

BARAGA'S FIRE A SERIOUS BLOW

However, It Might Easily Have Been Much Worse—The Destruction Confined to the Big Sawmill of the Nester Estate.

Lumber Worth \$300,000 Is Saved After a Hard Fight, as Is the Nearby Plant of the Baraga Lumber Company—Insurance Is \$35,000, Upwards of 50 per Cent, and It Is Expected Burned Manufactory Will Be Rebuilt—Much Timber Still Available.

Baraga, Mich., June 28.—[Special.]—The big fire here this morning was a serious disaster for the Nester company and the village, yet in the light of the narrow escape from more serious consequences, both came out of it very well. The Nester mill is, to be sure, a total loss, but the lumber docks and their precious burden were saved, as was neighboring property that was imminently threatened.

The fire was discovered at 12:30 o'clock and was already well seated. The cause of its origin is unknown, but it started near the boilers. The Nester estate has the contract for supplying the village with water, and the main boilers were the source of supply of steam for the pumps. While they were kept running there was abundant water supply, six to eight streams being poured on the flames. But the flames grew hotter and hotter, and presently the men feeding the boilers were driven from their posts. An auxiliary boiler, to be used in case of emergency, was fired, but was found to be in poor condition and steam was not raised for over an hour.

Assistance Sent from Houghton. In the extremity Houghton was asked for aid. James McMahon, the postmaster at Baraga, appealed to President Miller, in the name of the people of the village, for the use of the Houghton steamer. President Miller gave prompt assurance of all the assistance that lay in his power. A South Shore train was made ready, the steamer was loaded, and it was sent out from Houghton at 3:10 o'clock, arriving here at 3:55. In the meantime the fire had been confined to the mill building.

The fight to prevent the destruction of property other than the mill was an exciting one, and for a time it appeared that it was going to be lost. The weather conditions fortunately favored the fire department and volunteers in the road work. There was no wind to speak of, the slight breeze prevailing being from the southwest, away from the village. Still a lumber mill makes the hottest and most dangerous kind of a fire imaginable, and even with this factor the efforts of the fire fighters had up hill work to win.

Tug Bruce Saves the Lumber. The big lumber dock, on which some \$200,000 worth of lumber ready for shipment was piled, had the honor of escapes. It was connected with the mill structure by a trestle work on which cars loaded with lumber were run. This trestle work was dry and furnished excellent food for the flames. They ate their way along it to a point within ten feet of the first lumber pile. The tug Bruce is credited with saving the pile. It is captained by Dan Neville, and did excellent work. A line was turned around the trestle work running to the lumber dock and what remained of it was torn down only in time to prevent the flames from communicating to the lumber piles. The Bruce also towed the tug Vigilant, which was laid up within reach of the flames, out of harm's way, setting her adrift until after the danger had passed.

The fire tug Rogers of Houghton also came to the relief of the village, making the run down in two hours and twenty minutes. Hebard & Sons of Pequa likewise sent their tug, the Arlington, commanded by Captain Granger, which arrived about 4:30 o'clock.

or \$50,000 will be erected, the mill being planned to cut pine, hemlock and hardwood. The estate is said to have a three years' cut of pine and hemlock in sight and a ten years' cut of pine, hemlock and hardwood. The loss to the estate in today's fire is said to run between \$300,000 and \$750,000, with insurance of \$35,000. Of course this takes no account of the loss through inability to handle the logs banked for this season's run.

President Fred Carroll, of the village, for the people, expresses sincere appreciation of the readiness of the officials of the South Shore in responding to the call for help, and for the aid extended by the village of Houghton through President Miller, also for the excellent work of the home and outside firemen and for the assistance of J. V. Byers, an ex-president of the village, who came down with the Houghton department to do everything he could to help the Baraga people in their extremity.

An Ideal Shipping Point. Baraga, which lies on the southern edge of the copper country, and is named for Bishop Baraga, the great Catholic missionary to the Indians, has always been a lumber town. It is an ideal shipping point. A history of the upper peninsula, published in 1883, does not give the date of Baraga's settlement, but ascribes its origin to the American Fur company, which located a post near the present site of the village and gave it its name.

Baraga did not come into prominence as a lumber town until the Nester brothers of Saginaw built their mill in 1882. This is practically the mill which is now destroyed, though the years had brought enlargements and improvements. George Nester was the principal one of the brothers, and it is his interests which are now comprised in the estate, owned by the brothers, John and George Nester who reside in Detroit, and Frank, a resident of Duluth.

CRIMSON WINS ONE, THE BLUE THE OTHER

HARVARD TAKES THE FRESHMEN'S RACE ON THE THAMES, AND YALE THE FOUR-OARED.

New London, Conn., June 28.—Harvard and Yale each won a victory in the boat races on the Thames today. The Harvard freshmen eight defeated Yale by half a length in the first of the two contests. In the second, which was the four-oared race, Yale crossed the finish line ten lengths ahead of her adversary. The eight-oared (freshmen's) event was a splendid struggle from the start to the finish at the navy yards, and in which Harvard always had the lead with enough reserve power to keep it. Both crews finished in good condition. The four-oared race, which immediately followed, was a procession, Yale increasing its slight lead at the start gradually until ten lengths separated the victor from the vanquished at the finish. The official time of the freshmen race was: Harvard, 11:15; Yale, 11:19. Four-oared: Yale, 12:33; Harvard, 13:15. Not half the throng present at yesterday's varsity race witnessed today's events.

DEFEATS CHARLES NEARY.

Packey McFarland the Victor in Ten-Round Bout in Milwaukee. Milwaukee, June 28.—Packey McFarland, the lightweight from Chicago, defeated Charles Neary of Milwaukee in a ten-round bout tonight. The decision was received with cheers. McFarland had the better of the Milwaukee boy in nearly every round. He used a left jab and was able to land it at will. Occasionally he was whipped in a right to the head, and a few stiff uppercuts. Neary worked on his opponent's body most of the time. When he tried his famous swings for the head Packey was not there. Neary got in considerable body punishment in clinches, but to offset that the Chicago boy landed four or five blows to the Milwaukee boy's one in free fighting. McFarland demonstrated that he is entitled to a go with any of the top notchers in the lightweight class.

BANKS COMPLAIN TO WASHINGTON

PROTEST IS MADE AGAINST THE MONEY ORDER BUSINESS OF THE EXPRESS COMPANIES.

Washington, June 28.—The American Bankers' association filed a complaint with the interstate commerce commission today, alleging that the express companies, through their power and facilities as common carriers, are usurping the prerogatives of the banking association and at the same time are employing the capital of the banks of the country in the conduct of their business, which policy is seriously detrimental to the interests of the banks.

INSURANCE CONCERN FAALS.

Marquette Mutual of Chicago Goes Into the Hands of a Receiver. Chicago, June 28.—A receiver has been appointed for the Marquette Mutual Life Insurance company of this city. The company has outstanding insurance amounts to more than a million dollars.

ICE FAMINE FOR NEW YORK.

Two Thousand Drivers of Delivery Wagons Go Out on Strike. New York, June 28.—Nearly two thousand drivers of delivery wagons of the American Ice company struck today to enforce demands for extra pay for extra work.

MASTER NAMED IN MRS. EDDY CASE

United States Judge Edgar Aldrich of the District of New Hampshire Is Appointed to Conduct the Investigation.

Whether the Head of the Christian Science Church Was Capable of Intelligently Managing and Controlling Her Financial Affairs on or Before March 1, Last, Will Be Ascertained by Him, and No Limitations Are Made as to the Evidence.

Concord, N. H., June 28.—Hon. Edgar Aldrich, of Littleton, judge of the United States district court for New Hampshire, was appointed master to determine the competency of Mrs. Mary Baker Eddy, by Judge Chamberlain of the supreme court today. The master is named in connection with the suit brought by Mrs. Eddy's son, Geo. W. Glover, of Lead, S. D., and others as "next friends" for an accounting of Mrs. Eddy's property.

The master is directed to ascertain, determine and report as to whether Mrs. Eddy was capable of intelligently managing, controlling and conducting her financial affairs and property interests March 1, 1907, and during such time before that date as may to the master seem reasonable. No limitations are made as to the evidence to be introduced. The master is directed to make and file his report with the clerk of the court Sept. 20 next. He may conduct his inquiry in such reasonable places as he may see fit. He is given authority to certify to the court the content of any party for neglecting or refusing to appear and testify or to produce books and papers or to answer questions.

The motion of Mrs. Eddy's counsel, made June 5, for an investigation of facts connected with the case, is denied except in so far as it is granted by this appointment. On motion of the counsel for the trustees appointed by Mrs. Eddy to manage her property that the reasons be given in writing for the court's decision against their petition or leave to intervene as plaintiffs in the suit brought by the "next friends," Judge Chamberlain says that the deed of trust given by Mrs. Eddy did not give the trustees legal right to intervene, and that he found on the facts submitted that justice did not require such intervention.

PROGRESS OF THE HAYWOOD CASE.

Defense Continues Its Efforts to Impach the Testimony of Orchard. Boise, Idaho, June 28.—The attorneys for W. D. Haywood continue to center their efforts to discredit the testimony of Harry Orchard and the establishment of their claim that Orchard killed ex-Governor Steunberger in revenge for the loss of his interest in the Hercules mine. Today they attacked the Vindicator explosion with testimony that made it appear accidental rather than criminal. Thomas Wood, a non-unionist, who entered the Steunberger mine as a fireman after the strike began, was the witness. William Easterly, who concluded his testimony this morning, and D. C. Copley, who was called this afternoon, both swore that they heard Orchard threaten the loss of the Hercules mine and threaten to kill Steunberger for it.

CONSERVATIVES RULE.

Miners Opposed to Affiliation With the Industrial Workers. Denver, June 28.—In the Western Federation of Miners' convention a test vote was reached this afternoon on the proposition to continue to affiliate with the Industrial Workers of the World. The vote was on the minority report on acting President Mahoney's annual report. The minority report was against Mahoney's recommendations to keep out of the industrial fight and favored taking sides. It was defeated, 112 to 239. This confirms the claims of the conservatives, who say that Mahoney will be ejected in all his recommendations, two to one.

BROKERS ASKING \$5,000 LOSE.

Board of Trade Speculation Gambling Decides an Iowa Jury. Fort Dodge, Ia., June 28.—Grain transactions on boards of trade are gambling, according to a verdict rendered by the federal jury here. John H. Pearsons, a wealthy farmer, speculated on the board of trade until his losses reached over \$5,000. He refused payment, and the brokerage firm of Ware & Leland of Chicago sued to recover. The defense maintained that the dealings were a gamble and that neither side ever contemplated actual delivery. The jury's verdict was in favor of Pearsons.

OIL TRUST WINS IN OHIO.

Jury in Case Tried at Findlay Unable to Reach a Verdict. Findlay, O., June 28.—The jury in the case of Ohio against the Standard Oil company, charged with violating the anti-trust law, this morning reported that it was unable to agree upon a verdict, and was discharged.

ANTI-CIGARET LAW INVALID.

Chicago, June 28.—Judge Chytrous today declared the anti-cigarette law passed by the last legislature invalid, because the body of the act did not conform to the title.

WEATHER FORECAST

Washington, June 28.—The following is the weather bureau's forecast for Upper Michigan: Fair, Saturday; Sunday, showers and cooler; light southwest to south winds.

JUDGE LOVING SCORES AGAIN.

State's Instructions Against the "Unwritten Law" Are Stricken Out. Houston, Va., June 28.—The argument of the attorneys in the trial of Judge Loving for the murder of Theodore Estes were begun this afternoon after a day spent by the attorneys on both sides in a legal wrangle over the court's instructions. The instructions as read by the court discussed the murder, its various degrees, the question of reasonable doubt, the time allowed for a man's angry passions to subside, and especially insanity. The instructions prepared by the prosecution against the "unwritten law" were stricken out by the court. Attorneys Harmon for the prosecution and Strode for the defense spoke for an hour and a half each this afternoon, and court adjourned until tomorrow.

REPORT FALSE, SAYS TAFT.

Administration Not Dissatisfied With Management of Things at Panama. Washington, June 28.—"It's a tissue of falsehoods," said Secretary Taft today, when his attention was called to reports of dissatisfaction on the part of the administration of the management of affairs under the isthmian canal commission, or the intention of the officers engaged in the work to relinquish it and return to the United States.

BASEBALL

STANDINGS OF THE CLUBS.

Table with columns for National League (W, L, P.C.) and American League (W, L, P.C.) listing teams like Chicago, New York, Philadelphia, etc.

TODAY'S GAMES.

National League. Boston at Brooklyn. New York at Philadelphia. St. Louis at Cincinnati. Pittsburgh at Chicago. American League. Chicago at St. Louis. Cleveland at Detroit. Washington at New York. Philadelphia at Boston.

GAMES PLAYED YESTERDAY.

National League. Chicago, June 28.—The feature of today's game was the great catch of Wagner's hit by Hoffman, who ran full speed against the fence and got the ball over his head with one hand. Summary: R. H. E. Chicago.....00000100—1 8 0 Pittsburgh.....001000020—3 6 0 Batteries: Lundgren and Kling; Camnitz and Gibson.

Philadelphia, June 28.—The winning run was scored in the eighth on an error, a triple and an out. Summary: Philadelphia.....00020000—2 5 3 New York.....10000020—3 4 2 Batteries: Corridon and Jacklitsch; Taylor, Ames and Bowerman.

Brooklyn, June 28.—A new pitcher, Ernie Linderman, was put in the box by Boston. He was relieved in the seventh. Summary: Brooklyn.....0011002000—5 9 2 Boston.....0000002001—6 11 2 Batteries: Henley, Pastorius and Ritter; Linderman, Young and Needham. Ten innings.

American League. New York.....000020300—5 12 3 Washington.....4 13 02 0 16 29 0 Batteries: Moore, Brockett and Riekey; Hughes and Heydon. St. Louis.....100001000—2 6 3 Chicago.....00000203—6 8 1 Batteries: Powell and O'Connor; Smith and Sullivan.

Detroit.....002000000—2 7 1 Cleveland.....00000000—0 5 1 Batteries: Eshanks and Schmidt; Liebhardt, Clarkson and Clarke. Boston.....00002001000—4 4 4 Philadelphia.....000000102000—3 12 1 Batteries: Winter, Pruitt and Criger; Plank and Pomeroy. Twelve innings.

American Association. Indianapolis, 3; Louisville, 6. Toledo, 6; Columbus, 3. Kansas City, 9; St. Paul, 4. Milwaukee, 9; Minneapolis, 11.

WESTERN LEAGUE.

Denver, 2; Des Moines, 9. Lincoln, 9; Omaha, 5. Pueblo, 9; Sioux City, 11.

AUTOMOBILE RECORD SMASHED.

St. Paul, June 28.—Three men broke the world's record for twenty-five miles for touring cars in the third race at the Hamlin track this afternoon. Eddie Bald, who finished first, broke the record by nearly two minutes, and the other two who broke the record went better than the former time by several seconds. The time of the three "breakers" is: Eddie Bald, 30:28; E. Simpson, Minneapolis, 31:50; Winston, Minneapolis, 31:56.

AMERICAN PLAN WELL RECEIVED

Advices from The Hague Indicate an International Agreement Is Likely, Limiting Captures on the High Seas.

Speech by Joseph Choate, Upholding the Immunity of All but Contraband Private Property, Is Eloquent and Effective, Leaving the Impression That in This Conference the United States Proposition in the Connection Will Be Approved Unanimously.

The Hague, June 28.—The sitting today of the first committee of the peace conference afforded an opportunity for Joseph H. Choate, the American delegate, to deliver a long and eloquent speech upholding the principle of the exemption of all private property, except contraband, from capture on the high seas. The success obtained by his speech left the impression that the American proposition, which in the conference of 1890 was only taken for consideration, this time will be approved unanimously.

The debate was opened by Senator Barbosa, of Brazil, who reviewed the attitude of the United States from the time of Benjamin Franklin to the present day, and quoted from diplomatic documents showing how Brazil had ever associated herself with the United States on this question. He emphasized the position assumed by the United States, which he declared was the view of the whole American continent.

Mr. Choate's speech followed, discussing the question in detail. He concluded by saying that President Roosevelt attached such importance to the question that he wished to evoke an impression of opinion on it by a vote of all the countries represented at the conference. (Cont. Tomorrow.)

TRIES HIS HAND AGAIN.

Commissioner Neill Takes New Part in Telegraphers' Strike. New York, June 28.—United States Labor Commissioner Neill came here from Washington today in connection with the strike of the telegraphers in San Francisco. He had a conference with the officials of the telegraph companies and the union. This is Mr. Neill's second visit to New York in an effort to bring peace.

SITUATION AT SAN FRANCISCO.

San Francisco, June 28.—When asked about the telegraphers' strike today the general superintendent of the Postal and Telegraphic Service said the situation was very satisfactory. He was not at all worried by statements given out by the strikers to the effect that the strike had crippled the service. Superintendent May, of the Western Union, said that the situation was clearing itself. More men were going to work daily, and the business was being handled without serious trouble or delay.

The telegraphers intend to stay out until a satisfactory adjustment of their grievances has been reached is evidenced by the recommendation of General Secretary-Treasurer Russell of the international union that another assessment be levied Aug. 1, in order that the strike fund may be further increased. In reply to a telegram sent by President Small to the president of the Order of Railway Telegraphers, at St. Louis, President Perham of that order wired that the officials of the Southern Pacific said that they had no breach of the agreement will occur. Mr. Small expressed the belief that the trouble would not extend to the railroads. The striking telegraphers say that with the fund already on hand, added to the amount to be secured from assessments, they will have enough money to take care of the San Francisco trouble for several months.

ROCKEFELLER NOT FOUND YET.

However Subpoenas Are Served on Several Standard Oil Magnates. New York, June 28.—Subpoenas requiring the presence of John D. Rockefeller, president of the Standard Oil company, and William Rockefeller, H. H. Rogers, John R. Archibald and a number of other directors to testify as witnesses before the federal court July 6 were received by United States Marshal Henkel today. The officer was unable to serve the subpoenas upon Mr. Rogers and W. H. Tilford, treasurer of the company, as they are in Europe, and the subpoenas will be returned with notice to that effect.

John D. Rockefeller, Wm. Rockefeller and Charles M. Pratt are out of the city and Marshal Henkel expected that a day or two would be required to find them. The marshal personally served the subpoenas upon John D. Archibald, vice president of the Standard Oil, Wm. T. Howe, Charles T. White, James A. Moffett, president of the Standard Oil company of Indiana, and H. E. Felton, of the Union Tank line.

SENATORS BY DIRECT VOTE.

Wisconsin Assembly Passes Senate Resolution in Favor of It. Madison, Wis., June 28.—The assembly today, 69 to 3, passed the senate resolution providing for the election of United States senators by direct vote.

DRUNKEN WOMEN FIGHT DUEL.

One Kills the Other, Her Sister-in-Law, With a Butcher Knife. Warrensburg, Mo., June 28.—In a family fight last night near Bristol Ridge, six miles southeast of this city, Mrs. Walter Herd killed Mrs. James Herd, her sister-in-law, with a butcher knife. According to the report of the affair reaching here the women, with their husbands, had been drinking and a quarrel ensued.

EXILED TO AFRICAN DESERTS.

The Penalty of the French Battalion Which Mutinied Recently. Sfax, Tunis, June 28.—The French cruisers Desai and Du Chayla arrived here today from Villefrance, and under the surveillance of a detachment of colonial troops disembarked the soldiers of the Seventeenth regiment of infantry who recently mutinied at Agde.

BRAZIL'S FRIENDSHIP SHOWN.

Honors Paid American Naval Officers, Visitors at Rio de Janeiro. Rio De Janeiro, June 28.—The officers of the United States cruiser St. Louis were entertained by the Naval club of this city on the Mountain Casavola today. Admiral Maurity gave a toast to the health of President Roosevelt and to the American navy, which was responded to by Commander Usher, of the St. Louis.

Minister of Marine Alencar has ordered all Brazilian warships now anchored in the harbor to dress ship July 4 in honor of the presence of the American cruiser, and to accompany that ship when she departs from the harbor that day.

CARNEGIE ANSWERS ROOSEVELT CRITIC

STEEL MASTER ENDORSES THE PRESIDENT'S POLICY WITH RESPECT TO CORPORATIONS. London, June 28.—Andrew Carnegie, in an interview dealing with G. B. Harvey's statement in a speech at the recent Jefferson Society banquet at New York, that President Roosevelt's policy in Europe was due to the fact that his policy had driven from France, Germany and Great Britain all thoughts of American industrial or financial rivalry, said today: "The same applies to these countries and their governments are not so savage as to gloat over the misfortunes of other lands. No nation can prosper without Great Britain sharing its prosperity, and no nation can suffer a reverse without Great Britain suffering also. The same applies to France and Germany. It is a surprising commentary on Mr. Harvey's charge that under President Roosevelt's administration our country has enjoyed the greatest season of material prosperity ever known."

Mr. Carnegie thinks that the present general decline in values in the United States is nothing serious, that it is in every respect a wholesome check which it is much better to come to the surface, and that the president's declared intention to regulate corporations is only a trifling extent a factor in the decline. He says that Mr. Roosevelt is a truly conservative man who remedies abuses. He is the best friend of the railroads, and so far from lowering the value of bonds and shares will enhance their value and give to the European investor an element of security hitherto lacking.

Mr. Carnegie also expressed the opinion that if the country calls on Roosevelt for another term, he must obey the call.

PRIZES AWARDED AMERICANS.

Nogent, Le Rotrou, France, June 28.—At the show of the Percheron society of France, all the first prizes, except one, in the stallion class, have been awarded to McLaughlin brothers, Americans.

FRENCH DEPUTIES UPHOLD HIS HAND

VICTORY OF PREMIER CLEMENCEAU MORE DECISIVE THAN HIS MOST ARDENT FRIENDS EXPECTED. Paris, June 28.—The deputies tonight by a majority of 130, after an exciting eight-hour debate, voted confidence in the government's policy to insure respect for the law. Premier Clemenceau's victory was more decisive than his most ardent friends had looked for.

The premier in his speech based his defense of the government's use of force upon the ground that the situation in the south, with two hundred municipalities striking and their population refusing to pay taxes, could not be tolerated. With consummate skill he replied to the reproaches that he had become a reactionary by recalling the long years during which he has fought in the ranks against oppression and injustice, and referring to the time when, under the commu, he had almost sacrificed his life in endeavoring to save French officers from a mob.

After M. Clemenceau had concluded, M. Jaures, the socialist leader, attempted to turn the tide, but it was too late to make an impression and by a succession of votes the cabinet was sustained.

NEW REVOLT IN ECUADOR.

Guayaquil, Ecuador, June 28.—The revolution has broken out afresh, and a new rebel band has appeared at Quevedo, an important center among the coca plantations in the province of Los Rios. The rebels occupied Quevedo without resistance and burned the village. The government officials fled at the approach of the rebels.

BIG SWINDLE IS CHARGED

Government Causes the Arrest of Minnesota and Wisconsin Men, the Principals in an Alleged Bucketshop Concern.

Using the Mails to Defraud Is the Allegation Against Them—With a String of Some 300 Offices in the Northwest Patrons Have, It Is Said, Been Bamboozled Through Fictitious Trades to the Tune of \$642,000, With More Counties to Hear From.

St. Paul, Minn., June 28.—Lewin A. Wood, George E. Wood, Price D. Tuttle and Martin P. Quigley were arrested by United States deputy marshals this afternoon on a charge of using the United States mails for fraudulent purposes. Warrants also are out for the arrest of Charles T. Kelley and Clinton D. Phelps of St. Paul and E. P. Garsberger of Superior, Wis., on a similar charge. The prisoners appeared before United States Commissioner Spencer, pleaded not guilty and were released on bail to appear July 5.

The government alleges, according to Inspector Ketchum, that the record of losses sustained through the operations of the concern with which the accused were connected by its method of holding back on quotations until a price could be reached which absorbed the margins so far reported has reached \$642,000. The concern had some 300 offices in Minnesota, Wisconsin, North and South Dakota, and all of them at the instigation of the promoters, if it charged, solicited the purchase and sale of stocks and grain.

HOW THE GAME WAS WORKED.

The government charges that for every commission the concern accepted it enacted a fraud, as it did not purchase or sell an option, grain or commodity, but kept the margin funds deposited for the protection of trades on market fluctuations instead of making the trade in the market, as they represented would be done in circulars and advertisements, and that the actual buying and selling of grain and stocks as done on the Superior board of trade was a mere pretext on the part of salaried employees of the concern, no actual trades or deliveries having been made.

The government further charges that all the alleged trades for which confirmations were mailed to customers were never made anywhere, but that the prices of alleged purchases and sales were arbitrarily marked from the quotations of the Chicago Board of Trade and the Chamber of Commerce in Minneapolis, and that such quotations were surreptitiously secured.

COUNTY OFFICIALS HELD LIABLE.

Family of Murdered Kentuckian Get Judgment for \$8,000. Frankfort, Ky., June 28.—The damage judgment of the Clark circuit court awarding Mrs. Abriell Marcum, widow of Attorney James B. Marcum, who was assassinated at Jackson, Breathitt county, and her children \$8,000 to be recovered of Judge James Hargis and Edward Callahan sheriff of Breathitt county when Marcum was assassinated while standing in the courthouse door at Jackson several years ago.

FOR CRUEL, INHUMAN TREATMENT.

Husbands Gets Divorce from Head of Winona Human Society. St. Paul, June 28.—The supreme court of Minnesota today denied the appeal of Mrs. E. W. Williams, head of the Winona Human society, from whom E. W. Williams, a wealthy shoe manufacturer, obtained a divorce in the Winona district court a year ago on grounds of cruel and inhuman treatment. Mrs. Williams has taken part in many national humane society movements and during the trial resented her husband's charges of inhumanity and cruelty. The verdict of the lower court against Mrs. Williams was sustained today by the supreme court.

MILLIONS AT STAKE.

Government Defeated in Suit Involving the Spanish War Tax. St. Louis, June 28.—A decision was handed down today in the United States circuit court, holding that the tax of \$3,173 levied upon the estate of Judge George A. Mallis, as a Spanish-American war tax, was an illegal action. The case has gone through the federal courts twice and thence to the United States supreme court, the latter court dividing each time. If today's decision is affirmed by the supreme court the result will be that some \$7,000,000 collected by the United States as a war tax must be returned.

FIVE YEARS FOR BECHTEL.

Minnesota Insurance Magnate Convicted of G. & Larceny. Minneapolis, June 28.—W. F. Bechtel, former president of the Northwestern National Life Insurance company, was today sentenced to state's prison for five years. He was convicted of grand larceny from the company while in office. The case will be appealed.

MARQUETTE, MICH., JUNE 29.
Entered as mail matter of the second class
in the postoffice at Marquette, Mich.

Five candidates for recorder already.
And some six weeks left for filing addi-
tional entries. Looks as if we might
have a warm race.

The destruction of Jamestown hotels
doubtless gives the keepers of the other
Jamestown inns a leverage on the crowds
that will enable them to boost prices an-
other notch.

The New York legislature is reported
to have passed a law that will prevent
the National Protective Legion from con-
tinuing the payment of its "dividends"
under its present organization, it being
the sense of the legislature that it is
provocative of abuses to allow assess-
ment insurance associations to pay divi-
dends. If the report here stated is true,
as there is little doubt it is, the Na-
tional Protective Legion must change its
distinctive methods of doing business, or
reorganize in some other state. The
Legion, despite the seeming prosperity
it has enjoyed, and despite its popular-
ity, has always been under suspicion by
insurance men and the insurance officials
of the states. The Legion has done too
much for its members, more, it is main-
tained, than could be done for them
safely.

The strike of letter carriers in Mont-
ana presents not uninteresting as-
pects. It is essentially different from a
strike of employes of a corporation or
an individual. While the government is
the greatest employer of men in the
country its operations as an employer
are surrounded by unusual conditions.
Salaries are in large measure controlled
by congress. There is no "boss," or
board of directors, to take under ad-
vice demands of employes and to pass
on them. Changing any important salary
schedule is a slow and tedious work.
Thus "striking" by men in the govern-
ment's employ is a good deal like going
up against a stone wall, or jousting
against wind mills. There is no single
authority, except in a possible few ex-
ceptional cases, who can, even if it is
deemed advisable to do so, grant the
striker's demands. The easiest course for
a man tired of a government job to
take is to quit, and it is also the wisest
course.

Having decided by popular vote and
a large majority to try the government
by commission plan, Des Moines is now
face to face with a still more important
problem—securing the right men for the
five places on the new board. If the
right men are found the system, it may
be expected, will be a splendid success.
If incompetent, inefficient, dishonest or
self-seeking men are selected there is no
reason to believe the new system will
be much better than the old one. This sug-
gests that it is not the system nearly
as much as it is the men that make the
difference between good government and
bad. The poorest system that could be
devised would work to perfection with
the right kind of men in office and the
best that could be invented would fail if
the men elected chose to betray the public
confidence in them. The Des Moines plan
seems to offer inducements for the best
class of citizenship to take an active in-
terest in affairs. The members of the
board will have opportunities to win
public respect and confidence, honor and
gratitude, and this may be even more
potent than the salaries offered to bring
forward the right kind of men for the
responsibilities to be assumed.

The Soo News, which is strongly pro-
Warner, comments that if the old ma-
chine leaders, Tip Atwood et al, desire to
avoid another term of Warner the best
thing they can do is to get out of the
way of the reforms he has been prevent-
ed from getting, particularly the strik-
ing of the 40 per cent provision from the
primary election law. In the connection
the News remarks: "It is all very well
to talk of the necessity for the supreme
court passing upon the important ques-
tion of whether the lieutenant governor
may vote and break a tie under certain
circumstances in the senate, but when in
achieving this purpose a proposal to give
the people the right to pass judgment
upon improvements to so popular an in-

stitution as the direct primary may be
defeated the people are not apt to look
upon the question from an academic
standpoint, but rather from the practical
point of view, which would be the defeat
of a proposal to secure an expression
of the people upon a reform which ad-
mittedly a vast majority of the people
want. Under such circumstances, the
man or set of men who undertake an ap-
peal to the supreme court on the ques-
tion of the submission of the revision of
the primary law to a vote will be placed
in a most embarrassing and unpopular
position from a political standpoint."

The McCallum bill for the conferring
on the state game warden and his depu-
ties the powers of state fire warden,
and entrusting to them the duty of safe-
guarding the forests from fire, as well as
of fighting fires which cannot be pre-
vented from breaking out, became a law
in the closing hours of the session, in a
form but slightly amended from that in
which Mr. McCallum introduced it. This
measure, which is discussed at some
length in another column, was much
desired by people interested in the con-
serving and development of the timber
wealth of this region, and is expected
to greatly improve the fire warden ser-
vice. As the state game warden and his
deputies are constantly in the woods they
are the officials above all others who
can most efficiently and economically
take steps to curtail the loss from forest
fires. The McCallum bill was carefully
drawn, with the advice of men most
familiar with the situation it was de-
signed to correct, and it is believed it
will be a source of much benefit for the
entire north country.

Mr. Harriman learns slowly that he
must abide by the rules of the game,
whether he is financing a railroad or at-
tending a boat race. People with a bent
for close analysis will see in the little in-
cident that marred the Yale-Harvard
race on the Thames a manifestation of
the same spirit that has gotten Mr. Harri-
man into his high financial bad lands.
Apparently he believes he can make
rules for himself, and everybody else
must stand by, simper and smile and say
"nice Mr. Harriman." At the boat race
he took liberties expressly denied any-
one, and took them defiantly, evidently
confident that he could pull the thing
off. That there was a determined young
lieutenant present who could not see
why Mr. Harriman should be favored
over anyone else, and who promptly
caused his arrest, is a thing that will
cause much pleasure for everyone read-
ing of the affair. It does not appear that
Mr. Harriman labored under any misap-
prehension as to his rights on the course,
but that he started out to make what he
wanted to do the proper rule for his con-
duct. Indeed Mr. Harriman at the boat
race does not appear to be so very dif-
ferent from Mr. Harriman in Wall
street.

The senate of the Wisconsin legisla-
ture killed the two-cent fare bill, and
did a very proper act in so doing. The
railroad fare question was broached in
Wisconsin earlier than in most states.
Some months before this year's crop of
legislators got into action, a Wisconsin
state official made formal complaint to
the existing railroad passenger rates
were too high, and requesting that an
investigation be undertaken to see
whether they should not be reduced. The
commission took cognizance of the
complaint, searchingly investigated the
question at issue and found in favor of
a two and a half cent fare, as one equi-
table alike for railroad companies and
traveling public. It would have indicat-
ed a willingness to legislate in a man-
ner heedless of the results of careful
investigation of the question had the
legislature overrode this decision with a
two-cent fare bill. Governor Hughes ve-
toed such a measure in New York be-
cause the state law provides for a com-
mission competent to act in the prem-
ises, after studying the question from its
various angles. If the two-cent fare bill
had passed the Wisconsin legislature
Governor Davidson might well have ve-
toed it because Wisconsin already pos-
sessed a commission of similar powers
which had already acted in the matter.

SUPERIOR TRUST COMPANY

M. C. GETCHELL, -S- Sec'y.

creer, lesser simply because it is so
largely a pretense instead of a verity,
continued the greater evil of eliquis-
ness and caste feeling. These clubs Presi-
dent Wilson now proposes to abolish.
But President Wilson is not of that
class of reformers who think to make
men better by smashing blindly any
institution which they believe contains
evil. He is enough of a philosopher to
know that no institution flourishes which
has not in it some good; which does not
meet in some degree a legitimate hu-
man want. So at the same time that he
abolishes the clubs he proposes to erect
a substitute in the form of "quads" or
quadrangles, each of which will be a so-
cial entity containing sleeping, eating
and social center accommodation for its
inmates. He has not yet decided how
the students shall be distributed among
the different "quads" further than that
it shall not be by means of election.
Here is an idea of value not only to
other colleges and universities where
fraternities have operated powerfully to
destroy that democratic spirit which is
the hope of America, but for high schools
as well. A modified form of the Wilson
plan might help mightily in solving the
local high school fraternity problem that
has grown vexatious in so many cities.

MARQUETTE COMMON COUNCIL PROCEEDINGS.
Marquette, Mich., June 21, 1907.
A special session of the common coun-
cil was called to order at 8 o'clock p.
m. by the mayor, Hon John Robertson.
Present—Aldermen Asire, Campbell,
Corbett, Donovan, Downey, Ekstrom,
McCarthy, Peters, Schauer, Siegel and
Williams.
The city attorney was appointed clerk
pro tem of this session of the council.
The call for this session, signed by the
mayor, was read and proof by affidavit
of John Manning, showing proper ser-
vice of notice of the same on all of the
aldermen of the city, was presented; the
object of the session stated in the call
acting upon the following matters, viz:
1. The resignation of Daniel S. Dono-
van as recorder, filling the vacancy
caused thereby and approval of the of-
ficial bond of his successor.
2. Confirmation of the appointment
of deputy recorder.
3. Approval of liquor bonds.
The following was presented and read:
To the Honorable, the Mayor and Com-
mon Council of the City of Marquette,
Gentlemen:—I hereby respectfully ten-
der my resignation as city recorder of
the City of Marquette, Michigan, to take
effect immediately on presentation.
Very respectfully,
DANIEL S. DONOVAN,
Recorder.

On motion of Alderman Williams, sup-
ported by Alderman Ekstrom, and car-
ried unanimously, the resignation of
Daniel S. Donovan from the office of re-
corder was accepted.
The mayor presented the following in
writing:
To the Common Council of the City of
Marquette,
Gentlemen:—I hereby nominate and
appoint Edward J. McCarthy to fill the
vacancy in the office of recorder caused
by the resignation therefrom of Daniel
S. Donovan.
Dated, June 21, 1907.
JOHN ROBERTSON, Mayor.

Moved by Alderman Asire, supported
by Alderman Schauer, that the nomina-
tion of Edward J. McCarthy to fill the
vacancy in the office of recorder be not
confirmed. Carried.
Ayes—Aldermen Asire, Campbell, Cor-
bett, Donovan, Downey, Ekstrom, Mc-
Carthy, Schauer and Williams—9.
Nays—None.
Aldermen Peters and Siegel present
but not voting.
The mayor presented the following in
writing:
To the Common Council of the City of
Marquette,
Gentlemen:—I hereby nominate and
appoint Henry J. Koopp to fill the vacan-
cy in the office of recorder caused by
the resignation therefrom of Daniel
S. Donovan.
Dated, June 21, 1907.
JOHN ROBERTSON, Mayor.

Moved by Alderman Asire, supported
by Alderman Peters, that the nomina-
tion of Henry J. Koopp to fill the vacancy
in the office of recorder be not confirmed.
Carried.
Ayes—Aldermen Asire, Campbell, Cor-
bett, Donovan, Downey, Ekstrom, Mc-
Carthy, Peters, Schauer and Williams.
Nays—None.
Alderman Siegel present but not vot-
ing.

On motion of Alderman Asire, sup-
ported by Alderman Williams, the coun-
cil went into committee of the whole,
and after some time spent therein arose.
An ordinance was presented and read
entitled, "An ordinance providing for the
appointment of recorder pro tempore."
Moved by Alderman Asire, supported
by Alderman Campbell, that the rules
be suspended and that said ordinance
be placed upon its immediate passage.
Carried unanimously.
Said ordinance was thereupon adopted
by the following vote:
Ayes—Aldermen Asire, Campbell, Cor-
bett, Donovan, Downey, Ekstrom, Mc-
Carthy, Peters, Schauer and Williams—
10.
Nays—None.

Said ordinance was thereupon duly cer-
tified and presented to the mayor and by
him duly approved.
On motion of Alderman Asire, sup-
ported by Alderman Peters, the follow-
ing resolution was unanimously adopted:
Whereas, a vacancy exists in the office
of recorder of this city, caused by the
resignation therefrom of Daniel S. Dono-
van;
Resolved, That a special election to fill
said vacancy be and the same is hereby
appointed to be held in said city at such
places in the several wards thereof as
shall be hereafter designated, on Tues-
day, the 13th day of August, A. D. 1907.
The mayor announced his appointment
of Harry L. Siegel to the office of re-
corder pro tempore to serve until the vacan-
cy in the office of recorder shall be
filled by appointment or election.
On motion of Alderman Donovan, sup-
ported by Alderman Asire, the appoint-
ment of Harry L. Siegel to the office of
recorder pro tempore was approved.
The council thereupon adjourned.
GEORGE P. BROWN,
Clerk pro tem of the Council.

INSTEAD OF FRATERNITIES.
President Woodrow Wilson of Prince-
ton has already made one important in-
novation which seems to be bearing good
fruit. This was the appointment of a
large number of preceptors, young col-
lege graduates, who serve as connect-
ing links between the staid middle-aged
professor and the undergraduate. These
preceptors are said to have won the
confidence of the Princeton students
and in so doing to have established firm-
ly their right to be. Not so old or so far
removed from youthful enthusiasms as
to be old fog, not so young or so in-
experienced or so free from responsibility
as to have no thought of conse-
quences, they have introduced a new and
valuable element into Princeton life.
And now President Wilson is set upon
accomplishing another and more difficult
reform. Fraternities were abolished at
Princeton about twenty or more years
ago. They lingered for a time in a
stealthy, underhand fashion, but gradu-
ally they died out as stealthy, under-
hand institutions must die out among
men or boys who are essentially manly
and straightforward. But the inborn
desire for sociability which could not be
satisfied in the old dormitories and the
student boarding houses soon led to the
organization of upper class clubs which
while free from the lesser evil of se-

DARANTELLA

Upper Peninsula
Chopped Off His Toes—
Walter Musser has been brought to
the Soo hospital with a severely cut
foot which he sustained while working
in a lumber camp near Wellsburg. The
toes of the left foot were cleanly severed.
He was cutting small stove wood,
missed the stick with the axe and struck
his foot, with the above result.

Menominee's School Census—
The school census has been almost
completed in Menominee for the year
of 1907 and it appears that the total
will be no larger than that of last year.
Last year the census showed an increase
of over one hundred names, and footed
up 3,911. Up to date this year the total
is 3,838 but it will likely be increased
to the total of last year before all of
the names have been checked up. The
Menominee census had been steadily
growing smaller until last year when it
took a jump ahead.

Telephone Cable Laid—
The new twenty-wire cable which the
Michigan State Telephone company has
been planning for some time to lay be-
tween the two Soos has been put into
service. The cable, which arrived in the
Canadian Soo some time ago from Eng-
land, where it was manufactured, was
first loaded on a scow and brought to
the American side of the river. Both
Canadian and United States tugs were
used in each nation doing the work
on their side of the boundary line. The
work of connecting up the wires was
begun at once and the new connections
was ready for service yesterday.

The cable will be of especial
benefit to Canadian patrons who desire
to get distance service into the states.
Hitherto their service in this particular
was very poor, the wires being carried
across on a bridge.
Big Dredge Is Sunk—
The Zenith Dredge company's dredge
No. 1, at work on the improvements at
Ontonagon, has come to grief, according
to advices from there. She pulled her-
self onto a big tile or deadhead, and as
a result went to the bottom. When the
dredge went on the deadhead it punched
a big hole in her side and the water
poured into her hold rapidly, so that she
sank only a few minutes after the acci-
dent. This was directly in the channel
into the harbor, so that the 150 feet
north of the dredge sank at the bow,
while her stern is out of the water
only about two feet. It was expected
that several days would be consumed
before the dredge was pumped out and
raised. It is not thought that the craft
is badly damaged except for the hole
punched in her hull. The sinking of
this dredge is the first occurrence of the
kind that has happened during govern-
ment improvements for ten years. At
Ontonagon the government is digging a
channel into the harbor so that larger
boats can make that port. The im-
provements were only begun this week
by the Zenith Dredge company, which
has the contract.

Copper Country

DEATH OF LITTLE ALICE FINLEY.

The Sad Accident That Resulted in the Drowning of a Child.

The death of little Alice Finley by drowning at Hancock Thursday, as reported in these columns yesterday, was one of the saddest accidents in that city in years.

SOME JUNE WEDDINGS.

Numerous Bridals in the Copper Country This Week.

The copper country has been dilatory in producing the usual number of June weddings, but it has been making amends in the past few days, a number of marriages having taken place in that time.

THREE BIG CELEBRATIONS.

Temple of Honor, the Rechabites and the Croats Today.

The grand temple of the Temple of Honor and Temperance, which has been in session in Trumountain for the past two days, closes its annual meeting today with a big reunion of all the temples of the country.

The annual convention of the Michigan district of the Independent Order of Rechabites, a big English temperance society, is being held in Calumet today and tomorrow.

The Croatian societies of the copper country will hold a reunion at Calumet today. The members will attend mass at the Croatian Catholic church at 9 o'clock and following this will parade to Tamarack Park, where a big picnic will be held.

The Finnish Temperance Brotherhood of Calumet is planning the entertainment of delegates from all over the United States and Canada, July 23 to 27, when the national convention of the National Finnish Temperance Brotherhood is to be held there. It will be the most important Finnish gathering of the year.

"CHIEF" JONES MARRIED.

Well Known Hockey Player Weds Miss Pearl Ranson of the Soo.

Joseph H. (Chief) Jones and Miss Pearl Ranson, both of the Soo, were married Thursday morning at Detroit. The bride is the daughter of D. J. Ranson, Portage avenue, and the groom the hockey player who has defended the Soo goal during seasons past.

SCHOOL ELECTIONS.

Directors Will Be Chosen in All Districts on July 8.

All of the school districts of Houghton county will choose directors, members of the school boards, July 8, and preparations are now being made for the elections. It is impossible to compile a list of the school officers whose terms expire at this time, but there are expirations in every district.

WINONA LETS CONTRACT.

Byers & Co., Houghton, Will Construct Two Miles of Railroad.

The Winona Mining company yesterday closed a contract with James J. Byers & Co. of Houghton for the construction of two miles of railroad to run between the Winona mine and through the King Philip property to the Misery River.

The Winona is to locate its stamp mill and pumping station on the Misery, near its mouth, in Ontonagon county. The King Philip property, which is owned here, the road will have spurs running to the various shafts of the two mines, providing their entire transportation facilities. This is the first railroad which the Winona will have had constructed.

COLLEGE CALLS FOR BIDS.

Contract for Power House and Tunnel May Be Let July 11.

President McNair of the Michigan College of Mines yesterday sent out notices asking for bids for the construction of the service tunnel and stone power house which the college is to construct this year.

The bids must be in President McNair's hands by 10 o'clock the morning of July 11. The president is engaged in an effort to arrange a meeting of the board of control for that date, and in all probability the contract will let at that time.

RED LETTER DAY FOR ROCKLAND. Village Will Now Have Water Works and Adequate Fire Protection.

Tuesday morning last marked an epoch in the history of Rockland, says the Reporter. The work of providing the village with a system of water works was started.

While the lease for the ground upon which the reservoir is to be established had not yet arrived, work had been received from New York that it would be along in a few days, and at a meeting of the board it was decided to begin work this morning.

An order has been placed for the necessary pipe, hydrants, etc., and these are expected to be delivered as soon as they are needed. A hose cart and several hundred feet of hose will also be forthcoming, and everything else necessary to equip the fire company for aggressive work.

PUBLIC WORK DELAYED.

Hancock Paving Starts July 5—West Houghton Sewers.

There is a suspicion that the fates are against public works contractors in the copper country. It is very seldom that a big public contract is started on the date originally set, and this is exemplified in respect to the Hancock paving and the West Houghton sewer contracts.

The Hancock paving work should have started June 18, the day after the assessment was levied, but owing to the public clamor for unobstructed streets on the 19th of July the contractors have been compelled to defer action until July 5. Byers & Co. of Houghton, who are to do the excavation for this pavement for Blome & Co. of Chicago, the contractors, have been ready for weeks, but are now compelled to wait until after Independence Day.

Building and Cement Contractors. Sealed proposals will be received before 10 o'clock a. m. Thursday, July 11th, 1907, for the erection of a stone power house and for the construction of a concrete service tunnel on the grounds of the Michigan College of Mines, Houghton, Michigan.

Plans, specifications and instructions may be seen on and after the first day of July at the office of Professor O. P. Hood at the college.

Bids should be addressed to the undersigned and should be marked Proposal for the Erection of Power House or Proposal for the Construction of Service Tunnel as the case may be. The right is reserved to reject any or all bids.

F. W. McNAIR, President. (6-29-74)

If we could take you through our establishment, and show you the vast care and cleanliness which produce the old original egg and sugar coated Arbuckles' Ariosa Coffee, no one could ever tempt you to change to any other coffee. ARBUCKLE BROS., New York City.

ELVENTH CALUMET DEATH. Michael Klobueher, thirty-one years of age, died of typhoid Thursday at Dr. Sorenson's hospital in Calumet. He was the eleventh victim of the disease since the epidemic broke out at Calumet. Klobueher leaves a wife and two children in Croatia. The funeral will be held today.

COPPERDUM BREVITIES. Miss Lottie Nichols of Ishpeming is visiting friends in Calumet. E. M. Lieblin of Hancock is in Chicago on business for his wholesale grocery.

Paul D. Swift of Houghton has had plans drawn for a handsome modern residence in Hancock.

Contractor Paul P. Roehm broke ground yesterday for the new First National bank building in Laurium.

The Calumet & Hecla band gave another highly successful promenade dance in the Calumet armory last night.

B. O. Pearl of Marquette, upper peninsula referee in bankruptcy, is a visitor in Houghton on official business.

C. D. Hanchette of Hancock is home from Marquette, where he has been attending the United States circuit court.

Captain and Mrs. James Hoatson and Miss Marie Gault of Calumet sailed yesterday from Quebec enroute for Europe.

The Lake Linden baseball team plays today at tomorrow evening, Minn., against the strong independent nine of that place.

Professor Seaman of the Michigan College of Mines faculty, who is engaged in an exploratory work in the Cobalt field, arrived home yesterday.

James MacNaughton was honored last week in Ann Arbor by having the degree of bachelor of science conferred upon him by the University of Michigan.

Mrs. Homer A. Guek of Houghton is visiting in Chicago. She attended on Thursday the wedding in that city of her sister-in-law, Miss Eva Guek, to Alex. G. Andrew.

It is now announced in Calumet that 'Anton & White's' new store, the Glass 'front, will not be opened until July 15. Unavoidable delays make the postponement from the original date, July 1, imperative.

Dr. Mahood, who for the past three weeks, has been conducting immensely successful revivals in the Laurium M. E. church, will conclude his work in the latter church and in Calumet with tomorrow's services.

John M. Wagner, purchasing agent for the Copper Range Consolidated, has returned to Hancock from Atlantic City, where he attended the master carpenters' and mechanics' convention. Mrs. Wagner accompanied him.

The officers of the Hancock division of the Knights of Pythias are invited to attend a special cruise of the 'Yantic' from July 4 to July 9. A definite acceptance of the invitation has not yet been given.

President W. R. Tood of the Quincy, who is now visiting the property, and C. L. Lawton, superintendent of the mine, were the guests of Dr. W. A. Courtney of Hancock Thursday in an automobile trip of inspection through Keweenaw county.

The Hubbell fire department, which is to send a running team to the Ontario tournament in August, is also preparing to hold regular weekly drills for the purpose of competing for the prize for the best appearing company in the tournament parade.

Dr. H. S. Cole of South Range has a special of his successful examination for a commission as second lieutenant of the Houghton Light Infantry. It is understood that Dr. Cole will succeed Captain E. G. Heckel when that officer retires from command of the company in August.

The regular Saturday afternoon reception of the Houghton club will be held at the clubhouse this afternoon and evening. Mines, John H. Rice, John C. Pryor, Joseph H. Rodgson and D. L. Robinson and Misses Pope and Northley will receive. This is the first of a series of social entertainments to be given by the club this season.

Building and Cement Contractors. Sealed proposals will be received before 10 o'clock a. m. Thursday, July 11th, 1907, for the erection of a stone power house and for the construction of a concrete service tunnel on the grounds of the Michigan College of Mines, Houghton, Michigan.

Plans, specifications and instructions may be seen on and after the first day of July at the office of Professor O. P. Hood at the college.

Bids should be addressed to the undersigned and should be marked Proposal for the Erection of Power House or Proposal for the Construction of Service Tunnel as the case may be. The right is reserved to reject any or all bids.

F. W. McNAIR, President. (6-29-74)

Mining News

QUINCY.

A Mine With a Wonderful Record—History and Future Prospects.

The Quincy has a wonderful record, being about the oldest mine on the Lake and antedating the Calumet & Hecla as a dividend payer by ten years.

The exception of two years Quincy has paid dividends every year since it began such distributions in 1862.

In 1846 some exploratory work was begun on section 26, township 55 north, range 34 west, on the hill near the northerly margin of Portage lake, and from this preliminary work two years later grew the Quincy Mining company.

This is the earliest of the mining operations undertaken at Portage lake, and is, too, one of the earliest of the pioneer mining industries of the entire region.

Unlike the Cliff and the Minnesota mines, it was not successful from the start; this for the reason that the early work did not, like the others, develop mass copper, and up to that time they had not developed the methods of manipulating rock containing fine copper in a way to extract and save the metal.

The Quincy's original estate through which the Pewabic lode has a length of upwards of 4,800 feet, has been enlarged and made greatly more valuable by the purchase from time to time of additional mineral territory, and the one made a few months since of 900 acres from the Archangel copper company gives to the Quincy a length and depth for future mining for an indefinite period.

The installation of electric haulage underground and its recent extension and increase have been a distinct advance in cheapening cost. To one who has been familiar with the Lake Superior copper mines for years, it is especially a pleasure to go through the Quincy stamp mills and note the great progress that has been made and is constantly making in this department of the work at the mine.

The stampheads do more and they do it cheaper, and this is affected in many ways. An important saving in fuel has been secured. For years past the number of tons of rock stamped, per ton of coal consumed, has been quite uniform; but during the past year a ton of coal has been made to do an average of stamping ten tons more rock than formerly, and they hope to make the ratio still better.

There are eight heads of stamps, five in No. 1 mill and three in No. 2. The work of these heads has been increased to such an extent that now there are single heads that are stamping nearly 700 tons of rock a day. The Quincy was nearly the first to pay attention to the amygdaloid stamp lodes.

Its situation was far different from that of the Cliff and the Minnesota, which was rich in mass copper from the very start.

The total original capital called for by the Quincy, by assessment, was \$200,000. This sum, with that derived from the sales of copper, paid for the work done and for covering the losses, was the outfit, it sufficed to prove that stamp lodes could be successfully worked.

The first dividend was paid in 1862, and the Quincy has the record of paying its dividends from that time to present, with the exception of two years, thus covering a longer period than any other mine has been able to maintain.

The Quincy has not only paid its regular annual dividend, but it has kept at the front in improvements and has made large purchases of real estate to the extent of the expenditure of \$5,000,000. Forty years ago it was determined to enter upon the purchase of additional territory, with especial reference to the acquisition of the Pewabic lands, to all of which that possessed any known mineral value the Quincy finally became the owner.

In 1860, when the Quincy began to get on its feet and to pursue some regular system of mining, it was considered good to handle 200 tons daily. Now they are sending to the mills an average of 900 tons a day. Then it was the custom, and continues to be so for many years, to first roast the rock in kilns and then to break it up with sledges, and this at a cost of seventy cents a ton. Now the work is done in powerful breakers, and at a cost at the Quincy of only 20 cents a ton.

In 1864, for instance, there were treated at the Quincy mill 47,445 tons of rock at a cost of \$90,333.51, or \$1.90 a ton. Now the mine supplies the mills with more than 1,000,000 tons a year, which are sorted and crushed and stamped and washed at a cost of less than twenty cents a ton. In 1864 it cost about thirty cents a ton to transport rock from the mine to the mill, while at the present time this is done at a cost of less than five cents a ton.

The report shows that it cost the company about \$10 a ton to mine and treat its rock, while at the present time this cost is less than \$1.50 a ton, if we exclude construction account.

Another of the important departments of work was added eight years ago in the building of the Quincy smelting works at Hancock. These works are operated closely in conjunction with the stamp mills, from which the copper goes directly to the smelters in cars that discharge into bins at the furnaces. A great saving in time and cost is effected by reason of these smelters. In addition to smelting the Quincy copper, there is also smelted here the mineral from the Adventure, Mass. Centennial, Alouez and Franklin mines, which is done, of course, at some profit. There are five furnaces, one of which is used for smelting the low-grade copper. The company's coal docks at Torch lake are furnished with all facilities for storing coal and for unloading it from vessels and loading it into cars to send to the mine, etc.

Since beginning dividends forty-five years ago, Quincy has paid to its stockholders over \$17,000,000 in dividends and at its current rate is paying more than ever each year to the owners of its 110,000 shares of stock. There are 40,000 shares of Quincy stock authorized but not yet issued. The last issue of 10,000 shares was put out at \$70 a share and a valuable "right" accrued to stockholders in addition to the regular dividend.

While the mine produced only a trifle over 10,000,000 pounds of copper in 1906, it will return to its normal rate of between 18,000,000 and 20,000,000 pounds during 1907, doubtless, and there is no reason to doubt that the present divi-

THE CITIZENS' NATIONAL BANK HOUGHTON, MICHIGAN. OFFICERS: Graham Pope, President; C. V. Seeber, Vice-President; C. H. Moss, Cashier. DIRECTORS: Graham Pope, C. V. Seeber, E. F. Chisworth, E. R. Hall, A. F. Heidekamp, A. M. Schulte, John G. Stone, C. H. Moss.

den rate will be continued. A product of 10,000,000 pounds costing ten cents a pound and sold at twenty-five cents a pound will give the company a net profit of between \$25 and \$26 a share against its present payment of \$18.

NOTES OF COPPER NEWS. The North Butte daily output averages 1,250 tons, running about 4 per cent copper. Mining is being confined almost entirely to lower grade ore, while the tremendous bodies of copper glance are left undisturbed.

A rich vein has been cut at the Greenleaf mine adjoining Butte Exploration ground at a depth of 840 feet, which is increasing in width with depth. It is fourteen inches wide at the shaft and is full of calcopryite and peacock, assaying 30 per cent copper. The vein strikes northeast and if found to be continuous must go through the center of Battle & London ground. The strike is considered significant and important by Amalgamated engineers.

The big shaft of the East Butte company is down 850 feet, and when the 900-foot level is reached the company will open the vein at that depth and begin producing. The lessees continue daily shipments, and Manager Wall says that iron workings at an increased level of the 400-foot level of No. 2 the ore is mostly concentrating. Enough ore for five years' mining is asserted to be blocked out at the 900-foot level, aside from which new veins of smelter ore are to be opened.

A dispatch from Salt Lake mentions the probable placing of the Newhouse Mines & Smelters stock on a dividend basis next month. A recently returned visitor reports as follows: "Never in the history of the mine did it look so well. Machinery has been installed for sinking an additional 1,000 feet and the work has been begun and all connected with the property. I confidently believe that in the next 1,000 feet conditions will be even far better than they are up above. Production is going on at the rate of about 1,000,000 pounds of copper a month at present. The installation of machinery for an increased capacity of 200 or 300 tons a day will be completed very shortly. The ore on the fourth and sixth levels is looking better than ever. The work connected with the development of electrical power from the Levee River has been progressing satisfactorily and by November of this year the concentrating mill will be running with this power. This will give considerable economy as compared with the cost of coal, as well as comparative freedom from the annoying coal shortage of last winter."

There is developing some dissatisfaction on the part of one of the few minority stockholders of the Boston & Montana Consolidated Copper & Silver Mining company at the persistency of the directors of that company in declaring regularly every three months a \$12 dividend—\$2 and \$10 extra—irrespective of the price of copper and the aggregate earnings of the company. Comments the Boston News Bureau. In 1904 the directors paid \$64 a share in dividends while last year only \$48 a share was paid and the position is taken that without question the company earned more last year than in 1904. The two dividends paid thus far this year have been at the rate of \$48 a share per annum. The prominence recently given to the profits being made by the United Metals Selling company in selling the copper of the Amalgamated Copper mines to which the Boston & Montana two dividends paid thus far this year have been at the rate of \$48 a share per annum. The prominence recently given to the profits being made by the United Metals Selling company in selling the copper of the Amalgamated Copper mines to which the Boston & Montana two dividends paid thus far this year have been at the rate of \$48 a share per annum.

How's This? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O. We, the undersigned, have known F. J. City Brevities

Today's weather: Fair; stationary temperature.
Yesterday's temperature: Seven a. m., 70 degrees; noon, 78; 7 p. m., 79. Maximum, 84 degrees; minimum, 70.

J. B. Eddy of the Sun has been in the city the past few days.

D. T. Morgan of Republic was a Marquette visitor yesterday.

F. A. Baker of Manistique was a Marquette visitor yesterday.

Henry Kellan is home from an extended landlooking trip in the South.

W. H. Becker of Chicago, formerly of Marquette, is in the city visiting with friends and relatives.

The Ideal orchestra will give its usual week-end social dancing party at Fraternity Hall this evening.

Captain Brown, of Chicago, who has been camping at Au Train, will leave for that city tomorrow night.

A cow was struck by a locomotive on the M. & S. E. track below the gas house late yesterday afternoon, and was killed.

Today being St. Peter's day, there will be a celebration of the holy communion at St. Paul's church at 9:30 o'clock this morning.

J. M. Edgerton of Negaunee, H. F. Her and Fred Tomases of Ithaca, looked after business matters in Marquette yesterday.

Carter H. Harrison, former mayor of Chicago, left last night for his home, having concluded an outing at the Iluron Mountain club.

Revs. Father Bennett and Stenglein, both former Marquette men, spent yesterday in the city, coming down from the retreat at Assinins.

M. J. Peppard of Minneapolis, a member of the contracting firm which built the big South Shore ore dock, was a Marquette visitor yesterday. He left for his home last night.

Beginning with today, the street railway will give a fifteen-minute service to and from Presque Isle each evening. Up to the present time the cars have been making only half-hour trips after 7 o'clock at night.

The righting of the cars tipped over in the big washout on Lake street was finished yesterday. The South Shore has elevated its track into the yards on temporary piles of timbers and ties, and is ready to begin filling the hole.

Deputy Warden Catlin, of the Marquette prison, and James Deagon, the steward, left yesterday afternoon for Ionia with James Brady, a convict who has been held to be insane, and who will be placed in the asylum for criminals, in charge. Brady was sent up from St. Clair county, Mich., for breaking into a store at night, having been given a sentence of from seven and one-half to fifteen years.

Yesterday a Sizzler—Yesterday was one of the hottest days of the year, and the heat, which mounted to over ninety degrees. The country has pretty well dried up again, and another rain would be beneficial.

Today's Bills—The Mack-Leone company will give matinee and evening performances of "Just a Plain Folk," a South's other "Husband," drew another packed house, and it is probably superfluous to say that it met with the usual cordial reception.

To Fill Prison Washout—It was planned to start filling the washout at the spur track leading into the prison yesterday. This track is owned jointly by the South Shore and Marquette & South-eastern railways. It was badly undermined last Sunday. There is a considerable traffic over the track, as not only is fuel for the prison shipped in by it, but also the lumber for the box factory at the institution. The factory also ships its finished products out over this spur.

Captain Ross in Duluth—Capt. Duncan C. Ross, who spent a few weeks in Marquette early in the spring and whose stay here was enlivened by police court procedure in which the captain played a stellar role, is now in Duluth "on his way west where he has accepted a position with the government," the News-Tribune says. Meanwhile, the captain is ready to take on all comers, irrespective of the color line, or any other line, at the wrestling game.

Installing Steam Plant—The principal work in connection with the city schools during the vacation period will be the installation of a steam heating plant at the Ely building, Bluff street, to replace the hot air plant in use since that building was erected. E. J. Sink has the contract, and the new plant will shortly begin to go in, the janitors having been engaged for some days' past tearing out the old equipment. The change will be made at an expense of over \$2,000, but will result in much cheaper heating costs, as the old hot air plant was a heavy consumer of coal.

Here's Another—Jay Gillet informs The Mining Journal that he, too, will be a candidate for the office of recorder at the special election to be held August 13. He is a competent accountant and well qualified for the position. The election promises to be notable for the largest field of candidates ever offering itself for an office in Marquette. Already L. M. Spencer, Shields McCarthy, Alderman Harry Siegel, Ed McCarthy and Mr. Gillet have announced that they will make the run, and it is also understood that D. S. Donovan will be a candidate, as his friends having urged him to run again. Mr. Donovan plans to leave the city presently for a few weeks absence.

No Illumination Necessary—The Fourth of July committee will be spared any expense for special illumination for the forthcoming celebration. Marquette is now one of the best lighted cities in the upper peninsula; in the state in fact. The strings of incandescent lamps extended on Front street from Ridge street to Fisher, a distance of seven blocks, and west seven blocks on Washington street. In addition Spring street and Baraga avenue have this special illumination.

There are hundreds more lights than were displayed for the last Fourth of July celebration. It would cost a number of hundred dollars to install the light for the Fourth of July alone. The city should present a brilliant and lively appearance in the evening, when the merrymaking is in progress.

WILL PURCHASE FENDERS.
Street Railway Company to Comply With Provisions of New Ordinance.

The officials of the street railway company are figuring on the question of fenders for the cars, to comply with the requirements of the ordinance passed at the June meeting of the council. The company already had the fender question up when the ordinance was passed, and now proposes to equip the cars as soon as it is decided what type of fender will give the best service and delivery can be had. The front end of every car or train of cars will be provided with a fender, and the danger of serious or fatal accident on the line will be greatly lessened.

The officials of the company are also about to place an order for new switching and sidetrack equipment, to be used at the corner of Fair and Presque Isle avenues, Fair avenue and Third street, Hewitt avenue and Front street and Front and Washington streets. The present switches have been in use for many years, and are so worn that they do not longer give satisfactory service. In addition they rack the cars. The company will not be able to get delivery on this material outside of sixty days, so that it will be the early part of fall before the change can be made.

INTEREST PICKING UP.
Speculators Beginning to Think That Life Is Worth Living, After All.

The past week has shown the most interest in the course of stock quotations noted since the March slump. There has been in the markets a considerable revival of the buying power and a renewal of bullish activity. There has been a quick response to this change in Marquette and other cities in this territory, and it is shown by an increased inquiry about the markets and a larger gathering at the brokerage offices to watch the course of quotations. Most of the active issues have shown nice gains this week, and the brokers' advices are more bullish than at any previous time since the markets went to pieces in March.

On paper the people who dabble in stocks in this county have been losers to the extent of millions of dollars since the first of the year. The vast majority of country speculators are consistently on the long side of the market, as the revival of interest on the development of bull news shows. Actual money losses in this region have not, however, been very serious. Most people have all the stocks they had the first of the year, and many of them have, in addition, made good all their paper losses and perhaps be able to show some additional paper profits besides.

PLANS PROGRESSING NICELY.
Committees Well Satisfied With the Outlook for the Fourth.

Members of the arrangement committee report that the plans for the Fourth of July celebration are making excellent progress. Indeed they are now so well formulated that only the final details have to be arranged. The fireworks have already been delivered. The display will eclipse the excellent one of last year, and will be the finest ever shown in the county. It will be given from the head of Front street, opposite the Hotel Marquette, where a large platform will be erected for the committee which will fire the pieces. A program of the display will be published later.

The outlook for floats is excellent. There will be a large increase over the number appearing in the line of march last year, and many of the merchants are planning excellent displays. There will be comic floats and a big levy of callibumpkins, to enliven the line of march. There will be a good turnout of the fraternal societies. The Woodmen have received several hundred dollars' worth of paraphernalia that will be used for the first time in the parade.

It goes to the root of disease, invigorates, strengthens, exhilarates. Its life producing properties are not contained in any other known remedy. Hollister's Rocky Mountain Tea, Tea or Tablets, 35 cents. The Stafford Drug Co.

The popularity of Vandenberg's fresh milk and creamer butter, is due to the excellent quality and delicious flavors of the goods. (6-12-1m)

PARASOLS AND UMBRELLAS.
A full line of fancy, silk and other grades at half regular price during the closing out sale at Seidenfeld's store. J. J. CARROLL & CO. (6-19-1)

SPECIAL MEETING.
Pursuant to the resolution of the board of directors of the Lake Shore Engine Works, held at the office of the company in the city of Marquette this day, notice is hereby given that a special meeting of the stockholders of this company will be held at 2 o'clock p. m. on July 11, 1907, at the office of the company in the city of Marquette, Michigan, for the purpose of considering and acting upon the following questions:

1. The sale of the real estate of the company for the purpose of acquiring other real estate more suitable for the company's needs.

2. The retirement of the outstanding bonds and preferred stock of this company.

3. The issue of a new series of bonds to be secured by first mortgage upon all real property and fixtures of the company in such amount as may be determined upon at such meeting.

4. The retirement of the issue of preferred stock and the issue of common stock in place thereof, in such amount and on such terms as may be determined at such meeting.

5. To authorize the increase of the capital stock of the company to such amount as may be determined at such meeting, and the execution by the president, secretary and board of directors of all necessary certificates, conveyances and other instruments required to carry out any of the purposes herein referred to.

Dated, Marquette, Michigan, June 22, A. D. 1907. J. E. RALL, Secretary. (6-24-154)

REVENGE

Nearly every man who has an injury done him tries to

Repay the Injury

He must either repay it with good or with evil. If he repays it with evil he does not get satisfaction. If he repays it with good he gets happiness. It is certain that payment of evil with good can satisfy a man who is looking for revenge, while it has always been a question whether there is any satisfaction in paying evil with evil.

Marquette, Michigan.

MARKETS

CHICAGO GRAIN MARKETS.

Chicago, June 28.—Following yesterday's sensational advance in wheat many traders were eager to sell at the opening today in order to secure profits. The pit traders also sold freely because of improved weather for the harvest in the Southwest. The market, however, soon became steady because of reports of dry weather in the spring wheat territory. In the latter part of the session a sharp rally occurred, the prices advancing about two cents above the low point of the day. The advance was brought about by the report of two well-known crop experts who estimated the crop in Kansas, Missouri, Oklahoma and Texas to be only 50 per cent of the yield of last year. The market weakened again during the final half hour on profit-taking, and closed easy, the September being down 1/2 cent. September opened at 98 1/2¢; highest, 100; lowest, 98; closing, 98 1/2.

Cor.—Small primary receipts and liberal shipments caused a firm tone. The crop news was bullish. The September closed unchanged at 94. Outlook.—The market was inclined to weakness during the greater part of the day because of selling by local buyers. The September closed 1/4 lower, at 37 1/2.

Paine, Webber & Co. had the following report on the Chicago wheat market yesterday: "It looks as if wheat bears had notice served on them to keep out of the way. Even after a sensational advance of 5 or 6c in the last hour yesterday there was but a one-cent reaction from Thursday's closing price at low point today. After a rally from the early dip, there was a hesitating sort of a market for an hour or two, and near the close there was a return of strength and a bull market, which carried the September price up to 81 again and the December to 102 1/2. Those who are friendly to wheat don't appear to be real sure of their ground, and are quick to take profits on this kind of a swell. This gave the market its reaction to a little under Thursday's price at the close. Liverpool did not come as strong as expected, but there was a sharp advance at Antwerp, reflecting bad crop conditions in the Danubian country. Jones gave out some details on his estimate of southern yields, indicating that 73,000,000 for Kansas, Missouri, Oklahoma and Texas, compared with about 150,000,000 for those states last year. There are many claims

that a cash loss in the neighborhood of \$5,000,000 is indicated without allowing for the under-statement of the cash loss generally believed to have appeared in last week's statement. The shifting of loans that has been going on leads to the expectation of considerable changes in that item. The speculative contingent had worked itself up into a professed state of great hopefulness over the prospect of success of the New York city bond offering, which was to be absolute, according to assertions current in the stock market. As the offering proved to be a fiasco there was naturally some disappointment amongst previous buyers, and a sharp reaction ensued. The flurry in the gold market aggravated the reaction, and the prices were forced back so that the day's changes show more losses than gains.

Paine, Webber & Co., report closing prices as follows:

U S Steel.....	85	Mc Pac.....	75
Q F & I.....	31 1/2	C & O.....	75
Rep St.....	31 1/2	Am Loco.....	81 1/2
Smelters.....	116 1/2	C & W.....	81 1/2
Sugar.....	126 1/2	N D.....	75
Atch.....	30 1/2	A C F.....	75
Rock Is.....	12 1/2	So Pac.....	75
Penna.....	12 1/2	Erie.....	75
N Y Cen.....	11 1/2	Wabash.....	75
So By.....	11 1/2	M K T.....	75
Ill Cen.....	11 1/2	B R T.....	75
U P.....	10 1/2	Fee Gas.....	55 1/2
B & O.....	9 1/2		

Paine, Webber & Co. had the following advice on the New York market yesterday: "The stock market today was strong and higher, until it was announced the New York city bond issue was a failure, which caused the market to decline from the high of the day. An improved tone has been noted in the bond market, which is a good indication of the probability of higher prices for stocks. However, had crop reports from the Southwest and had reports from the growing crops in the Northwest, caused apprehension, and no doubt held the market in check to a very great extent. Considerable covering by shorts was in evidence to-day, and although the elimination of the short interest may weaken the technical position of the market to a certain extent, it would not be surprised to see the list recover and sell materially higher."

Boston Stock Quotations.

Paine, Webber & Co. wired regarding yesterday's Boston market: "There is no doubt that the bull side is the side to play. The course of the market is not yet well defined, but we think that the turn has surely come. Little things affect prices easily, as the orders are so scarce, but in spite of the setbacks prices are gradually rising. The failure of New York City to dispose of its bonds today was a bear argument, but it will be forgotten by tomorrow. Buy the good stocks like Copper Range, North Butte, Quincy, Calumet & Arizona, Greene Cananea and hold them for much higher prices."

Closing prices were:

NEW YORK STOCKS.

New York, June 28.—The call money market was further disturbed today by the preparations for the July settlements. On Monday will begin the distribution of dividends and interest to an amount estimated at \$183,000,000. Such was the course of reasoning which prompted the pursuit of the early operations in stocks today until the failure of the New York city bond offering threw a damper on the enthusiasm. It is expected that much of this \$183,000,000 will find its way back into stocks for re-investment. It is expected also that the money market will subside into easier conditions soon after the turn of the month. The rise in the call money rates today was accepted as one cause for the absence of gold engagements for export. Call loans touched 12 per cent. Not much attention was paid to estimates of the currency movement, in spite of the large loss in cash indicated and the low condition of the bank surplus. There seems to have been a heavy movement of currency to this center during the week, but the sub-treasury absorption has reached \$7,236,000, so

NEW SIGNER FOUND.

Mistake in Name of the Declaration of Independence.

Trenton, June 28.—Dr. Charles Godfrey of the adjutant general's office here has discovered that the records of the state and of the national government, besides historians, have made a mistake in the name of a signer of the Declaration of Independence, whose pen marks are legible on the documents and whose portrait hangs in the corridors of the state house here. The lost signer is John Hart of Hunterdon county, who was elected a congressman from New Jersey on June 22, 1770, and signed the memorable document July 4 following. The government, the state records here and historians generally confused the distinguished signer of the Declaration of Independence with John De Hart, a former congressman from New Jersey who resigned June 1, 1776. Worthington Chamney Ford, chief of the division of manuscripts at Washington, D. C., has forwarded a letter to Dr. Godfrey declaring the federal government wrong in its later records, and thanking Dr. Godfrey for finding the lost signer of the Declaration of Independence.

NO CHANCE FOR NAVY YARDS.

Their Bids for Construction of One of Dreadnoughts Much Too High.

Washington, June 28.—There is no likelihood that either one of the new 20,000-ton battleships, bids for which were opened at the navy department last Thursday, will be built in government yards. It is learned that the estimates made by naval constructors for the building of one of these vessels in a government yard are in the neighborhood of \$700,000 in excess of the bid of the Newport News Shipbuilding company and \$500,000 higher than the proposed bid of the Fore River company. It is said that there are only slightly under the bid of the Cramp company, which was the highest of any submitted.

SOO CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., June 28.—[Special.]—The upbound boats passing the canals the last twenty-four hours were the following: Oliver, 3:30 p. m.; Jas. JULY WEATHER.

The following data, covering a period of thirty-six years, have been compiled from the weather bureau records. They are issued to show the conditions that have prevailed during the month in question, for the above period of years, but must not be construed as a forecast of the weather conditions for the coming month.

Temperature.

Mean or normal temperature, 65 degrees. The warmest month was that of 1878, with an average of 71 degrees; the coldest month was that of 1891, with an average of 60 degrees. The highest temperature was 108 degrees on July 15th, 1901; the lowest 38 degrees, on July 20th, 1881. The earliest date on which first "killing" frost occurred in autumn is Aug. 22, 1888; average date on which first "killing" frost occurred in spring, May 15th; the latest date on which last "killing" frost occurred in spring, June 11, 1881.

Precipitation.

Average for the month, 3.09 inches; average number of days with .01 of an inch or more, 12; the greatest monthly precipitation was 6.79 inches in 1902; the least monthly precipitation was 0.76 inch in 1875; the greatest amount of precipitation recorded in any twenty-four consecutive hours was 4.13 inches on July 16, 1873.

Relative Humidity.

Average 7 a. m., 73; average 7 p. m., 70.

Clouds and Weather.

Average number of clear days, 9; partly cloudy days, 14; cloudy days, 5.

—Wind—

The prevailing winds are from the northwest; average hourly velocity, 8.4 miles; highest velocity, 48 miles, from the southwest on July 20th, 1901.

We don't care if you are skeptical; we don't care if you have no confidence; it makes no difference to us. Hollister's Rocky Mountain Tea will do the work or no pay—that's fair. 35 cents. The Stafford Drug Co.

W. W. Ward, of Dyersburg, Tenn., writes: "This is to certify that I have chronic constipation, and it has proven, without a doubt, to be a thorough, practical remedy for this trouble, and it is with pleasure I offer my conscientious reference." The Stafford Drug Co.

flow of water is slow a barrel of oil is so arranged as to have a constant drip of oil into the water.

The systematic method in which the health of the canal employees is guarded is illustrated by the work of the "mosquito inspector," who is an important adjunct of the sanitary department. His duty is to locate the points of infection in every district showing an increase of malarial cases. The reports of all malarial cases from the district physicians, who are scattered over the canal zone, are carefully tabulated and forwarded to the headquarters of the sanitary department. If there is a decided increase of malaria in any one locality, the inspector for that district is telephoned to look for the point of infection which is the probable cause for the increase in the disease. The list of cases of sickness in his locality is forwarded to the inspector, who carefully goes over the ground to locate the breeding place of the disease. As soon as this area is found the inspector reports back to the sanitary headquarters the best method of destroying the mosquitoes in that locality. The incriminated area is then sprayed at once placed at work in the neighborhood of the point of infection, and all the stagnant pools and underbrush are removed. The effectiveness of this system is borne out by the fact that the total number of cases of malaria at Forty Mile Camp, which has a population of 225 persons, was reduced from twenty malarial cases on March 16, to one case on May 25. At Cuareacha, where there are 402 cases, there were eighteen cases on March 23, and only one case on May 25. At Hante Obispo a similar decrease in malarial cases was noted.

ARMY STRENGTH GROWS.

Will Be 74,761 Men in the Various Services by July 1.

Washington, June 28.—Orders have been issued in regard to the organization of the enlisted strength of the artillery branch of the service, dividing this corps into field and coast artillery. The total enlisted men in the line amounts to 64,520. With the men in the field artillery and the military academy the grand total on July 1 will be 68,976 men. There will be fifteen regiments of cavalry of twelve troops each, consisting of sixty-eight enlisted men each; a total of 12,240 men in the cavalry. The field artillery will be divided as follows: Eighteen batteries of field artillery of 135 enlisted men each; six batteries of horse artillery of 150 men each; twelve batteries of mountain artillery of 113 men. These will bring the total number of enlisted men in the field artillery up to 5,245 men. There will be 170 companies of coast artillery of 109 enlisted men each. The total enlisted men in the coast artillery will be 18,421. The coast artillery will have fourteen bands of twenty-eight enlisted men each. It is expected that the current maneuvers will aid the department in making a decision as to the number of various coast artillery batteries. All probability there will be three classes of companies of different sizes, from 109 to 133 men. The infantry will consist of thirty regiments of sixty-five enlisted men in each company, making a total of 24,480. There will be twelve companies of engineers of 104 enlisted men each, or a total of enlisted men of 1,248. In the 4,447 men of the staff departments are included the signal corps, the ordnance department, the military academy, Indian scouts, military prison guards, recruiting parties and recruiting depots, as well as post commissary and quartermaster sergeants. With the 577 men in the Porto Rico Provisional regiment and the 5,308 in the Philippine scouts the grand total will be 74,761 men.

CANAL ZONE HEALTHY.

Conditions on the Isthmus Never Before So Satisfactory.

Washington, June 27.—General health conditions in the Panama canal zone are better than ever before since the American government began the work of digging the canal. The largest percentage of malaria for any week in the month of May was 65-100 of 1 per cent, and it has been as low as 82-100 of 1 per cent. The percentage of all diseases has ranged from a minimum of 90-100 of 1 per cent to 1-10 per cent. This gratifying condition of health, Colonel W. C. Gorges, chief sanitary officer, says in a report to the Canal commission seems to be due not only to favorable climatic conditions, but largely to the improved housing and feeding of the canal employees.

SACRIFICE TO INDUSTRY.

919 Men Killed Last Year in the Pittsburgh District.

Pittsburg, Pa., June 27.—"Human lives sacrificed upon the altar of industry" might well be the title of the report of the coroner of Allegheny county, a volume that mutely proclaims upon its pages what it costs besides money for Pittsburg and its district of smoky mills and gridironed territory to maintain its prestige in the milling, mining and mercantile markets of the country and retain its title of "workshop of the world." This volume, an official record demanded by the laws of the Commonwealth, shows that almost fifty per cent of the deaths are violent. Deeds from natural causes, suicides, murders and accidents met in the ordinary walks of life are not considered in this percentage attributed to the "industrial juggernaut."

Twenty-six hundred and sixty deaths were reported to the coroner last year, 919 of which were the result of accidents in mills, mines, or on railroads; the industries most essential to the progress of Pittsburg. Many reasons are assigned in the reports of the investigations of the individual cases. Some of the victims were burned by the molten metal, a blast furnace burst or a huge ladle was upset in the steel mills, others were caught in the rollers in a plate mill, and some crushed in the machinery of the rail mills. Many were killed in mines by falling slate, some by gas explosions and others by falls from derricks, scaffolds and high structures. Not a few met their death while working about numerous electric cranes.

While in the aggregate these figures may seem abnormal, they are recorded so regularly that their magnitude is not realized. The average number of deaths reported to the coroner is about twenty a month, and there is little variation from this number from year to year. Not all of the violent deaths, however, can be classed as accidents in the "workshops." The inordinate demand for food necessarily attracts a large percentage of the country's immigrants. Six days in the week supplying the human force and muscular power to the integral machinery, these aliens, surfeited with the freedom of their newly-adapted country, resort on their own holiday to the festivities and amusements of their former homes. Weddings, christenings, balls and parties are held at which various beverages are used most copiously. Quarrels result and frequently knives and firearms are used, and there are hospital cases to be cared for. Deaths not infrequently result from these sources, and so commonplace are these every night that it is counted a "slow night" in local newspaper offices if at least a dozen have not been reported by Sunday midnight.

Comparing the loss of life by the accidents with the tonnage and production of Pittsburgh district one life has been snuffed for every fifty tons of steel that is shipped and the annual shipment is about 50,000,000. For every 3500 cars that carry freight out or into Pittsburgh some soul has given up the ghost. Every 7000 tons of the 7,000,000 tons annual production of iron and steel has been put out at the cost of the life of one of the manipulators somewhere in its manufacture, and of the 600,000 tons annual output of steel rails every 870 tons has been put upon the market only after some one of its producers has laid down his life. And these lives are given up while the incessant rush and grind continues every day and every night throughout the year, the sacrificial altar marked by black clouds of smoke by day and the glare of mill furnaces on the sky by night, where the dust of the road to wealth is laid by the red dew of human blood.

WILL USE PASSES.

Railroad Commissioner is Willing to Accept Them.

Lansing, June 28.—Commissioner Glasgow states that in sending to the railroads of the state notice of the annual inspection of the roads to be made by the department he also notified the roads that the department is willing to accept transportation for the journeys throughout the state.

The commissioner added that in case any road seems it wise not to furnish transportation, the department will not construe the fact as a hostile act. Speaking of this letter Mr. Glasgow says: "The department does not use free transportation. I thought at the time I took hold here that in view of public sentiment it was best to divorce the department from the use of passes. This inspection, however, is of as much interest to the railroads as to the state, and I think it is only fair that the roads furnish transportation if they choose. We shall pay our fares as usual after the inspection is completed."

RAILROAD LEASE RESCINDED.

Chicago, June 28.—It was announced today that the lease of the Chicago, Burlington & Quincy railroad to the Chicago, Burlington & Quincy Railway company has been rescinded by mutual consent, and that the former company will on next Monday resume possession of the property and operate it in its own name.

COOK WITH GAS

Ishpeiming Department

(Additional Ishpeiming on Page Seven.)

FIREWORKS ARE HERE.

Display on Evening of Fourth Will Consist of Thirty-Six Subjects.

The fireworks for Ishpeiming's Fourth of July celebration arrived in the city yesterday morning. James McCauley, who directed the display two years ago, will arrive Tuesday. The committee has left nothing undone to make the display one of the best ever seen in this region. The program comprises thirty-six subjects, with several exceptionally pretty set pieces, including "Old Glory," "True Lover's Knot," "Mosaic Rosette" and others. The program will close with a volcanic eruption of thirty minutes duration. The display will commence at 8:30 on the hill north of Lake Bancroft, and the program will consume about two hours.

The complete program is as follows:

Bombardment of six-inch aerial thunder shells. Display of brilliant colored lights with 24 legs of Garden City red and green fire. Garden of palms. Flight of three 18-inch asteroid shells. Discharge of six extra large "liberty" batteries. Ascension of three 14-inch meteor shells. Flight of three 14-inch Garden City shells. Flight of six 4-pound floating chain rockets. Exhibition piece, "True Lover's Knot." Flight of three 14-inch Garden City shells, displaying nests of scorpions. Seven star pleiades. Ascension of six 6-pound balloon rockets of fire. Display of six extra large fairy fountains. Discharge of six 4-pound willow tree rockets. Display of six mammoth magnesium batteries. Salute of a 5,000 mandarin string, a realistic reproduction of heavy infantry firing.

Ascension of three 14-inch Garden City shells; aluminum effects. Explosion of six mines of electric stars. Flight of twelve trailing comets. Ascension of twelve 3-pound dragon rockets. Discharge of six exhibition swarms of bees. Exhibition piece, "Old Glory." Rise of three 14-inch Garden City shells, discharging chrysanthemum mines of fire with their long distinct petals of blended tints.

Burst of three 18-inch Garden City night shells, emitting showers of golden rain. Discharge of six extra large saucisson. Flight of six 4-pound white cloud rockets. Flight of twelve calliope rockets. Flight of three 8-pound Chinese spider rockets. Rise of six 4-pound liquid silver rockets. Rise of twelve 4-pound duration star rockets. Exhibition piece, "Mosaic Rosette." Discharge of six extra large display batteries, filling the air with gold, silver, blue, green and crimson drops. Ascension of three 14-inch Garden City night bombshells; pearl shower effect. Display of six special torch fountains, which, after changing colors in illumination, project to great heights blazing aerolites. Display of six No. 4 horn shells. Aerial display of six 14-inch festoon shells. Volcanic eruption, thirty minutes' duration.

PAPER TO BE ISSUED.

Ishpeiming Water Bonds Will Be Spread Over a Period of Ten Years.

The \$35,000 water bonds to be issued to raise funds with which to pay for laying a new main to take the place of that undermined in Sections 9 and 10 will bear date of July 1. The interest rate will be 5 per cent. The common council decided at its special session Thursday evening to make the first payment of \$2,500 on the bond next year, paying a like amount each year until 1917, inclusive. In 1915, \$7,500 will be redeemed, and in 1916, \$5,000, the last issue of \$5,000 falling due in 1917. The bond will not be issued for denominations of less than \$500 and not more than \$1,000. Bids will be received by the city recorder and the bonds will be placed in the hands of the highest responsible bidder. The city will reserve the right to reject any or all bids.

The committee on sewerage, to which was referred the petitions of taxpayers on Empire street, one group protesting against installing the proposed sewerage system, and the others asking for the improvement, recommended that the sewer be put in. The committee advised the council that its recommendation was based on the fact that the improvement is absolutely necessary for the public health in that part of the city. The plans for the sewer will be submitted at the next meeting.

The recommendation of Chief Lacey of the fire department relative to the appointment of an engineer to succeed Michael Cashen was laid over until the July meeting.

The election of Hart V. Gregg as alderman in the Seventh ward was approved by the council.

PASSED EXAMINATION.

Con Thompson and John McDougall arrived home yesterday from Lansing where they took examinations for the positions of first and second lieutenant respectively of Company I, Michigan National Guard. They were advised before leaving Lansing that they had passed the examination and that they would receive their commissions within a few days. Captain E. E. Scriber left the city last evening, to be absent for some time. During his absence Mr. Thompson will be in command of the company.

TO MEET AT REPUBLIC.

Convention of Swedish Templars of Temperance to Be Held There.

At the annual convention of the upper peninsula branch of the Swedish Templars of Temperance, held early this week at Iron Mountain, Republic was chosen as the next place of meeting. The convention will be held some time in June. Sunday and Monday evenings important meetings were held. The convention ended with a picnic at one of the lakes near Iron Mountain.

The officers elected for the ensuing year are:

Chief—Axel Fredrickson, Iron Mountain.
Chancellor—John Lindquist, Calumet.
Secretary—Charles Stone, Calumet.
Treasurer—Victor Vincklander, Iron Mountain.
Past Chief—Rev. K. Selin, Calumet.
Marshal—Elmer Johnson, Iron Mountain.
Guard—Alex. Peterson, Republic.
Deputy—J. O. Blist, Iron Mountain.
Delegate to Grand Temple—L. O. Blist.
Alternate—Alex. Holm, Iron Mountain.

PENSION FOR TEACHERS.

The movement to pension school teachers is one for which a great deal can be said both on sentimental and practical grounds. If the defenders of our country are entitled to provision against old age and infirmity, should not the same principle also extend to those who sow the seed of patriotism and progress. A great deal can also be said in regard to the merits of Hestetter's Stomach Bitters, but it is sufficient to say that for 53 years it has been before the public erasing such ailments as poor appetite, insomnia, liver troubles, heartburn, dyspepsia, indigestion, constipation, female ailments or malaria without a failure. If you suffer from any of the above ailments try the Bitters today. You'll be surprised at the amount of good it will do you.

A man who is in perfect health, so he can do an honest day's work when necessary, has much for which he should be thankful. Mr. L. C. Rodgers, of Branchton, Pa., writes that he was not only unable to work, but he couldn't stoop over to tie his own shoes. Six bottles of Foley's Kidney Cure made a new man of him. He says, "Success to Foley's Kidney Cure." The Stafford Drug Co.

CONFERENCE AT IRONMOUNTAIN.

Swedish Evangelical Men Covenant Held Important Assn.

Over 130 delegates attended the twenty-third annual conference of the Swedish Evangelical Men Covenant in the United States Iron Mountain this week. They came in as far east as Providence, R. I., from as far south as California. President, C. A. Bjork of Chicago, vice-president, C. A. Bjork of Chicago, and other officers are as follows: Vice-presidents, Rev. E. A. Kogberg of Minnesota and Rev. H. J. Strand of Chicago; secretary, Rev. G. Herpe of Chicago; treasurer, C. Peterson of Chicago. Rev. Sallström of Chicago was elected a member of the education board and two trustees both Chicago men, were chosen.

It was decided to open school in the northern part of China union with the Swedish Mission of Sweden. The amount to be expended for missionary work in China is \$1,000; Alaska, \$7,000; missions in the United States and Canada, \$1,500.

The conference treasurer reported an income last year of \$80,000, with a balance now on hand \$20,040. The next conference is to be held at Moline, Ill. The delegates from Ishpeping were John Skoglund and R. Sallström.

Foreign Minister Talk.

Rev. J. A. Forslund, delegate from the Swedish Covenant in Sweden, to the conference of the Swedish Evangelical Men Covenant at Iron Mountain, will occupy the pulpit at 10 o'clock tomorrow morning at the church. He is a fine speaker and Rev. Sallström, pastor of the Ishpeping church, says his address will be well worth hearing.

Monday, July 1, the Swedish parochial school will open in the basement of the Mission church. R. Samuel Hogander has been engaged as teacher, and he will also be assistant pastor for three months while R. Sallström, the pastor, will be absent a lecture tour along the Pacific coast. He will leave July 10 and will give a first lecture at Minneapolis, traveling through all the principal cities of Minnesota, Dakota, Idaho, Washington, Iowa, California, Colorado, Nebraska, via Illinois and back through Michigan.

Rev. Sallström has completed the book he has been working on, the title of which is "With N. and Camera Through the Land of Promise." It contains 250 pages, with about 200 illustrations. After two weeks it will be on sale and can be procured at 603 North Fifth street. The price will be \$1.50.

STRIKING I RICH.

Former Ishpeping Man Interested in Promising California Property.

According to California papers Charles A. Fohrman, brother of James N. Fohrman of this city, has been successful in mining ventures. Mr. Fohrman left this county nearly twenty years ago, and has devoted much of his time to prospecting in various parts of the west. The following relates to a property of which Mr. Fohrman is one of the principal owners, telling of recent rich strikes made at the mine, in a California publication:

"The late rich strike made at the mine demonstrate the fact that the Dryden vein will take a number of these rich shoots as its late rich vein is only one of many but the richest encountered in drifting this vein, although very little was said of the previous strikes. However these shoots occurring so frequently demonstrated that the Dryden vein is the bonanza of the various veins left in the mine.

"The five veins yet to be cut may still contain richer ore at the time may still be far distant when they will be opened up."

"Mr. Fohrman, Mr. Taylor and Miss Foreman Cummings, who are on the whole conservative men, now begin to realize that the Casa Diablo has a long and rich future before it. Many of the local as well as the eastern stockholders were impatient about the mill not being erected before this time. Mr. Fohrman, using his own judgment, steadily worked toward opening up the mine, considering the mill a secondary consideration.

"The mine now is in a condition to supply the stamp mill with any amount of ore needed, and in many years to come. A Willey concentrating table is

to be added to the stamp mill, to save the sulphides that to a small extent may be associated with the oxidized ores."

LINE OF MARCH FOR PARADE.

Will Form on Plat Near Cleveland-Cliffs Barn.

James A. Bryden, who will direct the movement of the procession the morning of the Fourth, has decided on the line of march. The start will be from the vacant ground near the Cleveland-Cliffs Iron company's barn on West Division street, east on Division to Fourth; north on Fourth to Pearl; west on Pearl to Pine; north on Pine to Front; east on Front to Cleveland avenue; east on Cleveland avenue to Third; north on Third to either Ely or Vine, then west to First; south on First to Canal; west on Canal to Main; south on Main to Division, where the procession will disburse.

If Mr. Bryden finds that the procession will be longer than he now expects the march will be continued to Vine street, instead of Ely. Julius Johnson, Arson Perault and J. Silas will be Mr. Bryden's aides. The marshal of the day asks anyone preparing floats to report to him as soon as possible. Mr. Bryden also says that the floats should not be too high to pass under the telephone and trolley wires on some of the streets to be traversed.

VIOLATED GAME LAWS.

Game Warden William Harrington on Thursday pushed a case against John Anderson and John Erickson, Michigan game men, for a violation of the game laws. Some time ago Mr. Harrington found that Anderson and Erickson had fish lines set in Lake Michigan. The hearing took place at Michigan, both being found guilty. The fines imposed were \$10 each, exclusive of the costs of court.

FROM HOPKINS' CURB LETTER.

"Prices are about five points higher than on last Monday. There are plenty of buyers now, but last Monday they were conspicuous by their absence. Amalgamated, North Butte, Calumet & Arizona, Butte Coalition, Old Dominion, and the lake coppers were in good demand today and advanced from a point to two points. Arizona Consolidated, Greene-Canaan, Superior & Pittsburg and North Butte Extension were in good demand. We cannot too strongly urge the purchase of Superior & Pittsburg at this time."

The day's closing prices were:

	Bid.	Asked.

ISHPEMING IN BRIEF.

Mrs. J. E. Butler and two children are here from Starns, Ky.

The Nolan block, occupied by A. W. Conradson, the grocer, is being repainted.

W. H. Johnston left Thursday night for Duluth. He will return today or tomorrow.

Miss May Whitford of Oak Park, Ill., is in the city visiting her uncle, T. N. Trenberth, and family.

Miss Susan B. White of Evanston, Ill., is in the city, the guest of W. H. Johnston and family.

The handicap golf tournament, started last Saturday by members of the golf club, will be completed this afternoon.

Mrs. Alexander Maitland and Miss Maitland will serve tea at the golf clubhouse this afternoon from 3 to 5 o'clock.

J. E. Casson has taken the agency for Barry Bros' ice cream and will receive a fresh supply of the delicacy daily from Chicago.

The Eagles and Stars will cross bats tomorrow afternoon at Union Park at 2:30 o'clock. An admission of fifteen cents will be charged.

The members of the road and bridge committee of the board of supervisors inspected the Escanaba river bridge, south of this city, yesterday.

Mrs. A. J. George and son Gardner of Racine, Wis., are in the city visiting N. N. Trenberth and family. Mr. George will be here today to remain over Sunday.

Mrs. M. J. O'Brien concluded her visit here Thursday afternoon and returned to her home at Calumet. She was accompanied by her niece, Mary Lynch.

The improvement work in the rooms occupied by the Ishpeping Business college, in the Sellwood block, has been completed, and school will be reopened Monday morning.

thigh yesterday. He was working in the breast of a drift when a piece of ore fell and struck him.

Will Tourville, cranesman on the steam shovel operated by Dennis Maloney at the Cleveland Lake mine, had his hand crushed Thursday evening by a piece of logging falling from the stock pile. Amputation is necessary, the hand being taken off at the wrist.

Rev. William Hassenberg, nephew of Rev. Father Hassenberg of Champion, celebrated his first mass at Michigan Thursday, he having recently been ordained. The young clergyman is well known in the western end of the county, as he spent most of his vacations at Michigan. He is to be stationed at Grand Rapids, Mich.

Angus McDonald and wife of Colorado Springs are in the city visiting his sisters, Mrs. Duncan Campbell and Mrs. T. Pascoe. Mr. McDonald has been located at Colorado Springs for three years past, having formerly resided at Republic. He and his wife will remain in the county until fall.

The Uniform Rank, Knights of Pythias, turned out last evening to meet the members of the degree team on their return from Hancock, where they captured the trophy in the third rank contest, participated in by various upper peninsula lodges. This is the second time Ishpeping has taken the cup. The Scoo team also has won it twice.

The Clerks' union gave an invitation party last evening at the Anderson hall. The arrangement committee for the Sons of St. George celebration to be held here July 20 has contributed \$75 toward the street decorations for the Fourth, with the understanding that the decorations will remain up until after the 20th.

The members of Amrose's tent, No. 400, Knights of the Maccoches, will be in the city today and tomorrow, conducting meetings at the barracks this evening and tomorrow morning, afternoon and evening. His subject this evening will be "Whether Here or Hereafter." Tomorrow morning he will preach on "Trust in God." In the afternoon there will be a children's service and tomorrow evening the major's subject will be "Ancient Overcomers." Major Mitsaps is the general secretary of the young people's organization. It is expected that he will be greeted by large congregations.

Upper Peninsula

Sheriff's Automobile Frightened Horse—Jerry Mansfield of the Soo was quite badly injured by being thrown from his buggy while driving home after a visit to town.

When about two miles out on the Mackinac road, Mr. Mansfield encountered Sheriff Lipsett coming from a trip to the country in his automobile. The horse took fright at the car, and began to rear and jump. Although the car was stopped a considerable distance from the town, the horse could not be still and finally leaped into a ditch, overturning the buggy. Mansfield caught in the lines and was tramped by the horse before he could be rescued. One rib was broken and other injuries were sustained.

New Theater for the Soo—

Another five and ten-cent theater has been established at the Soo. It is known as the "Wonderland," and is located at 527 Ashmun street. The building is under the management of Hugo Brothers of Flint, who are interested in institutions of this kind located in various parts of the country between Michigan and the Pacific coast. The entertainment furnished will be of the musical and moving picture varieties. While the two institutions are in no way connected with each other, the managements of both the "Wonderland" and the "Palace"—the latter opened last week on Portage avenue—announce that they will benefit themselves and the public by working together in many ways. For instance, they will make certain at all times that the entertainments offered do not conflict.

Makes St. Ignace Sore—

Henceforth, says the St. Ignace Enterprise, no passenger connection direct between St. Ignace and Chicago will exist. The Northern Michigan company's changes involve abandoning both St. Ignace and Cheboygan as passenger ports. We shall get the freight boat; that goes on—that's all. The Illinois has been leased out; the Missouri will only come up as far as Harbor Springs, and the Manitowish just brought up by this company will run, as before, to Mackinac Island. The N. M. T. company wants our freight trade but will give us no passenger accommodations. Well, there is another Chicago freight line of steamers calling here—the Chicago-Duluth Transportation company—and the merchants should give it their patronage.

Condemned by Inspectors—

The steamer Duluth of the Island Transportation company's line is out of commission for the summer, and must stay out, the government inspectors refusing to pass favorably upon her boiler in consequence of the discovery of grave errors in the repairs made to the vessel's power plant. There is not time in which to install a new boiler for this year's business, and the company may be compelled to charter another boat to take care of its traffic augmented in recent years since the advent of the Detroit & Mackinac line into Cheboygan. The steamer Wau-Kou is not large enough for the demands of the Cheboygan-Mackinac-St. Ignace run and the Algonah has all she can attend to on the Mackinac-Duluth and Mackinac Island route. The Duluth has been laid up at St. Ignace.

A Word for the Railroads—

Soak the railroads! It is a cry good enough for political barn stormers and lower Michigan grangers who farm by the sweat of their brows, asserts the St. Ignace Enterprise, but in places like St. Ignace, which is kept up to a great extent by the railroad, the howl doesn't go. The year against the roads has gone on until they are harassed by unfair laws, their credit in the money market destroyed, and the outlook is blue. In reply to County Clerk Rankin's letter of transmittal of the resolution of the board of supervisors relative to the

extension through Mackinac county of the Manistique railroad, commonly known as the "Alger" road, President John M. Allen writes: "This matter will have to be taken up at the next meeting of the directors of our company. As you are probably aware, owing to recent legislation in Michigan there is not much encouragement for railroads to extend their lines. In fact it is a pretty hard matter for railroads to get money with which to extend their lines."

Lost a \$1,000 Ring—

Miss Edith Morrison of LaPorte, Indiana, a guest at the residence of F. W. McCormick in Menominee and well-known in Marquette and Munising, lost a diamond ring valued at \$1,000 on a passenger boat between Chicago and Menominee, and up to the present time has found no trace of the jewelry. Miss Morrison took the ring off while in the toilet room of the parlor car and after completing her toilet she forgot it and left it lying on the wash stand. Realizing the matter at the wash stand, she returned about ten minutes later, and on going to the toilet room was unable to find it. She at once notified the officials on the train and a systematic search of the car was made. No trace of the jewel was found and the railroad officials are now looking up the names of the people who left the car during the time the ring was left in the toilet room and the time it was missed. Miss Morrison states that she will be willing to pay the full value of the ring to recover, as its real value was in the associations connected with it.

Money in Deadhead Logs—

Two Menominee men who for the last three years have been engaged in clearing up the old Kirby Carpenter and L. W. & V. S. companies' mill ponds and dredge ponds of dead heads or sunken logs have cleared up considerable money as a result of their operations, and still they have several years work remaining. The contract for the recovery of the timber was let by the Sawyer Goodman company, which has purchased the interests of the former owners of the ponds. The men have been employed steadily for three years, using a small gasoline boat in the work. Each day they take a large raft of water-soaked timber to the mills where it is sawed up. The bottoms of the mill ponds are fairly covered with this sunken timber which is practically as good as the day that it went to the bottom. The logs pulled up are often the very finest and most solid. Last season the men pulled up a log that bore the end mark of timber cut the very first year that the Kirby Carpenter company was in operation. The log was sawed into lumber and was as good as the day it was cut in the lumber woods.

I will mail you free, to prove merit, samples of My Dr. Shoop's Restorative, and my book on either Dyspepsia, The Heart or The Kidneys, Troubles of the Stomach, Heart or Kidneys, or merely a prescription of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment, and not the cause. Weak Stomach nerves—the inside nerves—mean Stomach weakness, always. And the Heart and Kidneys as well, have their controlling or inside nerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy ever claims to treat the "inside nerves." Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me today for sample and free book. Dr. Shoop, Racine, Wis. The Restorative is sold by The Stafford Drug Co.

NOTICE

To the Qualified Electors of the Republic Township School District, in Marquette County, Michigan: Notice is hereby given that the following preamble and resolution was duly adopted by a unanimous vote of the Board of Education of said school district at a meeting of said board, held pursuant to a regular call therefor, in the said Township on Tuesday, the 18th day of June, A. D. 1907, viz:

Whereas, the present main school house of this district is not adequate to the needs of the district, is old and badly out of repair, be it

Resolved by the Board of Education of the Republic Township School District, in Marquette County, Michigan, that it is necessary to build a new school house for said district and to borrow the money and issue bonds of the district to pay for the erection and furnishing of such school building.

First Resolved, that an amount of money necessary to be raised for that purpose, is estimated by this board to be the sum of forty thousand dollars (\$40,000).

Further Resolved, that the site of the present school building be and the same hereby suggested and designated by this board as the site for such new school building.

Further Resolved, that there be submitted to the qualified electors of said school district at the annual school meeting to be held in said school district on Monday, the 8th day of July, A. D. 1907, the question of borrowing on the faith and credit of said district and of issuing its evidence of indebtedness therefor, the sum of forty thousand dollars (\$40,000), at a rate of interest not exceeding five per cent, per annum, payable annually, the proceeds to be used solely for the purpose of erecting a suitable school building for said district on the site where the present school house of said district is now situated. Said money, so borrowed, to be paid in fifteen annual installments. The first installment thereof to be paid on the first day of March, 1908, and each installment on the first day of March of each year thereafter, until the whole amount is paid. All installments to be levied upon all amounts unpaid to accrue at the same time that installments of the principal accrue. Said sum so borrowed to be repaid by spreading the same upon the taxable property of said district as follows: The first installment in the year 1907 and the other installments thereafter until the whole amount is raised and paid. All installments to be levied with the interest accruing at the time of the payment next following the year of such levy upon all sums unpaid.

Further Resolved, that the secretary of this board be and is hereby instructed to cause notice of such election to be posted in at least five conspicuous places in said district, at least ten days prior to the first installment in the year 1907, and that said secretary cause such notice to be published in one of the newspapers printed and circulated in said county of Marquette for at least three successive weeks prior to the time of holding such election. Further Resolved, that the form of

LOUISE HOLMES, Secretary. 6-4-31 J. H. KAYE, Principal.

the ballot for such election shall be as follows:

"To authorize the Board of Education of the Republic Township School District in Marquette County, Michigan, to borrow on the faith and credit of said district, the sum of forty thousand dollars at a rate of interest not exceeding five per cent per annum, payable annually, and to spread upon the assessment roll of said township for the payment of said money in the year 1907 and the other installments each year thereafter, until the whole amount is raised and paid. All installments to be levied with interest accruing at the time of the payment next following the year of such levy, upon all sums unpaid, for the purpose of erecting suitable school house in said district, and to designate the site of the present main school building for said district, as the site for such new school building.

Yes."

To authorize the Board of Education of the Republic Township School District in Marquette County, Michigan, to borrow on the faith and credit of said district, the sum of forty thousand dollars at a rate of interest not exceeding five per cent per annum, payable annually, and to spread upon the assessment roll of said township for the payment of said money in the year 1907 and the other installments each year thereafter, until the whole amount is raised and paid. All installments to be levied with interest accruing at the time of the payment next following the year of such levy, upon all sums unpaid, for the purpose of erecting a suitable school house in said district, and to designate the site of the present main school building for said district, as the site for such new school building.

No."

Further Resolved, that the secretary be and is hereby directed to take the necessary steps to cause said proposition to be placed on proper ballots for such election, to give the notice of such election herein required, and to prepare and furnish blanks for a statement of the vote cast at such election on the question hereby submitted.

GEO. MACDONALD,
President of the Board of Education of said District.

Attest: PETER W. PASCOE,
Secretary.

Notice is hereby further given that the questions embraced in the above resolutions will be submitted to the qualified electors of the Republic Township School District in Marquette County, Michigan, upon a separate ballot and in the form provided in said resolution, at the annual school election to be held in said district on Monday, the 8th day of July, A. D. 1907. The qualifications of voters on such question is fixed by the general school laws of the state of Michigan. The place of holding such election will be the place of holding the said annual school meeting.

Dated Republic, Michigan, June 27, A. D. 1907.

PETER W. PASCOE,
Secretary.

"Let us have some Cudahy's Peacock Bacon and calves liver for supper Mamma, say young and old."

Where There Are Little People to Sew For

The Singer Sewing Machine means all the difference between needle-and-thread drudgery and the most fascinating employment any home-loving woman can engage in.

Between the peerless Singer and the best of the department-store machines there is no more real resemblance than between fine linen and burlap.

Moreover the Singer Sewing Machine agency is always as easy to get at as the Post Office.

At Singer stores you can now get

SINGER and WHEELER & WILSON

Sewing Machines and Parts

The Wheeler & Wilson machine, for over 50 years the standard of the rotary-shuttle movement for making the lock stitch, is now sold exclusively at Singer stores.

BY THESE SIGNS YOU MAY KNOW AND WILL FIND SINGER STORES EVERYWHERE

Sold only by Singer Sewing Machine Co.

FOR SALE—A family driving horse, weight about 1300 pounds; not afraid of automobiles or trains; strictly a well broken family driving horse. Apply, A. F. Maitland.

LOCAL LACONICS.

The People's Store is conducting a successful special sale this week.

Captain J. H. Rough has been on the Gogebic range the past few days.

James Hanson has sold his house and lot on Jackson street to N. Pascoe.

F. N. Maas of St. Paul arrived in the city Thursday for a visit to relatives.

P. B. Kirkwood arrived home yesterday morning from Columbus hospital, Chicago.

Charles Keiron, a former resident, now located at Duluth, is here visiting relatives.

Miss Beatrice Crane has returned home from Chicago, where she has been attending school.

J. Sawbridge and family have gone to Lake Nebagamon, where they will spend a week or more.

J. C. O'Connell and wife and Miss A. LaLonde of Deer Lake, Minn., were visitors in Negaunee yesterday.

Mrs. S. E. Sproule and son Jay, of Chester, Pa., are in the city on a visit to C. L. Sporeley and family.

R. G. Quinn and family, who are here from Milwaukee, expect to spend about two months or more in the city.

Peter Trudell and wife will leave today for Three Lakes, where they will spend a few weeks at their camp.

Mrs. A. Maitland and Miss Maitland will serve tea this afternoon between 3 and 5 o'clock at the golf grounds.

Joseph Murphy, superintendent of the Hurley public schools, is in the city to spend his vacation with his people.

Mrs. S. P. Kline and her daughter, Miss Grace, have returned from an extended trip to California and other states.

Mrs. M. Landers and daughter of San Francisco, Cal., are in the city on a visit to her sister-in-law, Mrs. William Seaton.

C. T. Fairbairn, general mining manager of the Republic Iron & Steel company, visited the Cambria and Lily mines here yesterday.

The wives and children of Oscar Field, Jacob Salo, Henry Kotila and Jacob Lippilampi, also Mrs. Swan Pilo and child, are camping near Palmer.

Miss Julia McAnillie is home from Cahomet, where she taught school the past year. She will return there next year at an advance in salary.

Miss Ina Sterling left Thursday for Port Huron, where she will spend the greater part of her vacation with her friend, Mrs. Hall, formerly Miss Packard.

Rev Samuel Bergdahl, the new pastor of the Swedish Lutheran church, has arrived in the city, and he will conduct his first service tomorrow morning. Rev. Bergdahl was ordained at New Britain, Conn., the 18th. He is a graduate of Augustana college of Rock Island, Ills.

Mrs. S. E. Pearce and Mrs. D. S. Pearce of Port Huron, Mich., and Mrs. J. H. Frazer of Wallaceburg, Ont., who were guests at the residence of C. V. J. Townsend for some time past, have departed for their homes. Mrs. Frazer is a sister of Mrs. Townsend, and the two others are nieces.

One of the Ishpenning bands will be in Negaunee this evening in the interest of the Fourth of July celebration. The band will be brought over in the monster band wagon erected for the parade and will be drawn by six horses. Three or four automobiles will be with the band, arriving here about 8 o'clock.

The Savings Bank Baseball team defeated the Gatelys nine Thursday at Union Park, the score being thirteen to ten. This was the second game these teams have played this season, the Gatelys winning the first. The Business Men's team defeated the high school nine Wednesday afternoon, the score being thirteen to six.

WILL CURE CONSUMPTION.

Negaunee Department

LULL AT GOLDFIELD.

Conditions Worse Than at Any Time During Recent Strike.

According to a Negaunee man at Goldfield, Nev., miners will do well to steer clear of that district, as there are many idle men in the camp. Of the conditions there he writes: "Things are dead here now than during the strike and it is a good place for a workman to keep away from. Not one-third of the miners in the camp are working, and the idle men are only staying because they have not the money to get away. Shares won't sell and no money can be had to work the leases, so matters will have to remain at a standstill until the east begins to show interest and loosen up again." In the letter was enclosed the following from last Saturday's Goldfield News relative to the Begone Mines syndicate property, in which many Marquette county people are interested: "The January White Rock Mining and Leasing company, operating on the White Horse claim of the White Rock, has made one of the most important strikes reported in many weeks. At the 315-foot level the shaft cut the hanging wall of a likely looking vein of large extent but unknown value. A crosscut was started and has penetrated the ledge for a distance of fifty feet, without reaching the footwall. Samples taken from the face of the crosscut were sent to the assayer and when the returns were received yesterday there was joy in the camp. The assays showed 2.56 per cent copper and 89.20 in gold, with a little silver.

"The importance of the find lies in the fact that the property lies partly inside the city limits and adds a large area to the known mineral bearing zone of the district. "The leasing company is controlled by H. S. Joseph of Salt Lake and E. H. Mead of Goldfield. The ore bearing vein will be developed with vigor to determine its extent. The shaft, which is down 330 feet, will also be sunk to greater depth and a crosscut driven to cut the ledge below. "While this is the first important strike that has been made on the White rock ground a great deal of development work has been done on the property, in fact eight shafts have been sunk to considerable depth and another is about to be started. The White Rock and the Nabwagan groups, comprised in five adjoining claims are owned by the Begone Mines syndicate of which Captain Hooper is president and manager; Joseph H. Hooper, superintendent and Benjamin Gill, accountant.

"No. 1 shaft is down 300 feet and drifts are being run for the vein. "No. 2 shaft is down 322 feet on a block of ground being operated by the Keweenaw Leasing company. Considerable drifting has been done and a station is being cut at the lower level. "No. 3 shaft is being sunk by the Tim Connolly lease and has reached a depth of nearly 300 feet. The formation is encouraging.

"No. 4 shaft is down 250 feet and will be sent to the 300-foot point as rapidly as possible. "No. 5 shaft is being sunk by the January White Rock Leasing company, who made the strike referred to. "No. 6 shaft is down 350 feet and is in a quartz ledge showing good values. It will be sent to 400 or 500 feet. "No. 7 shaft is down 475 feet and will be sent to 500 feet, at which point the formation will be tested with diamond drills, before drifting is begun. The formation is very promising. "No. 8 shaft has not reached depth but the intention is to send it down to 500 feet, if necessary, as will be done with all the company shafts. "No. 9 shaft will be started in a few days. The Begone Mines syndicate is a close corporation with plenty of money and its method of developing its property shows that its officers know their business and are determined to find the ore if it is in the ground."

The Captain Hooper mentioned as president and manager of the company was for some years an employee of the Clamunion mine, this county.

HAMPERED BY LACK OF MEN.

New Trolley Line and Poles for Street Railway Will Soon Be Put In.

The employees of the street railway encountered all sorts of hard luck yesterday. Early in the morning the trolley broke at a point opposite Union Park, where transfers were necessary. The greater part of the day. At four or five other points the span wires gave out. Both the span and the trolley wires are in wretched condition.

Manager McCord said yesterday that the new trolley wire has arrived and a sufficient number of guide poles have also been received to equip the line with a complete new outfit. The work will be started after the Fourth if it is possible to secure men, but the company has been having difficulty getting labor. Last week Mr. McCord had a gang of about twenty Italians hired to dig trenches for the gas mains, but they were hired away from him.

The company is building up a good gas business. Experienced solicitors are now working here and at Ishpenning and they are getting many orders. A carload of ranges has been disposed of during the past few weeks, and another carload is expected.

CLEARING THE SITE.

The building committee of Iron Mountain lodge of Odd Fellows Thursday evening sold to M. T. Murphy the structure on the lot, corner Iron and Tobin streets, where the new Odd Fellow's block is to be erected. The removal of the building was commenced yesterday. Mr. Murphy is tearing down the barn at the rear of his lot and will place the building there, erecting a shed at its rear. The Marquette County Gas & Electric company will continue to occupy the building and the shed will be used for a workshop. Thomas M. Solar, of Antigo, Wis., contractor expects to begin work on the foundation for the new block after the Fourth.

SCANDINAVIAN SOCIETY OFFICERS.

At the regular meeting of the Negaunee branch of the Scandinavian society this week the following officers were elected for the ensuing term of six months:

Past President—Ole Erickson.
President—Peter Leaf.
Vice President—Clas Kronberg.
Recording Secretary—Titus Thoren.
Financial Secretary—Oliver Johnson.
Treasurer—Charles Thoren, Sr.
Marshal—Fred Stranberg.
Chaplain—Anthony Seagren.
Inside Watch—Axel Osterberg.
Outside Watch—Charles Fredlund.
Trustee—T. A. Thoren.

Free, for Catarrh, just to prove merit, a Trial size Box of Dr. Shoop's Catarrh Remedy. Let me send it now. It is a snow-white, creamy, healing, antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc., it gives instant and lasting relief to Catarrh of the nose and throat. Make the free test and see for yourself what this preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50 cents. Sold by The Stafford Drug Co.

BOWLING MATCHES.

The Tigers gave the Ravens the first defeat they have had in the two-year league series Thursday evening at Orr & Tompkins alleys. The Ravens and Wolves have each lost only one game, and both will strive hard to keep in the lead. The results of the contests Thursday were as follows:

A LESSON IN HEALTH.

Healthy kidneys filter the impurities from the blood, and unless they do this good health is impossible. Foley's Kidney Cure makes sound kidneys and will positively cure all forms of kidney and bladder disease. It strengthens the whole system. The Stafford Drug Co.

Newbro's Herpicide

WHAT HERPICIDE DOES

Newbro's Herpicide destroys the tiny vegetable growth in the scalp (the cause of itching, itching scalp, falling hair and baldness). Once this microscopic enemy of the hair is destroyed and kept out of the scalp, the hair is bound to grow as nature intended, except in cases of chronic baldness.

WHAT SUNLIGHT DOES

Sunlight is nature's germ destroyer and prophylactic. The effect of night upon the scalp proves highly beneficial, if a complete plan of scalp cleanliness is carried out. This cannot be done without the use of Herpicide, which prevents infection and keeps the scalp pure and wholesome.

More men and women have gotten positive results from the use of Newbro's Herpicide than from all other hair remedies combined.

HOT WEATHER TROUBLES

The perspiration that exudes in increased quantities during the summer months, carries out refuse matter that would otherwise clog the pores of the scalp.

Incomplete elimination of this waste, produces a hot and feverish condition of the sweat glands known as Prickly Heat for which Herpicide gives immediate relief. Herpicide stops itching of the scalp almost instantly.

Col. Thomp Burton, Member of the Board of Managers of the Ohio Sanitary, writes as follows of Newbro's Herpicide:

"As to Herpicide I find it an excellent hair dressing as well as being the first and only absolute dandruff cure I have found. Upon my advice a number of myriads are using Herpicide, and the unanimous verdict is, that Herpicide is, in all respects, everything that its manufacturers claim for it."

Guaranteed under the Food and Drugs Act June 30, 1906. Serial No. 91

TWO SIZES: 50c and \$1.00—SOLD AT DRUG STORES.

Send 10c in stamps for sample to The Herpicide Co., Dept. L, Detroit, Mich. INSIST UPON HERPICIDE.

COOK WITH GAS

WORLD NEEDS MORE TIN.

SUPPLY NOW HARDLY EQUALS THE DEMAND.

The United States Uses More Than Forty per Cent of the Total Production—None of the Ore Is Smelted in This Country—Thorough Investigation Being Made in the Carolinas—Approximate Total Output in 1905 Was 102,149 Tons—Largest Quantity Comes From the Malay Peninsula—Bolivia Second in Production.

Washington, June 28.—Where is the world to obtain its future supply of tin? This question assumes considerable importance in the light of the recent failure of the production to meet the demand and the resultant inroads that have been made upon the accumulated stocks of tin held in various countries. The demand for tin is rapidly increasing. One reason for this, if not the chief reason, is the large growth of the canning industry and of the use of tin boxes and cases in shipping various articles. To no country is the question of tin supply more important than to the United States, which consumes more than forty per cent of all the tin produced in the world.

It is only within the last few years that there has been any attempt to produce tin in this country. Three years ago this metal was produced in Alaska, South Carolina and South Dakota. Compared with the total consumption of tin in the United States the production is very small, but those who have investigated the question say that the small beginning made in these three sections may before long become an important home industry. None of the ore is smelted in this country, the smelting is all done in England. In the South Carolina-North Carolina region, although the output has been small, much prospecting and developing work has been carried on, chiefly in the vicinity of King's Mountain and Lenoir. At the former place a mill has been erected and prospecting is in progress. Some very promising ore has been struck at a mine about seven miles north of town of King's Mountain, a small rolling mill with two Bartlett tables erected and a small quantity of concentrates turned out. A few miles north of Lenoir, in the same state, extensive prospecting has been carried on, a large number of surface trenches have been dug and rich ore has been uncovered in a number of places. Near Gaffney, S. C., a few miles below the North Carolina state line, a plant has been assembled and some small quantities of ore obtained. Tin has also been discovered near El Paso, Tex. In California, at the old Temescal mines, some prospecting has been done, and also near Santa Ana. Some development has also been in progress at the Flinton deposits of South Dakota and at the Buck creek deposits of Alaska. But the production of tin ore in the United States continues to be so very small as to make additional discoveries of the ore in this country a cause of considerable interest.

Most Tin From Malay.

By far the largest quantity of tin in the world comes from the Malay Peninsula. The approximate tin output of the world in 1905 was 102,149 short tons of which the Malay states turned out 65,365 tons, upwards of 64 per cent of the total output of the world. Bolivia ranks next with 13,646 tons. Although there are many rich tin mines in Bolivia and in other regions, at long distances from railroads. Other obstacles in the way are the scarcity of fuel and water, the rough character of the country, and the great altitude—conditions that make it almost impossible to work the mines. It is expected that one of the important results of the development of Bolivia will be a large increase in the contribution of that country to the world's supply of tin. The new lines of railroad running into Argentina and to the Amazon are certain to increase Bolivia's production of this article by making larger proportions of the country accessible.

More than 13 per cent of the tin output of the world comes from Banca and Billiton, although the falling off in the supply from this source in recent years is undoubtedly due to the exhaustion of the placers. About 5 per cent of the world's supply comes from Australia. The Mt. Bischoff mine, Tasmania, continues to be one of the largest tin mines of the world, and dredges are working tin-bearing gravel successfully in Queensland, New South Wales, western Australia and Victoria. Very rich ore is produced by the mines in Queensland. China is the only other country where the output of tin is worthy of account at this time. There the annual production, estimated at from 3,000 tons upward, comes largely from the province of Yunnan. Small quantities of tin are also produced in Burma, Siam, Germany, Austria, Russia, Spain, Portugal, Mexico, Nigeria, Swaziland and the Transvaal. But the whole amount is probably less than a thousand tons.

In 1905 the average price of tin imported in the United States was nearly thirty cents per pound, but since the first of last year the price has risen greatly, reaching at one time 48 1/2 per pound. It is declared that there has been good reason for tin to rise in price, for the consumption has greatly increased, the production has remained about the same and the stock on hand has materially diminished. Doubtless the high price of tin during recent years has more or less stimulated prospecting for new deposits of tin ore, but the only notable discoveries recently reported are one in the Transvaal and one in Nigeria.

"Detinning" Tin Scrap.

One effect of the scarcity of the world's supply of tin has been the birth of a new industry a few years ago, which is known as "detinning" tin scrap. It has become of considerable importance in this country, where many hundred tons of metallic tin and chemical salts of tin, chiefly chlorides, are obtained each year by the chemical or electrolytic treatment of new tin scrap, which is obtained from tin can and similar material. Old tin cans and similar material are subjected to a smelting treatment by which also the tin is recovered; such tin is either used in a crude and impure condition in the manufacture to yield metallic tin or tin salts. The residue of tin obtained in these processes, which contains a little tin, is melted and cast into window-sash weights and other objects where the small percentage of tin in the iron is a desirable feature.

It is the rise in the price of tin which

has caused the search for a satisfactory substitute for that article in the manufactures. It is predicted that if tin keeps up in price for several years longer the percentage of tin in white metal ornaments will diminish considerably, and where white metals are used as bases for electroplating with gold and silver it has already been found possible to use aluminum. Scientists predict that the use of aluminum will become more and more common.

The principal uses to which tin is now put are: (1) The manufacture of tin plate; (2) the manufacture of machine bronzes and brasses, which probably accounts for the greater proportion of the world's consumption; (3) the manufacture of various white alloys, the more important of which are solder, type metal, pewter, britannia metal and white bearing metals; (4) ornamental bronzes and gold and silver plated white metals; and (5) tin crystals, tin oxide, etc., a considerable amount of the former being used in various branches of the textile industry, while tin oxide is the principal constituent of many polishing powders. Cornwall has produced tin for more than two thousand years, but practically the whole output is used in Great Britain. Owing to the high prices of tin it has recently been proposed to open some of the abandoned tin mines at that place. In recent years the output of tin from Cornwall has averaged about five thousand short tons annually. The rapidity with which many of the tin placers are being depleted continues to cause energetic efforts to be made to locate new placer fields, and large numbers of English, American and other prospectors and engineers have been employed at this work during the last year.

HE HAS TITLE; SHE WEALTH.

Penniless Danish Count to Wed a Bay State Heiress.

Boston, June 26.—Next Saturday by the marriage of Miss Cornelia Thayer and Count Von Moltke of Denmark, a Massachusetts girl marries into one of the oldest and most famous families in all Europe and this in truth gives it a semblance of a bargain. A penniless Danish count finds himself a member of one of the best families in the Bay State, whose money and the brilliancy of his young wife can push him powerfully to the fore in the diplomatic service of his country.

Society, which for many years ungrudgingly said Miss Thayer was the most beautiful woman in New England, for the past two years has been saying that it was doubtful if she ever married. No reason was given except the indistinct hints that parental objection to a comely youth, who worked with both hand and brain and was one of the self-made class, had given a pessimistic view to the beautiful young woman's ideas of a life united to that of a husband.

Last year Miss Thayer, her stepmother and her sister were touring Europe. They encountered Count Von Moltke in Copenhagen and the young Danish officer proved to be an attractive guide. Government berths are of a more stretchable nature in Denmark, than in the states, and besides that "Von Moltke" is a name to bring spirits out of the ground with it and it was possible for the count to go to several cities on the continent, the faithful and unassuming courier of the American woman and her two stepdaughters.

Either one of two things, the health-giving qualities of Lancaster, Mass., U. S. A., or the American way of saying with the eyes, "Why don't you try?" as exemplified by an American girl tourist, were sufficient for Count Von Moltke to get a leave of absence, stamp a few more Von Moltke crests on articles likely to be seen by the public eye and start on his journey to New York.

Count Von Moltke visited Miss Thayer's father, Nathaniel Thayer, last November at the Thayer country house at Lancaster. It was there presumably that Mr. Thayer gave his sanction to having a Danish nobleman for a son-in-law.

Count Von Moltke bears the same name and is said to be a cousin of the direct descendants of the famous German general, von Moltke, whose military knowledge was what furnished the cause of the defeat of the French in the Franco-Prussian war.

The count does not seem, however, disposed to trade extensively on the name of his remote kinsman, but says that it is his hope to gain the confidence of his government enough so that he shall be sent to represent Denmark at some important foreign post, possibly the United States.

He has done very well thus far in his progress as a diplomat and because of his acquaintance with the Kaiser, and his matrimonial alliance, which will no doubt furnish him with the money to maintain a dignified establishment for an ambassador, well posted American residents of Denmark asserts that he is one of the coming men of the little country which prospers so thriftily on the Baltic.

The wedding is to take place at Miss Thayer's father's country house at Lancaster and the leading lights of Boston and New York society. It is expected that the count will be invited guests. After a short wedding tour in this country the Count and Countess Von Moltke will sail for Europe and spend the rest of the summer on an estate in Denmark.

MARQUETTE & SOUTHEASTERN RY. Sunday, June 30th, the summer schedule of the M. & S. E. R'y. goes into effect. Sunday trains will leave Marquette for Princeson and Munising at 8:45 a. m. and 6:20 p. m. For Negaunee and Ishpeming, 10:15 a. m., 3:55 p. m. and 8:20 p. m. For Birch and Big Bay, 8:30 a. m.

MESSAGE FROM MARS.

Astronomer Lowell, of Flagstaff Observatory, Imparts Interesting Tidings.

Boston, Mass., June 28.—The very latest news from Mars came to town today with a brief visit of Percival Lowell, whose observatory at Flagstaff has been gathering bits of information ever since the planet came first into reasonably good seeing this season. The present opposition is now close at hand, the planet reaching its nearest point to the earth the middle of next month. The distance of Mars from us is somewhere about 35,000,000 miles, but unfortunately this nearness will be wasted in a measure since the object swings low in the skies and the atmosphere interferes with clear vision to a considerable extent. It is to surmount this difficulty that Mr. Lowell has sent an expedition to South America, where in a position near the equator the planet will rise high above the horizon and the advantages of its proximity be realized in greater measure. Advances from Professor Todd, who is the leader of the South American expedition, show that one station at Iquique, Chile, has been tried, and the research continued for a place that shall be even better than this.

At Flagstaff Mr. Lampland began photographing the planet as soon as it was in good position, and two canals have been caught upon the plates. The conditions are continually those of improvement at Flagstaff, for with no red tape to cut the line of observations that suggests improvement can be followed up at once. Some of the improvements of the present season show that one station at Iquique, Chile, has been tried, and the research continued for a place that shall be even better than this.

The visual observations have been interesting and highly important. The relations of earth to Mars in their motions about the sun are such that it is usually the north pole of Mars that is presented during an opposition. This year there has been an opportunity to view the south pole, and in so doing some confirmation of the theory of what was seen fourteen years ago when this part of Mars was last under view at an opposition. As with the earth, the snow-cap of the south pole is much larger than that of the north pole, and the melting of the ice has now been seen under excellent conditions.

Mr. Lowell has been able to view particularly well the phenomena of the melting of the southern polar cap. The cap at first observation was enormous in extent, covering an arc on the planet's surface of more than one hundred degrees. At the second presentation this cap had diminished greatly, and at its base were certain appearances that seem to bear out Mr. Lowell's idea of vegetation. The first presentation of a large area adjoining the polar cap showed this to be a dark band lying between the snows and the continental areas. It was a curious appearance at first, because these intermediate areas were supposed to be light ones and had been already defined and given names as seas and islands. At the second presentation of this region the dark color had diminished and there were symptoms of dark lines separating lighter spots. As the same area came in rotation for the third time to the observer at the telescope the light islands were distinct, just as they had been noted on the charts of Mars, and they were divided as they should be by darker lines.

The cause of these different appearances, according to Mr. Lowell, is the proximity of the snow. The general moisture that the nearness of the polar cap induced by melting woke the vegetation to life, and as the snow retreated, and the water began to be confined within its regular channels, the sun dried up the plants and gave them the yellowish tint which is the visible sign of the desert bands of the two hemispheres of Mars.

A second important observation has been the connecting of certain of the known canals with bays which formed along the polar cap as it melted. There was for a while no such connection to be seen, and it might have been assumed that the canals observed were not connected with the south at all, but rather, with the north pole, across the equator, but here at last was there evidence of an actual physical connection with the pole which was at the time in a melting condition. This phenomenon, although before observed in the north, has now been seen for the first time at the southern pole.

Incidental to the special work on Mars Mr. Lowell reports the discovery on his plates of no less than thirteen new asteroids.

ISSUES OF SENATOR KNOX.

Is Against Centralization and Would Restore State Rights.

Washington, June 28.—By his supporters in Washington it is announced that Philander C. Knox sounded in his

PILES CURED AT HOME BY NEW ABSORPTION METHOD

If you suffer from bleeding, itching, blind or protruding piles, send me your address, and I will tell you how to cure yours at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. Summers, Box P, Notre Dame, Ind.

Yale speech the keynote of his campaign for the presidency—opposition to centralization and a restoration of state rights. When the senator received the advance copy of the endorsement of his candidacy that was to be adopted by the Pennsylvania convention he is said to have edited out one phrase which had been inserted by the senator explained he was willing that the convention should endorse the administration, and its policies, but he was opposed to being paraded before the country as "of the Roosevelt school." The convention did as he wished. In the light of his speech at Yale this incident is recalled in Washington and the significance attached to it at the time is thought to be entirely warranted.

It is clear that the Knox boom in the East is to have strong support. It is in the East that federal regulation has come in for the greatest amount of criticism. Furthermore it is said that Senators Foraker and Dick have been making overtures to the Knox managers and given them to understand that they are entirely friendly to the aspirations of the Pennsylvanian. New England conservatives are also expected to rally to the support of Senator Knox, and his friends here believe the senator was wise in his choice of Yale as the place for bringing the opening gun of his campaign.

It is understood that in future speeches Senator Knox will undertake to show that the recent activity of many states in putting on their statute books a large amount of reform legislation makes further federal laws in many directions unnecessary. It is not unlikely that the issue raised in the Knox speech, centralization versus state's rights, will come in for considerable discussion at the next session of congress when Senator Beveridge presses for the passage of the child labor bill. To such legislation Senator Knox is said to be vigorously opposed, and he will doubtless be in the forefront of the fight against it. The reception given the Knox speech by the press of the country will be watched with interest by the other presidential candidates and their friends.

WEEKLY EXCURSIONS TO DETROIT AND RETURN \$13.50

Via the South Shore, leaving every Friday. Same rate to Alpena, Oscoda, Harbor Beach and Port Huron. To Buffalo \$3.50 higher. Limit September 15th, 1907. For sleeping car and steamer reservation apply to ticket agents. (6-22-07)

CURED HEMORRAGES OF THE LUNGS.

"Several years since my lungs were so badly affected that I had many hemorrhages," writes A. M. Ake, of Wood, Ind. "I took treatment with several physicians without any benefit. I then started to take Foley's Honey and Tar, and my lungs are now as sound as a bell. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold. Refuse substitutes. The Stafford Drug Co.

Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for Piles, and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-capper glass jars 50 cents. Sold by The Stafford Drug Co.

EVENING Fireworks
The grandest display ever witnessed, they having been especially chosen from the big Boston house of the Pain Pyrotechnic Co.
Grand Ball in the Evening.
Everybody Come to Marquette.
Excursion Rates on all Railroads.

FOUR GRADUATES GET DIPLOMAS

ANNUAL COMMENCEMENT OF THE CATHEDRAL SCHOOL HELD LAST EVENING.

EXCELLENT PROGRAM GIVEN

Religious Drama "Fabiola" Well Presented by the Young People—Father Rosswinkel, S. J., Gave Short Talk.

A large assemblage of people was present at the beautiful auditorium of the Baraga building last evening to attend the annual commencement of the Cathedral school, which this year conferred diplomas on four young ladies, the Misses Carolyn M. Siegel, Elizabeth V. Hogan, Della B. Cleary and Laura M. Dwyer. The program was participated in by the graduates and the other young people of the school, who presented a drama of the early Christian period and appeared in other numbers.

The principal feature, excepting the essays of the graduates, of course, was the drama. The choice was "Fabiola," written by Cardinal Wiseman. The period of the play was the reign of Nero and the general theme the persecutions suffered by the early Christians, with particular treatment of the martyrdom of St. Agnes. The play, which is in five acts and imposes a heavy burden of lines upon the principals, was presented in a manner that showed careful and painstaking preparation by the young people, and excellent direction by the sisters of the school. The cast, which reached an average of excellence, which makes an advisable personal mention, was as follows:

- Fulvius, Syrian nobleman..... William Mullaly
 - Saint Sebastian, an officer of the Imperial Guard..... Grover McCarthy
 - Fabiola, daughter of Fabius..... Charles Duttmer
 - Corvinus, secretary of emperor..... James Bennett
 - Tertullus, prefect of Rome..... Clarence McKereghan
 - Calpurnius, friend of Fabius..... Walter Burley
 - Procullus, friend of Fabius..... Frederick Stiekney
 - Fabiola, Roman heiress..... Adele Egan
 - Saint Agnes, kinswoman of Fabius..... Hazel Bush
 - Saint Emerentiana, foster-sister of Agnes..... Catherine Flanigan
 - Afra, slave in the household of Fabius..... Agnes McCarthy
 - Gratia, slave in the household of Fabius..... Marie Flanigan
 - Syra, slave in the household of Fabius..... Eileen Scully
 - Angels.....
 - Attendants.....
 - Guards.....
- The play was carefully costumed,

which added much to its success, and a number of features participated in by the young people of the school were introduced.

Other Features.

Between the acts an orchestra composed of students of instrumental music under the instruction of the sisters played overtures in a manner that won hearty approval of the audience. The vocal class sang Gounod's "Praises to the Father" and Vincent's "Blow Soft Winds" in pleasing manner.

The graduates were heard at intervals through the program, their themes being as follows: Miss Siegel, "The Rose in Life"; Miss Laura Dwyer, "The Rose Half Blown"; Miss Della Cleary, "The Rose Full Blown" and Miss Elizabeth Hogan, "The Rose Fading." The connection between the essays is shown by their titles. They developed a timely train of thought in a pleasing manner, with much grace of composition, and were well delivered.

The diplomas were conferred by Rt. Rev. Bishop Eis, who then introduced Father Rosswinkel, S. J., who has been in attendance at the retreat of the priests of the diocese at Assinibois. Father Rosswinkel is an impressive speaker, a man of ideas with the faculty of clothing them in adequate language. He congratulated the cathedral parish on its possession of the Baraga school, saying that its beauty greatly surprised him and that he has never seen a school building, public or parochial, that is superior to it in some of its features.

Father Rosswinkel addressed the graduates with appropriate remarks, clothing a number of fine thoughts in beautiful language and imparting some excellent and timely advice. The program was concluded with a singing of the class song, Wiegand's "Farewell."

BARAGA SCHOOL HONOR ROLL.

The following pupils have been perfect in attendance at the Baraga school during the year.

- Twelfth Grade—Caroline Siegel.
- Ninth Grade—Frank Stafford, Louis Toupin, Nellie McCarthy, Nala Gammie.
- Eighth Grade—Alice Ryan.
- Seventh Grade—Frank Mullaly, Leo Stafford, William Schumck, Teresa Gravelle, Mary Maclean, Norine Turner.
- Sixth Grade—Louis Waldo.
- Third Grade—David McCarthy, Louis Anderson, Lena Brudingsdorf.
- First Grade—Peter Cooney.

et us eat, drink and be merry,
With never a thought of ache or pain,
et us forget every sorrow that might be,
For we still have Rocky Mountain Tea.

UMBRELLAS.

We have a full line of umbrellas at marked-down prices. You may need an umbrella very soon. Now is the time to get one at half regular price at Seidenfeld's store.

Red Seal White Lead costs less than other white leads, because it makes more paint. For sale by Kelly Hardware Co. (5-18-11)

ROAD BOSS EARLE IS WELL PLEASED

THINKS MICHIGAN WILL PRESENTLY BE NOTED FOR GOOD ROADS INSTEAD OF BEING NOTORIOUS FOR BAD ONES.

Horatio S. Earle, good roads missionary, trap rock advocate, enemy of graft and candidate for governor, is one of the best satisfied men in Michigan. More than any other advocate of public improvements he was successful in impressing the legislature with the superlative merits of his own schemes. Mr. Earle is not regarded as a shining favorite in administration society and he does not profess any violent affection for any of his fellow officeholders, but he seems to have "arrived" as a promoter of good roads.

"I believe that Michigan now has the best system of road laws of any state in the Union, and in ten years we'll be as widely known for our good roads as we are now for our bad ones," remarks the commissioner.

In reply to inquiries Mr. Earle has issued a summary of the work of the legislature toward improving the road system. His estimate of the value of the laws knocking out the worthless pathmasters and the grafting machinery agents on township boards may be inferred from this statement:

"Cash road tax law passed to take place of the antiquated statute laborer convention, plow and scraper law. It 'rips' out of office twenty-five thousand pathmasters. One highway commissioner and one overseer in each township are the township road department. It abolishes the road machinery law, for now no one can buy road machinery except township boards."

Other features of the changes made by the legislature are summarized by the highway commissioner as follows:

Repeal wide tire rebate law.
Amended township bonding law so as to include a right to bond for building bridges, and changing the majority required to carry the bonding proposition from two-thirds to 60 per cent.
Amended the county road law so it is clearly constitutional.

Passed a good roads district bill, which enables any combination of townships, villages and cities to join together in a good roads district and work under the county road law, without taking in the whole county. It takes a petition from each township, village and city, of ten freeholders, but twenty will be better because some times one cannot qualify as a free holder. Then the supervisors have to submit it to a vote, and if it carries in the whole district all that petitioned are under the law.

Passed a county and good roads district law giving counties and districts the right to raise not to exceed 3 per cent by bonds.

Passed a law compelling telephone companies to keep their poles out of the traveled road.

Amended the law so as to permit highway commissioners to go all the way north of work without advertising for bids and letting a contract.

Appropriated \$250,000 for the department, \$15,000 each year for reward for roads, and \$10,000 each year for expenses of the department.

You'll never catch us flirting with fads. Never!

We just hitch up with the best ideas of the best tailors—which explains why our Spring Suits have greater distinction than you'll find in ready-for-service garments elsewhere. A bigger variety of choice patterns to pick from, too.

Business Suits \$12 to \$30. And so all along our other lines. Furnishings and Footwear that appeal to the taste of refinement and priced to satisfy the economically inclined.

Jacob Rose
The Store of Quality.

SUNDAY AT THE CHURCHES.

First Church of Christ Scientist—Service Sunday at 10:30 a. m.; subject, First Church of Christ, Scientist—

At the Baptist church, services will be held at 10:30 and 7:30 o'clock, with preaching by the pastor, Rev. C. H. Maxson.

GREAT REDUCTION IN LADIES' SUITS.

All of our ladies' suits, ranging in prices from \$10 to \$30 each. Your choice, while they last, \$5.
