

SHOCKING DISASTER IN HAMPTON ROADS

Returning from Ball at the Exposition, Five Midshipmen and Five Sailors of the Battleship Minnesota Meet Death.

No Survivors Are Left to Explain the Exact Nature of the Calamity, but There is Apparently No Doubt That the Small Power Boat Conveying the Party Was Run Into and Cut in Two by a Passing Steamer.

Norfolk, Va., June 11.—Five midshipmen who came ashore last night in a small boat from the United States battleship Minnesota, lying in Hampton Roads, to attend a ball at the James-town exposition grounds, together with five seamen, are missing.

The Minnesota's launch is known to have left the Discovery landing at the exposition grounds shortly after 12 o'clock this morning, and the theory of the officers of the fleet now in the roads is that the launch struck something and went down, and that all on board were drowned. The missing men were: PHILIP H. FIELD, midshipman. WALTER C. ULRICH, midshipman. F. P. HOLCOMB, midshipman. W. H. STEVENSON, midshipman. HENRY L. HOLDEN, midshipman. R. H. DODSON, seaman. H. L. VANDERBILT, ordinary seaman. F. R. PLUMMER, ordinary seaman. G. W. WESTPHAL, fireman, first class.

JESSE CONN, coal passer. It had been supposed that Second Lieutenant David M. Randall, of the Marine corps, also was a member of the launch party, but he has arrived safely at Norfolk, having made the trip in another boat.

Early today the monitor Florida found a cape aloft in the roads which has been identified as that worn by Midshipman Ulrich last night. One theory is that the launch was run into and cut in two by a passing vessel which may have passed on the night of the disaster. It is likely that the launch was ashore had the launch merely foundered. The naval officers are tonight using every effort to ascertain whether there were not even more men in the launch. A large number of men are reported missing from various ships. Men have been detailed to search Norfolk, Portsmouth and Newport News and vicinity. The vessels of the fleet are keeping in constant inter-communication by wireless telegraph.

KEEP ORCHARD ON THE STAND

Attorneys for the Miners' Leaders Continue Their Attack on the Testimony of the Prosecution's Chief Witness.

Determined Effort Is Made to Expose His Various Allegations to Doubt and Improbability, and It Is Expected the Cross-Examination Will Last Two Full Days Longer—New Diabolical Plot Is Revealed, a Conspiracy to Murder by the Wholesale.

Boise, June 11.—The attack of the Haywood defense on the testimony of Harry Orchard goes on unrelentingly, and the witness will probably be confined on the stand for full two days more. Today began with the story of the dynamiting of Fred Bradley in San Francisco, and the defense made a determined effort to expose several features of it to doubt and improbability, and to vitiate it all by revealing the hand of the Pinkertons.

Then the plot was traced back to Denver for the winter of 1904-05 and the spring following, and there was an effort to show that Orchard had practically no communication with the leaders of the federation; that he received no pay for the Bradley crime or anything else, and that with Steve Adams, in a period of extreme poverty, he was reduced to the necessity of stealing a sheep from the Globeville stockyards that he might have food.

New Murder Plot Revealed. Orchard confessed the theft of the sheep, but denied that it was because of want. This Globeville mystery developed another diabolical plot, Orchard swore that it had been planned to dynamite a boarding house where 150 non-union men lived in this Denver suburb, and in preparation for the wholesale murder Orchard, Adams and a man named Joe Mahallah, stocky ponies of dynamite which they lugged home at night and buried in the cellar. The crime was abandoned, Orchard said, in one of those flashes that make his testimony remarkable, because Haywood intervened and forbade him to have anything to do with it. The plot had originated with one Max Matich, he said.

The defense showed that from late in 1903 until the middle of 1904, Orchard continually drew strike relief at Cripple Creek, and then dramatically invited Orchard to explain. Orchard replied that Haywood, Moyer, Parker and Davis advised him to continue drawing relief because if he displayed money he would excite suspicion.

SENATOR MORGAN DEAD.

Venerable Statesman from Alabama Expires at Washington, Aged 83.

Washington, June 11.—United States Senator John Tyler Morgan, of Alabama, died here at 11:15 o'clock tonight. Mr. Morgan had been in bad health for a number of years, but had more or less regularly attended the sessions of congress. He suffered from a heart affection, which was the cause of his death. At the death were his daughters, Miss Mary Morgan and Miss Cornelia Morgan, both of this city, and his secretary, J. O. Jones. Mr. Morgan was aged eighty-three, and had been a member of the senate for thirty years.

Senator Morgan held a number of important offices besides that of senator, including membership on the Hawaiian commission and arbitrator of the Bering sea fisheries. His chief active interest in the senate in recent years had been in connection with the Isthmian canal question. He was a persistent advocate of the Nicaragua route, and made a number of notable speeches during his long but unsuccessful fight for the adoption of a Nicaraguan waterway.

Lansing, Mich., June 11.—[Special.]—The conference committee's report on the plans for the constitutional convention was made to the house today and the house had passed a bill calling for 100 delegates, or one to each representative district. The senate wanted sixty, or five to each congressional district. The compromise is for ninety-six—three from each senatorial district, present districts to govern. The delegates will be nominated Aug. 13 and elected Sept. 17, and the convention will meet Oct. 22. The pay of \$10 per day will not continue after Jan. 31. The new convention will be submitted in the spring of 1908.

Forestry Investigation. The senate today passed Representative Watt's bill, calling for a forestry investigation commission of nine members. The board is to inspect the state thoroughly and make a comprehensive report on the best means of re-stocking the state's forests, the report to be submitted the next legislature.

The juvenile court bill passed the senate today with the yeas and nays, 54 to 40. The bill is unconstitutional in 1907, stricken out. The probate judges are attacked by the new courts.

STATE LAWMAKERS REACH AGREEMENT

Convention to Revise the Constitution Will Consist of Ninety-Six Members, Three from Each Senatorial District.

Free Text Book Measure Is Killed in the House—Senate Passes the Military Reorganization Bill, and Also Approves of the Proposed Forestry Investigation, the Initial Step in the Plan of Re-Stocking With Trees Former Wooded Lands.

Lansing, Mich., June 11.—[Special.]—The conference committee's report on the plans for the constitutional convention was made to the house today and the house had passed a bill calling for 100 delegates, or one to each representative district. The senate wanted sixty, or five to each congressional district. The compromise is for ninety-six—three from each senatorial district, present districts to govern. The delegates will be nominated Aug. 13 and elected Sept. 17, and the convention will meet Oct. 22. The pay of \$10 per day will not continue after Jan. 31. The new convention will be submitted in the spring of 1908.

Forestry Investigation. The senate today passed Representative Watt's bill, calling for a forestry investigation commission of nine members. The board is to inspect the state thoroughly and make a comprehensive report on the best means of re-stocking the state's forests, the report to be submitted the next legislature.

The juvenile court bill passed the senate today with the yeas and nays, 54 to 40. The bill is unconstitutional in 1907, stricken out. The probate judges are attacked by the new courts.

The military bill reorganizing the militia and providing an appropriation for which armories will gradually be built also passed the senate today. Senator Allen's free text book bill was killed in the house.

HEAD CHIEF CAPTURED.

Revolt of the Pulajanes Squelched in the Island of Leyte.

Manila, Wednesday, June 12.—Fascino Abdon, head chief of the Pulajanes in the island of Leyte, was wounded and captured yesterday by Lieutenant Jones with a detachment of infantrymen and Philippine scouts. Under Chiefs Uldarico, Rota and Lucia also were captured. This ends the Pulajaneism in the island of Leyte.

Second Cyclone Within Few Days Wreaks Havoc in Illinois. Duquoin, Ills., June 11.—The second of a series of June cyclones predicted for southern Illinois swept over the city and surrounding community tonight, and while it was comparatively light in duration, the damage inflicted will be almost as heavy as that of Friday's storm. Zion church was demolished. Shortly before the storm reached the climax a man and child were seen to seek shelter underneath the church, which was blown away by the wind. The storm was accompanied by a terrific rainfall and hail.

STATES GIVEN WARNING. Must Conform to Dick Militia Act if Federal Funds Are Wanted. Washington, June 11.—Acting Secretary of War Oliver has notified the governors of various states that unless they conform to the Dick militia act before January next they will be debarred from their pro rata allotment of the annual appropriation for the support of the militia.

SCHMITZ'S DENIAL SWEEPING. Mayor of San Francisco a Witness in His Own Behalf. San Francisco, June 11.—Mayor Eugene E. Schmitz took the stand in his own behalf today. He denied all the allegations against him.

JAPAN FRIENDLY Officially, No Apprehension Is Felt at Washington. Tokyo Has Made No Complaint, and No Danger of War or Even of a Breach of the Amicable Relations at Present Existing Is Seen. Washington, June 11.—Secretary Root today positively declined to make any statement respecting the Japanese situation. This was done with full knowledge of the meanness which exists in financial circles as a result of the circulation of war rumors. It may be said, however, that the secretary's refusal was based solely upon his unwillingness to accord the rumors official notice, and not upon any belief on his part that there is the least danger of war or even of a breach of the friendly relations that now exist between America and Japan.

PROSECUTION FOR HARRIMAN LINES

Government to Institute Proceedings Charging Violation of the Anti-Trust Law—This the Decision of the President.

Evidence Adduced by the Interstate Commerce Commission Is Held to Justify Action—Validity of the So-Called Alton Deal Will Be Attacked, Also the Union and Southern Pacific Transactions, and Possibly the San Pedro Traffic Agreement.

Washington, June 11.—Developments since the conference at the White House last Friday evening make it probable that the government will begin proceedings under the anti-trust act against E. C. Harriman and his associates for violation of the law in connection with the so-called Alton railroad deal and the Union and Southern Pacific transactions, and perhaps in connection with the Southern Pacific and San Pedro traffic agreement.

Coal Roads Cases to Wait. The contemplated prosecution of the bituminous coal-carrying roads will, however, likely await the result of the action by the courts in the case to be brought against the Harriman roads. It is explained that there are some important questions that are common to both cases, and therefore it is asserted that the suits against the bituminous coal roads will not be brought until the courts have rendered judgment in the Harriman cases. In the event of an adverse decision as to these common points, and the government decides that the law, as it stands, is inadequate to fully cover the case, it is more than probable that congress at its next session will be asked to amend the law so as to meet the present situation.

As the report of the interstate commerce commission on the Harriman investigation has not been made yet, the action of the department of justice in filing the bill will necessarily be somewhat delayed. It is known that the question of the advisability of bringing any suit attacking the validity of the Harriman-Alton transaction is one on which the interstate commerce commission is divided, and as a result of this difference of opinion two reports from the commission are possible.

President and Bonaparte Agreed. At the White House conference last Friday evening, Commissioners Knapp and Lane, who are understood to hold opposite views on this question, explained their respective positions at some length. The president and Attorney General Bonaparte, however, have kept well informed on every phase of the disclosures made at the hearings of the interstate commerce commission, and while great weight would naturally attach to the views and recommendations of the members of the commission, it is believed that both the president and the attorney general have reached the same conclusion, namely, that the evidence submitted justifies action to restore the original status.

WESTERN RAILROADS DECIDE TO FIGHT

Two-Cent Fare Laws to Be Contested—In Meantime, No Cheap Rates on Any Line.

Chicago, June 11.—The Western railroad presidents, at a conference, today, decided to contest the two-cent passenger laws in Illinois, Nebraska, Missouri, Iowa and Arkansas. Following this decision the passenger representatives of all Western roads agreed not to grant any reduced rates for any occasion until the two-cent fight shall have been concluded.

The passengermen were presented with a letter written by Secretary Mosley, of the Interstate Commerce association, stating that the proposed plan for putting National Educational association rates into effect is illegal and cannot be tolerated. The object of the association will endeavor to have the ruling changed, as they declare the life of the organization depends on it.

In pursuance of the decision of the railroad to fight the two-cent laws and not grant reduced rates, organizations of businessmen will be told that rates for merchants' meetings are no longer available. This decision will also cut off clergymen, charity workers, state conventions, sisters of charity and all who have enjoyed cheap rate privileges. All fares will be placed upon a strict two-cent basis.

STRIKEN IN HIS OFFICE. Chicago, June 11.—Julius Norden, one of the best known of the older German newspaper writers in Chicago, died in the office of the Staats Zeitung today of heart disease. Norden is said to have been a son of wealthy parents living in Berlin, where he was graduated from one of the universities before coming to the United States twenty-five years ago.

KAISER TO VISIT DENMARK. Berlin, June 11.—The emperor and empress of Germany will visit Copenhagen July 3. Later they probably will meet the king and queen of Norway on board the royal Norwegian yacht. The report that Emperor William and Nicholas are to meet soon, lacks confirmation.

NEW WAR IS ON

Fighting Is Renewed in Central America. Assisted by Revolutionists, Nicaraguan Expedition Bombarbs and Captures a Salvadorean Port Preliminary to an Invasion of Guatemala.

Mexico City, June 11.—Hostilities have broken out in Central America. A force of Nicaraguans, assisted by Salvadoran revolutionists, captured the port of Acajutla, Salvador, this morning.

This startling news came to the capital this evening in a telegram from President Figueroa to the Salvadoran minister in Mexico, Manuel Delgado. The minister is now conferring with President Diaz.

The Nicaraguans, on board the gunboat Monomomo, bombarbed the fort and then landed troops. The town is now in the hands of the Nicaraguan General Manuel Rivas. Intense excitement prevails. It is believed the objective point of the expedition is Port San Jose de Guatemala, and that President Zelaya of Nicaragua has declared war against Guatemala.

WINS BY SIXTEEN HOURS.

Power Boat Ailsa-Craig Takes the Gordon Bennett Cup.

Hamilton, Bermuda, June 11.—The power boat Ailsa-Craig arrived here this morning at 9:39 o'clock, and the Icho her competitor in the race for the Gordon Bennett cup, at 7:12 o'clock this evening. Both had a rough passage. Both are gasoline-driven power boats, and left New York at 4:10 p. m. June 8 on a 630-mile race to Bermuda. The Ailsa-Craig wins the race by sixteen hours and twenty-two seconds.

DULUTH'S BIG STEEL PLANT. St. Paul, June 11.—Articles of association were filed with the secretary of state today incorporating the Minnesota Steel company with a capital of ten million dollars, fully paid up. The incorporators are Thomas F. Cole, W. F. Olcott, F. E. Housa and J. E. Coffin, all of Duluth. The purpose named in the articles of incorporation for which the company is organized embrace nearly every known business in manufacturing and commercial life, except newspaper publishing.

New York, June 11.—Copper was lower in London today, with spot closing at 297.5 and futures at 294.14. Locally, the market was dull and more or less nominal. Lake is quoted at 24 1/2 to 25, electrolytic at 22.75 to 23.25 and casting at 21.75 to 22.

ALLEGING MONOPOLY, GOVERNMENT MOVES TO BREAK UP STILL ANOTHER COMBINE.

Philadelphia, June 11.—Acting upon instructions from Washington, United States District Attorney Thompson will tomorrow move against the so-called umbrella trust. It is alleged there is a conspiracy among the makers of umbrellas and umbrella frames in restraint of trade for the purpose of fixing the prices of the products of the factories.

Ohio Prosecuting the Standard Oil. Findlay, O., June 11.—The first of 322 cases against the Standard Oil company brought by the state on charges of violating the Valentine anti-trust law was taken up today in the common pleas court. The evidence will principally consist of the submission of documents.

Now Gets After Umbrella Trust. Alleging monopoly, government moves to break up still another combine.

Employers of Labor Meet. In Convention at Indianapolis in the Interest of Trade Schools. Indianapolis, June 11.—A convention of men from national associations that are employers of skilled labor, called for the purpose of considering matters pertaining to the condition and additional development of trades schools, assembled here today. The attendance is far greater than anticipated.

MARQUETTE, MICH., JUNE 12.
 Entered as mail matter of the second class
 in the postoffice at Marquette, Mich.

Milwaukee's boyish mayor has obtained a new plighting. How about that reported theatrical engagement?

The small consumer who has been in somewhat of a temper over his water meter will be pleased and gratified to learn that the big fellows are getting theirs.

We are not hearing much from Mr. Harriman these days. He is a somewhat changed man from the Mr. Harriman who testified so defiantly in the course of the insurance investigations.

Secretary Taft's most significant remark at Chicago this week was to the effect that he was tired of the backward weather. Here is a thing on which both Roosevelt and anti-Roosevelt Republicans will agree with him.

Mayor Becker's automobile may be welcomed as a novelty by Milwaukee people, but if the mayor succeeds in popularizing the caliope attachment there will be a general scurrying to the city council to get a prohibitory ordinance.

Politics are to be eschewed at Oyster Bay during the president's vacation. The rule is to be so rigidly enforced that if Senator Foraker came along promising to get into the front seat of the Taft band-wagon he would be denied a hearing.

President Roosevelt's visit to the Jamestown exposition was of nine hours' duration. During that time he delivered two speeches; shook hands with thousands of exposition visitors, reviewed a large number of troops and a magnificent naval demonstration. That is what it means to be a strenuous president.

Ishpeming has raised something over \$2,000 for its Fourth of July celebration. Marquette has done likewise. Ishpeming will have two bands. Marquette will have two or three. Ishpeming will have a balloon ascension. The Marquette committee is talking air ship. Both are to have grand, street pageants. The preliminary arrangements show an intention on the part of both cities to make the eagle scream as she has never screamed before. It's only too bad that the celebrations aren't to be held on successive days, so that the people could take 'em both in.

The Copper Country Evening News says:

Representative Abrams denies the statement published in the lower peninsula press that there is a well defined sentiment in the upper peninsula in favor of Dr. James E. Bradley of Eaton for the next Republican gubernatorial nomination. He says the Republicans north of the straits have not yet selected any man in particular as their favorite for the place, and that this he undoubtedly is right. The U. P. never gets overly enthusiastic about the governorship even in the heat of a campaign and it seems certain it is not going to work up any amount of sentiment for any prospective candidate at this early day.

We agree with the council that the minority report of the finance committee proposes the largest measure of economy consistent with doing the work that ought to be done in the parks and cemetery and on the streets. We all like low taxes, but we don't want any step backward in the maintenance of the city. The appropriations for the park, cemetery and street commission exhibit not only a considerable cut under the amount asked, but a considerable cut under the amount actually expended last year. It has been the theory, however, that the park, cemetery and street commission, by better methods than formerly prevailed, will be able to make a dollar go farther than ever before. Perhaps the council wants to see whether the theory is correct. When all is said \$22,000 is a considerable sum, and the commission will doubtless plan to accomplish good work with it, even if its members would have liked to have been given a little more money. As for the \$10,000 reduction from the total of appropriations of last year it bears evidence of a proper desire on the part of the present council to closely scrutinize expenditures, though it will work out

so thin in taxation that the average rate payer will hardly know that the money has been saved.

As far as it has gone the Haywood trial has appeared fair and impartial. There is an absence of the feverishness of apprehension that foreran the trial, as it has been generally recognized of late that the proceedings are being conducted by the court without bias and that the accused are assured of even justice. Except for the seriousness of the charges the trial is not different from any others. The result will depend on the success of the lawyers in impressing the jury. Orchard's story was startling in its allegations and impressive in its details, but it will be skillfully attacked by the defendant's counsel. The line of defense, it has been indicated, will be an attempt to show that Orchard was working into a counterplot to discredit and ruin the Western Federation of Miners. The case is being followed closely, and will be to the end. From all present indications the verdict will be reached in a way that will persuade all fair-minded men that it is a fair and just verdict.

An important election is to be held in Des Moines on June 30. It is to decide whether or not the city government shall be placed in the hands of a commission. It is the Galveston idea improved upon in various ways. The commission, as proposed, is to be of five members elected annually from the city at large, with salaries sufficient to enable the members to devote their entire time to their duties. The present government is made up of a mayor and two aldermen from each ward, with the usual other officers. It is contended that the old system is unsatisfactory, that there is a general lack of responsibility in the management of municipal affairs and a great difficulty in getting results from the money expended. Des Moines wants to try the new plan to see if conditions can be improved. The change is opposed by the ward politicians and various interests to whose advantage the old system works. What the people think about it will be known when the vote is counted. If approved at the polls, Des Moines will be the first Northern city of any importance to adopt the idea that originated in Galveston's period of distress. If the result is satisfactory there it is to be expected the future will see a rapid spread of the idea to other cities which have reason to be dissatisfied with the extravagance and inefficiency of aldermanic management.

The big life insurance companies, with all their piled up assets, surpluses, liabilities and scandals have no monopoly of the business. The fraternal system has won a large place in the insurance field, and is growing in importance. The New York department of insurance has been looking the matter up. The first beneficiary society, the Ancient Order of United Workmen, was organized in 1826. Now there are about twenty distinct associations organized on similar lines, and they have a total membership of 5,947,760, carrying insurance to the amount of \$7,051,824,000. The increase in membership in 1906, due in part no doubt to the scandals in the old companies, was 977,207, carrying nearly a billion dollar insurance. The disbursements last year in benefits was \$67,721,000, an average of \$5,500,000 a month paid to the widows and orphans of the deceased members. The records of fraternal insurance during the thirty-eight years since the first began business show very few scandals. There have been no yellow dog funds, no meddling in politics, no subsidizing of legislatures or newspapers, no participation in flotation schemes and no \$100,000 presidents or vice presidents. The associations have not built up enormous surplus accounts, nor erected costly buildings in which to transact business. They have, however, given insurance at the lowest possible cost and paid claims when presented. There have been some failures, but the number has not been great and the cause has been defects in the plan and not dishonesty in the management. The defect that has been most fatal to these associations has been the flat rate, which gives cheap insurance when the association is young, but leads to trouble when the members become advanced in years. There are still flat rate societies, but more and more they are adopting the standard table and with the changes are becoming stronger and safer.

Only a few days ago the beet sugar manufacturers of Nebraska publicly denounced the proposal to admit sugar from the Philippines free of duty as a proposal to kill the home industry. Secretary Taft in his Memorial day address had urged this measure as an act of justice to the Filipinos and the manufacturers took this way of replying to him. The position assumed by the beet sugar men exemplifies admirably the attitude of all the beneficiaries of the tariff. They all object strenuously to any modification of the schedules at all on any commodity, arguing, apparently, that if they allow even the most obviously necessary change to be made it will be dangerous. If the people obtain one change they will be encouraged to demand others and in that case some of the monopolies are liable to suffer. They take the ground that they must all stand together, and it must be said for them that they live up to the letter of their understanding.

Secretary Taft in his address showed

quite plainly that the beet sugar men have nothing to fear from Philippine competition. "The sugar and tobacco interests," he said, "are afraid that the introduction of the Philippine products may affect them. Nothing could be further from the truth. The introduction of Philippine sugar into the United States, assuming that it might rise to 200,000 tons, would still leave to be brought over the tariff wall 900,000 tons, and could not, therefore, in any degree affect the price of sugar in this market."

It is very evident that as long as it is necessary to import a single ton of sugar to the cost of which the tariff tax must be added the price of sugar in this country to the consumer will be governed by the cost of that ton. The beet sugar men can ask and obtain for their product the amount which it costs to raise and transport sugar from the competing country, plus the amount of tariff tax. They can do this because the consumer cannot obtain what he needs for a less price from any other source. As long, therefore, as we would be obliged to import close to a million tons annually of tariff taxed sugar in addition to what we could obtain free of duty from the Philippines there would be no danger whatever to the home producer. The Nebraska beet sugar men suffer from an excess of selfishness, or are grossly ignorant when they raise such a cry as that which they have raised against Mr. Taft for advocating a simple measure of justice to a people under our rule.

Upper Peninsula

Sheep Killed by Dog—Stephen Farrell, a farmer at Hardwood, Dickinson county, reports the recent loss of two sheep. They were found in the pasture with their throats partly chewed. The depredation is supposed to have been done by a dog. Mr. Farrell has filed a claim for indemnity with the township board for the reason that the licensing of canines is not enforced by the board.

New Telephone System—The Michigan State Telephone company is to have opposition at Munising, the Alger county seat, where is acquired the system of a home concern some months ago. A franchise authorizing the installation of new telephone service has been granted by the common council to Dr. G. A. Trueman, a resident of the village, and it is announced that the establishment of the system will be undertaken immediately.

His Body Cut in Two—Death in horrible manner has been the fate of Nelson Moray, a steam shovel engineer, formerly of the Menominee iron range, according to advices from Hibbing, Minn., where he had recently been employed. While Moray was repairing the engine, an assistant accidentally came in contact with the throttle, starting the machinery. Moray was caught and was nearly cut in two. His body was terribly mangled.

Corporations Pay Bulk of Tax—As approved by the board of review, the total valuation of the taxable property in the city of Iron Mountain now stands at \$5,272,000, against \$5,129,000 last year, or an increase of \$143,000. Of this amount, \$3,829,250, or 72.64 per cent, comprises the assessment levied against the various corporations, and thus of the total taxes only a trifle more than one-quarter will be paid by the general public. The valuation given the corporate holdings is as follows: Steel Corporation, \$2,573,000; Pewabic company, \$815,300; Dessau Mining company, \$33,900; Iron Mountain Water Works company, \$87,000; Iron Mountain Electric Light & Power company, \$28,000; First National bank, \$93,850; Commercial bank, \$91,200.

Remarkable That He Lives—With skull crushed, leg badly fractured and otherwise severely bruised, Victor Saari was picked up at the tenth level of the Victoria mine. He had fallen a distance of 100 feet, walking into the shaft at the ninth level, and remarkable as it may seem he still lives. However, his chances of recovery are regarded as very slim. Minor casualties reported from various upper peninsula localities are as follows: John Bodine, employed at the Cabana mine, Menominee range, both legs broken by a falling timber; William Nutting, a mill hand at Manistique, three fingers cut off by a saw; Edward Maharg, leg amputated, the result of being run over by a train near Pembine.

company for seventeen streets, under the contract recently awarded to us, was \$1.70 1/2. In 1904 crushed rock cost 7 cents per cubic yard. This year it will cost us 90 cents per cubic yard, in 1900 labor cost from \$1.50 to \$1.75 a day. A present time labor is from \$2.25 to \$2.25 per day. This you will see that with rock costing 28 per cent more and labor 25 per cent more than it did three years ago, our bids average six cents per cubic yard less than the Striffler company bids of three years ago."

Big Power Project—Backed by William Holmes, million air lumberman, rapid progress is being made with the construction of the electric plant at the Grand Rapids of the Menominee river, the completion of which will be a boon to the territory between the cities of Escanaba and Menominee. Already many bids for power have been received, and it is certain that the wheels of numerous industrial plants within a radius of fifty miles will be turned by energy generated by the force of water long permitted to go to waste. More than a score of towns will be benefited. Mills will be given all the power needed. In small shops where power is installed running expenses will be cut in two and the formal opening of the plant will mark the end of many a kerosene lamp in farmers' homes.

AN ORDINANCE.
 An ordinance requiring fenders upon street cars.

The City of Marquette ordains:
 Sec. 1. It shall be unlawful to operate or run any car upon any street railway track in any street of the City of Marquette, after Aug. 3rd, 1907, unless the front end of such car be properly equipped with a fender so constructed and in such condition as to prevent persons and animals from being run upon or run over by such car.

Sec. 2. Each day that such car shall be operated or run in violation of this ordinance shall be deemed a separate offense, and each superintendent, managing officer, agent or employee of any street railway or interurban railway who shall direct or permit or engage in or assist in operating or running any car in violation of this ordinance shall be punished in accordance with an ordinance defining offenses, prescribing penalties and providing for the employment of officers, adopted April 25, 1898.

Adopted, June 3rd, 1907.
 DANIEL S. DONOVAN, Recorder.

Approved, June 4th, 1907.
 JOHN ROBERTSON, Mayor.

City Brevities

Today's weather: Showers; stationary temperature.
 Yesterday's temperature: Seven a. m., 54 degrees; noon, 53; 7 p. m., 49. Maximum, 57 degrees; minimum, 44.

W. H. Sheridan of Munising, passed yesterday here.
 E. F. Nelson of Oshkosh, Wis., is visiting in the city.
 D. M. Carstens, of Ironwood, is looking after business here.
 Thomas Howie has gone to Republic to look over some timber lands.
 George P. M. Collins, of the Soo, is looking after business in Marquette.
 Frank Ellison of Duluth, is a guest of his mother, Mrs. Agnes Ellison, No. 125 Champion street.
 Mrs. A. Pollette, Jackson street, is entertaining her sister, Miss Minnie Olinne, of Humboldt.

The W. C. T. U. will meet this afternoon at 2 o'clock with Mrs. S. W. Wylie, 216 West Ridge street.

The members of Queen City tent, No. 48, K. O. T. M. M., will meet at Keough's Hall tonight at 8 o'clock.

J. C. Maynard, formerly of Escanaba, now of Los Angeles, is a guest at the residence of A. E. Archambeau, West Hewitt avenue.

Superintendent of Police Murphy, for thirty years connected with the police department of Bay City, brought John M. Lasher to the Marquette prison this week, to serve a term for grand larceny. Lasher was given not more than four or less than two years, with a recommendation of three.

Miss Violet Greenwald, formerly of this city, was united in marriage yesterday to Hanson MacDowell, superintendent of an iron works company at Muskegon, which city will be their place of residence. Mr. MacDowell was until recently superintendent of the Hodge Iron works at Houghton, of which village his bride had been a resident for some years past. The marriage yesterday took place at the home of the bride's sister at Milwaukee.

\$6,000,000 Mortgage Filed—A mortgage in the sum of \$6,000,000 given by the Iron Superior Iron and Chemical company to the Union Trust company of Detroit, and covering all the property and assets of the former company, was filed with the register of deeds yesterday. The mortgage is given to the trust company to protect it in guaranteeing the integrity of the bond issue of the Lake Superior Iron and Chemical company.

Will Repeat Cantata—The students of the Northern Normal who were heard in a cantata, "King Rene's Daughter," in a recent concert at the Methodist church will repeat it this afternoon at 4 o'clock in the assembly room of the school wing. There will be no admission charge and the public will be cordially welcome. The cantata is given an excellent rendition by the young ladies. The occasion will also give people an opportunity to examine the Normal's fine collection of new pictures.

Storm Suddenly Halts—The heavy rain which was expected in this vicinity and which was to have proved such a benefit to farmers by promoting the growth of crops and grass, halted suddenly at the Mississippi river, where it still continues to average the course. In twenty-four hours the storm barely moved 100 miles, though it travelled rapidly when it first started east from the Rocky mountains. Observer Patrick says, however, that it is certain to arrive here within a day or so.

Kills Four Wildcats—Peter Moore, who has charge of the dam at Silver Lake, Champion township, at the headwaters of Dead river, brought the skins of four wildcats to the county clerk's office yesterday morning and received \$12 in bounty. The only bounty now paid upon wildcats is \$3 a head, offered by the county. Peter Fritz, of Twin township, brought in a wolf and secured the \$27 bounty. The animal was one of the few trapped in this county within the past year, most of the bounties paid out being on animals that were poisoned.

Greek Cannot Accept—Lambros D. Imtrakis, the Greek runner, has declined to accept the challenge of Joseph L. Smith's "unknown" for a fifteen mile race as the feature of the Fourth of July celebration, stating that it is impossible to spare the time from his work at the Stafford drug store. Mr. Smith now stands ready to match his runner with any other athlete in the county at from five to fifteen miles. The Fourth of July committee on arrangements will offer a gold medal emblematic of the championship of the county if the event can be arranged.

Discovers Bird's Species—The mysterious bird which was recently killed on Dead River and brought to M. M. Stierle to mount has been identified as a Horn Grief. Mr. Stierle discovered its species after looking through a number of authorities. In appearance it resembles a cross between a duck and a woodcock and its feet are only partially webbed. The bird is described as being aquatic in its tastes and habits, though it is often found at great distances from the water. It is a strong flyer and migratory in its habits. Within the past few years its numbers have greatly decreased.

Was Great Distributing Point—There was a time, remarked an old resident yesterday, "when a great many of the necessities of life could be purchased in Marquette cheaper even than in Detroit. This was before the country had such a network of railroads and while the great lakes still had a practical monopoly of the shipping. Then butter, eggs, cheese and apples flooded into Marquette as a distributing point. Take apples for instance. It wasn't so many years ago that thousands of barrels were received annually at the F. B. Spear & Sons dock. Mr. Spear in the early '70's purchased them as low as \$1 a barrel. One year, after a hot fall when the apples had ripened unusually early, he was caught with many thousands of barrels and had to shovel tons that had rotted on his hands into the bay. Now the increased demand and decreased supply of apples prevents any but a very few from reaching this port."

Has your stomach gone out of business? If so you can reach the top-notch of physical and mental power by using Hollister's Rocky Mountain Tea. 33 cents. Tea or Tablets. The Stafford Drug Co.

Cobalt Gossip

The return from the initial shipment from the Temiskaming mine have been received, reports a Cobalt correspondent. From a fraction less than twenty-seven tons of ore \$90,000 was returned from the Larder smelter. The ore was taken from a blind vein at a depth of seventy feet and from a property which less than a year ago was regarded as a wildcat.

The big new compressor for the Buffalo is on the ground being installed and should be in operation in a few days. Thus, the output of the mine, which has been heavy for several months past, will shortly be doubled. Three cars of ore are being shipped. In the mine development work goes steadily on and on the surface prospecting is being done on the scene of the recent big strike, which will be opened up very shortly.

Last week, as a result of systematic surface prospecting and trenching, two new blind veins were discovered on the property of the Cochrane Cobalt Mining company. The larger one of the two is almost two feet wide, well mineralized though at present the ore has not been assayed, and it is impossible to say how rich it is. These veins are now being stripped. The Cochrane adjoins the Temiskaming and Beaver mines, and in addition to the new discoveries above mentioned has a well defined vein eighteen inches wide, stripped for 400 or 500 feet, and carrying on the surface as high as 2,800 ounces of silver.

Concerning the operations at the Abitibi & Cobalt properties, Superintendent Bailey, M. E., reports that at mine No. 1, the miners are down ninety feet, and at the 100-foot level will crosscut and tap the parallel calcite veins, when results will be known. This should happen in about ten weeks. On the properties adjoining the Empire men are at work trenching for the latter's cobalt and silver vein, and another force has been put to work on the Lorraine claim in the conglomerate formation of which indications are favorable. On the company's claim adjoining the Casey mine (which bears an eight-inch calcite vein, assaying over 8,000 ounces silver to the ton) work has been suspended, as the very extensive underground developments going ahead on the Casey will prove it to a great degree with no expense to the Abitibi company. On the group of claims in southwest Coleman, a four-inch calcite vein has been struck and sinking is being carried on.

In a circular issued to stockholders, the management of the Cobalt Central Mines company says that development work has now reached an advanced stage. The sink on the Big Pete vein is down about 140 feet. The No. 1 drift has reached a distance of about 175 feet. Another drift has been started at the 115-foot level and is now in for a considerable distance. In all of these workings the ore is of uniform value. It is stated, indicating that the vein is of a permanent formation and may be mined to a considerable depth. Outside development has been considerably retarded by the severe winter weather, but from now on the opening up of new territory will be vigorously undertaken, in order that the numerous veins showing upon the surface may be developed as quickly as possible. A very large tonnage of ore has been opened during the winter months, upon which no stoping has as yet been done. The company's concentrating plant is in course of construction and Manager Elmer reports that it will be in full operation by the early part of August.

John Josten has been elected treasurer of both the Nipissing Mines company and Nipissing Mining company, succeeding F. W. Holmes in both positions. Mr. Josten is associated with Samuel Newhouse in New York. The directors of the Nipissing Mines company will meet in New York and declare the regular quarterly dividend of 3 per cent, which will be payable July 20. Nipissing is now in a better position financially than at any time previous. From development work alone, it is asserted, it is extracting sufficient ore to show earnings of approximately \$100,000 a month; this compares with an average of \$70,000 for the first three months of the current year. There is now said to be \$1,000,000 of ore in sight. A new shaft has been started on the Nipissing property near the McKinley-Darragh line, where the recent rich strike was made. When it has been sunk 100 feet, drifting will commence to the eastward under a swamp toward Peterson lake. The new vein, which has been named the Kendall is apparently a continuation of No. 27. The ore runs rich there and will average several thousand ounces to the ton. Of the company's six shafts the deepest is down 125 feet. No actual mining is being done on the Nipissing property and none will be done there this summer, the work contemplated being of the nature of development and exploratory. In these operations, however, enough ore is being extracted to pay current dividends and working expenses, leaving a small amount for surplus. The management is well pleased with the results shown in the short time that the property has been under the supervision of Mr. Drummond, who recently assumed charge after having been at the property of the Dominion Copper company. The working force has been increased to 370 men, and this number is expected to be augmented before long. Nipissing is now making shipments of a car every other day, but it is not anticipated that heavy shipments will commence until regular mining operations are started. It has not yet been decided whether Nipissing will build its own smelter. After going through the mill the ore is shipped to the United States to be refined and considerable quantities are sent to Germany, after the silver values have been extracted on this side, where the cobalt ores are treated. When the books are closed for the payment of the next dividend they will show a substantial increase in the number of shareholders from the previously recorded number of approximately 8,000.

PROGRAM MADE PUBLIC.
NEW ENGINE ORDERED.

Firemen's Track Events to Be Pulled Off in Two Days at Tournament.

Westinghouse Electric Company Has Given Contract for Lighting Plant.

The board of public works and lighting committee of the council decided at a meeting Monday to award the contract for the new turbine for the municipal lighting station to the Westinghouse Electric company, whose bid was considered the most favorable, and whose plan it is thought will give the best satisfaction. The turbine will be ordered within a few days. The contract was signed by Mayor Winter and City Recorder Mitchell. The cost of the turbine will be \$11,800.

The Westinghouse people have advised the city officials that the turbine will be delivered in Negaunee in less than ninety days and that it is possible that it will be received in sixty days. The management has promised to give the order immediate attention. An expert will be sent from the factory to direct the installing of the plant and he will remain here until the machine is in its first class working order.

LOCAL LACONICS.

Mr. and Mrs. C. B. Stowell of Hudson, Mich., were visitors in Negaunee yesterday.

Mrs. Able Levine and daughter left yesterday for Milwaukee, where they will spend a few weeks visiting friends.

Mrs. Hassett has returned from a visit with her son, John and his family and other relatives, on the Mesaba range.

C. T. Fairbairn, general manager of the Republic Iron & Steel company's mines, was in Negaunee yesterday, accompanied by Gordon Fellows and E. H. Crookhill of New York.

C. L. Sporley offers his Franklin touring car for sale in this issue. He will sell the car at a very reasonable price as he has concluded to purchase a new one. The Franklin is a 1905 model and is in good condition.

During the past few weeks the buildings at Moll's farm, east of the city, have been broken into and much damage has been done. The stoves, dishes, etc., have been broken and the buildings have been damaged.

There were forest fires on sections nine and sixteen, east of Negaunee, near the dues area, Sunday and Monday. The rain Monday night is said to have put out the fire in places, but it is feared that it will start up again if more rain does not fall.

One of the police officers picked up a dark brown mare on the streets at 3 o'clock Monday morning and the animal seemed to be in a state of panic. The horse had evidently broken away from a buggy, as it dragged part of the harness after it. It is thought that the horse is owned either at Ishpeiming or Marquette.

The funeral of the late Mrs. John Webb, who died suddenly Sunday night, will be held tomorrow afternoon at 2:30 o'clock from St. Francis Methodist church, under auspices of the Negaunee branch of the National Protective legion, of which she was a member. The four sons of the deceased, who are located on the Mesaba range, will arrive home this morning.

John Hendrickson, a resident of Princeton, has been bound over to the circuit court, having been arrested on the charge of assault with intent to do great bodily harm less than the crime of murder. Hendrickson and his partners got into a row with other men at the Mesaba range last Saturday and during the fracas Hendrickson used his knife freely, slashing four different men. He was given a hearing before Judge Thoren in this city.

EVERY MAN HIS OWN DOCTOR.

The average man cannot afford to employ a physician for every slight ailment or injury that may occur in his family, nor can he afford to neglect them, as so slight an injury as the scratch of a pin has been known to cause the loss of a limb. Hence every man must from necessity be his own doctor for this class of ailments which occur in his family on prompt treatment, which can only be had when suitable medicines are kept at hand. Chamberlain's Remedies have been in the market for many years and enjoy a good reputation.

Chamberlain's Cough, Cholera and Diarrhoea Remedy for all complaints.

Chamberlain's Cough Remedy for coughs, colds, croup and whooping cough.

Chamberlain's Pain Balm (an antiseptic liniment) for cuts, bruises, burns, sprains, swellings, lame back and rheumatic pains.

Chamberlain's Stomach and Liver Tablets for constipation, biliousness and stomach troubles.

Chamberlain's Salve for diseases of the skin.

One bottle of each of these fine preparations costs but \$1.25. For sale by The Stafford Drug Co.

FOR SALE—Five passenger Franklin touring car, 1905 model, in good condition. C. L. Sporley, Negaunee. 6-12-17.

LOST—Red heifer, rose bell, to strap of which a piece of clothes line was attached. \$5 reward. M. J. McIntire, Cambria mine. 6-10-17.

LOST—Jersey cow, very light brown, short horns, with bell hanging by chain, long tail. Reward, Thomas Bowdin, Barn St., Negaunee. 6-8-17.

THINK TWICE.
EPIDEMICS DIVERT BUSINESS.

"The recent epidemic of diphtheria and scarlet fever in the city have, it is reported, diverted thousands of dollars' worth of business from Chicago. In one town after another the epidemic has been reported, and the people near Chicago, who were said to be considering quarantine measures until the epidemic had passed, Health Commissioner Whalen called a consultation of big commercial interests which resulted in active co-operative measures being taken to prevent the spread of disease and stamping out the epidemic."—From American Carpet & Trade Record, Philadelphia, March 10, 1917.

There is no greater source of infection than that related to the handling of carpets in infected districts and cities. They as a rule are bought up by the City Rug Factories and lend their presence to infect other innocent patrons. In having your rugs made up from old carpets you will avoid all this risk by shipping to a well known sanitary factory that insures you against any chance of this kind we refer to

Mining News

MUCH COPPER WANTED.

Large Needs to Fill When Prices Work Downward Somewhat.

The healthful break in the price of copper which has been hanging over the market like an ominous cloud, apparently is at hand. But its effect has been discounted and there is every reason to think that it will have a beneficial rather than a bad effect on the situation marketwise.

The Calumet & Hecla company, which dictates the price of Lake copper, for the reason that its product has become through care in the process of production the standard of all fine copper, is understood to have marked down the price of copper to twenty-four cents to its regular customers for the latter part of the third quarter of the current year which is to say the months of August, September and October. This rate will be given the regular customers of the company, who are always given the very best prices that the market situation affords. This is not to say that the company will not sell copper high during these months but that the bulk of its supply will be sold at these figures.

It is already known that the Phelps-Dodge interests, who use their customers in much the same manner that the Calumet people do, will likewise make a concession for the months of July, August and possibly September, although the company has not much copper sold abroad for these months. It is copied by the trade generally that these concessions on the part of these big interests will be followed by concessions on the part of the United Metals Selling company, which will give the market the break that it needs from the speculative standpoint, but which has been forced upon it entirely by sentiment.

The fear that has been upon the manufacturing element that copper would break sharply has been the determining factor in the market and as future transactions would be made with sentiment was in that condition. Concessions that are being made are in order to get the market started. Once it is under way we may expect to see prices advance and the prediction is hazarded that if the price is left off at the present time in order to encourage trading in the metal it will be back at the old figures before the first of the year. Possibly the thing that is needed at the present time is a break in the metal of twenty cents the pound, which would be followed by sharp trading which would in turn point the price higher.

One other element must be considered in viewing the situation as a whole. Many small manufacturers, forecasting high prices, two years ago laid in stocks of the metal, and they have been using what they had sparingly, buying a little now and then to keep up and thus averaging their price. Many of these supplies are now giving out and must be renewed in the very near future. There is plenty of new business of this sort hanging over the market. The situation of the copper shares hinges entirely upon the price of the metal. The present low levels of prices have thoroughly discouraged any new issues that can be reached, and business would start again just as soon as the public mind rests assured that the expected break has occurred. The copper public would be able to see what is patently the fact that copper shares are selling on extremely low levels. If a drop in price of the metal should occur, plenty of copper stocks might come on the market or the break, but there would be some easy money taken by those that had the courage to pit in and buy them to a finish. During the past few weeks there have been considerably more stock bought by the investment interests, had it not been for the fear that they could eventually be gotten much cheaper.

This is a very poor time to get bullish on copper or to have any opinion as to what happens in the market it is to be remembered that the industry is going merry ahead and that even if there is a let-up in business this country is going ahead with its development in all directions and certainly in no manner an always enlarging part in the future development of its industries.

ALASKA'S COPPER DEPOSITS.

Not Likely to Figure as Source of Production for Some Years.

Walker's copper letter in the Boston Commercial says: Every little while we hear the opinion expressed that Alaska will soon be in a position to supply the world with all the copper it needs. So far as men who know the copper mining business are concerned there is no occasion to discuss this proposition; but for the benefit of those who do not know that it is a tremendous undertaking to develop and equip a copper mine and prepare it for a large annual production, I take this occasion to make a brief explanation. At present Alaska is almost inaccessible, viewed from a business standpoint. It may have harbors, but they are not equipped to handle large vessels and the heavy ore shipments which would be necessary to a big copper producing business. It lacks railroads, and also, what is most vital of all, a supply of labor.

Here, in the United States, where we have all the advantages of favorable climatic conditions, and where labor is plentiful. It is a tremendous undertaking to develop a copper mine when it is as far as forty miles away from a railroad. What then can be said of the copper deposits which exist in Alaska hundreds and thousands of miles away from transportation, in a country scantily populated with Indians and Eskimos where there is not so much as a country road developed, where very little timber exists and where the country is covered with snow seven to nine months of the year?

The owner of a copper property in Alaska is obliged to purchase and ship from this country every ounce of equipment which is to be used in its development and operation. He must also import his labor from the United States of Canada, and he is prevented from doing the latter by the contract labor laws. He must create conditions of living which will appear to his miners and other employes sufficiently to induce them to stay there; and this means that much more substantially built, and consequently more expensive, dwellings must be provided for those in use in any portion of the United States. All the food supplies for men and horses must be shipped from the United States. The coal deposits of that country are not developed as yet, and the copper mine operator must also import his fuel and

SHANNON.

It is understood that the Arizona Copper company, in return for the Shannon retiring from the railroad field, will give that company a material reduction in freight rates on both the Coronado railroad, the Arizona & New Mexican railroad and the proposed new road when built. It will also reduce the cost of limestone to the Shannon, all of which will effect a direct saving to the Shannon of about \$100,000 per annum. The building of the high line road will obviate the need for new roads through several days in the Shannon and should save the Shannon several hundred thousand dollars per annum, and save the Arizona company very much more. The company is under the efficient management of W. C. Bennie, who has long experience in his chosen profession at the Rio Tinto, Mountain Copper and Greene Consolidated companies. Mr. Bennie has had a difficult proposition to handle in the Shannon, but he now has a complete reduction plant in every detail, concentrator, smelter and converter plant, and the mine is in a position to not only supply for many years the present needs of 700 tons of ore per day, but an increase in its output to 1,000 tons per day, which, with the custom ore it is proposed to handle, will meet the increased smelting capacity when the new 1,000-ton furnace is placed in commission within a few weeks.

This new furnace is the largest in Arizona. The two present furnaces have been put in thorough order. They are each of 350 tons capacity. These two furnaces have produced as high as forty tons of blister copper per day. The regular output, however, runs between twenty-nine and thirty tons per day. It is the intention of the company to strike in May by reason of lightning striking the plant, the Shannon Copper output for May would have been in excess of 1,500,000 pounds. With the new furnace the Shannon company, keeping the furnace at a spare, should produce regularly from 1,800,000 to 2,000,000 pounds of copper per month. Of the present output of 700 tons of ore per day from the mines, 60 per cent is concentrated and 40 per cent smelting ore.

The company has been suffering from lack of mining timbers due to an embargo by the railroads. This has necessitated the working over of some old

LAKE COPPER PRODUCTION.

The estimated production of the Lake Superior mines for May was 20,623,230 pounds, a slight decrease of 95,122 pounds from the April figures, but 500,516 pounds in excess of the average output for the first four months of this year. The output of the Lake mines for the first five months of 1917 is now more than 6,000,000 pounds greater than the estimated output for the same period last year, the comparative figures being 100,877,474 and 94,294,290 pounds. Detailed figures for May, compiled by the Boston News Bureau, follow:

Company	Output Lbs.	Per cent
Calumet	8,520,000	44.78
Wolverine	734,840	3.59
Tamarack	980,000	25.15
Champion	1,025,000	26.13
Baltic	1,408,824	22.15
Trinmountain	741,120	19.04
Almbeck	480,000	18.66
Osceola	1,200,000	18.46
Alonzo	200,000	20.00
Winnon	180,004	19.42
Quincy	2,170,000	19.04
Moshaw	706,490	16.82
Isle Royale	270,000	17.28
Centennial	199,222	16.80
Franklin	400,000	13.60
Michigan	222,460	18.63
Mass.	189,000	14.87

OSCEOLA.

There is much interest in the probable action of the directors of the Osceola on the July dividend. Boston is inclined to the opinion that the Bigelow management will attempt to make itself solid with the great body of stockholders, who are opposed to its continuation in office, and who are patiently waiting for the settlement of the legal squabble in which they have innocently become involved through their president, by declaring a good-sized dividend of at least \$10 a share. The company is carrying money enough—unless all reports are true—to pay \$200 to \$300 a share, and stockholders think they ought to get a better dividend than the Quincy at any rate.

Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments must be combined. One is local, one is constitutional, but both are important, both essential.

Dr. Shoop's Night Cure is the Local.

Dr. Shoop's Restorative, the Constitutional.

The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerves, all tissue, and all blood ailments.

The "Night Cure," as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, heals local weaknesses and discharges, while the Restorative, easing nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Babbitt's Liquid—as a general tonic to the system. For positive local help, use as well

DO NOT NEGLECT THE CHILDREN.

At this season of the year, the first unnatural looseness of a child's bowels should have immediate attention. The best thing that can be given is Chamberlain's Colic, Cholera and Diarrhoea Remedy followed by either oil or directed with each bottle of the remedy. For sale by The Stafford Drug Co.

TO PIPE CREOSOTE INTO THE HARBOR

WATER QUESTION TAKEN UP AT MEETING OF PARK, CEMETERY AND STREET COMMISSION.

BUDGET TO BE REVISED

Cut By Council of \$5,660 Requires a Readjustment of Estimates—Board to Meet But Once a Month.

The water question bobbed up at the meeting of the park, cemetery and street commission last evening.

President Palmer of the water board was present, and stated that it was probably generally known that a recent experiment had been made of running a small pipe 2,000 feet off shore and drawing the water from a depth about twelve feet above the bottom and thirty-six feet below the surface.

Two years ago the pipe had been run out further and the water drawn from close to the bottom. That water appeared to contain more creosote than that in common use. It appeared to the water board that creosote was not to be avoided through piping.

To Revise the Budget.

Commissioner Shea said that he had seen by the Mining Journal that the commission's budget had been reduced by the council from \$27,690 to \$22,030, a cut of \$5,660.

To Meet Once a Month.

A motion by Mr. Shea that the commission hereafter meet on the first Tuesday of every month, was carried.

IS A WORK OF ART.
