

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

Subscription Rates: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MARQUETTE, MICH., JULY 1.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The small boy now has only two more days to court.

Vice President Fairbanks' press bureau continues to do great strokes of business. We are firmly convinced, by the papers that find their way to our exchange table, that the rural press of Indiana is almost solidly for him.

Munising is to have a second paper right away, a company having been formed there to resuscitate the Republican. The little city is a better breeder of newspapers than supporter of them after they have been brought into existence, apparently.

President Roosevelt is quoted as having said that if he could be assured of carrying a single state in the south he would almost be persuaded to accept the nomination for the presidency next year. There need be no trouble about getting that assurance. All he would have to do would be to take the nomination on the Democratic ticket. As the candidate of that party he would get them all.

An Illinois congressman predicts that ex-Senator Spooner of Wisconsin will be the next president of the republic. Not if the two senators from that state have their say in the selection of the delegation which will speak for the Badger Republicans in the national convention. And between them they have both the money and brains that should determine the complexion of that delegation.

Mentioning the return home of Senator Fuller, the Escanaba Journal quotes him as saying of Governor Warner, in connection with comments on the work of the session generally, that "he is a bigger man now than he ever was before," and that during the late session he showed himself "earnest and sincere in advocating measures that were for the interests of the people." The Delta senator has returned from his labors at Lansing in greatly improved health, and was given a cordial reception by his friends and admirers at Escanaba when he arrived there enroute to his home a few days ago.

The Iron Ore thinks that saloon men who allow women to frequent their places are deserving of attention from the police. In fact, the Iron Ore believes they are more despicable than the women. The Mining Journal agrees with the Iron Ore. However, the Mining Journal can assure its neighbor that but few Marquette saloon men tolerate women around their places. Those that do the police should bring up with a short turn. Public sentiment in Marquette won't stand for women, no matter what their character may be, tagging around the saloons. It is an interesting fact that under the Gordon law, if it turns out to be everything that has been claimed for it, the council can refuse a license to any applicant who is known to have permitted women about his place of business.

Governor Warner has decided that the military bill is hopeless, and will veto it. Meanwhile one of our upper peninsula senators is sharing the criticism arising from the fact that Governor Warner finds it necessary to take that step. For instance, the Lansing Journal says: "Responsibility for the defects in the bill is laid at the doors of Senators Cady and Moriarty, who, it is charged, in an effort to amend the bill in such a manner that friends of theirs would be benefited, succeeded in making such a mess of the measure that vetoing it is the only escape from causing no end of trouble. It isn't necessary to condemn such acts as are attributed to the two senators; their consciences do that, and they also speak louder than words in censuring of the complacency of their colleagues in approving them."

Detroit's labor troubles appear to have no end. Why don't the harassed manufacturers of that city seek locations where other conditions are equally as inviting, and where they would be assured of protection in the conduct of their enterprises? There are many points in the state where the facilities afforded them would be as good as they are in

Detroit and where they would enjoy immunity from the annoyances they are experiencing in our badly governed metropolis. The trouble with Detroit is that its peace officers and some of its magistrates are catering to the labor vote so assiduously that they can't be relied to do their duty when disputes between the employers and employed reach the violent stage. It might bring the people of the city to a sense of what they owe to those who have large sums invested in industries there if the latter would begin to look about for locations where they would be given needed protection against lawless interference with them in the conduct of their business. Certainly they need to be roused from their indifference in some way.

Having failed utterly in the attempt to provide a home rule measure for Ireland that would suit either the advocates or the opponents of that proposition, the Campbell-Bannerman government will now seek to put through a bill limiting the power of the house of lords. It will fail in this also. In fact, the party now in power in Great Britain has done nothing since its reinstatement but demonstrate its incapacity. It has alienated the Irish party completely, while weakening itself with its English supporters, by want of sincerity and lack of courage. Yet it should be borne in mind in passing on its mistakes that the British people are so divided in sentiment on nearly all the great questions with which an administration has to deal at present that any party, or combination of parties, in power has great difficulties to contend with. The conservatives made equally bad work of satisfying the country when they held the reins, and the party that will next be given control of that country's government will probably fail as badly as the present ministry in satisfying the British people.

THE WHEAT CROP.

That the wheat yield will be lighter this year than it was last in some sections of the country is not to be disputed. In others it will be heavier. On the whole, the average yield may be above or below that of 1906 without materially affecting the prosperity of the nation. There will be plenty of wheat for our own needs and a goodly amount to spare for export. As we are likely to get a somewhat better price for what we sell abroad, the higher price will about offset the falling off in quantity exported, and we will, therefore, realize as much from that source as we ordinarily do.

Furthermore, wheat is but one of the money-yielding crops, and not the greatest among them. In others it will be heavier. On the whole, the average yield may be above or below that of 1906 without materially affecting the prosperity of the nation. There will be plenty of wheat for our own needs and a goodly amount to spare for export. As we are likely to get a somewhat better price for what we sell abroad, the higher price will about offset the falling off in quantity exported, and we will, therefore, realize as much from that source as we ordinarily do.

It is money that we want to keep the wheels of industry going, and whatever shortage there may be in any of our field crops is certain to be made good to us in a financial way by the better price we shall get for our surplus. All over the country our factories are running to their fullest capacity and are crowded with advance orders; labor is in greater demand than ever before in our history, and commands high pay; the railroads are overwhelmed with business, while the volume of traffic on our waterways is unprecedented, and building operations in all the towns and cities of the country are on a scale never before equaled. The tide of our prosperity has not even been stemmed by the efforts of the prophets of calamity to frighten the public for purposes of their own, and this gives the best possible assurance that the business situation is sound, for the effort to create a scare for stock jobbing effect has been shamefully devised and well sustained.

THE EXPORT OF GOLD.

Some disturbance has been caused in our stock exchanges during the past month by the engagement at intervals of gold for export, amounting in the aggregate to some sixteen millions of dollars. This movement of the yellow metal, a New York financial paper observes, "is interesting chiefly because gold exports in any quantity had come to be a rare occurrence in our financial markets. Some large exportations were made to London during the Boer war crises in 1899, and there was another fair-sized shipment to Paris when payments were being made on the Panama canal purchase in the spring of 1904. The present movement ranks with these two as the only gold outgo of importance that has occurred in the past ten years."

There are a number of causes which have forced exchange to the specie point. In the first place, this is the time of year when merchandise imports are comparatively heavy and exports comparatively light. It is the season also when the demand for credits by American travelers in Europe is particularly large. On these accounts a high level for exchange has come to be regarded as quite

an ordinary feature in the late spring and early summer.

But, apart from the natural tendency, there are certain influences of an extraordinary character behind the present situation in the foreign exchanges. Competition for gold at the European centers is extremely keen. The Bank of France for two months past has been bending every energy to build up its gold reserve. Whether the main animus for its activities is the constant uncertainty over Russia, or the promise reported to have been made in the recent treaty with Japan to undertake the conversion of the Japanese war debt, or the previous state of France's home politics, the demand for gold at Paris has for the last few weeks been very urgent. The Bank of England, confronted by this situation on the continent and called to meet some unusual withdrawals for Egyptian account, has not only continued its high rate of discount but has as a further defensive measure raised its own bid for the precious metal.

Our market is the only one which so far has not offered any resistance to these demands for gold. There is still great doubt as to whether this is due to a genuine ability to finance Europe's requirements because money rates here are comparatively easy, or whether it means that we have lost our hold on the international exchanges and that Europe is forcing our hand. In support of the latter view it has to be remembered that the balance of trade in favor of this country has fallen off heavily as compared with former years, and that foreign exchange has been liquidating our securities extensively. On the other hand, many good authorities insist that our floating obligations to foreign capital are small, and that the present gold shipments are in the nature of an advance to the foreign money markets.

The test of these conflicting opinions will come when our bank reserves have been sufficiently reduced by the drain of gold to force an advance in money rates. If the gold movement has been of a voluntary character a moderate rise in money will check it; if of an involuntary character it will not yield unless our money conditions become really stringent. The outcome of the test will be extremely interesting, inasmuch as it will show whether the gold movement is a sign of strength or of weakness in our financial situation.

Upper Peninsula

Hopes to Be an Ore Port—The following interesting dispatch comes from Menominee: Plans are being perfected by the officials of the Ann Arbor railroad to extend their line from this city westward to Duluth and Minneapolis, making this city the western terminus on the west shore of Lake Michigan. Iron ore in large quantities has been discovered on the lands of President Zimmerman in Iron county. It is the intention of the Ann Arbor officials to haul the ore to this city and then run the cars on the carteries of the company, shipping direct to Toledo and Cleveland without handling the ore."

Labor Is Scarce—Woodsmen are still reported scarce in the camps in the vicinity of Grand Marais. Fully 100 men are needed. Similar reports come from other districts. The supply of miners also is much under the demand. Five hundred men are wanted for underground work in the Crystal Falls field, and this case is but one of a number. The men are being and the production of iron ore will be materially curtailed in consequence of this unsatisfactory labor condition. Wages both in the woods and at the mines are the highest ever paid in the Lake Superior region.

Drummond Island Prosperous—Drummond island, off the mouth of St. Mary's river, in Lake Huron, and which has been largely populated by Finnish colonists from the copper country, is at the present time in the midst of its most successful summer. The energy of the settlers is making itself felt in various ways and the island is steadily becoming more prosperous. For the present summer two sawmills are being erected, a creamery is planned and a large stock farm is being made ready on an adjacent island. Mrs. McQuire, who formerly con-

Thousands Have Kidney Trouble and Never Suspect It.

How To Find Out. Fill a bottle or common glass with your water and let it stand twenty-four hours.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, will relieve every ailment arising from the kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad feelings following use of liquor, wine or beer, and overcomes the most distressing necessity of being compelled to go often during the day, and to get up many times during the night. The mild and extraordinary effect of Swamp-Root is soon realized. It stands the highest of its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle and a book that tells all about it, both sent free, if you will send the name of the nearest druggist to Dr. Kilmer & Co., Binghamton, N. Y., writing mention this paper and don't make any mistake, but remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y.

located the Caledonia Hotel of Calumet, is now located on Drummond, and has a hotel which is situated about one mile from Kretz, the principal settlement. The island now has a population of about eight hundred. It has six stores, three postoffices and five hotels. The population is gradually increasing. Forty-two homesteads remain as yet unclaimed. These may be had by any citizen over twenty-one years of age by the payment of \$16 for filing papers. At the end of five years the land will be owned by the homesteader. The big stock farm which is to be started on an adjacent island will be managed by the Farm Tapes company; stock valued at \$40,000 will be placed there. It will be managed by J. P. Cowing, assisted by W. M. Brown, who recently left a 400-acre farm near Lansing to accept this position. Fine docks are being erected on Drummond. In a short time it is thought that the land will all be taken up. There is not a saloon on the island.

Power Project Progressing—The Escanaba Electric Power & Pulp company will begin today the work of raising the old Flat Rock sawmill, on the site of which will be erected a large power plant capable of furnishing power for the operation of all the sawmills of Escanaba and Gladstone. Last week a special meeting of the directors of the I. Stephenson company was held at Wells and after a lengthy session the sale to the new power company of all the power rights on the Escanaba river from the Gladstone bridge to a point below the old Flat Rock dam was formally approved. The meeting was attended by Senator Isaac Stephenson of Marquette, H. A. J. Upland of Milwaukee, J. Van Clief of Marquette and J. A. McGuire of Ford River, representing the I. Stephenson company, and P. L. Uley of Watertown, Wis., and O. L. Huie of Marquette. A force of men will begin work at once in tearing down the old Flat Rock mill and it is believed that everything will be removed from the site to allow the beginning of actual building operations within three weeks. All of the surface earth about the mill site will be removed down to bedrock and the new plant will be constructed on that foundation. The plant will have a capacity when fully completed to supply all demands for power in the city of Escanaba for a period, it is estimated, of fifty years. Without improving the present dam it has been found by the company's engineers that 600 horsepower can be obtained and this will be utilized at once and next year a new dam will be constructed above the present dam and the old dam rebuilt and improved to furnish 100 horsepower easily. When all of the dams included in the plant are completed the total capacity at the disposal of the company will be close to 7000. Mr. Huie, who has engineered the deal throughout for the I. Stephenson company, will remain in Escanaba to manage the project.

Of the Class of '65—During the present week Thomas R. Easterday of the Soo celebrated the forty-fifth anniversary of the date of his graduation from the University of Illinois with the degree of bachelor of arts. He was a member of the class of 1862, and was originally sixteen in his class, but the Civil war, then in progress, had taken ten by enlistment by the time of graduation. He would have enlisted himself, if he had been accepted. In the graduation exercises of that class Mr. Easterday gave the salutatory address, entirely Latin which required about thirty minutes for the rendition and of which he still has the manuscript. Mrs. Easterday, then Miss Leora J. Tyson, was pianist at these exercises. The year after his graduation Mr. Easterday and Miss Tyson were married and he filled the position of principal of Shelby seminary located at Shelby, Ill. On account of his wife's health he remained with this institution for one year, but in 1865 he came to Marquette and under his name such men as the Hon. George Pendling of Washington, D. C., noted as an anti-Ingersoll man, and George Penwell, the millionaire coal baron of Pana, Ill. The next two years Mr. Easterday occupied a lucrative position in the city of Chicago, but in 1867 he returned to that city in order that his wife might be nearer her people in her health. It was at the end of these two years that Mr. and Mrs. Easterday decided to go to the Soo to locate, in the hopes that the climate would be beneficial to Mrs. Easterday. Thus they have been residents of the Soo for about forty-two years.

Silver in Michigan—While Upper Michigan is famed for its iron ores and its native copper, both minerals the purest in the world, it is a fact not generally known that the precious metals exist in quantities in the region of Grand Marais, Michigan, not still considered of much value, has produced more than three-quarters of a million dollars' worth of gold. Placer gold is found in small quantities in a number of streams. Silver is found in most every copper mine in the district in the form of small quantities, and is the copper-silver. Few of the mines have been notably rich in the white metal, but at all of them more or less is secured.

At the old Franklin stamp mill silver is picked from the copper for forty years. The Osceola produces a considerable amount of silver in small grains, and the Quincy reduces a portion of its mineral by an electrolysis in order to save the silver, which averages twenty-eight ounces to the ton of copper treated. The Ice River, in Huron, Portage and Sheldon & Columbian mines, on Portage lake, were richer in silver than any other Houghton county mines, the latter carrying especially large quantities, while a wash boss of the old Portage mill put himself on record one day in the 70s by saying that while he paid him only \$60 per month, he would cheerfully pay that amount rather than lose his job and the rich pickings of a silver.

Some of these mines, however, could compare with the many cups of greater strength than the same quantity of China or Japan tea. This in itself applies strongly to the economic housewife. The great physicians of the world have declared for tea as a harmless and stimulating beverage, but without their endorsement one only has to look at English women (England is one of the greatest tea-drinking nations of the world), who are generally the pictures of health, to know that no harm may come from the use of tea.

Within the past year army surgeons have come out for it as the proper beverage to be used by soldiers in the field in place of water, "because it is a healthy, pleasant, harmless, invigorating and sterilized drink."

INDIA AND CEYLON TEA. Tea Taste of the People Changing—Imports from North America Show a Phenomenal Increase. That the tea trade of North America is and has been for some years undergoing a revolution is proven by the remarkable increase in the importation of India and Ceylon tea in the past thirteen years. In 1894 the importations of British grown teas (India and Ceylon) amounted to 4,723,370 pounds. Five years later they had risen to 13,698,695 pounds, while still another five years saw a further enormous increase, or an importation of 37,069,065 pounds. The next three years, or in 1906, the quantity of India and Ceylon tea imported footed up 46,325,726 pounds. These figures show to what an extent the taste of tea drinkers is changing from the weak and more or less watery teas of other countries to the richly flavored and full-bodied tea of India and Ceylon. Tea drinkers now realize that India and Ceylon tea is pure. They also understand that in all the processes it goes through in preparation for the table only the most approved and scientific machinery is used, and for that reason this tea is free from any impurities that must of necessity become a part of tea prepared by hand. Not only do tea drinkers realize what an important thing this is, but the tea growers in the older tea-growing countries are coming to the same conclusion, that something must be done to stop the trend toward the machine-made teas of India and Ceylon, because from time to time commissions representing the older tea-growing countries are heard from as visiting India and Ceylon to study the up-to-date methods employed there in preparing British-grown teas for the markets of the world.

Besides purity, India and Ceylon tea appeals to many from an economic standpoint, and in that, to some extent, may be found a reason for the change that is taking place. Grown on virgin soil, this tea possesses much greater strength, and it is a fact that one pound of India and Ceylon tea will make well up to three times as many cups of greater strength than the same quantity of China or Japan tea. This in itself applies strongly to the economic housewife. The great physicians of the world have declared for tea as a harmless and stimulating beverage, but without their endorsement one only has to look at English women (England is one of the greatest tea-drinking nations of the world), who are generally the pictures of health, to know that no harm may come from the use of tea.

And the School-boy with his Bread and Butter

After all—there's nothing quite so good as bread and butter. It is food. Food for the brain and food for the body. And the better the food the healthier will be the person who eats it.

Silver Creek Creamery Pasteurized Butter

has that smooth, delicious taste. Remember how we wanted butter when we came from school? Spread on thick. Now even grown folks want butter spread on thick—but it must be Silver Creek Creamery Pasteurized Butter—the healthful butter. Sold by all grocers in one pound prints wrapped in parchment paper. Your grocer can get it for you if he hasn't it now.

Choice Imported Clarets and Sauternes. Also those of the best California make. A large variety of Scotch Whiskies, including Dawson's Old Curie, Haig & Haig 5 X and Long and Short.

German Rhine Wines, Unfermented Grape Juice, Apollinaris.

THE F. BENDING CO. WHOLESALERS.

how honest in every other respect, were a unit in the theory and practice that while the copper belonged to the company the silver went to the man who found it. Some thirty years ago a party of miners in one of the lower levels of the Cliff mine broke into a "vug" or cave, of the size of a small room, and literally studded from floor to roof with nuggets of pure silver.

The masses of white metal were quickly piled from the walls and nearly a dozen empty powder kegs were filled with the nuggets and secreted in abandoned drifts, awaiting removal from the mine, a few pounds at a time. Unfortunately for the discoverers, the mining captain saw the vug on the following day, noted little masses of silver overlooked by the despoilers, and making a systematic search of the mine, captured all the treasure kegs but one, leaving the crestfallen miners but a scant 200 weight of silver then worth \$120 per Troy ounce, for their share of the spoil. An outlying spur of the Keweenaw formation, known as Silver mountain, lies in the valley of the Sturgeon river, and weird tales are told of the rich silver mine repeatedly found and lost there by successive explorers. The mountain is still believed by the Chippewas to be haunted, and it is certain that the explorers who have ventured there have uniformly met with disaster and even death. Promising finds of silver have also been made from time to time in the Iron river district, west of Ontonagon, but within the limits of the trap formation of the Keweenaw peninsula.

INDIA AND CEYLON TEA.

Tea Taste of the People Changing—Imports from North America Show a Phenomenal Increase.

That the tea trade of North America is and has been for some years undergoing a revolution is proven by the remarkable increase in the importation of India and Ceylon tea in the past thirteen years. In 1894 the importations of British grown teas (India and Ceylon) amounted to 4,723,370 pounds. Five years later they had risen to 13,698,695 pounds, while still another five years saw a further enormous increase, or an importation of 37,069,065 pounds. The next three years, or in 1906, the quantity of India and Ceylon tea imported footed up 46,325,726 pounds. These figures show to what an extent the taste of tea drinkers is changing from the weak and more or less watery teas of other countries to the richly flavored and full-bodied tea of India and Ceylon. Tea drinkers now realize that India and Ceylon tea is pure. They also understand that in all the processes it goes through in preparation for the table only the most approved and scientific machinery is used, and for that reason this tea is free from any impurities that must of necessity become a part of tea prepared by hand. Not only do tea drinkers realize what an important thing this is, but the tea growers in the older tea-growing countries are coming to the same conclusion, that something must be done to stop the trend toward the machine-made teas of India and Ceylon, because from time to time commissions representing the older tea-growing countries are heard from as visiting India and Ceylon to study the up-to-date methods employed there in preparing British-grown teas for the markets of the world.

Besides purity, India and Ceylon tea appeals to many from an economic standpoint, and in that, to some extent, may be found a reason for the change that is taking place. Grown on virgin soil, this tea possesses much greater strength, and it is a fact that one pound of India and Ceylon tea will make well up to three times as many cups of greater strength than the same quantity of China or Japan tea. This in itself applies strongly to the economic housewife. The great physicians of the world have declared for tea as a harmless and stimulating beverage, but without their endorsement one only has to look at English women (England is one of the greatest tea-drinking nations of the world), who are generally the pictures of health, to know that no harm may come from the use of tea.

Within the past year army surgeons have come out for it as the proper beverage to be used by soldiers in the field in place of water, "because it is a healthy, pleasant, harmless, invigorating and sterilized drink."

City Brevities

Today's weather: Occasional thunderstorms; fresh southwest winds.

Yesterday's temperature: Seven a. m., 73 degrees; noon, 81; 7 p. m., 67. Maximum, 82 degrees; minimum, 60.

Julien Case is home after a several months' stay in Detroit.

Congressman H. O. Young of Ishpeming was a Marquette visitor yesterday.

G. R. Watts, the piano tuner, has returned from a trip to the copper country.

Mrs. George A. Baker of Chicago is visiting her sister, Mrs. J. E. Richardson, 312 E. Prospect street.

Mr. and Mrs. S. W. Shaull have just returned from a two weeks' trip to Los Angeles, Santa Barbara and San Francisco, Cal.

The South Shore office force's team defeated a club representing the South Shore shops Saturday, by a score of 10 to 5.

Announcement is made that the stores generally will be open for business the first three nights of this week. All will be closed all day the fourth.

The east bound South Shore train was several hours late Saturday morning. A special train was made up here and sent east at the usual leaving time.

Miss Hazel Payne, her guest, Miss Whitman, of Middleboro, Mass., and a party of friends are spending some days at the Payne camp, north of the city.

Professor H. G. Warner, formerly of Marquette and for some years past superintendent of the Newberry public schools, has been granted the degree of bachelor of pedagogics by the Ypsilanti Normal.

Paime, Webber & Co. make announcement that the San Francisco mining exchange will be closed all this week, so no gold stock quotations will be received. Orders will be executed on the curb, however.

Mrs. E. O. Morrison and daughters of Coffax, La., are in the city, visiting her father, Jason MacGregor, and sister, Mrs. W. F. Mitchell. Mr. Morrison was formerly employed with the South Shore railroad in this city.

The parade committee for the Fourth of July celebration will meet this evening at 8 o'clock in the city hall, and all parties intending to take part in the Calathumpian parade are requested to report to the chairman.

F. Upphart, manager for the Baraga ball team, announces the readiness of the club to come to Marquette for another game any time the Marquette are ready for it. Marquette and Baraga have played two games this year, and have put up good exhibitions.

Rev. J. M. Rogers left last night for the West on a month's vacation trip. He will attend the international convention of the Christian Endeavor society at Seattle, will spend some time with his son, Joseph, at Tacoma, and will visit other points in the Puget Sound country.

Mrs. A. C. Hotelling and son, Clifford, of Newark, N. Y., will arrive in Marquette this morning on the steamer "Tionesta," for a visit with her father, Jason MacGregor, and her sister, Mrs. W. F. Mitchell. Mr. Hotelling was formerly employed with the South Shore road as weighmaster.

Yesterday falling within the octave of Saints Peter and Paul, the former the patron saint of the parish, pontifical high mass was celebrated at the cathedral in the morning by the Right Rev. Bishop Eis. The feast-day, itself, occurred Saturday, a day of holy obligation with communicants of the Catholic faith.

Governor Fred M. Warner was an upper peninsula visitor last week. He visited Grand Marais, where he was a guest at the wedding, Wednesday, of Clerk Pierce, of the house of representatives, and Miss Charlotte Kennedy. The bride is one of Alger county's most popular and talented young women. She is a graduate of the University of Michigan.

Dr. Winship at Normal—Dr. Winship of Boston, editor of the New England Journal of Education, will lecture at the Northern Normal today, tomorrow and Wednesday. His lecture this afternoon will be given at 4:15 o'clock. Dr. Winship is a speaker of national reputation and his Marquette engagement will be one of the most interesting features of the summer school.

Marquette Man Weds—An Iron River, Wis., dispatch says: "At the home of Rev. and Mrs. John W. Gibson their daughter, Miss Mabel Gibson, and John R. Page of Marquette, Mich., were married yesterday afternoon, the bride's father performing the ceremony before relatives of the two families. A reception at the residence followed. Both are well-known throughout Bayfield county."

Married Saturday Evening—John Carlson of Manistique and Miss Sarah Larson of Marquette were united in marriage Saturday evening by the Rev. Ames Maywood, pastor of the M. E. church. The ceremony was performed at the residence of R. O. Pearl, in whose family Mrs. Carlson has lived for a number of years. Mr. Carlson holds a position as section foreman on the Soo line. The newly wedded couple will make their home at Trout Lake.

Start Mackinac Service—The special wire service furnished their customers at Mackinac Island by Logan & Bryan will be started today. The dispatches from the Chicago office will be relayed in the Marquette office. Koll Welsh will be the operator here. There are a number of big trailers in wheat who summer at Mackinac Island and the special service is put in largely for their benefit. It is a good deal of a luxury, as it comes high.

On Fifteen Minute Schedule—The street car service has been continued until 10:30 o'clock for over a month past, though the management made no announcement of the change. However, notice is now given that henceforth there will be a fifteen minute schedule until the time the last car leaves down town, or 10:30 o'clock. The fifteen minute service formerly ceased early in the evening. The change will be one generally appreciated. The company has had a good traffic since the weather warmed up. There has been much travel to Presque Isle.

Interred at Toronto—The remains of Mrs. Hugh Blaine, whose death in Minneapolis last week was mentioned in this column, were taken to Toronto, Canada, for interment beside those of her husband, Friday, being accompanied by Thomas Blaine of the Soo, a brother-in-law of the deceased. Mrs. Blaine's death occurred while she was on her way to her home in the Canadian Northwest from Toronto, where she had accompanied the remains of her husband, who died on the 28th of May. Mrs. Blaine was formerly Miss Nettie Clark, a sister of Lester Clark, and she left this city about nine years ago.

Northern Normal Notes.

Principal Kaye was absent from the city during the latter half of last week.

Dr. Anderson addressed the members of the school last week during assembly hour on the subject of the human eye, its significance, its development and structure at the present time. This morning, Miss Spalding will be the speaker.

Dr. R. Clyde Ford, formerly head of the department of modern languages, now filling a similar position at the Normal college at Ypsilanti, was in town last week. He came to the upper peninsula for the purpose of delivering commencement addresses.

Miss Margaret Gable, of Minneapolis, arrived in the city last week to take the place of Miss Hadley as critic teacher in the third and fourth grades.

Miss Grace Allen Spalding has returned much benefited in health by her trip to Italy during the spring. Her mother, from Evanston, Ills., accompanied her on her return, and will spend the summer in Marquette.

The Hon. A. E. Winship, Litt. D., of Boston, editor of the New England Journal of Education, will deliver a series of three lectures at the assembly hall, beginning this afternoon at 4:15 o'clock and continuing at the same hour on Tuesday and Wednesday. Dr. Winship is a lecturer of national reputation and his addresses will be of great value to all those interested in educational matters.

The work of the summer term is fairly under way and everything points to a session of more than usual interest and profit. The number of students enrolled so far is 361 as against 298 for the total enrollment for the summer of 1906. Of the towns of the peninsula sixty-six are represented and sixteen of those in the lower peninsula. Not only, however, are both peninsulas of Michigan well represented, but the roll shows that six other states have sent students, these are New York, Illinois, Indiana, Massachusetts, Wisconsin and Kentucky. There is no doubt that as time goes on, the numbers coming in from states farther south will be greatly increased.

KIMBERLY-WILFLEY NEWS.

Dr. Frank Gregory and Phil Cheek, secretary and vice president of the company, arrived at Denver Saturday to take over the Willey mine and mill as per contract. A wire message from Denver to the president of the company informed him yesterday that the property would be turned over today under most advantageous conditions. Today, therefore, marks the entry of the Kimberly-Willey into the list of producing mines. Until the large new mill is completed the company will be compelled to work on a small scale. Regarding the new mill the following letter from F. W. Gregory, the company's accountant, will be interesting:

"Three of the Willey tables are in position, complete, ready for belt connection. The balance of the tables will arrive from Denver on July 1st, and will be installed immediately. All of the rolls are now in position, the last set having been received and installed about a week ago. All of the Drugg electric separators—ten in all—are here and in position. With the exception of the Willey tables and the Richards sizers, all of the machinery in the main building is ready.

"The main line shaft and the greater part of the counter shafting and pulleys are ready for the belts. This work will be entirely complete in about a week. The main launders from the mill to the creek are about ready. It has been so arranged that all ashes from the boilers will discharge through one of these launders, thus doing away with the services of a man who would have to use a wheelbarrow. The electric wiring is almost complete.

"The carpenters are now working on the roaster building and have it well along. This building, as you probably understand, is entirely separate from the main building and will contain the roaster, a 400-ton storage bin, and cooling and elevating apparatus.

"The switch track, running parallel to the mill, is being graded. Our company is doing this work in order that we may own the siding in case the D. & R. G. railway extend their tracks to the mill, and we have every reason to believe that they will. Should the C. & S. railway do the grading, etc., they would have exclusive right in the track and would not allow the D. & R. G. railway to place their cars upon it. We would, therefore, be unable to derive the benefit of competition between the two lines.

"Mr. Buckingham has made ample provision for fire protection. The entire building will be piped—a portion of the work is already done—and the large 6 and 8-inch pipes which furnish water for the boilers and Willey tables are so arranged that they may be tapped in numerous places. Work on a large water reservoir, about 2500 feet above the mill, will be commenced next week. A 10 or 12-inch riveted steel pipe, under 200 pounds pressure, will convey water to the mill.

"Respectfully yours,
"F. W. GREGORY."

CARD OF THANKS.

I wish to thank my friends and neighbors and the members of the A. O. U. for the many kindnesses and the ready sympathy extended to me in my recent bereavement in the death of my husband. I will ever remember their kind response in the hour of my need.

MRS. FRANK McCONNELL.

AFTER NEXT REUNION.

SURPRISES IN STORE.

Fourth of July Parade Features Will Be Startling.

If The Mining Journal were at liberty to describe some of the displays being arranged for the parade the morning of the Fourth the reader would convince the public that the spectacle next Thursday will surpass anything heretofore seen here. This is saying a good deal as the parade two years ago was a hummer.

There will be a greater number of floats, both merchandise and mechanical, in this year's parade, and there will be more than twice as many fun makers. About fifty of the latter will "work" the streets before the parade, introducing some new stunts. The displays from some of the mines will be far the best ever seen here, and the merchants are also going to outdo themselves.

James Bryden, marshal of the day, will place the Ishpeming Light Guard band at the head of the procession. It will be followed by Company I, Michigan National Guard, the Uniform Band, Knights of Pythias, and the degree team of the Modern Woodmen of America. The military division will be followed by the members of the Ishpeming and Negaunee councils and other officials of both cities, in trucks. The Ishpeming fire department, with decorated apparatus, will be next in line. The Ishpeming City band will occupy the monster band wagon. Then will come the industrial, mercantile and comic floats, followed by the cutlumpans, animal displays, clown band, steam calliope, chimps, etc. The parade will conclude with twenty or more decorated automobiles.

Afternoon and Evening Programs.

The sports in the afternoon will start early at the Cleveland field, where a greased pig, valued at \$15, will be let loose. The pig will be the prize. A prize of \$12 will be given to the winners of a tug-of-war, each team to be composed of six men.

On East Division street there will be a 100-yard dash for men, prizes \$5 and \$3; 100-yard dash for boys, prizes \$3 and \$2; flag race, prizes, \$12 and \$8.

On East Cleveland avenue there will be a sack race, prizes, \$2 and \$1; wheelbarrow and frog races, prizes, \$2 and \$1; potato race, \$2 and \$1; three-legged race, \$1 and \$2; egg and spoon race, \$1 and seventy-five cents.

At the speakers' stand in the city square there will be a pie eating contest, prizes, \$1 and seventy-five cents; bun eating, \$1 and seventy-five cents; flour and penny contests, total prizes, \$5.

At Lake Emersoff two poles will be extended out over the water twenty-five or thirty feet. All who walk to the end of either pole without falling into the water will be well rewarded. This sport will be continued until just before the fireworks display.

The Belmont sisters will give two balloon ascensions, one in the afternoon and the other early in the evening, with parachute drops.

Following the fireworks display there will be a ball at Braastad's hall, conducted by the Owl club. Traub's complete orchestra will furnish the music.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Take a look in our big show window. Every article shown there is on sale on second floor, F. Braastad & Co.

"What shall we have for breakfast?"
"Why Cudaly's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year."

Everything will be done to make the event one of the most enjoyable ever held by the Sons.

NEW BOOKS AT LIBRARY.

The following publications were last week placed on the shelves of the Carnegie library:

Douglas—Helen Grant at Aldred House.
Barbour—Four Afoot.
Smith—Bog Knight's Diary Camping Out.
Raymond—A Sunny Little Lass.
Wesselhoff—High School Days at Harbortown.

Taggart—Six Girls and Bob.
Johnston—Asa Holmes.
Pyle—Stolen Treasures.
Plummer—Roy & Ray in Mexico.
Chase—Children of History.
Ridout—Siamese Cat.
Couch—Poison Island.
Williamson—Princess Virginia.
Oxenham—The Long Road.
Hall—Who's Who in 1907.
Hess—Peer Gynt.
Hess—Brand.

Rotwell—Mineral Industry. (4 vols.)
Williams—Sjournings, Shopping and Studying in Paris.
Fink—New Century Speaker.
Folles—Mica and Mica Industry.
Johnston—Godless of Reason.
Howard—Musings and Memories.
Howard—Michigan State Gazetteer for 1907 and 1908.

Special prices made on bunting to parties buying in large quantities at Braastad's. (7-1-31)

AIDS BALL TEAM.

Manager C. C. Mitchell of the Gately store received a letter from John Gately Saturday, commending him on the success of the Gately baseball team, which has won ten out of eleven games played this season, also enclosing a check for the boys. Mr. Gately is a lover of baseball and he writes that a number of the firm's stores throughout the country have fine teams. He expressed the wish that he could get them all together to play a series of games to determine the championship. The team at Saginaw is said to be exceptionally strong this season.

See our big stock of July 4th decorations on second floor, at Braastad's.

Father says: "Say, Mother; can't you make us some more of those fine doughnuts if I will bring home a pair of Cudaly's Peacock Lard again?" (11-27-e-o-d)

BIG YEAR AT LIBRARY.

During the first five months of this year the number of books drawn from the Carnegie Library exceeded 4,000 a month, but June will fall below the 4,000 mark, though the increase over last June is already more than 700. This year will make a record in the number of books circulated. June, July and August are usually the slowest months of the year in the library. A recent addition to the reference department of much value is a set of the Armour Institute's books on "Modern Shop Practice."

TAKE THE POSTMASTER'S WORD FOR IT.

Mr. F. M. Hamilton, postmaster at Cherryvale, Ind., keeps also a stock of general merchandise and patent medicines. He says: "Chamberlain's Colic, Cholera and Diarrhoea Remedy is standard here in its line. It never fails to give satisfaction and we could hardly afford to be without it." For sale by The Stafford Drug Co.

ISHPEMING

ART OBJECTS IN "DU BARRY."

Rare Ornaments Used in Stage Settings of the Production.

Just before "Du Barry" the play in which Mrs. Leslie-Carter has so signally triumphed...

As three of these objects have great historical as well as intrinsic value a description will prove interesting.

It is probably carrying realism to a fine point when such rare historical objects are actually brought into use in a stage production...

Largest stock of fancy bunting and flags carried in the county at Braastad's.

ISHPEMING IN BRIEF.

W. R. Burns of Munising was an Ishpeiming visitor Saturday.

Percy Francis is home from the Chicago University, to spend his summer vacation.

Miss Agnes Clifton, employed in the Carnegie library, is off on her annual vacation.

Many Ishpeiming people will entertain relatives or friends from out-of-town on the Fourth.

Miss Grace E. Murphy of Baraga visited friends in Ishpeiming Friday, on her way to Chicago.

Andrew Fandren, former city marshal, is preparing to leave on a visit to his old home in Sweden.

George A. Newett and son Will participated in a golf tournament at Iron Mountain Saturday.

The Chicago & Northwestern Railway company has broken ground for a side track between Main and Pine streets.

Charles Johnson and family are here from Milwaukee on a visit to relatives. They moved to Milwaukee three or four years ago.

Andred Talo, John Niemi and Matt Vanhala left yesterday for Lake Independence, where they will fish until tomorrow or Wednesday.

William P. Belden and family, and Mrs. A. E. Burlingame, mother of Mrs. Belden, will spend the next three weeks with relatives at Grand Rapids, Mich.

Charles Olson, engaged in the saloon business in the Nolan block, Cleveland avenue, submitted to an operation for appendicitis the latter part of last week.

The Cleveland-Cliffs Iron company's main machine shop, East Division street, is being provided with a concrete floor. Mitchell & Sherman are doing the work.

John N. Booth, a former employe of The Mining Journal in this city, is now instructor in English and history at the Michigan Military academy at Orchard Lake.

Miss Maria Thompson is home on a visit to her parents, Mr. and Mrs. Nels Thompson. She was recently graduated as a trained nurse from Luther hospital, St. Paul.

The big band wagon did not go to Negaunee Saturday evening, the storm having prevented the turnout, but it will go over this evening, giving the Negaunee people a serenade.

A. C. Braastad, chairman of the automobile committee for the Fourth of July parade, will today send invitations to all the auto owners of Ishpeiming, Negaunee, Palmer and Beacon, to participate in the parade on the Fourth.

The Consolidated Fuel & Lumber company has given Mitchell & Sherman a contract to lay a concrete walk along the west side of its wood yard on North Third street, connecting with the walk being laid at the Swedish Baptist church property.

Ambrose tent of the Maccoobees was well represented at divine services yesterday morning at Calvary Baptist church, and again in the afternoon, when the graves of the departed members were decorated. The City band furnished the music.

T. J. Dundon and family are to occupy the George dwelling on North First street, the N. M. Nelson house on Fourth street, which they have occupied for a number of years, having recently been sold to James Hansen of Negaunee, whose family is to reside there.

Mrs. L. E. Bailey of Stanton Island, N. Y., who spoke last evening at the Salvation Methodist church, will be heard again this evening on the temperance question at the Salvation Army barracks. The lecture will be free, but a collection will be taken up.

Braastad's windows, which are most attractively decorated for the Fourth, were the means of bringing hundreds of people to the store Saturday evening. For nearly two hours during the early part of the evening the sidewalk was

crowded with people looking at the displays in the dry goods and men's furnishing goods windows.

Special rates of fare will be granted by the South Shore to parties from points west of here desiring to attend the production of "Du Barry," by Mrs. Leslie-Carter and her company at Ishpeiming theater Friday evening.

Gordon St. Clair of this city, who recently completed a course in the medical department of the Michigan University, will take the Minnesota examination, which will be necessary before he can practice in that state.

The Pythian cup captured by Ishpeiming, in the contest of upper peninsula teams at Hancock last week, is on exhibition at Anderson & Co.'s jewelry store, together with a large shield of flowers, in the center of which is the society's emblem worked in colors, presented to the team by the Hancock lodge.

The pavilion dance at Cleveland Park Friday evening was attended by several hundred young people of Ishpeiming and Negaunee. The next hop will be given Wednesday evening, the change in date being due to the engagement of Mrs. Leslie Carter and her company at the Ishpeiming theater.

The main window in Sellwood & Co.'s dry goods store is appropriately decorated for the Fourth. In the center is the Goddess of Liberty. On one side is a picture of George Washington, while on the other there is a picture showing the signing of the Declaration of Independence. Above the goddess is an illuminated American flag.

The honorary members of Company I, Michigan National Guard, met Thursday evening and perfected a permanent organization. Dr. Vivian Vandevanter is president; Charles J. Shadick, secretary and treasurer, and W. H. Moulton, auditor. There are 104 charter members.

Peter Fitzpatrick, who was recently appointed to the position of factory inspector of the upper peninsula, will spend the next two weeks in the lower peninsula receiving instructions as to his duties. The office is not a new one, as previously stated, but was created some years ago. Mr. Fitzpatrick will succeed Inspector Kerr of Calumet, who held the office for four years past.

Japanese Porch Shades in all sizes at Braastad's.

FROM HOPKINS' CURB LETTER.

"Lawson is understood to be at the head of a bull party in stocks, and particularly coppers, Biscue advises that both the Briggs and Hoatson shafts are now down to the 1,200-foot level, stations have been cut and lateral openings are now under way. It will be remembered that when Superior & Pittsburg was advanced from 20 to 29 1/2 it was on the strength of encountering a big ore body on the 1,100-foot level. Later developments proved that they were just striking the top of this body, and it was decided to sink another 100 feet and drift for this big deposit. This is the work that it now under way, and we believe it is but a question of days until they get the ore."

Saturday's prevailing prices were:

Table with columns: Bid, Asked, American, Warren, Shattuck, Nipissing, Denn Mining, Davis Daily, Superior & Pittsburg, Globe Cons, Columbus Cons, Superior, Silver Leaf, Silver Queen, Foster, Atlati, Butte & London, Butte Exploration, Black Mountain, East Butte, Keweenaw, Hancock, Superior & Boston, Calumet & Globe, Calumet & Montana, North Butte Extension, Boston Ely, Caribee, Vandevanter, Comanche, Nevada-Utah, Helvelin, McKinley, Cumberland Ely, Raven, Troy-Man, Utah-Apex, Wolverine & Arizona, Old Hundred, National Mining, Carpent, Ely Cons, Carissa.

Five thousand yards of fancy decorating bunting for sale at Braastad's.

MARQUETTE & SOUTHEASTERN RY.

Sunday, June 9th, the summer schedule of the M. & S. E. Ry. goes into effect. Sunday trains will leave Marquette for Princeton and Munising at 8:45 a. m. and 6:20 p. m.

Sunday trains will arrive from Princeton and Munising 10:10 a. m. and 8:10 p. m. From Negaunee and Ishpeiming, 8:35 a. m. and 6:10 p. m. From Birch and Big Bay, 7:20 p. m.

Week day trains No. 10 leaves Marquette for Munising and Princeton 6:45 a. m.; No. 31 for Birch and Big Bay 8:50 a. m.; No. 11 for Negaunee and Ishpeiming 9:00 a. m.; No. 4 for Munising and Princeton 5:35 p. m.

Week day trains arrive at Marquette No. 1 from Princeton and Munising 8:45 a. m.; No. 32 from Big Bay and Birch, 4:50 p. m.; No. 11 from Munising and Princeton 7:30 p. m.

Sunday Excursion Rates—Negaunee or Ishpeiming and return, \$.50 M. & S. E. Ry. stations and return, .75 Munising Ry. stations and return, .10 Tickets on sale for No. 4 of Saturday, No. 6, 8 and 43 of Sunday, good to return Sunday or Monday.

BUTTE & LONDON.

Montana Paper Comments Favorably on Location of the Property.

That the holdings of the Butte & London Copper Development company are fortunately situated west of the great continental fault, which may be traced from the hills east of the east line of the Amazon-Butte properties, all the way up to and somewhat east of the east side of the Butte & London and the Butte Copper Exploration company's properties, is being more strongly demonstrated every day.

In places this continental fault is more than 100 feet wide, and according to men who have made a study of the Butte vein system, it constitutes a barrier to the extension of the vein, in other words the veins become lost after reaching the fault. That the Butte & London property, however, has the same veins as the Butte mines to the west of it, there is no doubt.

It is reported that North Butte interests have been surveying the Ironclad, Michigan, Third Sphinx, Valley Queen and Mahoning Valley claims and have probably by this time closed a deal for the purchase of the same.

Directors of the Newhouse Mines & Smelters (Cactus mine) met on July 5, when they will probably vote to place the stock upon a 22 per cent dividend basis, according to Butte advices.

The Butte & London shaft is now down more than 1,000 feet and splendid progress is being made every month. A station will be cut at the 1,200-foot level. On the 800-foot level a pump station has been constructed and one of the best pumps in the camp has been installed.

The new pump, however, is only in keeping with the rest of the Butte & London operation, in that the company has already expended nearly \$100,000 and in which it has succeeded in assembling one of the finest equipments in Butte. It has been built with a view to rapid sinking as well as to being able to handle immense tonnage when the development outlines shall produce it.

In sinking the shaft a number of stringers and some very promising veins have been cut, some of the indications being so flattering that several propositions have been made by experienced miners to take a lease on certain levels of the property. These have all been refused, however, it being the intention of the company to do no exploring until the 1,500-foot level shall have been reached.

The annual report of the Butte & London company, issued about two months ago, shows that it has about \$250,000 cash in the treasury, besides 180,000 shares of the capital stock available for development purposes. The company has no indebtedness, and owns its real estate and plant outright.

The company's splendid financial condition, together with its excellent management augurs well for the future and guarantees thorough development of the property. It is the aim of those in charge of affairs of the company to accomplish such an amount of work and such startling results during the next fiscal year that the next annual statement will show the company to be on a dividend paying basis.

UTAH-APEX.

The assertion is made that the Utah-Apex Mining company is now upon an

earning basis of about \$75,000 per month. It is shipping 100 tons of ore per day direct to the smelter and 200 tons per day to its mill. It is prepared to ship 500 tons of ore per day, it is said, and its tramway has a capacity for handling such a tonnage, but at the present time every ton of its ore has to be teamed from the tramway, and 300 tons per day is about the present limit of the teaming ability.

The management is now running an incline to connect the Andy with the Parvaneu tunnel, a distance of 300 feet. Over \$500,000 in cash has to date been expended on the Utah-Apex properties in present outstanding \$2,700,000 capital development and equipment. Of the (\$400,000) \$2,900,000 of stock was originally given in exchange for the properties.

NOTES OF COPPER NEWS.

It is reported that North Butte interests have been surveying the Ironclad, Michigan, Third Sphinx, Valley Queen and Mahoning Valley claims and have probably by this time closed a deal for the purchase of the same.

Directors of the Newhouse Mines & Smelters (Cactus mine) met on July 5, when they will probably vote to place the stock upon a 22 per cent dividend basis, according to Butte advices.

The Butte & London shaft is now down more than 1,000 feet and splendid progress is being made every month. A station will be cut at the 1,200-foot level. On the 800-foot level a pump station has been constructed and one of the best pumps in the camp has been installed.

The new pump, however, is only in keeping with the rest of the Butte & London operation, in that the company has already expended nearly \$100,000 and in which it has succeeded in assembling one of the finest equipments in Butte. It has been built with a view to rapid sinking as well as to being able to handle immense tonnage when the development outlines shall produce it.

In sinking the shaft a number of stringers and some very promising veins have been cut, some of the indications being so flattering that several propositions have been made by experienced miners to take a lease on certain levels of the property. These have all been refused, however, it being the intention of the company to do no exploring until the 1,500-foot level shall have been reached.

The annual report of the Butte & London company, issued about two months ago, shows that it has about \$250,000 cash in the treasury, besides 180,000 shares of the capital stock available for development purposes. The company has no indebtedness, and owns its real estate and plant outright.

The company's splendid financial condition, together with its excellent management augurs well for the future and guarantees thorough development of the property. It is the aim of those in charge of affairs of the company to accomplish such an amount of work and such startling results during the next fiscal year that the next annual statement will show the company to be on a dividend paying basis.

EARLY MORNING BLAZE.

House Recently Bought by John Rock Badly Damaged Saturday.

Fire almost completely destroyed the East Main street dwelling which John Rock recently purchased from William Neely at an early hour Saturday morning. The fire had a good start before it was discovered, and when the firemen arrived the entire portion of the structure was in flames. The interior was being overhauled and the family had planned to move in within a few days. Mr. Rock and two carmen worked there Friday, leaving at 6:30, and Mrs. Rock spent the evening there, cleaning up some of the rooms that had been papered during the day. The fire started in the rear of the house near the base of the chimney, the greater part of the damage was in the upper story, the roof being completely destroyed. How the fire started is a mystery, but it is suspected that it was of an incendiary origin. Mr. Rock and the carpenters did not use any light in the building and Mrs. Rock left before dark.

The building was insured for \$1,000 by the Germania company, represented by C. H. Jennings. It was at first supposed that there was a vacancy clause in the policy, but Mr. Jennings said Saturday that such was not the case and that Mr. Rock will receive the full amount allowed by the adjusters, who are expected here today or tomorrow. The Rock family may be considerably inconvenienced by the fire, as they will perhaps be compelled to leave their present home before the one damaged Saturday morning can be repaired. Mr. Rock has not yet sold his house on the new high school site, but a deal is pending and he expects to dispose of it soon.

WAS DRIVING TOO FAST.

Negaunee Man Falls From Gig and Is Instantly Killed.

John Kupala, a well-known Finnish driver of Negaunee, was thrown from a gig Saturday evening, his head striking a fence post at the corner of the street leading east from the main road near Captain Ponglase's residence above the brewery, causing instant death. The skull was badly fractured and when some men who witnessed the accident reached Kupala he was dead. The driver of the unfortunate man was driving as fast as a rapid gait and in turning the corner Kupala lost his balance and was suddenly thrown from the seat. Coroner Prin was called over from Ishpeming and he empaneled a jury which viewed the remains at the undertaker Dave's morgue, adjourning until tomorrow, when the inquest will be conducted at Justice Veran's office. The deceased was twenty-seven years of age and he is survived by his widow and two children, residing at the Buffalo location. They formerly lived in the city proper, having recently moved to the Buffalo. The Finnish tent of the Macebees, to which the deceased belonged, held a special meeting last evening to complete arrangements for the funeral, which will be held tomorrow afternoon.

NEW ROAD NEEDED.

Council Will Be Asked to Make Extension Improvement Near Quen Mine.

The surface undermined by the Blue property on the highway north of the Chicago & Northwestern tracks has settled so much during the past few weeks that the road has been abandoned. Teams now have to pass through the tunnel beneath the Lake Superior & Ishpeming tracks, north of the mine. The opening is so small that the farmers will not be able to bring their loads of hay through it, and as the time is not far distant when they will be coming to the city with their hay and other produce they want a new section of road put in. A petition will probably be sent to the council at its July meeting, asking that the matter be given immediate attention. Some members of the street and highway committee have looked over the thoroughfare with a view of making recommendations at the meeting next week.

A Negaunee farmer, who wants the improvement made, yesterday said that he looked over the ground thoroughly and that it will be necessary to extend the road south of the Northwestern tracks for about three-fourths of a mile, connecting with the county road near the Mary Charlotte property. The improvement, he said, will be expensive, but is absolutely necessary.

A MACHINE FOR WOMEN

Should be the best obtainable. The Singer and Wheeler & Wilson sewing machines are acknowledged the lightest running, most durable and convenient of any. Look for the Red S. Singer Sewing Machine Co., Marquette, 108 N. Third St.; Ishpeming, 130 S. Main St.; Negaunee, Iron St.; Hancock, 503 Reservation St.; Calumet, 423 N. Fifth St.; Escanaba, 713 Livingston St.; Iron Mountain, 205 E. Houghton St.; Sault Ste. Marie, 116 Ashmun St.

BOWLING SCORES.

Totals	287	329	330	946

RECORD BREAKING PRICE.

Negaunee people now have to pay fifty-five cents per bushel for oats and \$25 per ton for the best quality of hay. This is the highest figure that oats have sold at in many years, and the price of hay is the highest charged here since the early eighties. Even at the advanced prices the dealers are having great difficulty supplying the wants of their patrons, as hay and oats are scarce. C. A. Comstock, the liveryman, recently purchased a carload of hay and oats from a Green Bay concern, making part payment on the deal. He received a message from the first Saturday advising that the order could not be filled. This was considerable of a disappointment to Mr. Comstock as he not only wanted the hay and oats, but he figured making good money on the deal.

SCHOOL PLANS DELAYED.

J. D. Chubb, the Chicago architect, has advised the school board that the plans for the new high school building will not be completed for several days. When Mr. Chubb secured the contract he expected to deliver the plans early in June, but he has had an unusual rush of work in his office and hence he writes that he desires to complete them in every detail, so that no additions or alterations will be necessary after the contract is awarded. As the board does not expect to have the new building ready for occupancy until next year the architect will not be asked to rush the work.

LOCAL LAONICUS.

The stores of Negaunee will remain open until noon on the Fourth.

Miss Mildred O'Connor left Thursday night for her home at Coleraine, Minn.

Mrs. Thomas Moriarity of Ecleth, Minn., is in the city visiting her sister, Mrs. D. McDonald.

The Misses Claire and Ruth Miller returned Saturday from a two weeks' visit with relatives at Escanaba.

P. H. Connell, a former resident of Ishpeming, now located at Escanaba, was a Negaunee visitor Saturday.

Mrs. Arthur Odgers left yesterday for a place near Ontario, Canada, to join her husband, who is engaged in diamond drill work.

The Consolidated Fuel & Lumber company has an advertisement relative to interest of the public.

The one-year-old son of Peter Dugas of Little Lake died Saturday. The funeral will be held here this morning, with services at St. Paul's church.

Ishpeming's big band wagon did not visit Negaunee Saturday evening on account of the storm, and it will be over tonight if the weather is favorable.

In his advertisement in this issue, J. E. O'Donoghue announces his soda menu, which furnishes a large variety of drinks, ice cream sodas and sundae.

Lawrence Gullstrom who has been spending the last two years with his grandparents, Mr. and Mrs. Chas. Thoren, Sr., has left for his home in Wilton, N. D.

Arrangements have been completed for the appearance at the Mitchell Methodist church on the evening of July 10 of the Griffin Troubadours, composed of five persons, including Miss Emily Murray, reader, and an orchestra of four pieces, two violins, flute and harp. The company

gave an entertainment here last year, giving good satisfaction. The tickets will be twenty-five and thirty-five cents.

Children's day exercises were conducted yesterday morning at the Presbyterian church. The auditorium was attractively decorated by the members of the Bible class.

Charles Johnson is now the owner of the Beaumont house on Gold street, having purchased the property from Mrs. August Olson. The building is one of the oldest places used for hotel purposes in the city.

The cornice has been removed from the top of the bank building, which is being overhauled by A. P. Wilson, the Marquette contractor. A fence has been placed around the walk, keeping pedestrians away from the building.

James Hanson has purchased the N. M. Nelson dwelling at 506 North Fourth street, east of the High street school, Ishpeming, and will move his family to that city as soon as T. J. Dudson and family, who now occupy the house, vacate it.

Following are the newly elected officers of the S. H. L. E. F. of A. No. 8: Past president, Ole Erickson; president, Peter Lof; vice president, Chas. Kranberg; recording secretary, Titus Thoren; financial secretary, Oliver Johnson; treasurer, Chas. Thoren, Sr.; marshal, Fred Strandberg; chaplain, Anthony Seagren; inside watch, Axel Osterberg; outside watch, Chas. Freidlund; trustee, T. A. Thoren.

WEEKLY EXCURSIONS TO DETROIT AND RETURN \$13.50

Via the South Shore, leaving on early morning train on Saturday. Same rate to Alpena, Oscoda, Harbor Beach and Port Huron. To Buffalo \$3.50 higher. Limit September 15th, 1907. For sleeping car and steamer reservation apply to ticket agents. (6-22-07)

FOR SALE—A family driving horse, weight about 1500 pounds, not afraid of automobiles or trains; strictly a well broken family driving horse. Apply, A. F. Maitland. 6-25-07

NEGAUNEE, MICHIGAN.

CAMPAIGN FOR PURE MILK. GREAT INTEREST IN WORK OF THE GOVERNMENT.

Impure Milk Shown to Be the Cause of Much Sickness During the Summer—Movements for Reform Opposed by Dealers Who Are Indifferent to Hygienic Requirements—Large Per Cent of Output Is Below Standard—Special Committee Reports on Conditions and Makes Suggestion.

Washington, June 30.—Widespread interest has been aroused in the government's campaign in favor of a pure milk supply for all the cities of the country. After a thorough investigation the department of agriculture, which is conducting this campaign, has sent broadcast through the country a report on the sanitary relations of the milk supply that should prove helpful to any municipality now wrestling with the problem of securing for its citizens an adequate supply of pure milk.

CAUSE OF 'QUAKES.

Leaking of the Ocean, Says Astronomer See. Cities Along the Coasts Where the Water Is the Deepest Are in the Most Danger—The Pacific More Susceptible Than the Atlantic.

Montgomery City, Mo., June 30.—The astronomer, Dr. Thomas Jefferson Jackson See of the United States naval observatory at Mare Island, Cal., who is in the city visiting his old boyhood home, gave out for publication here today that at one time he has now discovered that the one common cause of the six great classes of natural phenomena—the secular leakage of the ocean bottom, which gives rise to the development of steam beneath the earth's crust, owing to the earth's internal heat. He also points out that the chief danger of these agitations is along the seacoast, and while they serve a useful purpose it is well to be prepared for their visitation, to prevent great destruction of life and property, as has often happened owing to lack of understanding of natural laws.

LADY OFFICERS.

There are eight women colonels of the German army, who draw salaries regularly, and the salaries regularly. Although there are many royal ladies who are holding honorary commissions in the several European armies, there is only one woman in the world who holds the title of honorary admiral—her majesty the queen of Greece. She was this rank to the Tsar Alexander III, who conferred it upon her—The Regiment.

NOTICE.

To the Qualified Electors of the Republic Township School District, in Marquette County, Michigan: Notice is hereby given that the following preamble and resolution was duly adopted by an unanimous vote of the Board of Education of said school district at a meeting of said board, held pursuant to a regular call therefor, in the said Township on Tuesday, the 18th day of June, A. D. 1907, viz:

A Cause of Much Sickness.

Its conclusions show that impure milk is the cause of a great deal of sickness every summer in many cities; the committee recommends the establishment of a pasteurizing plant for the district, as the best means of securing a pure milk supply for the citizens of the national capital. What is true of Washington, the committee declares is in greater or less degree true of every city in the country so that its conclusions have a national instead of a merely local interest. The committee confesses to a feeling of amazement that the people do not improve the purity of such an invaluable article of food should be promptly opposed by the milk industry, which apparently considers it meddling interference with the trade.

Diseases Through Milk.

Attention is called to the fact that painstaking investigations extending over a long period of years have shown that certain diseases in the animal can be communicated through the medium of the milk. Especially is this true of tuberculosis, foot-and-mouth disease, anthrax and cowpox. It has also been shown that diseases such as garget, gastro-enteritis and septic fevers in the cow will render the milk poisonous to man. Animals which have been fed on poisonous forest plants or have been treated with strong medicaments have been shown to be diseased from producing a pure or sound milk. Various medical journals during the last twenty-five years have published the histories of 157 epidemics of typhoid fever, 99 of scarlet fever and 36 of diphtheria, all traceable to the milk supply. Eighty-five of 866 cases of typhoid fever in the District of Columbia have been traced by the United States public health and marine hospital service to the use of infected milk. Statistics show that in the district about one-fourth and in the country at large about one-sixth of all the children born perish before they are a year old; that nearly one-half of the deaths of children under one year of age are caused by gastro-enteric diseases and that of the 54,047 infantile deaths which have been investigated at home and abroad with reference to feeding, 80.6 were found to have been artificially fed. All of which the committee desires points to the fact, with more than mere suspicion, that the morbid agent is introduced into the body with the food—cow's milk. Nor is Washington the only city that suffers from impure milk.

Adjacent Bottom Sinks.

"The land is often uplifted by earthquakes and the adjacent sea bottom sinks, as shown by the accompanying seismic waves, which means that lava is being expelled from beneath the sea, and under the adjacent land. All the great mountain chains have been formed by this process, and hence the exact parallelism to the seashore, known to every schoolboy, but not heretofore understood by geologists. So long as we did not know the cause of mountain formation, or erroneously attributed it to the secular cooling of the earth, we could not make any advance in the analysis of earthquake causes. But now that world-shaking earthquakes are proved to be due to the leakage of the ocean bed necessarily resulting from the great depth and pressure of the water upon it, we are in a position to make progress.

Notice.

To the Qualified Electors of the Republic Township School District, in Marquette County, Michigan: Notice is hereby given that the following preamble and resolution was duly adopted by an unanimous vote of the Board of Education of said school district at a meeting of said board, held pursuant to a regular call therefor, in the said Township on Tuesday, the 18th day of June, A. D. 1907, viz:

Adjacent Bottom Sinks.

"The land is often uplifted by earthquakes and the adjacent sea bottom sinks, as shown by the accompanying seismic waves, which means that lava is being expelled from beneath the sea, and under the adjacent land. All the great mountain chains have been formed by this process, and hence the exact parallelism to the seashore, known to every schoolboy, but not heretofore understood by geologists. So long as we did not know the cause of mountain formation, or erroneously attributed it to the secular cooling of the earth, we could not make any advance in the analysis of earthquake causes. But now that world-shaking earthquakes are proved to be due to the leakage of the ocean bed necessarily resulting from the great depth and pressure of the water upon it, we are in a position to make progress.

Dairies Equipped with Sanitary Buildings, a Pure Water Supply, Healthy, Well-fed and Well-cared for Cows, a Well equipped and well kept milk room, provisions for thorough cleanliness, intelligent and conscientious people in charge and clean methods throughout, are enumerated by the committee as conditions necessary to the securing of pure, natural milk.

Milk Should Be Kept Cool.

Careful experiments have demonstrated the necessity of cooling the milk and keeping it at a temperature below fifty degrees F., except as may be necessary in the process of pasteurization or sterilization, until the milk is delivered to the consumer. Fresh milk contains very few germs; the majority gain access during handling, especially when the milking is done in a dusty stable. These germs multiply with astonishing rapidity whenever the temperature of the milk is above fifty degrees F. Of course, to reduce the temperature of milk in the summer to fifty degrees necessitates the use of ice, which in turn results in a slight increase in the cost. This should not operate, in the opinion of the investigators, to prevent pure milk legislation for the reason that clean milk is a necessity and that a pure milk supply will reduce infant sickness and fatalities at least 40 per cent.

Leakage Very Slow.

"Dr. See said that the leakage of the ocean, which gives rise to the development of steam within the earth, is very slow, as the water has to work down through over ten miles of solid rock like granite. "No other great earthquake is therefore to be expected at San Francisco during this generation; in fact, it will be fifty, and perhaps 100 years, before the subterranean stress becomes powerful enough to shake the earth again in a violent manner. San Francisco is therefore safe and rapidly rebuilding. Other towns on the Pacific coast, however, ought to take warning from experience, and be prepared for any emergency which may arise.

Large Quantity Below Standard.

Of 327 samples of milk bought in Washington during the last few months and examined at the bureau of chemistry of the department of agriculture, fifty-six or something over 17 per cent had been skimmed or watered, and of ninety-six samples of cream 38 or nearly 40 per cent were found below the standard required by law. Records of the health department of the District of Columbia show that during the past five years out of 28,859 samples of milk examined 6801, or more than 23 per cent were below the fixed standard and in 1305 instances prosecution for the sale of adulterated milk was presented in the courts.

Old Post to Be Abandoned.

Fort Assiniboine, Montana, Said to Be No Longer Useful. Washington, June 30.—The gradual abandonment of Fort Assiniboine, Montana, as an army post, is contemplated by the war department. This is one of the oldest posts in the United States, having been constructed in 1877, and is on the Northwestern frontier, being under the supervision of the commanding officer of the department of Dakota. Its greatest usefulness as an army post existed during the Indian campaigns. The department needs the men now required to maintain that post, as many of the other barrack posts are only partially filled. As a preliminary step, Captain John J. Boniface of the Second Cavalry, was yesterday relieved of duty as constructing quartermaster at Fort Assiniboine and directed to turn over the property for which he is accountable to First Lieutenant Howard G. Daniels.

Atlantic Is Shallow.

"Our eastern coast is bordered by a shallow sea, and earthquakes are not frequent in that region. The Pacific is the deepest of the oceans, and is surrounded by the great earthquake belts; but the worst disturbances occur in South America, Japan and the Aleutian Islands, and not in our own country." Professor See said that the theory of earthquakes which he had developed had been vaguely outlined by Aristotle and Plato among the Greeks, but they were unable to establish it so early a date; yet they ascribed earthquakes to forces sustained within the earth, and endeavoring to escape and diffuse themselves in the atmosphere.

A MARQUETTE CASE.

Many More Like It in Marquette. The following case is but one of many similar occurring daily in Marquette. It is an easy matter to verify its correctness. Say, you cannot ask for better proof than such conclusive evidence.

Old Post to Be Abandoned.

Fort Assiniboine, Montana, Said to Be No Longer Useful. Washington, June 30.—The gradual abandonment of Fort Assiniboine, Montana, as an army post, is contemplated by the war department. This is one of the oldest posts in the United States, having been constructed in 1877, and is on the Northwestern frontier, being under the supervision of the commanding officer of the department of Dakota. Its greatest usefulness as an army post existed during the Indian campaigns. The department needs the men now required to maintain that post, as many of the other barrack posts are only partially filled. As a preliminary step, Captain John J. Boniface of the Second Cavalry, was yesterday relieved of duty as constructing quartermaster at Fort Assiniboine and directed to turn over the property for which he is accountable to First Lieutenant Howard G. Daniels.

Fireworks.
