

HEIR IS BORN TO KING ALFONSO

Stork Brings a Bouncing Baby Boy to the Spanish Royal Palace, and the People of the Land Unite in Rejoicing.

Title of Prince of Asturias Is Conferred on the Child, Which Possibly Will Bear the Name of Carlos—National Holiday Is Proclaimed for Today, Sunday and Monday, and Pardon Is Given Thousands of Prisoners, Including Eight Sentenced to Die.

Madrid, May 10.—Queen Victoria gave birth to a boy today. The boy, according to a decree of the Spanish government, will bear the title of Prince of Asturias.

In no monarchial country in the world is ceremonial observed at the birth of an offspring of the king and queen so rigidly, stately and formally as in Spain, and today all the features of this function passed off without a hitch.

The birth occurred at 12:45 o'clock p. m. Announcement was immediately conveyed to the waiting officials and the crowds outside the palace, who received the glad tidings with mingled feelings of enthusiasm and emotion.

The queen was married to King Alfonso at Madrid, May 31, 1906, amid scenes of the greatest splendor, followed by the horror of a bomb explosion which killed a score of people and narrowly missed the royal coach in which their majesties were returning from church.

Whole Nation Celebrates. The news that a direct male succession to the throne of Spain had been assured by the birth of a son to Queen Victoria sent a thrill of rejoicing throughout the country, and tonight the happy event is being celebrated from one of the land to the other.

The hurried departure of royal messengers from the palace at 10 o'clock this morning to summon the courtiers and diplomats gave the first indication that the birth was imminent. Immense throngs of excited populace gathered outside the palace court yard.

The crowd awaited in suspense until nearly 1 o'clock when the thundering of cannon shot signified that the anxious event was over. The cannon reports were counted anxiously until the twentieth, and then complete silence ensued. Seconds appeared hours until the sixteenth shot boomed forth, in continuation until twenty-one had been fired to inform the public that the child was a son.

The sixteenth report brought forth cheers, and at the same time the royal standard was hoisted over the palace, when it was proved that no mistake had been made. The people danced with joy and embraced each other, shouting "Long live the king," "Long live the queen."

Then they rushed from the spot, carrying the news to the furthest points of the city. Soon after the royal salute, the flags of Spain and Great Britain were raised over the public buildings in Madrid. Many business houses were closed for the remainder of the day as a sign of rejoicing.

Solemn Ceremony in the Palace. Meanwhile the solemn ceremony of presentation was being carried out inside the palace. The mistress of the robes, carrying a huge silver tray upon which was lying the newly born royal baby, accompanied by King Alfonso and Premier Maura, appeared in the ante-chamber where the courtiers had assembled. The king appeared as full of joy as the premier. Raising the drapery which covered the infant on the silver tray, he said: "Gentlemen, it is a prince."

The solemn dignitaries thereupon forgot all etiquette and cheered both the king and queen heartily. Minister for Justice Figueroa made out the birth certificate, which was signed by all the prominent personages present. The gathering then broke up. King Alfonso telegraphed the news to the pope, King Edward and the heads of other states, and later congratulations began to come in.

National Holiday Proclaimed. Decrees were issued tonight ordering a national holiday throughout Spain for Saturday, Sunday and Monday. The cabinet this afternoon drew up and later presented to King Alfonso for his signature decrees transferring the title of heir presumptive to Prince Charles of Bourbon to the new born prince. It has been decided that the baptism shall occur Tuesday noon. In court circles it is desired to name the baby Carlos, but this has not yet been definitely decided.

King Alfonso today, in honor of the event, decreed pardon to thousands of prisoners, including eight persons who were condemned to suffer the death penalty.

Pope Wires His Congratulations. Rome, May 10.—The pope has telegraphed his congratulations to King Alfonso and his wife, adding his best wishes for the prosperity of the royal house and the Spanish nation.

Havana, May 10.—The birth of a son to the king and queen of Spain has caused great rejoicing among the Spanish residents of Cuba.

Much Rejoicing in England. London, May 10.—There was rejoicing today on the Isle of Wight, where "Princess Emma" was very popular. The governor of the island hailed congratulations in behalf of the people. Spanish flags are flying everywhere. The Spanish colony in London is most joyful, believing that today's event assures dynastic stability and consequently material prosperity to Spain.

OCTOPUS MAKES FINE SHOWING

New Submarine Boat Successfully Goes Through a Series of Extraordinary Tests in a Nasty Sea Off Newport, R. I.

All Records for Quick Diving in Waters of the United States Are Broken in Trials Conducted by the Board Representing the Navy Department, the Little Craft on One Occasion Completely Submerging Herself Within Twenty-Three Seconds.

Newport, R. I., May 10.—All American records for quick diving by a submarine boat were broken today when the submarine Octopus went through a series of extraordinary tests in Coddington cove. There was a nasty sea, with a thick fog and southwest winds that blew at the rate of forty miles an hour.

The principal test was for the purpose of determining whether the vessel while afloat would be able to get submerged quickly if an enemy should be sighted. Running at full speed on the surface, propelled by gasoline engines, the Octopus received the signal from members of the trial board on the tender Nina. Immediately the engines were stopped and power was furnished by the storage batteries. The diving rudders were adjusted, the submarine took thirty-seven tons of water into her tanks and sank to a depth of twenty feet. This was accomplished within four and one-half minutes after receiving the signal. The second test reduced the time by half a minute.

When the Octopus was coming to the surface from one of her dives the Nina sighted in the lifting fog a tug and a tow of barges. The submarine immediately dived and escaped the danger of a collision by going down so deep in the water that the tow could pass above in safety. At another time, when the Octopus was running awash at a speed of ten knots an hour, she dived and was completely submerged within twenty-three seconds.

Cruiser Boston's Gunners Best. San Diego, Cal., May 10.—The United States cruiser Boston has scored higher than any other ship in the Pacific squadron in the target practice now being concluded at Magdalena Bay. According to records received by wireless, the Boston gunners averaged 94 per cent. In addition to this, there were a number of perfect individual scores and one perfect score with six-inch guns.

Butte Mob Tries to Lynch. Prisons Shot, Detective Narrowly Escapes Big Crowd's Vengeance. Butte, Mont., May 10.—Patrol Driver Charles Jackson tonight shot and killed Harry Cole while the latter was attempting to escape, and a mob of 5,000, led by a brother of Cole, made an ineffectual attempt to lynch Detective Charles McGarvey, the crowd laboring under the impression that it was that officer who had done the shooting. Cole had been arrested on a forgery charge, and was suspected of being one of the two bandits who several days ago held up the North Coast Limited on the Northern Pacific at Welch Spur, murdering Engineer Clow and wounding Fireman Sullivan. Cole was a brother of George Cole, now serving a fourteen-year sentence in the penitentiary for robbing the Burlington flyer near this city two years ago.

NINE PERSONS INJURED. Work Train on Electric Line Crashes Into a Passenger Coach. Edwardsville, Ills., May 10.—While a south-bound electric car from Springfield, containing twenty passengers, was halted on a curve of the McKinley interurban line to repair the trolley this afternoon within a few miles of here, an electric locomotive drawing a work train dashed around the curve, striking the car and demolishing it, injuring nine persons, several of them seriously. The injured were: J. R. Cowley, postmaster at Benad, Ills.; Mrs. A. D. Judd, Edwardsville; Henry Wyatt, Stanton, Ills.; Ivan Zerkublen, Edwardsville; John Clapp, Ashland, Ind.; T. M. Watkins, St. Louis; H. E. Davis, Jacksonville, Ills.; Wm. McCready, Col linsville, Ills.

TRUST MEN PLEAD GUILTY. Toledo Brick and Lumber Dealers at the Mercy of the Court. Toledo, O., May 10.—Pleas of guilty by the brick and lumber dealers recently indicted by the grand jury on the charge of violating the Valentine anti-trust act, which provides against pooling interests, were offered before Judge Morris today. The action of the defendants came as a surprise to all concerned. They will be sentenced later.

PROSECUTION FOR RAILROADS. Washington, May 10.—It was announced today by the interstate commerce commission that Attorney General Bonaparte had issued instructions to the various United States attorneys to institute proceedings against twenty-five different railroad companies to exact penalties for violation of the safety appliance law. Among the roads involved the Santa Fe, Chicago & Eastern Illinois, Burlington, and Illinois Central.

GERMAN COMMITTEE APPROVES. Berlin, May 10.—The commercial modus vivendi between the United States and Germany, which has already passed its first reading in the Reichstag, was today accepted by the committee by twenty votes to eight.

WILL NET SOCIETY MILLIONS.

Equitable Life to Sell Its Broadway (New York) Real Estate.

San Francisco, May 10.—The street railway strike has developed into a fight to a finish. Neither side is willing to accept arbitration. The company today made two trips with two cars. On the first trip mounted police acted as outsiders, and more than a score of patrolmen rode in automobiles, but no violence was offered by the crowds. On the second trip the mounted officers were withdrawn as an experiment to determine the effect of the crowd. Missiles were hurled from buildings and several persons were injured. The police made a number of arrests.

ARBITERS REBUFFED. Frisco's Street Railway Strike Is Fight to the Finish.

San Francisco, May 10.—The street railway strike has developed into a fight to a finish. Neither side is willing to accept arbitration. The company today made two trips with two cars. On the first trip mounted police acted as outsiders, and more than a score of patrolmen rode in automobiles, but no violence was offered by the crowds. On the second trip the mounted officers were withdrawn as an experiment to determine the effect of the crowd. Missiles were hurled from buildings and several persons were injured. The police made a number of arrests.

BAD WEATHER CAUSES BIG LOSS

Retail Trade and Agriculture Are Retarded Over a Wide Domain in Consequence of the Almost Unprecedented Backward Spring.

However, There Are Few Complaints Coming from Jobbing and Wholesale Lines, the Fall Business Opening in Exceptionally Brisk Fashion, While in Iron and Steel the Conditions Were Never Better and Manufacturers in General Are Well Engaged.

New York, May 10.—R. G. Dun & Co.'s Trade Review tomorrow will say: Weather conditions, unseasonable almost beyond precedent, have retarded retail trade and agriculture to an extent that cannot yet be measured, but the loss will be considerable. Spring opened with the brightest prospects for business and crops, but record-breaking results can no longer be attained. May thus far has brought complaints of excessive cold from almost every portion of the country, and in many cases it is found that mercantile collections have been slower than heretofore.

The iron and steel industry was never brighter. Steel rails are constantly ordered, much of the new business being in light rails for trolley lines, and the makers of agricultural implements are purchasing bars freely. The only interest of the jobbing trade is in fall goods, the current needs having been supplied. While the footwear market cannot be termed active, there is a steady volume of business that keeps the New England producers fairly well engaged. A better tone exists than at any recent date.

The weather reports have dominated the commodity exchanges, the net result being a further rise in prices. Domestic statements of injury by insects and cold were supplemented by poor progress in many other nations, and the export demand was maintained in the face of discouraging prices. Better traffic conditions and attractive quotations bring large arrivals of wheat at primary markets, and the exports compare favorably with last year's movement.

As Noted by Bradstreet's. Bradstreet's tomorrow will say: Weather conditions are still the key to the irregular crop and trade reports coming from a wide area of the country. Freezing weather and snow have hurt trade and retarded crop preparation and growth in the Northwest, while low temperatures and heavy rains affect and measurably influence distribution in the Central West and East. However, there are few complaints coming from jobbing and wholesale lines. The demands from wholesalers, while smaller than some months ago, have been sufficient to keep all actively engaged. (Continued on page 2.)

Higher prices for cereals, cotton and other natural products are a result of the crop reports and the broadening speculative interest. The European crop reports are little better than our own, and partly explain the higher quotations offered for wheat and corn. Cotton has advanced 35 points for spot, 69 points for the May and 70 points for the July on continued unfavorable crop advices and a reported improvement in the demand for cotton goods for fall delivery. Some of the advance in the futures was shaded later on realizing. Other products also are higher this week, pork advancing 75 cents and lard 8 points. The wheat (including flour) exports have been 2,994,000 bushels this week, against 2,142,000 in this week last year, and for the past forty-five weeks are 146,795,000 bushels, against 115,748,000 bushels in 1905-6. The corn exports this week have been 1,745,000 bushels, against 1,574,000 bushels in the week a year ago, and for the fiscal year to date total 63,173,000 bushels, against 105,083,000 bushels in 1905-6.

The failures for the week in the United States numbered 154, against 152 in the like week in 1906; Canadian failures twenty, against twenty-eight in this week a year ago.

Bank Clearings. The figures of the bank clearings compiled by Bradstreet's for the principal cities in the United States for the past week aggregate \$2,855,688,990, against \$3,102,510,000 in the corresponding week of last year.

BUILDING IS WRECKED. Falling Machinery Kills One Man, Injures Others, in Chicago. Chicago, May 10.—One man was killed and a dozen others were more or less severely injured by the collapse tonight of one of the floors in the McCormick branch of the International Harvester company's works. Heavy machinery on the fourth floor crashed through four floors, and completely wrecked the building.

NOW SEVEN FEET OF SNOW. Sun Has Not Shone in Southern Wyoming Since April 15th. Laramie, Wyo., May 10.—For twenty-four days a snow storm has raged in southern Wyoming mountains. The snow is seven feet deep on the level. Since April 15 the sun has not shone.

PACKEY McFARLAND DEFEATS SAYRES. Milwaukee, May 10.—Packey McFarland, of Chicago, was tonight awarded a well-earned decision over Maurice Sayres, of Milwaukee, at the end of ten rounds. McFarland was the aggressor throughout.

PACKEY McFARLAND DEFEATS SAYRES. Milwaukee, May 10.—Packey McFarland, of Chicago, was tonight awarded a well-earned decision over Maurice Sayres, of Milwaukee, at the end of ten rounds. McFarland was the aggressor throughout.

MAYOR VEToes THE MEASURE.

Salary Increase of Millions Denied Women Teachers in New York.

New York, May 10.—Mayor McCallan today vetoed the White salary bill, recently passed by the legislature. The bill provided that in whatever grades men and women teachers were jointly employed the salaries of both should be the same. The bill would have increased the school expenses many millions of dollars annually.

ILLINOIS RATE BILL PASSES. Fare for Ticket-Holders Two Cents, a Cent More on Trains.

Springfield, Ills., May 10.—The house, 132 to 0, tonight concurred in the senate amendment to the house two-cent passenger fare bill. The bill as it goes to the governor for approval provides a maximum passenger fare of two cents except that in case a passenger fails to purchase a ticket at a station where the ticket office is open thirty minutes next preceding the departure of a train, three cents may be charged him on board the train. For children under twelve the fare is one cent a mile.

Direct Vote for U. S. Senators. The senate tonight concurred in the house joint resolution making application to congress to propose an amendment to the constitution to make United States senators elective by direct vote of the people.

BITTER FIGHT AT SPRINGFIELD. DOWN-STATE SENATORS ASSAIL CHICAGO CHARTER BILL, AND FINALLY ARE OUT-VOTED.

Springfield, Ills., Saturday, May 11.—A majority of the down-state members of the senate met late yesterday afternoon and laid plans for organized opposition to the Chicago charter bill. At the night session they resorted to every means to defeat the measure. Assisting the Cook county members were some senators outside of that county. Objectives were made to article 5 of the charter, which it was claimed conferred too great legislative power upon Chicago. The fight throughout was bitter, and at 1 o'clock this morning it was still on. The outside senators claim to have enough votes pledged to defeat the charter unless amended so as to eliminate the objectionable features. The friends of the charter say it will have four majority when the final vote is taken.

Chicago Members Win Out. Springfield, Ills., Saturday, May 11.—Senator McKenzie's amendment to article 5, intended to limit Chicago's representation in the legislature, was lost, 25 to 20, and at 1:30 o'clock a. m. After adopting certain committee amendments to its third reading, the bill was ordered to its third reading and made the special order for 11 o'clock this morning.

DEEP WATERWAY PROJECT. Gov. Deneen Urges Continued Work on Chicago Drainage Canal.

Springfield, Ills., May 10.—Governor Deneen tonight sent to both houses of the general assembly a message calling attention to the great need of legislation for continuing work on the extension of the Chicago drainage canal, the first step in the proposition for a deep waterway between the lakes and the gulf, and asking that final adjournment be not taken until action be had on the measure providing for the work.

In his message the governor says the time is ripe for action upon this subject, that the commercial needs of the country are pressing for the relief which the deep waterway would afford, and that favorable action upon the bill now before the legislature would be for the best interests, not only of the state, but of the nation.

In the house, the reading of the message was followed with the deepest interest by the members. No action was taken. Speaker Shurtleff simply directing that the message be incorporated in the journal. In the senate, consideration of the message was postponed until tomorrow.

It was intimated tonight that when the senate meets next Wednesday the enacting clause would be stricken from the deep waterway bill, thus closing the incident, and sine die adjournment would follow almost immediately.

HIS SALARY \$25,000 A YEAR. New York, May 10.—Barrett B. Mitchell was today appointed general freight manager of the Vanderbilt railroad lines at a salary of \$25,000 a year.

ACCOUNTS REPORTED HEAVILY SHORT. SYRACUSE EX-TREASURER AN ALLEGED DEFAULTER FOR POSSIBLY MORE THAN \$100,000.

Syracuse, N. Y., May 10.—The city treasurer, it is alleged, has discovered a shortage in the accounts of the office during the term of E. F. Allen as treasurer. It is impossible to tell until the experts report how large the shortage is, but it is possible it will exceed a hundred thousand dollars.

ABE HUMMEL SENTENCED. One Year in Prison and a Fine of \$500 the Dose Given Him.

New York, May 10.—A year in state prison and a fine of \$500 was the sentence imposed today upon Attorney Abraham H. Hummel, convicted of conspiracy in the famous Dodge-Morse divorce case.

CHARLES MOYER AN EX-CONVICT? Man of the Same Name as the President of the Western Federation of Miners Once "Did" Time at Joliet.

Convicted in Chicago on a Burglary Charge and Sentenced to a Year in the Penitentiary—Publication of the Story Causes a Stir at Boise, Idaho, but That He Is the Former Felon Is Strongly Denied by the Prisoner—He Sets Up an Alibi.

Chicago, May 10.—The Journal today prints an exclusive story alleging the arrest of Charles H. Moyer, president of the Western Federation of Miners, in Chicago in 1885 for burglary. According to the story in the Journal, he was subsequently sentenced to Joliet penitentiary, where he served from February, 1886, to January, 1887. At the office of the Joliet penitentiary this afternoon, it was declared that during the dates mentioned by the Journal a man bearing the name of Charles H. Moyer was an inmate of the prison.

The records of the Chicago police department show that a man giving the name of C. C. S. Moyer, alias Fred Baker, and his partner, John Keating, were arrested Dec. 4, 1885, on the charge of burglarizing seven different houses, and according to the Journal Moyer was sentenced to Joliet to serve one year.

The Journal also prints a story under date of Boise, Ia., substantially as follows: Frank S. Moyer, the prisoner now in Boise for four years and now a conductor on the street car line here, is a brother of Charles H. Moyer. He said today to the Journal correspondent: "I have heard that Charley got into trouble in Chicago once and was arrested. Probably that C. H. Moyer, the prisoner now in jail here, charged with the murder of former Governor Steuneger, is one and the same man, is denied by the prisoner and his counsel.

Moyer today said that he was working in the mines in the Black Hills country, S. D., at the time given between Feb. 4, 1888, and Jan. 4, 1887. He says that it would be easy to verify this by the records of the Castle Creek Gold Mining company, at Rockford, S. D., where he says he was working at the time. Moyer also said that the postmaster at Rockford would be able to testify as to his receiving mail at the time, and that officials of the county and state will verify his denial of the story that he was an inmate of Joliet prison at that time.

Orchard's Testimony Interests. Several members of the Western Federation of Miners now in Boise watching the progress of the Haywood case do not join in the belief in some quarters that Orchard will refuse to testify. They believe that he will make his statement upon the stand. On what side there is a question about how far Orchard will be allowed to go in his statement, which it is alleged implicates Haywood, Moyer and Pettibone. It is around this evidence that the whole case undoubtedly will move.

SAID POLICE "JOBBED" HIM. However, Burglar Tate Is Convicted and Will Go Back to Joliet. Chicago, May 10.—Edward S. Tate, who gained notoriety recently on the charge of having been employed by Newton C. Dougherty, former president of the Peoria (Ills.) board of education, now serving a sentence in Joliet penitentiary, to blow open the board's safe, was convicted here today of burglary. In his defense, Tate alleged that the burglary was arranged by the Chicago police whereby he was being "jobbed." That the jury was inclined to believe that part of his story was true, was shown by the fact that it commended him in the verdict to the clemency of the court. Tate will be sentenced to the state penitentiary under the indeterminate law for one to fourteen years.

GENERAL WILCOX IS DEAD. One of the Most Famous of Michigan's Soldier Sons. Detroit, May 10.—Word was received here tonight of the death today at Cobourg, Ont., of Brigadier General Orlando B. Wilcox, U. S. A., retired, a veteran of the Civil, Mexican and Seminole wars, former governor of the Soldiers' Home at Washington, D. C., and one of the most famous of Michigan's soldier sons. At the outbreak of the Civil war he commanded the First Michigan Infantry, the first Western regiment to reach the national capital after the call to arms.

TODAY'S WEATHER. Washington, May 10.—The following is the weather bureau's forecast for Upper Michigan: Fair, Saturday; Sunday, increasing cloudiness and warmer, probably showers; fresh northeast to south-east winds.

**DAILY MINING JOURNAL**  
 A MORNING PAPER PUBLISHED BY THE  
 MINING JOURNAL CO. (LIMITED.)  
 Issued daily except on Sundays. Contains  
 Associated Press dispatches and is especially  
 devoted to the Upper Peninsula interests.  
 SUBSCRIPTION RATES:

 Per year, by mail, \$10.00

MARQUETTE, MICH., MAY 11.

Entered as mail matter of the second class  
 in the postoffice at Marquette, Mich.

Tears for the drug trust.  
 Now Wisconsin has a public utilities  
 bill of her own.

Fie, fie, Mr. State Road Commissioner.  
 We never supposed that you would tell  
 fibs.

Judging from late Lansing reports the  
 Keweenaw prison bill is only Senator  
 Smith's way of paying his respects to  
 Governor Warner.

At last the Wisconsin deadlock is getting  
 a little groggy. Judging from late  
 reports not many days will elapse before  
 the identity of Senator Spooner's  
 successor is known.

Ye fighters were always prone to kill  
 the goose that lays the golden egg. It  
 will probably be some months before  
 Los Angeles is ripe for another cham-  
 pionship fistie mill.

Senator Smith of Houghton county  
 this week referred to the Hon. Horatio  
 Earle, state road commissioner, as the  
 "next governor of Michigan," but of  
 course Senator Smith expected to be  
 disagreed with.

Marquette's Fourth of July celebra-  
 tion is under way. The attention of the  
 committee is called to a suggestion of  
 the Copper Country Evening News, which  
 advises that a ski-jumping contest be  
 included in the program.

The Burns-O'Brien fight was crooked.  
 We have the principals' word for it. All  
 the parties were perhaps tainted, but  
 the fact that O'Brien was invariably  
 ahead in the race around the ring leads  
 to the belief that there is a larger mea-  
 sure of truth in Burns' story than in the  
 one of his adversary.

Burns and O'Brien ought to have tried  
 conclusions at Goldfield, Nev., where the  
 hardy miners would have had their ar-  
 tillery trained on the ring, ready to let  
 fly at the first hint of suspicion. Then,  
 perchance, they would not have dared  
 be anything but square.

The newspapers of the state have been  
 beating a lively tattoo on the legislature  
 for its primary law amendment provid-  
 ing against the use of the newspaper  
 advertising columns by candidates for  
 public office, but the legislature is hard-  
 ened to newspaper tattoos and doubtless  
 will make the amendment stick.

Under direction of Mayor Perron the  
 Thomas street resorts at Escanaba have  
 been closed, we are informed, and their  
 inmates scattered to the four winds of  
 heaven. The government furnished the  
 primary reason for the shakedown. It  
 proposes to build a federal building at  
 Escanaba, and for a site picked a loca-  
 tion in the same block occupied by the  
 Thomas street dives. Then it intimated  
 to the city authorities that it would be-  
 gin building when the moral atmosphere  
 of the neighborhood was improved. Thus  
 the exodus of the women of the demon-  
 ium. However, it would perhaps be  
 advisable to wait a few months before  
 congratulating Escanaba on any perma-  
 nent improvement.

Nowhere was the passage of the Ke-  
 weenaw prison bill by the senate re-  
 ceived with more surprise than by the  
 copper country papers. The Calumet  
 Evening News remarks that there has  
 been no enthusiasm in the copper coun-  
 try over Road Commissioner Earle's  
 plan because it was not believed to have  
 any chance of success. "However," it  
 says, "now that Earle's bill is in a  
 fair way to become a law there will be  
 more genuine interest in it. Keweenaw  
 offers excellent advantages for a prison  
 such as he would have established. It  
 has an inexhaustible supply of trap  
 rock, which for macadamizing roads is  
 unexcelled. The further progress of the  
 fall at Lansing will now be awaited with  
 more than passing interest."

President Roosevelt has, in a letter  
 addressed to that gentleman, strongly  
 endorsed the handling of the Idaho labor  
 cases by John D. Pringle, editor of the

Pittsburg Labor World. An utterance  
 of Mr. Pringle's that particularly pleased  
 the president was the following: "The  
 Labor World has not a word to utter  
 regarding the guilt or innocence of Moyer,  
 Haywood and Pettibone in their present  
 terrible position. We hope they are  
 innocent and will be proved to be so,  
 but what we want to point out is that  
 their innocence of the charge preferred  
 against them will not, in our estimation,  
 exonerate them from the charge of  
 pre-empting an industrial and social policy,  
 that is damning to the best interests of  
 the wage-workers of the country."

Concerning the embargo the legisla-  
 ture proposes to place on the use of the  
 newspaper columns by candidates the  
 Detroit News says:  
 "Publicity is as much to be desired  
 concerning the personality of men as-  
 pirating to political office as it is concern-  
 ing railroad earnings, and a little more  
 so. If in a municipal crisis there is  
 found a man who can puncture corpora-  
 tion arguments and who wishes the  
 people to know that he can, and to know  
 further that if given the power he can  
 curb those preying pests, is the use of  
 the same means of publicity to be de-  
 nied him? It is too silly to even argue  
 about it. The unpurchasable advertis-  
 ing some of the legislators got this  
 season will probably place them where  
 they will not care for publicity after  
 the session ends."

The Marquette County Agricultural  
 association has made the requirement  
 that all exhibitors, to be eligible to  
 premiums, must be members of the as-  
 sociation as much to facilitate getting  
 the number of members who must be  
 secured as a preliminary to securing  
 county aid as for any other reason. It  
 is not a burdensome requirement, as  
 the membership fee is only \$1 and each  
 membership carries with it \$1 in admis-  
 sion tickets. The association should  
 have a standing membership of 500 or  
 more. Then the association would have  
 a guarantee fund in its possession that  
 would permit it to plan for the annual  
 fair with more confidence. Prospective  
 exhibitors should not be frightened away  
 by the new requirement. It is an easy  
 one to comply with.

News of the death of F. W. Read in  
 the South was received yesterday with  
 great regret throughout the upper pen-  
 insula. Mr. Read was prominently iden-  
 tified with the development of Mar-  
 quette county, his lumbering operations  
 extending over the greater part of half  
 a century and having been conducted  
 with great success. In the course of  
 his career Mr. Read and the companies  
 in which he was interested conducted  
 mills here, at Eagle Mills and at Mich-  
 iganme, and cut timber over a wide ex-  
 pansion of tributary country. Mr. Read  
 was a conservative farsighted business  
 man, with a reputation for square deal-  
 ing and financial integrity. Personally  
 he was a kindly, pleasant gentleman,  
 and one whose friends were legion. He  
 will be sincerely mourned wherever he  
 was known.

**HE DOESN'T KNOW.**  
 The Mining Journal notes in its Lan-  
 sing special yesterday the sentence, "he  
 (State Road Commissioner Earle) denies  
 the report that there is trap rock within  
 the Marquette prison enclosure, and says  
 that six miles of railroad would have  
 to be built and land purchased before  
 trap rock near the Marquette prison  
 would be available."

This simply goes to prove that Mr.  
 Earle hasn't made as careful a study of  
 the environment of the Marquette pris-  
 on as he has of the Keweenaw penin-  
 sula, or, if he has, conveniently forgets  
 what he once observed. Mr. Earle is  
 correct in asserting that there is no  
 trap rock in the prison enclosure, but  
 he is entirely incorrect in stating that  
 six miles of railroad would have to be  
 built to make available the trap rock  
 near the prison. There is trap rock  
 enough to run a quarry the better part  
 of half a century within stone's throw  
 of the prison, on the line of a railroad  
 spur already built, and located on land  
 title of which will be transferred to the  
 state by the terms of a bill already  
 passed by the house and that will pre-  
 sently become a law.

There is a considerable knob of trap  
 rock on land already owned by the  
 state, within about ten rods of the main  
 gate to the prison yard. It is an out-  
 cropping of an enormous ledge of sim-  
 ilar rock located a few rods east of the  
 east wall of the prison. The northern  
 end of this ledge, and it juts boldly up  
 into the sky line, is a few steps from  
 the South Shore spur from the main line  
 into the prison yard, and this spur  
 curves in a manner which makes it fol-  
 low the configuration of the ridge of  
 rock for a distance of several hundred  
 feet. The supply is, for all practical  
 purposes, inexhaustible. It is at the  
 very doorway of the prison and a track  
 over which it could be hauled into the  
 prison yard is laid, ready for use, if the  
 necessity should arise.

As a matter of fact the prisoners have  
 already quarried in this great ledge.  
 When an addition was built to the east  
 wing some years ago all the rough rock  
 needed was gotten out at the northern  
 end of the ledge by convict labor and  
 moved a distance of not more than 200  
 yards into the prison enclosure. As al-  
 ready stated, the title for all the land  
 on which the ledge is found is to be  
 transferred to the state along with title  
 to a considerable acreage of other land  
 that is needed to increase the size of the  
 prison farm.

Mr. Earle is entirely at fault in his  
 statements about the situation at the  
 Marquette prison in regard to a possible  
 crushed rock industry. It is distinctly

favorable to such an industry, as favor-  
 able as it can well be at any point on  
 the Keweenaw peninsula. Under the  
 circumstances the obviously wise thing  
 for the legislature to do, if it must  
 experiment along the lines suggested by  
 Mr. Earle, is to conduct the experiment  
 at the Marquette prison, thus obviating  
 the great expense of erecting another  
 prison and the greater aggregate expense  
 of its maintenance from year to year.  
 The Mining Journal, however, is of the  
 opinion that the wisest thing to do  
 would be to permanently drop Mr.  
 Earle's plan as wholly theoretical and  
 involving a large risk to the state, and  
 to work out the prison labor problem on  
 wholly different, and more conservative  
 lines.

**FRICITION IN MANCHURIA.**  
 More Trouble Reported Between Chinese  
 and the Japanese Traders.

Washington, May 10.—Further con-  
 firmation of the friction between the  
 Chinese people and Japanese merchants  
 reaches the department of state in an  
 official report from Willard D. Straight,  
 the consul general at Moulken. Appar-  
 ently the Chinese do not like the busi-  
 ness methods introduced by the Japanese  
 merchants into Manchuria, and this dis-  
 satisfaction presents an excellent oppor-  
 tunity for the strengthening of Ameri-  
 can commercial relations with that prov-  
 ince. "At the present time," writes Mr.  
 Straight, "there is widespread dissatis-  
 faction among the Chinese not only with  
 Japanese business methods, but with the  
 quality of Japanese goods. Their cot-  
 tons which are heavily sized do not wash  
 or dye well; their miscellaneous articles  
 are shoddy, but they are cheap, and  
 sales are consequently large because of  
 the scarcity among the people of ready  
 money and the market for American  
 piece goods has been poor. The Japa-  
 nese, however, are determined to improve  
 the quality of their goods and in the  
 meantime they are strengthening their  
 Chinese connections, a task which is  
 made the more easy by the lack of for-  
 eign competition. A great deal has been  
 said about the Japanese control of the  
 Manchurian market. Certain privileges  
 were acquired during the war,  
 but I believe that should they ultimately  
 secure such a control, as has been de-  
 scribed, it will not be because they have  
 benefited by preferential treatment, but  
 because foreign firms have not been will-  
 ing to adopt the aggressive tactics  
 which alone will secure success in this  
 field."

**WONDERFUL ECZEMA CURE.**  
 "Our little boy had eczema for five  
 years," writes N. A. Adams, Henrietta,  
 Pa. "Two of our home doctors said the  
 case was hopeless, his lungs being af-  
 fected. We then employed other doc-  
 tors, but no benefit resulted. By chance  
 we read about Electric Bitters; bought  
 a bottle and soon noticed improvement.  
 We continued this medicine until sev-  
 eral bottles were used, when our boy was  
 completely cured." Best of all blood  
 medicines and body building health ton-  
 ics. Guaranteed at The Stafford Drug  
 Co. 50c.

**PIRATING FOLEY'S HONEY AND  
 TAR.**  
 Foley & Co., Chicago, originated Honey  
 and Tar as a throat and lung remedy,  
 and on account of the great merit and  
 popularity of Foley's Honey and Tar  
 many imitations are offered for the  
 genuine. These worthless imitations  
 have similar sounding names. Beware  
 of them. The genuine Foley's Honey and  
 Tar is in a yellow package. Ask for it  
 and refuse and substitute. It is the best  
 remedy for coughs and colds. The Staf-  
 ford Drug Co.

Kidney complaint kills more people  
 than any other disease. This is due to  
 the disease being so insidious that it  
 gets a good hold on the system before  
 it is recognized. Foley's Kidney Cure  
 will prevent the development of fatal  
 disease if taken in time.

**JUMPHREYS'**

# Copper Country

### FIRST GAME OF BASEBALL.

Houghton Giants and Hurontown Will Engage Tomorrow.

The Houghton Giants, aspirants to the championship of the Northern-Copper Country Baseball league, and the Hurontown team, aspirants for the semi-professional championship of the upper peninsula, will play a little ball tomorrow at Ripley Park. At least that was the arrangement yesterday. But arrangements are not safe things to bet on, as is shown by the experience of Manager Taylor with the Medicine Hat team. Medicine Hat long ago engaged a game with the Houghtons for tomorrow, May 12. The people of Portage lake have been looking forward longingly toward the visit of the team from the town where the weather comes from, and at the last minute Medicine Hat fell down and refused to play.

This being the case, Manager Taylor seeks a game with the Hurontowns. He was fairly certain yesterday that they would play. If they do, the fans will see again those retired veterans of a thousand games, Brand Muttter, Kaiser and Roche, who will play a little ball this summer with the Hurontowns for the love of the game. Manager Taylor will put forward a strong line-up against this bunch, and the game should be a pretty showing of spring baseball, if it is played.

Manager Mullane of Calumet, now working out his Aristocrats at St. Paul, writes that he has trimmed down his list and has completed his team for the season. The only change of interest to copper country people is the coming of Kurlke, the Jewish little catcher, who caught for Lake Linden the past two seasons. Mullane did not find his goods in the catching department up to sample.

The baseball season of the Northern-Copper Country baseball league opens next Thursday, May 16, with Calumet at Winnipeg and Houghton at Duluth. The Mining Journal has no data as to the comparative strengths of the teams. It is too early and too cold to know much about baseball in these latitudes. The copper country will not see any league ball until May 30. It may be warmer then and a guess may be hazarded with good grace.

### TEMPLES WILL ATTEND CHURCH.

Montrose commandery, Knights Templar of Calumet, will attend divine services tomorrow afternoon at 3:30 at Grace M. E. church, Houghton. Rev. Walter R. Fruit, pastor of that church and prelate of the commandery, will deliver a special sermon. The Templars will leave Calumet in a special car at 2 o'clock, being joined in Houghton by the members from that place and Hancock. Following the service the commandery will take luncheon at the Douglas House. This service on Ascension Sunday is an annual one for the Templars.

### ARTHUR SAAM BOUND OVER.

There is a temptation to quote from Strickland W. Gillilan's poem on "Finnegan" in recounting the experience of Arthur Saam of Hancock yesterday. It will be recalled that Finnegan, in relating the experience of a deformed train on a road of which he was section foreman, "wifl again, on again, gone again, Finnegan." But it is heartless to touch upon this levity in this case.

Arthur Saam was arrested something more than two months ago on a charge of larceny or receiving stolen goods, as a member of the Adams gang, at that time somewhat celebrated but now inactive owing to the restraining influences of certain stone walls and steel cages. Saam was sentenced to sixty days in the county jail by Justice Oliver. He served his sentence, and yesterday was a free man again. But his freedom was fleeting. As he emerged from the jail Sheriff Beck re-arrested him on a charge of breaking the Laborers Commercial company's store of Hancock. He was taken before Justice Oliver and bound over to the circuit court on the charge being remanded to jail in default of bonds.

This is the second of the Adams gang to have this experience. The first was company's store of Hancock. He was burglar and bound over. Saam was the second. There is yet a third who is serving a sentence on the first arrest and he will be re-arrested as soon as he emerges, the charge being also burglary. The alleged burglaries took place last November.

### Calumet Infanticide Case.

Search for the woman suspected of murdering her newly born babe in Tamara Park, Calumet, last Monday morning, is still fruitless. The suspected woman has disappeared and up to yesterday afternoon Sheriff Beck had not located her.

### ODD FELLOWS DEPART.

Grand Encampment at Calumet Came to End Thursday Night.

The grand encampment of Odd Fellows at Calumet is a thing of the past. Thursday was spent in sightseeing in various portions of the copper country, and many of the delegates took advantage of the opportunity to visit most of the towns. They Houghton and Hancock, where they were treated to a grand ball and regalia in greater profusion than has been their lot to see in years. The chevaliers of the Patriarchs Militant, the military rank of the Odd Fellows, wear about the most gorgeous uniforms which has ever been seen in the district.

All of the visiting Odd Fellows had left the copper country yesterday. They all expressed themselves as more than pleased with the reception and entertainment accorded them. The visit of the Odd Fellows will serve to make this region better known in lower Michigan, where the copper country is considered as being a pretty remote wilderness by many people. The visitors say here prosperous cities, modern in every way, and that the fact that their grand encampment meeting every past grand patriarch of the grand encampment was present. It is not recalled that this has ever been the case, at least not since the past grand patriarch at all numerous. The distinguished Odd Fellows were A. H. Harshaw, Delray, E. J. Johnson of Luther, John B. Penfield of Yelkburg, Frank Shepard of Sley, Robert Donovan of Charlotte, N. A. Metz of Hancock, W. I. Slater of Kalamazoo, C. O. Swayze of Flint, T. E. Robinson of Detroit, and E. Jordan of Detroit and W. S. Bogart of Alma.

### NEW COUNCIL ORGANIZING.

Calumet-Knights of Columbus to Draw Away from Hancock.

Announcement was made yesterday in Knights of Columbus circles that the members of the order in Calumet had practically completed the organization of a new council, and that possibly on May 20 an installation would be performed. The date is unsettled on account of the difficulty in securing State Deputy Carmody of Grand Rapids and the state degree team which must be present to initiate the candidates.

The Knights of Columbus have now but one council in the copper country, that of Hancock. The membership of this includes the leading professional and business men of the Catholic faith in the country, and it is a flourishing organization. A great many of the members come from Calumet and they have lately decided that they should have a council of their own. This decision has now taken form in action and there is at present waiting a class of fifty-four candidates. They will meet next Wednesday to elect officers, and at that time the time of the initiation will be definitely made known, though May 26 is now practically settled as the date.

The Knights of Columbus constitute the leading Catholic organization of the United States and Canada, and it has a large membership, which is constantly growing. The organization of a new council is an event of more than local interest, as it draws members from all over the state in which it is held, as well as adjoining states.

### MEMORIAL DAY MEETING.

The meeting of the military orders of Houghton and Hancock at Germania Hall tomorrow will be held in the afternoon in the new \$50,000 building. Following the transaction of the business there was a social session in which gymnastic turns and musical numbers were featured.

### MORE NEWS FROM THE NEW ENGLAND STATES.

If any one has any doubt as to the virtue of Foley's Kidney Cure, they need only refer to Mr. Alvin H. Simpson, of Williamsport, Conn., who, after almost losing hope of recovery, on account of the failure of so many remedies, finally tried Foley's Kidney Cure, which he says was "just the thing" for him, as four bottles cured him completely. He is now entirely well and free from all the suffering incident to renal kidney trouble. The Stafford Drug Co.

An absolutely pure, cream of tartar powder.

ROYAL BAKING POWDER CO., NEW YORK.

### NEW HANCOCK CITY OFFICIALS.

City Attorney and Chief of Police in Action Early.

City Attorney Lawton and Chief of Police Andrew, appointed to their positions by Mayor Scott of Hancock last Monday night, got into action early. Their first important case in conjunction was one involving the right of a property owner to move his house out onto the street line. The city attorney learned of the intention to move the building, and he started injunction proceedings, instructing the chief of police meanwhile to remain on guard.

The street in question is Tecumseh, which is one of the hill thoroughfares. From Quincy street south to the river it approaches the perpendicular in a manner which has been the bane of engineers and councils when the question of establishing street and sidewalk grades has been up. The grade question was settled a few years ago, and the sidewalk constructed on the west side of the street is a wonder. It has several slants various widths, is cut into steps and in various ways is peculiar to itself.

The owner of the property in question found that his building was pretty far back from the sidewalk line, and he had left narrow at that point to permit an entrance to the building, which was below the street grade. The intention was that the house should be raised to grade and then the sidewalk widened to meet it. Instead of this the property owner decided to move the house forward, when he would actually be occupying a portion of the street and his building would protrude some feet further than those of his neighbors.

### SENATOR SMITH, BOOMER.

Copper Country Man Comes Out for Early for Governor.

This dispatch from Lansing, concerning Senator Charles Smith of Hubbard, will be of interest to copper country people.

"The honor of State Highway Commissioner Horatio S. Earle for governor was officially launched in the senate last week by the Italian lobbyist. A deal was up to appropriate \$200,000 for a new state prison at Keweenaw point, which is at the extreme northern end of the upper peninsula, where convicts can be used to break stone to be used in building roads everywhere in the state. The deal is strongly opposed by Governor Warner, but it is a bill that was introduced by Senator Smith at the Commissioner Earle's request. Senator Smith does not care anything particular for the road, but he is a friend of the senator who knows that Earle wants the Keweenaw point prison bill passed and that the governor wants the bill passed for a binder time plant at Jackson to cost \$200,000 or so. It is out of the question for both bills to pass. Accordingly, Senator Smith, who is chairman of the committee on appropriations, reported out the Keweenaw point prison bill.

"When the bill came up this afternoon, Senator Smith, who is sixty-eight years old and a Civil war veteran, got up to speak. He said in a sarcastic tone that the thirty-two senators being all members of the same political party, should stop their dickering and stand by the governor. They should vote for the pending bill, which was the bill introduced by the next governor. In his opinion, would be Commissioner Earle, and the thing for all good Republicans to do was to get into Earle's band wagon right away. Senator Smith's talk caught even some members who are friends of the governor, and the bill was passed."

### ANNUAL Y. M. C. A. MEETING.

The annual meeting of the Young Men's Christian association of Calumet was held last night. It was considered one of the most important in the history of the association, as it marked the entrance of the year in which it is to be held in the new \$50,000 building. There was a social session in which gymnastic turns and musical numbers were featured.

### MEMORIAL DAY MEETING.

The meeting of the military orders of Houghton and Hancock at Germania Hall tomorrow will be held in the afternoon in the new \$50,000 building. Following the transaction of the business there was a social session in which gymnastic turns and musical numbers were featured.

### DON'T PAY ALMONY

There will be no occasion for it if you keep your bowels regular with Dr. King's New Life Pills. Their action is so gentle that the appendix never has a chance to make the least complaint. Guaranteed by The Stafford Drug Co. 25c. Try them.

### FAMILY WITH SMALL POX.

Williams Family of Centennial Unfortunately—Pretty Girl Heroine.

Rev. Father Alban, assistant pastor of the Sacred Heart Catholic church of Calumet, was released from the isolation hospital yesterday as cured. He had been in the institution as a small pox patient for several weeks. Father Alban contracted the disease while administering to patients in Keweenaw county. He reports that there are now six persons in the isolation hospital, three with small pox and three without.

The sufferers are Mrs. Williams, Miss Myrtle Williams, a teacher, and an infant child of Bert Williams, all of Calumet. With these people as nurses are Miss Lily Williams, who is attending the sister, Miss Myrtle Williams, and the parents of the infant. These three are voluntarily members of the hospital population, risking the disease to care for their relatives. Miss Lily Williams is a remarkably pretty girl, which makes her act all the more heroic.

### FRATERNAL REUNIONS.

The Odd Fellows' gathering at Calumet this week was one of the largest ever held in the copper country, but it will be recalled that the annual convention of the Sons of St. George will be held in Calumet in October. It will bring delegates from all over the country, this English order having a large membership in every state in the Union. The upper peninsula reunion and the meeting of the grand lodge of the Knights of Pythias, to be held in Hancock early in June, will also be a large gathering.

The copper country Pythians expect to make the reunion the biggest event of the year. There is to be an important religious convention in Calumet in June also, the convention of the Methodist Episcopal clergymen of the Houghton district, of which Rev. James Pascoe of Hancock is the pastor. This convention will be held June 1 and 2, and an interesting program has been prepared for the two days.

July 6 and 7 the Italian residents of Calumet will celebrate the one hundredth anniversary of Giuseppe Garibaldi, the Italian liberator. This will be one of the big conventions of the year, as it will interest all Italians in the upper peninsula. The dates are on Saturday and Sunday. On the first day there will be a big picnic and the Italian festival of Sunday, a banquet and an evening concert. Attorney Patrick H. O'Brien of Laurium has been invited to act as orator at the celebration, and he has consented.

### COPPERDOM BREVITIES.

O. J. Larson of Calumet has returned from a business trip to Duluth.

Superintendent John A. Doelle of the Houghton public schools is convalescent after a short but severe illness.

Rev. Mr. Eldredge, pastor of the Peewee M. E. church, and Rev. E. B. Houghton, pastor of the M. E. church at Houghton, will exchange pulpits tomorrow evening.

J. J. Dube of Houghton has given up the Portage Lake agency of the Booth line of steamers. His successor has not as yet been named.

The copper country military companies have been advised that the next state encampment of the M. N. G. will be held at Lansing on the ten-day steed ending Aug. 1.

Columbia Temple of Honor will hold its next meeting at Hancock tonight. The membership is largely confined to residents of Quincy Hill, and after tonight the meetings will be held at Quincy.

The commencement exercises of the graduating class of the Sacred Heart high school of Calumet will be held June 10 in the parish hall. The class day exercises will occur in the same hall June 17.

The Hancock lodge of Elks will entertain with a dance in Germania Hall, Hancock, the night of May 22. On the following night the Hancock society of Eagles will give a similar function.

The Rockland township board, at its meeting this week, decided to take advantage of legislative permission and construct a water works system. A committee was appointed to select a site for the pumping station.

The case of Alex. Colombe, arrested in Duluth on a charge of non-support, was concluded in Justice Brandt's court in Houghton yesterday afternoon. He was held for trial in the circuit court and bound over under \$1,000 bail.

At the Kerrospe theater, Hancock, tonight the "Tenderfoot" will be presented. The same production will be seen Monday night in Calumet. Ruth White and Oscar Egan, who present the musical comedy here, are old favorites in the copper country.

Spears, the Minneapolis billiard expert, who has been giving exhibitions in Houghton and Hancock, will be seen at the M. C. M. gymnasium Thursday night with Roy Thoenen, the student champion, as his opponent. He will play at the Hancock Elks' temple Monday afternoon.

## Mining News.

OF NO COMMERCIAL VALUE.  
Production of Artificial Copper Has Only Academic Interest.

The announcement of President Ira Rensen, of Johns Hopkins University, who recently delivered the commencement address at the Michigan College of Mines, that Sir William Ramsay, the famous chemist of Cambridge University, has discovered a method of making artificial copper, and that the discovery will be made known to science when Sir William will read a paper on the subject before the Royal Chemical Society of Great Britain, has caused an appreciation in the Lake Superior copper region that the mines will be forced out of business.

The substance of Sir William's reported experiments is the segregation of one element from another and the production of copper by the synthetic or combining process from the elements sodium, lithium and potassium. A combination of these elements, when treated with radium vapor, gives as a product copper sulphate which is readily "broken down" into copper.

However, the chemical production of copper has only an academic interest. While, if true, it marks a most extraordinary development of science, it is one of the things that boom lig for the moment and then disappear so far as commerce is concerned. The discovery has about the same relation to the red metal industry as the discovery some years ago that diamonds could be made chemically. At least it is yet to be chronicled that the chemical production of diamonds has in any way affected the market for the synthetic or other products of the brilliant.

While Sir William's reported find will doubtless be of great scientific interest, it is of no commercial value, because the materials used would cost more than the natural metal. Sodium, lithium and potassium are very high priced chemicals, as is radium vapor, with which these elements are supposed to be treated. The result of such a combination might be the production of copper of great scientific value, as opening up an entirely new department in nature of untold possibilities, but of no immediate advantage to trade circles.

From a scientific standpoint, the discovery apparently at one puts the whole question of the ultimate nature of the elements on a different basis. It is true that the old idea has been as possible to get one element from another element has fallen to the ground since helium from radium has been discovered, but the passing of one element into another by the action of radium certainly is a new and most wonderful development. So far as the discovery is concerned, it is not clear if the proposition is to transmute these three elements, sodium, lithium and potassium, in combination into copper, or if each element individually and separately transforms into copper by the action of radium.

Copper is an entirely different class of elements from the other three. Sodium, lithium and potassium are much lighter and their chemical properties are quite different in many ways, but the three have properties that are quite analogous to one another. Alchemists tried to transmute the cheaper metals into better ones, especially into gold, but that was considered a perfect absurdity until in recent years helium was produced.

### CRITICISM FOR OSCEOLA.

The Quincy production and the Osceola production has practically been the same, together with the amount of rock mined and stamped. Therefore they make an ideal comparison as to cost especially from a stockholder's standpoint.

Quincy. In 1906 Quincy produced a little over 25,000,000 pounds of mineral. For the first quarter of 1907 its production was 6,000,000 pounds. The organization of the company in 1882 it has produced 372,477,987 pounds of copper and paid dividends amounting to \$16,470,000. The Quincy was organized in 1848 and reincorporated in 1878 for a term of thirty years, the charter expiring March 10, 1908. The first dividend was paid in 1862 and in every year since then except 1866-67, this making Quincy the oldest dividend-paying Lake Superior copper mine, the oldest American dividend payer among the copper mines, one of the oldest in the world and one of the very few American mining companies, of any sort, that has an unbroken dividend record for the past forty years.

The annual meeting of the Quincy will be held in New York on June 5, at which time the directors will be asked to authorize an increase in the number of directors. There are eight directors at present. The company's charter expires March 6, 1908, by limitation, and stockholders will also be asked to take action regarding the continuation of its corporate existence for a further term of years. Under the Michigan mining laws a mining company, organized in that state, can have a life of only thirty years, but the privilege of an extension for another like period is granted. The Quincy has already received one extension, and after 1908 the company will enter upon its third term of thirty years. By its latest declaration the Quincy will disburse to stockholders \$495,000, or at the rate of \$1,980,000 a year. On the first of the current year the company had a balance of \$1,200,000 and with copper at 25 cents, and the company producing at a rate in excess of 20,000,000 pounds a year, a substantial surplus will, undoubtedly, result at the end of the fiscal year.

### SHANNON.

Production for the Year Will Approximate Thirteen Million Pounds.

In spite of a bad month, February, in which the company produced only 500,000 pounds of copper, the Shannon has maintained its production well above 1,000,000 pounds and for the first third of the current year it has shown a total production of 4,235,000 pounds of copper, which is 842,000 pounds more than produced during the corresponding period the preceding year. On the present basis of operation the Shannon will produce for the year 12,532,000 pounds. By the middle of the present month the company will be in a position to make about 1,800,000 pounds per month through the blowing in of the new furnace in the smelter, which is now in the last stages of completion. Part of the new capacity will be given over to custom ores, but this tonnage is chiefly of sulphides which are useful in the smelting operations of the company. The sulphides from the Arizona Commercial will also be shipped to Shannon in the very near future. It has been stated that Shannon costs have been running exceptionally high, but the company is still in the development stage, and there are many

### COPPER RANGE.

The Triniton is expected to develop a dividend at any time now that the debt has been cleaned up through the settlement with Burages. The Copper Range Consolidated has during the past two months been earning at the rate of \$14 per share per annum. An official of the company states that it is the policy of the management to place the affairs of the company in such a condition that irrespective of the price of copper, stockholders will be able to receive a dividend on their holdings. The present year with its prosperous conditions in the copper industry is a most propitious time for putting the company in good condition to meet less favorable conditions. As regards dividends, stockholders will receive extra dividends when the price of copper is high, and when it declines, the extras will be dropped, but the dividend will never be passed, as Copper Range has entered the dividend list to stay.

For the months of March and April, the net profits of the Copper Range Consolidated, exclusive of the Copper Range railroad earnings and the Burage payment of the Triniton debt, have been at the rate of \$14 a share per annum. In 1906 the company showed net earnings after all construction of \$7.38 a share on its 384,135 shares of stock. The earnings of the Baltic also for the past two months have been at the rate of \$3,000,000 per annum, a sum nearly equal to the entire 8 per cent per annum dividends now being paid on Copper Range Consolidated stock. In 1906 Baltic paid \$14 a share in dividends to the Copper Range company, or \$1,395,225 on its ownership of 99,529 shares of Baltic stock. At the rate at which the Clumpion has been paying dividends thus far this year, the Copper Range should receive this year from its half ownership in that property at least \$200,000, or \$18 a share on its 30,000 shares. In 1906 the Baltic paid to the Copper Range \$600,000 in dividends, or \$12 per share.

When one of our most reliable drug-gists makes a positive statement that he will guarantee to cure the liquor habit if urine is used in accordance with directions or refund the money it shows his great faith in the treatment. It is in this way that Urine is sold by the leading druggist in nearly every city and town. In every box is a registered guarantee which entitles you to a refund of your money if Urine fails to effect a cure.

No other cure for the liquor habit has been sold in this way and the remarkable guarantee shows how far superior Urine is to the ordinary sanatorium of home treatment. There is no detention from work or loss of time when Urine is used. It destroys the desire for liquor, so that the drink is not missed also cures the deranged stomach, weakened nerves and other ill effects of excessive drinking restoring the patient to perfect health.

Urine is prepared in two forms, No. 1, the secret remedy which can be used in food or drink without the knowledge of the patient; No. 2 for those who take the remedy of their own free will. Both forms are guaranteed. A registered guarantee in every box.

Treatise on how to cure drunkenness free on request. Urine, St. Paul, Wash. D. C. "Urine" and the cost of the complete cure less than one-tenth what it is usually charged at sanatoriums, with a guarantee that the expense will be nothing unless a cure is gained. Mail orders filled.

Urine is for sale by The Stafford Drug Co.

Let me mail you free, to prove merit, samples of my Dr. Shoop's Restorative, and my book on either Dyspepsia, The Heart, or the Kidneys. Address me, Dr. Shoop, Racine, Wis. Troubles of the Stomach, Heart or Kidneys, are merely symptoms of a deep ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment, and not the cause. Weak Stomach nerves—the inside nerve—means Stomach troubles, about 90% of the Heart and Kidneys as well, have their controlling or inside nerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy even claims to treat the "inside nerves." Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write for my free book now. Dr. Shoop's Restorative sold by The Stafford Drug Co.

Orino Laxative Fruit Syrup is best for women and children. Its mild action and pleasant taste makes it preferable to violent purgatives, such as pills, tablets, etc. Get the booklet and a sample of Orino at The Stafford Drug Co.

### MICHIGAN.

The Michigan's new stamp mill is expected to be in operation by Oct. 1, with a compound head capable of treating from 650 to 750 tons of rock daily. The cost of production per pound will be materially lowered as the mill will be operated by electricity. The management is bending its energies for the most part on "C" shaft, and results from this quarter during the current year are expected to be good, with rock running better than was the case last year. Taking into consideration the mass rock, Michigan obtained about twenty pounds of the ton.

Davis-Daly. Davis-Daly has not yet resumed work in the crescent south of the 1800 foot station of the Original, but expects to do so as soon as the flow of water can be handled. The water is diminishing. Not having gone farther than to tap the vein, nothing is known as to the width of its content. The shaft on the Colorado at Davis-Daly property, is \$30 foot deep and the company is cutting a station at the 800. It will install a steam pump at that point and then sink to the 1,000, where it will install an

### BUTTE-BALLAKLAVA COPPER CO.

(Incorporated under the Laws of Arizona.)

**City Brevities**

Today's weather: Fair and warmer. Yesterday's temperatures: Seven a. m., 32 degrees; noon, 34; 7 p. m., 33. Maximum, 36 degrees; minimum, 32.

J. F. Follis, of South Haven, is here on business.

C. H. Connor, of St. Ignace, is a Marquette visitor.

George Cox, of Negaunee, was a business visitor here yesterday.

E. Dagstrom, of Ishpeming, spent yesterday in the city.

R. P. Bronson of Ishpeming was a Marquette visitor yesterday.

Miss Jessie McMillan, of McMillan, Wis., is the guest of friends in the city.

The Ideal orchestra will give its usual Saturday night hop at Fraternity Hall.

A social hop will be held at Legion Hall this evening. Professor Kluge will furnish the music.

James Russell went to the copper country yesterday morning on a business mission.

The ladies of the Baptist congregation will conduct a pantry sale at the church this afternoon between the hours of one and five.

The Methodist Ladies' Aid society will hold a pantry sale of home-made bread, cakes, cookies and doughnuts this afternoon from 2 to 5 o'clock in the parlors of the church.

Professor Kluge and students, assisted by the Kluge orchestra, will give a musical at Fraternity Hall Thursday evening, May 16. The selections will embrace a wide range of popular and classical music.

Rev. W. R. Coventry, of the Theological seminary at Omaha, left last evening for Gould City, Mackinac county, to take charge of the Presbyterian mission there for the summer. He spent a week or more with relatives here.

Car Repairers Organize—At a meeting of the car repairers employed in the shops in this city, held at the Brunswick Hotel last night, a union was organized by James T. Foster, of the Soo, a representative of the national organization of that branch of railroad labor. It was reported last evening that the men would shortly ask an increase in pay to \$2 a day; the rate now paid is \$1.80.

Appropriation Would Be Legal—Though no appropriation has as yet been asked for the proper observance of Memorial day, an appropriation of not to exceed \$150 could be made by the council under a law passed two years ago. The G. A. R. posts of Escanaba and Menominee have taken advantage of this statute and their petitions to the council at the two cities have resulted in the allowance of the full amount.

Driven Back by High Sea—The crew of the Standard Rock light station made an attempt to reach their post yesterday morning, leaving the city at 3 o'clock in Captain Parker's fish tug, the Ethel J. Shortly after leaving the harbor the sea became so heavy that the boat was compelled to go back. The crew took charge of the station last year on April 18. Another attempt will be made Sunday or Monday morning.

"House Night" at the Club—There was a large attendance at the Marquette club's "house night" last evening. A pleasing feature was a musical program given by the club members, and Professor Kluge rendering various numbers that were appreciatively received. A tasty luncheon was served. The members made liberal response to the invitation to present stunts to the club, some twenty of thirty handsome specimens of the netter's art being given. The stunts will be used for decorative purposes.

Rev. Rutledge to Speak—The Rev. C. H. Rutledge, of Ishpeming, representative of the anti-saloon league for the district of upper Michigan, will speak at both the morning and evening services at the Baptist church tomorrow, on the objects of the league and the work it has accomplished. Mr. Rutledge has presented his work with a strenuousness that has won for him no little notoriety and resulted in his being nearly mobbed on several occasions.

Captain Ross Is Discharged—The case against Captain Duncan C. Ross, charged with having wilfully and maliciously destroyed a table at Legion Hall Tuesday evening, was dismissed by Justice Byrne yesterday morning. Captain Ross with his attorney, John L. Heffernan, appeared promptly at 10, the hour to which an adjournment had been taken from the previous day on request of William S. Hill, representing the complainant, John G. Koepf. After a wait of half an hour Justice Byrne discharged the defendant, Mr. Hill having failed to put in an appearance.

Marquette and Rivals to Meet—The Marquette and Rivals will clash on the fair ground diamond tomorrow afternoon. Both teams have taken advantage of the past few days of good weather to get in quite a little practice and should put up a fast and interesting struggle. The game will be called promptly at 2:20 o'clock. Ladies will be admitted free. The street cars will run to the grounds. The Marquette will line up as follows: Lefebvre, catcher; Scholten, pitcher; Messier, shortstop; Rydholm, first base; Gilbert, second base; Cause, third base; Jansen, right field; Scanlon, center field; Hopelle, left field.

Track Is in Good Condition—A number of Marquette horsemen went out to the fair grounds yesterday morning and looked over the track. They found it in excellent condition, and were of the opinion that a little work would put it in excellent order for racing. The track here has the same bottom as that at Independence, Iowa, where the first kite string race was contested. It does not take up water so readily as those which have no clay in their composition, but is unusually fast under proper weather conditions. Clay has certain advantages. It does not powder quickly in hot weather. The absence of dust on the Marquette track has always added greatly to the pleasure of the spectators.

Want Incandescents Strung—J. E. Sherman, chairman of the light and power commission, was approached by several citizens yesterday relative to the stringing of incandescents lights on Front and Washington streets. The lights were put up last year just prior to July 4 and were not taken down until late in the fall. Mr. Sherman said that the board would doubtless be willing to be governed by public sentiment in the matter and would have the lights erected in deference to any organized

demand on the part of the public. In speaking of the matter yesterday Postmaster Mangum said: "Many cities in Wisconsin and the upper peninsula have had their streets lighted with incandescents for several seasons past. I think that it is a good evidence of enterprise and a good advertisement of a municipality. There seems to be a widespread sentiment in favor of having the lights here strung early this year. As they are to be left up until fall I do not see why it should be necessary to wait until July before erecting them."

A Poor Type of Citizen—In his talk to the confirmation class at St. Paul's cathedral, Thursday night, Bishop Williams said that on the evening previous he had narrowly escaped being struck by a lad riding a bicycle on the sidewalk on Ridge street. The bishop said that when he asked the boy why he had not taken the road the lad had replied that he was not the only one to use the sidewalk. "Do you know life," he said, "the law?" the bishop had replied, "There are others," the boy had replied. In his address the bishop used the incident to illustrate the tendency of youths of the present day to justify the breaking of law where statutes can be violated with impunity. It was a poor spirit, the bishop said, to cultivate early in life. The best interests of society demanded that the laws should be observed because they had been drawn to protect the public, and not because punishment would follow for their violation. The man who went through life, he said, restrained solely by his fears from becoming a criminal, was a poor type of citizen.

Though the park, cemetery and street commission has not held a formal meeting since Tuesday evening decisions have been reached in several matters of importance that will be recorded at the session Tuesday. Owing to the indisposition of President Shea, the commission confined its proposed tour of the streets, parks and cemeteries Wednesday to a visit to the Park cemetery. Every part of the cemetery was thoroughly examined and it was decided to make a number of improvements that will greatly add to the beauty of the spot. At the entrance to the grounds is a strip of land that is swampy and covered with water for a good period of the year. This it was decided to fill in. The sweepings of the streets are already being dumped there, and it is estimated that it can be brought up to the grade at an expenditure of about \$700.

**WILL BEAUTIFY PARK CEMETERY**

SWAMPY SPOT WILL BE FILLED, TIMBER CUT AWAY, GRADES ESTABLISHED AND COMPLETE MAP MADE BY CITY ENGINEER.

A plat toward the northern extremity of the grounds is covered with pine, hemlock and spruce. This will be cleared and graded. The timber will probably be sold standing, and will be put on the market in the near future. It contains about five acres of timber of a fairly good type. A section of several acres that was planted a year ago, but which was not thoroughly graded, will be completely graded. Subsequent to its visit to the cemetery the commission decided that a large map of the cemetery should be made and instructed George P. Cummings to prepare one as soon as possible. Mr. Cummings has already taken the matter up. There are a number of sectional maps of the grounds, but no complete one. The commission found the drives in very good condition and the graves well looked after. There was still considerable snow in some places, but in the clear spots the grass appeared to be coming on nicely. An inspection of the streets and parks will be made shortly.

**300 CANAL PASSAGES.**

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., May 10.—[Special.]—The upbound boats passing the canals the last twenty-four hours were the following: Bunsen, Maida, William Brown, 9 p. m.; Burnham, 9:30; Maruba, Pollock, 1:30; Fulton, Fritz, midnight; Lambert, 1:20 a. m.; Saxon and Whelan, 2; Shaughnessy, Wright, McDougal, Krupp, 3:30; Amasa Stone, 4:30; Coralia, Marsala, Spaulding, 5; Bachawanna, Barlow, 6; Snyder, Widner, 6:30; Dunham, 8; Peter White, Joshua, Rhodes, 8:40; Butler, 10; Paris, 11; William Kerr, Briton, 11:30; Ogilby, 12:30 p. m.; Queen City, Corliss, Reis, 1:30; Marina, 2:40; William Mathers, 3:20; Bessemer, 4:20; Manila, Colgate, James Davidson, 5; Shealde, 5:30; Eads, Marina, Rockefeller, 7; Empire City, 7:40; Superior City, Nasmith, 8:20.

**Marquette Port List.**

D., S. S. & A. docks: Cleared—Yuma, Cleveland. The Warner is loading still, frozen ore having caused trouble, and the Warriner and Thompson, loaded, are awaiting their steamers. Boats due last night were the Maruba, Marcia, Marina and Briton.

L. S. & L. dock: Arrived—Portage (for pig iron). Loading—Presque Isle. Due this morning—Mather.

The Cadillac, Chattanooga and Bend are at Pickands' coal dock, and the Miztee and Aztec at Spear's.

Press Dispatch: Four sons at once, St. Paul, Oct. 5th, 1906. A special from Mondovi says, "Mrs. Jno. Silverman gave birth to four boys." She is evidently a great friend of Holt's Rocky Mountain Tea. 35 cents, Tea or Tablets. The Stafford Drug Co.

**CARD OF THANKS.**

I desire through the columns of The Mining Journal to thank my many kind friends for the sympathy and kindness shown me at the death of my darling boy. Especially do I thank the Brotherhood of Firemen and lady firemen for the beautiful floral tributes. Also to all kind friends and neighbors I extend my gratitude.

### SAYS BURNS IS A GOOD MAN.

John Morrison, Who Knows the Fighter, Ranks Him High.

John Morrison, of Houghton, who spent yesterday here, knows Tommy Burns well and is inclined to take issue with those who still characterize the former copper country man as a third rater. "I don't see why this man Burns shouldn't be considered the best heavyweight before the public today," said Mr. Morrison. "He has whipped Marvin Hart and Jack O'Brien, and they were both pretty good men. I don't say that he could whip Jeffries, but at the risk of being laughed at I will say that he would have a chance. Great trainers have always contended that a man weighing 180 pounds was big enough to whip anything in the world. Anything above that weight has always been rated a handicap. Of course it will be argued that Jeffries were down Fitzsimmons

twice through sheer beef and brawn. Now let me tell you that when Jeffries met Fitzsimmons even the first time at Madison Square Garden, New York, the latter was a man far past his athletic prime and carrying a great deal of adipose tissue. Jeffries at his best weighed about 220 pounds. Fitzsimmons at his best weighed about 160. This would give Jeffries sixty pounds leeway in weight. Now had Fitzsimmons at his best weighed 180 pounds, he could have whipped Jeffries right off the reel any day. Fitzsimmons was just about twenty pounds too light to meet giants. Pound for pound he was away sight better than Jeffries. Burns has got just the weight that Fitzsimmons lacks. He weighs 180 pounds, and has a reach as long as Jeffries. He may not have the same class as the big fellow, but he isn't to be counted out on the matter of weight."

Store your heater with Kelly Hardware Company. (4-18-1f)

### Not a drop of Alcohol

Doctors prescribe very little, if any, alcohol these days. They prefer strong tonics and alteratives. This is all in keeping with modern medical science. It explains why Ayer's Sarsaparilla is now made entirely free from alcohol. Ask your doctor. We have no secrets! We publish F. C. Ayer Co., the formula of all our preparations. Lowell, Mass.

### THINKS WELL OF KIMBERLY.

J. H. Wilson, of the Native Copper Times, Has Visited the Mines.

The letter printed below was written to Mr. Russell by Mr. Wilson, editor of the Native Copper Times, while the latter gentleman was at Chicago, on his way home from a visit to the Kimberly-Willey properties at Kokomo, Colorado: Chicago, May 8, 1907.

Mr. Jas. Russell, Marquette, Mich. Dear Mr. Russell:—Returned to Chicago last evening from a visit to the Kimberly-Willey properties at Kokomo, Colorado. I spent two days going through and examining the tunnels and inclines and in looking over the concentrating plant, now approaching completion, and was more than surprised at the extent and magnitude of the ore bodies in sight. I feel that starting your new mill is all that is now necessary to make the mine a good money-maker. The ore is soft and easily mined and milled, and is exceedingly rich in zinc, lead, iron, gold and silver, all of which is saved and made marketable by the use of the new Willey roaster.

Mr. Willey, maker of the table bearing his name, and which is in extensive use in our Michigan copper mines, stated to me that the properties would pay if worked for the zinc alone, or if worked for the gold and silver alone, and with all the mineral contents of the ore saved and put in commercial shape the Kimberly-Willey mines must yield handsome returns for their shareholders. The ore is there, for I have seen it and know whereof I speak, and there is no longer any question of its successful treatment.

I close by congratulating you as president, and all others interested, on the assured future of the property. Truly yours, J. H. WILSON.

F. R. Field, of Marquette, was also a member of the party with which Mr. Wilson visited the properties, and arrived home yesterday. Mr. Field has a considerable block of stock in the mines, and professes himself as much pleased with what he saw. There is an opened up, and the new mill is being built along substantial and correct lines.

Constipation steals the iron which should be absorbed away from the bowels, spoils your blood and complexion, causes anemia and disease. Regulate your bowels with Hollister's Rocky Mountain Tea and keep well. 35 cents, Tea or Tablets. The Stafford Drug Co.

### STATE OF MICHIGAN.

#### COUNTY OF MARQUETTE—ss.

Notice is hereby given, that by an order of the Probate Court for the County of Marquette, made on the 10th day of May, A. D. 1907, four months from that date were allowed for creditors to present their claims against the estate of Mary A. Gottstein, late of said County, deceased, and that all creditors of said deceased are required to present their claims to said Probate Court, at the Probate Office, in the City of Marquette, for examination and allowance, on or before the 11th day of September next, and that such claims will be heard before said Court, on Wednesday the 11th day of September next, at ten o'clock in the forenoon.

Dated May 10th, A. D. 1907. W. T. POTTER, Judge of Probate. (5-11-4-Sat.)

### MERITS LARGE HOUSE.

"Susan in Search of a Husband" an Unusual Attraction.

"Susan in Search of a Husband," the attraction at the opera house this evening, is one of unusual merit, and one of a higher class than the Northern circuit is often favored with. The star, Miss Isabel Irving, is an artist of high repute in the best theatrical circles, and her support is made up of excellent players who do much of their acting on Broadway. The presentation of the clever comedy in which they are assembled is said to be well high perfect. Its appearance here tonight is one of those events which discriminating playgoers cannot afford to miss.

The story told by the play is an old one. The scenes are laid in a quaint old country inn, where the heroine, Susan Gambett, formerly a New York girl of some social pretensions, has come to occupy the post of chambermaid. She having fallen upon evil times and being compelled to earn her own living. She is in search of her husband, a young seaman to whom she was married seven years before and who disappeared immediately after the ceremony. At the inn she finds her bosom friend, Miss Penicook, an heiress, who is being pursued by an English lord. The heiress wishes to find out if the suitor loves her for herself or her money, and to this end she changes places with Susan, and takes the position of the chambermaid, while Susan becomes the heiress. The nobleman turns out to be the long lost husband of Susan, and owing to the change in characters is all at sea as to the identity of his wife, for whom he has been searching. The complications that grow out of this affair are further complicated by the appearance of another love affair between a young lawyer and the heiress, who seems to have a penchant for such mild flirtations. The lawyer also is unfortunately engaged to the elderly sister of the nobleman who is in pursuit of the heiress, and who is Susan's real husband, and it is the sudden unfortunate contretemps by which the misapprehending chambermaid is accused of theft of a number of silver spoons, and is later arrested that the whole affair into a still further tangle.

Susan has been, in her assumed character of the heiress, endeavoring to discover if her husband loves her, or is trying to forget that he has ever been married. She finds that he is becoming greatly interested in her as the heiress, and she wishes to find out if he loves her because he thinks she is the heiress, and if he will so far forget his young wife, whom he has not seen for seven years that he will propose marriage to the heiress. If he does, she has made up her mind to throw him over and try to forget him. If he does not, she is quite prepared to take him back. The husband, however, is under the belief that his wife is the chambermaid, and he is working quietly along this assumption, and it is then developed that he did not come in pursuit of the heiress at all, but really to study his wife at close range and discover if she could by any possibility be moulded into a fit companion for his altered fortunes. The whole mass of complications is finally cleared up by the real heiress who is unable to wait any longer in such a state of suspense and who reveals herself and hastily marries the lawyer.

"Let us have some Cudahy's Peacock Bacon and calves liver for supper Mama," say young and old. (11-27-eod)

### CHINESE MINISTER PROMOTED.

Popular Oriental Official Is Soon to Leave Washington.

Washington, May 10.—With the departure of the Chinese minister, Sir Cheungtung Liang-Cheng, for Peking, where he has been promoted to the position of junior vice president of the foreign office, Washington will lose not only one of the most distinguished and able diplomats who has ever carried a portfolio to the United States, but one of the most attractive of men. The promotion and transfer coming at this time, when the minister is still in mourning for his mother, is a very rare case, there having been but five or six instances in more than 400 years when an official in mourning has been promoted.

This action, which is a high compliment is due, it is said, to the valuable service Sir Cheungtung has rendered as minister. It is also understood that the transfer has been made by the orders of the empress as a step toward the development of the vast scheme to reform the Chinese administration, which has been framed by the various boards that have visited all the civilized countries of the world to learn the best ideas of government. Few men to say nothing of his countrymen, have the brilliant mind and fine education of Sir Cheungtung. He is a graduate of Andover and Yale, and, although he adheres with rigidity to his native customs, and many of his native customs, he is wonderfully modern and very American.

He is a devotee of baseball, and often attends the games. A good player himself, he is often the chief figure in a sportsman's picture, when playing, his skirts tucked up, with his two small boys and their little friends. Tennis, too, has been a great favorite with the minister, while he is also very much devoted to horseback riding and bicycling. These last two accomplishments are rather rare among Orientals, though nearly all the members of the legation possess wheels and ride particularly well. While he is enthusiastic about all athletic sports, Sir Cheungtung is also very much interested in gardening, and each spring and early summer takes particular interest in and derives much pleasure from the garden adjoining the legation. He is also very fond of the legation home, and under his personal supervision it has been attractively furnished after the Chinese custom. He is very fond of his possessions, which are of great value, and personally conducts visitors about the parlors showing them his treasures. His collections of carved ivory, old water-color sketches and embossed porcelains are particularly rare and valuable. Sir Cheungtung Liang-Cheng came to this city as the representative of his government on April 3, 1903. During his stay here he has made many friends and been much sought after socially. While all diplomats, of course, are the great attraction at any social function during the season, none was more heartily welcomed than the Chinese minister. He is fond of society, and knows well how to entertain.

His dinners, musicales, teas and luncheons, of which there have been a great many during his sojourn in Washington have been among the most brilliant of the social season. Each entertainment was given under his personal supervision and the arrangement of his dinner table always was one of picturesque and artistic charm. Tiny flowering plants, in the most exquisite vases, are his favorite attraction. Sir Cheungtung, too, was most punctilious in paying and returning

calls, and he himself held regular levees once a week on his days at home. The minister is devoted to his three motherless children. His daughter, Miss Mae Liang-Cheng, now nineteen years old, is pretty. She wears her native costume, would have made her debut into society this winter had it not been for the death of her grandmother in China, which put an end to all social affairs at the legation. Miss Mae, as soon as her period of mourning is over, in about two years, will be married to a young man, now a student at Amherst. According to Chinese custom, the parents of the young couple arranged the marriage when they were mere infants. She has a number of friends in Washington society, however, and takes great delight in the theater, the minister until this winter taking a box at every theater for every week of the season. The two small boys Arlu and Arli, are now at Amherst, where, it is understood, they will remain until they are old enough to go to Andover or Yale.

Sir Cheungtung is very fond of having his picture taken, and rather likes to distribute them among his friends. There is hardly a drawing-room in an official or diplomatic home in this city that does not boast a photograph of the minister, adorned with his signature in Chinese and in English. The departure of Sir Cheungtung from America is not only a source of regret to his many friends in this country, but to the students who, through his influence, the minister has kept with him in Washington as attaches of the legation. These young men regret deeply the fact that they must leave Washington, for, although supposed to be hard at work studying to fit themselves for political and diplomatic posts, these young fellows, like most students, have been getting all the pleasures out of life they possibly could. Washington seems to them a very nice place. But as it was the minister who brought them here as his proteges, he has to take them back to the Celestial Kingdom with him.

The title of Sir Cheungtung Liang-Cheng, K. C. M. G., is an honor possessed by few Chinamen. It was conferred upon him by Queen Victoria during her jubilee ten years ago. The minister was a member of the mission headed by Chang Yin Huan, formerly envoy to the United States. The mission conferred upon Chang Yin Huan the decoration of grand commander of St. Michael and St. George and upon Sir Cheungtung that of knight commander of St. Michael and St. George.

Although the former title was higher than that of the present, Huan did not use the "Sir." This right has been because of much comment among those who heard Sir Cheungtung's name mentioned or saw it published. When Sir Cheungtung arrived here Count Cassini, at that time dean of the diplomatic corps, took a positive stand against the use of the title and never addressed the minister as "sir," as others did. Politically and diplomatically Sir Cheungtung has done much toward binding the two governments together, and his influence among the Chinese in this country has been of great benefit. He has worked unceasingly for the interest of his country and his people.

Until a minister has been appointed to succeed Sir Cheungtung Chew Tszeli, the first secretary of legation, will be charge d'affaires. It is understood that Liang Tun-Yen, at present Chinese customs tuncat at Tientsin, will succeed Sir Cheungtung as minister at Washington. He is a brilliant man, a graduate of Yale and an English scholar of distinction.

### RHEUMATISM WILL GO.

Shake well in a bottle the following: Fluid Extract, Dandelion one-half ounce, Compound Kargon one ounce, Compound Syrup Sarsaparilla three ounces. Take for each dose one teaspoonful after your meals and at bedtime, drinking plenty of good water.

A well-known authority states that any good prescription pharmacy can supply the ingredients, which can be easily mixed at home.

This mixture will act directly upon the kidneys, removing obstructions that clog the process of eliminating waste matter and acids which produce Rheumatism, Bladder and Urinary difficulties and other affections resulting from scroful blood, which the kidneys failed to keep clean and pure.

The worst forms of Rheumatism are said to be readily overcome without the slightest injury or ill feeling to the stomach or digestive organs.

### MICHIGAN MAN STEPS UP.

Edward B. Moore Is Appointed Commissioner of Patents.

Washington, May 10.—The president today appointed Edward B. Moore, of Michigan, commissioner of patents to succeed Frederick I. Allen, resigned. Mr. Moore has been assistant commissioner for several years.

### GOLF TOURNAMENTS ABANDONED.

Chicago, May 10.—Coinciding with the destruction of the Homewood Country club by fire today, it was announced tonight that both the Western Amateur and Women's Western golf championships, scheduled to take place on this course, have been abandoned. These tournaments will be given on some other course. The inability to rebuild the clubhouse in time was given as the reason for abandoning the tournaments.

### SUNDAY AT THE CHURCHES.

First Baptist Church—Morning, 10:30; evening, 7:30. Rev. C. H. Maxson, pastor. Sermons by Rev. C. H. Rutledge, of Ishpeming. Sunday school, 12 m. Young People's meeting, 6:20.

First Church of Christ, Scientist—Sunday service at 10:30 a. m.; subject, "Mortals and Immortals." Felix Hall, Opera House block.

Balance on hand April 1, 1907.	\$ 6,712 53
	\$ 11,808 24

**FOR STREET LIGHTING.**  
Marquette County Gas & Electric Company Asks City for New Contract.

J. W. McCorkindale, manager of the Marquette County Gas & Electric Company, sent a communication to the council Thursday evening asking that his company be given a contract for a term of years for supplying the city with light. The old contract expired over a year ago. Mr. McCorkindale advised the council that his company is prepared to accept settlement of a bill on the books of the old company amounting to \$341.85, figuring on a basis of \$8.63 per month for each lamp. This is the amount upon which the city settled a previous account with E. B. Finch, receiver. The communication was referred to the committee on electric lights.

A. E. Winter, division engineer for the Chicago & Northwestern Railway company, submitted a communication to the council asking if it could supply the company with 350 cubic yards of gravel to be used in the macadam to be laid near the depot. Mr. Winter advised that the company will improve the ground very soon. The communication was referred to the committee on streets and highways and the board of public works.

August Carlson, August Swanson and a number of others petitioned the council for an extension of the water main to the Baneroff location. The communication was referred to the committee on water works and the board of public works.

The committee on buildings recommended that the city building be repaired. The estimated cost of the work is \$300. The committee was authorized to have the work done.

Will St. John was reappointed clerk of the municipal court.

The bonds of Marshal Lehman, with Nels Nelson and Gust Lindstrom as sureties, and Deputy Marshal W. H. Trevarrow, with J. H. Gill and Thomas Mudge as sureties, and that of J. T. Rowe, constable, were accepted.

W. H. Frathen and a number of others petitioned the council to improve Superior street, between Third and Fourth streets. The communication was referred to the committee on streets and the board of public works.

**CITY EMPLOYEES' SALARIES.**  
Several of Them Have Been Granted an Increase in Pay.

At the meeting of the council Thursday evening the committee submitted the list of salaries to be paid city officials, also the wages for workmen in the several departments, during the ensuing year, recommending a number of advances. The men on the streets are to receive better pay than they had last year, but the committee's recommendation for a reduction of the working hours from ten to nine was not concurred in.

The list adopted by the council is as follows:

Marshal, per month.	\$ 85 00
Deputy marshal, per month.	70 00
First night watch, per month.	65 00
Second night watch, per month.	65 00
Third night watch, per month.	65 00
Fourth night watch, per month.	65 00
Fifth night watch, per month.	65 00
Poundmaster, per month.	65 00
Recorder, per month.	83 33
City attorney, per month.	50 00
Health officer, per month.	33 33
Assessor, per month.	50 50
Municipal judge, per month.	100 00
Clerk municipal court, per mo.	50 00
Janitor of city building, per mo.	55 00
Fire warden, per month.	25 00
Sexton at cemetery, per month.	60 00
Engineer fire department, per mo.	65 00
Teamsters fire dept., per month.	65 00
Chief of fire department, per mo.	15 00
Janitor No. 3 hose house, per mo.	10 00
Street Commissioner, per month.	70 00
Street laborers, per day.	1 30
Sidewalk builders, per day.	2 15
Laborers digging water ditches, per day.	2 00
Laborers digging sewer ditches, per day.	2 00
Services of double teams, per day.	4 50
Services of single team, per day.	3 25

The board of public works recommended that the salary of its superintendent, P. H. Devine, be advanced from \$100 to \$125 per month. This recommendation was referred to the committee on streets and highways. The former wages of street laborers was \$1.75; sidewalk builders, \$2.00. The house specified to be paid for team hire is \$4.50 for double teams and \$3.25 for single.

**JAPAN'S NAVAL PROGRESS.**

An event, which cannot be overestimated, occurred in Japan a short time ago, and that was the launching of a new warship which it is claimed is superior to the British warship Dreadnought. Hitherto Japan has bought her best vessels abroad and the building of this monster proves conclusively the wonderful progress and advancement in the Japanese navy. The wonderful record of cures made by the celebrated Hostetter's Stomach Bitters during the past 53 years proves conclusively that it is a medicine of superior value, and the best of its class for curing ailments of the stomach, liver, kidneys or bowels. Every sick man or woman should therefore resolve to try it at once. It always cures dyspepsia, indigestion, constiveness, biliousness, headache, sleeplessness, female ill or malarial fever. Don't permit any longer when you know the Bitters will cure you.

**NOTICE.**

Water rates on all metered services for three months ending April 30th, 1907, are due and payable. If not paid on or before May 15th water will be shut off and the penalty of \$2 will be charged for again turning on the water.

**A NARROW ESCAPE.**

G. A. Cloyd, a merchant of Plunk, Mo., had a narrow escape four years ago, when he ran a jimson bur into his thumb. He says: "The doctor wanted to amputate it but I would not consent. I bought a box of Bucklen's Arnica Salve and that cured the dangerous wound." 25c. at The Stafford Drug Co.'s store.

**DISTURBED THE CONGREGATION.**

The person who disturbed the congregation last Sunday by continually coughing is requested to buy a bottle of Feley's Honey and Tar. The Stafford Drug Co.

**ISHPEMING TO CELEBRATE.**  
Business Men and Council Will Co-Operate in Conducting Program.

Ishpeming will celebrate the Fourth. This was practically decided on at the council meeting Thursday evening, when a communication was received from a large number of the business men, asking the council to appoint a committee to co-operate with the citizens in arranging for the day's festivities. The business men also asked the council to contribute to the fund that will be raised to meet the expenses. It was evident that the council was favorable to the proposition and Mayor Roberts was instructed to appoint a committee of five to co-operate with the committee to be selected from among the business men.

There is a fund of \$113.39, left over from the celebration conducted here three years ago the coming Fourth, that will be turned over to the arrangement committee. This fund is in the hands of J. S. Olson, the treasurer of the previous celebration committee. Both banks have already been secured for the day. One of the business men who started the movement said yesterday that a committee will be named before the close of the coming week to solicit funds. He said he has found a strong sentiment in the celebration and he believes that the contributions will be liberal. It is planned to raise in the neighborhood of \$1,000, which will permit of liberal prizes for the winners of the athletic events, as well as for the more prominent displays in the parade.

**RESOLUTIONS OF CONDOLENCE.**

At a regular meeting of Ishpeming Legion, No. 270, held May 9, 1907, the following resolutions were unanimously adopted in memory of Sister Rodda E. Cann, who departed this life April 19, 1907:

Resolved: That we sympathize with the bereaved husband and children in their hour of bereavement and commend them to the care of the Almighty God, who alone can impart comfort and impart the consolation they need in their dark hours of sorrow.

Resolved: That the charter of our legion be draped in mourning for a period of thirty days; that a copy of these resolutions be presented to the husband and family of our departed sister, and that they be inserted in the minutes of our legion; a copy sent to the Light of the Legion and a copy be published in the Iron Ore and The Mining Journal.

MARY PASCOE,  
JESSIE E. SIMONS,  
JNO. BENNETT,  
Committee.

**DEATH OF ANDREW VINSTROM.**

Andrew Vinstrom, an old resident, who was well known to the Scandinavian residents, died Thursday at the home of Victor Carlson on Empire street, where he boarded. He was ill but four days. The deceased was a native of Sweden, and was born at Atvidaberg June 3, 1850. He arrived in this country in 1880 and had resided here the greater part of the time since then. The only relative in this country is a brother, John Vinstrom, residing at Rockford, Ill. The funeral will be held tomorrow afternoon. Services will be conducted at the house at 1:30 and at the Swedish Methodist church at 2 o'clock. The Swedish Home society, of which the deceased was a member, will have charge of the obsequies.

**"GIRL OF THE STREETS."**

The next offering at the Ishpeming theater will be the comedy drama, "Girl of the Streets," next Thursday evening, the 16th, Miss Katherine Greco, who appears in the title role, is said to be a clever actress. The company carries its own scenery and specialties are introduced during the action of the piece. One of the features of the performance is the work of little Albee Berry, who is said to be a very clever child. Popular prices, twenty-five, thirty-five and fifty cents, will prevail.

### ISHPEMING

#### ISHPEMING IN BRIEF.

The "O. K." club will conduct a hop this evening at the Union hall.

Mrs. E. D. Brigham, who has been visiting Henry Harwood and family the past few days will leave this evening for her home at Glenace, Ills.

A. C. School, who is preparing to open an electric theater in the Voelker block, will sing one or more solos tomorrow morning at the Presbyterian church.

Arthur J. Cousineau, who was recently graduated from the Ishpeming Business college, has accepted a position in the Milwaukee office of the W. H. Hopkins company.

Will Mugger left Tuesday evening for New York, where he will meet his father, John Mugger, on his arrival from Europe. Mr. Mugger is expected in New York next Wednesday.

Frank Sherman, the piccolo and flute player, who has been a member of the Ishpeming City band, will leave within a few days for Butte, Mont., where he expects to locate permanently.

The fourth of the series of dancing parties given under auspices of the Ishpeming Masonic society, will take place Monday evening at the Masonic hall. Trombly's orchestra will furnish the music.

The Cleveland-Cliffs Iron Mining company will pay the employees of its Hard Ore and Lake mines Monday; Cliffs Shaft and Salisbury, Tuesday; Negaunee, Maas and Jackson, Wednesday, and the Swanzy district a week from today, the 18th.

The arrangement committee for the Elks' hop has decided to give their party the night of the 17th, at Braastad's Hall. It will be an invitation affair and invitations must be presented at the door. Trombly's regular orchestra will be augmented by one or more extra men and an unusually fine lunch will be served.

#### FROM HOPKINS' CURB LETTER.

"Coppers continued dull and the tendency of prices was toward a lower level. North Butte and Amalgamated were fractionally lower and the general list was nominally unchanged to a shade lower, although there is a noticeable lack of aggressive buying demand. The Boston News Bureau, in commenting on

the North Butte annual statement, brings out the same points that we made mention of in our letters of three weeks ago; that it was lacking in detail, and it is a hard matter to figure costs from the information contained in the statement. This we might add, however, has to do with the immediate value of the stock more than the prospective. They are undoubtedly earning several dollars per share in excess of present dividends requirements and before the end of this year they will be in a position to disburse at least \$10, and continue their heavy betterment costs and at the same time accumulate a good surplus. A meeting of Keweenaw directors will be held the latter part of this month for the purpose of determining the advisability of starting operations at the Phoenix Consolidated mill on Keweenaw rock. Greene-Canaan is tipped for a good advance. The East has been a moderate buyer but the stock remains practically stationary at 16. It is stated that earnings for the two properties at the present time are greater than ever in their history.

#### The day's prevailing prices were:

	Bid.	Asked.
American	\$10.00	10.25
Superior	18.00	18.25
Davis-Daly	15.00	15.25

# COOK WITH GAS

## Negaunee Department

#### HAS MANY APPLICATIONS.

Owner of Block to Be Erected Will Have No Trouble Securing Good Tenants.

Since the announcement early in the week that Charles Johnson is to erect a business block on East Iron street he has received a large number of applications for the store rooms on the ground floor, as well as several applications for the four flats on the second floor.

Negaunee would have several more business houses if buildings were available. There is not a vacant store room on Iron street, nor have any been available for months past. The owners of the more desirable buildings have had many applications for them and in a number of instances parties desiring places not under lease have bid up the rent.

Desirable dwellings are as scarce as business locations. A property owner on Iron street yesterday said that he has had several chances to rent vacant office rooms in his block to parties desiring them for living rooms. There are several office rooms available, but no houses of any kind. The demand for the better class of dwellings has been good for over two years past, but additional houses were never more badly needed than now. The dwellings to be erected at the Mary Charlotte location, and the ones to be built in the city proper this summer, will make room for a number of additional families, but twice as many as will be erected could be rented to advantage.

#### BACK FROM AFRICA.

Negaunee Man Did Well at Johannesburg and May Move Family There.

John Vitelli, who left Negaunee about two years ago for Johannesburg, South Africa, has returned. He worked as a miner at one of the properties near the city and earned big wages. He was working on a contract and had better returns than the average miner at the property. His wages the month before he left Johannesburg was nearly \$500, but there were months when his earnings were not much larger than the men on the better contracts here. The average wages paid men on company contracts is only a trade better than the workmen living in this region, but the cost of living is so much greater that the company account men are little better off than they are in any other mining field.

Mr. Vitelli has not yet decided whether to remain in Negaunee or to move his family to Africa. He said yesterday that he will likely return, as he is certain of getting a good place.

#### MINING WORK RESUMED.

Joseph Barabe has been advised that operations have been resumed in the shaft at the Barabe copper mine, near Melen, Wis. A box of samples of the ore was received yesterday. Mr. Barabe intends to have the ore assayed. The Barabe company was organized last fall with 1,000,000 shares, at a par value of \$1. Only 100,000 shares of the treasury stock was offered for sale at ten cents per share, the money raised being used for development purposes. Mr. Barabe has been informed by his uncle that he has had several opportunities to dispose of the property at a good price, but he believes that there will be more money made by operating it until the workings are more thoroughly developed and certain exploratory work has been done. Outcroppings have been found at a number of points on the farm and it is thought that the deposit will be found to be of good size. A number of Negaunee people have purchased stock.

#### LEAGUE BOWLING MATCH.

The Ravens won from the Eagles Thursday evening in a league bowling contest, the work of J. M. Perkins of the Eagles' team being the feature of the contest. The scores were:

Eagles	377	161	181	519
Perkins	113	101	109	323
Yates	128	129	167	415
Johnson	148	136	117	401
Totals	438	398	407	1243
Williamson	150	164	139	453
Miller	128	129	167	415
Nelson	168	139	155	462
Totals	446	423	461	1329

#### LOCAL LACONICS.

Jim Hammel, the Lansing cigar manufacturer, called on his Negaunee patrons yesterday.

The employees of the Jackson, Negaunee and Maas mines will be paid next Wednesday.

L. E. Chamsee found twelve inches of frost in the ground at the parochial school site when his men broke ground for the foundation of the new structure.

The Unions and Tigers baseball teams crossed bats Thursday afternoon, the former winning by a score of 15 to 7. Levine Bros. are to provide the Unions with uniforms, on the basis of which will be the words "Savings Bank."

The Unions and Tigers are well matched and it is expected that they will play some close games before the season ends.

Captain William Jory, of the Princeton mine, was in the city yesterday. Shippers from the Princeton and Anselmin mines are not yet very heavy, Mr. Jory reports. He said that there has been a shortage of cars, but it is expected that the shipments will be considerably increased within two or three weeks. The Lake Superior & Ishpeming Railway company, which is handling the ore from both mines, has had a number of cars tied up on the Soo line.

#### HOW'S THIS.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honest in all business transactions and financially able to carry out any obligations made by him.

## DARANTELLA

216 Exchange Street, Negaunee, Mich.

#### SALOON MAN ROBBED.

Visitor at Gust Ikela's Place Put Hand in Proprietor's Pocket.

Gust Ikela, who recently engaged in the saloon business in the Lohb building on Gold street, had a busy time yesterday trying to locate a man who had robbed him of \$45. Ikela was alone in the place and was busy cleaning up the barroom when the man he suspects of having relieved him, of money, came in. He talked with the visitor while he worked, his coat hanging on a peg near the bar, containing the purse which he later missed.

Ikela is of the impression that his visitor got his hand into the pocket while he was talking, taking the entire roll of bills. He did not miss the money until he was about to put on his coat. He at once scoured the business part of the city, looking for the suspect. Mr. Ikela went to Ishpeming, where he enlisted the chief of police in the search.

#### DEATH OF MR. BEDFORD'S MOTHER.

Walter L. Bedford, agent of the South Shore, was shocked yesterday by the receipt of a telegram announcing the death of his mother who had been confined to a Detroit hospital, having submitted to a surgical operation last week. Mr. Bedford had received very encouraging news from the hospital every day since the operation, and the announcement of his mother's death was entirely unexpected. The deceased was known to many people in this country, as she had visited Mr. Bedford's family here and at Humboldt. Mr. and Mrs. Bedford left yesterday afternoon for Detroit.

#### LIVERY BUSINESS SOLD.

John Hakkenjos, Negaunee's only liveryman, yesterday sold his business, including all his carriages, horses and other equipment, to D. S. Comstock of Sturgeon Bay, Wis. The consideration is reported to have been \$5,500. Mr. Comstock has conducted a farm at Sturgeon Bay for some years past, but he recently disposed of his interests there. He brought up three nice horses, which he adds to his outfit. Mr. Hakkenjos has been desirous of disposing of his business for over a year past.

#### Iron Notes

Seventy-five steel lockers have been installed by the Penn Iron Mining company in the new concentrating house at the Norway mine, Menominee range.

An old state of affairs has been responsible for curtailing the output of Oglebay, Norton & Co.'s Bristol mine at Crystal Falls. The unseasonably cold weather is to blame. It has kept the frost in the upper levels, through which most of the product is milled, and for this reason it has been practically impossible to send the ore broken in the pit down to the chutes for hoisting. The output in the mine is being held up in the lower reaches of the property.

Diamond drilling that may be productive of decidedly important results is being presented by the Steel Corporation a few miles east of Iron Mountain. The drill is working on what is known as the north formation at Quinnesec. The hole has reached a depth of 500 feet and is in the quartzite. It is proposed to continue operations until the line formation is cut through, a distance estimated at 1,000 feet. The hole should establish the correctness of the theory that this line formation is underlain by an iron deposit of high grade.

Operations have now been entirely suspended at the Steel Corporation's Menominee mine, a property near Piekands, Mather & Co.'s reliable Hemlock, at Anasa, Menominee range. No mining work has been carried on here for many months, although the pumps were kept running. Now the pumps have been shut down and the workings will be permitted to fill with water. The property has produced no ore since 1905, with the exception of three or four carloads last season, altogether it has sent out only 113,000 tons, the first of which went out in 1888. The Menominee mine was owned by the Wilkinson estate of Marquette. The Mansfield mine

#### The Story of a Medicine.

Its name—"Golden Medical Discovery"—was suggested by one of its most important and valuable ingredients—Golden Seal root.

Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, tripeptide, vegetable, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative principles, much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up.

A glance at the full list of ingredients, printed on the bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts of our country, and writes on *Medical Review*, "It is the most valuable remedy for the diseases for which 'Golden Medical Discovery' is advised." A little bottle of Golden Medical Discovery, as it is called, is sent by Dr. V. C. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the name above, and from these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the cure of all the chronic, rheumatic and brood affections, accompanied with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on coughs, and those wasting affections, which, if not promptly and properly treated, are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it, it will not partake in its advanced stages. No medicine will cure the affections that lead up to consumption, if taken in time.

of the Steel Corporation, seven miles east of Crystal Falls, has resumed shipping after an illness in this respect of some eighteen months. No ore was shipped last season, and in 1905 only 38,000 tons were forwarded. The first shipments were made in 1890, and all told the property has sent out upwards of three-quarters of a million tons. The product is of very good grade. While the mine has not been operated with a full force, a large stockpile has accumulated, and it is now at work in this, and the ore thus loaded is being sent out along with the daily hoist.

The White Iron Lake Iron company has branched out to the Mesaba range, and is conducting exploratory work in Section 21, 28-30, near Hibbing. A diamond drill is being used. The company has been engaged in similar operations south of Ely, on the Vermilion range, for the past few years. Deep holes have been put down here, in Section 21, 02-12, and it has been understood that a considerable amount of ore has been cut. Shaft sinking has been in progress. Duluth interests are prominently identified with the company.

A large party of expert land leaders have gone to the White Iron Lake Superior to estimate the timber on \$7,000 acre held under option by the Steel Corporation. The work will take until probably the first of July. Some forty or fifty men will be engaged with the task. The land in question is believed to possess copper values as well as its wealth in timber. It is owned by an English syndicate, Isle Royale, which is some forty-five miles long and eight miles wide, although close to the Canadian shore, forms a portion of Keweenaw county, Mich.

It seems likely that the production from the Traders mine of Antoine Ore company, at Iron Mountain, operated by Oglebay, Norton & Co., will not be nearly so large as anticipated or had been planned at the opening of the season. General Manager Hopkins says that, unless there is a notable improvement in the demand for ores of a low grade, the output for the year will not reach 100,000 tons. The company had expected to ship 230,000 tons. Several hundred carloads are to be forwarded to the Thomas Furnace company of Milwaukee.

Leaders of the Western Federation of Miners on the Mesaba and Vermilion ranges are to finally secure the site for a region of upward of 14,000. They say that 6,000 more names will be added to the list before the close of the season. There are forty branches in the field, representing as many different nationalities. Nowhere else in the Lake Superior region has the union as yet gained a foothold, but this is doubtless largely due to the fact that, excepting in the Michigan copper country, no attempt at organization has been made. There are no unions of miners either in the copper region or on the Marquette, Menominee or Gribble ranges. It is of interest to note in this connection that possibly nowhere else in the Mesaba country are the miners better paid than at Jones & Laughlin's property at Virginia. They average \$3.30 a day.

The Baker property, which Corriegan, McKinney & Co. are opening in the Stambaugh valley, western Menominee range, is developing into a fine mine. One was found some months ago, but it has been only recently that the future of the property has become assured. There is ore in sight in plenty now, and it is of a very desirable grade. The success of Corriegan, McKinney & Co. here but duplicates the good fortune of this concern in the Crystal Falls field, on the other side of the county, where a number of its properties subsequently made into good mines were taken over at a time when they were thoroughly discredited by other operators. Both the Steel Corporation and the Cambria Steel company had tested the Baker tract, and each had pulled up stakes after a considerable expenditure in drill work. The property lay neglected for a time, and finally the Corriegan-McKinney people were induced to take it over. The result is substantial evidence that their proverbial good luck has not deserted them.

At Iron Mountain, the new "C" Ludington shaft will for years to come probably constitute much the greatest source of production from the Steel Corporation's Big Chapin mine. This shaft is one of the greatest ever sunk in the Lake Superior iron mining region. It is vertical, and in almost perfect alignment from top to bottom. Of four compartments, 21 1/2 x 10 1/2 feet in inside dimensions, it is upwards of 1,500 feet in depth. It is lined with steel throughout, and it is surmounted by a splendid shafthouse of the same material, in selecting the location for this great shaft, in the slates on the footwall side of the property, and 600 feet southwest of the "B" Ludington incline shaft, the management was guided almost entirely by the pitch of the ore body, which is to the west. It is proposed to drain the bulk of the water of the mine into this shaft, whence it will be hoisted to surface from the 1,500-foot station by the giant Cornish pump in commission years ago at "B" Chapin shaft. This pump is a steely compound engine of the crank and flywheel type, and has a capacity of 3,000 gallons a minute from a depth of 1,500 feet, with a steam pressure of 125 pounds in the throttle. The flywheel of the engine alone weighs 100 tons; it is forty feet in diameter. The height of the pump from the top of the foundation is 54 feet. At a depth of 1,200 feet "C" Ludington shaft is connected with the level known as the fourteenth, and this will become the main working level as soon as the ore has been removed from above the present twelfth level. However, this will not be for a few years yet. The smokestack at the boiler house at "C" Ludington is probably the largest in upper Michigan. Constructed of hollow tile, it rises from the foundation to a height of 135 feet. Its inside diameter is six feet. The foundation for the chimney is exceedingly massive. It is constructed entirely of concrete, and is 18x18 feet on the surface, and ten feet high, giving the stack a total height from the ground of 145 feet. The boiler house, 51x60 feet, is brick-veneered, ironclad structure, and contains a battery of six boilers. The boilers are each eighteen feet in length, six feet in diameter, horizontal construction, and all told have a capacity of 500 horsepower.

#### AWNINGS.

The Kelly Hardware Co. can furnish you with awnings for stores, public buildings or residences. Any size. KELLY HARDWARE CO. (3-27-10) Marquette.

#### MICHIGAN AT JAMESTOWN.

Secretary Walbridge Arranging to Open the State Building.

Norfolk, Va., May 10—Edward L. Walbridge, secretary of the Michigan commission, is making plans for a demonstration at the opening of the Michigan building. It is determined that, although Michigan will be about the last of the states to complete its building, yet it will not be surpassed in its opening show.

Some of the other states have set a good pace, having opened their buildings with considerable ceremony. Mr. Walbridge hopes to have the Michigan commissioners on hand and is venturing to hope that even Governor Warner may be induced to be there. Then he proposes that the governors of the exposition be invited and he feels pretty certain that the exposition authorities will co-operate with him in giving a big reception. The date will of course depend upon the time of completing the building. Probably it will be well along toward the end of June.

In this building Mr. Walbridge will take up his temporary residence, living there from the time of its completion until the close of the exposition. The building is so planned that housekeeping may be done on a small scale without difficulty and this will not only free Mr. Walbridge from the grasp of Norfolk landlords, but will enable him to always be on hand to receive Michigan visitors. His present address is 163 Monticello avenue, Norfolk, Va.

Secretary Walbridge is quite at home down Virginia way. He formerly resided at Newport News and spent a residence there. He removed to the suburb of the city from Grand Rapids, where he practiced law. He has personal acquaintances with the promoters of the Jamestown show and was retained by their representative to assist in securing the appropriation from the Michigan legislature. After success had followed that effort Mr. Walbridge regarded himself as a natural candidate for the secretaryship of the commission and convinced Governor Warner that he was the man for the job.

Walbridge is much pleased with the treatment which he has received from the exposition officials. He says that they are helping him in every way possible. His persuasive power in dealing with them was tested when it came for Michigan to finally secure the site for its building. The papers, as prepared by the exposition authorities, provided, it is understood, that Michigan should have the option at the close of the show to buy the site outright at 25 cents per square foot. Now it appears that the exposition representative before the Michigan legislature stated that the price would be 15 cents per square foot. The fact that such representation had been made in Michigan, it is understood, brought forth by Mr. Walbridge who declined to sign on a 25 cent basis. Accordingly, the exposition management backed down to 15 cents.

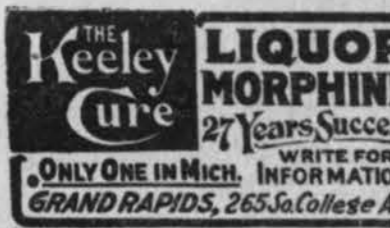

The state has two options to be exercised within ninety days of the closing of the exposition. It may elect to purchase the land upon which the building is erected. The price at 15 cents per square foot will be between \$1,500 and \$2,000. If that plan is followed the building will be left standing and an effort will be made to effect a sale. This plan seems to look good to at least part of the commission. But the price, even at 15 cents, looks pretty high considering the fact that, up to the time of the exposition, that land was not in the class of residence property at all. It is quite possible, however, that the buildings of the states may come into the market for resort purposes, as all of those buildings are close to the water front. Some of them would make very fine summer homes.

The other option which Michigan has is to remove the building within ninety days, allowing the exposition officials to take full possession of the ground.

#### MY BEST FRIEND.

Alexander Benton, who lives on Rural Route 1, Fort Edward, N. Y., says: "Dr. King's New Discovery is my best earthly friend. It cured me of asthma six years ago. It has also performed a wonderful cure of incipient consumption for my son's wife. The first bottle ended the terrible cough, and this accomplished, I then secured a second bottle by one until she was perfectly well. Dr. King's New Discovery's power over coughs and colds is simply marvelous." No other remedy has ever equaled it. Fully guaranteed by The Stafford Drug Co., 50c. and \$1.00. Trial bottle free.

Mrs. S. Joyce, 180 Sullivan St., Claremont, N. H., writes: "About a year ago I bought two bottles of Foley's Kidney Cure. It cured me of a severe case of kidney trouble of several years' standing. It certainly is a grand, good medicine, and I heartily recommend it." The Stafford Drug Co.

##### EPIDEMICS DIVERT BUSINESS.

"The recent epidemic of diphtheria and scarlet fever in the city have, it is reported, diverted thousands of dollars' worth of business from Chicago. In order to allay the fears of towns and cities near Chicago, which were said to be considering quarantine measures until the epidemic had passed, Health Commissioner Whalen called a consultation of big commercial interests which resulted in active co-operative measures being taken to prevent the spread of disease and stamping out the epidemic."—From American Carpet & Trade Record, Philadelphia, March 10, 1907.

There is no greater source of infection than that related to the handling of carpets that are often sent from such homes in infected districts and cities. They are a rule are bought up by the City Rug Factories and lend their presence to infect other innocent patrons. In having your rugs made up from old carpets you will avoid all this risk by shipping to a well known sanitary factory that insures you against any chance of this kind we refer to

MARKETS

NEW YORK STOCKS.

New York, May 10.—There was a subsidence today of the acute weakness which was manifested in yesterday's stock session, but the market continued in a mood of dull depression which was only occasionally relieved by isolated advancing points.

was said to have been by commission houses with Eastern connections, and it was reported that several prominent Wall street traders were largely interested in the purchases. The prices rose rapidly until the July touched 88%.

Logan & Bryan wired Paine, Webber & Co. concerning yesterday's wheat market: "It is up to those who have been opposing this advance in wheat to explain how they got run over by the market."

Logan and Bryan telegraphed yesterday from New York as follows: "Liquidation was general throughout the session today. Union Pacific and Reading were the features. Reading being hammered with especial force."

Paine, Webber & Co. wired regarding yesterday's Boston market: "The heavy issue of bonds by the Union Pacific has put a distinct damper on the whole market and although the pools tried hard to rally their specialties they could not change public sentiment and steady liquidation came in all day."

Closing prices were: Adv. 1/4 @ 4, Are. 7 @ 50, All. 40 @ 50, Atl. 12 @ 1/2, Arnold. 75 @ 100, Bing. 18 1/2 @ 19 1/2, B. CHICAGO GRAIN MARKETS.

Chicago, May 10.—In the wheat pit today, the July option sold at 88 3/4, an advance of three cents from the lowest point of the session. The cause of the upturn was official proclamation of the damage reports in circulation for some time. According to the government report the condition of winter wheat in the United States May 1 was 82.9. This was higher than generally expected, and for some time after the announcement from Washington the market showed signs of weakening. Later when the report was considered as a whole and it was seen that a large acreage had been abandoned, the sentiment changed to bullishness. The area of winter wheat remaining in cultivation May 1 was about 3,335,000 acres less than was reported some time ago. This, it was claimed, would indicate a total yield of 90,000,000 bushels less than given in the April report. This statement brought out an avalanche of buying orders, and for the remainder of the day the trading was enormous. The heaviest buying

Every-day. The importance of soda crackers as an article of daily consumption can hardly be overestimated. No other wheat food contains such nutritive values in correct proportions. This is only true of Uneeda Biscuit the ideal soda cracker. As fresh on your table as from the oven. Crisp, clean and appetizing. In moisture proof packages. 5c NATIONAL BISCUIT COMPANY.

THE GERMAN AMERICAN COFFEE CO. New York Chicago Des Moines Omaha. PEACE MISSION MAY FAIL. Carnegie's Envoy, Mendoza, Objected to by Latin-American Diplomats. Washington, May 10.—In Latin-American diplomatic circles in Washington, quite a stir was made over the announcement from New York of the appointment of Senor Don Diego Mendoza, former minister from Colombia, as one of the committee from the international conciliation committee to the South American republics. The Colombian minister was one of the earliest callers at the state department and bureau of the story is that Professor William R. Shepherd of Columbia University, who was named as Dr. Mendoza's colleague on the peace mission, has declined to go in that capacity. When Professor Shepherd first planned his South American trip, several weeks ago, he had no thought of going as a peace envoy. He had arranged to make the journey under the auspices of Columbia college to gather material for a course of lectures. To this end he secured introductory letters from the diplomatic representatives in Washington of all or nearly all the South American republics. The fact that these diplomats are now vigorously objecting to Dr. Mendoza would embarrass the credentials carried by Professor Shepherd. He is said to have declined therefore to go as a peace delegate, and will make the journey, as first planned, in the role of a scholar making researches. In fact, the story today was that the peace mission planned for South America by the international conciliation committee had originally failed on account of the personal objections to Dr. Mendoza. Mr. Carnegie was much interested in the proposed mission and is said to have agreed to finance it. POLARIS MINERAL WATER delivered to any part of the city in sterilized one-gallon bottles. F. W. READ PASSES AWAY IN THE SOUTH

FOR NEARLY FORTY YEARS A PROMINENT LUMBERMAN IN MARQUETTE COUNTY.

CAME HERE IN YEAR 1869

Operated Mills at Michigamme and Eagle Mills for Many Years—Had Various Other Important Interests.

News of the death of F. W. Read at Charleston, S. C., came as a great shock to Marquette county friends of the deceased yesterday. It had been known that Mr. Read was sick, but outside the circle of relatives it was not understood that there was any likelihood of his illness ending fatally.

Mr. Read's immediate family is composed of the widow, Mrs. R. F. Bronson of Ishpeming, Mrs. J. H. Fenner of Marquette, A. Brett Read of Rhyolite, Nev., and Miss Ruth, of this city.

Mr. Read's identification with Marquette county affairs and the industrial development of this district dates far enough back to entitle him to a place among the pioneers who conquered the rough country in the days when it was first being opened up, and his death brings to a close a career marked by a fine success in business.

Mr. Read was born in London, England, Nov. 10, 1839. He learned the trade of builder, being both a practical carpenter and mason. He came to America when he was about the age of twenty-one, locating in Toronto, Canada.

He was prominently identified with the Baptist church during all the years of his residence in the city. He was one of the earliest members of the Neegaunee lodge of Masons, was a member of Lake Superior Commandery and of Ahmed temple of the Mystic Shrine.

He was in charge of all the buildings and machinery.

This firm was destined to have a short life, as it came into being at a stormy time. It was just weathering the panic of '73 when the plant caught fire and was destroyed, along with a large amount of logs piled up ready for the saws.

Under the stress of this blow the firm of Chase, Read & Barnum was compelled to make an assignment to James T. McCullum. The affairs of the company were shortly straightened out and the creditors paid by Mr. Read and Mr. McCullum.

Messrs. Read and Winter in 1881 took over a mill being operated at Michigamme, rebuilt and improved it. In 1887 the firm of F. W. Read & Co. was organized, with a capitalization of \$750,000, and operated both the Eagle Mills and Michigamme mills.

Mr. Read was the moving spirit in all the enterprises in which he was associated up to three years ago, when ill health compelled his retirement. In the interval from that time up to his death he was a constant sufferer from a chronic trouble, though his health the past winter was better than usual.

With labor, of which he was a large employer, Mr. Read's relations were always friendly to a rare degree. He was most considerate of his men, and frequently kept his mills running full handed when it would have been to his advantage to have run them light.

He was prominently identified with the Baptist church during all the years of his residence in the city. He was one of the earliest members of the Neegaunee lodge of Masons, was a member of Lake Superior Commandery and of Ahmed temple of the Mystic Shrine.

He was in charge of all the buildings and machinery.

GIVES CAUSE OF FAMINE IN CARS

PRES. FITCH, OF SOUTH SHORE, SAYS LACK OF TERMINALS IS PRINCIPAL REASON—ROAD ORDERS NINE NEW ENGINES.

The South Shore Railway company has contracted with the Baldwin-Locomotive works of Philadelphia for the construction of nine engines, six freight and three passenger, to be delivered in October.

Questioned as to the car famine, President Fitch said yesterday that at the present time his road had plenty of cars to meet all demands upon it, though earlier in the winter it had been somewhat pinched.

"During the past few years roads all over the country have had hundreds of thousands of cars and thousands of engines constructed. But terminal construction has not kept pace with the construction of cars and engines.

"Love is a painful thrill. Not to love more painful still, but ah! it is the worst of pain, to love and not be loved again."
