

HOUSE CONCURS IN SENATE ACTION

Resolution Demanding the Nomination of Roosevelt for Another Term Is Passed by the Vote of Seventy-One to Two.

Not a Republican Records Himself in Opposition, Although Several Remain Silent, and One Democrat Lines Up With the Majority—Cummins of Iowa Comes Out as a Senatorial Candidate and Will Fight for the Seat of the Veteran Allison.

Lansing, Mich., May 28.—[Special.]—Theodore Roosevelt is the choice of the legislature for a third term, the house today concurring in the senate resolution offered by Mr. Kinnear last night.

Several Republicans did not vote, and the vote of Representative Miller of Detroit was demanded. He rose to a point of personal privilege and explained that he did not think the legislature the proper body to take such action.

Mr. Miller says he is a Taft man, but he objected to the resolutions because he thought them extremely bad taste just before the president's visit.

MR. ROOSEVELT TAKEN TO TASK

DR. LONG RESENTS THE PRESIDENT'S CRITICISM OF HIS WORK ON ANIMAL LIFE.

Stamford, Conn., May 28.—Dr. W. J. Long, naturalist, today gave out a letter sent by him to President Roosevelt in which he vigorously replies to a recent magazine article by the president.

Under the primary law, Governor Cummins' name will go on the primary ballot in 1908, and the people will be given an opportunity to express their preference for the guidance of the next legislature.

WOULD FAVOR THE TOGA

Governor Cummins of Iowa Is Out for the Senatorial Nomination.

Des Moines, Ia., May 28.—It was announced definitely today that Governor Cummins will be a candidate for the United States senate, subject to the endorsement of the Republicans at next year's primary election under the recently enacted primary law.

CHAIRMAN DICK REFUSES TO TALK

Akron, O., May 28.—Senator Charles Dick returned today from Chicago, where he went Saturday. He declined tonight to give an opinion regarding the action of the Republican county committee.

JOE CANNON IN NORTH CAROLINA

Speaker of the National House Visits the Place of His Birth.

Greensboro, N. C., May 28.—Speaker Joseph G. Cannon of the national house of representatives, arrived here today. He was met at the depot by a reception committee from this city and from Guilford college.

REVISION OF THE TARIFF

Is Probable at the Next Session, Says Congressman Hamilton.

Honolulu, May 28.—Congressman Hamilton of Michigan, who is one of the congressional party now visiting Hawaii, in an interview today said that revision of the tariff would probably be undertaken at the first session of congress.

ASKS \$50,000; IS ARRESTED.

Los Angeles, May 28.—P. L. Horne, who claims to be the president of the Karpel Soap company of Illinois, and who is believed to be mentally deranged, was arrested today after making a demand for \$50,000 upon the Equitable Savings bank of this city.

THOMAS JORDAN INDICTED.

Equitable's Former Controller Charged With Perjury and Forgery.

New York, May 28.—The grand jury which has been investigating the affairs of the Equitable Life Assurance society today returned eighteen indictments against Thomas D. Jordan, formerly controller of the Equitable. Perjury and forgery in the third degree are charged. No indictments were found against the present officials of the society.

BONDBOLDERS BUY RAILROAD.

\$3,500,000 of Stock, Mostly Held by J. P. Morgan, Becomes Worthless.

Toledo, May 28.—The Toledo Railway & Terminal company's property was sold under an order of the federal court today to Andrew J. Sullivan, chairman of the bondholders' committee, at the upset price of \$2,000,000.

Most of the \$3,500,000 of stock is owned by J. Pierpont Morgan, and according to Mr. Sullivan this stock is entirely wiped out and worthless. Mr. Sullivan said that if Mr. Morgan should purchase the road from the bondholders' he could undoubtedly make the stock good.

GOVERNOR GIVES SOLONS NOTICE

Unless the Primary Bill Is Passed, He Says, He Will Call an Extra Session for the Enactment of the Legislation.

Ten of the Fifteen Insurance Measures Adopted at Last Summer's National Conference Go Through the House, and in the Senate Approval Is Given the Mining Companies' Land Proposition After It Is Amended to Meet Osceola's Wishes.

Lansing, Mich., May 28.—[Special.]—Governor Warner announced definitely today that he would call a special session if no primary bill is passed.

MINING COMPANIES' BILL PASSES.

The Moriarty bill removing the limit on the number of acres of land mining companies may own was reported out and passed the senate today with but one dissenting vote, that of Mr. Mingo of Cheboygan.

REFORM OF INSURANCE LAWS.

The house, on a special order, today passed a series of ten bills presented by insurance Commissioner Barry and embracing features of the bill as drafted in several states.

THE OSEOLA PEOPLE FEARED THAT THIS WAS ANOTHER PLAN TO PERMIT MERGERS THROUGH THE SALE OF STOCK, AND THEY INSISTED THAT THE REFERENCE TO PERSONAL PROPERTY BE KEPT OUT.

The Oseola people feared that this was another plan to permit mergers through the sale of stock, and they insisted that the reference to personal property be kept out.

MILITARY MEASURE REPORTED OUT.

The military bill reorganizing the state troops and providing a scheme whereby armories may be built was reported out in the senate today.

STATE ACCUSES 'FRISCO SHERIFF

HINTED IN COURT, TALESMEN FRIENDLY TO THE MAYOR ARE BEING SUMMONED.

San Francisco, May 28.—Sixteen talesmen were examined today in the trial of Mayor Schmitz. All but one were excused for cause, and George D. Cummings, the sixteenth one, was peremptorily challenged by the defense.

KLAW & ERLANGER SCORE.

New York, May 28.—Fifteen cases, aggregating \$150,000, asked for damages for personal injuries and deaths caused by the Iroquois theater fire, were dismissed today by Judge Hough.

DAMAGE SUITS RESULTING FROM THE IROQUOIS FIRE ARE DISMISSED.

REVISION OF THE TARIFF

Is Probable at the Next Session, Says Congressman Hamilton.

Honolulu, May 28.—Congressman Hamilton of Michigan, who is one of the congressional party now visiting Hawaii, in an interview today said that revision of the tariff would probably be undertaken at the first session of congress.

ASKS \$50,000; IS ARRESTED.

Los Angeles, May 28.—P. L. Horne, who claims to be the president of the Karpel Soap company of Illinois, and who is believed to be mentally deranged, was arrested today after making a demand for \$50,000 upon the Equitable Savings bank of this city.

STRIKE IS AVERTED.

Street Car Men in Chicago Accept Company's Proposition.

Chicago, May 28.—The employees of the Chicago City railroad, who had threatened to strike unless their demands were granted, met tonight and decided to accept the company's terms.

TODAY'S WEATHER.

Washington, May 28.—The following is the weather bureau's forecast for up to Michigan: Showers, Wednesday and probably Thursday; warmer Wednesday in the east and south; fresh winds, mostly northeast.

COTTON MILLS INCREASING WAGES

AVERAGE FOR 126,000 OPERATIVES IN NEW ENGLAND IS A DOLLAR A WEEK.

Boston, May 28.—The upward movement in the wages of New England cotton mill operatives, of whom there are nearly 200,000, has become general.

RECOUNT BILL IS PASSED.

Albany, N. Y., May 28.—The senate today, by the vote of 28 to 8, passed the assembly bill providing for a recount of the ballots cast in the McClelland-Heston majority election in 1905 in New York city.

JAPS UNDULY EXERCISED.

Washington, May 28.—At the cabinet meeting today, Attorney General Bonaparte laid before the president and Secretary Root the report of District Attorney Devlin, at San Francisco.

FEDERAL INQUIRY SHOWS REPORTS OF THE 'FRISCO AFFAIR MUCH EXAGGERATED.

Washington, May 28.—At the cabinet meeting today, Attorney General Bonaparte laid before the president and Secretary Root the report of District Attorney Devlin, at San Francisco.

AMERICANS FARE BADLY.

St. Andrews, May 28.—The American champion, Eben M. Byers, of Pittsburgh, was defeated in the second round of the amateur golf championship contest.

REBELS ATTACKING TOWNS.

Swatow, China, May 28.—The revolutionists are now attacking Chungking and Tung Chang, wealthy towns in the Chinghai district.

UNVEILED BY THE KAISER.

Berlin, May 28.—Emperor William today unveiled in the garden in front of the castle five bronze statues erected in honor of his ancestors of the house of Orange.

MUCH MOORISH BLOOD FLOWS.

Madrid, May 28.—Dispatches received from Melilla, Morocco, say that rebels under the pretense recently attacked and, after a severe battle, routed the sultan's troops with great loss.

ENTERTAINS 500 GUESTS.

Dr. W. T. Linn of Pana, Ill., Aged 102, Gives a Birthday Dinner.

PANAY, ILL., MAY 28.—DR. W. T. LINN, who has been a prominent physician here for years, celebrated the 102nd anniversary of his birth today by entertaining five hundred guests at dinner.

SUPREME COURT'S WORK.

Washington, May 28.—During the term of the supreme court of the United States which began last October and closed yesterday, 467 cases were disposed of. Three hundred and forty-three are on the docket, compared with 305 last year.

MAYOR McCLELLAN VETOES THE BILL

Public Utilities Measure, He Says, Puts Into the Hands of a Single Political Party Practically Limitless Power.

He Favors Its General Principles, but Fears It "So Destructive of Home Rule and So Effective as a Weapon With Which to Coerce and Secure Money for the Corruption of the Electorate," That He Finds He Cannot Give His Approval.

New York, May 28.—Late today Mayor McClellan recorded his official disapproval of the public utilities bill, which he sent back to the legislature, where it is expected that within the next few days nearly 700,000 of the advance will be posted.

SOLDIER'S KILLING JUSTIFIED.

Chicago, May 28.—The killing of Private Hennen Leroy, an escaping convict from Port Sheridan, was justified by the coroner today.

PENALTY IS DEATH.

Cleveland Man, Rejected Suitor, Convicted of Killing Sweetheart.

SHOOTING MOTHER; BURNS HERSELF

TRAGIC DEED OF A CHICAGO WOMAN FEARFUL OF RETURN TO INSANE ASYLUM.

MURDEROUS ASSAULT AT DENVER.

Denver, May 28.—Angered by comments made by an unknown negro plunger a knife into the breast of Fred Thompson, an employe of the Western Packing company, fatally injuring him, tonight.

WYOMING WOMAN KILLS TWO.

Rawlins, Wyo., May 28.—Believing that her husband was about to be killed by his two infuriated partners, with whom he was engaged in a desperate battle with knives, beer glasses and other missiles in a saloon, Mrs. Mattie Ringwood today shot and killed one of the men—A. E. Davis, and fatally wounded Webb Stone, the second. The woman was arrested.

BROOKLYN MAN DROWNS HIMSELF.

New York, May 28.—The body of Frank A. Sperry, of Brooklyn, former corporation tax commissioner, was found in the East river today.

HEAVY FROSTS IN MANY STATES

NO IMMEDIATE PROSPECT OF SUMMER ANYWHERE, SAY WEATHER BUREAU OFFICIALS.

LIVED ALONE IN A HOVEL.

Bellingham, Wash., May 28.—Mrs. Achia Clark, a native of Baltimore, and reputed to be worth several million dollars, died today, aged ninety. She lived alone for years in a tumble-down shack in North Bellingham.

AMBITIOUS PROJECT.

"U. S. Syndicate" Plans Railroad Connecting Continents.

SHERIFF AFTER TALESMEN.

Boise, Idaho, May 28.—None of the talesmen of the third special venire ordered in the Steunberger case were summoned today, but the sheriff expects to have them in court by Friday morning.

KUROKI SEEING CHICAGO SIGHTS.

Chicago, May 28.—General Baron Kuroki, with his staff, today began a four days round of sight-seeing in and around Chicago.

YELLOW FEVER IN HAVANA.

Quarantine Is Proclaimed, Effective Throughout the Gulf States.

New Orleans, May 28.—A maritime quarantine against Havana was announced tonight by the United States marine hospital service, and will act uniformly throughout the gulf states.

SHOOTING MOTHER; BURNS HERSELF

TRAGIC DEED OF A CHICAGO WOMAN FEARFUL OF RETURN TO INSANE ASYLUM.

MURDEROUS ASSAULT AT DENVER.

Denver, May 28.—Angered by comments made by an unknown negro plunger a knife into the breast of Fred Thompson, an employe of the Western Packing company, fatally injuring him, tonight.

WYOMING WOMAN KILLS TWO.

Rawlins, Wyo., May 28.—Believing that her husband was about to be killed by his two infuriated partners, with whom he was engaged in a desperate battle with knives, beer glasses and other missiles in a saloon, Mrs. Mattie Ringwood today shot and killed one of the men—A. E. Davis, and fatally wounded Webb Stone, the second. The woman was arrested.

BROOKLYN MAN DROWNS HIMSELF.

New York, May 28.—The body of Frank A. Sperry, of Brooklyn, former corporation tax commissioner, was found in the East river today.

KUROKI SEEING CHICAGO SIGHTS.

Chicago, May 28.—General Baron Kuroki, with his staff, today began a four days round of sight-seeing in and around Chicago.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Entered daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per month, by carrier, \$1.00; per year, by mail, \$10.00.

MARQUETTE, MICH., MAY 29.

Entered as second class matter of the second class in the postoffice at Marquette, Mich.

It is doubtful if even last May's forest fires could thaw out this blessed country.

Also Postmaster Webster of the Soo would like another term, just to show his enemies in politics that he can get it.

We wonder if Governor Warner had told all he knew would Mr. Hill of Saginaw have felt any better about the situation.

The state senate put the best face possible on the thing. It demands that President Roosevelt be a candidate for "a second elective term."

The Marquette County Gas & Electric company evidently believes that low rates mean more business. This is just what Governor Warner has told the railroad.

The Michigan state senate wants Roosevelt; Roosevelt would doubtless be every bit as much obliged if the senate would kindly arrange it so that it wants Taft.

Judging from the fury of excitement it has worked itself into, Lansing will need thirty days to recover from the effects of the president's twenty-four hour visit.

The administration rally in Tuscola was, from all accounts, an enthusiastic and successful affair. It remains to be determined, however, whether it will have any effect on the state senator who represents Tuscola.

If it wasn't for the postoffices and the necessity of getting renominated every second year the office of congressman would be a tidy and comfortable one—an office that almost anybody might be glad to fill.

Dolphine Delmas, Thaw's leading counsel, is to conduct the defense of two of San Francisco's alleged bribe givers.

And judging from the amount of noise we have heard about bribes, he will be able to fit his "dementia Americana" to the new case.

Granting that Lieutenant Governor Kelly, or some other candidate, could get only 25 per cent of the people's vote in a direct nomination run for governor, wouldn't he come a good deal nearer being the people's candidate than some choice of a convention who couldn't get even 25 per cent?

Our copperdom newspaper friends are reminded that while Deputy State Road Commissioner Rogers found some quartzite neighboring to the Marquette prison he also found trap rock, as he will make clear in his reports at Lansing.

Furthermore, the locality has not yet been as carefully surveyed as it might be. All the trap rock in the upper peninsula is not found in Keweenaw county, by any means.

If there are, as reported, any water commissioners who take the position that Marquette hasn't a water problem, there are also any number of excellent citizens who are sure it has, and who have the disposition to put some ginger into working out the solution, if the aforesaid members of the board will only create the vacancy that will give them an opportunity of doing so. In other words—

The Ishpeming high school is going to break an upper peninsula record this spring. It has an unusually large graduating class. When the question of commencement exercises was put up to its members, they decided with practical unanimity that they all wanted to be heard in the program. Thus the fond parents of the Hemetite City are to be regaled with four successive class nights, topped off by a formal commencement program. In popular parlance, "that's going some."

The school board members decapitated by Mayor Busse of Chicago are having a hard time trying to keep themselves in office. A Chicago judge has just refused to touch their case, taking the

ground that Mayor Busse had full power to remove them. Under circumstances like those existing in Chicago, the obviously wise thing for a board member to do is to step out when it is politely intimated to him that his room is preferred to his company.

The cigarmakers' strike in Cuba is a delicate compliment to the soundness of the American dollar. The strike has been in progress for three months, and one of its chief issues is the money to be used in the payment of wages. The factories want to pay in Spanish coin; the strikers demand American money. There is something more than a technicality in the difference. The American money has a 10 per cent greater purchasing power than the Spanish. This makes the demand equivalent to an increase of 10 per cent in wages, which the manufacturers are unwilling to concede. The strike has lasted so long that a short crop of real Havanas is in prospect. But there is no need to worry. We still have the stogie factories to fall back on.

The Queen City Commercial club was organized Monday night at a well attended meeting, and is fully officered and ready to proceed to adopt by-laws. In large measure the men officially connected with the club, if they were connected with previous associations of the kind served in the ranks, but they are men who have taken hold of the matter in earnest, and will doubtless give a good account of themselves. On them in no small measure depends the success or failure of the organization. They will have to do the planning and the pushing. Whenever they bring forward a meritorious project there is no doubt that they will be liberally and gladly supported by the business and other interests of the city. That there is a field for the new club is undoubted. The thing is for its officers to plan to fill the field, making a name for themselves by effecting genuine results.

The Marquette County Gas & Electric company has made the Ishpeming council an offer which, it is predicted, will result in the closing of a contract for street lighting, a thing which the former management of the plant and the council were unable to do. The new management offers an \$8 rate, against a \$9.19 rate previously in effect. This is for an all-night schedule, and is said to be equivalent to the \$6 rate, moonlight schedule, prevailing in Negaunee, where there is a municipal service. The company also proposes a new, and lower, rate for commercial lighting, being actuated in doing so by a desire to increase the business. The present rate is fifteen cents per kilowatt, with a 15 per cent discount to consumers using over fifty kilowatts a month. A fifty kilowatt customer, however, would consume some \$3.50 worth of electricity, so it becomes apparent that perhaps a majority of the customers have had to pay the fifteen-cent rate. The proposed new rate is to be eleven cents for the first fifty kilowatts; ten for the next fifty; nine for the next fifty and eight for all service over 150 kilowatts. This will be, in effect, a four-cent per kilowatt reduction for all consumers, and even a larger reduction for the larger consumers. The company hopes to more than make good any loss in revenue it suffers by the increase in business it expects to bring about. Its proposed new rates for Ishpeming are said to be as good as those prevailing at Negaunee. Ishpeming could not well expect anything better than that. Under the circumstances it is to be hoped that the company's expectation of a considerably increased business will be fully realized.

PULLMAN CAR RATES. Pullman car rates have been the subject of many complaints registered with the interstate commerce commission, and more are to follow. They are described by the complaining witnesses as being, in general, too high and as marked by inequalities in different parts of the country. Many specific examples of alleged abuses in rates are cited, and the complainants are thoroughly convinced that the subject is one demanding attention bearing some fair proportion to the amount given railroad rates.

A Chicago man, who has prepared extensive statistics on the subject, proposes the publication at an early date of an article styled "The Pullman company vs. the people," in which he will set forth the results of his observations. They support the counts enumerated above, inequalities of rates and a generally too high tariff of charges. The subject is one that may well receive attention. A large proportion of night travelers use the Pullmans. Solid trains of Pullmans in the night are the rule in many parts of the country. The Pullman company has a virtual monopoly of the sleeping car business. The tendency of monopoly is inevitably toward abuses, wherefore there is a particular reason for a close scanning of the Pullman tariffs.

The investigator referred to above makes the surprising statement that while Pullman rates are popularly supposed to be one-half a cent per mile in some parts of the country they are as high as two cents, or about as high as the railroad fares. From San Diego to Los Angeles, a distance of 272 miles, the rate is \$2. From Chicago to St. Louis, a distance of 272 miles, the rate is \$2. It was formally \$1.50, but was raised despite the fact that the old rate permit-

ted of good earnings. As an example of inequalities in rates it is instanced that the rate from San Francisco to Reno, Nev., a distance of 244 miles, is \$2, while the rate from Chicago to Minneapolis, 420 miles, is no greater. It costs \$3 to travel in a Pullman from Salt Lake City to Butte, Mont., against \$2 from Chicago to St. Paul, though the former trip is by a few miles the shorter. The costs of service in both cases are asserted to be almost identical.

Other complaints lie against the Pullman service. It is a generally held opinion that the charge for the "top shelves" should be considerably less than for the lower berths, and that a person taking a Pullman late at night should pay less for the privileges of the car than if he had taken it at the beginning of the run. The Pullman service has so far escaped close examination in the zest of pursuit of larger things, but it can well be scanned. It is a common carrier service, and its rates should be fair and equitable. The Pullman company is entitled to fair earnings, even big earnings, but it is not entitled to levy extortionate charges, and it should expect to adjust its charges to the service, and not get full rates for half service.

Cobalt Gossip

Frank Loring, consulting engineer, is making an examination of the Cobalt vein at the Buffalo properties, which, he reports, secured an option on the control of the stock.

Boston Cobalt is now operating two properties in Bucke township and has made several important discoveries. A new camp is being established on the property where excavating has heretofore been done by contract. With good properties and first class management Boston Cobalt should be classed as a near shipper.

The Nipissing management has started development work on a hitherto unexplored lot—No. 400. This lot is located between some of the heaviest shippers of the Cobalt camp and the veins of these producers may underlie the Nipissing property at least in some parts. On the west of "400" are the Temiskaming & Hudson Bay and Trestle, and to the southwest is the Coniagau, which in point of ore shipments since Jan. 1 is third, O'Brien and Nipissing holding first and second places respectively. The La Rose and O'Brien properties bound lot 400 on the east and the good showing made by these various properties is expected also to be reflected, in a degree at least, in the Nipissing. The Nipissing has increased its force to 350 men, of whom sixty-five are engaged exclusively in development work in various parts of the company's territory.

A mining engineer just returned from the Cobalt camp reports that the work now going on in that district is being carried on along scientific and practical lines, with the result that more is being accomplished in the way of developing the ore bodies than ever before. Numerous new veins have been discovered, notably on the Temiskaming, the Buffalo and the Buffalo properties. Through geological processes, which are technically known as "blind veins," or ore deposits which have not reached the surface, exist in this region apparently in great numbers. They are now being discovered by cross-cutting the known veins at depths ranging from a few feet to several hundred feet. These new discoveries have been found on the La Rose, O'Brien, Jacobs, Temiskaming and other mines recently, and the engineer predicts that ultimately the greatest masses in the camp will prove to be those hitherto unknown and undiscovered veins. He said that he was satisfied, after a very careful examination of the Big Pete claim, that the remarkable vein on that property would prove to be only an index of the results that might be expected to be accomplished by the cross-cutting and drifting now going on in the mines.

"It appears that mining men and others have been too free to express the opinion that values will not last in depth, but when they are cross-cutting and their opinions analyzed it is generally found that their deductions are drawn from a line of reasoning equivalent to: 'The veins are too rich to go down.' Results tell us, however, that the La Rose mine secured its highest grade of silver at the 250 foot level, which in all the veins exploited in the Nipissing company's property only one has lost its values where no attempt has yet been made to regain them. The history of mining teaches that values come and go within veins, and an intelligent manager states that he has particularly the case with regard to silver veins in their Cobalt ores, while many veins which have assayed but little on surface have come into good values in depth, the most conspicuous case of which is perhaps that of the Temiskaming. In connection with the multiplicity of veins which characterize the district it may be said that the ore in sight was doubled last year.

"That the ore deposits must be granted some depth can be argued in a line that will appeal to all. The country through the agency of glaciers has been ploughed off for hundreds of feet and it would seem unreasonable to suppose that this action had quit just at the petering out point of an area of ore deposits four miles long by two or three wide. In the light of all this it is not too much to see fifteen or twenty thousand workmen employed within the Cobalt area within the next ten years with the giant hoisting and like appliances which go to constitute modern methods in mining."

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY. There is probably no medicine made that is so well known with more implicit confidence than Chamberlain's Colic, Cholera and Diarrhoea Remedy. During the third of a century in which it has been in use, people have learned that it is the one remedy that never fails. When reduced with water and sweetened it is pleasant to take. For sale by The Stafford Drug Co.

"What shall we have for breakfast?" "Why Cudahy's Peacock Ham, and Eggs of course; they are always acceptable, especially at this season of the season." 11-27-eod

KOREA CHAPES UNDER YOKE.

Struggling Against Japan's Protectorate—Many Abuses Reported.

Tokio, May 28.—A reconstruction of the Korean cabinet has been decided upon. The change removes five ministers of the cabinet, and the ministers and other officers who have hitherto been the targets of assassins may have more peaceful times. The new premier is Yi, who formerly was minister of education.

When Japan assumed her protectorate of the Hermit Kingdom in November, 1905, she at once adopted a policy of drastic reformation and reconstruction of the whole system of Korean government. This task was entrusted to the experienced supervision of the veteran statesman Marquis Ito, whose first step after entering the country was to weed out all those officials considered to be hostile to the interests of Japan; it was thought that this purgation would render conspiracy less possible and tend to facilitate the task of administration. So far that hope has proved vain. With the advent of Marquis Ito as resident general, the sovereignty of Korea passed into the hands of Japan, and the emperor virtually ceased to be the ruler of his country. Not only was he deprived of all authority within his kingdom, but he was confined to a position in which he is unable even to consult with anyone except by the permission of the Japanese authorities. More than a hundred Japanese soldiers are always on guard around the palace, and no one is permitted to enter without a pass from the proper authority.

The changes which Japan has introduced into the administration of Korea are already very numerous. The government of the country and the management of its foreign relations are completely in the hands of Japanese officials. The judiciary is also practically Japanese, for Japanese judges now sit on the Korean bench, and Japanese lawyers plead at the Korean bar. The emperor is reduced to a mere figurehead, and his jurisdiction over Korean subjects living in China, and lately has had a clash with the Chinese authorities by trying and sentencing a Korean subject, in Moukden. The post offices of Korea are Japanese; the stamps used on the letters are those used in Japan. Not only so, but it is complained that letters addressed in the Korean language are being refused transmission in the mails, which is a great cause of grievance, as very few of the natives understand any but their own alphabet.

All Korean currency has been called in by the authorities, and Japanese coinage is now the circulating medium. All railways, mines, timber lands, and government property of every description are in the hands of the Japanese. The natives are not allowed to own land or territory they fancy and appropriate it without due remuneration to the proper owners. The proof of title to ownership is admittedly difficult in Korea, and it is alleged that the Japanese are making that acquisition the device and accepting the payment is not the real owner, the latter being put off with an acceptance, under compulsion, of a few pence an acre. Naturally an investor is willing to sell the land cheaply to the real owner, and the complete title is made that no one can take sufficient precaution to prevent owners of land from thus being robbed of their property. Large districts in Korea are said to have been acquired in this manner, the present occupants having no title but a nominal penny for the property.

And there is little evidence of improvement. There are at present more than one hundred thousand Japanese in Korea, exclusive of the large retinue of officials, the military, and an increasing flood of immigrants still continues. The majority of the immigrants to Korea are small traders, artisans and laborers, who scatter all over the most desirable parts of the country, monopolize the trades and occupations of the natives, and in doing so assume an attitude toward the Koreans that is much to be deplored. Large numbers of Japanese agriculturists are settling down in the more fertile valleys of Korea, and are fast pushing the native cultivators and their property rights to the verge of extinction. It is said that more than a thousand villages have already been affected in this way. Most of Japan's energies in her new territory have so far been directed toward forcibly suppressing Korean discontent and rioting. So long, however, as the natives are being abused and imposed on without penal consequences to the aggressors they cannot be expected to bow humbly to the new conditions. That individual cases of oppression or insult will incidentally occur may be inevitable, but the authorities who do not suppress such conduct with condign punishment are without excuse if the consequences are insurrection and revolt.

A tremendous scandal has recently occurred in Korea over the alleged theft of thousands of dollars from the Japanese treasury. The Japanese government has demanded that the Korean government should reimburse the Japanese treasury for the amount of the theft. The Korean government has refused to do so, and the Japanese government has threatened to withdraw its troops from Korea. The Japanese government has also demanded that the Korean government should pay for the damage done to Japanese property in Korea. The Korean government has refused to do so, and the Japanese government has threatened to withdraw its troops from Korea.

BACK GIVES OUT. Plenty of Marquette Readers Have This Experience. You tax the kidneys—overwork them—They can't keep up the continual strain. The back gives out—it aches and pains; Primary trouble sets in. Don't wait longer—take Doan's Kidney Pills. Marquette people tell you how they act. Thomas Steingelin, living on Grove St., near Seventh St., Marquette, Mich., says: "My back used to be my weakest part, and every time I took cold it settled there and there came a dull grinding pain in the loins, varied with sharp shooting twinges around the kidneys. Though I was never confined to my bed with this trouble I had to lose time from work and the suffering and annoyance was great. Seeing Doan's Kidney Pills recommended I got a box at the Stafford Drug Co. and began using them. They helped me at once and in time completely cured me. I have not had a backache nor any of that feeling of weakness in the loins since I used them, and am certainly glad to recommend Doan's Kidney Pills to other sufferers."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y. sole agents for the United States. Remember the name—Doan's—and take no other.

"Let us have some Cudahy's Peacock bacon and calves liver for supper Mamma," says young and old. (11-27-eod)

City Brevities

Today's weather: Partly cloudy with possibly showers; rising temperature. Yesterday's temperatures: Seven a. m., 41 degrees; noon, 45; 7 p. m., 43. Maximum, 46 degrees; minimum, 41.

Rev. Bersell, of Chicago, is the guest of Marquette friends.

Carl B. Bostrom, of Rock Island, Ill., is visiting in the city.

Mrs. J. A. Williams has returned from Tremont, where she spent a week with friends.

Sunday hours will be observed at the postoffice tomorrow. There will be no delivery of mail.

Mrs. H. Foad has returned to her home at Superior after a visit with Marquette relatives.

Edward Ivan Kovola and Pauline Rantala, both of Ishpeming, have been granted a license to wed.

Miss Maude Ewing has returned to her home at Sheboygan, Wis., after a visit with Marquette friends.

Marquette council Knights of Columbus, at its meeting last night received thirty applications for the new class which is in process of formation.

Special services will be conducted at the Salvation Army hall this evening again. They will be in charge of Major Merrivether and Staff Captain Watt.

Dr. Gregory of Marquette and Dr. Sawbridge of Stephenson, secretary and treasurer, respectively, of the Kimberly-Willey company, were Marquette visitors yesterday.

A supper will be given at the Swedish Lutheran church the evening of Decoration Day by the ladies of the congregation. In the afternoon, ice cream, coffee and cake will be served.

The park, cemetery and street commission adjourned subsequent to approving the minutes of the previous meeting at its regular weekly meeting last evening. Owing to there not being a full attendance no new matters were taken up.

Court St. Jacques, No. 47, Association Canado-American, will entertain with a "prize" dance at Legion Hall tonight. Arrangements have been made to care for a large attendance, and a jolly social time is promised by the committee. Sweet's orchestra will furnish the music. Refreshments will be served.

An operetta will be presented at the Baraga auditorium this evening by the choral classes of the parochial school. The children have been rehearsing for this event for the past several weeks, and will give a finished performance. The music is said to be very pretty. Admission fee of 25 cents will be charged. The curtain will rise at 7:30 o'clock.

Sunday Service Postponed—Owing to the backwardness of the spring the Sunday train service on the Cleveland-Cliffs company's railroads will not go into effect until at least June 9, and it may be a week later before it is commenced. This applies to all the company's railroads.

Coming Baseball Game—The Clerks and the Machinists will play at the new fair grounds tomorrow the weather permitting. The diamond is now in rather bad shape but a day or so of sunny weather would fit it for play. Sunday the Rivals and the Juniors will clash at the same grounds. This game was scheduled for last Sunday but was postponed on account of the weather.

An Early Agent—The following item appears in a recent copy of "Insurance Truth," a New York insurance publication: "Peter White, agent of the Home of New York at Marquette, Mich., since 1854, was a recent visitor to this city. Peter White, one of the first agents in the entire West, knew Pere Marquette when he was an infant in arms, and used to go skating with other early settlers over the present site of Detroit."

Many Die in Past Year—According to information received by a Marquette veteran from a comrade at Grand Rapids, agent the observance of Memorial Day, the death rate at the Soldiers' home this year has been large, the veterans passing away at the rate of one a day during February. The total number of deaths since last Memorial Day was twenty-eight. This year the graves at the Home will be marked with the national colors and plants in full blossom.

Death of Hugh Blaine—Relatives here were advised yesterday of the death at Barrows, Sask., of Hugh Blaine, formerly of this city. The demise was due to pneumonia, and came as the climax to illness of only a few days.

Blaine was superintendent of the Deer Lake Lumber company. His wife, formerly Miss Nettie Clark of Marquette, survives him. Mr. Blaine left here some eight years ago. He had been in the employ of F. W. Read & Co. and had formerly lived at the Soo. It is not known when the funeral will be held or whether the remains will be brought here for burial.

To Give a Kirmis—Mrs. Pettie and sister Miss Jessie Palmer, are in Houghton for the production of a kirmis to be held in the amphitheatre the last week of June. The affair promises to be one of considerable magnitude and will contain many interesting features among them a tea by Japanese girls, a country store and postoffice, a Dutch lunch booth, a real old fashioned side show, fancy dances of various nations. The kirmis will be given for the benefit of Trinity Episcopal church.

To Attend Divine Service—Zenith lodge No. 35, K. of P., of Ishpeming, will join Marquette lodge No. 6 in attending divine service in the First Methodist church, of this city Sunday morning June 2. In his accepting the invitation on behalf of Zenith lodge, J. A. Blackney, keeper of records and seals, states that the Ishpeming delegation will leave for this city on an early morning train and that 100 will attend; also that a committee on arrangements has been appointed that will advise with the Marquette lodge.

Eowern Known Here—It is probably not generally known, for it is many long years since the great catcher has been seen in this locality, but Frank Bowerman, of the New York National team, was at one time a resident of the upper peninsula, and back in 1892 played a game in this city, wearing the uniform of a Hancock team. Next to Cristie Mathewson, Bowerman has probably had more to do than any other player with keeping the Giants near the top of the list. While possibly not the best catcher in execution in the country, he is un-

questionably far and away the greatest diamond general, and Mathewson's success as a pitcher is in a great measure due to Bowerman's coaching. When Matty first started to pitch four years ago Bowerman caught all his games, and even now New York's star twirler never performs so well as when the veteran backstop is behind the bat.

Recalls Great Snow Storm—The intermittent snowfalls of the past few days have recalled to many residents the fierce storm of May, 1903. After a period of warm and balmy weather a snow storm suddenly started on May 23 and within three days nearly twelve inches had fallen. As at that time had at that time gotten a much better start than this season and the damage to gardens was considerable. The snow banked so in some localities as to seriously interfere with traffic and nearly all trains into the city were delayed.

Endeavors to Gather—Marquette members of the Young People's society of Christian Endeavor have received programs of the twenty-third international convention of the society, which will be held at Seattle, Wash., July 10 to 15. The gathering will be presided over by Dr. Francis E. Clark, founder of the order, and prominent speakers from all over the globe are expected to be present. "The Messiah" will be given Saturday evening, July 13, by a chorus of 1,500 voices and an orchestra of 150 pieces. Every state will be represented on the program by a speaker.

May Hold Match Race—Marquette horsemen are trying to arrange a match race for the Fourth of July between Michael W. Shea's mare, Texas Jessie, and Air Motor, owned by A. C. Shepard, of Standish. Mr. Shepard has announced his willingness to bring his trotter to this city if the event can be arranged. Texas Jessie has a record of 2:19 and is popularly credited with being able to go much faster. Air Motor was the favorite at the races held in this city last fall. She was entered on three successive days and won every even in which she started. As at that time was the Shepard horse driven out and it is problematical just how fast she can go. Owing to the unpropitious weather little has been done of late toward the organizing of the proposed match race. Mr. Shepard is willing to come any time that he can be guaranteed enough colts to train to make the venture a success.

NOTED FIGHTER AN EVANGELIST

STORY OF CAREER OF "TURKEY POINT" BILLY SMITH RECALLED DURING SALVATION ARMY RALLY IN THIS CITY.

Billy Sunday, once a famous out-fighter on the Chicago team, when under the management of Captain Adrian Anson it was winning pennant after pennant, is now a no less famous evangelist, and, incidentally, as he has a long head for business, credited with having a bigger income than the president of the United States. Sunday, however, is not the only athlete who is gaining name and fame as an exhorter. Captain Neilas, of Escanaba, who was in attendance at the Salvation Army rally in this city, yesterday called up the instance of Billy Smith, once known under nom de guerre of "Turkey Point" Billy Smith, who a few years ago was one of the most famous featherweight boxers in the country. Smith is now a Salvation Army envoy in New York and one of the ablest officers in its ranks. A man of good education and a fine address he is credited with winning many recruits to the cause which he now represents. Endowed with a small though powerful physique, and indomitable courage, Smith took to the prize rings because it promised the largest returns for the smallest expenditure of energy. He met Benj. "Beet" Egan, the Santry, Tommy White and other lights of the pugilistic arena, soon sported diamonds as large as small onions and took unto himself a better-half in the shape of a variety actress.

Walking through the streets of Philadelphia one day Smith and his wife stopped to listen to an open air meeting of Salvationists. Both were converted and joined the ranks. Smith threw himself heart and soul into the cause and was soon wearing shoulder straps. Subsequently he was sent to take charge of the post at Sheboygan, Wis. Sheboygan had a variety theater run by a man by the name of Radke. This variety show, which was subsequently destroyed by fire, said to have been incendiary origin, was an eye-sore to the people of the city, but Radke had a "pull", and in addition bore the reputation of being a man who feared neither God, man or the devil, and was liable to take summary vengeance on any one who crossed his wishes.

About the first thing that Smith did after his arrival in the city was to score Radke and his resort. Furthermore he announced from the rostrum that he wasn't afraid of Radke and from the manner in which the latter's place had been tolerated he assumed that everyone else in town was. His audience knew that Radke would not allow the challenge to pass and felt sorry for Smith, as Radke was a giant in size and strength. When Radke heard of Smith's remarks he took the war path without delay. Smith was unloading a trunk at the Northwestern depot the next day and had his coat off, when Radke hove in sight. Radke had such a personal contempt for the physical prowess of his opponent that he spent some time in profanity before cutting loose. As he spat out his last oath several of his teeth came with it, for Smith had driven a left-hander straight into the big man's mouth. Then he stepped back measured his distance and knocked Radke down. By standers subsequently asserted that Smith knocked Radke down so many times they couldn't keep track of them. When Radke finally got the opportunity he ran for his life. The battle made Smith a hero in Sheboygan. His corps grew and prospered. When he finally left the city he took with him the best wishes of its people.

Smith's work is now in the tougher districts of New York. He knows the under world thoroughly and relies upon his courage and strength to save him in a pinch. Few men are of more value to the cause which he serves.

A NEW SALAD.

If a genuine surprise is wanted, says the Bohemian let the hostess copy the invention of Miss Sara Safford and astonish her guest with a combination of peppers stuffed with grapes. To prepare this composition take large green peppers, cut off the tops and carefully remove all the seeds. Then stuff them tightly with Malaga grapes that have previously been halved, seeded and moistened with a light mayonnaise dressing. When the peppers have been filled the tops are replaced that they may act as covers, and the peppers are then sent to the icebox to remain for about two hours, when they may be served on a body of watercrates.

MARKETS

SLUMP IN WHEAT.

Rains and Warmer Weather in the West Soften the Market.

Chicago, May 28.—Support which at no time was apparent in yesterday's wheat market was offered today, with a change in the complexion of the speculation as a consequence. The demand which developed after the support became effective was largely from the uncovered short interest.

Reports from the wheat belt of rising temperatures were of great sentimental effect in Wall street. The weight of the selling to take profits in wheat yesterday in the fact of unfavorable weather conditions was eloquent of the extent of the purely speculative buying which has put up the price of the cereal. The weekly bulletin of the weather bureau, issued today, was not reassuring. Wheat, however, continued to decline. The movement of the price of wheat served to soothe the Wall street apprehension of some of the crop scare reports. These continued in full tide today from the domestic crop regions.

The local money market was unaffected, and for short time loans was slightly easier. For time loans for the longer periods the offerings are exceedingly small. There was much discussion of the expected tenor of President Roosevelt's forthcoming Memorial Day speech at Indianapolis, and some buying of stocks was accompanied by professional confidence that the speech would improve the condition of the sentiment. The buying was not energetic at any time, and it steadily subsided, so that the bears had no difficulty in forcing prices back in the last fifteen minutes of trading, some stocks falling to the lowest of the day. The closing was distinctly weak.

NEW YORK STOCKS.

New York, May 28.—Support which at no time was apparent in yesterday's stock market was offered today, with a change in the complexion of the speculation as a consequence. The demand which developed after the support became effective was largely from the uncovered short interest.

Chicago, May 28.—General Overseer Voliva, who ousted John Alexander Dowie from control of Zion City, has been ordered by Receiver Hately to vacate all leases of buildings May 31. This action was taken today as the climax to a bitter quarrel between Voliva and the president of Zion City bank. Voliva presented his check at the bank for \$1,800 and demanded payment at once. The bank officials declined to comply until he had some advice from the receiver. When informed of Voliva's action, Receiver Hately ordered the cashier to withhold all moneys from Voliva and then notified Voliva that the leases held by him would expire at the end of this week.

CRISIS REACHED AT ZION CITY

OVERSEER VOLIVA, WHO OUSTED DOWIE, NOW ORDERED TO VACATE HIS LEASES.

Chicago, May 28.—General Overseer Voliva, who ousted John Alexander Dowie from control of Zion City, has been ordered by Receiver Hately to vacate all leases of buildings May 31. This action was taken today as the climax to a bitter quarrel between Voliva and the president of Zion City bank. Voliva presented his check at the bank for \$1,800 and demanded payment at once. The bank officials declined to comply until he had some advice from the receiver. When informed of Voliva's action, Receiver Hately ordered the cashier to withhold all moneys from Voliva and then notified Voliva that the leases held by him would expire at the end of this week.

PLEA MADE TO CONSCIENCE.

Concord, N. H., May 28.—In accordance with the directions of Judge Chamberlin, of the United States district court, were filed today by counsel for the plaintiffs and counsel for the trustees of Mrs. Baker G. Eddy in the superior court proceedings with regard to the motion of the trustees for permission to interfere and be substituted as plaintiffs in the original suit to secure an accounting of Mrs. Eddy's property. The counsel for the plaintiffs, former Senator Win. E. Chandler and Messrs. Martin and Howe, filed their citations in due form. Later in the day, the trustees, counsel for the trustees, filed their citation in the form of a brief which concludes as follows:

"The representatives and friends of Mrs. Eddy respectfully pray that the chancellor, who, by the proceedings, is charged with the protection of her person and property right, shall exercise his own conscience, whether the protection of Mrs. Eddy's person or property right, whether her interests, whether her health and her peace of mind are being promoted by the proceedings, and have regard for the importance of the fundamental rights of a citizen here protected, that such orders and decrees may be made as justice may require."

YSELETA CHURCH BURNS.

Was Oldest Edifice of Its Kind in the United States.

Ysleta, Tex., May 28.—The oldest church edifice in the United States has been destroyed by fire. The ruins of adobe and stone are to be removed, under the direction of the Catholic church authorities, and a thorough search made for hidden treasure, which according to legend had been buried beneath the foundations of the building. The records go back to prove that Ysleta is older than St. Augustine, Fla. In the records of the great cathedral of Madrid, Spain, is found the report of Marcus de Niza, a very large trader, and who is now known as the Rio Grande. He says that he followed the road that he left for his milk to take. Part of this manuscript is written with Spanish characters, and his one forefinger nail for a pen. He says that in 1537 across the Rio Grande he found the village known as Ysleta, occupied by the Pueblo Indians, whose traditions all point to their having been in the ancient Aztec race, or to a people of even more remote origin.

Franciscan missionaries arrived at Ysleta four or five years later, and the mission church which was destroyed by fire, was built on the site. It was completed about 1557, and it was the most unique mission building in the southwest. Owing to the fact that it was remotely situated it was seldom visited by tourists, and little has ever been written about it. It was a very large structure, and built with the idea of serving as a fortress in case of attack by Indians, as well as for worshiping purposes. The walls were four feet and six inches thick.

It was the boast of the worshippers that the building which stood at the corner had shed their light continuously for more than 350 years. It was one of these candles that caused the destruction of the church. A piece of tapestry was wafted against the blaze by the wind and caught in the rafters, which means that the altar was afire. It was as if a tinder and the flames quickly spread to the other woodwork of the edifice. The interior was soon a roaring furnace. The town has no means of fighting fires and the people were forced to stand idly by and watch the building go to its doom. There is great sorrow among the people on account of the destruction of the historic edifice.

The membership of the church embraces many Pueblo Indians, Mexicans and half-breed Spaniards. It is one of the most picturesque crowd of worshippers to be found anywhere in this country. The early records of the church show that it was one of the richest in the New World. It is believed that half of the treasure which is reported to have been buried, either under its floors or in the ground adjacent to the ruins. A few years ago while excavating in the grounds adjacent to the edifice a large sarcophagus of solid silver was discovered. It was a unique pattern and artistic work of art. It bore Spanish dates of several centuries ago. The Catholic church authorities took possession of the lamp, and it is said to have been taken to the city of Mexico and deposited with other treasures of the church. It is supposed that this lamp and possibly a vast amount of other treasure were buried to keep them from falling into the hands of Indians. It is known that many Indian raids were made upon Ysleta in the early days, and in fact, as recently as thirty years ago, the Pueblo here were always true to their religion. They assisted the Mexicans and Spaniards in defending the church and town when these attacks by Apache and other hostile tribes were made upon the place.

WILL GET CLOSER TO THE TOLER.

Denver, May 28.—The following resolution, adopted today by the general assembly of the United Presbyterian church, indicates that the church will make an effort to get closer to the tolerer: "We desire the confidence of workingmen everywhere, and deeply deplore any suspicion of untrustworthiness. We invite Frank Coe, as how, as a church, we may minister to workingmen and their cause. We urge upon all our ministers sympathetic study of the problems of labor, and earnest effort to establish cordial relations between themselves and the workmen of their respective communities."

UNITED PRESBYTERIANS DECLARE FOR MORE CORDIAL RELATIONS WITH LABOR.

Chicago, May 28.—The new official freight classification of the railroads in the Central Freight association will be filed with the interstate commerce commission this week, and will become effective August 1. The general advance in rates caused by the changes in the minimum weights and classifications is less than 6 per cent. The cancellation of commodity rates, which the articles subject to the classification rates, affects sixty commodities. Lumber, brick, cement, lead, paper and wall and stater are the principal items.

ENGINEERS MEET AT DALLAS.

Dallas, Tex., May 28.—The Brotherhood of Locomotive Engineers and the Grand International auxiliary began a three days session here. W. E. Fitch, president of the insurance department of the brotherhood, gave an account of that department, stating that since its organization in 1867 it has paid out more than \$17,000,000.

ARMED WITH NOTEBOOKS.

Japanese Naval Officers Improved Their Time at Washington.

Washington, May 28.—When the international fleet was assembled in Hampton Roads for the opening of the Jamestown exposition, the wardrobe of officers of the several ships came to Washington in groups of six or more and were entertained for three days at the expense of the government. Each group was escorted by an American naval officer, who left it largely to his guests as to how the few days should be spent.

All of the foreign officers enjoyed themselves thoroughly, and the completeness of the arrangements for their entertainment is another tribute to the thoroughness with which the navy generally discharges the duty imposed upon it. But it is probable that the Japanese officers combined profit with pleasure during their Washington visit in a way that enabled them to take back with them more real information than did the British, German, French, Austrian, Italian, Brazilian, Chilean or Argentine officers, who were also guests of the government about the same time. The Japanese officers, after fitting themselves out with what they termed "real American" hats and ties, then drew from their pockets carefully prepared memoranda of what they wished to see at the American capital. Their program included half a day at the naval gun factory, for example, half a day at the Smithsonian institution, a day at the Congressional observatory, and in other words, the Japanese officers had evidently been instructed how they should spend their time, and they came to Washington armed with notebooks. When they left their hostesses full, but each of the Japanese officers was also a sober judge. They enjoyed themselves, but they put in their time in a way that made their visit of real benefit to their navy.

BIGGEST BRIDGE IN THE WORLD.

To Join New England and the South at New York.

New York, May 27.—Plans for the huge East River bridge of the New York Connecting Railroad have been filed with the municipal art commission for its approval, in accordance with the provisions of the charter granted to the company. Only a part of the great steel structure, the new bridge will surpass all ever built or planned to cross the East river, and will be the longest and heaviest steel bridge in the world. First of all the bridges to meet the eye of the passenger from the Sound, three years ago, the Hell Gate, Ward's island, Little Hell gate, Randall's island and the Bronx hills.

When it is completed and the last spike driven in the four tracks to cross the river for the first time there will be an all rail connection through New York, between New England and the South. The all rail connection will save fully an hour and a half or more, and much trouble. The bridge has been designed by Gustav Lindenthal, with whom was associated the firm of Hobbs, as consulting architect. Huge arches will be erected on the islands over which the bridge passes, and the work of construction will proceed from these foci in the same manner as the work on the Blackwell's island cantilever.

There will be a steel arch span of more than a thousand feet across the turbulent Hell gate between abutments. The abutments will be monumental stone towers, dividing the bridge proper from the steel viaduct which forms the approaches. They will be of granite and the base and moulded concrete above, reaching up some two hundred feet. They will contain various small rooms needed for the operation of the railroad.

The tracks themselves will be 140 feet above high water, five feet higher than on the other East River bridges, which will pass through steel arches, which will rise 150 feet higher. Some of the steel members of these arches will be 16 feet in diameter and weigh 100 tons each. Eighty thousand tons of steel will be used in the construction of the bridge. The carrying capacity of the new bridge will be about twenty times greater than that of the old Brooklyn bridge, or equal to four lines of the heaviest freight locomotives.

Of the four tracks, two will be for passenger and two for freight service. The passenger tracks, by way of a cut-off in Queens county, will connect with the Pennsylvania railroad tunnels and its central station at Thirty-Third street and Seventh avenue, Manhattan, and the Long Island railroad and its seashore resorts and city station, and all of these lines with the New York, New Haven & Hartford and other New England lines. The freight tracks will run across Queens and with the Long Island railroad, will form a big loop around Brooklyn. Through freight from New England for the South and West will be carried over this route and across New York bay from Bay Ridge to the city. This will be two distinct routes, and the two classes of traffic, and neither will interfere with the other.

Brooklyn, perhaps, will be the greatest gainer from the completion of the connecting railroad and the river tunnels. The freight tracks will run across Queens and Manhattan island and over the East river to the New York Connecting Railroad bridge.

NOTICE TO TAXPAYERS.

City Controller's Office, Marquette, Mich., May 18, 1907. Notices is hereby given that the assessment roll of the taxable property of the city of Marquette for the year 1907 will be in the hands of the board of review on Monday, June 3, 1907.

Said board of review will convene at the common council room in the city of Marquette on Monday, June 3, 1907, at 9 o'clock a. m., and will be in session each day thereafter up to and including Saturday, June 8, 1907, for the purpose of reviewing and correcting said assessment roll.

Every person having property in the city of Marquette is requested to call at the common council room during the sessions of said board of review and inspect said assessment roll, in order that all errors which may have been made in said assessment can be corrected.

THE CHANGE OF LIFE.

Sensible Advice to Women from Mrs. Henry Lee, Mrs. Fred Certia and Mrs. Pinkham.

MRS. HENRY LEE

MRS. FRED CERTIA

Owing to modern methods of living not one woman in a thousand approaches this perfectly natural change without experiencing a train of very annoying and sometimes painful symptoms.

This is the most critical period of her whole existence and every woman who neglects the care of her health at this time invites disease and pain.

When her system is in a deranged condition of she is propped to complete or congestion of any organ, the tendency is at this period likely to become active and with a host of nervous irritations make life a burden. At this time also cancers and tumors are more liable to form and begin their destructive work.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, melancholia, dread of impending evil, palpitation of the heart, irregularities, constipation and dizziness are promptly heeded by intelligent women who are approaching the period of life when this great change may be expected.

Mrs. Fred Certia, 1014 So. Lafayette Street, So. Bend, Ind., writes: Dear Mrs. Pinkham—

"Lydia E. Pinkham's Vegetable Compound is the ideal medicine for women who are passing through this critical period should rely upon Lydia E. Pinkham's Vegetable Compound. If there is anything to be said in your case you don't understand write to Mrs. Pinkham, Lynn, Mass., for advice. It is free and has guided thousands to health."

When a medicine has been successful in restoring to health, actually thousands of women, you cannot well say without trying it, "I do not believe it will help me." It is your duty to yourself and family to try Lydia E. Pinkham's Vegetable Compound.

Mining News

Mohawk directors meet early in June to take action on the forthcoming dividend, which will be at least \$4 per share.

The Michigan Mining company is understood to be earning net monthly profits of \$25,000, or at the rate of \$3 per share per annum. This money is being used for construction of a stamp mill and for the further opening of the mine.

The production of Gilman & Arizona for the current year, allowing for interruptions and diminutions in output, should be 38,000,000 pounds. The cost according to the last annual report is about five cents per pound, which means a profit of \$38 per ton on its 290,000 shares or a margin of \$18 per share over present dividend requirements, an addition to surplus of \$3,600,000 per annum. There is no other copper company in the country which will feel less the decline in the copper metal when it comes. Even should copper decline to 18 1/2 cents a pound which is likely to be at least the normal if not a low price for copper hereafter, the company can pay dividends of \$2 per share per annum and still add over \$1,000,000 to surplus. Last year, with receipts of \$24.13 per share, net and \$13 paid in dividends on an average price of 18 cents

CATHOLICS NOT FOR CELIBACY.

New York Clergy Discredit Story of Petition to the Pope.

New York, May 27.—Prominent Catholic clergymen of this city disbelieve the story from the Gil Blas of Paris, alleging that there is a marked desire among the French clergies to persuade the pope to abolish compulsory celibacy among priests. Gil Blas stated that a petition had been drawn up and sent to Rome signed with three thousand names. New York clergymen, even those who did not care to be interviewed, evidently regarded the report as part of the anti-church war being waged by the French socialists.

"It is not a matter to be talked of," said Monsignor Lavelle, rector of St. Patrick's cathedral. "I do not think that you will find many people willing to discuss it. There are people who must be sensible about it, but they are likely to happen in America as in France. I had to talk to a man on that very subject only some eight months ago. But this much I know: there is no law among any people more popular with those who are not than the celibacy law among the clergy of the Roman Catholic church. We have no protest to make against it. I do not think that there is anything to be said regarding the incident, other than to brand it an utter falsehood."

Rev. Father Mooney of the Church of the Sacred Heart expressed substantially the same opinion. "I do not like to say so out and out," he remarked, "but it does look very much as though it were false. They are as likely to be one of the moves against the church which are constantly being instituted in France. The clergy there are as fine a body as there is in the church anywhere. They have been noted for centuries for piety and strict morality. To be sure, there may be occasional backsliders from

TODD EXPEDITION SAILS.

American Scientists to Photograph Mars from the Andes.

New York, May 28.—The Lowell expedition, headed by Professor Todd of Amherst Observatory, and a camera especially designed for the photographing of the planet. This will be the largest telescope ever used in South America, and after we have reached some high point in the Andes where the atmosphere is clear and steady we will mount our telescope and begin operations. Is Mars inhabited? That is a question my wife has often asked me, here do you know I have never been able to answer it. May be when I come back—well, we will wait and see."

Speaking of the plans of the expedition, Professor Todd said: "From Panam we will proceed to Lima, Peru, and from there ascend 13,000 feet high in the Andes, where the atmosphere is noted for its clearness and steadiness. The high power lenses which we will use, magnify the air and its vibrations the same number of times as the object upon which the telescope is focused, and in the Andes we will have little vibration to interfere with the observations. We will first test the air with a small telescope, and after deciding upon the spot we will mount the telescope on which the telescope is focused, and we will take these observations in the high deserts of northern Chile. Later on we will observe the annular eclipse of the sun, which takes place on July 10."

Logan & Bryan's Wheat Summary.

Writing from Chicago, yesterday Logan & Bryan said of wheat: "Wheat prices are back where they were Saturday. The welling was overdone then and cold weather made a good many of the shorts pay for pressing the market on the dip. There is no likelihood that such weather as was shown on the map Monday will again be experienced, but the pit conditions now are much the same as they were late in the week. The reaction of the market from its sharp advance of yesterday, and the further break today are entirely the result of long wheat pressing on the market. The forecast for rising temperatures and showers over the west tonight had much to do with the bearish feeling of the local trade during the day's session, and no doubt caused considerable short selling. Many of the outsiders who have been most active traders for weeks got out when the market was over the dollar mark. They are showing the right kind of judgment now by not getting in too soon again on the buying side, until the better weather conditions are discounted. The foreign crop review of today was a little less bullish than heretofore. Indiana and Ohio points reported a hard freeze last night, and claimed that advanced wheat fields were injured. Jones makes the statement that he sees but little chance for half a crop in Kansas and 75 per cent of a crop in Nebraska. The harvesting machinery people are reporting that the sale at Kansas points are 40 per cent less than last year. There was a great decrease of nearly 6, 300,000 in the world's visible supply for the week. The United States and Canadian points decreased 4,258,000. Should very fine weather, with warm rains, spread over the entire west there may be further liquidation and short selling, but such tactics will very soon put the market in a shape where the biggest buyers in the trade will be ready to take hold again."

GETTING SLOW START.

Weather Interfering With Work on Foundation for New High School.

Contractor Solar's men have not made very good headway since starting work on the foundation for the new high school building on Division street. The weather has been so bad during a majority of the days since they arrived that they have not been able to put in more than half time. A few hours were worked Monday, but nothing could be done in the trenches yesterday.

Jabez Stephens, who has the contract for the excavating, is working several men and three or four teams. His work will be completed for some days, and if the weather does not improve Mr. Solar's crew will do well if they get in their concrete footings inside of ten days. There is considerable water in the opening, necessitating the use of a steam pump. Most of the lines for the concrete have been drawn and some of the frames are in position.

The basement walls will be concrete up to the grade line, extending from ten to thirteen feet in depth. From the grade line to the brick there will be about five feet of stone. Considerable stone was recently hauled from near where the city crusher formerly stood, southwest of Frenchtown, though more than fifty per cent of the stone to be used came from the old foundation.

William Thaxton is superintending the work for the school board. He did similar work at the new grade school on the same lot and also looked after the city's interest in a similar capacity on the Carnegie public library. Mr. Thaxton is a stone mason and bricklayer and he has had much experience in this work, he will inspect at the school.

"A YANKEE TOURIST"

Henry W. Savage's Newest Musical Success, Here Friday Evening.

At Ishpeming theater Friday evening one of the prettiest and most interesting comic operas ever written will be seen when Raymond Hitchcock, that long popular comedian, will be seen in Henry W. Savage's newest musical success "A Yankee Tourist." If this clever comedian has been given a piece of mediocre standard he could provide an evening's keen enjoyment, but "A Yankee Tourist" is written especially for his peculiarly droll style by Richard Harding Davis, who is an author and war correspondent of much fame, and it is said that Mr. Hitchcock was never cast more strikingly during his stage career. Wallace Irwin, prominent principally because of his verse published in Collier's and other magazines, has provided the lyrics and of fine character they are. The music comes from the talented Alfred G. Robyn, best remembered, perhaps, for his score of "The Yankee Consul" in which Mr. Hitchcock gained success of a decided and lasting nature. Critics have said that Mr. Robyn's latest effort is even more praiseworthy than his triumphs of former seasons and the characteristic style of his music in "A Yankee Tourist" seems to have found popular approval at a bound. There are some score or more of musical numbers, all of which are characterized by a marked strain of originality, not always present in musical offerings of today. Mr. Savage has selected a cast for the support of Mr. Hitchcock which is unusual in its strength, including as it does such players as Flora Zabelle, Helen Hale, Susie Forrester Cawthorne, Eva Fallon, Walter Lawrence, Herbert Cawthorne, Wallace Berry, Harry Stone, Phillips Smalley, Percy Parsons, E. E. Phillips, Herman Ruckpe, M. Hale, and others well known in the realm of comic opera. The piece has been mounted with the elaborateness characteristic of Savage productions, the chorus is pretty and the whole opera will prove one of the most satisfactory seen here for a long time.

MAY BUY CAMP GROUNDS.

But Legislature Is Not Likely to Pass Bill at Its Present Session.

The military board of the Michigan National Guard has not yet decided to ask the legislature to pass a bill authorizing the state to purchase a tract of land to be used as a permanent camping grounds by the state troops at Ludington. The tract the board desires is comprised of between 5,000 and 6,000 acres, and it is said to be an ideal location for the annual encampments.

Representative M. L. Agens of Ludington has prepared a bill but it is said that it may not be introduced at the present session. There are two reasons why the introduction of the bill is to be deferred, one being an account of the close proximity to final adjournment, the other to give the business interests of Ludington an opportunity to secure options on the tract, so that it can be turned over to the state on short notice.

Under arrangements made by the military board the maneuvers this year will be over entirely new territory, when the state soldiers do mimic battle stunts. The country included in the tract covers a wider range than have ever before been used.

REPAIRS TO CITY BUILDING.

The building committee of the council, composed of Aldermen Cassidy, Gill, Locher, Reese and Collick, will meet this evening at 7:30 o'clock at the council chamber to determine on the improvements at the city building. The committee some time ago inspected the building and it reached the conclusion that it would cost about \$300 to make the necessary improvements, including decorations in place and the repairs to the roof. The committee will recommend to the council at the next meeting as to what work it considers necessary.

GOOD WORDS FOR CHAMBERLAIN'S COUGH REMEDY.

People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mrs. Edward Phillips of Barclay, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catherine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a dreadful cold myself, but I took Chamberlain's Cough Remedy and was soon as well as ever." This remedy is for sale by The Stafford Drug Co.

FIREMEN'S MEMORIAL DAY.

Members of Ishpeming Department Will Attend Divine Services Next Sunday.

Sunday will be the Firemen's Memorial Day for the twenty or more departments holding membership in the Upper Peninsula association. The day was set aside for the attending of divine services and the decorating of the graves of the departed members at the first meeting of the association in this city in 1895.

Since this time the Ishpeming department has observed the day. This year the members will attend services at the First Methodist Episcopal church, Rev. C. LaAlous, the pastor, delivering a specially prepared sermon. The services will be accompanied to and from the church also to the cemeteries by the firemen, by the following city band: The morning turnout will be at 10 o'clock and in the afternoon the firemen will leave headquarters on First street at 1:30.

The graves to be decorated are those of the late A. W. Gibbs, John Jones Jr., W. O. Tislow, Martin McDonough, William Kearney, John Quinlan, Edward Gunville, John Conners, J. Larson, H. Asgaard, John Peterson, John O'Neil and Joseph Gaboury.

The firemen will return to the city about 3 o'clock, heading street cars for Negaunee, on North street. On Iron street in the latter city they will be met by the Negaunee firemen and will march to the Negaunee cemeteries. In Negaunee the grave of the late Michael Hughes, who was for some years a member of the local department, will be decorated.

STUDENTS LEAVE TODAY.

Young Men Who Have Been Working Here Go to Menominee Range.

The thirty or more students of the Michigan College of Mines, who have been in the city the past five or six weeks, will leave today for the Menominee range. Another party of students of about a similar number, who have been on the Menominee range for a month past, will arrive here tomorrow and will remain a few weeks. Instructors Albert Houle, P. Kelley and W. Van Evera, who have been in this city, will remain with the new batch of students, while the instructors who have been on the Menominee range, will remain there.

Mr. Houle stated yesterday that the students have had a very successful trip and that they have visited nearly all of the mines on the range, though they

spent the greater part of the time at the Oliver Iron Mining company's Seeley 21 mine, which is now inactive. He said that the mining officials have shown the members of the class every courtesy possible and that they have accomplished considerable. The boys have worked quite hard here, usually putting in from eight to nine hours each day at the mines, as well as from one to three hours on their books. Each member of the class will prepare a written statement of his observations and work generally in the mines.

WILL GIVE TWO PERFORMANCES.

Equipped with all the accessories of a first-class organization, the Richards & Pringle's Famous Georgia Minstrels have "caught on" in the most emphatic fashion. The theaters are being literally tested to their capacity nightly. Although twenty-eight years have elapsed since this company was first organized, nothing which they have offered has given such satisfaction as the program they present this season. Visitors find so much entertainment that after two and a half hours of continuous fun they are loth to go. A complete new show is offered this season which is full of ginger from start to finish. The company will give matinee and night performances at the Ishpeming theater next Saturday. The usual parade will be given at 11:30 a. m.

WITH WISCONSIN ASSOCIATION.

The members of the Upper Peninsula Embalmers' association who at the last meeting of the state organization withdrew from membership, are now affiliated with the Wisconsin association. The undertakers believe that they will have less expense and will accomplish more by belonging to the Wisconsin organization than if they retained their membership in the Michigan association, on account of the shorter distance to travel in going to and from the annual meetings. The meetings of the upper peninsula organization, which were held annually the past few years, will be discontinued, and the members will attend the Wisconsin meeting instead. This year's meeting is to be held in Milwaukee during the state fair week in September.

GOES TO MONTANA.

William H. Anderson, head chemist on this range for the Oliver Iron Mining company, with headquarters in this city, has accepted a more lucrative position in Montana, and is preparing to leave for there. Mr. Anderson and his family recently returned from a month's visit in Montana and while there he accepted the position he is to fill. Len Johnson, who has been with the company for a number of years, is to succeed Mr. Anderson, and James Roberts of Negaunee, takes the second place in the laboratory, formerly held by Mr. Johnson.

For stomach troubles, biliousness and constipation try Chamberlain's Stomach and Liver Tablets. Many remarkable cures have been effected by them. Price, 25 cents. Samples free. For sale by The Stafford Drug Co.

MAYOR ON LIGHTING PLANT.

Negaunee's Executive Thinks Enterprise Has Done Well for the City

"I find sentiment to sell and sentiment to retain the municipal lighting plant," said Mayor Winter yesterday. "I find by talking with the taxpayers that they hold that if we sell we will have done very well by the city, but if the plant is not sold there will be no one particularly displeased or disappointed. "When we get down to figuring closely and fairly on the lighting plant, we find that it has not been a bad thing for the city; in fact I should say that it has been a good thing. It has been the means of giving the city and other consumers cheaper light than they would have had from a private company. It is unfair to ignore this feature. The reduction in the cost of lights has meant the saving of a large sum to the city, and every individual user of electricity has benefited. If we were to sell the plant I am satisfied that the city would be making a good deal. On the other hand if the taxpayers vote against accepting the offer of the Marquette County Gas & Electric company, and the council is authorized to rebuild the plant, I am sure it will be put in condition to give satisfactory service for a longer term of years than the life of the present plant. "I have given this matter serious thought since my election as mayor and I hold that when all things are taken into account the plant has not been a burden. The total sum expended on the plant, including the \$15,000 raised by the bond issue less than three years ago when the present machinery was installed, and the money drawn from the different funds, is \$29,050. The last annual statement shows a few hundred dollars in excess of this sum, but that is due to a credit that should have appeared on the other side. The difference between the \$15,000 and \$29,050, practically represents the total sum expended on the original plant, installed ten years ago. There has been no interest charge against the plant. The interest on the bonds that were sold has been paid twice from a fund created specially for that purpose. "I find that many of the taxpayers are indifferent as to what is done, though I believe a large vote will be cast. If the business the plant has controlled here in the past two years maintained, and I see no reason why it cannot be, it should continue to make a good showing, provided it is carefully and economically managed in future years. "There is no doubt that the offer of the Marquette county Gas & Electric company is a fair one, especially when it is considered that the company proposes to give us a 2,000 candle power lamp on the street circuit, while our present lamps are only rated at 1,200 each. If the plant is sold the city would also be a gainer of a few hundred dollars annually in the taxes the Marquette County Gas & Electric company would pay, as its additional property in the city would be taxed."

Old Plant Will Be Retained.

If the taxpayers vote down the proposition the present engine will be retained, to be used in case the new plant breaks down. The engine will have to be repaired with former parts and it will need some repairs after the new plant is installed. The engine has been in poor condition, despite the fact that it has been in use less than three years. "The Mining Journal representative has heard some criticism of the board of public works' recommendation of a turbine engine, which will cost more than a Corliss. The board has had the advice of some of the best master mechanics in the county on the point and it feels that the turbine will not only prove to be the most economical but most serviceable as well. If a Corliss engine was to be installed it would be necessary to enlarge the building, while the turbine can be installed without an addition."

ANNUAL CHURCH MEETING.

Representatives of Finnish Church Societies Assemble Here Next Week. About 150 delegates, representing the various Finnish Lutheran church societies of the country, will hold their fifteenth annual meeting in Negaunee next week, beginning Tuesday and continuing until Thursday evening. The business sessions will be conducted in the church and there will be entertainments each evening in the rooms on the second floor. The Negaunee congregation has appointed a committee to complete arrangements and all of the visitors will be entertained by members in the church. The ladies will probably serve one meal at the church and lunches will be served daily, free of cost to the visitors. The programs have not yet been completed but a committee will have them ready by Sunday, when full particulars will be announced to the congregations. Last year's meeting was held at Hancock, which is the home of the society. The Hancock Finnish college is largely supported by the church. The first ministerial students were graduated from the college last year.

PAROCHIAL SCHOOL CLOSING.

The closing exercises of St. Paul's parochial school will be held at McDonald's opera house the evening of Wednesday, June 19. The exercises will also be held in the afternoon. There will be no reserved seats for the latter entertainment and the admission will be twenty-five cents for adults and fifteen for children. In the evening reserved seats will be fifty cents and the general admission twenty-five cents.

SORE NIPPLES.

Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the babe to nurse. Many trained nurses use this salve with best results, or sale by The Stafford Drug Co.

FARM TO RENT.

The Cliffs farm of 110 acres in Sections 22-25, Township 47 N., Range 27 W., and Bellevue farm of 95 acres, 2 1/2 miles from Negaunee, can be rented for a year or more, by applying to The Cleveland-Cliffs Iron Co., Land Department, Negaunee, Mich. Both Phones.

SPECIAL ELECTION.

Notices Have Been Issued by the City Recorder.

Notices for the special election for the purpose of determining whether the city shall dispose of its lighting plant to the Marquette County Gas & Electric company for \$35,000 or whether it shall issue bonds for the sum of \$15,000 to rebuild the plant, have been issued by the city recorder. The boards of registration will be in session next Tuesday, the 4th, from 8 o'clock in the morning until 8 in the evening, and on the following day the election will be held, the polls opening at 9 o'clock a. m. and closing at 8 p. m. The following places have been designated by the council for the session of the boards of registration, also for polling votes: First Ward—Jackson Iron office, West Iron street. Second Ward—City Hall. Third Ward—Charles Wasmuth's residence on the south end of Iron street. Fourth Ward—Finnish Temperance hall, corner of Healy avenue. Fifth Ward—Engine House No. 2. If the council is authorized to issue the bonds for the payment and enlargement of the lighting plant the amount borrowed will be made payable in five installments of \$3,000 each, the first installment to be paid in 1922, to bear interest at a rate not to exceed 5 per cent per annum.

WOLVES DEFEAT RAVENS.

In the contest for first place in the league bowling tournament Monday the Wolves defeated the Ravens by a margin of thirty-two pins. The losing team will meet the Pikers and if it wins, also in the event of the Wolves defeating the Pikers, each team will then have won a match, and another series of three games will be necessary. The scores of Monday night's contest were: Wolves—448 394 482 1324. Ravens—152 139 113 404. Miller—177 126 163 466. Nelson—119 120 206 454. Totals—448 394 482 1324. Wolves—138 194 122 454. Reichel—128 231 128 477. Dyer—145 148 132 425. Totals—411 573 382 1366.

BUTCHERS ARE SCARCE.

Hugo Muck left last night for Milwaukee, where he will endeavor to engage two meat cutters for his Negaunee market. Charles Giesler, who has been in Mr. Muck's employ for the past three months, has resigned, and will return to his home at Manitowish, Wis. Mr. Muck said yesterday that the business of his market has increased considerably of late and he can use an extra man to advantage. From Milwaukee he will go to Oshkosh and Ripon, and will be absent a week. It is possible that Mr. Muck will bring back several horses.

TEAT SHOW COMING.

The agent for Castello & Co.'s railroad show was in Negaunee yesterday making arrangements for the appearance of the combination here next Thursday, Friday and Saturday. The show is a small one, playing at popular prices of admission.

LOCAL LACONICS.

Eli Dawe, the undertaker, was called to Princeton yesterday. Mayor Winter left the city last evening, to be absent a week on business. C. R. Watt, the piano tuner, is in the city this week. His headquarters are at J. E. O'Donoghue's drug store. E. F. Richard, formerly of Negaunee, now special agent for the New York Underwriters' Insurance company, with headquarters in Detroit, was in the city yesterday.

The fire department was called out yesterday afternoon about 10 o'clock to extinguish a blaze in a house occupied by a Finnish family on Tobin street. The damage was light. T. A. Thoren and C. L. Sporley have secured temporary office quarters in the Shea block, taking the rooms formerly occupied by the insurance inspectors. Both will return to the bank building as soon as the improvements are completed. A carload of marsh hay, received here Monday, sold at \$20 per ton, and the cattle owners were glad to get it at that. There is still a shortage of hay and it is not expected that the condition will improve to any great extent before the next crop comes into the market.

Mrs. Mary Maas and her daughter, Miss Carmen, left last night for Chicago, where they will visit George J. Maas for a day or so. The latter is said to be considerably improved in health, and it is expected that he will be able to leave Mercy hospital within a few days.

BELIEF FROM RHEUMATIC PAINS

"I suffered with rheumatism for over two years," says Mr. Roland Curry, a patrolman, of New West, Fla. "Some-times it settled in my knees and lamed me so I could hardly walk, at other times it would be in my feet and hands so I was incapacitated for duty. One night when I was in severe pain and lame from it my wife went to the drug store here and came back with a bottle of Chamberlain's Pain Balm. I was rubbed with it and found the pain had nearly gone during the night. I kept on using it for a little more than two weeks and found that it drove the rheumatism away. I have not had any trouble from that disease for over three months." For sale by The Stafford Drug Co.

THROUGH SLEEPING CAR SERVICE

ISHPEMING

IN BUSINESS IN UTAH.

Anton Friberg, whose liquor business here, was closed out May 1, and who spent the past few months in Arizona has located at Alta, Utah, where he is conducting a saloon. Mr. Friberg has a great many acquaintances and friends in that country, as he spent some time in Salt Lake and at other points in the state some years ago. Writing to a friend here Mr. Friberg said: "If you intend to invest any money in mining stock I have no hesitation to advise you to buy Columbus Consolidated. It is a wonderfully rich mine and it is going to be one of the best properties in the state."

FROM HOPKINS' CURB LETTER.

"A bad break in metal was reported from London at the opening, spot down 2 pounds 5 shillings to 97 pounds 15 shillings and futures off 2 pounds 10 shillings to 95 pounds 10 shillings. North Butte sold down to 80 1/2 but later on recovered to 82 1/2. Amalgamated sold down to 84 1/2, with nearly all others in proportion. Sentiment seems to be against the market for the most part."

ISHPEMING IN BRIEF.

The stores of the city will be closed all day tomorrow. A daughter was born yesterday afternoon to Mr. and Mrs. Guy Canfield. The Marquette County Medical society met at the Ishpeming hospital last evening. Harry Murphy, who spent the past week in the city, has returned to Bovey, Minn. Dr. T. A. Felch left yesterday for Detroit to attend a meeting of the state board of examiners. Miss Bridget Redmond has gone to Butte, Mont., on a visit to her sister and other relatives. Miss Laura B. Knapp of Mokena, Ill., is in the city visiting her brother, Karl B. Knapp, and wife. Coroner William Prin was called to Princeton yesterday, a man having been killed in the mines there. The barber shops of the city will remain open this evening until 9 o'clock and will close at noon tomorrow. Three families from the East End Lake Angeline location, left Sunday night for Butte, Mont., where they will locate permanently. The Country club held its first meeting of the season yesterday. Two bus loads of the members went out, one leaving at 2:30 and the other at 5 o'clock. According to the trial balance of the city treasurer taken at the close of last week, there is a cash balance to the credit of the city in the bank of \$43,200.84. Patrick Gleason of West Division street, an employe of the Oliver Iron Mining company for a number of years, departed Monday night for Colorado.

HONORBILT
SHOES FOR MEN

The highest degree of style, fit and workmanship are embodied in these splendid shoes. There are none that equal them in appearance and wearing quality at the price. They are BUILT ON HONOR.

SATURDAY, Matinee and Night. JUNE 1. 28TH ANNUAL TOUR.

RICHARDS & PRINGLE'S Famous Minstrels

The Sunday excursions on the Lake Superior & Ishpeming railway will not start until a week from next Sunday, the 9th. This is the latest the excursions have started in some years, due to the backwardness of the season. A. E. Sterne, county commissioner of schools, left yesterday for Lansing to attend a meeting of the county commissioners of the state, called by the state superintendent of public instruction. He will be absent three or four days. Mrs. William Anderson and her daughter, Mrs. William Ripper, and the latter's two children, and Mrs. Charles Burt and children, who left a short time ago for England, have advised their husbands that they arrived safely and that they had a pleasant voyage. The weather was favorable during all the time they were on the ocean. The ladies plan to remain about three months. The officers of the Ishpeming branch of the National Protective Legion desire the members to know that the meeting tomorrow evening will be called to order at 7 o'clock, instead of 7:30, the regular time. The new regalia will be used for the first time and the session is to be an important one. Following the meeting there will be a public entertainment for which an admission of ten cents will be charged.

CURE FOR DRUNKENNESS.

Urine Treatment is to be Used at Home Without Publicity, or Loss of Time from Business. Thousands of persons who really want to quit the use of whiskey or beer, realize that they cannot do so without medical help, yet they can afford the time or perhaps the money to go to a sanatorium. Happily a new cure for drunkenness has been discovered which is to be taken at home and costs less than the average drinker will spend in a day for drink. In using Urine there is absolutely no publicity, as the remedy is sold by the leading druggists in nearly every city and town, or it can be sent by mail. Sure relief is positive when Urine is used. So uniformly successful is this treatment that in every box is a registered guarantee which entitles you to a refund of your money if Urine fails to effect a cure. Urine is in two forms, No. 1, a secret remedy, absolutely tasteless and colorless which can be given in food or drink without the patient's knowledge; No. 2 in pill form for those who wish to be cured. The price of either form is \$1 a box. Send to the Urine Co., Washington, D. C., for free booklet and consultation blank. The desire for liquor is soon destroyed after Urine treatment is commenced, and before long the patient is freed from the terrible drink craving, and the drink will not be missed. Urine is for sale by The Stafford Drug Co.

MAJORITY FAVOR INTAKE EXTENSION

INQUIRY AMONG HEAVY TAXPAYERS OF THE CITY HAS JUST BEEN COMPLETED.

DELAY CAUSES CRITICISM

Sentiment General for Immediate Action to Get Good Water—Some Interesting Points Brought Out by Canvass.

Sentiment among taxpayers runs strongly in favor of immediate steps to remedy the bad conditions surrounding Marquette's water supply, and about as strongly in favor of the suggested remedy of extending the intake. It is also thoroughly seasoned with impatience with the profligate policy of the water board which, from all outward symbols, is as far from a definite move to give the consumers (and the rates are plenty high enough) water fit to drink and use for cooking as it has been at any time in the past five years.

These things, and some others, have been determined by a systematic canvass of representative taxpayers which has just been concluded. In the course of this canvass all but a few of sixty men taken as the heaviest taxpayers in the city were interviewed. In all the expressions of seventy-four residents, and assumed users of the water (though as a matter of fact many of them are buying spring water) were obtained.

What the Canvass Showed.

The analysis of the expressions, which were dictated by the individuals visited, showed a very heavy run of opinion in favor of the immediate extension of the intake pipe. Out of the seventy-four persons interviewed, fifty-four or nearly three-fourths of the entire number favored immediate extension. There were nine who favored extension if it was determined beyond all doubt that this step would give the city good water. Only one expressed any faith in a filtration project. Seven refused to vote safe definite opinions, saying that the board of fire and water commissioners was appointed to grapple with the question and was presumably, capable of disposing of it. Only one person favored the removal of the pumping plant north of the city. One taxpayer said he wanted "good water regardless of its cost," and only one of the entire number was against the proposed extension because he objected to the money being spent on the project. Presumably use has accustomed him to the taste of creosote.

Besides this inquiry a canvass of considerable extent, of which, however, no individual expressions of opinion were recorded, was made among the working-men of the city, and it appeared that they were a unit in asking that good water be furnished, without delay and without regard to cost. Many were found who supposed that the whole question had been disposed of and who, not as familiar as they might be with the ways of the water board, believed that the pipe for the improvement had already been ordered and was, perhaps, on its way to the city. Criticisms of the board's course in equivocating with this important question were the rule, and some of them were rather too torrid for a literal printing out. The sentiment in regard to the furnace was excellent. Most of the people expressing themselves on that point said it was a fine thing for the city; that it had helped general business; boomed real estate in the north part of the city and was in every way a desirable industry. Many taxpayers expressed themselves positively against any effort to make a further levy on the furnace company in connection with the necessary water works improvements, taking the position that in the long run an extension of that nature would cost the city more than it would save, through the getting abroad of the impression that Marquette was a bad location for industrial enterprises.

Board Has Money and Power.

The board has every necessary for definite action except, apparently, the inclination. It has the money and the power. Last March it was ordered, in accordance with the board's resolution, by the council that the people vote on the \$75,000 bonds to defray the expense of the projected improvement of the water system. Although it does not appear in the resolution it was the general understanding by the aldermen, and the impression was given out by board members, that the course it was proposed to pursue was to extend the intake. The alternative steps of artesian wells, reservoirs, etc., were generally regarded as not being practicable. The council, in voting to submit the question of the bond issue, generally understood that it was giving its endorsement to a project of intake extension. The people went to the polls with the same idea, and approved the bonds by a considerable majority.

A committee of the board members F. J. Jennison and E. B. Palmer were empowered to conduct a series of tests for creosote at points in different directions out from the end of the present intake. A scientific test for this foreign matter was procured and it went aboard. At a meeting the latter part of last April it submitted a report on its findings. They were favorable to extension. In conclusion it was set forth: "As a result of our findings we recommend to your honorable body that extension of the intake be adopted as the proper solution of our water difficulties and that steps be taken at once to secure prepositions from steel and cast iron manufacturers preparatory to contracting for the work. Immediate action is recommended for the reason that it will take at least two months to deliver pipe and it is desirable that the work be completed not later than August 15, to avoid the rough weather of the fall."

Want More "Experimenting"

This was the last of April. It is now the last of May and the water board is as far off from a decision as ever it seems. In fact it has gone in for more "experimenting." Mr. Palmer, who signed the report for an intake extension, has "giggled" back. At least he has failed to back up his recommendation with his vote. Mr. Tobin, another

member, is a "standpatter," and inclines to the theory that the people who insist that the water is off color are the victims of a great illusion. Mr. Greene is somewhat impressed with the idea that the solution of the difficulty would be attained if the tarry matter from the furnace were forced through the sewers into the lower harbor. Messrs. Jennison and O'Reilly are reported to favor immediate steps to extend the intake.

At the last session of the board more "experimenting" with the small pipe was authorized. It was put out some 3,000 feet about two years ago, and it was reported that creosote was tasted in the water drawn through it. The tests, however, were those of taste, and entitled to no scientific standing. Yesterday Superintendent Kern was asked what the present status of the small pipe experiments was, and he said the pipe was out of commission. It had been lowered and could have to be raised again, before it could be used. Just when it will be made serviceable is indefinite.

End Far Off. As far as The Mining Journal could learn yesterday the date when the water board will "do something" is still as far distant as it ever has been. From all accounts it is working in a circle, and talking in a circle, and there is precious small prospect that it will develop the finger necessary to in any way improve present conditions this year. Certainly if it accomplishes anything to give the people palatable water, and safe water, it will have to turn over a new leaf without delay, and settle on some definite plan. The year is already getting along, and the open season of fair weather is at best a short one.

HEAVY VERDICT AGAINST CITY.

Laughlin Johnson Secures \$5,000 for Death of Wife, Feb. 17, 1906.

The jury in the case of Laughlin Johnson vs. city of Marquette returned a verdict awarding the plaintiff \$5,000 damages at 8 o'clock last evening after being out a little more than two hours. The trial of the action lasted two days though the greater part of yesterday was consumed in the addresses to the jury by C. E. Burton and S. W. Shull for the plaintiff and George P. Brown and W. P. Belden for the defense. Johnson sued to recover \$15,000 for the death of his wife on February 17, 1906. Mrs. Johnson was killed by a team of runaway horses belonging to Herman Frieb. The sleigh was capsized and Mr. Frieb thrown out at the crossing of a spur running to the Carp furnace, and further on the stampeded animals collided with a single cutter in which Mrs. Johnson with her sister and babe were driving to the city. The complaint in the action alleged culpable negligence on the part of the city in not compelling the Marquette & Southeastern Railway company to keep the railroad crossing at the point where the animals got away from Mr. Frieb in proper condition.

EXERCISES AT NORMAL.

The members of the Normal training school assisted by Mrs. Rushmore, and Miss Linton and Chase will give a Memorial Day program at assembly hall this afternoon at 2 p. m. While the entertainment is open to the public a special invitation is extended to the veterans of the Civil war. Following is the program: Miss Linton. Song, "America" School. Gettysburg Speech of Lincoln. Frank Lewis. Song, "The Call to Arms". Seventh and Eighth Grades. "What Makes a Nation?" Ellsworth Roberts. Song, "The Old Guard". Miss Linton. "The Blue and the Gray". Margaret Rogers. Song, "My Own United States". Fifth and Sixth Grades. Song, "The Jolly Students". Fifth and Sixth Grades. "Our Native Land". Robert Peters. Song, "The Drum". First and Second Grades. Song, "His Buttons Are Marked U. S.". First and Second Grades. Selection from Webster's Speech in Reply to Hayne. Tracy Kaye. Patriotic March and Consecration of the Grail. Miss Linton. Flag Song. Kindergarten. "Cover Them Over". Quartet. Misses Chase, French, LaLone and Kinsman. "My Native Land". Mary Love. Marsellaise Hymn. Fifth and Sixth Grades. "Night Wind". Eugene Field. Nature Poems. Mrs. Rushmore. Stella Patrick, Naimi Olsen, Stanton Bice, Grace Call, Blanche Lambert. "Anchored". "True Worth". Marjorie Borsosson. "The Star Spangled Banner".

BASEBALL DECORATION DAY.

Baseball teams composed of retail clerks and employes of the Lake Shore Engine Works will try conclusions at the fair grounds the afternoon of Decoration Day, Thursday. A good lineup is presented by each side, and some excellent sport is expected. Street car service has been arranged for. The teams follow: Clerks—Catcher, C. LeFave; pitcher, Quinn; short stop, G. Fogelberg; first base, Gust Rydholm; captain; second base, F. Williams; third base, Weiser; center field, A. Rydholm; left field, F. Marcott; right field, O. Ekstrom; manager, Con Wellman. Lake Shore Engine Works—Catcher, J. Outlets; pitcher, Gus Vardbrooks; short stop, Ed. Connell; first base, Wm. Duclairne, captain; second base, H. Ekstrom; third base, J. Bennett; center field, Gus Bjorklan; left field, G. Flor; right field, A. Johnson; D. Murphy; utility, Wm. Lindblad, manager.

NOTICE.

If you want dry hard and soft wood 16-inch slabs, call at or telephone to H. J. Keopp & Co., 615 Champion street, Bell Phone No. 78. (5-8-11) Red Seal White Lead costs less than other white leads, because it makes more paint. For sale by Kelly Hardware Co. (5-18-11)

HAVE ESCAPED FOREST FIRES

RESIDENTS OF UPPER PENINSULA HAVE SOMETHING TO BE THANKFUL FOR, AFTER ALL—LAST YEAR'S FIRES DISASTROUS.

While the weather has greatly retarded vegetation and the indications are that some crops will be seriously affected by the lateness of the spring, still residents of this locality have something to be thankful for in that they have not been visited by such serious forest fires as ravaged the country at about this time last spring. The territory visited by the flames was about 250 miles in length, reaching east and west from Newberry to Bessemer, and north and south between the shore line of Lake Superior and the southern boundary of the peninsula. New Marquette, not including damage to standing timber and railroad property, was great.

The Chocolay valley, which contains some of the finest farms in the country, was particularly unfortunate. Many farmers lost everything in the shape of houses, cattle, barns, implements and personal property. The woods in many places were like a roaring furnace, and the air was filled with dense clouds of smoke and ashes. Farm animals and even rabbits filled the highways, and forest birds flew about as though dazed.

Normal School Threatened.

There were fires in the city resulting from high winds that carried sparks. The dormitory of the Normal school was threatened and it is probable that the building would have burned had it not been for the prompt response of the fire department. A spark ignited the casing on one of the dormer windows on the fourth floor on the south side of the building and burned its way into the interior. The blaze was extinguished through the means of chemicals and water, and at small loss.

At Birch, the section house of the Marquette & Southeastern railway was the only building burned. In this case fire was fought with fire. The slashings were set fire to three-quarters of a mile from the mill and a wide swath burned around the threatened locality. This was a precautionary measure adopted for the purpose of affording protection to the thousands of dollars worth of property in the town. Antoine LeBelle, a green garden farmer, lost his household effects in a peculiar manner. When the fire reached his clearing he had his furniture removed from the dwelling which he thought it would be impossible to save. The household effects were taken to a pasture near the house, while the owner and several friends returned to the dwelling to fight the flames. They succeeded in fighting off the fire, but when they went after the furniture found that the flames had reached it in their absence and entirely consumed it.

Marquette Gave Aid.

Marquette city responded liberally to the demands for aid for the people who had been made homeless by the flames. A public meeting was called, soliciting contributions of money and material secured with remarkable rapidity. At one time a quantity of furniture and bedding was piled in the market place. President Fitch of the South Shore and General Manager Harris of the Marquette & Southeastern railway arranged to have their roads carry freight to the sufferers free, which was a great aid to the committee having the matter in charge. The largest amount of supplies was sent to Durin and Wells townships, near the Delta county line, which were located directly in the path of the fire and where the residents suffered greatly.

SODA WATERS COST MORE.

Materials That Go To Make Up Soft Drinks Advance Greatly In Price.

While soda waters and the popular "Sundaes" retail at about the same price in this city as in former years, the margin of profit to the dispenser is considerably less. Absolutely everything in the kitchen as well as in the ice cream establishments have had to meet the prices of the makers of imitations and sometimes it has been a difficult thing, it is said. Now, however, they have their imitations. With their competitors banished from the field they are able to charge higher prices, and they do. Not only are all kinds of dried fruits higher, but the prices of lemons and oranges continue very high—lemons, it is said, having never sold at such prices in the local market at this time of year. All sorts of nuts have advanced, as well, even the old friend of the public, the Egg, of course, and butter have been high for months.

REOPENED

Werner's Gallery I have reopened my photograph gallery at cor. Main and Third Sts., and will hereafter give the business my personal attention. We can photograph at night as well as during the day and will be glad to see my old customers as well as any one wishing first class work.

DARANTELLA PHOTOGRAPHER. 5-1-11

This is about the fleet-footed-est half-hose we've ever brought into the store. The new fancy hose have been galloping out ever since they got in, and there's no let-up to their going. All the new effects are strong favorites, safe to put your money on.

Next neighbor is an appropriate pair of Oxfords. We show some smart styles of our usual high class quality at \$3.50, \$4, \$5 and \$5.50.
