DAILY MINING JOURNA A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains associated Press dispatches and is especially evoted to the Upper Peninsula interests. SUBSCRIPTION RATES:

MAROUETTE, MICH., JUNE 26.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

And after the Fourth perhaps we will have a circus day.

Also tar macadam would be a good trict. material for some of the hillside farms neighboring to Marquette.

It wasn't on the bills, but the big hole of the Midsummer day entertainment.

The summer school of the Northern Normal is being hard put to find accommodations for the students. Best evidence in the world that it is to have an excellent attendance.

'By the time Governor Warner gets political lineup the position of the favorpromises to be a distressing one.

Hundreds of men were busy yesterday patching up the scars left by the beneficent (?) rains of Sunday. If they work zealously they may have the city presenting a good front to the world within the week.

Representative Ward has a silver tea set, the formal approval of the legislature and all that, but still it seems to be house of representatives.

Ex-Governor Bradley of Kentucky J. Bryan. He says that if he is nominwe wonder?

Wisconsin intends to have everything that Michigan has. The Wisconsin legislature has passed a bill providing for there have been recorded in the country penitentiary, and now the project of es. degrees of seriousness as a result of autablishing a mining school in the Platteville district is well under way.

POLICE DOGS.

The police dogs of Ghent are steadily making their way in the world. They have already reached Paris and Germany, and there is a prospect of their travelling still farther afield. The Chinese minister in Belgium and five of his subordinates the other day travelled specially from Brussels to Ghent to inspect them, with a view to their possible use in Pekin and other Chinese cities. The dogs gave a special matinee in honor of their distinguished patrons, and the latter showed themselves really delighted

On going down into the sea, the diver soon enters a kind of twilight, which envelops him like a thick mist. The sky sick leave. and the clouds, which may been seen at films of water.

At the bottom objects seem nearer and larger than in reality and appear under a color other than their own, for the rays of light traverse a thickness of green and blue water which absorbs them unequally; as the red rays, for instance, are extinguished long before the animal black.

Another phenomenon, which never fails to excite surprise at first, is to see night setting in completely at the bottom at the same moment in which at the surface it is broad day.

In illustration it is customary to depict divers walking upright on the bottom of the sea; it is not so in reality.

Just as the eyelist bends over his handle bar in order to overcome the resistence of the wind, the submarine walker is obliged if he wishes to advance, to bend stoutly forward. Besides. his body takes this slanting position instinctively, which he could not assume on land without falling.

At first you are not able to regulate your motions according to the resistance to be overcome, or you are inclined to overrate it, and you impart to your ac tion a suddenness more detrimental than useful, and which fatigues to no pur-

pose. On trying to seize a plant or a one endeavors to surmount an obstacle, the efforts you make carries you four times as high as necessary.

If water as a medium has its draw-backs, it has its advantages, too. The diver can regulate its densities densities for the second sec

Many People Visited Scene.

The washout and the work of the rail. Mack and Miss Leone played the Trimroad employes repairing the damage at- bels, and the other members of the comtracted hundreds of visitors yesterday, pany were congenially east. The house They streamed along the entire day and was in great good humor and applauded during the evening, the work of relaying the tracks evidently having a creat both players and play. the tracks evidently having a great fascination for them. People who hadn't before seen the washont were amazed at its size, saying it was even larger than they had been led to expect. The gas company did considerable work in the big gap yesterday, replacing mains that had been broken ular of their offerings. Tonight Mr. Mack down by the flood of water.

The railroad companies will proceed Leone will be cast as Lady Babbie. The at once to fill the gap where their tracks house will doubtless be sold out again. cross. They will also have to haul the material for filling the rest of the washout, of which there will have to be many hundreds cars. It will likely be ten days or more before the traffic will again have the use of Lake street by the gas house. In the meantime it is necessary to drive around by Champion street, making a wide detour, to reach the Lake street road east of the gas house.

Situation at Quarry Unchanged.

There was no change in the situation at the quarry yesterday. The creek continued to flow in at one end of the open ing and out at the other. Manager Cooper has written the directors of his company at length concerning the state of affairs, and expects them here this week to make a personal survey of the ground. Pending this nothing will be done. Manager Cooper, however, is con-fident that steps will be taken with little delay to prepare the quarry for a resumption. The loss at the quarry is still to be estimated, but in describing the situation yesterday The Mining Journal did not overstate its serious
