

STATE TO RETAIN MORTGAGE TAX

Proposal to Repeal the Law Is Killed in the Legislature—Would Likely Have Been Vetoed in Any Event.

Is Generally Believed the Railway Commission Project Will Share the Same Fate—Conference Committee Is Named by the Senate, but With "Boxers" in the Saddle Agreement Is Considered Improbable—Earle Gets More Money for Good Roads.

Lansing, Mich., June 14.—[Special.]—The appropriation bill for the Michigan College of Mines passed both houses today without change, much to the delight of the upper peninsula members.

Good Roads Commissioner Earle welcomed the administration today by getting \$50,000 added to his good roads appropriation. He asked for \$250,000 for state roads, but it was seen that the budget would be big the house ways and means committee cut him to \$200,000.

Mortgage Tax Repeal Fails. The proposed repeal of the mortgage tax law was killed in the senate today. Mr. Ming moved to take it from the committee, and the vote was 16 to 12.

City Brevities

Today's weather: Fair; not much change in temperature. Yesterday's temperatures: Seven a. m., 72 degrees; noon, 65; 7 p. m., 60. Maximum, 77 degrees; minimum, 59.

Mrs. E. N. Breitung is visiting in Chicago.

D. W. Powell is looking after business in Milwaukee.

Captain George W. Smith left for Duluth last night on business.

James Russell arrived home yesterday morning, from a ten days' trip in the West.

Miss Nellie Moore leaves today for Detroit, where she will visit with friends.

A social dancing party will be given by the Ideal orchestra at Fraternity Hall this evening.

Mrs. H. C. Taylor has returned from a three months' visit in the South, much improved in health.

S. Lemere, of Minneapolis, is visiting his brother and sister, D. Lemere and Mrs. Peter Thibault.

Mrs. E. Breganzar and son, Joseph, of Kankakee, Ills., are in the city for a two months' visit with relatives.

Mrs. F. C. Chesterton, of Newberry, who has been the guest of friends here for a week past, returned home yesterday.

The game between the Marquette and Munising baseball teams scheduled for this city Sunday afternoon is off, as the Munising team is unable to come.

The high school commencement sermon to the graduating class will be delivered by the Rev. Burt at St. Paul's cathedral tomorrow evening at 7:30 o'clock.

Mr. and Mrs. D. Lambert, of Center street, North Marquette, left this morning for a visit with relatives at Detroit and other lower Michigan cities and in Canada.

Charles Perry and party left last night for Chicago. They will proceed from there to western Wyoming, where they will look over a large tract of timber land for a western syndicate.

Bishop G. Mott Williams will deliver the baccalaureate address to the graduating class of the Northern Normal at the Normal hall Sunday afternoon at 3 o'clock. All friends of the school are cordially invited to attend.

The Northwestern and St. Paul roads have announced a rate of one and one-third fare to all junction points on the Duluth & South Shore for the Shriners' meeting at the Soo, June 19. Round trip tickets with South Shore rates added will be sold from all junction points.

Eagles Will Meet Leaders—The Eagles, of Ishpeming, are scheduled to meet the Leaders at the new fair ground diamond Sunday afternoon. As the Eagles are said to be the strongest team in Ishpeming and as the Leaders have demonstrated their ability to play clean, fast ball, the contest should be productive of plenty of excitement. A delegation of Ishpeming fans is expected to be present to root for their team.

Holding Final Examinations—The final examinations at the high school commenced yesterday and will be concluded Monday. The classes existing in the graduating class will take place at the high school auditorium Wednesday evening. The commencement exercises and awarding of diplomas will occur at the Marquette Opera House Thursday. The address to the graduates will be delivered by Preston W. Search, of Cincinnati, O., noted as an educator, author and traveler. All the schools will close for the summer vacation Thursday.

Yesterday Was Flag Day—Though no official notice was taken of the event a number of flags were displayed throughout the city yesterday in honor of Flag day. On June 14, 1777, congress, by resolution, adopted the flag. At that time there were only thirteen stars and the same number of stripes, corresponding to the original thirteen states. Now there are forty-five stars, and after July 4, when Maryland and Oklahoma territories are admitted as a state, there will be forty-six. The design on the flag is partially derived from the Washington coat of arms. The first flag was made by Betsy Ross of Philadelphia. Yesterday was the 129th anniversary of the birth of the flag.

A Compliment to Warne—The following from the Newberry News will be of interest to Marquette people; it concerns Professor Warne, a former resident of this city: "Superintendent Warne is in receipt of a letter from President Angell of the Michigan University at Ann Arbor notifying him that as a result of a recent examination by one of the officials of the university the Newberry High school had been placed on the diploma list of the institution for the ensuing three year period. This is a high compliment to the ability of Superintendent Warne and the efficiency of our high schools, pupils from which will continue to be admitted to the university upon their diplomas without further examination."

Mack Company Arrives—Willard Mack and Miss Maude Leon and several members of their company have arrived in the city. The company closed a ten weeks' engagement at the Metropolitan theater, St. Paul, a few days ago and is enjoying a little vacation prior to opening here for a two weeks' run, Monday, June 24. Mr. Mack will present a number of the old favorites together with several entirely new bills. He has recently received the manuscript of a play written by Sheriff Jack Clewes, of Casper, Wyoming, entitled "The Man With the Boiled Shirt," which may be given his initial production here. Mr. Mack and Miss Leone have appeared here before, and are assured of a most cordial reception.

Not Naturally Man Eaters—"I see that the big shark in the Stanislaus county

exhibition is commonly referred to as a "man eater," said W. E. Rivers, of Chicago, at the New Clifton yesterday. "I know considerable about sharks and I can confidently state that there is no way of telling whether a shark is a man eater or not except by feeding him one. The truth of the matter is sharks have just as healthy a respect for the human kind as have the wild animals of the land. Fear of man is born in them, just as it is in the lion and tiger. A shark that has never before attacked a man will fight shy of a swimmer until the latter becomes exhausted, and ceases to struggle. Once, however, having eaten a man all his fear of the human race vanishes. It is the same way with a tiger and a lion. While I was fishing off the Florida coast I have driven sharks away from the boat scores of times by splashing in the water with an oar. On the other hand I have had a shark swim about the boat for hours just keeping out of the way of the oar. This latter fellow had probably eaten a man."

FARMER BURNED OUT.

Constantine Hoppe, West Branch Township, Loses His Home.

Thursday, Constantine Hoppe, a farmer in West Branch township, was burned out. While the family was at dinner the roof of the log house caught fire, presumably from sparks from the chimney, and the structure was totally destroyed, as there was no means of fighting the flames. Practically all the household effects and clothing were lost. The structure burned rapidly. Hoppe is a poor man and the loss is a serious blow to him. It has been suggested that he can be greatly helped out if Marquette people who have old furniture he could use in furnishing another home would donate it for that purpose. The family also could use clothes to advantage. There are five children, from three to fourteen years, who are now badly in need of clothes. A little response to this case of need would do a great deal of good. Donations for Mr. Hoppe and his family can be left at the city market, or further information about the case can be obtained from H. J. Koepf.

OPENING A GRAND SUCCESS.

Guests to the Number of 150 Dance and Feast at Country Club.

The formal opening of the Country Club last night was an event that will ever linger as one of the most pleasant of memories with those who had the good fortune to be present. A clear sky and a cool though balmy breeze aided in making the occasion a great success. The guests to the number of 150 went out in a special train leaving the L. S. & I. depot at 7:30 o'clock, and in launches and in automobiles. From a little distance the grounds took on an almost kaleidoscopic appearance, lighted as they were by hundreds of Japanese lanterns suspended among the trees and along the river banks. The interior decorations were lanterns and ground pine.

Dancing began almost immediately upon the arrival of the guests and the worship of Terpsichore was pursued almost without intermission until 11:30 o'clock when lunch was served. Excellent music was furnished by the Ideal orchestra of five pieces. Supper was served country style on the verandas and about the grounds. The menu was simple in character but well prepared, and the arrangements reflected great credit upon Steward Barrons, who had them in charge. Members of the club acted as waiters and overlooked nothing that could add to the convenience of their guests or promote the general enjoyment of the occasion. As the event was entirely informal in character there were no set speeches or toasts making. It was not until the small hours of the morning that the guests returned to town.

SUNDAY AT THE CHURCHES.

First Baptist, Rev. C. H. Maxson, pastor—Services at 10:30 a. m. and 7:30 p. m. The pastor will preach at each service.

First Church of Christ, Scientist—Sunday service at 10:30 a. m.; subject, "Is the Universe, Including Man, Evolved by Atomic Force?" Felix Hall, Opera House block.

St. Paul's cathedral, Rev. B. G. Burt, rector—Holy communion, 7:30 a. m.; morning prayer and sermon, 10:30; evening prayer and sermon, 7:30. The rector will preach to the graduating class of the High school at the evening service, the subject being "Mastery."

The Presbyterian church celebrates its fiftieth anniversary tomorrow. The pastor will give an historical sermon at the morning service, in the evening he will give many reminiscences of early times and will read letters from former members. On Monday evening will occur the church reception and social at the church parlors. Every member of the church and congregation is expected, and elaborate preparations are being made for a notable time.

NOTES OF COPPER NEWS.

Almeek is shipping thirty cars of stamp rock to the Oseola mill every day. Water mains are being laid from the pump at the mine to the location to afford protection against fire.

The Boston Statist is bullish on Old Dominion. Concerning the proposition it says: Just now the company is earning clear of everything about \$200,000 a month, which is about sixty-three cents per share per month, which figures about \$7.50 a share. Old Dominion within a year, on the lowest copper market that we are likely to have, ought to be able to divide at least \$10 per share per annum and to keep its dividends at that rate. Another big factor encouraging is that the company is getting more and more sulphur from its own workings, and can be depended upon to do so. The average has risen to about 75 per cent where it was about 55 per cent six months ago and less than that a year ago. The company in the very near future will see itself entirely

independent of any outside ores, although it plans to develop the extensive business in its vicinity. With the blowing-in of the new furnace the company ought to have no difficulty in keeping its production above 3,000,000 pounds per month.

Butte & London is resuming sinking after the installation of a pump at the 100-foot station. The Butte & London cut one geodesized vein, carrying commercial ore, between the 500 and 600-foot points, and it is expected that this will be found to be a big and rich vein when crosscut from the L500, to which depth the shaft is to be sunk.

The Butte & Bacon company is concentrating all work on the sinking of the Calmet shaft which is down 980 feet, 110 feet having been sunk in May. At the 1000-foot level a station will be cut and crosscuts run north and south to explore thoroughly the mines at that depth. When the crosscut reaches a point under the Belinda shaft which is now 840 feet deep, an opening will be raised to connect with that shaft.

FINE COMMENCEMENT PROGRAM. Exercises Thursday Evening Attended by Large Audience.

It is doubtful if a class of students leaving the Negaunee high school has ever presented a more pleasing program than the one given Thursday evening at McDonald's opera house, when the twelve seniors received diplomas. The house was filled to the doors, many having been obliged to stand. The members of the class and others occupied the platform.

Professor W. C. Hewitt of the Oskosh Normal gave an excellent address. His discourse was in the nature of advice to the students, as well as the parents. Mr. Hewitt has had many years experience in educational work and has made a study of both the high school and college student. His talk was practical and he cited many things that proved conclusively that the boy or girl leaving a high school is not fully prepared to battle with life's problems. He said at the outset that he did not intend to throw bouquets at the graduates, as he thought they needed advice a great deal more than anything else.

Mr. Hewitt told a number of amusing stories, most of them founded on personal experience. He told of his own son, how the lad, when he left school, was like most other boys; thought he was equipped for almost any kind of a position where a fair education was necessary for success. The first year after completing his high school course the boy was sent to a lower peninsula college. Before leaving home he was well supplied with clothing, then stylish in the home town. He was at school about a week when the father received an express package containing the greater part of the young man's clothes. With it came a letter explaining that his outfit was not stylish at the college town and he did not care to wear it.

The young man was provided with other clothes, but at the close of the year his father advised him that he thought a year or so at work before completing his college education would be the proper thing. The boy consented and he left for Denver in search of a position. During the year at college he had studied chemistry, but his knowledge of it was rather limited. In Denver he procured a position which paid him \$17.50 per day. One day the young man applied to the manager of a gas manufacturing plant for a place. The superintendent asked him what he could do but he had to reply that there was nothing in particular that he was fitted for unless it was for the chemical department. He found that his knowledge of chemistry was so limited that he could not hold the job. At the close of the year he was pretty well convinced that it wasn't the clothes that made the man; that he must dig in and learn some particular line and learn it well.

Education, Mr. Hewitt declared, is the foundation of success in every line, but he has found during his experience that the men with the best education are not always the biggest successes in life. Work is essential to success. The

child must build his foundation for success in the school. It is the duty of the parent to see that the child works, not only on his books but on other things as well.

The musical numbers of the entertainment, by the high school orchestra, glee and mandolin clubs, were excellent. Following some of the numbers two or three encores were demanded.

MORE MEN WANTED.

City Could Use a Number on Various Jobs Now Under Way.

There are jobs open for a great many more men than are now available in Negaunee. It is reported that additional hands are wanted at practically all of the mines, and from fifteen to twenty-five men could secure employment from Superintendent Pearce, of the board of public works, who has general supervision of the city improvements. Ten or a dozen are wanted right away to work on the foundation of the city building, and others could be used to advantage in the water works department. Mr. Pearce said yesterday that he cannot find idle men. He doubts whether he can secure the number he needs, as nearly all of the men in the city are holding down permanent jobs. The board of public works intends to push the outside improvement work as speedily as possible during the favorable weather. Additional hands are soon to be employed on the streets to be given a gravel dressing. The completion of work on the foundation of the city building east of the city to a point beyond the cemetery to the city line, near Eagle Mills, will be started soon. Other roads will be given attention later.

HAS FINE CAR.

Dr. H. W. Sheldon's automobile, manufactured by the White Steamer company, was received Thursday, it having come to Marquette by boat. The car was accompanied by an expert from the factory who gave it a severe test Thursday and yesterday. Thursday the car was run over the road to Ishpeming a number of times, out to Deer Lake, around the Cliffs, to Palmer and down to Eagle Mills and back, and its machinery worked perfectly. On the Cliffs trip the car was stopped on one of the steepest grades on the road, and was started again without the slightest trouble. The car will accommodate seven people, and is provided with a fifty horse power engine. Joe Curtis, who is in Dr. Sheldon's employ, will operate it.

Section Men on Strike.

Section men in the employ of the C. & S. P. railroad are on a strike at Iron Mountain for an increase of wages to \$1.75 a day. They have been paid \$1.50. The work of maintaining the tracts across the Chapin mine pit is at a standstill because of the walkout.

Eckerman Not Destroyed.

The report to the effect that Eckerman, a small village in Chippewa county, had been destroyed by flames, proves much exaggerated. The fire started in the brush near the town, where a settler was clearing land. It spread rapidly and soon a large pile of cedar poles and ties owned by a man named Turner was on fire. Most of the timber was destroyed, with a loss estimated at \$3,000. One small dwelling house was burned also. The rest of the town, while in much peril at one time, escaped damage.

Soo Builder Lands Contract.

Contractor M. J. Shirley of the Soo has sent a gang of men to Gatesville to commence work on the erection of a new Catholic church. The structure will represent an investment of about \$10,000. It will be one of the finest churches in Chippewa county. Mr. Shirley has also secured the contract for the erection of a \$10,000 residence in Munising, Alger county, which will be the most modern home in that village. Work on this building is to be started at once. The two contracts will require nearly the entire summer season to complete.

Fireman's Injuries Cause Death.

As the result of injuries received by being crushed between the side of a locomotive and a door at the Northwestern roundhouse at Escanaba, Jasper Jensen, a fireman, twenty-two years of age is dead. The body of the young man had been terribly crushed before the locomotive could be brought to a standstill and from the time that the patient was delivered at the hospital but little hope for his recovery was entertained. While Jensen's engine was slowly backing from the roundhouse he stepped upon the platform for a moment to turn on the lights at the side just as the engine lurched by the roundhouse door. The unfortunate fireman was struck, hurled against the cab with great force and slowly squeezed through the narrow opening as the engine continued on its course. Jensen's parents live at Ingalls, having moved to that village recently from the city of Menominee. For the past one and one-half years he had been employed as a fireman by the Northwestern road running out of Escanaba.

Home Man Appointed Chief.

After a delay of several weeks the Soo now has a regularly appointed chief of the fire department. One of the resolutions passed at the common council meeting this week without argument or even comment was one appointing Ed. Campbell, chief of the department for the remainder of the term. Alderman McDonald, chairman of the fire committee, acting chief since the death of G. F. Van Week, and who all along has probably taken more interest in the department than any other member of the council, was the only one to vote "no" on the above resolution. It is largely due to Mr. McDonald's efforts

that the new fire hall proposition has been pushed along as far as it is and it was in favor of making still other improvements and also of securing an experienced man from outside to head the department. All the firemen were in favor of a local man, however, and the special committee from the department had a conference with the councilmen before the meeting, which may have influenced the action at the meeting.

Bucket Brigade Won Out.

A letter from Channing, a railroad junction point in Dickinson county, tells of a rather amusing incident concerning the first experience of the new fire company at that place. The village has recently purchased a gasoline fire engine and laid a water main the length of one street. A dwelling on fire gave the department its desired opportunity and off it dashed to the rescue. Away the men went with their hose cart and the only 500 feet of hose was quickly reeled off. The boys found that they had it out wrong end to, and so after changing ends they were ready to turn on the power, when it was discovered that in the excitement the nozzle had been forgotten. This being adjusted it was discovered that the hose was not quite long enough. Acting on the inspiration of the moment, some of the men ran to the St. Paul shops, where the master mechanic loaned them a length of hose, and the boys got quickly into action. By this time the bucket brigade, which had been working like a Trojan, was on the point of collapse and the house burned down. However, the new department rendered valuable assistance in saving adjoining property and the new fire engine.

JOHN SHEA

To contradict certain talk and to put the consuming public in possession of the truth, we say in plain words that no one in this town can sell as good coffee as Arbuckles' Ariosa for as little money.

Misbranded and make-believe Mocha and Java, or coffee sold loose out of a bag or a bin, is not as good value for the money, nor can it be sold at as narrow profit, nor reach the consumer under as favorable conditions.

When you buy Arbuckles' Ariosa Coffee you get more than 16 net ozs. of straight, wholesome Brazilian coffee from the largest coffee firm in the world, with that firm's direct assurance that they are giving you the best coffee in the world for the money.

Cobalt Gossip

It is reported that silver has been discovered at Axel Lake, which lies about fifteen miles northwest of Lady Evelyn lake.

The big vein recently struck on the north lot of the Temiskaming & Hudson Bay property extends over into Nipissing territory and has been located there. It is about eight inches wide and is rich in native silver.

The title to the lot on which the rich find of the Temiskaming & Hudson Bay Mining company was recently made is, it is said, being disputed by the Ontario government, but a settlement is predicted, on the lines of the settlement with the O'Brien owners.

It is reported that two offers have been made for the Dufferin Cobalt Mining company's sixty-acre claim on Coleman township. Both these offers are in advance of the purchase price, and one may be accepted. The mine is entirely owned by Ottawa people, and both offers came from capitalists.

E. P. Earle, W. B. and J. E. Thompson of New York after a week in Cobalt have acquired the Violet mine and the O'Brien interest of 140 acres, located north of the Nipissing. The property will be put in a company capitalized at \$1,500,000 with \$150,000 in the treasury. W. H. Lanney, formerly of the Nipissing, will be the engineer in charge. Mr. Earle is president of the Nipissing company and William B. Thompson is vice president of that company.

Control of the Lawson Mining company of Cobalt has been assumed by the La Rose Mines, Limited, which was incorporated a short time ago for \$6,000,000 capital. Active development work will start within a day or two on the Lawson property, which, by reason of extensive litigation now at an end has been idle for two years. Of the \$5,000,000 capital of the Lawson, fully 75 per cent is owned by the controlling inter-

ests. Two cars of ore at the Lawson ready for shipment are valued at \$40,000 each, or \$80,000 for the lot. Within the past week or two the La Rose mine management has made strikes on various of its properties of native silver, and in a number of instances these have been made at depth.

"If it were not for the large silver deposits in the ore," said a refiner, "it is not likely that Cobalt mining would prove profitable. Ore that runs 200 and 400 ounces of silver to the ton is considered low grade ore and unprofitable ore. These facts are now becoming apparent to the ore shipping mines in the Nipissing district. If the smelters could make a contract to obtain a fixed amount each month from the Cobalt shippers then smelters could be constructed to handle the ore. I understand, however, that the leading shipping mines are as yet unable to make such a contract, consequently they have to stand the relatively high cost of smelting their ore."

The Cobalt camp shipments for the month of May, totalled 2,317,550 pounds or 1,158,77 tons, compared with 989,13 tons in January; 881,40 tons in February and 1,027,00 tons in March. Detailed shipments were:

Las,	
Coniagas, 11 cars	678,320
O'Brien, 7 cars	438,050
Nipissing, 7 cars	451,220
Trethewey, 5 cars	320,020
Buffalo, 3 cars	145,710
Tem. and Hudson Bay 1 car	55,900
Temiskaming, 1 car	54,900
Townsite, 1 car	46,670
Silver Queen, 1 car	44,000
Cobalt Central, 1 car	40,900
Total	2,317,550

The month of May witnessed the largest output from the camp, and the Temiskaming, down below the Beaver, made its initial shipment of twenty-seven tons. This car brought \$90,000.

BANK TWENTY YEARS OLD.

The First National bank of Negaunee was twenty years in business Thursday the doors having been opened June 13 1887. The occasion was not observed by the bank officers or employees as they were too busy to think of anything but their usual work. The institution has been very successful and the growth of the business has been steady. Prior to the establishment of the First National Negaunee had several banks.

WILL MOVE TO ISHPEMING.

Werner Nikander, who is conducting a drug store in Ishpeming, plans to move his family to that city, and he offers his residence property on East Main street for sale or rent. His house was built three years ago from plans drawn by J. D. Chubb of Chicago and contains nine rooms. The family will spend the summer at Three Lakes, leaving for there within a week or two.

LOCAL LACONICS.

John Ward was up from Green Bay yesterday, on a visit to relatives.

Alderman Dan Shea returned yesterday from a visit to his farm at Little Lake.

Mrs. J. E. O'Donoghue and son, who have been visiting relatives at Fond du Lac, Wis., for the past month, will arrive home tomorrow.

Kenneth Fellow arrived home Thursday from the Michigan University. His sister, who is also attending the university, will be home in a few days.

The fifteen-month-old daughter of Henry Juvari, of Lincoln street, died yesterday morning. The funeral will be held this afternoon from the house.

Miss Pearl Walters, a teacher in the Negaunee public schools, left yesterday morning for her home in the lower peninsula, where she will spend her summer vacation.

Ort Schurtz and wife will leave Monday for Highland Park, in the lower peninsula, where they will be joined next week by their four daughters. All will spend their summer vacation there.

Manager McDonald has secured a moving picture attraction for tonight and Monday evening. The admission will be ten, twenty and thirty cents.

The employees of the Negaunee, Masand Jackson mines were paid yesterday.

The baseball enthusiasts of Negaunee are talking of organizing a city league to be composed of four leagues, representing the business men, city officials and employees, saloon men and Cleveland club's iron company. The latter will be composed principally of city men.

GARDEN SPOT OF AMERICA

EVERYTHING IN LINE OF FRUITS, GRAIN AND VEGETABLES GROWN IN STANISLAUS CO.

IRRIGATION SYSTEM USED

Exhibit Cars New in This City Visited by Crowds, Who Express Wonder and Admiration at Extent of Display.

The exhibit cars of the Stanislaus county (Cal.) board of trade arrived here yesterday morning and will remain until next Wednesday. The exhibit is all and more than is claimed for it and even during the early morning hours it was visited by many people. It almost passes belief that so many varied products could be grown within a radius of a limited number of miles. Stanislaus county grows everything produced in the United States, with the exception of a few plants native to the soil of the Arizona deserts and several spots in southern Texas. Among the fruits are peaches, pears, cherries, plums, oranges, grape fruit, apricots, quinces and many others. But Stanislaus county does not alone grow fruits. It is no less prolific in its production of vegetables. Potatoes, tomatoes, asparagus and all the more common American vegetables flourish there and attain abnormal size. Several of the asparagus stalks on exhibition are over two inches in thickness. One of them would furnish a meal for two and yet it is claimed that they are sweetest, tender and of a fine flavor. The potatoes and tomatoes are also giants of their kind. Among the grains corn, wheat, oats and rye are also grown, though purely for exhibition purposes, as the land is too valuable to devote to grain production. The cotton plant also flourishes there and produces as prolifically as in the most fertile sections of Georgia. Speaking of the exhibit the agent in charge said:

Depend Upon Irrigation.

"Stanislaus county is in the center of the San Joaquin valley, about 148 miles southeast of San Francisco. This valley is a great natural basin in the very center of California, the former bed of a vast lake of the Pliocene period. Through the water run-off of the Sierra Nevadas various rivers flow down the gulches and at right angles with the San Joaquin river, which moves from south to north the length of the valley. The Toulumne is one of the greatest of these intersecting streams. It furnishes immense stores of water which until recently went to waste. In 1891, however, the work of utilizing a part of the flow of the river for irrigation purposes was begun. At a gorge in the mountains through which the river debouches a dam of rock masonry to a height of 128 feet was built. Its length along the top is 336 feet; its bottom thickness ninety-one feet. It is

twelve feet through at the top. The cost was \$550,000. This dam is located near the town of La Grange at the eastern end of Stanislaus county. The irrigation system of which the La Grange dam is the head-work, involves a total expenditure of \$2,500,000. The works are not owned by private capital, as is the case with so many irrigation systems in California, but by municipal corporations created under a state law known as the Irrigation District law. Under this arrangement the land owns the water. There are no such things as water rights in these districts. Every acre of land has a right to the use of water and pays whether the water is used or not. This right inheres in the land and is not detachable therefrom; it passes with the ownership of the land. When one sells land he does not retain any interest in the water or in the right of the land to the use of the water.

Alfalfa a Great Crop.

"Of the lands now in crops about 30,000 acres are planted to alfalfa. It is a profitable crop, regarded from any standpoint. If seeded in the fall alfalfa will give two cuttings of from a ton to a ton and a half to the acre during the following spring and summer. The season following it will give five cuttings. It is about the most certain of all crops, as it has practically no enemies after it has become well set. As to the vegetables of Stanislaus county it is unnecessary to elaborate further than to state that the tomatoes we have with us were picked from vines four years of age.

In addition to the display of fruits, vegetables and cereals, the exhibit carries a car filled with natural curiosities, of which an elephant shark forms the center of attraction. This shark measures thirty-six feet in length and is said to have been the largest ever captured. Its mouth distended is not only large enough to take in a man, but to swallow a cow without difficulty. In addition there are ostriches, monkeys and various other animals.

You need a tonic that will put the sap of life into your system and fortify you from all diseases. Hollister's Rocky Mountain Tea is recognized as the greatest strengthener known. Tea of Tablets, 35 cents. The Stafford Drug Co.

PASSES FOUR FORGED CHECKS

JAMES STONE, WHO SERVED TERM IN MARQUETTE PRISON FOR FORGERY, AGAIN ARRESTED ON THE SAME CHARGE.

Charged with having issued forged checks aggregating over \$130, James Stone, a former convict, occupies a cell at the county jail, having been bound over for trial at the next term of the circuit court by Justice Byrne yesterday afternoon, after waiving examination. Within a period of a week Stone forged four checks, two bearing the signature of Frank Vandenberg for \$15 and \$20, respectively, and two bearing the signature of William F. Koepf, of Skandia, for \$42.00 and \$52.00. The largest check, was cashed by John W. Rustenhoven, a saloonkeeper on Lake street near the Carp furnace. Frank Longworth, of Skandia, cashed the one for \$42.00. The other two checks worked their way back to the bank after changing hands several times, but who first cashed them is not known. All were drawn on First National bank paper.

It was the check cashed by Mr. Rustenhoven that led to Stone's undoing, as the saloonkeeper knew Stone well and placed the matter in the hands of the authorities immediately upon the paper being refused at the bank. Thursday afternoon Chief Manning found Stone in bed at his boarding house at Checolay on the same evening and brought him to the police station. On the way he stopped at the Rustenhoven saloon with his prisoner and both Mr. and Mrs. Rustenhoven identified Stone positively as the man who passed the check.

Throughout Stone protested his innocence, denying having passed checks of any character. Only \$28 was found in the man's possession, but Chief Manning believes that he has "planted" a good share of the money. The arrest of the man was not given out at first, as he was believed to have an accomplice who might take warning should the matter appear in print.

Stone is a former convict, having served a term in the Marquette prison for the same offense with which he is charged. He was sent up from Schoolcraft county, October 7, 1904, for not less than one year nor more than two years. He was paroled March 5, 1906. He is a man of sixty-four, grey haired and of not pleasing address. For several days prior to his arrest he had been spending money freely and was somewhat under the influence of liquor when taken into custody. Little of his antecedents outside of the prison records is known here.
