

STEAMER BURNS FAR FROM SHORE

Crosby Liner Namoi Is Destroyed Enroute from Grand Haven to Milwaukee, and Five Persons Lose Their Lives.

Grand Haven, Mich., May 21.—Five lives were lost and seventy-five persons had a perilously close escape from death when the passenger and freight steamer Crosby Liner Namoi was destroyed.

Four of the victims were cool passengers, peened down in the forecastle by flames, where many of the rescued passengers from the decks of the freighter Kerr and the steamer Kansas saw them.

The fire broke out at 1:30 o'clock between decks and at the forward end. It spread with tremendous rapidity. It was apparent almost from the first that it was vain to fight the flames, and the crew turned their attention to arousing the passengers and getting them on deck.

The crew worked like heroes to save the people. The signals for help were answered in a few moments by the steamers Kerr, Kansas and Saxonia.

When the cool passengers were heard from the lower port holes, vainly they begged for help. The port holes were too small for them to pass through, and they were compelled to fall back into the smoke and fire, where they burned to death.

The Kansas took on board the half-clad and terribly shocked and frightened passengers, and brought them to this port. All were loud in their praise of the Namoi's crew and their bravery and coolness.

Columbus, O., May 21.—The Presbyterian general assembly today received and adopted a number of reports. Developments in the temperance controversy sponsored by the antagonism of the Anti-Saloon league to the Inter-Church Temperance federation came rapidly.

The standing committee on temperance referred all overtures affecting the attitude of the church toward the league to the committee on policy, which decided to recommend that no minister of the Presbyterian church, as such, could be an officer or member of the Anti-Saloon league; that they could participate in the work of that organization only as individuals.

The report of the committee was adopted confirming the appointment of Rev. Wm. P. Finney and F. W. Loetscher, Edward B. Hodge, Jr., M.D., and Dr. Charles T. Evans as members of the board of education. It was recommended by committee that no action be taken on the overtures of the Presbyteries of Corning, Dubuque and Iowa City on the matter of requiring written contracts with ministers on their terms of service.

The following members of the board of home missions were re-elected: Rev. Dr. Samuel J. Nicolls, Rev. Dr. Joseph Dunn, Rev. Dr. Albert Edwin Kerzwin, Walter M. Aikman, Wm. H. Corbin, Robert C. Ogden and Henry W. Jessup. Rev. Dr. Allen Douglas Carlisle was elected to succeed Rev. Dr. Thomas A. Nelson.

Columbus, May 21.—The Women's Board of Home Missions of the Presbyterian church today elected Mrs. Darwin R. James president; secretary, Mrs. Ella Alexander Doole. The reports submitted showed an advance in every department of the work during the last year.

FORAKER THEIR MAN. Negroes at Boston Are "Agin' Messrs. Roosevelt and Taft.

Boston, May 21.—Resolutions condemning President Roosevelt and Secretary Taft as candidates for the presidency and supporting Senator Foraker were passed at a mass meeting of colored people at Faneuil Hall tonight.

TRAIN BACKS INTO CABOOSE. Consequence Are Disastrous—One Man Is Killed and Many Injured.

Pittsburg, May 21.—One laborer was killed, seven others were fatally injured and nineteen were slightly hurt today in a rear-end collision on the Pan-Handle railroad at Hordley's Cove, W. Va., when a work train backed into a freight, crashing the caboose containing the men.

FATAL WRECK NEAR UTICA, N. Y. Utica, N. Y., May 21.—A freight engine eastbound on the New York Central jumped the track at Finks Basin, east of Little Falls, early today, and a Buffalo and Cleveland special train, westbound, crashed into the wreckage.

Baggage man Finley, of New York, was killed, and three passengers and three trainmen were injured.

ENSIGN BRISBINE A SUICIDE. Washington, May 21.—The navy department today received a dispatch from Commander Tappan, of the cruiser Tacoma, saying that Ensign A. T. Brisbane, who shot himself Sunday, died today.

MOB AND NEGROES BATTLE IN GEORGIA. WHITE MAN IS KILLED AND FOUR BLACKS, TWO OF THEM CHILDREN, SHOT TO DEATH.

Glaston, Ga., May 21.—Two negroes lynched, one white man and two negroes dead and seven other persons injured, one probably fatally, is the result of an attempt to capture a negro who last night attempted a criminal assault upon the person of Mrs. Laura Moore, a widow living near Manassas. The dead were John Hare, a white farmer; Sam Padgett, a negro, and his daughter, aged ten, also Padgett's wife and son, both of whom were lynched.

Fifteen negroes early today surrounded the house of Padgett, whom they suspected of harboring the negro who had assaulted Mrs. Moore. Those inside the building opened fire on the posse, instantly killing John Hare and seriously wounding Harry Peterson, James Daniel and Dr. J. L. Kennedy. The posse returned the fire, killing Padgett and one of his daughters, and wounding two other girls and two of Padgett's sons.

The posse was reinforced, and pursued the negroes, who had escaped. One was captured and identified as the man who shot Hare, and he was started for the Reidsville jail, together with Padgett's wife and small son. On the way the officers were overtaken by a mob, who took the prisoners from them. The woman was told to run, and as she did so she was riddled with bullets, her son being shot to pieces where he stood.

The negro who assaulted Mrs. Moore has not been captured, but it is reported that he is surrounded in a negro house and in all probability has been killed.

NOTED PRIEST IS DYING. Rev. Father Nugent Struck and Badly Injured by Electric Car.

Chicago, May 21.—Rev. Francis Nugent, the head of the mission work in the West of the Vicentian fathers, and whose home is in St. Louis, was struck and probably fatally injured by a Chicago & Lake Park electric train at Avonlin, a suburb of Chicago, today. Father Nugent was on his way to church when the accident occurred. He is considered one of the most eloquent preachers of the Catholic church in the United States.

DELUGED WITH MOLTEN METAL. FIVE MEN MEET AWFUL FATE AT STEEL PLANT—FOUR OTHERS FATALLY INJURED.

Pittsburg, May 21.—Five men were killed and four fatally injured tonight at the Eliza Furnace of the Jones & Laughlin Steel company. The accident was directly due to a "slip," which immediately resulted in an explosion. Molten metal was thrown over the men, almost cremating them.

The dead were: E. B. Willard, assistant superintendent of the furnace; John A. West, head blower; three unknown foreigners.

Willard and West are said to have been two of the most prominent furnacemen in the country. They were experts at furnace work, and for this reason it is believed that the accident was without warning. One of the men who escaped uninjured says that Willard's head was blown off by the force of the explosion.

BAD ACCIDENT IN INDIANA. Brazil, Ind., May 21.—Two men were killed, the station was totally destroyed at a loss of \$10,000 and the town was plunged into darkness for at least two months by the explosion of a boiler at the Clay City Electric light plant today.

Ralph Travis, the fireman, was instantly killed and John Swinger, a teamster, was literally cooked by escaping steam.

Washington, May 21.—The following is the weather bureau's forecast for Upper Michigan: Partly cloudy and warm; Wednesday, showers in the west; Thursday, showers; fresh east winds.

IRELAND SPURNS BIRRELL SCHEME. In Largest and Most Harmonious Convention Ever Held on the Isle, the "Home Rule" Measure Is Repudiated.

Dublin, May 21.—The largest and most representative and harmonious convention ever assembled in Ireland today repudiated the plan for a limited Irish council, which was all the Liberal government had to offer in fulfillment of its campaign promises. This action killed the hope of any home rule legislation by the present parliament, created a serious split in the government forces and may have far-reaching results.

The temper of the convention was plain from the beginning. No one had a word to offer in behalf of the bill. Home rule or nothing was the unanimous sentiment, and a resolution rejecting the measure, proposed by John Redmond, commanded every vote.

The Irish parliamentarians had been deluged with resolutions from town councils and all sorts of official and unofficial bodies since they arrived in Dublin, all denouncing the bill. The country spoke in unmistakable voice, and the Irish members of parliament cheerfully acquiesced in its will.

Hold the Bill, Insult to the Nation. Three thousand delegates attended the convention. The speeches were temperate, and there was little denunciation of the government. Except for the outbreak of a priest, who attempted to make the bill a church issue and was rebuked, everything went smoothly. The American delegates were all greeted enthusiastically. The keynote of the speeches and the several resolutions introduced was that the bill was an insult to Ireland.

The resolution rejecting the government's bill, says in part: "That having considered the Irish council bill introduced by the government, we declare that it is utterly inadequate in its scope and unsatisfactory in its details, and is rejected by the Irish nation. We regard the production of such a measure by the British government, pledged to home rule, as a confirmation of the position we have always taken, that any attempt to settle the Irish problem by half measures would be entirely futile. We call upon the Irish party to oppose the bill in the house of commons, and press upon the government with all their strength and power to introduce a measure for the establishment of a native parliament with responsible executive power all over purely Irish affairs."

Government Now to Drop It. London, May 21.—The Nationalist convention at Dublin having rejected Secretary Birrell's Irish bill, it is understood that the government will drop it for this session at least and proceed with other reforms which its Liberal supporters are urging and which the sessional program is crowded. That the government cannot grant any wider measure of self-government to Ireland without causing dissension in the cabinet is not denied, so there is no other course to adopt than shelving the bill, which is represented by the limit to which the anti-home rule Liberals would consent to go.

John Redmond's action in moving the rejection of the measure, although anticipated in some quarters, generally caused surprise, as it is understood that he had agreed, after a conference with his colleagues, to accept what the government offered as a partial concession to the demands of Ireland. With the majority of his party, including the clergy, opposed to it, however, there was no other course for him to pursue, in the opinion of politicians here.

CHINESE REBELS LOSE ARMS. Huge Stock at Tien Tsin Confiscated by Government Officials. Tien Tsin, May 21.—Eight thousand rifles, 200,000 rounds of ammunition and 8,000 bayonets, intended for revolutionary purposes, have been seized here by the imperial customs authorities. The seizure has created a sensation.

GERMAN CROPS DAMAGED. Berlin, May 21.—Frost, rain and hail have done considerable damage to fruit and field crops in southwestern Germany during the past three days. A hard storm has devastated the regions around Metzhausen, Alsace. The ground was covered a foot deep. Frost has ruined the Moselle vineyards, and the mountainous districts to the north and the middle Rhine country also suffered severely. Dispatches from Switzerland say that snow has fallen heavily over the Alps.

REVOLUTION IN SALVADOR. New Orleans, May 21.—A cablegram from President Zelaya of Nicaragua stating that a revolution broke out in Salvador today has been received here by the Nicaraguan consul. The cable said that Prudencio Alfara leads the revolution. It contained no other information.

BUYS FREEDOM FROM BANDITS. Smyrna, Asia Minor, May 21.—Baron Vanhienenstran, a member of a well-

known Dutch family, who was captured by Turkish brigands outside of this city May 19, has been released on the payment of a heavy ransom. The government of the Netherlands will demand that the porte repay the amount.

BUSSE TAKES DRASTIC ACTION. Tenderloin Police Force Transferred in a Body by Chicago's Mayor.

Chicago, May 21.—Mayor Busse, in an attempt to "revitalize" the "tenderloin" district, today transferred the entire police force, from captain down, to other parts of the city. It was charged that the police in the district committed a violation of the law.

NEW RAILROAD INCORPORATED. Wisconsin & Northern Minnesota Company Files Articles at Madison.

Madison, Wis., May 21.—The Wisconsin & Northern Minnesota Railway company, capital \$100,000, was incorporated today. The road is to start in the northeast part of Douglas county and extend through Superior to the St. Louis river and across the river by ferry or bridge to Duluth. The length within Wisconsin will be about twenty-five miles.

BASEBALL. STANDING OF THE CLUBS.

Table with columns for National League and American League, listing teams like New York, Chicago, Pittsburgh, Philadelphia, Boston, Cincinnati, St. Louis, Brooklyn, Cleveland, Detroit, Washington, Philadelphia, and their wins, losses, and percentages.

TODAY'S SCHEDULED GAMES. National League. Pittsburgh at Philadelphia. Cincinnati at Brooklyn. Chicago at New York. St. Louis at Boston.

American League. Washington at Cleveland. Philadelphia at Detroit.

MOB ATTACKS THE UMPIRES. Cubs Down the Giants at New York, and Much Disorder Follows.

New York, May 21.—The first game of the series between the New York and Chicago National league teams at the polo grounds today ended in almost a riot. Chicago won by the score of 3 to 2, and is now tied with New York in the race for the pennant. Fast infield play and Bresnahan's errors were responsible for the downing of the Giants.

Directly after the game the crowd, maddened at what were considered unfair decisions, surged on the field and surrounded Umpires Emslie and O'Day. Cussions were thrown at Emslie, and he was jostled by the mob. The officials were unable to get into the dressing room, followed by hundreds of angry men. Two policemen entered the grounds, and when several bottles were thrown by the crowd, they drew revolvers and one of them fired a shot in the air. This brought the crowd driven away from the umpires' room. No one was injured. A summary of the game follows:

R. H. E. Chicago ... 100000010—2 8 2 New York ... 000200100—3 7 2 Batteries: MacGrawson and Bresnahan; Brown and Kling.

Other National League Games. Philadelphia, May 21.—Moren kept the visitors' hits well scattered. Summary: Philadelphia ... 000010020—3 7 3 Pittsburgh ... 100000000—2 7 0 Batteries: Moren and Dooin; Liefeld and Phelps.

Boston, May 21.—St. Louis' pitchers were wild. Summary: Boston ... 100710000—15 13 2 St. Louis ... 210002000—5 8 5 Batteries: Lindaman and Brown; Holsketter, Shields and Marshall.

Brooklyn, May 21.—By bunching hits with two bases on balls in the eighth, Brooklyn won. Summary: Brooklyn ... 1000010030—5 8 2 Boston ... 000200000—2 8 1 Batteries: Ricker, Pastorius and Ruttler; Hitt and McLean.

American League. Detroit ... 000000000—0 6 2 Philadelphia ... 000001200—3 10 4 Batteries: Killian, Willetts and Papp; Waddell and Schreckengost.

Cleveland ... 000200010—4 8 1 Washington ... 000000000—1 3 0 Batteries: Joss and Bemis; Falkenberg and Hayden.

Chicago ... 000120000—3 5 2 Boston ... 000001000—1 8 3 Batteries: Altrock and McFarland; Winter and Shaw.

St. Louis ... 000011000—2 5 0 New York ... 000000000—0 6 1 Batteries: Howell and Stephens; Orth and Thomas.

TAKES A STAND WITH RAILROADS. Manufacturers' Association Declares Itself on the Subject of the Compulsory Reduction of Passenger Rates.

Says It Is Impossible for the Great Majority of the Lines to Meet the Costs at Two Cents a Mile, and if Not Bankrupt, Increased Freight Charges Must Be Expected—A Big Fund Proposed to Fight the "Oppression" of Union Labor.

New York, May 21.—A fund of a million and a half dollars to be expended in fighting "industrial oppression" in the next three years was called for by President James Van Cleave of the National Association of Manufacturers at the annual convention of that organization today. President Van Cleave appointed a committee of thirty-five manufacturers to find a way to raise the money.

The principles of the association were, Mr. Van Cleave said, founded upon the open shop, opposition to the boycott and the dictation of labor unions, and the fund would be required to further these tenets.

The convention placed itself on record, by the adoption of the report of the committee on interstate commerce, as opposing any compulsory reduction in the rates for the transportation of passengers by railroads. The committee expressed the opinion that any such reduction would be accompanied by an increase in freight rates.

Sees Menace to Public Interest. "We see in the movement an indirect attack on the public interest," says the report. "It is not proved that the railroads could afford to make a general reduction of the kind uncompensated by higher freight charges or increased income from the service. It is possible that some of them would be thrown into bankruptcy thereby, a point difficult to test for anyone but an experienced accountant, and for that very reason unsuited for arbitrary decision by legislators unfamiliar with railway affairs, after half-way investigation."

"It is probable that some of the main lines between great centers of population can carry passengers at two cents a mile, but it is certain that many branch lines could not meet the costs of passenger traffic at that rate. Again, not only must the present condition of railway service suffer deterioration if the railroads are compelled to economize by a too severe cut in the passenger rates, but the same cause must operate as a serious bar to improvements and extensions. Finally, the effect of such legislation would be a lowering of the value of railroad property practically amounting to confiscation, thus discouraging enterprise in another way by rendering more uncertain the reward of its application to transportation."

Bronze Tablet for D. M. Barry. A bronze tablet bearing resolutions expressive of the association's appreciation of the services of David M. Barry, former president of the organization, was unveiled and presented to Mr. Barry. The ex-president then read a paper on certain phases of various problems growing out of commercial obligations.

Change of Venue for Mrs. Kaufmann. Sioux Falls, S. D., May 21.—Judge Smith, in the Kaufmann murder case this afternoon, granted a change of venue to Moody county, and fixed June 4 as the date for the trial of the case.

Attacks on Jews Are Renewed. A report by the committee on merchant marine recommended that Senator Gallinger's bill to promote the merchant marine be passed, and the meeting at once passed a resolution without debate, favoring such action.

Ship Subsidies Favored. The report of the committee on tariff and reciprocity, including the result of the poll of the members as to their views on tariff revision, will be made tomorrow. It is said that 60 per cent of the members are in favor of a revision of the Dingley tariff.

TO FIGHT ELECTRIC LINES. New Combination of Railroads Disclosed at Chicago Hearing. Chicago, May 21.—An apparent combination among the Western railroads to fight the competition of electric roads in refusing to enter into traffic relations with them, was disclosed before the interstate commerce commission here today.

Officials of the Chicago & Milwaukee electric road testified that the Missouri, Washoe, Rock Island and Illinois Central had refused to join the electric line in through freight tariffs unless the Western trunk line committee would sanction such action. The railroad officials in their testimony declared that the electric line was not equipped to handle freight, and that they would not join in through rates with any line not in position to give as well as take cars.

In this case was brought as a test, and if the commission decides that the railroads must join the electric road in tariffs, hundreds of similar applications will be made.

BUFFALO STRIKE CONTINUES. Buffalo, May 21.—The striking freight handlers tonight refused an offer of ten cents, and are getting seven today.

Notre Dame Defeats Michigan. South Bend, Ind., May 21.—Baseball: Notre Dame, 5; Michigan, 4.

Chicago, May 21.—Baseball: University of Chicago, 8; Northwestern, 2.

PAT CROWE GOES FREE. Jury Acquits Him of Charge of Holding Up Street Cars.

Council Bluffs, Ia., May 21.—Pat Crowe was this evening acquitted by the jury in the district court of the charge of holding up two street cars in this city two years ago and robbing their crews. The robbery was committed by two masked men, and Crowe was indicted for the crime. One of the men robbed, however, today testified that Crowe was not one of the hold-ups. This disposes of the last criminal charge against Crowe, who became noted several years ago as the supposed kidnapper of the son of E. A. Cudahy, of Omaha. A year ago he was tried on the charge and acquitted.

NEPHEW OF NOTED ACTRESS. Louis V. Eyttinge Convicted of Murder at Phoenix, Arizona.

Phoenix, Ariz., May 21.—Louis V. Eyttinge, who claims to be a nephew of the famous actress, Rose Eyttinge, was today convicted of the murder of John Leich of Sheboygan, Wis., and will be sentenced to life imprisonment.

Eyttinge and Leich came to Phoenix together after becoming acquainted enroute from the East, March 17. They are said to have ridden into the desert together. Leich never returned. His body was found in an unrequited spot, and at the inquest it developed that he had been poisoned. All his money and valuables had disappeared. Eyttinge was arrested a month later in San Francisco.

JURY BOX AT BOISE STILL TO BE FILLED. WILL BE A WEEK YET BEFORE TESTIMONY IS TAKEN IN HAYWOOD CASE.

Boise, Idaho, May 21.—It is predicted today that the first witness testifying to the circumstances connected with the Stuenkel murder will take the stand one week hence. There are still eight unperemptory challenges; there is an additional vacancy created by the excusing for illness of Jerry Cole, and under a ruling of Judge Wood the entire jury is still open to further examination.

It is predicted that the jury will be finally sworn some time Monday next; that the opening statement will be made Monday afternoon or Tuesday morning and the first real testimony will be taken on Tuesday. The prosecution's list of witnesses to be used in the four cases pending now number nearly 200. Less than one-third of them will be called in the Haywood case.

Ordeal Ahead for Orchard. Harry Orchard, the principal witness for the state, will probably be on the stand a full week. It is believed that he will be called a week from Thursday, assuming that the jury is sworn on Monday.

The great battle of the trial will come with the introduction of Orchard in court. It is expected that there will be a fight against the admission at any important stage of the testimony, even if he will be submitted to the strong examination of the combined ingenuity and cleverness of the defense can exercise. Attorney Richardson will conduct the cross-examination of Orchard.

Mayor Schmitz' Motion Denied. San Francisco, May 21.—When Mayor Schmitz made his appearance in court today on the charge of extorting money from local French restaurants, Judge Dunne denied the motion of the defense for a change of the trial judge.

Change of Venue for Mrs. Kaufmann. Sioux Falls, S. D., May 21.—Judge Smith, in the Kaufmann murder case this afternoon, granted a change of venue to Moody county, and fixed June 4 as the date for the trial of the case.

ATTACKS ON JEWS ARE RENEWED. BLACK HUNDREDS CREATE FRESH TERROR AT ODESSA—CITIZENS BARBAROUSLY BEATEN.

Odessa, May 21.—Fifty-three Jewish persons have been taken to hospitals, suffering from broken heads or limbs, or otherwise dangerously injured, as a result of the outbreak of the Black Hundreds here yesterday, following the assassination of three police officials at the Central police bureau by the explosion of an infernal machine. In addition, one hundred persons were less seriously injured. The victims include women, children and students.

Mutual Life Trustee Resigns. Chicago, May 21.—Harlow N. Higginbotham of Chicago, recently elected a trustee of the Mutual Life Insurance company of New York, resigned today. In a letter accompanying his resignation, Mr. Higginbotham expresses dissatisfaction with the present condition of insurance affairs in New York.

WANTS CANTEN RESTORED. Army and Navy Union Declares for the Post Exchange. Washington, May 21.—The Army and Navy union convention today adopted a resolution that "this national corps go on record as favoring the re-establishment of the army canteen, or post exchange, as it was prior to the act of congress doing away with it at the best of interested parties."

ROYAL ARCANUM'S NEW HEAD. New York, May 21.—Robert Van-

CLEAN SHEETS FOR HOTEL BEDS. Must Be Eight and a Half Feet Long, and Washed Every Day, if Proposed Legislation Is Enacted at Lansing.

In the Interest of the Public Health, House Committee Reports Favorably on Provisions to That End—Anti-Cigarette Bill, Amended to Apply to Minors Under 21, Passes the Senate, as Does a Measure Increasing the University Tax One-Eighth Mill.

Lansing, Mich., May 21.—[Special].—The Kinnane bill, forbidding the sale of cigarettes or "makin'gs" to minors under eighteen, was amended to make it twenty-one years, and passed the senate by the vote of twenty-three to six today. Messrs. Fuller, Moriarty and Smith voted against the measure.

The bill raising the university tax from one-quarter mill on the dollar to one-half mill was amended to give but three-eighths of a mill, and passed the senate, twenty-six to two. Messrs. Fuller and Yeomans cast the negative votes.

Railroad Police Proposed by Gordon. Representative Gordon of Marquette put in a bill today calling for the appointment of railroad police by the governor on recommendation of the road. It is provided that there shall not be more than one policeman to every five miles of road.

Representative Galbraith of Calumet introduced a bill making it a misdemeanor to throw bricks at trains or trolley cars. Mr. Smith put in a bill providing for the incorporation of the lodges of the Kalevan Ritarit.

Mr. Scidmore's bill calling for eight and a half foot sheets on every hotel bed, and to be washed every day, was reported out by the house committee on public health.

Representative Stannard's bill making it legal for mining and logging roads whose couplers are less than twenty-eight inches from the rail, not to use automatic couplers, is the special order for Thursday. The bill was drawn by Thornton Green of the Ontonagon railroad.

Mr. Stannard's bill providing a deputy probate register for Keweenaw county passed the senate today.

Earle's Assistant Sent to Marquette. Highway Commissioner Earle has taken cognizance of the fact that there is plenty of trap rock within a stone's throw of the Marquette prison, and has started Deputy Commissioner Rogers north for the purpose of making a definite survey of the situation.

"The claim is a claim on every hotel bed, and to be washed every day," says Mr. Earle, who contends that the rock is quartzite and useless for road-making purposes, overlooking the fact that this same rock has been used for years in street work in Marquette city.

There will be a hearing on Earle's trap rock prison plan May 29 before the prison committee. It is generally predicted that the bill will not pass, but Earle does not lose confidence for a minute.

YEAR-END REPORTS DOCTORED, IT'S SAID. TEN INDICTMENTS AGAINST THE PRESIDENT OF THE METROPOLITAN LIFE COMPANY.

New York, May 21.—The special grand jury investigating the conduct of the insurance business in New York county has concluded its investigation of the Metropolitan Life Insurance company, and today returned ten indictments against the company's president, John R. Hageman. Seven indictments charge forgery in the third degree, while the other three charge perjury. All are based on what have come to be known as "year-end transactions." These consist of certain changes in the company's books effected just prior to the submission of the annual report to the insurance department, which it is alleged, were designed to place the company in a more favorable light than the facts warranted.

Mutual Life Trustee Resigns. Chicago, May 21.—Harlow N. Higginbotham of Chicago, recently elected a trustee of the Mutual Life Insurance company of New York, resigned today. In a letter accompanying his resignation, Mr. Higginbotham expresses dissatisfaction with the present condition of insurance affairs in New York.

WANTS CANTEN RESTORED. Army and Navy Union Declares for the Post Exchange. Washington, May 21.—The Army and Navy union convention today adopted a resolution that "this national corps go on record as favoring the re-establishment of the army canteen, or post exchange, as it was prior to the act of congress doing away with it at the best of interested parties."

ROYAL ARCANUM'S NEW HEAD. New York, May 21.—Robert Van-

sands of Chicago, was today elected supreme regent of the Royal Arcanum.

DAILY MINING JOURNAL
 A MORNING PAPER PUBLISHED BY THE
 MINING JOURNAL CO. (LIMITED.)
 Issued daily except on Sundays. Contains
 Associated Press dispatches and is especially
 devoted to the Upper Peninsula interests.
 SUBSCRIPTION RATES:
 Per month, by carrier.....\$1.50
 Per year, by mail.....\$15.00
 MARQUETTE, MICH., MAY 22.

Entered as mail matter of the second class
 in the postoffice at Marquette, Mich.
 The solons will save the state consid-
 erable money if they carefully avoid
 any necessity for a special session.

Speaker Cannon is in New York; which
 reminds us that the speaker is still to
 be reckoned with as a presidential possi-
 bility.

Ohio is comparatively quiet. So far
 this week we haven't had a formal pro-
 nouncement from any of its political
 leaders, or near-leaders.

While Mayor Schmitz was engaged in
 the preparation of his counter-charges
 he evidently decided that he might as
 well make them strong enough.

The only doubt obscuring the pros-
 pective gubernatorial situation in 1908
 seems to center about the identity of
 the man the "old guard" will support.

The French societies of the upper pen-
 insula are to rendezvous here June 24,
 and the eagle is to scream on Independ-
 ence day. Evidently Marquette will have
 to put on a little extra steam.

If President Roosevelt should want a
 Michigan man to succeed Minister
 O'Brien at Copenhagen, Michigan has
 many tried men and true who would
 be found willing if properly approached.

By general consent Abe Hummel is
 better disposed of basking here in the
 Blackwell Island penitentiary than in
 cooking up fake divorce cases in the
 New York courts.

The commissioner of corporations has
 let in a little more light on Standard
 Oil operations. All knowledge is wel-
 come and should prove useful. Let the
 good work go on. Presently we shall
 know how to securely lock the stable
 from which the Standard Oil has stolen
 the horse.

There appears to be a little difference
 of opinion as to whether Mayor Schmitz
 or the committee of seven is running
 San Francisco. However, such part of
 it as the mayor is running he is now
 running circumspectly, and with due
 regard for the deencies, for a fierce light
 is playing over him.

The Houghton Giants were whalloped
 three times straight by the Duluth team
 in the opening engagements of the Grass-
 hopper league. Portage Lake, which has
 a well defined habit of winning, picked
 up in hockey, won't stand for much of
 this. It will insist on having a fair
 percentage of the games chalked up in
 the victory column, whatever the cost.

Pittsburg has a little improvement on
 the New York story that Corey is going
 to resign as president of the Steel trust.
 According to the Pittsburg version he
 has already resigned, did so before the
 recent nuptials, in fact. Pittsburg has
 also picked his successor. He is to be,
 unless Pittsburg is wholly at fault,
 President Dinkey of the Carnegie Steel
 company.

Ishpeming hasn't a water problem, but
 it has a water main problem, a pros-
 pective \$35,000's worth. The present
 main has been undermined by the oper-
 ations of the mining companies, and
 about two miles of pipe has to be laid
 to insure against the city being suddenly
 shut off from its source of supply when
 not expecting such a calamity. But
 meanwhile the water Ishpeming gets is
 free of foreign ingredients and fit to
 drink. So Ishpeming has something to
 be thankful for.

The Lansing Journal does not approve
 of the vote of Senator Tuttle, who rep-
 resents its district, on the primary law
 amendments. "It is well known that
 the Journal consistently refrained during
 the candidacy of Arthur J. Tuttle for
 the senatorship from criticizing him in
 any way, although there were, no doubt,
 several vulnerable points on which he
 might have been attacked," it says. "Up
 to within the past few weeks there was
 nothing in his course as senator from
 this district to call down upon him
 serious criticism, and it is now sincerely

REBATES AND THE STANDARD OIL.
 The Mining Journal has received some
 clippings bringing out a point in the
 Alton rebate cases that has not been
 generally made clear, and which, in jus-
 tice to the Standard Oil (and even the
 Standard Oil is entitled to justice),
 should not be overlooked. In these cases
 the Standard Oil was found guilty on
 1,436 counts, making it liable for mini-
 mum fines of \$1,500,000 and maximum
 fines of \$30,000,000.

The Standard Oil company gave the
 Alton road a part of its business betw-
 een Whiting, Ind., and East St. Louis,
 Mo., on the Alton's representations that
 it would meet the six-cent rate of two
 other competing lines. But before the
 present organization of the Alton there
 was an old published rate of eighteen
 cents on this business, which had never
 been withdrawn, though it was obsolete,
 and which appears to have been the only
 rate filed with the interstate commerce
 commission. It was the rebate from
 this rate that gave rise to the suits.

Judge Landis ruled against permitting
 the facts of the Standard Oil's relations
 with the other roads going to the
 jury, holding that they were not ger-
 mane to the case; that the Alton's only
 published rate was eighteen cents and
 that the Standard Oil was supposed to
 know this. It was in this case that
 Judge Landis ruled that it was the ship-
 per's business to be familiar with the
 legal published rate, and that ignorance
 of that rate, like ignorance of the law,

could not constitute a valid excuse for
 having accepted a rebate.
 It is the contention of the Standard
 Oil attorneys, and of some disinterested
 observers, that in these Alton cases the
 Standard Oil was a victim of circum-
 stances, and they point to obvious facts
 to show that there was no situation
 making a violation of the law necessary
 or profitable to the oil trust. It already
 enjoyed the six-cent rate on two roads.
 Its giving a share of its business to the
 Alton was not in restraint of railroad
 competition but actually was calculated
 to encourage it. There may have been
 a technical violation of the law, but
 there was no intentional crime against
 the public. On the other hand it is ob-
 vious that a corporation willing to hide
 behind technicalities as shamelessly as
 is the Standard Oil can expect no great
 amount of sympathy when it is caught
 up on one. If exact justice is not served
 by the verdict in the Alton cases, no
 more has it been served in innumerable
 cases that the Standard Oil has won.
 Admitting the force of some of the
 Standard Oil contentions it appears that
 Judge Landis stuck close to the literal
 interpretation of the law, and that's
 what courts are constituted to do. They
 are not commissioned to go far afield
 in search of abstract justice. If they
 were thus commissioned many and many
 a verdict would be reversed instanter.
 Meanwhile we are indebted to Com-
 missioner of Corporations Smith for an-
 other clearcut statement of the methods
 by which the Standard Oil attained its
 position of supremacy in the oil indus-
 try. The Standard Oil, it is again shown,
 enjoyed no particular natural advantage
 over its competitors. Its advantage lay
 in the unscrupulous talent of its pirat-
 ical owners for sandbagging railroads in-
 to traffic arrangements by which the
 Standard Oil was given secret advan-
 tages over those competitors, and thus
 enabled to crush them. Its practical
 monopoly was established in defiance
 of written laws and of all considerations
 of commercial honesty and fair dealing.

"It cannot be too strongly empha-
 sized," the commissioner writes, "that its
 growth and present power rests primar-
 ily on the control of transportation fac-
 ilities in one form or another. The
 scandalous railway discriminations ob-
 tained by the Standard in its earlier
 years as against its competitors did
 more than all other causes together to
 establish it in its controlling position.
 Later, when the rebate was substantially
 abandoned, the Standard was able, by
 compelling the co-operation of the rail-
 roads, to establish in place thereof a
 system of secret or open discriminations
 in rates in its own favor, covering al-
 most the entire country, and of such a
 nature that throughout large sections it
 could sell and make a profit on oil at
 prices which left no profit for competi-
 tors."
 This largely concerns the past. How-
 ever, the commissioner gets down to the
 present when he charges violation by
 the Standard Oil at this time of the rate
 law of 1906, by a failure to file sched-
 ules for its trunk lines doing an inter-
 state business. It is his opinion that
 immediate consideration should be given
 to an enforcement of the pipe line pro-
 vision of that law. This recommendation
 merits attention. If there is any cor-
 poration in the whole broad land which
 from the present on should be compelled
 to exactly comply with the law it is the
 Standard Oil. Already it has waxed far
 too fat, while its Rockefeller followers
 waxed smug and sanctimonious, through
 defiance of it.

City Controller's Office,
 Marquette, Mich., May 18, 1907.
 Notice is hereby given that the as-
 sessment roll of the taxable property of
 the city of Marquette for the year 1907
 will be in the hands of the board of re-
 view on Monday, June 3, 1907.
 Said board of review will convene at
 the common council room in the city of
 Marquette on Monday, June 3, 1907, at
 9 o'clock a. m., and will be in session
 each day thereafter up to and including
 Saturday, June 8, 1907, for the purpose
 of reviewing and correcting said assess-
 ment roll.
 Every person having property in the
 city of Marquette is requested to call
 at the common council room during the
 sessions of said board of review and in-
 spect said assessment roll, in order that
 all errors which may have been made
 in said assessment can be corrected.
 FRANKLIN E. BAY,
 Controller.

Noticed that the assessment roll of
 the taxable property of the city of Mar-
 quette for the year 1907 will be in the
 hands of the board of review on Monday,
 June 3, 1907. Said board of review will
 convene at the common council room in
 the city of Marquette on Monday, June
 3, 1907, at 9 o'clock a. m., and will be
 in session each day thereafter up to and
 including Saturday, June 8, 1907, for
 the purpose of reviewing and correcting
 said assessment roll. Every person hav-
 ing property in the city of Marquette
 is requested to call at the common coun-
 cil room during the sessions of said
 board of review and inspect said assess-
 ment roll, in order that all errors which
 may have been made in said assessment
 can be corrected.

And once more we ask what has be-
 come of Road Commissioner Earle's Ke-
 weenaw prison bill?—Houghton Gas-
 zette. Mr. Earle's prison bill is in an
 appropriate committee in the house, just
 as Governor Warner's binder twine plant
 bill is in an appropriate committee in
 the senate. If the former ever gets out
 and through the house Governor Warner
 will kill it. If the latter ever gets out
 of the senate it will be because the gov-
 ernor's enemies have been powerless to
 give it its finishing stroke. As for our-
 selves, we shouldn't be surprised if both
 bills were among the "unfinished busi-
 ness" when the state solons pack up the
 capitol moveables in preparation for
 their return home.

We are in the fog end of May and yet
 the farmers have accomplished but little.
 Many of them have the greater part of
 the usual preliminary work in the fields
 to do, to say nothing of not having their
 crops in. Their case is not wholly a
 desperate one, but their misgivings are
 justified, particularly as there is little
 promise of a permanent improvement in
 the weather. It begins to look as if the
 season might be "onery" all through.
 There is still time for the farmers to get
 in their root crops, and with a favor-
 able summer season the yield would
 be about normal. In this latitude, how-
 ever, it is getting late for the grains,
 and they will be dubious crops this sea-
 son. However, they are not, even under
 normal conditions, important crops
 in this region, a circumstance for which
 the farmers have in off years like the
 present reason to be thankful.

Mayor Schmitz of San Francisco, like
 the late Sam Parks of New York, Cor-
 nelius Shea of Chicago, and Moyer, Hay-
 wood and Pettibone, is a product of
 unionized labor, but of course unionized
 labor shouldn't be judged wholly by him,
 any more than it should be judged by
 the other estimable gentlemen men-
 tioned. In its ranks are thousands and
 thousands of sturdy, upright, well-mean-
 ing men, and within the past few weeks
 they have, in effect, repudiated some of
 the mis-leaders of their cause enumerat-
 ed above. However, this is not
 enough. The best interests of
 unionized labor demand that the san-
 est, safest and most honorable of the
 men affiliated with it be put in positions
 of power within its organization, and
 the union men themselves are beginning
 to see it. If honest, wellintentioned men
 permit themselves to be represented by
 blatherskites they must expect that the
 public will judge them by these blather-
 skites.

George R. Scrugham, field manager for
 the Policyholders' association in the
 campaign to secure the boards of di-
 rectors of the New York and Mutual
 Life Insurance companies, has been held
 to the grand jury by a New York mag-
 istrate for an alleged conspiracy to ob-
 struct due process of the law. The spec-
 ific offense Scrugham is said to be
 guilty of is the "perfecting" of ballots
 voted in the elections by the Policyhold-
 ers' association, which were first turned
 in to the officers of the association.
 Many ballots thus submitted were de-
 fective. Neglect to procure witnesses
 was a common fault of the policy hold-
 ers. As it was impracticable to return
 these ballots for witnesses' signatures it
 is alleged that Mr. Scrugham had ficti-
 tious names written in and then voted
 the ballots. On the other hand the Policy-
 holders' association alleges various irreg-
 ularities in the conduct of the adminis-
 trations' campaign, and it is common
 knowledge that the administrations left
 nothing undone to secure votes for their
 tickets. In fact there appears to be
 taint enough to go round, and when the
 truth comes out, if it ever does, there
 are indications that the showing for both
 parties to the election will be a sorry
 one.

REBATES AND THE STANDARD OIL.
 The Mining Journal has received some
 clippings bringing out a point in the
 Alton rebate cases that has not been
 generally made clear, and which, in jus-
 tice to the Standard Oil (and even the
 Standard Oil is entitled to justice),
 should not be overlooked. In these cases
 the Standard Oil was found guilty on
 1,436 counts, making it liable for mini-
 mum fines of \$1,500,000 and maximum
 fines of \$30,000,000.

The Standard Oil company gave the
 Alton road a part of its business betw-
 een Whiting, Ind., and East St. Louis,
 Mo., on the Alton's representations that
 it would meet the six-cent rate of two
 other competing lines. But before the
 present organization of the Alton there
 was an old published rate of eighteen
 cents on this business, which had never
 been withdrawn, though it was obsolete,
 and which appears to have been the only
 rate filed with the interstate commerce
 commission. It was the rebate from
 this rate that gave rise to the suits.

Judge Landis ruled against permitting
 the facts of the Standard Oil's relations
 with the other roads going to the
 jury, holding that they were not ger-
 mane to the case; that the Alton's only
 published rate was eighteen cents and
 that the Standard Oil was supposed to
 know this. It was in this case that
 Judge Landis ruled that it was the ship-
 per's business to be familiar with the
 legal published rate, and that ignorance
 of that rate, like ignorance of the law,

could not constitute a valid excuse for
 having accepted a rebate.
 It is the contention of the Standard
 Oil attorneys, and of some disinterested
 observers, that in these Alton cases the
 Standard Oil was a victim of circum-
 stances, and they point to obvious facts
 to show that there was no situation
 making a violation of the law necessary
 or profitable to the oil trust. It already
 enjoyed the six-cent rate on two roads.
 Its giving a share of its business to the
 Alton was not in restraint of railroad
 competition but actually was calculated
 to encourage it. There may have been
 a technical violation of the law, but
 there was no intentional crime against
 the public. On the other hand it is ob-
 vious that a corporation willing to hide
 behind technicalities as shamelessly as
 is the Standard Oil can expect no great
 amount of sympathy when it is caught
 up on one. If exact justice is not served
 by the verdict in the Alton cases, no
 more has it been served in innumerable
 cases that the Standard Oil has won.
 Admitting the force of some of the
 Standard Oil contentions it appears that
 Judge Landis stuck close to the literal
 interpretation of the law, and that's
 what courts are constituted to do. They
 are not commissioned to go far afield
 in search of abstract justice. If they
 were thus commissioned many and many
 a verdict would be reversed instanter.
 Meanwhile we are indebted to Com-
 missioner of Corporations Smith for an-
 other clearcut statement of the methods
 by which the Standard Oil attained its
 position of supremacy in the oil indus-
 try. The Standard Oil, it is again shown,
 enjoyed no particular natural advantage
 over its competitors. Its advantage lay
 in the unscrupulous talent of its pirat-
 ical owners for sandbagging railroads in-
 to traffic arrangements by which the
 Standard Oil was given secret advan-
 tages over those competitors, and thus
 enabled to crush them. Its practical
 monopoly was established in defiance
 of written laws and of all considerations
 of commercial honesty and fair dealing.

"It cannot be too strongly empha-
 sized," the commissioner writes, "that its
 growth and present power rests primar-
 ily on the control of transportation fac-
 ilities in one form or another. The
 scandalous railway discriminations ob-
 tained by the Standard in its earlier
 years as against its competitors did
 more than all other causes together to
 establish it in its controlling position.
 Later, when the rebate was substantially
 abandoned, the Standard was able, by
 compelling the co-operation of the rail-
 roads, to establish in place thereof a
 system of secret or open discriminations
 in rates in its own favor, covering al-
 most the entire country, and of such a
 nature that throughout large sections it
 could sell and make a profit on oil at
 prices which left no profit for competi-
 tors."
 This largely concerns the past. How-
 ever, the commissioner gets down to the
 present when he charges violation by
 the Standard Oil at this time of the rate
 law of 1906, by a failure to file sched-
 ules for its trunk lines doing an inter-
 state business. It is his opinion that
 immediate consideration should be given
 to an enforcement of the pipe line pro-
 vision of that law. This recommendation
 merits attention. If there is any cor-
 poration in the whole broad land which
 from the present on should be compelled
 to exactly comply with the law it is the
 Standard Oil. Already it has waxed far
 too fat, while its Rockefeller followers
 waxed smug and sanctimonious, through
 defiance of it.

TOIVOLA ASSAULTER ARRESTED.

Charles Olikanen, It's Said, Broke Gustav Kempanen's Head.

Under Sheriff Vivian brought to Houghton Monday afternoon Charles and August Olikanen, who are charged with beating up Gustav Kempanen at Toivola on Sunday. The matter was lightly touched upon in these columns yesterday. It seems that the Olikanen brothers got into a brawl with Kempanen and that the first named brother hit the victim on the head with a wooden stake, leaving a four-inch cut in his scalp. He also broke his shoulder. The brother was interested in starting the fight and is under arrest on a charge of assault and battery. Charles will have to answer to a charge of assault with intent to murder. The men will have their hearing today.

Pay day, last Saturday, was productive of many misdemeanors. The county jail had seventeen new prisoners when it opened for business Monday morning. They were principally drunks, though one man—Ralph Cucci—had three charges against him. He was fined for being disorderly; he was fined again for assault and battery, having drawn a weapon on some one; and he was fined some more for carrying concealed weapons. This latter charge pulled \$70 and costs out of him. It is doubtful if he has much money left from his pay envelope, as he must have paid out in all over \$150 which naturally brings up the suggestion that Ralph gets a good salary or is of a saving disposition, usually.

The \$150 robbery case in Calumet resulted in the arrest of Joseph and George Biscak, charged with taking that amount from Frank Szabo. They say he lost the money while rolling around the floor of a saloon. They also say they did not find it. They will have a hearing in Calumet later in the week.

RAISING A SUNKEN CRAFT.

Captain Fowler of the Reid Wrecking company is making rapid progress on the job of raising the steamer Mascotte, which sank at the Ripley dock. The plan of operations is simple, though its application requires expert skill. A coffer dam is first built around the boat, the planks composing the dam being nailed at the bulkhead and at the upper end of the boat, resulting in making the entire boat watertight. A drier will then fix a canvas over the hole in the hull, and the entire boat will be pumped out, the coffer dam preventing any more water from rushing in. It is expected the boat will be raised in about two weeks.

HOUGHTON COUNTY ELECTRIC LIGHT CO.

ELKS FIRST ANNUAL BALL.

Hancock Lodge Will Entertain in Grand Style Tonight.

The first annual ball of the Hancock Sledge of Elks will be given tonight in Germania Hall, and it promises to be an event of more than usual social importance. The new officers of the lodge are exerting themselves to bring the Elks to the front socially in Hancock and Houghton, and their first essay tonight should help to realize this ambition. The hall will be splendidly illuminated and decorated and the refreshments will be such as will strengthen the reputation of the Elks as lovers of the good things of life. The ball is in the hands of the following committees:

Entertainment—H. T. Liebert, chairman; D. G. Donahoe, A. L. Feiss, Ray Kerneke, Mart Hans.
Floor—Paul Ruppe, chairman; Thomas Keyes, J. W. Ruhl, Ernest Westcott, R. T. Wiscer, Jr., Dr. W. D. Whitten, T. J. Kitts.
The Calumet lodge will send down some 100 Elks and their ladies, and a special train has been arranged for leaving Calumet at 8:15 for the Copper Range and returning after the ball.

IMPORTANT SOCIAL EVENTS.

Dances of Elks, Naval Reserve and Michigan College of Mines.

Three large social events are to be given in the copper country within a short time, the three most important of the present year. The first is the big ball of the Hancock Elks this evening. This lodge has in the past entertained lavishly, but with limitations imposed by the size of such halls as it has occupied as lodge rooms. The new temple has a ball room, but it is inadequate for an event of this nature. The Elks have engaged a Calumet & Hecla orchestra and will entertain their guests in royal fashion.

The Hancock Naval Reserve will give its first annual ball in Germania Hall the night of May 31, under the patronage of a long list of society women. All parts of the copper country. Invitations have been issued this week, and the promise is that the function will be attended by the largest throng seen at a dance in the copper country this season.

The Quincy college on Thursday night decorations are to be made under the direction of Paul Segal, while Maundy refreshments will be served by the Cafeteria Nord. The great interest taken in Hancock in the naval reserve is extending to other towns in the county, and as the seal of the approval of society has been set on this first annual ball event will attract people from all the towns. It will be a military function, too, as officers from military organizations all over the upper peninsula have promised to attend, including Colonel Bates and staff of Third regiment and Lieutenant Colonel Thielman and Major MacNaughton of the governor's staff.

The Michigan College of Mines students' annual party will be given in the college gymnasium June 10. As in the past this will be one of the really important social functions of the year. The students are already planning the arrangements for the party and will shortly issue the invitations.

"TOMMY" GETZ IN DULUTH.

Copper Country Theater Manager in the Zenith City.

T. P. "Tommy" Getz, the well known theatrical man, is in the city, hard at work mobilizing and rehearsing the amateur actors and actresses who are to take part in the Elks' show, which will be given under his direction, says the Duluth Herald. Getz, who has had engagements in Duluth in the past, is at Duluth, No. 133, R. P. O. E., have been carried out successfully under the management of Mr. Getz, and he himself is authority for the statement that this year's show will eclipse all the others.

Mr. Getz may be considered as copper country man. He has for a number of years directed amateur performances for the Calumet and Hancock lodges of Elks with great success, and he is now interested in the ownership of the Savoy theaters of Hancock, Houghton, Lake Linden and Calumet. In connection with Mr. Getz' professional work it is interesting to note that the Hancock lodge of Elks is now planning the organization within the lodge of a permanent theatrical company which will have charge of all future entertainments in the lodge and which will not require the services of a professional director. Exalted Ruler Stevenson is opposed to dividing receipts of entertainments with outside people, and in the future the Hancock lodge entertainments will be of the home-grown variety, providing the experiments now to be tried are successful.

MARRIED IN HANCOCK.

John Boyle and Miss Katherine Driscoll were united in marriage yesterday morning at St. Patrick's church, Hancock, by Rev. T. J. Atfield. The wedding was a quiet one, and was witnessed by only a few friends of the parties. The bride and groom were attended by Robert Doyle of Houghton and Miss Bridget Driscoll of Hancock, sister of the bride.

Mr. Boyle has been for a number of years a resident of the Nestor Lumber company's store. Mrs. Boyle was until recently night operator in the Houghton telephone exchange, and as such was one of the best liked young women in the copper country. She was known through the telephone to thousands and her ready courtesy and good humor made telephoning at night a pleasure. These thousands who have never seen her but have heard her voice are congratulating Mr. Boyle and wishing him and his bride a long life and happiness. Mr. Boyle expects to create in the West after a brief honeymoon.

FIREMEN'S MEMORIAL SUNDAY.

Graves of Deceased Fire Fighters to be Decorated June 2.

Chief Voetsch and associates of the Houghton fire department are planning the program for the annual memorial services for the deceased members of the company, which will be held the first Sunday in June. The program will include a parade to Forest Hill cemetery and services there. The Houghton fire company will join with the Houghton department on this occasion.

GOOD WORDS FOR CHAMBERLAIN'S COUGH REMEDY.

People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mrs. Edward Phillips of Barclay, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catherine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a bad cold, my throat and chest were sore, and I was unable to sleep. I took Chamberlain's Cough Remedy and was soon well as ever." This remedy is for sale by The Stafford Drug Co.

"Let us have some Cuddy's Peacock Bacon and calves liver for supper," says young and old. (11-27-ed)

MILITARY ORDERS TO CHURCH.

The military orders of Calumet and of the Portage Lake district will attend divine services next Sunday. The worship at Calumet will take place in the Calumet Congregational church, where a special sermon will be delivered by Rev. Luther K. Long, the pastor. The Calumet Engineers, the Civil War veterans and the Spanish War Veterans will attend. Rev. T. J. Atfield, pastor of St. Patrick's church, Hancock, will deliver a special Memorial Day sermon at high mass Sunday morning. It will be attended by the Hancock Naval Reserve, the Houghton Light Infantry, Stiles post, G. A. R., and the Spanish War Veterans.

IN THE BASEBALL LEAGUE.

The Houghton Giants won their first game in the season Monday at Duluth, beating the White Sox 3 to 2 in an exciting game. Kaiser, who appears to be Taylor's manstay in the box, did the pitching for Houghton and was well supported. Calumet lost at Winnipeg Monday, 2 to 3.

There came from Duluth a kick against Empire Nolan. It is said he is yellow and inefficient and various other things. The wonder is that either he or McGraw have not come in for kicks before this. The league has been in operation almost a week.

SEEK FALSE ALARM FIENDS.

Chief Voetsch of the Houghton fire department said yesterday that he would give \$25 to any man who would inform him of the false alarm of fire from the alarm box on the Hurontown road last Sunday. He does not offer this as a reward, but makes the statement supplementary to stronger expressions. The alarm was turned in by a resident of the village, saw three young men tampering with the alarm box a few minutes before the department arrived on the scene. If the trio is ever located, it and each and several of its members will be an interesting session with Justice Brand.

CALUMET BUSINESSMEN.

The annual meeting of the Calumet Businessmen's association will be held tonight in the Red Jacket city hall. John on Vivian, Jr., vice president, will preside in the absence of President Hosking. The meeting will elect officers for the ensuing year and may possibly make plans for various movements during the summer. The association has on its hands the task of securing a reciprocal switching arrangement between the Copper Range and Mineral Range railroads. This matter has been up for months.

FIRST PASSENGER STEAMER.

The Japan of the Anchor line, the first passenger steamer from an eastern port to touch Portage lake this season, arrived at the Copper Range dock, Houghton, yesterday. The Junata will be here today. These boats will return to Houghton Friday and Saturday, respectively.

COPPERDOM BREVITIES.

Rev. H. Appleton of Calumet has gone to Massey, Ont., to visit the Hermina mine, of which company he is secretary.

James J. Byers & Co. of Houghton expect to start the excavation work on the new Hancock pavilion today or tomorrow.

Miss Tekla Earm of the Soo, assisted by William Phillips and other local talent, gave a concert in the Calumet Congregational church last night.

The Hancock Finnish club has been invited to participate in the Midsummer Day festival at Ironwood July 24. If satisfactory railroad rates can be secured, the club will accept.

Of the thirteen applicants who took the civil service examination for clerk and carrier in the Hancock postoffice March 10, eight have been reported to Postmaster Emery as having passed.

Miss Lenore Healy of Houghton will return Friday from Duluth, where she has been spending the summer with her friends. The engagement of Miss Healy to Mr. Webb of Duluth was recently announced.

Mrs. T. Mudrok is dead at Calumet. She was aged forty-two, and had made Calumet her home for some years. Mr. Mudrok and eight children survive. The funeral took place yesterday afternoon from the German Lutheran church.

A. H. Kroeger of Duluth, head of the firm of A. H. Kroeger & Co. with branch houses in Houghton, is selling on the copper country trade in asbestos and allied goods. He is being entertained by his partner, T. J. Beyenka of Houghton.

The Cause of Many Sudden Deaths.

There is a disease prevailing in this country most dangerous because so inconspicuous. It is the cause of many sudden deaths and is caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, or the kidneys themselves break down and waste away cell by cell. Bladder troubles almost always result from a derangement of the kidneys and a cure is obtained quickest by a proper treatment of the kidneys. If you are feeling badly you can make no mistake by taking Dr. Kilmor's Swamp-Root, the great kidney, liver and bladder remedy. It corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to get up often through the day, and to get up many times during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases.

Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a sample bottle of this wonderful new discovery and a book that tells all about it, both sent free by mail. Address, Dr. Kilmor & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmor's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

HER CHARGES SENSATIONAL.

Astonishing Allegations Made by Mrs. Gould Against Her Husband.

New York, May 21.—Mrs. Howard Gould yesterday started against her husband a suit for separation, one of her most astounding allegations being that because of his personal habits he is an improper person to live with. The complaint is highly sensational, charging Gould with consorting with numerous women.

Allegations as astounding as the actual behavior of the already famous divorcee are the developments in the investigation into the use of headquarters detectives by Howard Gould against Mrs. Gould. Tomorrow, again, District Attorney William Travers, Jerome will consult with Police Commissioner General Theodore Bingham, going over all of the evidence thus far advanced in the case, with the possible result that he may begin a grand jury proceeding to see just what there is to the conspiracy charged by Mrs. Gould.

Mrs. Gould's complaint against her husband covers every one of the four grounds on which it is possible to secure a separation. Under the first charge that he is not a proper person to live with, it is said that some exceedingly immoral and indecent pictures were presented in the bill of particulars at the time of trial.

The second charge is that he abandoned her. Since last July Mrs. Gould has been living in the Hotel St. Regis, recognized for some time as the city house of the divorcee and her husband has not once visited her.

Non-support is the third allegation. In September of last year Gould is alleged to have discontinued providing Mrs. Gould with funds, and until very recently she is said not to have received a single cent from him. During the past few weeks, since the exposure of the suit of William Woodward, otherwise known as "Big Hawley" however, Gould, it is said by one of her friends, has begun to come more to pay her expenses in St. Regis.

Under the fourth charge—that of cruel and inhuman treatment—many specifications are made, one of which is that Gould, at the time of their separation, sent notices to all of the tradespeople with whom he had dealings, instructing them not to give her any credit if they had any idea of collecting their accounts from him. This was at a time when he was trying to force her to accept his terms in the financial feature of their separation, and she charges that in this way he endeavored to compel her to submit to his wishes.

Another of the specifications is that he has humiliated her constantly by surrounding her with detectives, causing her mail to be opened, and subjecting her to many similar annoyances.

She declares that she has frequently been shamed and humiliated by the open manner in which he has associated with other women while she was being neglected.

The complaint does not refer to the specific incident, a friend of Mrs. Gould stated today that when the details are presented to the court Mrs. Gould will state that one of the worst of the many indignities heaped upon her was the fact that while she was living in the St. Regis hotel her husband was openly paying attentions to another woman living in the same hotel.

She makes the direct accusation that Gould, former Police Inspector William McLaughlin, promoted to a captaincy in the police department, and who worked together for her ruin in the public esteem. She alleges that her husband hired Hawley and McLaughlin for the purpose of getting persons who would be willing to swear away her reputation.

The complaint also charges that the St. Regis hotel her husband was openly paying attentions to another woman living in the same hotel.

She makes the direct accusation that Gould, former Police Inspector William McLaughlin, promoted to a captaincy in the police department, and who worked together for her ruin in the public esteem. She alleges that her husband hired Hawley and McLaughlin for the purpose of getting persons who would be willing to swear away her reputation.

The complaint also charges that the St. Regis hotel her husband was openly paying attentions to another woman living in the same hotel.

Mining News

MOHAWK.

Increased Production in Sight and \$13 Per Share Earned in 1907.

Within a week the Mohawk management expects to start a third head compound at the stamp mill, and with its completion the fourth head will next be altered.

For the first four months of the present year Mohawk has produced about 2,500,000 pounds of copper, which is at the rate of \$200,000 per annum, or 9,250,000 last year, but with four stamp heads running and an addition to the compressor plant combined with a general bettering of the rock, the production from now out should show marked increases and the output for the year should exceed that of 1906.

as the quality of rock is concerned, than they are at No. 2, the oldest shaft, which, with No. 6, is supplying the stamp mill. Recently the shipments from No. 6 have been increased slightly. No work has as yet been started at No. 4, although the diamond drill cores showed good copper. It is only a question of time before this shaft will be opened up, and there is every reason to believe that it will present a showing equal to that seen in No. 5 shaft. In the meantime the workings on No. 6 are being extended. When these three shafts, Nos. 4, 5 and 6, are well opened, the Isle Royale lode may demonstrate that it has the quality that counts for results.

NOTES OF COPPER NEWS.

Hancock's new shaft has attained a depth of 150 feet and is passing through a strong conglomerate lode. There is renewed talk of a Quincy-Hancock consolidation.

On the eighteenth level of the Edith May, North Butte has run into a very rich body of high grade ore—the most important that has been encountered to date in this property. The ore is stated to run as high as 12 per cent to 14 per cent copper.

The Shannon Copper company produced 750,000 pounds of copper in the first fifteen days of May, running two furnaces. Railroad congestion has delayed the completion of the new furnaces, and it may not be running for three weeks.

The general land office at Washington has ordered Special Commissioners W. L. Walker and Louis G. Gillette to proceed to Bisbee for the purpose of conducting an investigation of titles of Warren Realty & Development company, including the ground embraced in Warren townsite.

A. A. McMillan has resigned as general manager of the Butte & London company and has been succeeded by Philip Sheridan. The contractors who took the job of sinking the shaft have relinquished the contract and the company may be obliged to do the work itself. The shaft is down 975 feet, but sinking has been slow for some time since there has been so much water. A big pump is being installed at the 800-foot level. With this in commission, the water will cause no further trouble. It is planned to sink the shaft to a depth of nearly 1,500 feet before drifting to the zone, although it is possible crosscuts will be made at points where stringers of ore have already been encountered.

After the first of June the Dominion Copper company expects to produce at the rate of 15,000,000 pounds of copper per annum, as on that date General Manager Thomas will place in commission the new 700 ton furnace in addition to the two old ones each of 350 tons per day capacity. The average of the ore is about 13 per cent. For the eight months ending July 31, 1906, the company showed net earnings of \$140,000, while for the current fiscal year ending July 31 next the management has forecasted net results of approximately \$300,000. It would not be surprising, however, if the net results fall somewhat short of this figure on account of shut-downs during the winter and the recent coal strike which tied up smelting operations during the month of April.

ISLE ROYALE.

If the present policy of development and extension of openings is followed at the Isle Royale, that mine may yet establish itself on a permanent basis. The management is now opening up the Isle Royale on a plan, which if it had been followed years ago, would have furnished a mine which would now be producing a much larger copper output, and consequently making good money for the shareholders. The Isle Royale is running along now at a profit, to say nothing of the disadvantages of maintaining a stamp mill to handle the limited supply of rock which goes down from the mine, and the large expense account by reason of exploratory operations which have been under way for the past year and a half.

The reports about the showing at No. 5 shaft are not overestimating the real situation at all. The shaft is now following the incline of the formation, and is on the lode for a distance of forty feet. The copper showing is just as good, if not better, than when first the lode was encountered after the shaft went through fifty feet of overburden. There are large quantities of mass stuff, but the general character of the lode formation is certainly excellent.

The permanent shaft will be started very soon, and then the sinking on the formation can continue at greater speed and to better advantage.

At No. 6 shaft the showing of high-class stamp rock improves as the work reaches out to the south, and the openings here are in better condition, as far

S.S.S. CURES S.S.S. SKIN DISEASES

No skin disease can exist without an underlying cause, and in most instances that cause is either a humor in the blood or an excess of fiery acids in this vital fluid. These humors and acids get into the blood, generally because of an inactive and sluggish condition of those members whose duty it is to collect and carry off the waste and refuse of the body. This unhealthy matter is left in the system to sour and ferment, and soon the circulation becomes charged with the acid poison. The blood, in its effort to rid itself of this foreign matter, begins to throw off the humors and acids through the pores and glands of the skin. These coming in contact with the delicate tissues and fibers with which the skin is so abundantly supplied produces irritation and inflammation on the surface, and Eczema, Acne, Tetter, Psoriasis, Salt Rheum, or some other troublesome and disfiguring skin disease is the result. External applications, while they soothe the itching, and are beneficial in keeping the skin clean, can never cure skin affections, because they do not reach the blood where the real trouble is located. A thorough cleansing of the blood is the only permanent cure for skin diseases. S. S. S., the greatest of all blood purifiers, is the best treatment. It cures by neutralizing the acids and removing the humors from the circulation so that the skin, instead of being irritated and diseased by the exuding acid matter, is nourished and cooled by a cooling, healthy stream of blood. S. S. S. goes down to the very bottom of the trouble, removes the foreign matter and thereby permanently cures every form of skin trouble. Do not expect to cure a blood disease with local applications alone, but begin the use of S. S. S., and when you have removed the cause the skin will be free from disease. Special book on Skin Diseases and any medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

H. E. BITTNER - Marquette

City Brevities
Today's weather: Increasing cloudiness with probable showers; slowly rising temperature.
Yesterday's temperature: Seven a. m., 42 degrees; noon, 43; 7 p. m., 42. Maximum, 41 degrees; minimum, 41.
D. T. Morgan, of Republic, was in town yesterday.
C. M. Milroy, of Michigan, spent yesterday in Marquette.
Isadore Cyr, of Escanaba, spent yesterday in Marquette.
Dr. R. W. Boyer has gone to Mexico for a visit of two weeks.
A. G. Shauer, of New York, is spending a few days as the guest of his parents in this city.
The W. C. T. U. will meet with Mrs. H. B. Hatch, No. 1314 North Third street, this afternoon at 3 o'clock.
The ladies of the Presbyterian church will serve a chicken pie supper in the church parlors this evening from 8 to 9 o'clock.
The Invincibles defeated the Independents by the score of 9 to 0 at the Long-year grounds yesterday afternoon, the latter team forfeiting at the end of six innings.
John Stenglein has purchased the home of G. W. Brown on East Hewitt avenue, and will occupy it within a few weeks. He has sold his place on North Fourth street to Christ La Bonte.
Rev. A. A. Maywood, George Tucker, Mr. and Mrs. C. L. Brainerd, Mrs. W. J. Ellison, Mrs. Burrows, and Mrs. Smith attended the funeral of the late Thomas Scadden at Crystal Falls yesterday.
Mrs. George W. Hibbard, of the City of Mexico, arrived here yesterday for a visit with Marquette friends. Mr. Hibbard was formerly general passenger agent of the Southern, but went to Mexico two years ago to fill the same position for the National Lines of that country.
Will Give Recitals—Mlle. Olivier's pupils will appear in two recitals at the studio in the Opera House block this week. The juniors will appear Thursday afternoon from 5 to 6 o'clock, while the seniors will give a concert Friday evening. No admission will be charged.
Is Given Superintendency—Mrs. Pearl Henry Rothie, of Crystal Falls, who has been teaching in the copper country schools for the past five years, has succeeded Mrs. H. F. Dean as superintendent at Point Mills. Mrs. Rothie is well known and has many friends in this vicinity who will be rejoiced to learn of her promotion.
Called to Escanaba—Register of Deeds Joseph H. Primenu, who returned Monday from Detroit, where he was called by the death of a relative, Mrs. Avila Desparois, will go to Escanaba today to attend the funeral of his cousin, Mrs. Peter Durancan. Mrs. Durancan, who was sixty-three years of age, was one of the best known residents of Escanaba, having lived there over forty years. Her demise was sudden one, as Mr. Primenu had not even heard that she was ill until he received news of her death.
Greatly Retards Logging—Edward C. Olson, of Marinette, Wis., who is in the city on business, says that the lateness of the spring is proving a big handicap to the lumbermen. Within the past few days the snow has melted with such rapidity as to greatly raise the surface of the creeks and rivers and send the logs down with such rapidity that the men are unable to handle them. The Menominee River boom company has been compelled to temporarily suspend operations on account of the high water. There is believed to be little danger of any of the dams going out on the Menominee river, as they were greatly strengthened during the past winter.
Frosts Retard Grass—According to the weather bureau almost nightly frosts are greatly retarding the grass and there is as yet little or no pasturage. This is proving not only a source of great expense to the farmers by compelling them to continue to feed hay and grain, but is also affecting the quality of the milk. Cows fed to a large extent on green stuff give milk much richer in butter fat than those kept on a diet of hay and grain. Observer Patrick says that after a day of sunshine the grass shows green and gets a good start, but a frost turns it brown again and greatly retards its growth.
Has Located Bear Cubs—According to Hiram LaVigne, who has been camping with homesteaders near the Hiron mountains, bears are unusually numerous this season. LaVigne claims to have located a den containing five cubs and promises to bring them to this city in a few days. He says that when he first found the den the cubs were so young that he feared that if he took them they would die on his hands. It is his intention to allow them to attain a size that will make them easy to look after, and then slaughter the old bear and remove them. In the meantime, Joe Krenke, the man who recently brought a batch of wolf pups to town, is also hunting for bears, as several Marquette saloon men have signified their willingness to pay a good price for an attraction of that character. If LaVigne secures five cubs in one den he will have made quite a haul, for three is about the average.
Pussy and Wolf Together—A cat and a wolf pup caged together is the attraction in one of the windows of the George Knapp saloon, South Front street. The cat, an ordinary Thomas, does not seem to mind the proximity of its hereditary enemy in the least and purrs good-naturedly as the pup rolls it about. The wolf pup brought to this city by August Krenke from the neighborhood of Huron mountains a little over a week ago have domesticated rapidly and now allow themselves to be petted by visitors with as much evident enjoyment as collie puppies. Young wolves are said to evidence all the traits of dogs until they have reached maturity and experienced the "call of the wild," when the inborn savagery of their dispositions re-asserts itself.
More Swans at Chocoley—It is said that the pair of "whistling" swans that have been making their home in the Chocoley bayou for some time past, have been joined by two more, and the residents of the locality are encouraged in the belief that the birds may breed there. They are beautiful creatures weighing apparently over forty pounds and are graceful both upon the wing and in the water. Swans are protected in Michigan by law though probably no steps would be taken to prosecute a

hunter who killed one in ignorance of its species. As the presence of the swans in this locality has never, however, been widely advertised an attempt at hunting them would invite prosecution. In appearance they are much like ordinary swans only larger, and their bills are jet black.
WORKS HARD ON YEARLY BUDGET
PARK, CEMETERY AND STREET COMMISSION DISCUSSED PLANS FOR FUTURE IMPROVEMENTS AT MEETING LAST EVENING.
Subject possibly to slight alteration the park, cemetery and street commission will ask the council for \$26,160, not inclusive of the necessary running expenses of the office. Of this \$20,440 will be expended on streets; \$3,320 on the park, cemetery and the parks. At cemetery, and \$2,400 is appropriated for filling, grading and plating out new grounds; \$500 to build roads; \$500 for cutting brush and raking leaves; \$500 for digging graves and \$720 for the sexton's salary. For Presque Isle \$13,000 is appropriated for raking leaves and repairing buildings and \$800 for the keeper's salary.
The subject of its budget, to be presented to the council shortly was the main business discussed by the commission last evening. Its members in company with the mayor and the street commissioner had made a tour of the streets and cemetery earlier in the day and had a clear idea of the work in hand. The commission decided to disclaim all authority as regards the water works park, and this part of ground together with all expenses necessary to keeping it in proper shape will in the future be left to the water board.
The improvement of Third street between Hewitt avenue and Park was the subject of considerable discussion. The sewer along this road is too small and a larger one will have to be laid at no distant time. The question was raised whether or not the improvement of the street had not ought to be postponed until the laying of the sewer. Street Commissioner French stated that if contractors laying a sewer were compelled to sort their material when tearing up a road, they could relay it in as good shape as before. The sum of \$2,000 was appropriated for the improvement of this street.

CONCERT THIS EVENING.
Normal and City Talent to Entertain at M. E. Church.
Those who attend the musicale at the M. E. church this evening under the direction of Miss Sophie Linton should enjoy an entertainment of unusual merit. In the first half Miss Linton will be assisted by her sister, Miss Ida Linton, of Plainville, a young woman who possesses a voice of rare power and cultivation. Mrs. Eulie Gay Rushmore and the Misses Chase and Hadley. The Normal Glee club will present the cantata "King Rene's Daughter" in the second half. The students have been at work on the piece for several months under Miss Linton's direction and should interpret it in a most artistic manner.
The complete program follows:
"Annie Laurie".....Dudley Buck Schubert Quartet.
"My Redeemer and My Lord".....Miss Ida M. Linton.
(a) "The Sweetest Flower That Blows".....Hawley
(b) "Three Roses Red".....Norris Miss Mabel Chase.
Nocturne.....De Koven Miss Theodosia Hadley.
"My Heart at Thy Sweet Voice".....Saint Saens Miss Sophie Linton.
"Madam Butterfly".....Mrs. Eulie Gay Rushmore.
"True Love Is Not for a Day".....De Koven The Misses Linton.
Accompanist.....Mrs. R. W. Boyer.
King Rene's Daughter, by Henry Smart. Argument:
Iolanthe, daughter of King Rene, count of Provence, has been betrothed in infancy to the son of the count of Vandemont. Stricken with blindness when a year old, she has been reared with all knowledge of the faculty of sight withheld from her. A leech or magician has promised to restore her sight, by means of an amulet he has given her, on condition that she is first informed of the missing sense; but the king has refused permission. Iolanthe's betrothed, wandering as a troubadour, lights upon her abode in a valley of Vaneluse. Without knowing her, for a feud has kept their lives apart, the knight is enraptured with her beauty. He does not know that she is blind, and his words reveal to her the faculty of which she has been kept in ignorance; he thus unwittingly aids the magician's art, and Iolanthe is restored to sight.
The characters:
Iolanthe.....Miss June LaLonde
Marta.....Miss Helor Sharpe
Beatrice.....Miss Grace Kinsman
Chorus, Provenal Vintagers.....Dormitory Glee Club
Accompanists, Miss Irene Connell and Miss Winnie Mathews.

Capital 150,000 shares, par \$10.00. Price \$10.00, with \$5.00 down and balance subject to call. The property comprises 14 claims totaling 169 acres at Butte City, Montana. The property is surrounded by strong mining companies which are now shipping ore. It is on the same leads and just East of the Pittsburg and Montana. Investigate. 5-18-14

Have You a Bank Account?

If not, why don't you start one today. Do not wait until you have fifty or one hundred dollars in the house. We will give you a bank book for a deposit of ONE DOLLAR and add interest at the rate of 3 per cent annum compounded every six months. Come in and talk with us about it. Or, if you live out of town drop us a postal and we will send our Booklet "Banking by Mail."

Marquette National Bank.

Marquette, Michigan.

MARKETS

CEREALS ALL MUCH HIGHER.

Prices Advance Sharply on Continued Reports of Crop Damage.

Chicago, May 21.—The prices of all the leading cereals advanced sharply today because of alarming reports of alleged serious damage to the growing crops by drought, green bugs and cold weather.

Wheat opened excited and strong, the prices ranging 1/2 to 3/4 higher. Even the May advanced to the dollar mark. The September at one time sold at 104, the December at 104 1/2 and the July at 102. Commission houses and shorts were eager bidders all day. A large part of the selling came from holders. The market was influenced chiefly by the crop news, which was of more serious nature than previously received. The advices regarding the winter wheat crop in Nebraska, Kansas and especially Illinois, telling of great damage by drought and cold weather. There were numerous unfavorable reports from abroad, particularly Hungary and southern Russia, where the crops have suffered owing to lack of rain. The market derived additional strength from a message from New York claiming that Europe had purchased two million bushels of American wheat on passage. The close was exceedingly strong, the July up 3 3/4%, the September 4 1/2% higher and the December 3 1/2% better. The July opened at 98 1/2; highest, 102; lowest, 98; closing, 101 1/2.

Corn—There was a good trade, and a broad and active market. There was a good commission house demand, part of which was credited to the Southwest, where the markets were strong on reports of replanting. The strength in wheat and oats, and small stocks and light receipts were the other bullish factors. The selling was scattered and was led by receiving and elevator interests, against country purchases, the acceptance being quite large. The July closed 1 1/4 higher. July opened at 53 1/2; highest, 54 1/2; lowest, 53 1/2; closing, 54 1/2.

ACUTE WEAKNESS IN STOCKS.

New York, May 21.—The acute weakness which developed in the stock market today came as a surprise to the financial community, notwithstanding the symptoms of yielding yesterday. The source of the extensive selling of stocks was mysterious, but surmise inclined to

and the whole list sagged. The general decline was a long and gradual one, which continued throughout the session with few interruptions. Many who bought stocks yesterday threw them overboard today, and many outside speculative accounts were liquidated. It was an old time bear market which could not be headed off. The condition of affairs prevailing in the wheat market has done much to depreciate the value of stocks. It is only natural that the railroads should drag lower with the present unfavorable outlook for the wheat crop. Then it should be borne in mind that with the coming year a presidential campaign will be under way, with all its favorable and unfavorable influences. For the time being we see no reason for any advance.

Boston Stock Quotations.

Paine, Webber & Co. wired regarding yesterday's Boston market: "For the past week we have been advising the sale of stocks and this morning we sent out a strong message to sell. Liquidation was strong and real today. The shorts covered all their lines, but stock kept coming out and there was very little speculative buying. Money is working firm and there is no prospect of any relief. Pick out all the strong spots and sell stocks on every rally. We will see lower prices than we had in March before the Fourth of July."

Logan & Bryan's Wheat Summary.

Logan & Bryan wired Paine, Webber & Co. concerning yesterday's wheat market: "Wheat scored an advance of 4% to 4 1/2% and closed at above 4 higher all around for the day. The first prices were well over those of the Monday close, and it was a great big broad bull market from first to last without any reaction of more than 1/2% at any time until the high point was reached. At \$1.02 for July, \$1.04 for September, and \$1.04 1/2 for December, new high prices on the crop were recorded except for the July. There were three distinct sources of buying on the advance—the big professionals, who are already long enough lines of wheat, were buying more, many local shorts who were selling wheat for a break under \$1.00 to \$1.02 late today, and the country, evidently aroused to fresh bull enthusiasm by the publication of the Jones figures yesterday, came forward with a fresh volume of buying orders. There was no selling of wheat at any stage of the game, except as profit taking. Lead-

ing cash houses in the trade had foreign advices saying that the Southern Russian crops were in bad shape, and they were among the leading buyers of the day. The trade was without a Liverpool cable, but Budapest showed an advance of 4c, reflecting the drought damage in the Danubian countries. New York dispatches reported foreign buying there at the opening. London reported heavy sales of cargoes to the continent over the holiday. At no time since the bug damage begun in the winter wheat crop were the reports any worse from Kansas and Nebraska than today. Not only this, but the heading wheat is turning white in Kansas, as the result of freezing, and the plant is stunted by the cold weather in Nebraska. The worst may yet be to come in the winter wheat states. Of late seeding has been rushed in the far Northwest, but the weather is too cold to give the grain a good start, and some sections report the seed rotting in the ground. Our advance should bring strong cables tomorrow morning. Be conservative and do not buy on the strong swells, but buy on the first break that comes along. This wheat is going higher."

SPEAKS WELL OF SOUTH AFRICA

MRS. F. T. MITCHELL SAYS JOHANNESBURG IS A MODERN CITY WITH A CLIMATE RESEMBLING BUT SUPERIOR TO DENVER.

Mrs. F. T. Mitchell, of Johannesburg, South Africa, sailed from Durban May 4 and will arrive in this city on a visit to her mother, Mrs. N. Cadarette, in the middle of June. Mrs. Mitchell makes the trip in company with friends and will be their guest in England for a week or two. Both Mrs. Mitchell and her husband were at one time well known residents of this city. They went to South Africa something like two years ago, where Mr. Mitchell, who is an electrician, holds a responsible position with the General Electric company. In her letters, Mrs. Mitchell speaks enthusiastically both of the climate and inhabitants of Johannesburg. The city she asserts has the most healthful and inspiring climate in the world. Its altitude is about the same as Denver, something over 6,000 feet above the sea, but the temperature never falls so low as in the western American city, and the extremes of heat and cold are much less. The residents of Johannesburg, she says, are mostly English, though quite a few Americans have settled there within the past few years. English is the language of the people, as the Dutch population is exceedingly small. The Boers, she says, are as a class farmers and are rarely met with in the cities. Though Johannesburg is in a way a new town, it is much more civilized than most of the western cities on this continent of far greater age, and possesses all the modern conveniences of civilization, electric lights, street cars and water works. Mrs. Mitchell plans to remain in Marquette until fall and start for home when the cold weather begins to set in.

A SUCCESSFUL FUR SALE.

Beautiful and Stylish Articles from the Nicolai Company of Milwaukee. Will leave tonight. The display of fashionable fur goods by the Nicolai company of Milwaukee at the Hotel Marquette has been a center of attraction for the ladies of Marquette, and the goods have proved to be so satisfactory, both as to quality and workmanship, that many sales have been effected. Mrs. Laura Oldenburg, who superintended the display and sale, was kept busy by fair interrogators, who not only asked many questions and gave voice to much admiration, but also made many purchases. But the fur goods practically "sold themselves" as they were the best that have ever been seen in this vicinity. They include Russian sable, fine natural mink, black lynx, Jap mink, mink muffs and scarfs, also beautiful seal, Persian lamb, Labrador otter beaver, natural mink, natural and sable blended squirrel, black Russian pony and river mink coats and blouses. Mrs. Oldenburg will remain in the city until tonight, when she will leave for Houghton, where she will conduct a similar display and sale. The milk from Vandenberg's dairy, after being cooled and aerated, will keep sweet indefinitely. This is the most perfect human food in the market. (5-18-07)

DARANTELLA

MR. ROOT SPEAKS AT YALE.

New Haven, Conn., May 21.—Secretary of State Root, taking as his specific topic, "The Outlook," delivered the last of the series of Dodge lectures at Yale tonight on "The Responsibilities of Citizenship." His address had to do with railroad legislation.

USED THE MAILS ILLEGALLY.

Jefferson City, Mo., May 21.—Former Judge William M. Lumkin, a lawyer and wealthy citizen of Eldon, was brought here today and arraigned on a charge of sending obscene matter through the mails. Lumkin pleaded guilty, and was held for the federal grand jury. He was desirous of reforming certain alleged dissolute women of Eldon and wrote them anonymous letters in which it was charged that indecent language was used.

We have plotted, planned and figured, working from morning till night, seeking for a medicine that will take the place of Hollister's Rocky Mountain Tea, but we can't find it. Tea or Tablets, 35 cents. The Stafford Drug Co.

TWELVE GET CERTIFICATES.

Certificates of citizenship were granted to Joseph Graham, Frederick Cook, William Henry Rouse, Japa, Naustila, Mike Anata, Nels Abrahamson, August Kaalumbi, Herman Zythia, Henry Galala, Matt Anderson, Frederick Lindberg and Carl Johnson, in the circuit court yesterday. Action on the petitions of George

Jutila, Joseph Salo, Jaaka Hannula, Emma-Palkki, Mathew Savola, John Rognava, Henry Lukka, Esa Drava, John Leikas, Esa Hakkarainen, John Johnson, Frank Jarvi, John Lintinen, Johan Hygman, Elick Hyttinen, Math Kangas, Pupas Kistola, Otto Seronen and Lemter Winkka, was postponed until the September term of court. The men had nearly all arranged to depend upon the same two witnesses and one of them failed to appear.

PROCLAMATION.

As May 30, Decoration Day, is commemorative of those gallant men who fought, bled and died in behalf of their country in its hours of greatest need; as it is a day set apart to pay tribute to the heroes who now sleep beneath the soil, and to recall the many acts of self-sacrifice which marked a struggle without a parallel in the history of nations, I believe that it should be observed with due appreciation of its solemnity and significance. Many of the men who wore the blue during the great rebellion have called my attention to the fact that the public has become prone to regard Decoration Day in the light of a festive occasion to be observed with music and dancing, instead of one of the most solemn occasions of the year. Now, therefore, I request all good citizens to join with the city authorities and the various military and religious orders in making the coming Decoration Day a day of prayer and thanksgiving, observing it in the spirit in which it was inaugurated as a tribute to the gallant soldier dead. JOHN ROBERTSON, Mayor.

Periodically the men who make shoes get together in solemn conclave and agree to raise, not the standard of their shoes, but the prices. Not because of a kindly disposition, but because we count it good business, do we stand pat on both the standard and the price of our \$2.50 to \$3.50 Ladies' Oxfords and \$3 and \$3.50 shoes. They are as good today as ever they were, if not better.

J. Sellwood & Co.

Postoffice Block Stores. Ishpeming, Mich.

Ishpeming Department

WILL LOCATE IN MONTANA.

Well Known Miner, Here Many Years, to Have Charge of Work.

John Kesksys, a former resident of Ishpeming, who arrived here Saturday with his family from Spring Valley, Ill., is visiting relatives in Negaunee for a few days. He has engaged with the Chicago, Milwaukee & St. Paul Railway company to direct the sinking of a shaft at a coal mine operated by that corporation about fifty miles north of Billings, Mont. Mr. Kesksys will leave within a week, joining Superintendent Henry Fletcher and a party of twenty-five miners from Graysville, Ill.

While the Chicago, Milwaukee & St. Paul company's property in Montana is a new one, indications for its development into a big mine are very favorable. Mr. Kesksys said yesterday that five shafts are now being sunk, and he believes that a few more will be started soon after the party of Illinois miners arrives there. The deposit of bituminous coal is six feet deep and it underlies a large area. The coal, he has been informed, is of good quality and mining operations will not be as expensive as in many other fields of the country, as the deposit is not of great depth.

WORK TO START SOON.

Several Streets Will Need Considerable Attention This Summer.

Members of the street committee and board of public works inspected a number of streets Monday that will need repairs this summer. They will give their conclusions to the council at the special meeting to be held to take action on the pending proposition and to act on the recommendations of the water committee and board of public works relative to the extension of the water main from Douglas street to Division and Pine streets.

There are two or three streets in bad condition. Excelsior, from a point near No. 3 hose house to Washington, a distance of over half a mile, will probably be one of the first to receive attention. This thoroughfare will be more extensively used than formerly, as the greater part of the traffic to the Winthrop, French Town, Saginaw and Salsbury locations will hereafter pass over it. Excelsior street connects with the new section of road built early in the spring, taking the place of the roadway destroyed by the cave-in at the Section 16 crossing. There is also some work to be done on the new road, no portion of it having yet been given the finishing touches. A top dressing of gravel will be spread over it from Washington street south to the Saginaw road. North Third street, north from Vine, also will receive attention.

RAYMOND HITCHCOCK COMING.

Well-Known Star Will Be at Ishpeming Theater Friday of Next Week.

Lovers of bright, interesting comic opera will be given a rare treat when Raymond Hitchcock in the big success, "A Yankee Tourist," comes to the Ishpeming theater a week from next Friday evening, the 31st. There are none of the tiresome moments so common to musical comedies in this production. Every act is full of sparkling humor and catchy music. In Chicago, where the play opened, the theater was packed every night during the engagement and Raymond Hitchcock was hailed as the most legitimately funny comedian ever seen there. The book of "A Yankee Tourist" was written by the famous author and war correspondent, Richard Harding Davis, and as one critic has said, "the play could be acted without music and it would be more entertaining than the average of that." But there is music and afterword. Bohm has written some twenty numbers which have a catchy flavor and an extremely melodious swing. The lyrics were written by Wallace Irwin and they scored harmoniously with the clever book and the standard of the music. Mr. Savage has mounted the piece elaborately, the shows is pretty and the cast includes such favorites as Flora Zabelle, Hiss Hale, Susie Forrester Cavethorne, Walter Lawrence, Harry Stone, Herbert Cavethorne and many others of equal rank.

FOR WIVES AND MOTHERS.

Save the Loved Ones From Drink Evil—Orrine Guaranteed to Cure Can Be Given Secretly.

If your husband or son has fallen a victim to the drink habit, stop pleading, scolding and crying. Use Orrine which is recommended by thousands.

This successful remedy can be given secretly if desired, or the patient can take it of his own free will. It absolutely destroys the desire for strong drink, and builds up the run down system, strengthens the weakened nervous condition. Write for free pamphlet on cure of alcoholism to Orrine Co., Washington, D. C. Sent in plain sealed envelope.

The price of Orrine is \$1 a box. Orrine is sold by The Stafford Drug Co.

SOAP GIVEN AWAY.

Five bars of fine toilet soap given away free with each twenty-five-cent purchase (five bars) of laundry soap, at Clark's Savings Bank store. (5-17-07)

CHANGE OF PROGRAM TODAY.

The program at the Grand theater in the Kennedy block will change this afternoon. The moving pictures will consist of "The Train Wreck," "Immigrants Landing at Ellis Island," "Those Terrible Kids" and "Lifting the Lid." The illustrated songs, sung by J. E. Peterson, will be: "Keep a Cozy Corner" and "Hello, Alright, Goodbye." The management has distributed several hundred tickets among the school children for this afternoon's performances, and it is expected that there will be a rush when the doors open.

INSTALLING FOUNTAIN.

Werner Nikander, the Division street druggist, yesterday received a fine sanitary soda fountain, manufactured by the L. A. Beecker company of Chicago. A man will be here from the factory today or tomorrow to install it. The fountain will be one of the finest in the city. Mr. Nikander expects to put it in operation some day next week.

Improved Farming Implements of all kinds. Mail orders given prompt attention.

Clean Cooking

Wherever there's a New Perfection Oil Stove in the kitchen, there you will find the pots and pans clean and bright. The blue flame of the New Perfection is the cleanest flame produced by any stove, and is entirely free from smoke and soot. Another advantage of the

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

is that the heat is highly concentrated by enamelled chimneys. This means quick results. The New Perfection is different from other oil stoves. Made in three sizes, with one, two and three burners. Every stove warranted. If not at your dealer's, write to our nearest agency for descriptive circular.

The **Rayo Lamp** is the best lamp for all-round household use. Equipped with the latest improved burner. Gives a bright, steady light at lowest cost. Made of brass throughout and beautifully nickelled. Suitable for any room, whether library, dining-room, parlor or bedroom. Safe and satisfactory. Every lamp warranted. Write to our nearest agency if not at your dealer's.

STANDARD OIL COMPANY (INCORPORATED)

100 TO 1.

Where one man gets rich through speculation a hundred acquire a competence through saving, another hundred "go broke" because of their rashness. If you will leave with us a dollar of two a week—more if you can spare it from ordinary expenses—at the end of ten years you will have had the benefit of 3 per cent annual interest, that compounded (half) yearly. It counts up.

COBALT GOSSIP

In connection with the treatment of ores from the Cobalt mining region by various refining and smelting companies it is interesting to note that the percentage of cobalt in the ores—whether large or small—is of great importance.

Manager Bailey, of the Bailey mine, reports that a large number of men have been put to work clearing and trenching. Preparations are being made, he says, to sink a shaft on the vein adjoining the Foster property.

The Silver Queen has resumed shipping ore. Some of this runs as high as 20,000 ounces in silver.

The Silver Leaf has added about ten more men to its force, and has begun trenching close to the company's line, which adjoins the Cobalt Central.

The Cobalt camp is said to be shipping ore at the rate of \$1,000,000 per month. It is understood that the mines so far developed do not extend over one-quarter of the ground where it is said silver values are to be found.

A dividend of 10 per cent will be paid by the light-of-Way Mining company, it is stated, on June 29th. As the capital of the company is \$500,000, this will mean a payment to shareholders of \$50,000.

The Cobalt camp is said to be shipping ore at the rate of \$1,000,000 per month. It is understood that the mines so far developed do not extend over one-quarter of the ground where it is said silver values are to be found.

The Coniagas is putting in its concentrator and is mining some rich ore. It is said that the Coniagas has close upon \$7,000,000 blocked out above the 80-foot level. This month two carloads of high grade ore will go out, three of second grade, and a large quantity of the third grade.

McKinley-Darragh has bulkheaded the end of the Cobalt lake, and is now pumping it out, preparatory to sinking on veins that up to this time have been covered with water.

Nipissing has \$9,000 stockholders. It is remarkable, says the Wall Street Journal, that this two-year-old property has more stockholders than large railroad systems.

An officer of the Nipissing says that both surface and deep mining have shown results good enough to warrant the assertion that the hitherto unexamined portions of the property will show up as well as those now in the producing stage.

No more Alcohol

100 were working. The management announces its intention to employ continuously 600 men before summer.

Charles B. Flynn, who is associated with the La Rose interests, has been elected vice president and general manager of the Colonial Silver company. He has left for the property in the Cobalt camp. The company late in April made its first shipment of ores.

The decline in Foster. Foster Cobalt sold at a dollar a share this morning for a few shares, but not repeated, says the Toronto Star. However, there is plenty of time for it to go lower, and, of course, there are prophets who make just that prediction, which must be cheerful reading for those who paid \$4 a share or over last year for stock in what was characterized as one of the real good mines.

As usual plenty of gossip accompanies the decline, and there is also the usual talk of "manipulation." It appears to be the belief on the Street, however, that recent changes in the Foster directorate have been followed by selling on the part of those who, now that they are no longer in official positions, feel that they are not morally bound to hang on.

The Silver Queen has resumed shipping ore. Some of this runs as high as 20,000 ounces in silver.

The Silver Leaf has added about ten more men to its force, and has begun trenching close to the company's line, which adjoins the Cobalt Central.

The Cobalt camp is said to be shipping ore at the rate of \$1,000,000 per month. It is understood that the mines so far developed do not extend over one-quarter of the ground where it is said silver values are to be found.

A dividend of 10 per cent will be paid by the light-of-Way Mining company, it is stated, on June 29th. As the capital of the company is \$500,000, this will mean a payment to shareholders of \$50,000.

The Coniagas is putting in its concentrator and is mining some rich ore. It is said that the Coniagas has close upon \$7,000,000 blocked out above the 80-foot level. This month two carloads of high grade ore will go out, three of second grade, and a large quantity of the third grade.

McKinley-Darragh has bulkheaded the end of the Cobalt lake, and is now pumping it out, preparatory to sinking on veins that up to this time have been covered with water.

Nipissing has \$9,000 stockholders. It is remarkable, says the Wall Street Journal, that this two-year-old property has more stockholders than large railroad systems.

ISHPEMING

RETURN TO FINLAND.

Party of Eighteen or More Will Start for Old Country Sunday.

Peter Koski, Ishpeiming agent for the Gurnard line, is working in conjunction with A. F. Moran, the company's traveling passenger agent, in organizing a party which will leave here Sunday morning for Finland.

Several of the party will remain permanently at their old home in Finland, and the others will return within three or four months. Mr. Koski stated that a considerable number of Ishpeiming Finns will return to Europe before the close of this year.

FROM HOPKINS' CURB LETTER.

"The copper share market opened under considerable pressure, the prices soon gave way to the selling pressure. Considerable weakness developed toward noon. There appears to be little change in the actual metal situation and prices will undoubtedly remain practically stationary to a shade lower."

ISHPEMING IN BRIEF.

The street sprinklers were in use yesterday. They were much appreciated.

Miss Ediel Bradford has returned from a visit with friends at Fond du Lac, Wis.

W. P. Belden, attorney for the Cleveland Cliffs Iron company, is at Lansing this week.

The Finnish tent of the Macabees will conduct a social Saturday evening in the Finnish Co-operative hall.

Mrs. Henrietta Ruez, who has been at Fond du Lac the past two weeks or more, arrived home Monday.

Mitchell & Sherman are constructing a concrete walk at the Pearce property, corner High and Fourth streets.

The Fraser Stock company will produce "The White Slave," a comedy drama, tonight at Ishpeiming theater.

The upper portion of the west side of the front of the Uren block, corner Cleveland avenue and First street, is being rebuilt.

Harry Murphy, assistant of Ishpeiming for many years, now located at Bovey, Minn., is here on a few days' visit.

W. H. Johnston, general superintendent of the Oliver company's Marquette range properties, left Monday evening for Lansing on business.

Upper Peninsula

Dwelling Houses for Employees—

The first big building project in Curry's fourth addition to Ironwood will be the construction of twenty-five dwelling houses by the Scott & Howe Lumber company.

Phenomenon at Manistique—

At Manistique the other day the water in the river below the lower dam raised at least four feet and submerged the conveyors to the burner to such an extent that the W. L. Sawmill was compelled to shut down.

River Driver Drowns—

Mazer Car, foreman of the I. Stephenson company's log drive, has been drowned in Escanaba river and his body has not been recovered.

Must Be a Democrat—

It is probable that Mayor Barron of Iron Mountain will nominate a successor to A. F. Wright as a member of the board of public works at the next meeting of the city council.

Steamer a Speedy Craft—

M. H. O'Brien is the first St. Ignace to have a ride on the "City of St. Ignace" under that steamer's new name.

May Adopt Meter System—

It is quite possible that the municipal lighting service will be put on a general meter system, says the Gladstone Delta.

Wrestler Wants a Match—

A sweeping challenge to meet any wrestler of his weight in the county at the Cornish club has been issued by Eddie Blau of Escanaba.

Heart Strenght

Heart strength, or Heart Weakness, means Nervous Strength, or Nervous Weakness—nothing more. A weak heart in a hundred is, in itself, actually diseased.

Dr. Shoop's Restorative is a medicine, Dr. Shoop's Restorative has in the past done so much for weak and ailing hearts.

The ladies of the Finnish Lutheran church will conduct a social Saturday evening in the basement of the church, corner Ridge and Third streets.

The thirteen-year-old daughter of William Trewartha died yesterday morning at the home of the family at the location. The funeral will be held Thursday afternoon at 2 o'clock.

Fred Maddock, a student in the commercial department of the Ishpeiming Business college, has taken a position as assistant bookkeeper at the Mary Charlotte mine, Negaunee.

The ladies of the Mission congregation opened a two days' bazaar yesterday afternoon at the Braasard hall. A musical and literary program was rendered last evening, and a similar entertainment will be given tonight.

Dr. Shoop's Restorative is a medicine, Dr. Shoop's Restorative has in the past done so much for weak and ailing hearts.

Dr. Shoop's Restorative

THE STAFFORD DRUG CO.

Sulphide Vein

From the 3,000 year old Rio Tinto Mines of Spain, down to that infant prodigy our neighbor, Calumet and Arizona, sulphides have characterized the prominent copper mines, paying permanent dividends, measured in extent by the amount of output and market price of metal.

200 Tons Daily Assures Yearly \$1,200,000 Net

Bonanza Belt recently struck the Sulphides. Necessity for adequate development to an output of 200 tons daily—which will insure the Bonanza Belt Property \$1,200,000 net earnings yearly—justifies the offering of

100,000 Shares at \$5, half par

Vouchers, Smelter Returns, Engineers' Reports, strip the mining business of this, the Bonanza Belt Copper Company, to eye and understanding. These proofs of merit, together with Prospects, will gladly be furnished upon application.

Subscription books close JUNE 1st, 1907.

BONANZA BELT COPPER COMPANY,

20 BROAD STREET, NEW YORK CITY.

for a boat with Charles Cowan of Ishpeiming, the iron country champion. The Escanaba man will doubtless be accommodated, and he will in all likelihood not only bear from Cowan, but from Joe Ziehr, champion of the copper country, and many other well-known exponents of the game with the jackets.

Wild Pigeon Story Doubted—The report published in the outside press that wild pigeons are returning to Upper Michigan does not appear to be authenticated.

It is quite possible that the municipal lighting service will be put on a general meter system, says the Gladstone Delta. Other cities in the peninsula have been driven to abolish the flat rate.

Wrestler Wants a Match—A sweeping challenge to meet any wrestler of his weight in the county at the Cornish club has been issued by Eddie Blau of Escanaba.

Heart Strenght—Heart strength, or Heart Weakness, means Nervous Strength, or Nervous Weakness—nothing more. A weak heart in a hundred is, in itself, actually diseased.

Heart Strenght—Heart strength, or Heart Weakness, means Nervous Strength, or Nervous Weakness—nothing more. A weak heart in a hundred is, in itself, actually diseased.

HOW'S THIS. We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

City Pays Half the Cost—

To encourage the building of concrete sidewalks, there has been enacted at Manistique an ordinance by the terms of which the city agrees to pay six cents per square foot in each case where the cement composition is laid in that kind of construction work. This is 50 per cent of the estimated cost.

Aldermen Friendly to Chickens—

Manistique, Schoolcraft county's seat, is steadily acquiring metropolitan airs, but the innovations come hard. It settled the question of prohibiting cattle to roam at will several years ago, and the action taken, although popular now, caused a great furore at the time. Now another ripple has been created in consequence of a petition presented the city council by a number of women, requesting that chickens be restrained from running at large. However, for the time being at least the project has been defeated, the ordinance not receiving the support of a two-thirds majority of the aldermen-elect.

Escanaba's New Church—

Of the English Gothic style of archaic lecture, and constructed of field stone, the new house of worship of the Methodist Episcopal congregation of Escanaba will be a decided ornament to the city. It will cost, complete, \$19,000. Its construction is now in progress. In ground dimensions, the church will be 66 by 88 feet, and altogether, with the Epsworth league room and the gallery, it will have a seating capacity of 600. The floors will be of maple and the wood-work of weathered oak. The basement will contain a Sunday school room, 42x 60 feet, and there will be a kitchen and

pantry. The church will contain two parlors, one in the basement and one on the main floor, in which there will be open fire places. The heating of the building will be by steam. In the choir loft at the rear of the pulpit will be installed a \$2,150 organ, contracted for a few days ago.

Lightning's Freakish Visitation—

For performing unique stunts lightning is in a class by itself. Mr. and Mrs. Frank Wolf, of Ontonagon county, had a vivid illustration of this during the recent electrical storm. Their dwelling on the Greenland road was in the path of a bolt and was attacked at two points. One fork struck the chimney, tearing out a few bricks, and followed it to the sitting room. The stove pipe was torn down, the stove was wrecked and Mr. and Mrs. Wolf narrowly escaped serious harm. The lightning played all about them for an instant, then darting into the dining room disappeared through the floor. The other current struck a rear corner of the building, leaving a hole through the cornice and entering the kitchen, where it mixed up things generally, and disappeared without leaving any trace of its exit. The rooms were searched in places, but true to its freakish character the lightning did not ignite them nor do any great amount of damage.

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

There is probably no medicine made that is relied upon with more implicit confidence than Chamberlain's Colic, Cholera and Diarrhoea Remedy. During the third of a century in which it has been in use, people have learned that it is the one remedy that never fails. When reduced with water and sweetened it is pleasant to take. For sale by The Stafford Drug Co.

Negaunee Department

NEW ENGINE READY SOON.

Old Hoisting Plant at Mary Charlotte Being Replaced by New Equipment.

A new double engine and boiler are being installed at the Mary Charlotte mine engine house. The boiler is in position and work on the concrete foundation for the engine was started yesterday. Superintendent Foley expects to put the new plant in commission in about two weeks. The engine will have more than double the capacity of the old one and Mr. Foley expressed the belief that it will be able to do the work at the property for at least two years and possibly three or four years, when larger equipment will again be necessary.

Superintendent Foley considers that the old engine and boiler have done wonderful work. He has sunk six shafts with the outfit, two at the old Wheeling mine; one at the Macomber, one at the New York Hematite, now the Breitung Hematite, and two at the Mary Charlotte. He said that the plant is still in good condition, and could be used for a number of years.

The new shaft at the property is now down about 100 feet, but the ore will not be reached for some months yet as the deposit is about 200 feet from surface. A large force of men is employed, but additional hands will be added as fast as places are made for them.

L. E. Chaussee, who has the contract for the erection of the dwellings at the Mary Charlotte location, started work yesterday building his tool shanties, etc. Work on the concrete foundations will be started today or tomorrow, and the carpenters will be on the ground within a few days. The location is an attractive one, a short distance from the point where Robert Ewing proposes to dispose of building lots.

RAVENS TIED FOR SECOND PLACE.

The Ravens defeated the Scrubs in the bowling match Monday evening by a score of 111 to 106. The scores were as follows:

Williams	141	124	135	400
Miller	160	173	152	485
Nelson	212	115	201	528
Totals	513	412	488	1413

LOCAL LACONICS.

Alexander Maitland arrived home yesterday.

Harry Work called on his patrons in Negaunee yesterday.

Mrs. Miller of Boulder, Colo., is in the city visiting her parents, Mr. and Mrs. John O'Leary.

Mrs. Mary Gaffney and daughter, Miss Nellie, have returned from California, where they spent the winter.

Florence M. Curran, who had been at Goldfield, Nev., the past several months, has returned to Negaunee.

The sisters and pupils of St. Paul's parochial school are preparing for the closing exercises, to be held next month.

Manager McDonald of the opera house has a picture show booked for Tuesday, Wednesday and Thursday evenings of next week.

The Chicago man who inspected the heating plant in the Neely block reported that the plant was all right, but the chimney not large enough.

L. E. Chaussee, who has the contract for the erection of the addition to St. Paul's parochial school, practically completed excavating for the foundation yesterday, and the stone work will be done this morning.

Joel Williams and S. S. Mitchell left Monday for Port Huron to attend the grand lodge session of the Royal Arch Masons which convened yesterday morn-

LARGE PARTY TO FINLAND.

Negaunee and Ishpeming People Leave Sunday Morning for New York.

A. F. Moren, traveling passenger agent for the Cunard line, spent yesterday and Monday here and at Ishpeming interviewing Finns who plan to leave Sunday for their native country. The party will be composed of twenty or twenty-five persons, and will be the largest delegation of foreign born people that ever left Marquette county for one of the European countries. A tourist car is to be placed at the disposal of the party. It will be set out at Ishpeming Saturday night and picked up by the early South Shore train Sunday morning. The party will be taken through to Boston without change, and it is expected that they will arrive there Monday night, when they will at once board the steamer Terina, which will sail Tuesday morning. Most of the party will be Ishpeming people. A few plan to remain in Finland permanently.

Several hundred upper peninsula Finns have left for Finland since the first of the year and Mr. Moren reports that many more are to go within a few weeks. A small percentage will remain abroad. Most of them are people who have been here a number of years and who have accumulated a bank account, many of them owning their homes. Mr. Moren says that the foreign prepaid ticket business was never before as good as it is at this time.

Negaunee is getting its share of the new comers. Foreigners have arrived nearly every day during the past two or three months. During the past week upwards of fifty have located here. The South Shore's midnight train Monday brought in about fifteen. Two extra coaches were filled with immigrants bound to points in the northwest.

GOES TO STAR WEST.

Captain John Dunstan is now in charge of operations at the Star West mine, Cascade range, being reopened by the Corrigan, McKinney company. Mr. Dunstan is an old miner who has been schooled in all branches of the business and he will doubtless handle the Star West to the entire satisfaction of his company. His daughter, Miss Bessie Dunstan, was given a farewell surprise at the family home on Iron street last Friday evening, a large party of her young friends being present. The evening was enjoyably spent and a dainty lunch was served. The captain will move his family to the location within a week or so.

REV. YONKERS WILL SPEAK.

Rev. W. R. Yonkers, pastor of the Presbyterian church, will deliver the Memorial Day address for the Grand Army in the city square on Demonstration Day.

Orr Schultz, superintendent of the public schools, will officiate as master of ceremonies, and Rev. W. B. Coombe, pastor of the Mitchell Methodist church, will offer the prayer. Mr. Schultz and Mrs. Marden, instructor of music at the schools, are aiding the arrangement committee in the preparation of the program, which will include selections by the Light Guard band of Ishpeming. It is also expected that the high school chorus will sing.

For stomach troubles, biliousness and constipation try Chamberlain's Stomach and Liver Tablets. Many remarkable cures have been effected by them. Price, 25 cents. Samples free. For sale by The Stafford Drug Co.

ing. They will represent the Negaunee lodge.

The Fraser Stock company will hold the boards at McDonald's opera house all next week, playing at popular prices. The opening play Monday evening will be a comedy drama, "The Light House Robbery."

A number of Negaunee men have been on fishing trips during the past few days, but no large catches have been reported. Richard Nesbitt, who went out the day the season opened, has had the banner catch thus far this year.

Dr. H. W. Sheldon was advised by wire yesterday that his automobile is to be shipped from the factory June 5. The manufacturers promised to send out the machine in April, but they have been so crowded with work that they could not make good.

The funerals of the two miners, James Marga and Frank O. Liveo, killed at the Cambria mine, were held yesterday afternoon at 3 o'clock under direction of the Italian society. There was a large attendance of the members, all being permitted to leave their work.

The painters and paper hangers of the city are rushed with work and all who have wanted their services during the past few weeks have been obliged to wait for them. There is an unusually large amount of interior work to be done. The exterior painting has not yet been fairly started.

Several men were employed yesterday cleaning Iron street, which now presents a much better appearance than at any previous time in several months. The street sweeping crew is being reorganized. Mayor Winter, who has been ill and confined to his home the past week or more, is improving, and he expects to be down to his office within two or three days.

H. B. Irving and his brother Laurence are to publish a biography of the late Sir Henry Irving. No less than six books have been written about Sir Henry since his death and there are at least two others to follow—one by Austin Breton and another by Joseph Hatton. The final life by the sons will not be published for several years and for satisfactory reasons. It promises to be an important book, for both sons have demonstrated that they have literary ability.

IT'S YOUR KIDNEYS.

Don't Mistake the Cause of Your Troubles. A Marquette Citizen Shows How to Cure Them.

Many people never suspect their kidneys. If suffering from a lame, weak or aching back they think that it is only a muscular weakness; when urinary troubles sets in they think it will soon cure itself. And so it is with all the other symptoms of kidney disorders. That is just where the danger lies. You must cure these troubles or they may lead to diabetes or Bright's disease. The best remedy to use is Doan's Kidney Pills. It cures all ills which are caused by weak or diseased kidneys. Marquette people testify to permanent cures.

Edgar Pollock, stone mason of 227 E. Jackson St., Marquette, Mich., says: "I have always believed that the kidneys need continual attention. I have given this considerable study and can always tell whenever my kidneys are not acting properly. They affect my back and I can feel it in my eyes. At such times I always use Doan's Kidney Pills and they never fail to fix me up. Before I began using them I had terrible attacks of backache, dizziness and pains in my head, and was weak, uneasy and nervous. None of the remedies I tried seemed to help me, but as Doan's Kidney Pills were recommended by reliable people I got a box at the Stafford Drug Co.'s store and began using them. The backache and nervousness disappeared and the headaches and soreness of the eyes did not trouble me any more. Having found from this experience that Doan's Kidney Pills were to be relied upon in kidney troubles I have continued using them from time to time and they have always given me the greatest satisfaction."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Your shoe money will go twice as far if you buy the strong, well-made and hard-to-wear-out Mayer School Shoes for boys and girls. They are made of the best seasoned upper leather and tough solid soles and have fewer seams than other shoes. Mayer School shoes are shaped to prevent injury to growing children's feet. They WEAR LIKE IRON. Your dealer has them or will get them for you—take no other. The Mayer trade-mark is stamped on every sole. We also make the "Honorable" shoes for men and "Western Lady" shoes for women. F. Mayer Boot & Shoe Co. Milwaukee, Wis.

FOR SALE—Steel range, almost new. C. L. Sporey, Negaunee.

FOR SALE—Nine-room house and lot; good drive, horse, buggy, cutter, harness, two milk cows; also household furniture. Captain T. H. Rodgers, Jennings St., Negaunee. 5-18-17

TARIFF WILL BE AN ISSUE.

Allison's View of the Next Campaign—Believes Action May Be Necessary.

Dubuque, Ia., May 21.—"In the next campaign and possibly in the next session of congress the tariff is certain to be an important issue," said Senator Allison. "The personalities of candidates necessarily will enter into the decision by the people. There is great difference between revision of the tariff and its practical destruction. If Bryan is elected he will attempt to 'revise' the tariff in such a way as to reduce it to a strict revenue basis. He is a free trader, and surely would have his party behind him. But there will be a Republican senate, so that there would be no revision at all. On the other hand, any Republican president would proceed to revise the tariff along protection lines, reducing the rates to a protective basis in all cases, but not abandoning the theory.

"It will be necessary soon for the proper committees of congress to take up the tariff question. That is to say, they must investigate the demand for revision itself. Find out what the people want, and where serious inequalities exist, so that congress can proceed intelligently. In some places talk of revision is strong, elsewhere the idea of touching the tariff is unpopular. There is enough talk of tariff revision to justify attention being paid to it, but until the committees of congress act it will be impossible to estimate the strength of the movement throughout the country, and for that reason investigation will have to be made soon for the purpose of determining whether action is necessary or not.

"The only way we can secure any elaborate reciprocity now is through tariff revision of some sort. This probably may take the form of a maximum and minimum system. If it does, we should, in my opinion, adopt the idea which Germany is now enforcing against us. That is to say, minimum duty rates should be a reasonable protective tariff, affording full protection to American workmen and American manufacturers without imposing any hardships on the consumer. The maximum rate of duty then would become purely punitive. That is to say, it would be applied to punish nations which do not give us the benefit of their lowest rates of duty.

"In this way," continued the senator, "we should have satisfactory reciprocity by congressional action. Congress would fix all tariff rates, both high and low, as it is duty under the constitution. There would be no continuing disturbance of prices. The application of maximum or minimum rates would be an executive act. The president would have to decide when any foreign nation did not give us the benefit of its lowest rates of duty. He would not be called upon to fix rates or to employ experts to take testimony on the cost of production, but would act in a ministerial capacity, and this double tariff would operate on all nations alike.

"The danger of attempting to fix tariff rates by means of individual treaties negotiated by the president and approved by the senate lies in the fact that it involves the raising of revenue without the consent of the house of representatives, whereas the House is specifically given by the constitution the exclusive right to originate all revenue measures.

"It is a bad thing to split up the two houses of congress and set them at odds, with the president necessarily siding with one of them. That is inevitable when a treaty is negotiated which seeks to change the duties fixed by both houses of congress. It gives to the president legislative functions he was not intended to exercise, and ignores the one branch of congress which the constitution intended to have all the power of initiative over revenues. The house naturally would resort to retaliation. It would refuse to give proper support to the president and bad feeling between the two houses would result in the paralysis of the efficiency both of the two houses of congress and the executive."

CIVIL PENSION LIST PLAN.

It Is Said to Be Favored by President Roosevelt.

Washington, May 20.—President Roosevelt, according to Civil Service Commissioner Alfred W. Cooley, will grant the

United States Civil Service Retirement association permission to solicit subscriptions from government employees to secure the funds necessary for the presentation to congress of a bill that will provide for the retirement of disabled and superannuated government employees, this bill to be prepared by the Keop commission. This is the substance of a letter which has been received by a committee and which, together with a report on the subject of retirement, will be laid before the annual meeting of the association, which takes place here on Thursday. In part, the report says:

"Since we last addressed you your committee has formulated a bill for the retirement of disabled employees in the classified civil service of the government, which bill was introduced in both branches of congress. The progress made by the retiring movement during the last six months has exceeded our expectation. Our bill has convinced congress that we could create and maintain a retirement act ourselves.

"When, six years ago, we entered upon the investigation of the subject of retirement there was absolutely nothing known as to the data or statistics upon which a bill might be formulated with mathematical certainty. Today there is nothing in the way of data or statistics that is not known.

"When we took up the subject the older element or three-fourths of our associates thought the subject chimerical, and all the younger element thought that under our retirement plan, they would be taxed too heavily; the newspapers throughout the country were against us; congress would make no appropriation to help us; some of the cabinet officers were sceptical, but when we had prepared our bill and introduced it in congress there was complete change of sentiment. The comments of the newspapers throughout the country were invariably favorable. Congress and the heads of departments saw a new light. As for the president himself, he has always been with us in the movement.

"At the outset we proposed to make all data and calculations official, and to that end we tried to secure the appointment of an official committee to investigate the subject with a view to a retirement plan and to report as to its feasibility and practicability.

"We are pleased to say that we have succeeded. To the Keop commission has been assigned the task of preparing a bill. That congress is not inclined to favor retirement bills of a local character is evidenced by the fact that the bill of the railway mail service, which was introduced in the last congress with the approval of the postmaster general, and the bill introduced in the last congress with a recommendation by the president, were not acted upon.

"The report sets forth that Chairman Tawney of the appropriations committee, and Chairman Gillette of the house committee on reform in the civil service, are more than favorably inclined to a bill that will for the first twenty years of its operation as a law be assisted by a government appropriation.

"According to the statistics of the association, the retirement plan will be self-sustaining in twenty years.

RUSSIA PUSHING TRADE.

Washington, May 21.—Promotion of honorable articles is the object of an association recently organized in St. Petersburg. It is projected to establish trade schools and work shops in all the principal industrial districts of Russia for the purpose of instructing the workers. In the opinion of agents of the state department who have investigated this new movement it marks an important step in the development of trade schools in a country which has hitherto given but little attention to the industrial education of its people. Technical improvements are to be introduced and artists and technical experts employed to furnish designs and superintend the labor of the students who attend these institutions. Artists and artisans will be sent to foreign countries for the purpose of studying the markets and artistic proclivities existing there, so as to gather useful information in adapting the productions of the Russian home industries to foreign taste. Agencies are to be established in foreign countries for the sale of these products. The association furthermore intends to organize the trade in home made articles in a uniform manner and to supply raw materials to the workers.

GEORGIAN BAY CANAL.

Great Waterway Is Planned to Cost Upwards of \$100,000,000.

Ottawa, May 21.—The Georgian Bay Canal commission has practically completed at a cost of some \$600,000 a thorough survey of the proposed twenty-one foot waterway from Georgian Bay to Montreal via the French river, Lake Nipissing and the Ottawa river. The detailed report of the commission, giving full and reliable details as to the whole cost of the completed canal, the location and character of the structural works required, the water powers available, etc., is now in course of preparation and will be presented to parliament early next session. For the first time the country will then have reliable and adequate information as to the cost and feasibility of this great project, which has now been before the public for half a century.

"The engineers of the commission have not yet compiled a final estimate as to the whole cost of the canal, but from the information now available it is safe to say that the total expenditure required for a continuous and easily navigable waterway, with a minimum depth of twenty-one feet from Georgian Bay to tidewater, will be close to \$105,000,000. The report when presented will also show that from an engineering standpoint the enterprise is entirely feasible, with no very difficult engineering difficulties to surmount. The only question for parliament to consider will be whether the benefits which will accrue to the dominion through the construction of a waterway, making Fort William practically an ocean port, and shortening the present distance by water from Fort William to Montreal by over four hundred miles, will justify an expenditure of \$125,000,000 that has been spent altogether on the Great Lakes and St. Lawrence waterways system.

"The engineers have been able to solve the chief engineering problem of the canal, namely, the question of maintaining a sufficient water supply across the height of land between Lake Nipissing and Trent lake. It has been found practicable by conveying the flood waters of the lake and of the tributary waters of the Ottawa river to maintain a continuous and adequate supply of water during the whole season of navigation without having to excavate from Trent lake to the level of Lake Nipissing, which would have involved the expenditure of an enormous sum.

"One of the most interesting features of the report will be the statement that it will be easily possible at a moderate expenditure to considerably reduce the low water level by a system of dams and control of tributary waters. This would result in increasing wonderfully the value of the water powers now available, would prove of great benefit to the lumbering interests of the Ottawa Valley and would also serve to materially raise the low water level in Montreal harbor. It is estimated that with the completion of the canal there will be 500,000 horse-power available along its course, almost as in the Ottawa Valley. With so much cheap power available and with its great resources of iron ore and timber the Ottawa Valley would doubtless become one of the greatest manufacturing centres of the continent.

"Referring to the early construction of the canal, Sir Wilfrid Laurier recently said that if he had the money to do so he would begin work tomorrow.

PROTECTION FOR MINERS.

Important Experiments to Be Made by the Federal Government.

Washington, May 21.—Determined endeavors to stop the sacrifice of human lives in the coal mines of the United States are to be made at once by the federal division of the Geological society. Plans have been drawn for an experimental station where tests of dynamites and powders used in blasting will be made to determine their safety in the presence of fire damp and coal gas. Explosives of all sorts will be hurled by means of a mortar into a manhood boiler-plate cylinder previously filled with gas, and the effects will be noted. If ignition fails after severe test the explosives will be known as "permissible explosives," and their use urged upon mine owners.

"There will be experiments in rescue work. One part of this station will be fitted as a miniature coal mine and miners and operators taught how to save

lives. In gas explosions hundreds of lives could be saved were it possible for the rescue party to enter immediately after the accident. Fire damp often holds the men back for hours while their comrades are slowly suffocated or burned to death. The government experts have found an apparatus in Europe which enables the rescue party to enter any place where there is gas. The miniature mine will be filled with dense smoke and practical demonstrations with this apparatus will be made.

"J. A. Holmes, chief of the technology branch of the geological survey, says: "There seems to be no end to gas and coal dust explosions. Instead of growing less these horrors appear to be multiplying. In 1906 the coal mine death toll in Pennsylvania was five hundred, and 250 died as the result of gas or coal dust explosions. The United States is behind Europe in safeguarding the lives of men in the mines. England and Belgium, where the mines are notoriously full of fire damp, have had for years experimental stations, and in these countries there are but few casualties in the mines. There are a number of 'permissible explosives' in England, and these only may be used. In England, also, the 'limit charge,' which must not be exceeded, is employed. In the various states here there are a few such regulations, and none in many states."

"Coal dust rather than gas causes a large number of explosions. Officials of the geological survey have been watching the frequently recurring accidents in different parts of the country. Some of the recent mine explosions in one state—West Virginia—are as follows:

- Blue Ash, March 6, 1906, 100 killed.
Rush Run, March 18, 1905, 25 killed.
Bluefield Coal, Dale mine, Jan. 4, 1906, 22 killed.
Paint Creek, Detroit mine, Jan. 18, 1906, 18 killed.
Fayette county, Paral mine, Feb. 8, 1906, 22 killed.
Phillippi Century mine, March 25, 1906, 26 killed.
Fayette county, Stuart mine, Jan. 20, 1907, 82 killed.
Fayette county, Whipple mine, May 1, 1907, 21 killed.

MAKE WAR ON PRISON LABOR.

Union Workmen of Iowa Will Try to Break Up Present System.

Des Moines, Ia., May 21.—President A. L. Erick of the Iowa State Federation of Labor has sent out several hundred circulars to local unions all over the state urging that action be taken at the Keokuk meeting next month toward abolishing convict labor.

"In connection with the attempt to abolish convict labor the president sent forth this declaration: "In every well regulated government every willing man should be accorded the right of sufficient labor for respectable sustenance. Society is benefited by his availing himself of this right and injured by his non-availing. A person performing rational work on the inside of prison walls does not augment the amount of work or the number of laborers any more than is conceded to his right when a free man. Therefore, the injury to the free laborer is not because of the prisoner's performance of labor, but because it enables the exploiter to sell the products of his labor so ruinously low as to practically regulate the selling price of the produce of the free laborer."

"During 1906 the average number of convicts employed under the contract system was as follows: Iowa Farming Tool Company—173 men at fifty-five cents a day and twelve lumps at twenty-five cents a day. Fort Madison (Ia.) Company—129 men at forty-five cents a day and nine lumps at twenty-five cents a day. American Co-operative Company, Anamosa—Twenty-three men at fifty-five cents a day.

WEAKENS HIM IN OHIO.

Burton's Fair Dealing in River and Harbor Matters Not Appreciated.

Washington, May 21.—Ohio presents a striking instance of the failure of many people to appreciate the effort of some men in public life to view the problems which they are called upon in their official capacity to solve from the disinterested and national rather than from the local standpoint. Much has been heard in recent months of the probable candidacy of Theodore E. Burton of Cleveland to succeed Senator Foraker in Ohio district in congress and has been chairman for a long time of the house committee on rivers and harbors. His strength in the country at large today is mainly due to the conscientious way in which he has discharged his duties at the head of this committee for the good of the whole country instead of favoring any one section and discriminating against another.

"In framing the various river and harbor appropriation bills Representative Burton has cast the weight of his influence on the side of the country at large and has endeavored to spend the people's money for the improvement of those waterways in which the general country is most interested. In carrying out this policy he has not been so generous to some of the Ohio river projects as the people of southern Ohio desired, and for that reason more than for any other, Representative Burton would stand rather a poor chance of election to the senate against even a man of Senator Foraker's growing popularity.

"If Mr. Burton had used the river and harbor bill to strengthen himself with the people of southern Ohio political wiseacres from the Buckeye state admit that he would be a formidable opponent of Mr. Foraker's at the next election. It would have been comparatively easy, they say, for him to have overcome the handicap which is his by reason of his residence in Cleveland in the extreme northern part of the state, the section now represented in the senate by Dick. Tradition decries that one senator shall come from the northern section and the other from the southern part of the state, and the fact that Mr. Burton is extremely unpopular in the latter increases the disposition to adhere to this tradition.

"It can be stated authoritatively that it is not the present intention of Representative Burton to seek senatorial honors at the next election. The opposition to Senator Foraker has not yet centered around any one man and a survey of the material for Senator Foraker has represented Ohio gracefully in the senate and the cause of his downfall if it shall come that, will be found in his offenses

against the people of Ohio rather than against the nation. It is not true that the administration has set about to exterminate Senator Foraker or that the managers of Secretary Taft's boom are devoting themselves to that task. It is down on comfortably. He started drilling for the oil which he was confident he would strike. He worked almost night and day at the job and was finally rewarded with the best well that had been brought in up to that time in this field. Like all other wells that had been bored here up to then this well was boistered with sand, and strainers had to be put in. Mr. O'Neal began looking around with the view of finding a locality which indicated that it was underlain with 'cap rock' instead of sand. In the meantime his first well was producing large quantities of oil and was making him money at the rate of several thousand dollars per week.

FROM DEBT TO MILLIONS.

John O'Neal's Fortune Made in Texas Oil in Three Years.

Humble, Tex., May 21.—There have been many quick rises to fortune as a result of lucky oil discoveries in Texas, but no case equals that of John O'Neal. Ask any oil man in Humble or Batson or near Lake who is the most remarkable and most fortunate man in the oil business today and they will all tell you John O'Neal.

"Less than three years ago a poor well driller, today well on the way toward the possession of millions of dollars, he has to his credit on deposit in Houston banks more than \$500,000, and this is being increased at the rate of more than \$75,000 a month, which represents the income from his oil wells in the Humble oil field.

"O'Neal was worse than poor three years ago. He had enemies who were persecuting him to the utmost. He was a principal in an exciting kidnaping episode about that time. Officers from a distant state arrested him at Beaumont on a charge which was afterwards shown to be trumped up.

"Despite this trying experience O'Neal's spirit was not broken. He had no money and was in debt. He was widely known as an expert driller and his long experience in different oil fields of the country had given him an intimate knowledge of surface indications of oil. It was about this time that the discovery of oil at Humble was made. O'Neal went to an oil operator for whom he had been drilling wells in the Sour Lake and Beaumont fields and asked for a loan of \$500. He said that he wanted to try the experiment of working for himself. If he failed he would pay the loan back. If he succeeded he would repay it in cash. The oil operator made the loan.

"With this \$500 O'Neal purchased a

drilling outfit, paying part down and was given long time on the balance. He took the rest of the money and came to Humble, where he succeeded in buying a small piece of land, enough to put a well down on comfortably. He started drilling and got things in readiness for carrying for the oil which he was confident he would strike. He worked almost night and day at the job and was finally rewarded with the best well that had been brought in up to that time in this field. Like all other wells that had been bored here up to then this well was boistered with sand, and strainers had to be put in. Mr. O'Neal began looking around with the view of finding a locality which indicated that it was underlain with 'cap rock' instead of sand. In the meantime his first well was producing large quantities of oil and was making him money at the rate of several thousand dollars per week.

"O'Neal found a likely spot and began drilling another well. It was located outside of the proved field and the oil wiseacres predicted that he would lose what money he had made out of his first well. To the astonishment of all the oil men except O'Neal himself, the second well struck the rock formation just as he predicted it would, and when the drill got through the cap rock the biggest flow of oil in the Humble field burst forth. This well has been an enormous producer and has contributed greatly to Mr. O'Neal's fortune. He bored other wells and oil in big quantities was found in every one of them.

RELIEF FROM RHEUMATIC PAINS.

"I suffered with rheumatism for over two years," says Mr. Rolland Curry, a patrolman of New West, Fla. "Some times it settled in my knees and lamed me so I could hardly walk, at other times it was in my feet and hands so I was incapacitated for duty. One night when I was in severe pain and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by The Stafford Drug Co.

PILES CURED IN 6 TO 14 DAYS.

Pazo Ointment is guaranteed to cure any case of Itching, Bleeding or Protruding Piles in 6 to 14 days or money refunded.

Father says: "Say, Mother, can't you make us some more of those fine doughnuts if I will bring home a pair of Cudahy's Peacock Lard again?" 11-27-eod)

Overworked Women

The Suffering and Pain Endured By Many Working Women is Almost Beyond Belief.

THERE are thousands of American women whose duties call them out in all winds and weathers, many of whom sit with wet feet or stand all day, thus weakening and undermining their health. Women, however, for the most part, spend their lives at home, and these women are willing and ambitious that their homes shall be kept neat and pretty, their children well-dressed and tidy, and do their own cooking, sweeping and dusting, and often washing, ironing and sewing for the entire family. Both of these classes call for our sympathy. Truly the work of such a woman is "never done," and is it any wonder that she breaks down at the end of a few years, the back begins to ache, there is a displacement, inflammation or ulceration of certain organs, and the struggle to continue her duties are pitiful.

Lydia E. Pinkham's Vegetable Compound.

Made from native roots and herbs, is the exact medicine a woman needs whose strength is overtaxed. It keeps the feminine system in a strong and healthy condition.

Mrs. Sadie Abbott, of Jeannette, Pa., writes: "Dear Mrs. Pinkham:—I suffered severely with pain every month, and also a pain in my left side. My doctor prescribed for me but did me no good; a friend advised Lydia E. Pinkham's Vegetable Compound and I wrote you in regard to my condition. I followed your advice and am a perfectly well woman. The pains have all disappeared, and I cannot recommend your medicine too highly."

Mrs. Lena Nagel, of 117 Morgan St., Buffalo, N.Y., writes: "Dear Mrs. Pinkham:—I was completely worn out and on the verge of nervous prostration. My back ached all the time. I had dreadful periods of pain, was subject to fits of crying and extreme nervousness, and was always weak and tired. Lydia E. Pinkham's Vegetable Compound completely cured me."

Mrs. Pinkham's Invitation to Women. Women suffering from any form of feminine illness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. Out of her vast volume of experience, Mrs. Pinkham probably has the very knowledge that will help your case. Her advice is free and always helpful.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND, made from Native Roots and Herbs, complies with all conditions of the new Pure Food and Drugs Law.

MORAN GUILTY OF BURGLARY

SUSPECT CONVICTED OF BREAKING INTO AND ROBBING THE PETER BOYER SALOON.

VERDICT RETURNED QUICKLY

Twelve Applicants for Citizenship Papers Secure Them While Eighteen Are Compelled to Await Another Term.

In circuit court yesterday before Judge Stone David Moran, charged with burglary was found guilty, after a trial lasting from 9 o'clock in the morning until 2:30 in the afternoon. Frank A. Bell appeared for the state and T. A. Thoren for the defense.

The crime for which Moran was arraigned was committed about two months ago, when the saloon of Peter Boyer, No. 109 West Baraga avenue, was entered in the night time and a revolver and \$200 in money stolen. David Moran with Peter Moran were arrested at Negaunee on the day following by Chief Tom Gribble of that city, on the request of Chief Manning. Moran subsequently made a confession implicating Moran, and pleaded guilty upon the opening of court Monday.

The state made out a strong case against Moran. Chief Gribble, of Negaunee, told of his arrest of the men upon information furnished him by Chief Manning. He said that they had some money, he was unable to state how much in their possession, also the revolver which was subsequently identified as the one taken from the saloon. Moran took the stand and told of having entered the saloon with Moran on the night in question and taken the money and revolver. He said that entrance had been effected through a rear window by removing the sash. Ole Johnson, residing over the saloon, testified to having heard a noise on the night of the robbery and the sound of falling glass. Joseph Remortel, patrolman, said that he had heard the sound of breaking glass while several blocks away. He hurried to the scene and on the road passed Moran and Moran. He feared that something was wrong, but did not pass the necessary evidence at the time to warrant his taking the men into custody.

Moran in his own defense did little more than to enter a general denial. Subsequent to the arguments and the judge's charge, the jury was out but a short time. Moran is well known in this vicinity, having at one time been steward of the Marquette club, and he also acted as cook for many outing parties. The court has not as yet pronounced sentence.

Two Cases Nolleed. There were three cases on the calendar against Henry Kreiger, of West Branch, charging him with violation of the liquor law. Two, however, were nolleed on mo-

sion of the prosecutor who considered it impossible to look for a conviction on the evidence. Kreiger pleaded not guilty on the first indictment and the case was taken up immediately upon the conclusion of the Moran trial. The evidence was brief and the jury went out shortly after 5 o'clock. It deliberated for several hours, and finally reported a disagreement. It is said that it stood eight to four in favor of acquittal.

CHARTER PROVISION VALID. Supreme Court Sustains Judge Stone in Damage Action Decision.

The decision of Judge Stone for the defendant in the case of Alexander R. Maclam vs. City of Marquette, an action to recover \$5,000 damages for injuries alleged to have been sustained in a fall on the night of Christmas, 1905, has been sustained by the supreme court.

The case was one of unusual interest, involving as it did the constitutionality of a provision of the city charter, under the general law all cities are liable for injuries sustained through falling on defective walks, but Marquette is exempted through a special provision which places the responsibility solely on the property owners. Maclam fell on the walk below the southeast corner of Washington and Third streets, the property being owned by the John Mack estate, on the night of Christmas, 1905, wrenching a leg. It was alleged in the complaint that his leg had been badly injured and in spite of skilled medical treatment had become steadily worse and that the chances were that the man would be a cripple for life. The point at issue was the constitutionality of the clause in its charter exempting the city from responsibility in cases of that character. Judge Stone ruled with the defendant.

John L. Heffernan, of counsel for the plaintiff, yesterday said that neither the decision of Judge Stone or its affirmation by the supreme court affected other than the city's responsibility in the matter, as far as he had ascertained, and he believed that an action for the same damages recited in the first complaint would now be instituted against the owners of the property.

Of all the fruits that are in the land That grows on bush or tree, I would give up the choicest ones For Rocky Mountain Tea. —The Stafford Drug Co.

MUCH INTEREST IN COMMERCIAL CLUB

MEETING FOR ORGANIZATION WILL PROBABLY BE HELD NEXT MONDAY NIGHT—AUDITORS' REPORT PRINTED.

The particular point of our negligee shirt story is this: we pick the flower of the season's patterns as soon as they blossom, and so make sure you can choose from our early pickings of picked patterns. You've only to come and see to appreciate the point of this.

The Store of Quality.

Alderman Downey, who sprung the plan of organizing a Commercial club on the council some weeks ago, and who was appointed chairman of a committee to canvass the situation and see what had best be done, has been busy with the matter in his leisure time since the committee was named and expects that the preliminaries of organization will soon be gotten out of the way. He reports much encouragement from the business men and other citizens he has approached, and is hopeful that it will be possible to organize a club which will be able to accomplish much good for the city and which will also afford a means of expressing the sentiment of its members on matters of public interest, especially in connection with local government.

Much of the preliminary work has been attended to by Mr. Downey himself. He has approached the business men and other residents whom he would expect to be interested in the proposed organization, asking their co-operation. They have generally been glad to assure him of it, so there are over sixty-five of their number who have agreed to become active members and who have promised to assist in the organization of the proposed club. This number comprises nearly all the men interviewed by Mr. Downey, and he believes the membership can be made much larger.

Among those interviewed are many who have not had a part in previous clubs of the kind. The assistance in organizing of men with experience in such matters is desired, and it is hoped to have the club representative of all classes of citizens, and of all interests.

Mr. Downey has secured a copy of the by-laws of the Soc Commercial club. Its scope is similar to the one it is desired to organize here, so its by-laws form a good model to follow in Marquette.

It is now the expectation that a meeting of the men who have promised to take a hand in organizing the new club will be called for the city hall on Monday night. Further announcement in regard to it will be made later.

Report on Finances Printed.

The report of the Indiana Audit company on the finances of the city of Marquette from March 13, 1901, to March 12, 1907, has been printed in pamphlet form, similar in style and size to the annual statement of the city, and will be delivered to the city hall today. It can be procured by all interested parties, and should be filed for future reference. The report is complete and detailed. Figures for all departments for the period covered are extended in full, permitting of comparisons both in items and totals for the several years. There is an introduction in which various points observed by the auditors are brought out. The Mining Journal discussed their report at some length at the time it was received. It sets forth that the city accounts are all in excellent condition; no shortages were found and the general administration of the

city business is approved. The light and power commission's system of accounting was especially praised.

The exhibit cars of Stanislaus county, California, will arrive in this city for a stay of several days between the dates of June 10 and 15, subsequent to undergoing repairs at the Northwestern shops at Escanaba. The cars are loaded with products of the soil of Stanislaus county sent out by the Modesto board of trade with the view of inducing immigration. The display of tropical, semi-tropical and temperate climate fruits and vegetables is said to be marvellous in the light of the fact that they are all raised within a radius of a few miles. There is also a museum filled with the wonders of the deep. The principal attraction in this department is a giant shark, caught in Monterey Bay, on the coast of California, claimed to be one of the greatest natural curiosities ever exhibited. All visitors are given a beautiful sea shell free as a memento of their visit. A special invitation is extended to farmers and their families.
