

I. STEPHENSON IS THE WINNER

Marinette Millionaire Banker and Lumberman Will Take the Seat Vacated by John C. Spooner in the United States Senate.

Long Deadlock Ends in His Nomination by the Republicans After the Casting of Nearly Eighty Ballots—Senator McLaurin, Democrat, of South Carolina, Comes Out for Roosevelt— Says Four Years More of the Big Stick Are Needed.

Madison, May 16.—The senatorial deadlock was broken by the nomination on the first ballot at tonight's Republican caucus of former Congressman Isaac Stephenson, of Marinette. The result was accompanied by the breaking up of the opposition, which, when the anti-Stephenson men realized they were beaten, returned to their former favorites, Esh and Hatten, and the final result was announced as follows:

Table with 2 columns: Name, Votes. Stephenson 54, Esh 23, Hatten 19, Scattering 13.

Senator Given the Credit. The credit for Stephenson's victory is given Lieutenant Governor Connor, who secured for Stephenson the support of two members claimed to have been pledged to Hatten. If they had voted for Hatten, Stephenson would have been defeated.

The deadlock has continued since April 16, and in that time one ballot was taken in the Legislature and nearly eighty in the Republican caucuses.

Isaac Stephenson is a wealthy lumberman and banker. He was born in Fredericktown, N. D., June 18, 1829, went to Bangor, Me., in 1840, and a year later moved to Wisconsin where he worked on a farm. He afterwards bought a schooner, which he sailed between Milwaukee and Escanaba, and invested his savings in timber lands. He is now president and controlling owner of the N. Lumber company, Peshtigo Lumber company, Menominee River Boom company, I. Stephenson company, and Stephenson National bank of Marinette. Mr. Stephenson was a member of the Wisconsin Legislature from 1866 to 1868 and was congressman from 1883 to 1889. He has long been an adherent of Senator La Follette.

SECOND GEORGIA'S MOTION.

Ex-Senator McLaurin, of South Carolina, Wants Roosevelt Re-elected. Philadelphia, May 16.—The banquet tendered the cotton men tonight by the allied textile trades of New York, Boston and Philadelphia was attended by fully 800 guests and was characterized by many speakers as one of the most remarkable industrial gatherings of its kind ever held in the country. The features were the addresses of President Fairbanks and former United States Senator John P. McLaurin of South Carolina. The latter said, in part:

"The great issues in this country do not lie between the platforms of the two great parties of the nation. The real divisions are the relations of labor and capital and the monopoly of public franchises for private gain. On one side stand the trusts, huge, grim and unrelenting in their greed; on the other stand organized labor, fierce, determined, and socialist.

Eulogizes President's Work.

"Theodore Roosevelt, with his 'big stick' is doing this country a service not second to any president who has ever occupied the White House, checking on one side the rapacious greed of capital and on the other the brutal violence of organized labor. I have little faith in any political party in these times. My faith lies in the manhood of this republic, which has always risen to every emergency, and I have been patiently waiting to hear the voice of the 'great commoner' in response to the urgent invitation of the eloquent Georgian.

"Republican institutions cannot live with plutocracy on one side and socialism on the other, and it will take at least four more years with the big stick to restore the equilibrium.

A Puff for Grover Cleveland.

"The present wonderful prosperity of this country is in my opinion due more to the great courage and sagacity of Grover Cleveland than to any other man. He saw in 1892 that our wheat and cotton would turn the balance of trade in our favor, and by forcing the adoption of the gold standard he transferred the center of the financial world from the banks of the Thames to the banks of the Hudson."

Oze for Fairbanks, Too.

Senator McLaurin paid the following tribute to Vice President Fairbanks: "This association has the honor to have as its distinguished guest tonight one of the closest friends and most ardent supporters of McKinley. The vice president of the United States is capable not only of welding the 'big stick,' but with all the sweetness of disposition which reformed McKinley one of the best beloved presidents that ever occupied the White House."

Rate Laws Approved by the Vice P.

Vice President Fairbanks was greeted with shouts and the singing of patriotic songs, while the orchestra played. His address was one of congratulation upon the country's prosperity. He also referred to the improvement in the relations between labor and capital, and

STEAMER SAKON WRECKED.

Strands on Caribou Island in a Fog and May Be a Total Loss.

Sault Ste. Marie, Mich., May 16.—The steel steamer Saxon stranded last night badly hurt. In addition, a Southern railway freight engine and eleven cars went crashing through a bridge into Chattanooga creek, and three residences and a pile driver nearby were demolished. This was the result of the premature explosion this afternoon of a blast at the foot of Lookout mountain on the Stephenson railroad extension.

FEARFUL PREMATURE EXPLOSION.

Three Men Dead, Others Dying, and Much Property Demolished.

Chattanooga, Tenn., May 16.—Three men were killed outright, three others were fatally injured and two others were badly hurt. In addition, a Southern railway freight engine and eleven cars went crashing through a bridge into Chattanooga creek, and three residences and a pile driver nearby were demolished. This was the result of the premature explosion this afternoon of a blast at the foot of Lookout mountain on the Stephenson railroad extension.

ONE INDICTMENT IN SIGHT.

New York, May 16.—The grand jury today finished its investigation of the Metropolitan Life insurance company. It is said on apparently good authority that at least one official will be indicted.

SORRY HE TIED THE NUPTIAL KNOT

PASTOR WHO OFFICIATED AT THE COREY-GILMAN WEDDING BEGS FORGIVENESS.

New York, May 16.—Rev. John L. Clark, pastor of the Bushwick Avenue Congregational church, Brooklyn, who recently officiated at the marriage of W. E. Corey and Mabelle Gilman, submitted to the presiding committee of the church tonight a letter in which the minister begged forgiveness for having performed the marriage ceremony in question. Dr. Clark said that he realized he had done great wrong, both to the congregation of his church and to the Christian conception of the marriage relation in marrying a divorced person, and he said he would humbly receive whatever censure the committee might impose. The committee decided to recommend in its report to the congregation that in view of the pastor's integrity and righteousness, together with his letter of apology, no further action be taken. Later it was announced that Dr. Clark had in his letter asked that he had repaid the fee which was given him at the wedding.

ON SHORT VACATION TRIP.

President and Mrs. Roosevelt Leave Washington Today for Virginia.

Washington, May 16.—President and Mrs. Roosevelt will leave Washington tomorrow for a brief vacation at Pine Knot, Mrs. Roosevelt's country home in Albemarle county, Virginia.

PLEADS GUILTY TO GIVING REBATES

CHICAGO, MILWAUKEE & ST. PAUL ROAD PAYS FINES OF TWENTY THOUSAND DOLLARS.

New York, May 16.—The Chicago, Milwaukee & St. Paul Railway company, through its general counsel, Charles B. Keeler, of Chicago, pleaded guilty before Judge Holt in the United States circuit court today on two indictments recently returned against the road for granting rebates in violation of the Elkins anti-rebate law. The court assessed a fine \$10,000 on each count, pleaded to, which Mr. Keeler paid.

SEATTLE WANTS THE ELKS.

Lodges of Northwest Will United in Endeavor to Secure 1909 Convention.

Seattle, May 16.—Seattle people want the grand lodge of Elks to meet in their city in 1909 during the Alaska-Yukon-Pacific exposition, which will open June 1 and close Oct. 15. Every effort of the Seattle lodge, No. 92, the management of the exposition, the commercial lodges and the different lodges throughout the Pacific Northwest is being devoted to attract the Elks to Seattle. The Pacific coast city has expressed a desire to entertain the Elks in 1909. It is believed that the California lodges will lend their support.

CHANGE IN AGE LIMIT.

Cincinnati, May 16.—The Catholic Knights of America devoted most of today's session to discussing the proposition that the benefits known as "term rate insurance" be changed so that the age limit of the insured be fifty instead of sixty-five. It is not intended to have the new term limit apply to present members, but that the rule shall gradually be made operative by application to new members. The law committee recommended against the consolidation of the offices of treasurer and secretary.

PRESIDENTIAL APPOINTMENTS.

Washington, May 16.—The president today appointed Cornelius Billings of Brattleboro, Vt., to be assistant commissioner of patents. Also John R. MacAnulty of Wheeling, W. Va., and Levin H. Campbell of Warrensburg, Mo., to be examiners in chief.

HONDURAN EXILE COMES.

Galveston, Tex., May 16.—General Emmanuel Bonilla, the exiled president of Honduras, arrived in Galveston today on board the steamer Molina.

TOBACCO TRUST SCORES AT LANSING

Lower Branch of the Wolverine Legislature Kills the Dickinson Bill by the Vote of Forty-Five to Thirty-One.

A Very Drastic Measure, Absolutely Forbidding the Sale of Cigarettes or Their 'Makings'—Prospect of a 'Holdup' Was Seen, and to Prevent Graft in the Senate, It's Said, the Wholesale Grocers Turned in and Helped Remove the Temptation.

Lansing, Mich., May 16.—[Special.]—The house today killed Mr. Dickinson's anti-cigarette bill by the vote of forty-five to thirty-one. It was a very drastic measure, absolutely forbidding the sale of cigarettes or the "makings" of any. Though Mr. Dickinson's motives are believed to be the best, there was much gossip that he bill was to be used as a holdup measure in the senate. The wholesale grocers of the state turned in and helped kill the bill in the house. The senate today named Messrs Wetmore, Allen and Bland as its members of the conference committee on the constitutional question. The house members have not yet been named.

Senatorial Reapportionment.

Senator Bland put in a bill reapportioning the senatorial districts of the state. Wayne county is given one more senator, making five. There is no change in any of the upper peninsula districts except that Otsego and Montanore counties are taken away from the district in which Mackinac is at present. This change is of so slight importance to the upper peninsula as hardly to be worth mentioning. Sixteen districts are not changed at all, except in their numbers.

Unique Prison Law Proposed.

Mr. Farrell's bill providing that the money earned in prison by a convicted wife deserter shall be turned over to the wife and child of the poor to be used in supporting the proposed extension of the house in committee of the whole. If it becomes a law, Michigan will have the first law of the sort in the country.

Long Recess Taken in Illinois.

Springfield, Ill., May 16.—The general assembly this morning took a recess until 10 o'clock. At that time action will be taken on the proposed extension of the Chicago drainage canal as part of the proposed deep waterway between the lakes and the gulf.

GAMES PLAYED YESTERDAY.

Table with 2 columns: League, Game. National League: Boston, May 16.—The visitors' excellent all-round playing prevented Boston from scoring. Summary: R. H. E. Boston 0000000000-0 5 3, Chicago 0001401110-7 11 0. Batteries: Lindaman and Needham; Pfeister and Moran. American League: Chicago, May 16.—The Record today says: A private telegram received here today from Nicaragua stated that a minister with a special mission to the Mexican government had been despatched by President Zelaya to Mexico. While the mission is not designated, it is very probably in connection with Zelaya's ambition to form a confederation of the Central American states.

JAMAICA'S NEW GOVERNOR.

Kingston, Jamaica, May 16.—Sidney Oliver, the new governor of Jamaica, arrived today and was given an enthusiastic welcome. Mr. Oliver went at once to the government office, where the commanding officer of the troops administered the oath of office.

STROMBOLI IN A FURY.

Messina, Sicily, May 16.—A violent eruption of Stromboli volcano occurred today. It was preceded by a tremendous detonation and followed by continuous explosions which, however, were less violent.

TODAY'S WEATHER.

Washington, May 16.—The following is the weather bureau's forecast for Upper Michigan: Showers, Friday and probably Saturday; variable winds.

JOHN L. SULLIVAN'S NEPHEW.

Conditional Pardon Granted J. L. Lennon, Marine Corps Deserter. Washington, May 16.—President Roosevelt has granted a conditional pardon to John L. Lennon, a nephew of John L. Sullivan, serving a sentence at Governor's Island for alleged desertion from the Marine corps while in Cuba. The condition is that Lennon re-enlist and serve the full term of four years, he having been dishonorably discharged.

CHEAP TRAVEL FOR EDUCATORS.

Grank Trunk Joins in Granting a One-Fare Rate to Los Angeles. Winona, Minn., May 16.—Irwin Shephard, secretary of the National Educational association, announced today that the Grand Trunk will join the transcontinental lines in granting a rate of one fare for the round trip to Los Angeles, where the association holds its convention July 8 to 12. The action of the Grand Trunk extends the benefit of the rate to Michigan points, eastern Canada, Buffalo and New England.

CHINESE EXPRESS THEIR GRATITUDE

ALL BREACHES WITH THE UNITED STATES HEADED BY THE AMERICAN FAMINE RELIEF.

Shanghai, May 16.—A banquet was given to J. Lynn Rodgers, United States consul general here, today, by a number of Chinese officials, including the taotai of Shanghai, treaty commissioners, Wu Ting Fang, ex-minister to the United States, and Lai Hai Houan, ex-minister to Germany. The Chinese speakers declared that the American famine relief had healed all breaches between China and the United States, and had cemented the friendship between the two countries. Mr. Rodgers, replying, said that the United States sought no advantage from her gifts, and urged the Chinese to secure American education.

Famine and Fever Spreading.

Shanghai, May 16.—Thousands of women, children and aged persons who were dying of starvation in the streets of Sinciang, Pk were placed yesterday in a camp outside the city and are now being fed by relief organizations. The famine and fever are spreading, and additional families needing relief are being enrolled daily. The funds sent within the past seven days will prevent the cutting of unripe grain.

ORCHARD, TOO, IS FACING DEATH

Chief Witness for the Prosecution in the Steunenberg Murder Case Denies That He Has Been Promised Immunity.

Reconverted and Now Deep in the Zeal of the Christian Religion, He Will Tell Without Hope of Reward All He Knows of the Alleged Diabolical Conspiracy of the Miners' Inner Council—Has Not Been Mistreated, nor Subjected to Duress or Force. Boise, Idaho, May 16.—Harry Orchard, the prisoner witness upon whom the state chiefly relies to prove its charge that an inner circle of the Western Federation of Miners planned in conspiracy the murder of Governor Steunenberg, broke his long silence today and for more than half an hour discussed himself and his imprisonment with representatives of the Associated Press, with whom he had expressed a desire to confer. He made no reference to the case on trial nor was he asked about it, as it was previously agreed that he should not be interrogated on that point.

CALLED TO DOOR, IS SHOT.

Prominent Rensselaer (N. Y.) Man Assassinated at His Home. Albany, N. Y., May 16.—Alonzo Hewitt, chief electrician of the Albany & Hudson railroad, was called to the door and shot and killed by an unknown man at his home in Rensselaer tonight. His death was almost instantaneous. The police suspect a relative, and are searching for him.

KUROKI AT WEST POINT.

West Point, May 16.—The methods of training an American army officer were demonstrated to General Kuroki, of the Japanese army, and the officers of his staff today. The Japanese were the guests of Colonel Scott, commandant of the academy, for four hours. They were welcomed with a salute of seventeen guns, watched cavalry drills in the riding hall, witnessed a parade of cadets on the barracks plaza and visited the academy buildings. The cavalry drill and grand review of cadets, which had been planned, were abandoned because of a heavy downpour of rain.

PEUDO BARONESS SENTENCED.

New York, May 16.—Anisa Louise De Mussy, popularly known as "Baroness De Mussy," recently convicted of having shot and killed Gustav Simon, a Broadway shirt waist manufacturer, was today sentenced to serve seven years and five months in state's prison.

SUBMARINE BOATS MEET THE TEST

SUBMERGED TWENTY-FOUR HOURS THEY RISE WITH MEN CONTENTED AND AIR SUPPLY GOOD.

Newport, May 16.—With all hands contented and a bountiful supply of fresh air, the twenty-four hour endurance test of the submarine Octopus and Lako rose to the surface of Narragansett bay at 4 o'clock this afternoon, ending their test of twenty-four hours under water.

Progress of the Haywood Trial.

During the session of the Haywood trial held today eleven talesmen were examined before a satisfactory jury was secured to replace William Van Orsdel, excused yesterday afternoon on a preliminary challenge from the state. Allen Price, who had been accepted, was excused. A talesman was called to replace Price, but his examination was deferred until tomorrow.

SULTAN OF MOROCCO YIELDS.

Paris, May 16.—The sultan of Morocco has decided to comply with France's demands for reparations as a result of the murder of Dr. Mauchamps, according to a letter from Fez which was handed the French minister at Tangier by the Moroccan foreign minister today.

REPARATION TO BE MADE FRANCE FOR THE MURDER OF DR. MAUCHAMPS.

Paris, May 16.—The executive committee of the Fion society, representing the advanced Irish Nationalists, considers Secretary Birrell's Irish bill to be an insult to Ireland. It wants the Nationalist members of parliament to withdraw from the house and demand the settlement of the "international dispute between Ireland and England" by the Hague arbitration court.

ZELAYA'S AMBITION.

Nicaraguan President Plans Federation of Central American States. City of Mexico, May 16.—The Record today says: A private telegram received here today from Nicaragua stated that a minister with a special mission to the Mexican government had been despatched by President Zelaya to Mexico. While the mission is not designated, it is very probably in connection with Zelaya's ambition to form a confederation of the Central American states.

THINGS LOOK BAD FOR MAYOR SCHMITZ

Abraham Ruef Goes Before the Grand Jury Investigating 'Frisco Affairs and Is Said to Have Turned State's Evidence.

Tells of a \$200,000 Boodle Fund from the United Railways, It Is Reported, and of the Division of the Money, He Pocketing \$61,000 as His Fee, His Honor \$50,000 and the Remainder Going to the Aldermen Enacting the Desired Legislation. San Francisco, May 16.—Abraham Ruef went before the grand jury this afternoon and, it is said, turned state's evidence. Ruef would not say what he told the grand jury, nor could any statement be had from Prosecuting Attorneys Langdon and Henry.

Four Indictments Slated.

After the examination of Ruef was concluded the grand jury remained in executive session until 6:30 o'clock. Subsequently the statement was made, but not officially confirmed, that indictments had been voted against four high officials of the United Railways and Mayor Schmitz, as predicted by an officer of the prosecution two weeks ago.

Submarine Boats Meet the Test

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE Associated Press Dispatches and is especially devoted to the Upper Peninsula interests.

Subscription Rates: For month, by carrier... \$ 2.00 For year, by mail... 20.00

MARQUETTE, MICH., MAY 17.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

'Rah for Ike Stephenson! Also 'rah for Halton!

Apparently Representative Gordon has gone and done it.

Let's see, where does this leave Mayor Schmitz?

Now a little spring, please, Mr. Weather Man. The crops need it. So do the people.

Running a steam shovel in the Panama canal zone at \$300 per month ought to be as good as running most banks.

It will require a week or two, perchance, to show whether the senate of 1907 is going to be remembered as the possessor of an "immortal sixteen."

We are reliably informed that Representative Erickson will not introduce for Escanaba a bill modeled on Representative Gordon's bill regulating the number of Marquette saloons.

Senator Fuller of the Thirtieth was "right" on the administration primary reform bill. Until information to the contrary is received we are tolerably safe in assuming that the two other U. P. senators—Moriarty and Smith—were wrong.

And if Mr. Andrews of Menominee doesn't want to be immigration commissioner there are many other original Smith men and staunch supporters of the administration who would be willing to take upon themselves the duties of the office for the stipend mentioned.

The senate hasn't done the sensible thing and struck out the primary law amendment closing the advertising columns of newspapers to candidates. At least it hasn't done it yet. However, the bill is to be reconsidered in the upper house, and perhaps the same seventeen or more votes that will ultimately pass it will restore it to sanity in this regard.

If Governor Warner were Governor Hughes the fight would be over; we would have to wait for our primary law amendments until the legislature of 1909. But Governor Warner is Governor Warner. He will meet the senate on its own ground, and if he doesn't beat it his experiences since January 1 will be belied.

The gubernatorial nomination in 1908 plays a certain part in the juggling over the primary election law. Auditor General Bradley is one of the aspirants who wants the 40 per cent provision retained in the law. Lieutenant Governor Kelly wants to see it struck out. As for Horatio S. Earle, prospective candidate on a good roads platform, he doesn't care, by gum, whether it is stricken or retained, such is his confidence in his destiny.

Representative Kelly's bill providing that circuit judges may sentence drunkards to take the pledge passed the house and has been sent to the senate. The bill is defective. How can the circuit judges compel the drunkards to keep the pledge, when once it is taken? Compared with the bill proposing compulsory cure for the drink habit in habitual drunkards it appears that there is not a great deal to be said for Representative Kelly's measure.

The Ely bill providing that the highway taxes in Michigan shall hereafter be paid in cash, the resultant fund to be expended under the direction of the highway commissioner of the district, instead of the taxes being "worked out," as has been the practice in the past, is in a fair way to become a law. It was passed by the house this week, and will now be considered by the senate, where there is every prospect that it will also be passed, as there are many strong arguments for it and none of moment against it. The bill is pronounced by no less an authority than Road Commissioner Earle to be one of the greatest steps in the direction of good roads ever taken in Michigan. The old system, long ago outlived, has been productive of poor roads instead of good ones. The Ely bill promises a considerable improvement.

UNDER THE LAW'S SANCTION. It seems a little curious that New England, the home of the Puritans and of the blue laws, should be among the first sections of the union to officially consider the legalization of Sunday amusements. Massachusetts, however, has a legislative committee engaged in the attempt to formulate a report on that subject.

The spirit of liberality is abroad in the Old Bay state, but it seems to lack a definite aim. The committee agreed on one point. All of the members were of the opinion that a weekly day of rest is needed for the preservation of the health and strength of the community. Six out of the seven say they recognize the fact that there is a tendency in the

Don't Use "Practically Pure" White Lead

There is no other pigment that is "practically" White Lead—no other paint that has the properties of Pure White Lead Paint.

Pure White Lead, good paint that it is, cannot carry adulterants without having its efficiency impaired. To get Pure White Lead durability, use

and it is generally hoped by people who have looked into the matter that it will be passed.

Press reports from Lansing run to the effect that there will be a pretty contest between the supporters of Governor Warner's binder twine plant bill and the friends of the Keweenaw prison bill.

Each may be said to be half way through the legislature. The one has passed the house; the other the senate. The senate, it is reported, will hold up the binder twine plant bill until it sees what disposition is made of the Keweenaw prison bill in the house.

On the other hand the governor's friends in the house are not likely to approve the project for a prison in the Keweenaw peninsula while there is any doubt about the fate of the binder twine bill. The situation seems one which could easily result in the failure of both bills, through a deadlock over them. It is one of the comely touches of the present session.

The recent insurance elections appear to have been a diamond cut diamond affair. Both the old administrations and the International Policy Holders' association have alleged dire irregularities on the part of each other, and both have met with considerable success in proving their allegations. Evidently the general order of the campaign on both sides was "everything goes." Everything apparently went. The officials of the Policy Holders' association will probably urge that they had to fight fire with fire, but the fact remains that we don't expect our reform organizations to wallow in the methods that they so vociferously denounce. We expect them to fight clean that they may live to fight another day. It is only by this method that they can assure themselves of the ultimate victory, for it is usually expected that they will lose the first skirmishes against their firmly entrenched foes.

Abe Ruef is a man who has always had a surprise or two up his sleeve, yet he has never more thoroughly surprised an audience than by his plea of guilty in the extortion cases, coupled by his declaration of an intention to live down his checkered past and to endeavor again to live up to the ideals which he cherished on entering public life. Though denying guilt in the specific case in which he pleaded guilty, Ruef's address to the court amounted to a confession of the truth of the general charge against him—that he has been an "undesirable citizen," a corrupter of men and of political institutions. His promises for the future came from a heart wrung with anguish and merit being regarded as sincere until their insincerity is demonstrated. Ruef's immediate future will be observed with interest. If he is sincere in his protestations he can have best aid in repairing the mischief he has done by co-operating with the prosecutors in securing the punishment of other men who have shared his guilt. There is much he could do without exactly turning informer, a thing against which he doubtless cherishes a natural aversion.

Should Convince the Greatest Skeptic in Marquette. Because it's evidence of a Marquette citizen. Testimony easily investigated. The strongest endorsement of merit. The best proof. Read it:

John Kelley, blacksmith, at 120 Jackson street, Marquette, Mich., says: "I have been a very healthy man and have prided myself on my ability to do as much work in a day as the best of them, but some years ago I sprained my back while lifting and after that a severe kink or spasm of pain used to catch me occasionally while at work and more often when I was sitting or standing when off duty. Attacks became more frequent and I began to feel tired and listless. At night I would be awakened by a severe attack of backache and would be unable to rest comfortably or even turn or shift in bed. Becoming uneasy I consulted a physician and began using the medicine he prescribed but received no benefit. I tried several remedies with no better effect until, being told to try Doan's Kidney Pills, I got a box at the Stafford Drug Co. and began using them. They seemed to be what my case needed. They went straight to the seat of the trouble and cured it. My back today is as strong as ever and I can do as much work as any blacksmith in the state of Michigan. My appetite is good and I sleep like a log at night. That is what Doan's Kidney Pills did for me, and you can say so."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

state to sanction such forms of outdoor recreation as do not disturb the peace and trespass on public rights, but when it came to deciding just what amusements should be legally sanctioned they were unable to agree at all. None of the members would sanction gunning or any kind of field sports, but fishing, being of a quiet and reflective character, they thought allowable.

Although the members were unable to agree as to details they state the case in a general way. The state, they say, should sanction such forms of recreation as do not disturb the peace or trespass on public rights. If, for instance, a party of young men wish to go out into the fields where they will disturb nobody and play a game of ball, it would seem as if they might be permitted to do so.

If they attempt to play in the public streets or in a residence neighborhood where they interfere with the public, or with the peace and comfort of other people, they should be forbidden. People who wish to enjoy a quiet Sunday have rights which must be respected.

The opinion of the Massachusetts legislators that if the public is going to indulge in Sunday amusements it should be done under the sanction of the law rather than in violation and in spite of it seems to be also sound. The open and unrebuked violation of law witnessed every Sunday in every state and city tends to bring all law into disrepute.

VOTES EVENLY DIVIDED. Honors were almost even in the senate contest over the primary law amendments. They were exactly even as far as the senators were concerned, but Lieutenant Governor Kelly's vote, though it couldn't be recorded on the major proposition of passing the bill, was sufficient to return it to the elections committee, whence its friends hope to take it when they are able to check up seventeen or more votes in its favor.

If these friends were not in command of the votes necessary to pass the bill, it is also true that its opponents were not in force sufficient to amend or mutilate it. They were not able to re-introduce the 40 per cent clause struck out by the house, nor were they able to make any change in its structure. Neither were those who do not approve of the clause able to strike out the prohibition on the use of the advertising columns of the newspapers by candidates. On this proposition, as on the major one of the passage of the bill, the vote was 16 to 16.

The fate of the measure may be said to be problematical, but there is reason for believing that it will be passed, finally, in substantially the form it was received from the house. All that is needed to secure this result is one vote from the sixteen recalcitrants, the friends of the bill meanwhile standing firm. To get this one vote there will be the influence of the administration, which is for the bill, and there will be abundant opportunity to trade on the basis of other bills in which individual senators may be interested. There is Senator Tuttle, for instance. He voted against the bill, being, it is reported, disgruntled because of the defeat in the house of his measure appropriating \$400,000 for an enlargement of the capitol. Perhaps it will be possible to apply some balm or other to Senator Tuttle's wounded feelings.

Anyway there is little to be gained by sticking out against the bill. Its supporters, the governor and the friends of Smith, are "the people." The bill is in the main popular. Its proposal to strike out the 40 per cent clause assures the voters of a direct nomination law that can't be thimble-rigged, landing the nominations in a convention. They like its proposition for a direct vote on senatorial candidates. To be sure the bill contains some ill-advised clauses, particularly those relating to the newspapers, but there is no doubt that the great bulk of Republican voters believe in its general purposes and approve them. They will not be likely to have much patience with the legislators who stick out against them.

The contest over the bill is but little less crucial than the one over railroad fares, and the governor's friends can be depended on to do their best to win it. Meanwhile it behooves the people's representatives who really want to represent to fall in line with him.

POSITIVE PROOF. Should Convince the Greatest Skeptic in Marquette. Because it's evidence of a Marquette citizen. Testimony easily investigated. The strongest endorsement of merit. The best proof. Read it:

John Kelley, blacksmith, at 120 Jackson street, Marquette, Mich., says: "I have been a very healthy man and have prided myself on my ability to do as much work in a day as the best of them, but some years ago I sprained my back while lifting and after that a severe kink or spasm of pain used to catch me occasionally while at work and more often when I was sitting or standing when off duty. FULL DISCLOSURE ON BONANZA BELT

6 to 12 Foot Sulphide Vein 9 per cent Copper Ore Smelter Reports Vouchers of Smelter Cash Returns Development Work, 3 Miles Directors Who Direct Assurance of Net Earnings of \$1,200,000

COMPANY CLAIMS

Vouchers which show Actual Operations are seldom open to public inspection. The reports from the Smelting Companies which extract the copper from the ores and pay for it exhibit the cash returns from output and are the vouchers of a mining company. A prospectus is designed to tell the prospects, the anticipations of the corporations. The public should know not only what is going to be, but what is. Earnings of today indicate profit of tomorrow.

Has the Bonanza Belt Company told the public what is?

Subscriptions, inquiries and applications show that the public not only appreciate, but universally acknowledge that the Bonanza Belt Copper Company has opened itself to public inspection and verification, beginning with the physical condition of its mines and ending with vouchers showing the method of conducting—and cash returns from—its business. It is the one mining corporation responding to the modern cry for corporate publicity.

SMELTER REPORTS Give details of ore shipments to the smelting companies, contents in Copper, Silver, Lime and Iron, value of product, and expense of reduction. They will be furnished upon application.

PROSPECTUS And maps exhibit the details of an active mining business. They strip the mines to eye and understanding. Engineers' reports tell the good and the bad. Directors' list includes bankers, copper experts, and substantial business and professional men. They will be furnished on application.

VOUCHERS In the form of duplicates of checks, statement of tons of ore thereby paid for, drawn to the order of the company, show cash payments. They will be furnished on application.

He who reads will comprehend the intrinsic value and future possibilities of an investment in the shares of this company.

Subscription Books close June 1st.

The offer of the company to sell 100,000 shares at \$5 per share will be executed as outlined in the public offer of last week.

BONANZA BELT COPPER COMPANY

Upper Peninsula Infant's Body in the River—The body of an unknown infant has been found in the power canal at the Soo. The corpse had evidently been in the water several days, and while the authorities are making an investigation, the mystery of the parentage of the child will probably never be solved. Whether the baby was alive when thrown into the water cannot be determined.

Dog Got the Hat—Victor Blomstrom was riding a bicycle on Ludington street, at Escanaba the other afternoon when the wind blew off his hat. The hat went rolling down the street with Mr. Blomstrom in pursuit. A dog who was watching the proceedings and whose funny nose was abnormally developed, also started in pursuit of the hat and reached it before the owner did. Instead of restoring it to Mr. Blomstrom the canine took it in his mouth and started on a run between two story buildings and from there up the alley. The last seen of the dog he was still running and Mr. Blomstrom was venturing his way towards his store, hatless.

Menominee Girl's Narrow Escape—A dark night, a misstep on the dock at Sturgeon Bay and several awful moments in the chilly water, almost resulted in the drowning of Miss Josephine Frea, a dining room girl employed at Menominee, as she stepped from the gang-plank of the steamer Charles McVea. To the quick wit of Charles Bell and a passenger named Schultz, Miss Frea owes her life. The young woman left Menominee to attend a wedding at Sturgeon Bay, and arrived at the latter port shortly before 3 o'clock the next morning. Carrying a purse in one hand and a small satchel in the other, Miss Frea walked down the plank and stepped upon what appeared to be the dock. Instead she stepped through a hole in the pier and in a moment was struggling in the deep icy water. At the same time Messrs. Bell and Schultz were a few feet behind her, and instantly realizing her serious predicament they jumped to the dock and with Mr. Schultz grasping Bell's legs, the latter bent over the pier and succeeded in reaching the partly unconscious girl as she managed to struggle upwards from the inky depths of the freezing water. Miss Frea was quickly brought to shore, where she faintly Restoratives were applied and warm clothing secured. Other than losing her purse and money, a few personal effects

and getting a thorough wetting, the young woman experienced no ill results and is back at her post at the hotel. The city authorities investigated the matter and awarded Miss Frea \$50 as compensation for damages and loss of personal effects as well as for the few thrilling seconds spent in the water.

Mud Puddle Prisoner's Trap—A thrilling man hunt and a fist fight, following the arrest of Ralph Atkins on a criminal charge, which began in the principal part of the town and did not

end until the prisoner became stuck in the mud, a quarter of a mile from where he made his dash for freedom, set the little town of Harris, Menominee county, in a fever of excitement. Atkins had been arrested by Deputy Sheriff Joseph Kowl, but only after the man had exchanged knifefights, much to the sorrow of the former, and the officer was driving along the road with his prisoner, when the latter leaped from the buggy and ran down the highway. In a moment the officer was in hot pursuit and as Atkins ran along the road for several hundred yards, the horse began to rapidly gain upon him. Finally the prisoner dashed to one side and darted through a clump of woods. Making a desperate leap from his swiftly moving buggy, the deputy continued the chase, which then ended somewhat abruptly. Atkins, tearing along at a ten second pace, did not notice the large puddle of mud "dead ahead," and the next moment he was tightly clutched by the slimy substance. In desperation he tried to kick himself out and then got in the middle worse than ever. His predicament was assisted somewhat when the muscular form of the sheriff's assistant landed on his back. Atkins was securely handcuffed and taken to town for his hearing.

GOOD WORDS FOR CHAMBERLAIN'S COUGH REMEDY. People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mrs. Edward Phillips of Barclay, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catherine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a dreadful cold myself, but I took Chamberlain's Cough Remedy and was soon as well as ever." This remedy is for sale by The Stafford Drug Co.

## CALUMET KNIGHTS OF COLUMBUS.

New Council Will Be Instituted May 26  
—Notes of Lodge News.

A meeting of the new council of the Knights of Columbus, of Calumet, was held Wednesday night for the purpose of perfecting the organization and electing officers. It was definitely made known that the lodge would be installed May 26, the date originally decided upon. This installation will mean for Calumet one of the largest gatherings of Catholics from all over the state ever seen in this region. The initiation of the members of a new council is a ceremony which will make a Knight of Columbus journey many miles. Calumet will present for initiation fifty-four candidates, not including the present Calumet members, who are about to withdraw from the Hancock council and affiliate with the local organization. The initiatory work will be done by one of the several state teams, though which one has not yet been determined. The following officers were elected:

Grand Knight—Dr. M. A. Thometz.  
Deputy Grand Knight—Jos. Ethier of Hubbard.  
Chancellor—Theodore Hennes of Lake Linden.  
Recording Secretary—John Leahy.  
Financial Secretary—P. J. Willesen.  
Treasurer—E. E. Gudikay.  
Lecturer—Jerry J. Sullivan.  
Judge Advocate—Patrick H. O'Brien.  
Warden—James W. Doyle.  
Chaplain—Rev. Father Zimmerman of Hubbard.

Medical Examiner—Dr. A. E. LaBarge.  
Insult Guard—Max Asselt.  
Outside Guard—Robert Chambers.  
Trustees—D. C. Harrington, Will Foley and Robert Smith.  
A judge of the Rathbone Sisters, the women's auxiliary to the Knights of Pythias, will be organized tonight at a meeting to be held at Hancock. It will include ladies from both sides of Portage Lake, and it was stated yesterday that the membership would reach sixty before the charter is closed. The Rathbone Sisters are being organized here through the interest which the wives of members of the Pythian order are taking in the forthcoming upper peninsula reunion of the Knights of Pythias in Hancock next month. The reunion will include the Rathbone Sisters of other cities, and the ladies of the Pythians of Portage Lake are organizing in order that the visitors may be properly entertained.

## FATAL ACCIDENT AT CALUMET.

John Coppo, Timber Boss in C. & H., Instantly Killed.

John Coppo, a timber boss employed by the Calumet & Hecla Mining company, was instantly killed Thursday afternoon by falling rock in No. 6 shaft of the Calumet branch of the mine. Coppo had taken his gang of timbermen to newly blasted ground on the forty-sixth level. He was satisfied that the hanging was solid, and began to lay out work for his men, but while he was so doing the rock broke loose and fell upon him, crushing out his life. One of his men was seriously injured and is now at the company's hospital.

Coppo's body was taken to surface and Mine Inspector Dave and Coroner Fisher were called. A verdict of accidental death was brought in by the jury. Coppo was thirty-six years of age and had been in the employ of the company for a number of years. He leaves a wife and two children. His parents are still living. The funeral will be held Sunday morning from St. Mary's church, Red Jacket, with interment in Lake View cemetery.

Two Minor Accidents.  
Dominick Chelsta, a miner employed in the Red Jacket shaft of the Calumet & Hecla, was caught in a premature blast yesterday morning and was seriously injured. He was taken to the company hospital, and it was believed yesterday afternoon he would recover.

Jacob Mitila went to work in the Wapreine mine last Tuesday. On entering the skip to go down for his first shift, he missed his footing and fell down the shaft a considerable distance. His fellows went down to bring up his supposedly dead body, but were surprised to find that he had not even suffered a broken bone. He was taken home to recover from the shock and various bruises.

John Gregory, an employe of the Calumet & Hecla mills at Lake Linden, was caught between a rope and a pulley this week and before extricated had suffered internal injuries. He will recover.

## OSCAR J. LARSON TO LEAVE.

Prominent Attorney of Calumet Will Locate in Duluth.

An announcement was made in Calumet yesterday that Attorney Oscar J. Larson had decided to leave Calumet and locate in Duluth. Mr. Larson is a senior member of the firm of Larson & Galbraith, the best known legal firm in Calumet, his partner being W. J. Galbraith, representative in the state legislature.

Mr. Larson said yesterday that he intends to open an independent office in Duluth, but that he has the assurance of Thomas F. Cole, president of the Oliver Mining company, and leading spirit in many copper mines, that he will receive a share of the business of the Cole companies. Mr. Larson will be recognized as one of the attorneys of the Cole-Ryan and kindred interests.

O. J. Larson was prosecuting attorney of Houghton county for six years, retiring from the office to be succeeded by August W. Kerr in 1904. During that time he made a remarkable record as a just and capable prosecutor and established himself firmly as one of the leaders of the Houghton county bar. He honored his every department of his profession and the copper country loses a brilliant legal light when he leaves Calumet.

Mr. Larson graduated from the University of Michigan and established an office in Calumet in 1894. He associated himself with W. J. Galbraith ten years ago, and the firm has been very successful. Mr. Larson has been prominent in local affairs in Calumet, and has for years ranked as one of the first citizens of the place. He will leave for Duluth as soon as he can close upon his current affairs but will continue to be associated with Mr. Galbraith in such legal business as may come to him from the copper country.

## BISHOP EIS COMING.

Marquette Prelate Will Be in the Copper Country May 26.

Right Rev. Frederick Eis, bishop of the Catholic diocese of Marquette, and Sault Ste. Marie, will visit Calumet on Sunday, May 26, to administer confirmation to a class of 175 children. The children will partake of their first communion next Sunday morning.

Bishop Eis is on this occasion making his second visit this month. He was here last Sunday and administered confirmation to large classes in Houghton, Hancock and Dollar Bay.

## COPPER COUNTRY THEATERS.

Search Is Drawing to a Close, but Many Good Things Are Coming.

The theatrical season in the copper country, which by the way has been unusually brilliant one, is drawing to a close or should be, but there are still a number of good things coming. In fact, three of the bookings rank with the best attractions that visit this country.

# The American citizen has stood for more imposition in the matter of cigars than in anything else he buys with money

In fact, he's so used to being "worked" by the cigar manufacturer day after day, that he's pretty near come to believe there's no way of knowing what he is getting, anyhow.

The American Cigar Company stands for full value in cigars. It believes the man with five cents to invest is entitled to get his money's worth as much as the investor in any other property.

It is against box-stuffing, against substitution, against shoddy, poor cigars and against every kind of cigar imposition on the public,—and it is adopting every possible method of exposing them.

It believes the only way to build up a great and permanent business is to deal honestly with the people, to give good value and uniform dependable quality all the time.

Several million smokers have found it out—and are buying their cigars by the "A" (Triangle A) mark on the box instead of taking everything for granted and smoking whatever is handed out.

## That's Your Cue!

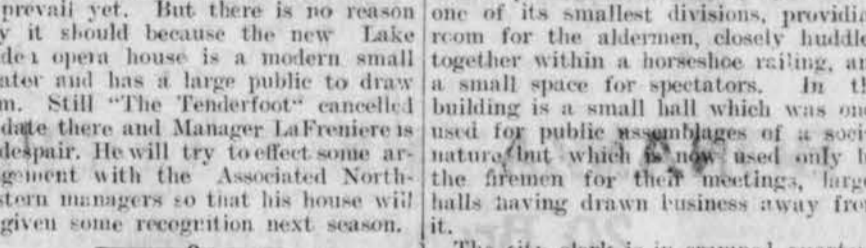

If you want to get acquainted with "A" (Triangle A) quality and satisfy yourself as to whether our claims can be proved or not, try

## The New CREMO

Every box is now extra-wrapped in glassine paper, sealed at each end with the "Triangle A" in red. The cigars are kept clean, fresh and in perfect smoking condition until the box is opened.

## AMERICAN CIGAR COMPANY

Manufacturer

In a bad way for bookings. Time was when it was considered that when a show booked Lake Linden it was worth while and that sentiment seems to prevail yet. But there is no reason why it should be so. The new Lake Linden opera house is a modern small theater and has a large public to draw from. Still "The Tenderfoot" cancelled its date there and Manager LaFrore is in despair. He will try to find some arrangement with the Associated Northwestern managers so that his house will be given some recognition next season.

## IMPROVE HANCOCK CITY HALL.

Needed Changes in the Building Among the Possibilities.

The Hancock board of education appeared Tuesday night to have had the idea that the common council had decided to build an addition to the city hall, the board acting upon this idea in considering a location for the library. It was decided to ask the city to permit the use of a portion of the addition for library purposes, and Mr. Bentley, a member of the board, and who is also an alderman, was asked to bring the matters before the council next Monday night.

## Thousands Have Kidney Trouble and Never Suspect It.

How To Find Out. Fill a bottle or common glass with your water and let it stand twenty-four hours; sediment or scum will catch on the sides of the glass. If it is evidence of kidney trouble, too frequent desire to pass it or pain in the back is also convincing proof that the kidneys and bladder are out of order.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidney, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes. You may have a sample bottle and a book that tells all about it, both sent free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. Writing mention this paper and don't make any mistake, but remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y.

## OPENING OF BASEBALL SEASON.

Game at Duluth Yesterday Postponed Until Tomorrow.

The season of the Northern-Copper Country Baseball league opened at Duluth and Winnipeg yesterday, but only in the latter town was the game played. At Duluth, where Houghton was to play, bad weather prevented the game. The contest was postponed until tomorrow.

There are operations doubt in the copper country yesterday regarding President Glass' attitude. He was quoted as saying that the league season opened at Duluth, even if the game was not played. By this he meant that the game will be rescheduled as a postponed game, and Duluth will have to pay Houghton the expense guarantee. All conditions of the season obtain whether the first game is played or not.

The copper country will not take much pleasure in the season for a few days yet, however, because both teams are away from home. The season here does not open until May 30. It appears now that the opposition of the military orders to playing baseball on Memorial Day will submit to a compromise. If the game is played following the observance features, it is possible that it will not be objected to. The reason for this is that it will entail a loss on the clubs for the reason that the Memorial Day games are always largely attended. Possibly next year the military interests will ask the league to drop Memorial Day from the schedule in the copper country.

The statement was made in these columns recently that no games had been played at Calumet in Memorial Day since the Spanish-American war. President Glass says that a baseball game between two league teams was played in Calumet last Memorial Day. There is a strong possibility that one will be played there this year also, on a compromise basis, now possible in Houghton and Hancock.

## FAMOUS SOUTH RANGE CASE.

Mulari Saloon Case Tried in Chippewa County Court.

A special session of circuit court has been in progress today at the court house for the purpose of hearing the case of the Wheel Kate Mining company vs. Olli Mulari et al., a suit brought by the mining concern to restrain the defendant from conducting a saloon on certain property in the village of South Range in Houghton county, says the Soo News.

It is a Houghton county case, a change of venue having been granted by Judge Streeter after he had granted a temporary injunction restraining the sale of liquor on the property until the case had been given a hearing. The litigation arises from the fact that the mining company, in disposing of its properties of which that occupied by Mulari is one, had incorporated in the deed a provision that the property should never be used for the sale of liquors.

It appears that the defense does not deny that such a clause was incorporated in the deed or that the clause would not be effective under ordinary circumstances, but it puts up the claim that the company, for a stipulation of \$750 each, has permitted the sale of liquors on some six other properties, the titles to which are affected by similar clauses, and that, by so doing, the company has waived the right to enforce the clause in any and all cases. The case is held for a sort of a test and one in which all the saloon men of that district are interested.

## MUNICIPAL MATTERS.

Hancock has two important public works projects on which work will shortly be commenced. These are the paving of the streets west of the present paved district and the construction of a retaining wall and the filling of the Front street ravine. Work on the pavement will be started when the special assessment to defray the cost is levied. The work on the retaining wall and the filling of the ravine will be awarded at the next meeting of the council. The Hancock Real Estate & Improvement company, which appears to be identical with the Dakota Heights company, and which owns an big addition to Houghton, has already resumed operations on the filling of the head of the ravine by the hydraulic system, a work started last year. If the company secures the city contract for the wall and fill, it will carry on both operations at once. This company has undertaken the unique project of creating new real estate in West Hancock by washing down the adjacent hills into ravines and leveling both off. The Front street ravine is to be included in the general scheme.

Red Jacket is still enjoying an agitation over the crossing and block pavement which was laid last year on several of the streets of the village. The pavement there is undoubtedly a failure because of the poor quality of the blocks. It is found that the wood, instead of being thoroughly impregnated with creosote oil, seem to have had only an external treatment with that preservative, and that the weather warps it. A representative of the company which furnished the blocks is on the ground making an inspection, and it is thought that within a few days the work of repairing the pavement and replacing the warped blocks will be commenced.

Marshal Trudell of Red Jacket will shortly appoint a day when all citizens will be expected to participate in a general cleaning. Such a day is also to be appointed at South Range. The weather in the copper country this spring has been of such a disagreeable nature that a general cleaning has been so far impossible.

Lake Linden has as yet come to nothing definite in the pavement discussion. The council is seeking the views of the taxpayers on Calumet avenue and at the next meeting something final will be done.

The paving question in Laurium seems to be at a standstill. The council was to have met last week for the purpose of acting on the matter, but the meeting was postponed without anything being done and just now it is uncertain when it will be taken up again.

## CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

There is probably no medicine made that is relied upon with more implicit confidence than Chamberlain's Colic, Cholera and Diarrhoea Remedy. During the third of a century in which it has been in use, people have learned that it is the one remedy that never fails. When reduced with water and sweetened it is pleasant to take. For sale by The Stafford Drug Co.

## THROUGH SLEEPING CAR SERVICE

Between Copper Country Points and Mackinac City, Without Change.

Beginning June 1st, the D. S. S. & A. R'y. will inaugurate a through sleeping car service between Copper Country points and Mackinac City on the night trains. (5-16-31)

## PILES CURED IN 6 TO 14 DAYS.

## CONCERT AT EWEN.

The Mining Journal is advised from Ewen that the pianoforte and song festival given at Ewen Opera House Saturday evening by Miss Levine's pupils was attended by a large and appreciative audience, and that the ability displayed reflected much credit on both pupils and teacher. The program opened with a piano duet by the Misses Juttner and Thompson. This was followed by vocal music by Miss Katherine Cosgrove, assisted by Anna Cosgrove, pianist; piano duets by Laura Lytle and Flora Bruno; vocal duets by Mrs. Shaw and Miss Levine; piano solos by Mark Grooms, Glenroy Stewart, Edna Cole, Katherine Norton, Kathleen and Anna Cosgrove and Florence Juttner, all of which were received in a very satisfactory manner. Among the most popular numbers were the violin solo of Miss Max Norton and the vocal baritone solo of W. Cole. Miss Levine, who needs no introduction to copper country musical circles, rendered her number, "Weber, op. 65," in an unusually brilliant style. People were present from Kenton, Sidway, Fair Park, Bruce's Crossing, Choate and Matchwood.

## MICHIGAN COLLEGE OF MINES

F. W. McNair, President.  
Located in Lake Superior district. Mines and mills accessible for practice. For Yearbook and Record of Graduates apply to President or Secretary. HOUGHTON, MICH.

visiting the mines of the copper country. They are guests at the Hotel Scott, Hancock.

A fund of \$300 has been raised in Houghton to defray the cost of paying the Pilgrim river for dynamites who are indulging in a wholesale slaughter of the fish.

The Dandy Dixie Minstrels, a real negro organization, will appear at the Kerregu theater tonight. Soft shoe dancing and Southern melodies may be expected in profusion.

Rev. W. E. Marvin, pastor of the Laurium M. E. church, announced that he has secured Rev. J. M. Ansel, one of the Ostrom revivalists of last year, for a two weeks revival service, beginning June 12.

The Vulcan Copper Mining company has been formed with \$3,500,000 capital, and a large number of western people are investing in the same. The company owns properties skirting the outer edge of Balaklava and Trinity. The properties have no present value—only a cropping or two.

Our California correspondent, who has recently visited Trinity in Shasta county, Cal., reports that under ground eight men are at work passing the mine for the shipment of ore when the Balaklava smelter is completed and the tramway erected, and that the property will then be in position to ship 500 tons of ore per day, says the Boston News Bureau. About seventy men are at work on surface construction. The skipway, which is to be utilized for hauling the ore up to the Balaklava ore cars, should be completed in about a month and a half. It is 700 feet in length, up the hill from the main tunnel, and cars to handle this ore will be operated by cable. The tramway to the Balaklava smelter is being very slowly constructed, and there is prospect that the smelter will have to await its completion rather than the tramway await the completion of the smelter. There are now only about seven towers in position and the supervision appears to be very lax, so that at present time there is little hope of the Trinity mine entering the producing ranks much before the end of the year.

### City Brevities

Today's weather: Probably showers and cooler.

Yesterday's temperatures: Seven a. m., 39 degrees; noon, 41; 7 p. m., 45. Maximum, 58 degrees; minimum, 39.

William Pohlman of Detroit is in the city.

David C. McCarran, of Newberry, is looking after business here.

The ladies' of the St. Peter's parish will give a card party at Baraga Hall this evening.

The Baptist Ladies' Aid society will meet at the church at 3 o'clock this afternoon.

St. Mary's guild will meet with Mrs. L. F. Reiding, 115 East Hewitt avenue, at 2 o'clock this afternoon.

The Methodist Woman's Home Missionary society will meet at the church parlors this afternoon at 2 o'clock.

The West Ends have accepted the challenge of the Rival Juniors and will play them at the West End grounds Wednesday, May 29.

The Ladies' Aid society of the Presbyterian church will meet this afternoon at 2:30 o'clock with Mrs. Grace Fraser, East Michigan street.

Marriage licenses have been issued to Kalle Syrjala and Minna Soderman, of Princeton; Louis Doby and Susan Cole, of Negaunee, and Oscar Johnson and Hilma Carlson, of Ishpeming.

Marquette lodge of the Knights of Pythias had as its guests last evening a large delegation of members of the order from Ishpeming. The third degree was exemplified by the visitors.

W. D. Spark of Illyria, O., vice president of the Superior Iron & Chemical company, a combination in which Berry Bros. of Detroit have an influential part, was in the city yesterday. E. E. Johnson, Berry Bros.' superintendent, has also been here this week.

The school for deaf and dumb children, a department of Marquette's educational system, to be established at the opening of the fall term largely through the efforts of Superintendent Brooks, will be in charge of Miss Templeton, an instructor thoroughly competent in her unique line of work. Miss Templeton is at present teacher of the class of deaf and dumb children of Ishpeming's schools.

Friends Remembered Yeazel—Walter Yeazel, for the past eight years clerk at the Hotel Marquette, left this week for Minneapolis, where he has accepted the position of clerk in the Hotel Brunswick. Before Mr. Yeazel's departure he was presented with a gold watch fob, set with diamonds, by a number of his personal friends.

Female Impersonator a Hit—The best features of the Dixie Minstrel performance at the opera house last evening were several of the specialties toward the close of the evening. One of the best female impersonators ever seen here. He possesses an acute soprano voice and in costume appeared a very handsome quadroon girl. John Pampin is an excellent juggler and deserved the applause accorded him.

Good Weather Coming—According to the weather bureau the temperature has suddenly risen twenty-six degrees in South Dakota and that section is experiencing a spell of June climate. There is liable to be more or less disturbance in this locality for a day or so, but a spell of warm, and presumably clear weather, is almost certain. There are no indications in any locality that this vicinity will again be visited by snow or a fall in temperature.

Invite Upper Peninsula—The West Michigan State fair, which will be held at Grand Rapids, shortly following the Marquette county fair, will offer premiums aggregating \$10,000. The state appropriation of \$5,000 will be devoted entirely to industries, products of the soil and cattle. The races last season proved such a feature that an unusually large card of racing events will be arranged. The directors are especially anxious to secure the co-operation of upper peninsula counties in making the fair a success.

Another Electrical Patient—Tuesday, Axel Olson, a Michigan resident, was committed to the state hospital at Newberry, suffering from the delusion that he was a human dynamo. This morning William Rich, of Princeton, who has been held at the county jail for several days and who is afflicted with a similar delusion, will be examined in probate court. Rich thinks that his feet have become charged with electricity and that flashes are playing about in the atmosphere near him.

Recital a Success—The recital by Professor Kluge and pupils at Fraternity Hall, last evening, was attended by an audience that filled the room to its capacity. It was an appreciative audience and the applause accorded the different numbers was spontaneous and enthusiastic. The program was one well suited to please a diversity of tastes, comprising both popular and classical numbers. One of the most pleasing selections was "Valse Romantique," by the orchestra, a selection of Professor Kluge's own composing. A violin duet with celli, oblige Kluge, Behan and Anderson, also made a distinct hit.

Keepers Are Landed—The lighthouse on Stannard Rock is in commission at last. The third attempt of the Handford tug Ethel J. to land Keeper Chambers and his three assistants was successful at 3 o'clock yesterday afternoon, and from now until the close of navigation in December the beacon on the dangerous reef will flash out its warning to Lake Superior navigators. The crew of the tug report that the ice is still piled up high at the pier on this side. It was the existence of this ice that defeated previous attempts to land the men. Never before, it is believed, has the Stannard Rock light gone into commission so late in the season.

Jamestown Stamps Arrive—Those wishing Jamestown Exposition stamps can now secure them at the postoffice. The stamps have been issued in one, two and five-cent denominations, but Postmaster Mangum only ordered the one and two-cent issues from the United States treasury. The stamps are fine specimens of the engravers art. The two-cent issue is bright red in color and has a picture of the founding of Jamestown in 1607. In the foreground the adventures are seen landing from their boats; while in the distance are the sails of the ships. On the one-cent issue is a cut of Captain

John Smith. The aged pilgrim wears a bristling beard and is encased in full armor. The color of the latter stamp is green.

### FINDS RELIC OF A FORMER RACE

AX OF HIGHLY TEMPERED COPPER DISCOVERED BY SUPERINTENDENT ON PRESQUE ISLE.

### FILE CANNOT SCAR SURFACE

Believed to Have Been Made by Tribe Antedating the Indian—Proves the Previous Existence of Long Lost Art.

Yesterday morning Robert Hume, superintendent of mines, found a small copper ax of evident aboriginal origin on the shore of the neck of Presque Isle, which in point of interest probably takes rank with any relic ever discovered in the state. The ax, which is a little over three inches in length by an inch and a half in breadth, and weighs four and one-half ounces, is now on display at Schoch & Hallam's jewelry store, South Front street. It was discovered turned upon the sand at a point where Mr. Hume had some work done last fall, and it is believed it was unearthed at that time.

If the ax is what it appears to be it will indisputably controvert the oft-repeated claim of metallurgists that copper cannot be tempered. Mr. Schoch says that the ax is unquestionably copper and from its scales he believes that it was hammered from a piece of pure metal into its present shape. It is highly tempered, being so hard that the hardest of files will hardly scar its surface. It offers, in fact, more resistance to the file than highly tempered steel.

Many scientists have claimed that there was a time when copper was tempered, but that the art had been lost. It was hammered from a piece of pure metal into its present shape. It is highly tempered, being so hard that the hardest of files will hardly scar its surface. It offers, in fact, more resistance to the file than highly tempered steel. Many scientists have claimed that there was a time when copper was tempered, but that the art had been lost. It was hammered from a piece of pure metal into its present shape. It is highly tempered, being so hard that the hardest of files will hardly scar its surface. It offers, in fact, more resistance to the file than highly tempered steel.

Once Chippewa Territory. Prior to the coming of the white man this locality was included in the domain of the Chippewa Indians, who received occasional visits both pacific and hostile from the Hurons, Iroquois and other tribes, all however, possessing the same racial characteristics. The Indians' knowledge of metallurgy has, however, always been crude and, while the ax may have at one time been in the possession of one of these tribes it would be logical to presume that they had manufactured it. It is presumably a relic of a race antedating the redman, possibly a branch of the Aztec tribe, as they were clever in metal working and are believed by many scientists to have been the real aboriginals of the American continent. The finding of the little ax by Mr. Hume bears out the saying "Truth is stranger than fiction." In his romance, "The Heart of the World," Rider Haggard makes his hero discover a tribe that possessed the secret of tempering both gold and copper.

One Time a Battle Ground. Mr. Hume says that Presque Isle was at one time undoubtedly a rallying place for the Indians, and that it was probably one of the great resorts of the tribes in this vicinity in times of invasion. The number of arrow heads Mr. Hume has found on different occasions and distributed among his friends would seem to indicate that many battles had been fought on its shores. It is not believed, however, that the ax found yesterday morning was manufactured as a weapon of offense. It greatly resembles in construction those of more modern make and was doubtless primarily made for useful pursuits.

PLANT WHITEFISH FRY. United States Fish Car No. 1 Liberates 4,000,000 Here.

Four million whitefish fry were planted in the lake put from this city yesterday morning by the United States fish car No. 1, of the department of commerce and labor. The fish were brought from the Duluth hatchery, and had been hatched but a little over twenty-four hours. As Captain Parker's tug, the Theora, could not be secured, Captain W. E. Smith, in charge of the car, secured the Nellie Cotton and personally supervised the planting of the fish. Speaking of his work Captain Smith said:

"The brook trout, recently planted in this vicinity were from the state hatchery at the Soo. Our car is directly under the supervision of the department of commerce and labor and secures its supplies solely from government hatcheries. Our range is from Maine to California, and from Duluth to the Gulf of Mexico. We are on the road all the year and there is not a breeding place for whitefish or trout that we do not touch. Trout fry are much easier to look after than whitefish. Trout can be fed at the hatchery while the little whitefish must be liberated within a short time in waters which teem with microscopic animalcules. The whitefish is much smaller than the trout at birth, its food sack does not contain so much sustenance, and it must be handled with great rapidity."

Girls will smile through the years, Their eyes will always glisten with glee. They will never be hidden by tears, If they take Rocky Mountain Tea.

# Today's Anniversary Special

## Underclothes of Consequence

Not because every woman must have them—nothing new about that. But because this "cotton up" business is enough to keep one awake nights thinking how to cope with it. Do you suppose it is easy to get a 68-cent Night Gown of proper fullness and quality that won't vanish competely in the laundry? Not a bit of it. It is the same with other low priced garments, so when you do succeed we want your attention.

# Pianos That Are Sold on Their Merits

The best proof that the Pianos sold by the Cable Piano Co., are in every way good value is the large business that is being done both in the Upper Peninsula and the entire United States. We do not resort to "quack" advertising, such as "sales" where instruments are advertised to be almost given away; nor to guessing contests where people are made to believe they are getting a piano for \$50 to \$100 less than they ought to pay. Your common sense tells you that this is ridiculous.

We appeal to a man's good judgement, and as we have done in the past we will continue to give real value for the money invested, whether you buy one of our most artistic instruments or a medium priced one.

## FOR THE CELEBRATION.

Arrangement Committee Appointed to Get Up Fourth of July Program.

The meeting Wednesday evening at Braastad's Hall to consider matters pertaining to the Fourth of July celebration was an enthusiastic one and judging from the expressions of the business men the celebration should be one of the best ever held here. D. J. Sliney, chairman of the council committee appointed by Mayor Roberts, presided. Suggestions as to features were offered, but nothing definite was outlined, the plans being left in the hands of the arrangement committee, which Chairman Sliney was authorized to appoint. Yesterday Mr. Sliney named the following committee:

F. E. Keese, chairman, Fred Braastad, G. A. Newell, J. L. Bradford, J. S. O'John Lacey, C. T. Kruse, Louis Toutloff, H. G. O'Keefe, A. J. Youngbluth, William Leininger, B. J. Goodman, Jr., Ed. J. Butler, George Wanek, E. V. Cassidy, J. E. Cassin and P. H. Devine. Chairman Keese will call the committee together within a few days when a number of sub-committees will be appointed.

It was the sentiment of those present that the parade be made a strong feature. Ishpeming has set a pace for some years past for parade features and it is proposed to eclipse all previous efforts of the kind. It is understood that the prizes for the displays will be exceptionally large. The committee will ask every business house in the city to prepare floats. Following the parade there will be a program of acts taking up the rest of the day, winning up with a fire works display from the top of the high bluff on the north side of Lake Barcroft.

The council will probably be asked at its next meeting to pass a resolution prohibiting the use of dynamite in the city on the Fourth. A request will also be made by the committee that no fire works be exploded while the parade is in progress.

## EL FAVOR LOOKING WELL.

Western Paper Gives Encouraging Report of Conditions at Property.

There is now reason to believe that the El Favor mine located in Mexico promoted and originally developed by Captain R. J. Williams, formerly of this city, is going to come out a winner. All of the Marquette county people who invested in the shares of the El Favor Mining company, have received since the property has been taken over by another corporation all of the money they paid into El Favor, together with certificates for the same number of shares in the new company as they held in the old. This gave them the stock in the present operating company without cost. The May issue of the Rocky Mountain Gold Miner gave the property this mention, in part:

"This mine is already looming big among the producing mines in the republic and its future can hardly be measured on account of its vast tonnage of ores and their average high grade, which during the month past has ranked in every part of the mine, good, bad and indifferent, in more than 200 assays taken from day to day, as development work proceeded, about \$50 per ton."

"This company has ample funds in its treasury, both in Mexico and at the home office, and the company of the railroad, which has already been determined upon as to its route, places the stock in such position that from September on at least four times as great an amount of ore can be shipped as at present, and this alone, without considering the ores to be milled, would give an output of more than \$100,000 per month, and place this mine immediately in the dividend ranks."

## LIBRARY'S NEW BOOKS.

The following excellent books of non-fiction have just been added to the shelves of the Ishpeming public library:

Curtis, Wm. E.—United States and Foreign Powers.  
Davis, Richard H.—Real Soldiers of Fortune.  
Hutton & Clement—Artists of the Nineteenth Century.

Johnston—Old Time Stories and School books.  
James—The American Scene.  
Marline—The Friendly Stars.  
Laughlin—Industrial Amalgams.  
Peary—Nearest the Pole.  
Roosevelt—Good Hunting.  
Roosevelt—Outdoor Pastimes of an American Hunter.  
Cleveland—Fishing and Shooting Sketches.  
Spurling—Introduction to Business Organizations.

Thrum—The Missions of California and the Southwest.  
Young—Complete Motorist.  
Brooks—Social Urethra.  
Pryor—Reminiscences of Peace and War.  
Harrison—Studies in Early Victorian Literature.  
Douglas—The Many Sided Roosevelt.  
Powell—Historic Towns of America. (4 vols.)

Father says: "Say, Mother, can't you make us some more of those fine doughnuts if I will bring home a pair of Cudaly's Peacock Lard again?" (5-17-07)

# DARANTELLA

## OPENED TO BIG BUSINESS.

Grand Lincater Played to Four Packed Houses Wednesday Evening.

In spite of the unfavorable weather Wednesday evening, Lawton & Joyce's new moving picture-illustrated song theater in the Kennedy block, South Main street, opened to big business. Fully half an hour before the time set for the opening the crowd began to assemble and after the house had been filled for the first performance there were a sufficient number on the street and sidewalk to fill the place twice more. Many who were unable to get in for the second performance went home, intending to come later in the week. Four performances were given, the house being filled for each. The program consisted of pleasing moving pictures and two illustrated songs. The interior of the little place was very much admired by those who attended the opening performances and the management was commended for the manner in which it handled its patrons. Lawton & Joyce certainly did good work in opening their house in such a short time after commencing the improvements, it having taken just fifteen days from the time the carpenters began work. The front, which is painted in white, with a lake and forest scene above the entrances, and brilliantly illuminated, is the most attractive front in the city. Trembath Bros. did the work.

A. C. Schoot, who is to open a house in the Veecker block, expects to have the place ready for opening some evening in the next week. He said yesterday that he would likely redecorate the front. Changes will also be made in the interior decorations. Mr. Schoot expects his machine operator and his two sisters, who will aid him in giving the entertainments in a hall on the second floor of the house, before the end of this week.

## Mining News

### AMERICAN COPPER PRODUCTION.

So Far This Year Much Behind the Record Achieved in 1906.

The Boston News Bureau figures the production of copper in the United States, Mexico and Canada for the month of April at 96,567,700 pounds, against 102,495,230 pounds the month previous and 85,288,160 in February. The reduction in April was largely due to labor troubles in various important copper camps, and the copper output for that month fell considerably below that for March. The total production for the first four months of this year compares as follows:

1907	1906
January 84,335,143	87,297,400
February 85,288,160	89,205,800
March 102,495,230	96,480,081
April 96,567,700	98,044,890

The Lake Superior and Utah camps were the only districts to show an increase in April over the same month in 1906. Butte fell over 3,000,000 pounds behind April a year ago. It is very evident from the table above that the 1907 copper production of this country is far behind the corresponding four months in 1906. For the first four months the total is 337,440,000 pounds below 1906. The severe weather last winter, and now the strike troubles, together with some reduction in high grade ore reserves here and there, are contributing to the smaller output. Although the theory many producers state that it is wise to mine lower grade ore on a high copper market—ore unprofitable on a low copper market—still in practice the majority of mines strive to make a maximum output on the present 25¢-26¢ cent copper market. If high grade ore reserves have been depleted—and this is very probable in a number of instances—it will be increasingly difficult for the mines of this country for the remaining months of this year to make up for the loss for the first four months. The situation is destined to be an important factor in maintaining the present strong position of the metal.

### Lake Superior April Output.

The estimated production of the Lake Superior mines for month of April was 29,718,562 pounds, an increase of 109,427 pounds over the March output and 2,200,362 pounds in excess of the 1906 April production. The output of the mines in pounds of copper by month compares with last year as follows:

	1907	1906
January	29,314,967	19,168,209
February	18,667,753	17,344,206
March	29,009,135	19,201,000
April	29,718,562	18,598,200
Total	80,251,417	74,311,500

The detailed figures for April follow:

	Lbs.	Perc't
Output, copper		
Calumet	8,480,000	44.8
Wolverine	682,500	29.15
Tamarack	1,000,000	28.14
Champion	1,537,200	27.5
Baltic	1,433,600	22.15
Tripoint	705,280	18.07
Algonk	844,000	18.60
Oscoda	1,094,000	18.52
Allouez	275,738	23.23
Winona	165,740	18.8
Quincy	2,002,000	19.52
Mohawk	742,000	16.04
Isle Royale	274,000	15.3
Franklin	216,000	12.4
Centennial	324,104	20.2
Adventur	100,000	12.5
Michigan	200,000	18.26
Victoria	112,000	13.2
Mass	288,000	14.6
Total	29,718,562	

\*Wolverine lost seven days because of stamp mill pump accident.

A broker says: "I will be greatly interested in next month's dividend action by the Oscoda and Tamarack directors. The Osceola & Hecla spoiled a very pretty scheme on the part of the Bigelow people to turn their properties over to Amalgamated affiliations. The Bigelow interests were buyers of Osceola at 100 and even higher. Osceola is earning \$30 per share on the present copper market, and something better than \$12 dividends should be forthcoming."—Boston News Bureau.

### EPWORTH LEAGUE.

The anniversary of the Epworth league will be observed next Sunday at the First Methodist Episcopal church. The old people, so far as desired, will be furnished with carriages to take them to and from the morning service, at which the pastor will preach a sermon specially prepared for them. In the evening the pastor will address the young people of the church.

### ELKS' PARTY TONIGHT.

The dancing party to be given tonight at Braastad's Hall under auspices of the Ishpeming lodge of Elks promises to be one of the social events of the season. Judging from the demand for invitations the attendance will be larger than that of any of the series of parties given during the winter. A large number are expected from Negaunee. Trombly's orchestra will be augmented by extra men, and an excellent lunch will be served.

### ISHPEMING IN BRIEF.

James Gleason has opened his saloon in the Cronin block, on Main street.

The degree team of Zenith lodge, Knights of Pythias, visited the Marquette lodge last evening, conferring the third degree.

Michael Collins, who has been ailing for some time past, submitted to a surgical operation yesterday at the Ishpeming hospital.

The annual meetings of the board of review of this city will be held June 18 and 24, the former to be a private session and the latter open to the public.

George R. Persons will leave the latter part of the month, perhaps the 26th or 27th, for Salt Lake, Utah, and other Western cities, where he will spend a month or more.

Miss Abbot, a missionary from Godhra, India, will give an address next Monday evening at the Salsbury Methodist church. The admission will be free but a collection will be taken up.

S. E. McKenney arrived home yesterday from a seven weeks' visit in California having gone West for the benefit of his health. He gained in weight while he was away and he feels exceptionally well.

Mrs. Ed and Peter Gingrass and J. P. Jones arrived in the city yesterday from Milwaukee to attend the funeral of the late Peter Gingrass, Sr., which will be held this morning from St. Joseph's church.

The ladies of Calvary Baptist church will conduct a five-cent social this evening at the church. The choir will render a program of musical numbers. Refreshments of various kinds will be served.

The sewing society of the Mission congregation will conduct a bazaar next Tuesday and Wednesday afternoons and evenings at Braastad's Hall. Refreshments will be served and musical and literary programs will be given.

Miss Templeton, who has taught the deaf pupils at the Ishpeming schools for

the past year, has resigned and has accepted a similar position at the Marquette schools. She will take her new place at the opening of the school year in September.

Thomas M. Solar, who will erect the new high school, was on his way to this city when he received a telegram advising him of a death in his family at Antigo. He is expected here now within the next two or three days. The pumping of the water from the excavation for the foundation will not be started until Monday morning.

### FROM HOPKINS' CURB LETTER.

"The unlisted market today is quiet with very little trading. Superior & Pittsburg was weak, declining to 17 1/2 against yesterday's price of 18 1/2. This stock is attractive at these figures. Green-Camanea and Globe Consolidated are also in the list of good purchases. There is absolutely nothing wrong with the general conditions. The only reason for the present low market conditions is that the speculative element attendance has been diverted elsewhere."

The day's prevailing prices were:

	Bid.	Asked.
American	9.75	\$10.00
Warren	7.62 1/2	8.00
Denn Mining	10.12 1/2	10.50

### WOMAN BUILDS RAILROADS.

Mrs. Hooker Lives in Grading Camp and Directs the Work of Men.

Austin, Tex., May 16.—Mrs. S. C. Hooker is a prominent railroad contractor in Texas. She took a large grading contract on the Kansas City, Mexico and Orient railroad between Sweetwater, Tex., and Knox City, more than a year ago, and she came out so well with it that she has enlarged her outfit and is now at work on a large contract on the same road between Sweetwater and San Angelo.

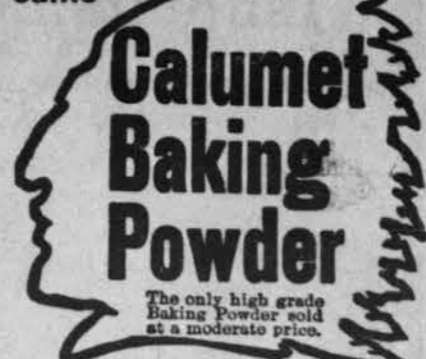

She not only finances the job, but she superintends the grading work personally. She lives in the grading camp and spends most of her time on the stretch of grade, directing the work of the laborers and other employes. She started with twenty men and teams, but her outfit has been greatly increased recently. It is said that she will permit no shirking on the part of any employe. They must do their work well and put in full hours at it.

Over at Silver City, N. M. Mrs. L. W. Freeman has been placed in charge of a big copper mine by the Enterprise Mining company, which has its headquarters at Pittsburg, Pa. Mrs. Freeman is an experienced mining woman. She has been connected with the mining business for a number of years. She is given full charge of the company's property in New Mexico, and her authority is supreme when it comes to the operation of the mine. She has prepared plans for a new cyanide plant, which the company will erect at the mine under her supervision.

There are many women ranch owners and ranch managers in Texas and other parts of the southwest. They have had marked success in the cattle-raising business. This is particularly true of Mrs. Richard King, the multimillionaire stock-woman of Kingsville, and Mrs. Adair, who owns and conducts a ranch of nearly 1,500,000 acres in the "Panhandle."

A NARROW ESCAPE.  
G. A. Cloyd, a merchant of Plunk, Mo., had a narrow escape four years ago, when he ran a jimson bur into his thumb. He says: "The doctor wanted to amputate it but I would not consent. I bought a box of Bucklen's Arnica Salve and that cured the dangerous wound." 25c. at The Stafford Drug Co.'s store.

## REO 1907

REO 1907 TOURING CAR \$1,250 F. O. B. LANSING

18-20 horse-power, 94-wheel-base. Five passengers. Detachable tonneau. Two speeds and reverse. REO disc clutch, 40 miles an hour. Full lamp equipment. Top \$75 extra.

The car that beat 60 cars of double and triple its price, at hill climbing—

The car that won more than 20 cups, medals and trophies from bigger and costlier cars—

The car that holds its class record up Mt. Washington; and that crossed Mt. Hood, and the 12,000 feet Raton Range, in New Mexico—

The car that went from Denver to Boulder, Colorado, (30 miles over rough hilly roads) in 15 minutes better than the railroad schedule—

The car that carried four passengers 1,050 miles over rough roads without stoppage, motor-repairs or car repairs—

The car that won the National Economy trophy and four other prizes in the same contest; and that carried its passengers at a total cost of 30 cents each per 100 miles—

The car that was penalized 30 per cent, and practically barred out of the great 2-Gallon Efficiency Contest—

The only car that ever crossed this continent and back again on its own wheels—

The \$1,250 car which does all that the average \$3,000 car does—and more than most of them—

That is the car whose merit and real economy are self-evident. That is the car which you cannot afford to overlook. Write for the book that tells why.

### EXCITING BOWLING MATCH.

Was Pulled Off Before a Large Crowd Wednesday Evening.

As many bowling enthusiasts as could crowd into Orr & Tompkins alleys were present Wednesday evening to witness the contest between teams Nos. 1 and 2. It was generally thought that No. 1 team would have a walk away, but No. 2 was in the lead in the two first games, taking the first by three pins and the second by forty-seven. In the third game, however, members of No. 1 did their best work in the last game. Tompkins with a score of 212, the team winning by sixty-seven pins. The scores were as follows:

No. 1 Team—					
Defrain	179	167	212	558	
Sanders	125	135	151	411	
Tompkins	190	155	211	556	
Nelson	112	125	164	401	
Dyer	146	156	143	445	
Totals	792	738	881	2371	
No. 2 Team—					
Kirkpatrick	161	191	169	521	
Miller	136	153	142	431	
Wilman	159	164	179	502	
Wentela	132	128	131	391	
Mitchell	167	140	152	459	
Totals	755	785	704	2244	

The league series is likely to close with five of the ten teams a tie for first place. The Cubs have two contests to win, both of which are to be bowled with tail ends, while the Pikers, Fox Wagons and Ravens have one each to win in order to tie the Wolves. The standing of the teams is now as follows:

G. W. L. Per				
Wolves	9	6	3	667
Pikers	8	5	3	625
Fox Wagons	8	5	3	625
Ravens	8	5	3	625
Cubs	7	4	3	571
White Sox	7	4	3	500
Indians	8	4	4	500
Green Sox	8	3	5	375
P. O. K.	8	3	5	375
B. O. K.	7	2	5	286

### FARMERS DOING NOTHING.

Fields Still Very Wet and Season's Work Cannot Be Started.

The farmers in and about Negaunee are dubious over the outlook for the season. It has had such a set back that it is now feared that the crops will not be more than 50 per cent as large as they were last year. Some of the farmers question whether it will pay them to put in heavy crops, even should the weather clear up within a few days. At this time last spring all of the grain had been planted and practically all of the potatoes and other vegetables were in the ground. Most of the fields are still too wet for planting, and other conditions at the farms are not all favorable. A Negaunee man, who visited his farm east of the city yesterday, said that the roads are in wretched condition and that there are several inches of mud all over his field. In places where there is standing timber there is from one to two feet of snow on the ground.

### RELIEF FROM RHEUMATIC PAINS.

"I suffered with rheumatism for over two years," says Mr. Roland Curry, a patrolman of Kew West, Fla. "Sometimes it settled in my knees and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by The Stafford Drug Co.

## DARANTELLA

### EAGLE SHOULD SCREAM IN 1908.

Many Here Think Negaunee Should Celebrate the Fourth Next Year.

"The Negaunee business men should wake up," said a prominent citizen yesterday. "This city has not had a Fourth of July celebration in years, and I think it is time something is done along that line. Of course it is out of the question to celebrate the coming Fourth, but I think the business men should get together and decide on a celebration a year later. If this is done early I believe that both Ishpeming and Marquette will give way to us. There is no doubt in my mind but that a celebration on the national holiday helps business. Every business man who contributes toward a celebration gets his money back and more with it. Negaunee has not had a celebration in several years. Ishpeming and Marquette will both profit by this year's celebration, and Negaunee is going to help them. From 75 to 90 per cent of our people will leave the city; some will go to Marquette, others to Ishpeming. Should the other cities give way to us next year we should have no trouble giving the most successful celebration the city has ever had. I think my suggestion is worth considering."

## ECZEMA COVERED HANDS 11 YEARS

Cracked and Bleeding in Many Places—Became so Bad that Nail Came Off Finger—Tried Many Remedies and Consulted Three Doctors, but Got No Relief—Now Cured and is Very

### PROUD OF HAVING TRIED CUTICURA REMEDIES

"I had eczema on my hands for about eleven years. The hands cracked open in many places and bled. One of my fingers was so bad that the nail came off. I had often heard of cures by the Cuticura Remedies, but had no confidence in them as I had tried so many remedies, and they all had failed to cure me. I had seen three doctors, but got no relief. Finally my husband advised me to try the Cuticura Remedies, so we got a cake of Cuticura Soap, a box of Cuticura Ointment, and two bottles of Cuticura Resolvent Pills. Of course I kept Cuticura Soap all the time for my hands, but the one cake of Soap and half a box of Cuticura Ointment cured them. It is surely a blessing for me to have my hands well, and I am very proud of having tried Cuticura Remedies, and recommend them to all suffering with eczema. Mrs. Eliza A. Wiley, R. F. D. 2, Liscomb, Iowa, Oct. 18, 1906."

### ITCHING PIMPLES Resulted from Poisoning. Cured by Two Sets of Cuticura Remedies.

"My husband got a blood disease from wearing woolen underwear. He was all full of pimples, and he had an awful itching. He took a good many so-called blood remedies, and nothing did him good. Then we saw in a newspaper about Cuticura Remedies, and they cured him after using in all two sets of Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent, and now he wouldn't do without Cuticura Soap. Mrs. Harriet, 1070 Benner St., Reading, Pa., Jan. 25, 1906."

Complete External and Internal Treatment for Itchy Humors of Infants, Children, and Adults consisting of Cuticura Soap applied to the skin, Cuticura Ointment (50c) to Heal the Skin, and Cuticura Resolvent Pills, for in the form of Chocolate Coated Pills 25c per box of 50 to Purify the Blood. Sold throughout the world. Foster Drug & Chem. Corp., Sole Proprietors, Boston, Mass. For Mailed Free, Book on Skin and Scalp.

sidering at this time. I have talked with a number of the business men since Marquette and Ishpeming announced that they are to celebrate and they all agreed that Negaunee should wake up and put in a bid for the celebration a year hence. I feel certain the business men of both Ishpeming and Marquette would give us a clear field next year. I believe that both Marquette and Ishpeming are going to stretch a point or two this year in their efforts to get up celebrations that will be creditable. Both will naturally want to attract as many visitors as possible, so good programs will have to be arranged."

### DETAILS OF MINING MERGER.

How the Columbus-Hidden Fortune Deal Was Consummated.

Upper peninsula people interested in the Hidden Fortune Mining company have awaited with interest the details of the merger consummated last week at Lead, S. D. The Black Hills Daily Register says of it: "The most important mining deal consummated in the Black Hills for many months is the Columbus-Hidden Fortune merger which was closed at Deadwood last Friday. The latter company, which was capitalized for 5,000,000 shares of a par value of \$1 each, owned some 200 acres of patented ground adjoining the Homestake on the north and west, including the famous Hidden Fortune claim, from which Otto Grant took \$57,000 in two months. After the company was organized, a considerable amount of development work was done, including the running of the Bingham tunnel for a distance of 1,888 feet and the sinking of several shafts, one of which has reached a depth of 200 feet. The company had also erected a mill with 250 tons capacity and operated the same for a short period. Becoming heavily involved financially, however, many judgments were filed against the company, which finally passed into the hands of a receiver. The Columbus company then made a proposition to buy the Hidden Fortune holdings and assume the company's debt. Accordingly, the property was sold at public sale last Friday and was bid in by E. Nesmith for the Colorado Iron Works company, which held a judgment against the Hidden Fortune company for \$239,000. This judgment, according to agreement, was immediately made over to the Columbus company, which thus comes into possession of all the ground of the other company, as well as of its mill and other buildings. The Columbus company of this month has increased its capital stock from five to seven millions, part of which will go to the stockholders of the Hidden Fortune company and has issued bonds to the amount of \$400,000. The first thirty thousand of the bonds went to the payment of some preferred claims of the Hidden Fortune and the second thirty thousand will be applied directly to the opening up and development of the ground and to again putting the mill into running order. The Columbus company now has neatly one thousand acres of some of the best claims of the Black Hills and a large quantity of milling ore, which will be available for treatment at once. On the 200-foot level of the Columbus, the vein was crossed for a distance of 247 feet and showed an average value of \$4 a ton. "An aerial tramway, to connect the mines with the Hidden Fortune mill, below Deadwood, is contemplated. Both properties are well opened up, showing an immense reserve of low grade ore of from \$3 to \$5 in value and some very high grade ore."

### ALLEYS IN BAD CONDITION.

The alleys were never before in such wretched condition at this season of the year. The street commissioner put men and teams to work Monday cleaning both streets and alleys, but the snow and ice is still so deep in some of the alleys that the teams cannot get through them. If warm weather does not set in soon it will be at least two or three weeks before the alleys will be passable.

### LOCAL LACONICS.

Nearly an inch of snow fell here yesterday morning between 5 and 6 o'clock. Miss Kaenen has returned from Milwaukee, where she took instruction in vocal culture. J. Purkman was called to Escanaba yesterday on account of the critical illness of his sister, who is confined to a hospital there. Arrangements have been made for special street car service for the accommodation of the Negaunee people who will attend the Ellis' dance at Braastad's hall tonight. The Ishpeming Light Guard band will be heard in Negaunee Decoration Day. William Yerran is taking the school census, which he expects to complete before the end of this month. George J. Maas, who went to Mercy hospital, Chicago, last week, submitted to a surgical operation there Monday. Reports from the hospital are to the effect that he is getting along very well. The funeral of the late Robert D. Sweeney, held yesterday morning, under auspices of the Lafayette society, was largely attended. The French society, fire department and Catholic Order of Foresters attended. L. Sporley, E. K. Webber and J. Goudge arrived home yesterday from C. L. Sporley's camp near Swaney. They pointed the interior and made a number of other improvements, putting the resort in first class condition for the season.

### BOUGHT REIDY HOUSES.

Louis Corbett has purchased the Reidy houses on the new high school site and expects to soon begin moving them to the Coffey field. One of the dwellings was the best on the site and Mr. Corbett intended to put it in first class condition. Delore Liquay is making good headway in moving the Badeau buildings. Two of them are to be placed on Mr. Liquay's lot next to Robert Jackson's dwelling on Peck street, and the other will be moved to his father's lot farther north.

### NO BAND FOR PICNIC.

All the bands in the county will be at Marquette Midsommer Day, leaving the Scandinavians societies, which are to ac-

## BACKACHE AND DESPONDENCY

Are both symptoms of organic derangement, and nature's warning to women of a trouble which will sooner or later declare itself.

How often do we hear women say, "It seems as though my back would break." Yet they continue to drag along and suffer with aches in the small of the back, pain low down in the side, dragging sensations, nervousness and no ambition.

They do not realize that the back is the main-spring of woman's organism and quickly indicates by aching a diseased condition of the feminine organs or kidneys, and that aches and pains will continue until the cause is removed.

### Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs has been for many years the most successful remedy in such cases. No other medicine has such a record of cures of feminine ills.

Miss Lena Nagel, of 117 Morgan St., Buffalo, N. Y., writes:—"I was completely worn out and on the verge of nervous prostration. My back ached all the time. I had dreadful periods of pain, was subject to fits of crying and extreme nervousness, and was always weak and tired. Lydia E. Pinkham's Vegetable Compound completely cured me."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints, such as Backache, Falling and Displacements, and all Organic Diseases, Dissolves and expels Tumors at an early stage. It strengthens and tones the Stomach, Cures Headache and Indigestion and invigorates the whole feminine system.

### Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn, Mass. Her advice is free.

MISS LENA NAGEL

of 117 Morgan St., Buffalo, N. Y., writes:—"I was completely worn out and on the verge of nervous prostration. My back ached all the time. I had dreadful periods of pain, was subject to fits of crying and extreme nervousness, and was always weak and tired. Lydia E. Pinkham's Vegetable Compound completely cured me."

### SUPERIOR & PITTSBURG.

Sandy Sutton, for many years a well known resident of Ironwood, has arrived here from Bisbee, Arizona, and will visit friends in this city and at other points in the Lake Superior country for some time before returning to the southwest, says the Ironwood News-Record. Mr. Sutton is a shift boss at the Lake Superior & Pittsburg mine of the Superior & Pittsburg group, and says that the property is a fine one. Pittsburg & Duluth and Junction are also coming along nicely. Mr. Sutton says, and Calumet & Pittsburg he thinks, is on the eve of "making good." Mr. Sutton confirms the newspaper reports to the effect that the strike at Bisbee is over. It has always been an "open camp," and probably always will be. The wages paid are as high, however, as those paid in Butte and other mineral camps of the west, running \$4 per day for miners, \$3.50 for timbermen and \$4.50 for shaftmen. Mr. Sutton says that there are a great many former Lake Superior men at Bisbee.

# THE KIMBERLY-WILFLEY MINES.

## How the Properties Impressed a Copper Country Editor and Others Who Recently Visited and Examined Them.

Editor J. H. Wilson, of the Native Copper Times, was one of a party of seven who recently went to Kokomo, Colorado, to make an examination of the Kimberly-Wilfley properties there for themselves and others. While there they went through the workings of both the Kimberly and Wilfley properties and studied the processes employed in the Wilfley mill for treatment of the ores, which will also be used in the new mill on the Kimberly property now nearing completion. They were furthermore permitted to see the smelter returns from concentrates produced at the Wilfley mill and from consignments of shipping ores sent direct to the smelters without being milled. In this week's number of his paper Mr. Wilson gives this interesting and highly instructive account of what the party saw and learned of the mines and their ore bodies, the success of the processes employed in treating the ores, and the results obtained in dollars and cents.

The editor of The Times returned last week from a visit to the properties of the Kimberly-Wilfley Mines company, at Kokomo, Colo., which are embraced in the mineral belt known as the Consolidated Ten-Mile Mining District, approximately twenty miles long by six miles wide. Some details of this district are taken from the report of Thomas Tongue, on the properties of the Miami Mines company or Connor's property, a large interest of which rests in the Kimberly-Wilfley company. The report was made in 1906, and says:

"There are about seventeen mines in the belt now being operated and many others of sufficient merit to warrant being operated by the necessary combination of enterprise, capital and up-to-date management. This belt has been a continuous mineral producer since the late seventies and its aggregate mineral output has been millions of dollars. Near the town of Kokomo in this mineral belt are adjoining mountains, viz: Sheep Mountain, Jack Mountain and Elk Mountain. On Sheep Mountain there are the famous Robinson mine, which produced upwards of \$10,000,000 in about five years, and is still being profitably worked. Some of its ore averaged as high as \$400 per ton. On Jack Mountain there are various mines which have had a large aggregate production. On Elk Mountain there are three main properties, practically covering the mountain, viz: (1) The White Quail, or Wilfley group, including the Kimberly properties, about two hundred acres; (2) The Delaware, or Breese group, about 225 acres, owned by The Delaware Gold Mining company; (3) The Miami group, about 115 acres, owned by the Miami Mines company. The White Quail group has been a continuous producer since 1880, and is credited with a production of ore to date of upwards of \$5,000,000. It is opened by two tunnels and is equipped with a fifty-ton mill, containing concentrating tables and zinc separators. This property has considerable bodies of zinciferous ore. The smelting ore is shipped direct to the smelters and the milling ore is reduced from two to two and a half tons of crude ore to one ton of concentrates, and the zinc contents separated therefrom. The zinc concentrates, carrying 20 to 40 per cent zinc, are run as high as \$60 per ton, smelting certificate showing gold 2.5 ounces; silver, 17.62 ounces; lead, 12.85 per cent; iron, 35.25 per cent; zinc concentrates, \$16.65 per ton; carrying 45.3 per cent zinc. The Delaware, or Breese group, has produced about \$1,000,000 of ore from a comparatively small area. It is opened by four tunnels and one shaft about 300 feet deep. The longest tunnel is 2,200 feet, its breast being 300 feet below the surface. Zinciferous ore from this group was sold for \$100 per ton, and treated in the before mentioned White Quail mill, with similar metallurgical results to those stated above. Notwithstanding the past big production of the White Quail-Wilfley and Delaware-Breese groups a large portion of the profitable territories in practically virgin ground, all present showing indicating that each group is capable of profitable production for years to come. A considerable portion of their ore is comparatively free from zinc, but as to their zinciferous ore the solving of the profitable treatment of the same, by concentration and separation, has been successfully demonstrated at the White Quail Mill, bringing within the range of remunerative production a very large tonnage of medium or low grade ore already exposed in each group ready for extraction. Prior to the installation of such system of concentration and separation of the zinc contents of the local ores, it was the practice to ship only the high grade ore, carrying 40 per cent zinc, some zinc, to the lead smelters, paying a penalty on the zinc contents, graduated according to the percentage of zinc, the zinc values being lost and the lower grades ore remaining in the mine as unavailable. Under the new system the iron-lead-silver-gold concentrates, being freed from zinc, pay no zinc penalty at the smelter, while the zinc concentrates command ready sale at a good price."

Professor S. F. Emmons, in The Consolidated Ten-Mile District, Colorado, Special Folio, issued in 1906, by the United States geological survey, shows that Elk Mountain, on which the properties of the Kimberly-Wilfley Mines company is situated, consists of (1) an igneous rock that he terms "Elk Mountain's porphyry," on account of the principal mines of Elk Mountain being the largest eruptive channel of that rock, and (2) sedimentary rocks that he terms "Maroon formation," a coarse, reddish arkose, sandstone, with reddish shales and thin beds of limestone. He said that although outcrops of ore have been found in rocks of other horizons, the ores from actually developed mines in the Ten-Mile district have been mostly taken from beds of the "Maroon formation." To a limited extent also they are found in veins that traverse both the sedimentary rocks and the included eruptive rocks. The limestone strata being the ore carriers gives them special economic importance, and renders it necessary to trace them with unusual care. For this reason they are indicated on one of the maps accompanying the Special Folio by dark blue lines, these being continuous where outcrops are actually traceable, but broken when, for some reason, the outcrops are obscured and

and again from this building comes the Wilfley roaster, which means so much to the zinc mines of the country. The first of these roasters to go into regular use is going in at the new mill of the Kimberly-Wilfley Mines company, and by its use all metals in the ores of the mine will be given marketable values.

The new mill, now nearing completion, will have a capacity for treating 250 tons per day, and the making of zinc in a mill at the Wilfley will enable the company to handle 300 tons per day, and in mining 300 tons for the mill, there should be taken out at least fifty tons per day of shipping ore. The ore comes from the furnace, and is carried to the mill by gravity, and is dumped into bins, from where it is put through one large crusher, passing to the rolls, of which there are four; these to a set of four screens, from where anything over size is returned to the rolls. The ore all goes to the Wilfley roaster, and is roasted at a temperature of 1,200, rendering the iron magnetic. From the roaster the ore is carried on a water-jacketed cooling conveyor, to the Ding magnetic separators, of which there are ten. After separation the iron, carrying most of the gold and silver values, is conveyed to the concentrate bins, ready for shipment to the smelters. The zinc and lead pass on to an agitator, and then to the Wilfley tables, where the zinc and lead are separated, and siliceous material, when dried, is shipped with the iron to the smelters, carrying any gold and silver not in the iron. None of these values go with the zinc. The zinc is also dried and prepared for shipment to the zinc smelters. The mill will have four boilers, three now being in place, of eighty horsepower each, and an engine and compressor plant more than capable of doing the work required. A four-hundred-ton ore bin will be a part of the mill, to assure the running of the roaster, which goes up to the top of the mountain, or 1,500 feet from that tunnel. This tunnel and incline disclosed vast bodies of shipping and milling ore, in some places as thick as thirty feet.

The contact vein, which yields the mineral carries zinc, galena and pyrites, the last also having gold and silver values. There is also a second contact vein, with the same angle and dip, as also a fissure vein, and these two contact veins with the fissure are ore bodies thus far opened in the lands of the company.

The ore is there, and enough of it to keep the management busy for many years, and to return handsome dividends to stockholders. The ore is soft, easily mined and easily treated, and is an ideal material for the productiveness and economical handling.

In conversation with Mr. Wilfley, inventor of the Wilfley table, many of which are in use in the mills of the Lake district, we got much valuable data regarding the mines visited. He has been working the Wilfley property for many years, and has taken out much money, remarking that all he had, including his home in Denver, came from the mine, and this, notwithstanding the fact that he had only allowed \$750,000, or \$1,000,000 worth of zinc to be taken out, for the reason that it could not be treated. The separation is now solved, and the solution means a great deal to the zinc mining world. It means that every mineral content of the ore will have commercial value, and will help swell the receipts of the company.

Mr. Wilfley stated that the Kimberly-Wilfley mines could be successfully worked for zinc alone, or for the more precious metals, and that in getting full value for all the metals the earnings cannot be big.

The Kimberly-Wilfley property has not a large acreage, well situated, and "supposed" to have a formation of commercial value, but it has an area of about 200 and 400 acres with the ore opened up and blocked out for thousands and thousands of feet, and ores with the values sticking out. In buying the shares you are putting your money in a mine and not in a prospect; putting it where the money will bring returns, and is wanted at this property in the mountains is a manager who will open up and prepare the mine for sending large quantities of ore to the concentrator; to arrange for working the mine along business and up-to-date lines, and to see that the property is properly expended. It is conservative to average the ore at a value of \$8.00 per ton. As eight cubic feet weighs one ton, there is a value for shareholders of \$1.00 for every cubic foot of ore in the mine, and there are thousands of cubic feet of ore, enough to return into the treasury of the company sufficient to pay many times the cost of property, and mill, and what future development may disclose no one can say.

A few days before our visit, the mine was looked over very carefully by Superintendent James M. Wilcox, of the Mass Consolidated, and his opinion of the property is expressed in the following brief statement, given the writer, at Calumet Friday:

"I visited all the workings of the Kimberly-Wilfley Mines company during the latter part of April, and found the showing highly satisfactory. In my opinion the ore bodies continue down and from the stopping done it is evident that the bodies of ore are very large, and I can imagine the many good things that have been said of the property."

The above corroborates the writer's opinion of what he saw in the Kimberly tunnel and the upper and lower tunnels of the Wilfley.

Statements have been made that the Kimberly-Wilfley would be a big paying proposition could the zinc be separated and given commercial value. This is being done right along at the Wilfley mill, by aid of the Wilfley roaster, and the success of this treatment is attracting the attention of zinc men all over the country. While we were at Kokomo President Callow, of the General Engineering company, of Salt Lake City, supervised a test by the roaster process, on the ores of the Tom Boy mine in the San Juan district, Colo., and gave the writer the following as the result of the test:

Amount treated, 16,500 pounds; estimated loss by wasting reduced this to 13,900 pounds, or about 16 per cent. Out of this we made 6,063 pounds of zinc, or 43.6 per cent, 7,200 pounds of iron, or 51.9 per cent, 437 pounds of dust, 4.5 per cent. And this result, obtained by separation, Mr. Callow considered satisfactory. He informed us that he had designed a plant for the Tom Boy, to concentrate the Wilfley roaster in conjunction with the Ding Magnetic separators, and that this process, in operation at the mine, will mean additional net earnings for the Tom Boy of \$500 per day, as heretofore the iron was a loss.

The old Wilfley mill and experiment plant has been in operation for over two decades. It was in this building that the Wilfley table was perfected,

compared to a large smoketank with a vertical partition in the middle; the flame from the furnace ascends one side of the roaster, passes over the partition and descends on the other side. On this side the powdered ore is slowly fed in at the top, falling with the descending flame. The flame and smoke find a vent at the side, while the roasted ore falls to the bottom of the roaster. The flame which varies from 700 to 1,000 degrees Fahrenheit, burns out of the falling ore a portion of its sulphur, and renders magnetic the iron contained therein. The ore is then passed over a water-jacketed cooler from which it is carried by a conveyor to the magnetic separators.

This process is comparatively inexpensive, the ore is roasted by machinery from the moment it is dumped into the crushers until it is deposited in separate bins to be loaded on the cars. Coal costs \$1.50 a ton laid down at the mine, and often when the roaster is loaded up the sulphur in the ore furnishes the necessary fuel for its own consumption. The roaster, on occasions, has been operated with practically bare furnace grates. Having watched the work of the roaster and separators for two days, there is no doubt in the minds of any of the party but that the work is a success.

"The discoverer of this process is Mr. Wilfley, whose name is known in America and Europe wherever mining and smelting are done. He commenced prospecting and mining on the Summit property, which is now a part of the Kimberly-Wilfley. This was then a gold and silver prospect, and the ore was treated by the smelting of gold and silver. When there occurred a fire, and the ore to exceed 7 per cent the shipper was penalized fifty cents for every per cent excess. So, in mining, zinc ores were avoided as much as possible and only the rich ore shoots taken out. After a while only the leaner ore was taken, and then Mr. Wilfley, who is more of an inventor than a miner, set to work to discover a way to separate the precious metals from the base and the rock.

"His experiments resulted in the now well known Wilfley table, which is in almost universal use. The previous method was saved, but the zinc and iron went to waste with the rock. Mr. Wilfley estimates that fully \$1,000,000 was lost in zinc alone from the tailings of his mill. As zinc and iron are nearly of the same specific gravity, the Wilfley tables would effect only an imperfect separation of these two ores, so Mr. Wilfley set to work to discover a way of making these tailings profitable. A series of experiments revealed the fact that if the roasted ore was treated with a magnetic field, the zinc and iron would separate. So Mr. Wilfley built a 'roaster' with which he experimented, changing, improving, altering until late last fall it was brought to such a state of perfection that the separation was a commercial success. It is expected that the news of this discovery is only beginning to be known in the mining world, for Mr. Wilfley, like all men of real merit, prefers to let his work speak for itself. When he first invented the Wilfley mill, he invited mining men to look on and see for themselves. The Calumet & Hecla people experimented with it for eighteen months in the hope of getting around it or finding something better, but finally were convinced that the Wilfley table was better than the roaster. So Mr. Wilfley built what heretofore has been waste and loss in many mills. That this is no idle surmise, the following will substantiate:

"About two months ago the Empire Zinc company sent some of its low grade ore to the Wilfley mill for treatment. When the results were tested they wrote as follows: 'Mr. Wilfley has solved the problem of the separation of the sulphide ores in the Leadville district. Up to the strength of this letter the Tom Boy mill, which is now in operation, has been located in the San Juan district near Ouray, sent 24,188 pounds of 'middlings' to Mr. Wilfley's roaster to determine whether this waste product of their mill could be made profitable. Mr. Callow, president of the General Engineering company, consulting engineer of Salt Lake City, had already made a laboratory test, and was sent along to watch the process. Mr. Wilfley, who is in poor health, and who spends most of his time at Denver, had and no opportunity to look at these tailings or middlings, so 16,500 pounds were run through the roaster at a guess as to temperature. Our party fortunately happened to be present when the test was made, and as far as we could see the separation was a success. To make certain of this, however, on the following day I sought out President Callow and obtained from him in his own handwriting the following: (The figures are given elsewhere in the article on the Kimberly-Wilfley Mines Co., EL.)

"Mr. Callow showed me his laboratory samples. The zinc concentrates looked exactly the same in both samples; but the iron concentrates from the roaster appeared black while that from the laboratory was bright. This, I can assure Mr. Callow said, is the difference in color might be due to overheating of the roaster. Mr. Callow had the ores shipped back and will conduct another series of laboratory tests to determine more accurately the value of the concentrate, before leaving. President Callow said that in his opinion there was no doubt about the roasting process being a commercial success; he even ventured the remark that the roaster separation might be better than the laboratory. 'It means,' he added, '\$300 more daily profit for the Tom Boy.' He has a set of plans already complete for roaster and mill for the Tom Boy people as soon as they are convinced that the process is a success commercially.

"The members of our party considered themselves singularly fortunate in being present the day the test was made and seeing with their own eyes what was accomplished, and hearing President Callow's verdict. We went there in a skepticism of mind, taking nothing for granted, awaiting no man's word without adequate proof. But we saw the roaster and separators treating Wilfley ore, we saw the smelter returns for months past, we saw a check for \$664.00—the net returns of one day's shipment to the smelter (see page 8). We saw likewise the test run of the Tom Boy tailings and heard the opinion of President Callow; so that in the minds of everybody in our party it is not a question further the success of the roaster process.

"Let us have some Cudahy's Peacock Bacon and calves liver for supper Mama, say young and old. (11-27-eod)

and again from this building comes the Wilfley roaster, which means so much to the zinc mines of the country. "Let us have some Cudahy's Peacock Bacon and calves liver for supper Mama, say young and old. (11-27-eod)

other voting districts will soon fall in line.

**Will Install Heating Plant—**  
The Luce county board of supervisors has decided to construct a basement underneath the county poor house, and install a modern heating plant. A resolution was passed authorizing the board of poor commissioners to secure bids for the proposed improvements. Richard Hall was appointed a member of the board of county road commissioners by the unanimous vote of the members of the board of supervisors. The appointment is to fill the vacancy caused by the resignation of M. E. Beumgardner.

**Special Wolf Bounty Rescinded—**  
Persons presenting wolf scalps to the clerk of Schoolcraft county will hereafter receive only the state bounty of \$25. The special bounty of \$12.50 has been abolished by the board of supervisors. While undoubtedly a stimulus to wolf-hunting, there has been a suspicion lately that this special bounty was proving an inducement to hunters to bring in the pelts of wolves slain in the adjoining counties of Agate and Mackinac, where only the state bounty applies. Schoolcraft county has paid out \$700 in wolf bounties the past year.

**Farmers' Telephone Company—**  
For the purpose of giving the village telephonic communication with the outside world, the Farmers' Co-operative Telephone company has been organized at Fayette, Delta county, and will shortly be incorporated. The proposed line will extend from Fayette to Goodhue, where connection will be made with the long distance system of the Michigan State company. The distance is fourteen miles, and it is expected the line will be completed by July 1. Lars P. Peterson is president, Charles Arnold secretary, and William Watson treasurer. There are forty stockholders.

**U. P. Good Enough for Him—**  
An Austrian, a member of a party that left Manistique last year and located in Idaho, has returned. He is more than pleased to get back to the upper peninsula, and claims that his experience east him all of his savings, about \$400. He has secured employment at Berry Bros' charcoal iron furnace and will send money to the remainder of the crowd as soon as possible to pay their transportation back to Manistique. While wages are high in the West, he says that the cost of living more than offsets the difference in pay.

**SORE NIPPLES.**  
Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve to the nipples. The salve is dome nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many trained nurses use this salve with best results, or sale by The Stafford Drug Co.

assigned to the Philippines—  
Russell E. Brown, for the past eight years ordnance sergeant at Fort Brady, has received orders to go to the Philippines for duty in July, and with Mrs. Brown and children will leave the Soo during the early part of that month for Manila. The departure of Mr. and Mrs. Brown will leave a vacancy in the position of ordnance sergeant at Fort Brady, which will be filled by one of the candidates for the position.

**Favors the Local Option Bill—**  
Joseph H. Berry of Detroit, who has extensive interests in the upper peninsula, among others the charcoal iron furnaces at Manistique, Newberry and Cheboygan, is much interested in the passage of a local option bill and has sent two or three sealed communications to every newspaper in the state, urging their support of the Anti-Saloon league and of the pending legislation. He also has purchased and circulated 10,000 copies of a timely editorial along similar lines which recently appeared in the Literary Digest.

**Voting Machines Authorized—**  
The use of voting machines for all cities, villages and townships in the county has been authorized by the Delta board of supervisors, such use to be at the discretion of the officials of the various precincts concerned. The action was but a formal endorsement of the new method of voting and was taken to meet the provisions of an old law which laid that the use of voting machines in any county should be recommended by the county board although there was nothing in the law to prevent cities, villages or townships from purchasing the machines without such action. The city of Escanaba and Brampton and Maple Ridge townships have already purchased voting machines and it is expected that

other voting districts will soon fall in line.

**Will Install Heating Plant—**  
The Luce county board of supervisors has decided to construct a basement underneath the county poor house, and install a modern heating plant. The use of voting machines for all cities, villages and townships in the county has been authorized by the Delta board of supervisors, such use to be at the discretion of the officials of the various precincts concerned. The action was but a formal endorsement of the new method of voting and was taken to meet the provisions of an old law which laid that the use of voting machines in any county should be recommended by the county board although there was nothing in the law to prevent cities, villages or townships from purchasing the machines without such action. The city of Escanaba and Brampton and Maple Ridge townships have already purchased voting machines and it is expected that

other voting districts will soon fall in line.

**Will Install Heating Plant—**  
The Luce county board of supervisors has decided to construct a basement underneath the county poor house, and install a modern heating plant. A resolution was passed authorizing the board of poor commissioners to secure bids for the proposed improvements. Richard Hall was appointed a member of the board of county road commissioners by the unanimous vote of the members of the board of supervisors. The appointment is to fill the vacancy caused by the resignation of M. E. Beumgardner.

**Special Wolf Bounty Rescinded—**  
Persons presenting wolf scalps to the clerk of Schoolcraft county will hereafter receive only the state bounty of \$25. The special bounty of \$12.50 has been abolished by the board of supervisors. While undoubtedly a stimulus to wolf-hunting, there has been a suspicion lately that this special bounty was proving an inducement to hunters to bring in the pelts of wolves slain in the adjoining counties of Agate and Mackinac, where only the state bounty applies. Schoolcraft county has paid out \$700 in wolf bounties the past year.

**Farmers' Telephone Company—**  
For the purpose of giving the village telephonic communication with the outside world, the Farmers' Co-operative Telephone company has been organized at Fayette, Delta county, and will shortly be incorporated. The proposed line will extend from Fayette to Goodhue, where connection will be made with the long distance system of the Michigan State company. The distance is fourteen miles, and it is expected the line will be completed by July 1. Lars P. Peterson is president, Charles Arnold secretary, and William Watson treasurer. There are forty stockholders.

**U. P. Good Enough for Him—**  
An Austrian, a member of a party that left Manistique last year and located in Idaho, has returned. He is more than pleased to get back to the upper peninsula, and claims that his experience east him all of his savings, about \$400. He has secured employment at Berry Bros' charcoal iron furnace and will send money to the remainder of the crowd as soon as possible to pay their transportation back to Manistique. While wages are high in the West, he says that the cost of living more than offsets the difference in pay.

**SORE NIPPLES.**  
Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve to the nipples. The salve is dome nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many trained nurses use this salve with best results, or sale by The Stafford Drug Co.

assigned to the Philippines—  
Russell E. Brown, for the past eight years ordnance sergeant at Fort Brady, has received orders to go to the Philippines for duty in July, and with Mrs. Brown and children will leave the Soo during the early part of that month for Manila. The departure of Mr. and Mrs. Brown will leave a vacancy in the position of ordnance sergeant at Fort Brady, which will be filled by one of the candidates for the position.

**Favors the Local Option Bill—**  
Joseph H. Berry of Detroit, who has extensive interests in the upper peninsula, among others the charcoal iron furnaces at Manistique, Newberry and Cheboygan, is much interested in the passage of a local option bill and has sent two or three sealed communications to every newspaper in the state, urging their support of the Anti-Saloon league and of the pending legislation. He also has purchased and circulated 10,000 copies of a timely editorial along similar lines which recently appeared in the Literary Digest.

**Voting Machines Authorized—**  
The use of voting machines for all cities, villages and townships in the county has been authorized by the Delta board of supervisors, such use to be at the discretion of the officials of the various precincts concerned. The action was but a formal endorsement of the new method of voting and was taken to meet the provisions of an old law which laid that the use of voting machines in any county should be recommended by the county board although there was nothing in the law to prevent cities, villages or townships from purchasing the machines without such action. # THOMAS SCADDEN DIES IN DENVER

### NEWS OF HIS PASSING IN THE WEST WAS RECEIVED IN MARQUETTE YESTERDAY.

## DEMISE NOT UNEXPECTED

### Was Caused by Paralysis—The Deceased Went to Kokomo, Colo., the First of the Year—Health Broke Down Shortly After.

Word was received yesterday of the death in a hospital at Denver, Colo., of Thomas Scadden, formerly register of the Marquette land office, who resigned his position shortly before the first of the year, on which date he went to Kokomo, Colo., to assume direction of work at the property of the Kimberly Mines company, now the Kimberly-Willey company. The news of Mr. Scadden's death created no surprise, as it had been known for the past few weeks that he was a very sick man, and that the chances were against his recovery. Death was due to paralysis, with which the deceased was seized about a month ago. His wife was with him when the end came, having accompanied him west the first of the year.

Mr. Scadden had been in precarious health ever since he left Marquette. He was suffering from a cold when he went west. In the high latitude of Kokomo, Colo., where the mines are located it became aggravated, and though Mr. Scadden stuck to his post for some weeks he was finally compelled by an attack of pleurisy to go to Denver for treatment. He was seriously ill at this time, and was some weeks recovering. Some six weeks ago he felt well enough to return to the mines, but shortly after his arrival there he broke down completely, suffering a slight paralytic stroke. He was removed to Denver, where every thing that could possibly be done for him was done, but his condition steadily grew worse. A few weeks ago his brother, Frank Scadden, of Crystal Falls, was called to his bedside and he was also visited by numerous Lake Superior men who went out to look over the Kimberly-Willey mines.

Mr. Scadden came to his decision to go west after mature deliberation. He secured a leave of absence in September last and spent the greater part of the month at Kokomo, making a close study of the Kimberly and Willey mines. He was impressed with their possibilities, and invested in their stock, also deciding to take charge of the property of the company, a position of which he had the refusal. He was persuaded at the time that the change would be beneficial to his health, which had not been of the best. The sad issue of his move is a source of much regret.

The deceased was a resident of Marquette for the greater part of ten years. He entered on his duties as register of the land office Nov. 17, 1897, coming here from Crystal Falls, where he was employed in the office of one of the mining companies. Previous to locating at Crystal Falls he was a resident of Bessemer. Mr. Scadden's service in the land office was continuous from the time he came to Marquette until he left last January to go west. He was an efficient register, being attentive to the duties of the office and exercising excellent judgment in administering its affairs. In personality Mr. Scadden was affable and kindly, and was generally liked and esteemed. His position as register gave him a wide acquaintance among upper peninsula men, and his death will be learned of with very wide regret. He was forty-seven years of age.

For stomach troubles, biliousness and constipation try Chamberlain's Stomach and Liver Tablets. Many remarkable cures have been effected by them. Price, 25 cents. Samples free. For sale by The Stafford Drug Co.

"What shall we have for breakfast?" "Why Cudahy's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year."

## WRECK VICTIM KNOWN HERE.

Alonso B. Rogers Long a Sleeping Car Conductor on D. S. S. & A.

The name of Alonso B. Rogers in the list of the dead in the Southern Pacific wreck near Surf, Cal., was a shock to many Marquette people. He was well known as one of the best sleeping car conductors in the service. For eight years prior to 1904, he was a Pullman conductor on the Duluth, South Shore & Atlantic road. Mr. Rogers was fifty-seven years of age and looked barely forty-five. He was an old Wagner conductor originally and was with the South Shore when that road used Wagner sleepers. He continued with the road when a change was made to Pullman sleepers and when that contract expired he left the line and for the past three years up to two months ago, was a Pullman conductor between Duluth and the Twin Cities on the Northern Pacific. Marquette railroad men and other people who travel know Mr. Rogers well, and he was very popular with them. Lately he had been running between St. Paul and Billings, and was sent out with the Shriners on the journey from which he was fated not to return alive.

## SAYS DISCOVERY IS A RANK FAKE

### CHEMIST CONTENDS THAT PHYSICAL LAW MAKES GENERATION OF HEAT THROUGH BURNING OF ASHES AN UTTER IMPOSSIBILITY.

James K. Pumpelly, chemist for, and one of the officials of the Western Storage Battery company, of Indianapolis, Ind., one of the largest manufacturers of dry batteries in the United States, was a visitor in Marquette yesterday, on his way back from Duluth, where his company has a branch house. Mr. Pumpelly was at one time a demonstrator in chemistry at Harvard University and is a recognized authority on chemical and electrical matters. Speaking of the recent alleged discovery of an Altona, Pa., cobbler that a mixture of three parts of ashes to one of coal, and then adding a solution of oxalic acid and water, would produce an excellent fuel, he said:

"It's a joke. No chemist would ever have advertised such a discovery. One of the first rules of physics founded upon natural law is 'in the economy of nature there is nothing lost.' It is utterly impossible to create one particle of matter as well as it is impossible to destroy one. When you smoke a cigar you have not destroyed the matter of which that cigar was composed. You have simply caused it to change its form through combustion. You can certainly burn ashes mixed with coal when you have the right kind of a draught. But no man on earth can secure as much combustion from ashes and coal as he can from coal alone. The heat emitted from a combustion in the coal not in the ashes. Of course oxalic acid generates a little acetylene gas, but all the fire you would get from the acetylene gas generated from two ounces of oxalic acid wouldn't singe the wings on a June bug."

"These great discoveries are a matter of quite common occurrence. A short time ago it was reported that a young man of little experience in chemistry and electricity had accidentally hit upon a discovery that promised to revolutionize the manufacture of batteries. He had interested quite a number of men of wealth and a public test was advertised to take place in a southern Wisconsin city. I was sent to the scene of the experiment by my company, as its success would have spelled ruin to us. The young man ran an automobile and several other pieces of machinery by means of his battery. The capitalists were delighted while the visiting electricians only smiled. It is very easy to make a battery in a laboratory by means of expensive chemicals that will generate a powerful current making the same battery by the thousand in a factory is a different proposition. Again the value of a battery depends upon its wearing qualities. The young inventor's battery fed upon itself with such rapidity that it was utterly valueless except for exhibition purposes. Utilized for light or power it would have involved a yearly expense five times greater than any of the standard batteries now on the market. These fake discoveries are of almost weekly occurrence. The ash-fuel craze will die out in a short time without exciting much of a flurry except in some of the smaller cities."

## GIVES COUNCIL ENTIRE POWER

### GORDON BILL LIMITING NUMBER OF SALOONS LEAVES SELECTION TO ALDERMEN.

## HAS MANY PROVISIONS

### Council May Not Only Fix Districts but Can Examine Applicants for Licenses as to Their Moral Character.

The bill introduced in the legislature Tuesday by Representative John R. Gordon, to regulate the issuance of licenses and limit the number of saloons in Marquette city through an amendment to the charter to be known as Section 27 of Chapter 7, confers upon the council 1. Limit the number of saloons to twenty-five until a special or general census shall have shown the city's population to have reached 13,000 when one additional saloon license may be granted for every additional 500. 2. Prescribe districts where saloons may be opened. 3. Examine the character and record of applicants for licenses to determine their responsibility and fitness, and grant or refuse licenses upon the facts adduced through such examinations. 4. Collect a municipal tax not to exceed \$250 annually payable Jan. 1 yearly. 5. Accept surety company bonds. 6. Pass such an ordinance as is deemed necessary to enforce the observance of the charter provisions.

The primary object of the Gordon bill is obviously to limit the number of saloons in this city to one for each 500 population. The limit of twenty-five to take effect May 1 of next year is based upon an estimated population of 12,500. Marquette has at present forty-seven saloons paying an annual license of \$500, making a total in license fees of \$23,500. Under the provisions of the Gordon bill, with the number of saloons reduced to twenty-five and the license increased to \$750, the city would receive \$18,750 annually, a loss of \$4,750.

**Measure Has Partisans.** On the other hand there is no denying that there is a considerable sentiment in favor of the bill. Many citizens claim that the passage of the measure would greatly tend to raise the moral standard in the city. They assert that with the number of saloons limited, and the resultant competition for licenses, saloon keepers would be rigid in their observance of law through fear of forfeiting their privileges. The measure, they also say, empowers the council to make a judicial inquiry into the character and general responsibility of the men to whom licenses are issued.

Among the parties most interested there is, as is natural, a strong division of sentiment. The older saloon keepers are almost a unit in favor of the bill. As the selection of the men who will receive licenses is to be left to the council they assume that the preference will be given to those among them who, having been in business for some years, are best known. Saloon keepers who have not been in business for any great length of time, or for other reasons fear that they may not be among those receiving licenses, say that the enforcement of the measure is certain to work rank injustice. They point out the fact that as the bill goes into effect on April 15 and licenses are taken out early in May, many saloonkeepers will be compelled to close out their businesses within such a brief space as is certain to cause them the loss. One of them said yesterday:

"The council can certainly take no action in the granting of licenses until the measure has become a law. That would leave those who have not been granted licenses but a few days to dispose of their stocks. When saloon keepers retire from business in the ordinary course of events they dispose both of their stock and good will at the same time, but forced out in this manner the good will of a place becomes an absolutely valueless asset, and the stock, consisting as it naturally would, of fragmentary boxes of cigars, partially broken cases of bottled goods, and barrels of tapped liquor, would have to be sold at an awful sacrifice upon cost. Many of the saloonkeepers own fixtures and glass ware. They will not be able to realize 15 per cent upon their investment."

Gordon's plans that he has felt his way carefully in regard to his bill and that he has only introduced it after receiving assurances that it would be favorably received. Some weeks ago, when the matter was first broached publicly, it was his intention to see Governor Warner and ascertain what his attitude toward the measure would be. At that time Representative Gordon was thinking of trying to have the bill made effective this spring. This latter idea he was compelled to give up, but some Marquette men who are pretty close to him believe he has the governor's assurance that he will sign the bill if it is passed by the legislature and also that he has ascertained by work among the legislators that he will be able to get a good vote for it. They do not believe that he would have introduced the measure unless he was satisfied that the chances were all in favor of its passing.

"The legislature, I believe," said a Marquette man who ought to know about such things, "will be glad to vote favorably on a bill of this nature for the reason that it has turned down a number of bills designed to regulate the saloon business. The individual members will not unlikewise be glad to have the Marquette bill to point to as one thing accomplished in the way of regulation."

A number of Marquette saloon men are strongly in favor of the law, though naturally they speak guardedly, and they are among those who have urged Representative Gordon to introduce it. "The law would be a good thing for the saloon men getting licenses and a good thing for the city," one of them remarked yesterday. "Marquette hasn't as many saloons as some cities per 1,000 population, but it has too many for the saloon men's good. Competition between the breweries is the greatest factor in multiplying the number of saloons. I think the law ought to regulate the number."
