will be installed, so that the entire new plant may be in operation by late summer or early fall. The entire cost of this improvement will be about \$40,000.

The improvements on the Belvidere Hotel building have been under way for a month or more and the work on the new addition has been going on for over a week. This also is to be an improvement of considerable magnitude. The addition will be of brick, 43 by 70 feet on the ground, and three full stories in height. The two upper stories will be finished off for sleeping rooms. It is expected that these improvements will be completed early in June, when the Belvidere will be one of the best hotels in northern Michigan. The cost of this improvement will be about \$20,000.

Another structure to be built on the new poor house, which is to be built on the farm recently purchased by the county. The structure is to be built of cement blocks and will cost about \$8,000. The Swedish Lutheran organization has plans completed and is advertising for bids for the contract to erect a new church at the corner of Second and Eureka streets. The contract will be let this week and the work will begin at once and be pushed to a rapid completion. The building will be a modern frame structure, with concrete foundation. It will cost about \$3,000.

A building project that deeply interests everybody in the city is that of the new government building to be located on Brady field, work on which is to begin this season. One hundred thousand dollars has been appropriated and \$60,000 of that amount has been made available for this season. It is not expected that the building could be anywhere near completed in one season, but it is expected that the ground and foundation work, and possibly some more, will be completed by the time snow flies. Just what the plans for the building are is not known. Brady field is a beautiful site, and Government Supervising Architect, James K. Taylor is credited with having made the statement that he wishes to see a building located there that corresponds with the site. Mr. Taylor is expected at the Soo some time early in May, when it is expected that surveys will be taken, plans completed and contracts let, after which the work will be begun.

Another public building to be erected soon, and probably this season, is the new fire hall, plans of which have not yet been accepted, but which, according to sketches that have been submitted, will be a credit to the city, both as an ornament and as a convenience in the matter of fire protection. The building will be of brick and will face either Arlington or Ridge street on the city property. It was voted to bond the city in the sum of \$15,000 for such a building at the recent election.

It's too bad to see people who go from day to day suffering with physical weakness, when Rocky Mountain Tea would strengthen them. Tea or Tablets 35 cents. The Stafford Drug Co.
