

HAYWOOD TRIAL NEARING CLOSE

Accused Miners' Official Concludes His Testimony in His Own Behalf, Practically Ending the Case of the Defense.

Orchard's Evidence Is Confirmed by the Witness in Many Particulars, but Is Denied Emphatically Wherever It Connects the Western Federation With Crime—Throughout Is Rung a Note of Antagonism to the So-Called Capitalistic Class.

Boise, Idaho, July 12.—Van D. Haywood, the defendant charged with the murder of former Governor Frank Steiengberg, left the witness chair this afternoon. Haywood's testimony in his own behalf practically closes the side for the defense. One or two witnesses will be called tomorrow. The court for the defense will then announce their case, and the state will begin its rebuttal unless motions to strike out certain parts of the evidence should be brought forward by the defense. The court for the state today announced their willingness to abide by the instructions of the court to the jury, and will not occupy the time with arguments or motions to amend.

Haywood's Testimony. Much of Haywood's testimony today was a repetition in detail of what Moyr had said. However, however, made an effort to deny his knowledge of Orchard and his affairs or his connection with Jake Simpkins. Pressed closely as to the passage of telegrams relating to the engagement of counsel to defend Orchard, he admitted that he knew Simpkins had retained counsel, but that there was no record of any report from Simpkins to the officials of the Western Federation.

Like Moyr, Haywood had never heard of Orchard's threats against Steiengberg, though he had heard of Orchard's claim that he had lost his interest in the Hercules mine because of the trouble in the Cour d'Alenes. Haywood explained the draft for \$100 sent to Simpkins on Dec. 21, 1905, on the ground that Simpkins had left the money with him for safe keeping. He had no acknowledgment of the receipt of the money, and had not heard from Simpkins since that time. Haywood said that he never told Pettibone that he had sent any money to Simpkins.

Extols the Western Federation. Haywood in many particulars connected Orchard, but where Orchard connected Haywood or the Western Federation with crime, the witness was very emphatic and prompt in his denials. He showed no hesitation or desire to conceal the fact that Orchard had visited him at his house or that he, on different occasions, had intimate conversations with Orchard.

The witness denounced the administration of Colorado at the time of the troubles as corrupt, and he extolled the value of the Western Federation. Throughout Haywood rang the note of antagonism to what he calls the capitalistic class and his confirmed view that only by such methods as those followed by the Western Federation et al. the workingmen hope to control the situation.

DENEEN'S VOTE IS WANTED. Illinois Governor Urged to Meet With the Illinois Central Directorate.

Chicago, July 12.—Stuyvesant Fish, former president of the Illinois Central, has asked Governor Deneen of Illinois to attend a meeting of the directors of the road in New York next Wednesday. The governor, who is ex-officio a member of the board, has been informed that his services and his vote will be important to the faction on the directorate which opposed the efforts of E. H. Harriman to secure control of the road, in which opposition it then was unsuccessful.

UNWRITTEN LAW SAVES. Maryland Woman and Son and a Missouri Murderer Are Acquitted.

Lafayette, Md., July 12.—The jury in the trial of Mrs. Bowie and son Henry, for shooting Hubert Posey last January, today returned a verdict of acquittal, using out but five minutes. The woman and her son admitted that they shot Posey because he had ruined the defendant's daughter and sister.

St. Joseph, Mo., July 12.—Raymond Teson pleaded insanity and the unwritten law as his defense for killing George Mayhan, and the jury acquitted him today. He killed Mayhan in a grocery store last October.

BIG SHORTAGE REVEALED. Discrepancy of \$68,000 Found in Books of Public Official at Seattle.

Seattle, Wash., July 12.—The report submitted by the expert accountants who since May 8 last had been investigating the books in the department of the comptroller of currency of Seattle, holds former Comptroller Ripplinger accountable for a shortage of \$68,178. Ripplinger is said to be in Honduras.

STRIKERS USING DYNAMITE. Hotel In Transvaal Is Blown Up and Three Men Are Killed.

Johannesburg, July 12.—The dynamite attacks against the strike situation throughout the mining regions continue. The first fatality occurred today when Kirkloof's Hotel at Polokwane was blown up. Three men were killed and several injured.

DISSENSION IS GROWING. Friction Between German Catholics and the Vatican.

Berlin, July 12.—The resignation of Professor Sebastian Morle, dean of the Catholic theological faculty of the University of Munich, Bavaria, is attracting much attention because it is regarded as an indication of the growing friction between the German Catholics and the Vatican. His resignation is interpreted as being a protest against the letter which the pope wrote Bishop Comensal at Vienna, condemning in sharp terms the movement among the German Catholics to erect a monument to Professor Herman Schell, who died in 1906. Schell published books attempting to reconcile the Catholic theology with conclusions of modern science, but was practically forced under the papacy of the late Pope Leo to recant.

VEXATIOUS PROBLEMS SETTLED BY TAFT

AGREEMENT IS REACHED ENDING CONTROVERSIES WITH CHURCH IN THE PHILIPPINES.

Washington, July 12.—An agreement has been reached between the secretary of war and the representatives of the Catholic church in the Philippines regarding a number of important matters of controversy which will obviate the necessity of vexatious litigations.

Regarding landed properties the agreement provides that the Roman Catholic church through the archbishop of Manila shall possess in absolute title the land and property pertaining to the hospital of San Jose, the hospital of San Juan de Dios, the college of San Jose in Cavite and the college of Santa Isabella. These properties are valued at \$2,066,000. The church relinquishes all claims and demands upon the estate of Santa Potenciana and upon the hospital and foundation of Santa Lazaro, except that the archbishop is to retain possession of the block in which the present Santa Cruz cemetery is situated and of fifty hectares north of the hospital.

The Spanish Filipino bank dispute also was settled by an agreement by which all claims to exclusive privileges and to state issues beyond the amount approved by the American government are abandoned; but on the other hand, the bank receives confirmation without litigation and important privileges.

Havana Deeds Transferred. Havana, July 12.—The transfer of deeds to certain church property in Havana was formally effected today, Mgr. Aversa, the apostolic delegate to Cuba, receiving a treasury warrant for \$1,387,083. At the same time he agreed to extend the option of the government on the purchase of the church property at Santa Fe for twelve months. The church property consists of a number of buildings which have been occupied since 1901 for government purposes under lease.

TOLEDO JURIST IS DEAD.

Toledo, July 12.—Judge Richard Waite, a pioneer lawyer of this city, is dead, aged seventy-five. The deceased was a brother of Morris R. Waite, at one time chief justice of the United States.

MUST DO TIME IN CITY WORKHOUSE

TOLEDO LUMBERMEN AND BRIDGE AGENTS SENTENCED FOR VIOLATING ANTI-TRUST LAW.

Table, July 12.—Judge Morris today sentenced the brick dealers, lumbermen and bridge agents who either were convicted of violating the Valentine anti-trust or who pleaded guilty to infractions of the law. The brickmen must pay \$10,000 and costs each. The lumbermen and bridge agents are sentenced to serve six months in the workhouse and pay the costs. The sentences to ten days, owing to that institution now being quarantined against small-pox.

ENGINEER IS KILLED. Dies at Kalamazoo in Wreck He, Himself, Had Caused.

Kalamazoo, Mich., July 12.—A Grand Rapids and Indiana southbound passenger train ran into a work train here tonight, killing Thomas Hogan, of the work train crew, and injuring many passengers. Engineer Hogan ran past the station with the work train in attempt to make a side track before the passenger train arrived. The locomotives demolished each other, and led the track with wreckage.

OWES PATRONS \$100,000. Omaha Broker Caught on the Wrong Side of the Wheat Market.

Omaha, July 12.—The creditors of S. A. McWhorter, a grain broker, today asked for a receiver for his business. McWhorter is alleged to owe nearly \$100,000. Deeds were filed yesterday transferring property valued at \$45,000 to the First National bank to secure loans from that institution. At his office, it was stated that McWhorter has been caught in the recent bubble in wheat.

JAP ENVOYS AT OYSTER BAY

Admiral Baron Yamamoto and Ambassador Aoki Pay a Visit to the President, and the Meeting Is Notably Cordial.

Interview Is Most Satisfactory in Every Way, Says Statement Subsequently Issued, Affirming the Thoroughly Good Understanding Between the Two Governments and the Fundamental Friendliness Between the Nations—London Uneasy.

TOKI'S STAND MADE CLEAR.

Tokyo, July 12.—Viscount Hayashi, Japanese minister for foreign affairs, made the following statement in an interview today: "The governments at Washington and Tokio are conducting negotiations in perfect accord. Japan is availing herself of America's good will, and no hitch whatever is apprehended.

"Until the new treaty comes up for discussion, Japan has no right to agitate against the restriction of the number of her consulars. Her consulars at the present consists simply that Japanese be protected against provocation, but for the rest the American judicial authorities must be left to deal with the situation.

"My government does not look with suspicion upon the despatch of the American fleet to the Pacific. Since America is moving this fleet within her territorial waters, Japan can raise no objection."

GRAVE COMMENT AT LONDON.

London, July 12.—The weekly reviews comment gravely upon the Japanese-American situation. They express relief that immediate tension appears to have been relieved, but force it is not impossible in the more or less distant future that the same problem should confront Great Britain that now confronts the United States. The colonists of Australia, Africa and Canada are as anxious as the people of California to exclude the yellow races.

ANOTHER JAPANESE SPY DETECTED.

San Diego, July 12.—It is learned tonight from a trustworthy source that in addition to the Japanese detected in making sketches at Fort Rosecrans a few days ago, another was arrested in the fort today for having a blue print of the works in his possession. The latter Japanese was employed as a servant. He is a man of superior attainments. In his room was found a standard and work on engineering. The blueprint was well drawn and showed much technical skill, but was not quite completed.

DECLARATION OF WAR FIRST.

The Hague, July 12.—The first article of the French proposition that there shall be a declaration of war before the opening of hostilities, was adopted today by the sub-committee to which it had been referred. It was supported by the American, British and Japanese delegates. The amendment introduced by the Netherlands, proposing twenty-four hours' delay after a declaration of war before the outbreak of hostilities, was rejected.

MOORS LINE UP FOR BATTLE.

Tanger, July 12.—Sidi Mohammed Ghabus, minister for war, is concentrating a strong force around the present stronghold of the bank's Raisul, who recently was made a prisoner and who is being held at the residence of General Sir Henry MacLean. He is negotiating with our minister who fail to bring about the release of the general. The minister will at once make a determined and concerted attack upon the bandit.

BLAME FIXED FOR WRECK.

Lapare, Ind., July 12.—The Wabash railroad officials today found that an interlocking switch repair gang was responsible for the wrecking, June 21, at McJee of the Continental Limited, involving 200 lives. The train ran off a derailing switch into a ditch because the repairers had failed to advise the townman the derailing switch was open and detached from the tower apparatus.

WEATHER FORECAST

Washington, July 12.—The following is the weather bureau's forecast for Upper Michigan: Fair; Saturday; Sunday, partly cloudy; probably showers; variable winds.

WHERE THE EDUCATORS STAND.

Los Angeles, July 12.—The National Educational association concluded its labors today with the adoption of resolutions, the principal among which was the following: "Resolved, That it is the sense of this association that it is the duty of the teachers of this republic to at once enter upon a systematic course of instruction which shall embrace not only broader patriotism, but a more extended course of moral instruction, especially in regard to the rights and duties of citizenship, the right of property, and the security and sacredness of human life."

Second in importance to this was a resolution upon the subject of simplified spelling, endorsing the work of the simplified spelling board and directing the secretary of the association to adopt the shorter style of all the 300 selected words in the publications of the association. This was carried by the vote of 209 to 22, although it was claimed that many other than active members voted in the affirmative.

The resolutions further endorsed the efforts being made to increase the salaries of teachers, favored harmonizing the child and truancy laws and urged the states to provide for the education of every child, impressed upon educators that building of character was the real aim of the schools and deplored the tendency among children toward disregard for constituted authority and lack of respect for age and superior wisdom, urged the abolishment of secret societies, fraternities and sororities in schools, denouncing them as inimical to the interests of schools and pupils, declared for the merit system for the promotion of teachers and against political intrigue, and resolved strongly in favor of world peace and international arbitration.

BASEBALL STANDINGS OF THE CLUBS.

Table with columns for National League (W, L, P.C.) and American League (W, L, P.C.) listing teams like Chicago, New York, Pittsburgh, Philadelphia, Boston, Cincinnati, St. Louis.

TODAY'S GAMES.

National League: St. Louis at Boston; Pittsburgh at Brooklyn; Cincinnati at New York; Chicago at Philadelphia.

American League: New York at Detroit; Boston at Cleveland; Philadelphia at St. Louis.

GAMES PLAYED YESTERDAY.

National League: Philadelphia, July 12.—Brown allowed the locals only four hits. Summary: Philadelphia 000000000-0 4 2; Chicago 002000010-3 9 0.

American League: St. Louis, July 12.—Loose fielding and poor base running helped the locals to win. Summary: St. Louis 100002000-3 5 2; Cincinnati 000100010-2 4 3.

MAIL INNOVATION DECREED.

Washington, July 12.—Postmaster General Meyer today promulgated an order, effective Aug. 1, providing that the face of a postal card may be divided up a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for messages, etc., and the portion to the right for the address only. A very thin sheet of paper may be attached if it completely adheres to the card, and such poster may bear both writing and printing. Advertisements, illustrations or writing may appear on the back of the card and on the left third of the front.

BUGS BY THE MILLIONS.

Winona, Minn., July 12.—Green bugs descended on Winona this evening by the millions.

TRADE CIRCLES ARE OPTIMISTIC

With Midsummer Business Much More Active Than Seemed Possible a Month Ago, the Outlook Is Decidedly Cheerful.

Brisk Movement at Retail Is Rapidly Depleting Stocks, Collections Are Better, and Liberal Orders Are Placed for Fall and Winter Merchandise—Manufacturers Report Heavy Contracts Still on Hand, Notwithstanding a Record-Breaking Output.

GOLF CHAMPIONSHIP GOES TO THE EAST

TRAVERS AND GRAHAM, BOTH OF NEW JERSEY, WILL PLAY FOR THE NATIONAL TITLE.

Cleveland, July 12.—Two new New Jersey golfers—Jerome D. Travers, of Montclair, and Archie Graham, of the North Jersey club—will tomorrow play to decide the national amateur championship. In two rounds of eighteen holes each played today, Travers defeated Warren K. Wood, of the Home-wood club, of Chicago, and the present national title holder, E. M. Byers, of Pittsburg, while Graham took the measure of W. T. West, of Philadelphia, who had next to the lowest qualifying score of the tournament, and W. C. Fowkes, Jr., of Pittsburg, who in the morning round had disposed of Walter J. Travis, Travers is the decided favorite for the championship honors.

The chief surprise of the day's play was the defeat of Travis by Byers, who had been expected to win. Fowkes, Jr. Two years ago Fowkes defeated Travis at Wheaton, one up in nineteen holes, but Travis was expected to win today, as his golf has been consistently good. But he was decidedly off on his game just when he should not have been, and Fowkes beat him, although two extra holes had to be played before Fowkes could claim the victory.

In point of excellent golf, the match between Travers and Wood was by far the best of the tournament. Travers' sensational putting won the game for him. Time and time again he ran down long putts, and although Wood played golf that seemed perfect, as his medal score, 73 for eighteen holes testified, Travers' work was too much for him. Playing the same high class game in the afternoon, Travers won easily from the present champion, E. M. Byers, of Pittsburg, defeating him, six up five to play, the worst beating Byers ever received in a tournament.

WHIST TROPHY FOR CHICAGO.

Chicago, July 12.—After a two days struggle, the contest for the Minnesota is trophy in the American Whist league tournament was won tonight by Montgomery and Cohen, of the Chicago Duplicate Whist club. The winning team finished with a score of 12.4.

GASOLINE LAUNCH SWEEPED OVER DAM

SIX PERSONS OF A PARTY OF NINE DROWN IN A PENNSYLVANIA RIVER.

Jamestown, N. Y., July 12.—Six persons were drowned this evening near Russell, Pa., eleven miles south of here. Nine men and woman had taken a gasoline launch on the Conowingo river. The boat was swept over a dam, and six of the occupants of the launch were drowned. The dead were: John Best, wife and daughter of Warren, Pa.; Mrs. Baker, also of Warren, Pa.; and two traveling men, of Philadelphia.

NOT FOR VICE PRESIDENT.

Governor Hughes Would Not Accept Nomination for Second Place.

Albany, N. Y., July 12.—In framing up the Taft-Hughes ticket for the next national campaign the framers have reckoned without Governor Hughes. It can be stated on incontrovertible authority that Hughes has no intention of accepting the nomination for vice president. As a matter of cold fact Governor Hughes is in no sense of the word a seeker after public office. The only two offices for which he ever has been mentioned—those of mayor at New York city and governor of New York state—have sought him in circumstances which would Mr. Hughes accept the nomination for vice president. As a matter of cold fact Governor Hughes is in no sense of the word a seeker after public office. The only two offices for which he ever has been mentioned—those of mayor at New York city and governor of New York state—have sought him in circumstances which would Mr. Hughes accept the nomination for vice president.

KOREAN EMPEROR OUT?

Tokio, July 12.—The correspondent at Seoul, Korea, of the Jiji Shimpo, a journal that enjoys high reputation for the accuracy of its news service, telegraphs his paper saying that he believes the emperor of Korea has abdicated.

GOTCH DOWNS HIS TEACHER.

Wrestler Dan McLeod Is Thrown Three Times in Less Than an Hour.

Ottumwa, Ia., July 12.—Frank Gotch, champion wrestler, tonight won a handicap match from Dan McLeod, former champion. Gotch agreed to throw McLeod three times in one hour. Gotch won the first fall in 24 minutes, the second in 11:34 and the third in 07:28. McLeod tangled Gotch to wrestle when the latter was a farm boy.

GLIDDEN AUTOMOBILE TOUR.

Fifty Cars Reach Chicago and Are Still in the Race.

Chicago, July 12.—Of the seventy-four motor cars which started in the Glidden tour, an even fifty reached Chicago this afternoon and are still in the race, although several have been penalized and although continuing in the race have no chance to win the Glidden cup. The Buffalo and Pittsburg clubs are the only ones that have not been penalized, their score still standing at 1,000. The New York club follows with 9864.5, the Automobile club of America has 7467, Detroit 7357 and Chicago 657, a few points lower than Westchester. The fourth section of the tour will begin Monday. That night the tourists will stop at Indianapolis.

CHARGE RATE DISCRIMINATION.

Sioux Falls (S. D.) Shippers Complain to Commerce Commission.

Washington, July 12.—Another chapter in the railroad rate contest between Sioux Falls, S. D., and Sioux City, Ia., reached the interstate commerce commission today in the complaint of Jewett Bros. & Jewett, of Sioux Falls, against the Milwaukee and other North-western railroads. The complainants allege that the merchants and shippers of Sioux Falls are discriminated against by the railroads, and are compelled to pay higher freight rates than are other points in the Chicago territory. They assert they are heavy shippers from Chicago and Lake Michigan points generally, yet the rates given by the railroads to shippers in Sioux City, St. Joseph, Mo., and Kansas City from Chicago are materially lower than they are able to obtain.

It is alleged that on May 25, 1907, the railroads increased the rates to Sioux Falls from Chicago, and the shippers of that city were forced to go into court to obtain an injunction against the operation of the increased rates, pending a decision on the subject by the interstate commerce commission. The complainants request the commission to put into effect from Chicago to Sioux Falls the so-called Missouri River rates, which would serve to put that city on a rate equality with Sioux City, Omaha and Kansas City.

NOT FOR VICE PRESIDENT.

Governor Hughes Would Not Accept Nomination for Second Place.

Albany, N. Y., July 12.—In framing up the Taft-Hughes ticket for the next national campaign the framers have reckoned without Governor Hughes. It can be stated on incontrovertible authority that Hughes has no intention of accepting the nomination for vice president. As a matter of cold fact Governor Hughes is in no sense of the word a seeker after public office. The only two offices for which he ever has been mentioned—those of mayor at New York city and governor of New York state—have sought him in circumstances which would Mr. Hughes accept the nomination for vice president.

SHIPMAN DIES WHILE SWIMMING.

Annapolis, Md., July 12.—Stadshipman H. C. Phinney, of Manassas, N. H., was drowned today while under instructions in swimming with other members of his class. He entered the naval academy only four days ago. heroic efforts to rescue him were made by Midshipman Grafton and three, the former going down twice before relinquishing his hold upon his drowning classmate.

STRIKE MOVE THREATENED.

New York Telegraphers Notified to Hold Themselves in Readiness.

New York, July 12.—Announcement was made by the Commercial Telegraphers' union officials tonight that all the men here—2,600 in both the Western Union and Postal companies—have been notified by National Secretary-Treasurer Russell to hold themselves in readiness to go out at any moment. Tonight's announcement was given out by Charles P. McInerney, secretary-treasurer of local telegraphers' union. Everything depends on the success or failure of Labor Commissioner Neill in ending the trouble in San Francisco.

San Francisco, July 12.—United States Commissioner of Labor Neill arrived here today from Chicago for the purpose of investigating the telegraphers' strike.

NEGROES FIGHT FOR STATE CHARTER

Recognition Denied, "Improved Benevolent & Protective Order of the Elks of the World" Goes to Law in Kentucky.

Choice of the Title of the Colored Men's Organization Is Declared by the Secretary of the Commonwealth to Have Been Fraudulently Made With a Design to Imitate the Name of the Older and Popularly Known Order, and He Refuses Incorporation.

CHARGE RATE DISCRIMINATION.

Sioux Falls (S. D.) Shippers Complain to Commerce Commission.

Washington, July 12.—Another chapter in the railroad rate contest between Sioux Falls, S. D., and Sioux City, Ia., reached the interstate commerce commission today in the complaint of Jewett Bros. & Jewett, of Sioux Falls, against the Milwaukee and other North-western railroads. The complainants allege that the merchants and shippers of Sioux Falls are discriminated against by the railroads, and are compelled to pay higher freight rates than are other points in the Chicago territory. They assert they are heavy shippers from Chicago and Lake Michigan points generally, yet the rates given by the railroads to shippers in Sioux City, St. Joseph, Mo., and Kansas City from Chicago are materially lower than they are able to obtain.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains Assorted Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MARQUETTE, MICH., JULY 13.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

The repeal of the newly enacted law extending the season for spring shooting of aquatic game birds is another order of business to which the proposed special session of the legislature might give some time, to the credit of itself and the state.

A late Lansing dispatch quotes Attorney General Bird as expressing the opinion that circuit judges are not eligible for membership in the constitutional convention. He holds that there is a prohibition of their taking any part in the procedure of the proposed convention in article six, section nine of the constitution.

Speaking of defective bills, it will be recalled that there is some question whether Representative Gordon's measure regulating the saloon business in Marquette will carry out Mr. Gordon's evident intention. He is reported to hold that the bill will be found O.K. Some attorneys believe that it does not make it mandatory on the council to decrease the number of saloons to twenty-five. Presently we hope to have an authoritative opinion on the subject.

Now that the legislature is not in session the Michigan railroads can calmly admit that the times are not as bad with them as they might be. The report of earnings for May show an increase of \$606,688.03, or about 11.4 per cent. For the first five months of the year the increase is \$2,149,540.50, or 39.9 per cent. In individual cases the increase ranges from 5 per cent to 38 per cent. The new rate law does not yet apply and what effect the reduced fare will have on earnings is still a matter of conjecture. There is reason to believe, however, that the railroads will not be as hard hit as they wanted the legislature to believe they would be. In the meantime the railroads appear to be getting along very nicely.

The Michigan Bankers' association rendered Marquette due honor this week. In the first place it selected a Marquette man, L. G. Kaufman, for the first National Bank of the United States. Secondly, it accepted an invitation to visit Marquette on the occasion of the next annual gathering with a unanimous and enthusiastic vote. Mr. Kaufman has been an officer of the association the past few years, and has merited the promotion to the presidency by the live interest he has taken in the association's welfare and progress. As for the 1908 meeting, Marquette and the Marquette county bankers will make it one which will commend the wisdom of the association in deciding to come to this city and region.

In connection with the decision of the Michigan grand lodge of the A. O. U. W. to give up its charter, the Detroit Free Press remarks: "The average life of these fraternal insurance organizations has been only about five years in the past. The A. O. U. W. in Michigan far outlived this period, and even now those who wish to continue their payments can make them to the supreme lodge. The weakness shown by the fraternities that have gone by the board is not inherent, but is due to a failure to act upon safe, sound business principles. Time will wear out any such order if there is not an income that provides as it goes along for an increasing number of deaths. In this case there was a lack of such foresight. The order's records could not be considered as most desirable, because so many of its members were engaged in mechanical and industrial pursuits, which annually kill and injure more people in this country than were killed and wounded in the Russian war, and the attempts to cure the fatal defects were made only after it was too late."

The recently adjourned legislature has an unenviable record for botched bills. Reference has been made to the military bill, which was put through in such contradictory and unsatisfactory form that Governor Warner had to choose between vetoing it and throwing the military establishment of the state into chaos. He took the former course. Now we are told that the appropriation bill for the Mt. Pleasant Normal, though signed by the governor, was not passed by either house; that the institution cannot get a cent of its money for two

years, unless a special session of the legislature rectifies the oversight. There are also faults in the binder twine bill, and the attorney general's department is said to express a fear that other important measures may have been enacted in a bungling form. Evidently the state needs to add to its legislative establishment an expert bill drafter; a man who knows what English means and how to meet the legal requirements for an effective measure. Such an official could give the ideas of a member wishing to submit a bill and put them in shapely form, or else pass on bills already drawn, correcting their faults in phraseology and structure. It is a sad commentary on the collective intelligence of the legislature and the individual intelligence of the legislators to have so many of their bills found full of wordholes and loopholes, and that they failed to pass in a proper manner such a measure as the Mt. Pleasant Normal appropriation bill.

"Whitey" Peverette, the convict who escaped just as he was about to be turned over to Marquette prison officials by the Ionia officers, is a criminal with a bad and unique record. He was a member of the Lake Shore gang, one of the most dangerous and persistent coteries of bank and vault robbers that ever operated in lower Michigan. His prison record, as well as his career forerunning it, showed him to be a truly "bad" man, a hopeless criminal, defiant of all the rules society has established for its protection and defiant of the prison authorities. He has been in three Michigan prisons on his one term of fifteen years, having originally been sent to Jackson, whence he was transferred to Marquette as an inoperable. Twice he was sent to the Ionia asylum for the insane. In his second period of confinement there he escaped, to be retaken only a few weeks ago in Indiana. This Peverette is one of the men who it was alleged, in the heat of a not very remote political campaign, had been seriously mistreated at the Marquette prison. He was then, as he is now, an irredeemable type of man, who needs a stern control in prison, where he will finally land, for he will never be at home out of it. His escape was seemingly inexplicable, but was one of those things that is bound to occur every so often in handling convicts of a desperate and resourceful character. On account of the ease with which he can be identified—he is minus a left hand—he should be apprehended before he gets out of the upper peninsula. In any event he is bound to be retaken sooner or later, just as he was in Indiana some weeks ago.

**AWAITED WITH INTEREST.**  
In the state at large the opinion expected from the attorney general as to the eligibility of members of the legislature to seats in the constitutional convention is being awaited with interest, as there are many legislators who contemplate becoming candidates. The spirit of the constitution is undoubtedly that they are not eligible, but as is so often the case in matters of the kind the language, while more explicit than that in which circuit judges are prohibited from holding other office, does not exactly cover the case, but leaves grounds for a difference of opinion, though there are even members of the legislature who are quoted as being of the belief that not only would it be an impropriety for legislators to become candidates, but that they are clearly ineligible under the law. In support of the latter contention decisions of the supreme court are cited. One of them was written by Judge Christiany in the case of the People vs. Hurlbut, report on page fifty-nine of the Twenty-fourth Michigan reports. It takes the ground that in the phrase "any civil appointment from the governor or senate, from the legislature or any other civil authority" the word "appointment" is synonymous with the word "election." In the case of Ellis vs. Leman, on page 473, of the eighty-sixth Michigan report, Section 18, Article 4, is construed to prevent legislators from using their official positions in the creation of office for themselves or for the appointment of themselves to place. Thus there is plenty of precedent for holding legislators ineligible.

It remains to be seen whether the courts will pass on this matter before the nominations are closed. They will of course, if it is put up to them, but it is nobody's business, in particular, to put it up to them, and we all know how nobody's business usually fares. In any event no harm could come from a reasonable sprinkling of the ablest of the legislators in the convention. However, it would not be a good thing for the state to have the convention overrun by legislators. The latter have had their innings this year, and the rest of the population should have the preponderant voice in the deliberations by which the proposed new constitution is to be evolved.

THE CHARMING WOMAN

It is not necessarily one of perfect form and features. Many a plain woman who could never serve as an artist's model, possesses those rare qualities that all the world admires: neatness, clear eyes, clean smooth skin and that springliness of step and action that accompany good health. A physically weak woman is never attractive, not even to herself. Electric Bitters restore weak women, give strong nerves, bright eyes, smooth, velvety skin, beautiful complexion. Guaranteed at The Stafford Drug Co.'s store 50c.

Hotel Williams, Grand Island, Munising, Michigan, has increased its capacity by adding three two-room cottages with fire places. A large number of Ohio, Pennsylvania, Indiana and Illinois people have already booked reservations. (7-8-21)

TUXEDO CLUB

10c CIGAR

THEY CANNOT FORCE WAR.

The so-called discovery by the officials of our federal government and those of Japan that there is a systematic press campaign of misrepresentation to bring about a clash between the two countries is scarcely worthy even of politicians whose lives are passed in an atmosphere of rookeries. There are in America newspapers commonly classed as yellow which shriek hysterically over every item of news which can by any ingenuity be magnified to hysterical proportions. And those who know Japan say that the mikado's empire contains newspapers yellower than any of which we have ever dreamed.

But, after all, the yellows with their shrieking headlines and mendacious dispatches never appealed to any except the unthinking part of the community, and their hold today is considerably less than it was when Hearst first began to extend our present war system. There is a fraction of the people which likes startling information, even if it isn't true, but that fraction is decreasing. The yellows will never provoke a war between the United States and any other country, unless somebody nominally unconnected with them plays into their hands. For one of the yellow newspapers to assert that such and such a thing has happened is today regarded as no more worthy of credence than a Munchausen tale. It must be substantiated from some other source. Only when so substantiated does it assume any significance.

That is where the federal government comes in. If it can be convicted of mendacity or of double dealing then the people will become uneasy and incline to give ear to the imaginings of a yellow press. The Hague peace conference at its last meeting learned the lesson that frankness and publicity are the best weapons against malicious trouble makers.

MARQUETTE COMMON COUNCIL PROCEEDINGS.

(Official.)  
Marquette, Mich., July 1st, 1907.  
A regular session of the common council was called to order at 8 o'clock p. m., by the president, the Hon. Merwin E. Astre.  
Present—Aldermen Asire, Campbell, Corbett, Donovan, Downey, Ekstrom, McCarthy, Peters, Reichel, Schauer and Williams—11.  
The records of the sessions of June 3rd, 10th, 17th and 21st approved.  
The resignation of Frank J. Jenkinson as a member of the board of fire and water commissioners was read and on motion of Alderman Schauer, supported by Alderman Peters, was accepted and ordered placed on file.  
The following was presented:  
Marquette, Mich., July 1, 1907.  
To the Honorable Mayor and Common Council:  
Gentlemen—Owing to the inability of the incompetency of the city officials to extend our present water works system, we therefore respectfully pray and petition your honorable body to grant us a franchise for the purpose of installing, maintaining and operating a water works system at North Marquette. Same to be known as the North Marquette water works system.  
Respectfully yours,  
C. H. BOLEN,  
Secretary.

Moved by Alderman Schauer, supported by Alderman Donovan, that the commission of C. H. Bolen be referred to a special committee of three to report thereon at the next meeting of the council. Carried.  
The chair thereupon appointed on said committee Alderman Schauer, Campbell and Donovan.  
A communication from John McClintock and two others regarding the dumping of garbage in East Michigan street, was presented and referred to the city health officer.  
The following petition of Mrs. Cora Erickson was read and on motion of Alderman Williams, supported by Alderman Downey, was referred to the committee on finance and taxation:  
June 28, 1907.  
Honorable Mayor and Common Council of the City of Marquette:  
Gentlemen—Your petitioner would represent that she is the owner of lot 17 of block 12, Harlow's Addition No. 1 to the city of Marquette; that said lot is all of the property she has and that she has no income whatever except from her personal labor; that she is a widow with one child twelve years old with her father and mother dependent upon her, both of whom are helpless and live with your petitioner; that your petitioner goes out and takes such labor as she can get—housecleaning and caring for offices, etc.—but her time is limited for such work as she has her own housework to do for herself, her son, her parents and her brother who lives with her. Her brother is suffering from an incurable disease and while not actually disabled is able to work only a small portion of the time and is not more than self-supporting.  
Your petitioner therefore prays that she may be relieved from assessment for the sidewalk recently built in front of her premises above described.  
Your petitioner prays for:  
MRS. CORA ERICKSON.

A petition was presented from Israel Ducharme and John Larson, relative to the condition of Prospect street near the James Sinclair rock crusher, and was referred to the park, cemetery and street commission.  
Moved by Alderman Peters, supported by Alderman McCarthy, that \$212.69 be transferred from the general fund to the special improvement fund. Carried.  
The committee on parks, cemeteries, streets and sewers recommended that concrete sidewalk be constructed along the east side of Presque Isle avenue, from the north side of Fair avenue, north to the south side of Wright street. On motion of Alderman Williams, supported by Alderman Downey, said recommendation was adopted and referred to the park, cemetery and street commission.  
The committee on parks, cemeteries, streets and sewers, recommended that a sewer be constructed in Genesee street from Adams street to Altamont street. On motion of Alderman Williams, supported by Alderman Downey, said recommendation was adopted and referred to the park, cemetery and street commission.  
On motion of Alderman Williams, supported by Alderman Ekstrom, the petition of Wm. Dorais and forty others

RECEIVERS NOTICE.

Notice is hereby given, that by a decree of the Circuit Court for the County of Marquette, in the State of Michigan, in Chancery, the West Republic Mining Company, a corporation under the laws of the State of Michigan, has been dissolved, and the undersigned appointed receiver of its estate and effects and has duly qualified as such, and that all persons indebted to said company are required to render an account of all debts and sums of money owing by them respectively to the undersigned, and to pay the same on the 22nd day of July, A. D. 1907, at the office of the undersigned, at Vulcan, in Dickinson County, Michigan, and that all persons having in their possession any property or effects of said company are required to deliver the same to the undersigned on the day and at the place aforesaid, and that all creditors of said company are required to deliver their respective accounts and demands to the undersigned on the day and at the place aforesaid, and that all persons holding any open or subsisting contracts of said company are required to present the same in writing and in detail to the undersigned on the day and at the time aforesaid.  
Dated at Vulcan, Dickinson County, Michigan, June 6th, A. D. 1907.  
WILLIAM KELLY,  
(6-8-75at) Receiver.

relative to the grading of Altamont street, from Jackson street to Fisher street, was referred to the park, cemetery and street commission for their recommendation and estimated cost of said work.  
A lease was presented from Joseph Brickman to the city of Marquette for a lot in Palmer's addition used for pond purposes, and on motion of Alderman Campbell, supported by Alderman McCarthy, the mayor and controller were empowered to execute said lease.  
The following bills having been audited by the controller and the committee on finance and taxes were presented, and on motion of Alderman Corbett, allowed and ordered paid:  
Joseph Fay, services on board of review.....\$ 18.00  
Jacob Smith, services on board of review..... 18.00  
Martin Sawyer, services on board of review..... 18.00  
Wm. Wiseman, services on board of review..... 12.00  
Shields McCarthy, services..... 125.00  
John Knapp, services at dump grounds..... 50.00

R. P. Byrne, treasurer, refund on Special Assessments No. 89, 90, 91, 92..... 391.32  
Roger Tansey, balance contracts..... 128.82  
Chas. W. Gaines, hauling dogs to dump..... 4.00  
R. P. Byrne, treas., interest..... 327.50  
Light & Power commission, street lighting..... 788.17  
Pay roll of city officers for June, 1907..... 498.23  
John E. Flynn, poundmaster fees..... 13.50  
Yeas—Aldermen Asire, Campbell, Corbett, Donovan, Downey, Ekstrom, McCarthy, Peters, Reichel, Schauer and Williams—11.  
Nays—None.

The monthly reports of the justices of the peace were presented and referred to final auditing.  
The reports of the poundmaster and market keeper for the month of June were presented and ordered placed on file.  
The following liquor bonds were presented, and on motion of Alderman Donovan, supported by Alderman Campbell, accepted and approved:  
Sven Lindfors; sureties, Anton Zamon, Edward N. Breitung.  
Wm. J. Rivers; sureties, Henry Rivers, Alfred Fleury.  
Leander Winkka; sureties, Felix O'Hagan, Nathan M. Korfman.  
The official bond of Harry L. Siegel, recorder pro tem, was presented; sureties, Edward H. Flynn, John D. Mangum, \$1,000.  
On motion of Alderman Donovan, supported by Alderman Campbell, same was accepted and approved.  
The following resolution was presented, and on motion of Alderman Williams, supported by Alderman Campbell, same was unanimously adopted.  
Resolved, That the common council hereby direct that there shall be collected on the general tax roll of the city of the year 1907, each and every of the delinquent special assessments levied for public improvements against lots and parcels of real estate on the special assessment rolls hereinafter mentioned, and all property taxes, charges and penalties, and interest thereon, to-wit:  
Special Assessment Roll No. 81, confirmed by the common council on October 2nd, 1906, for the grading of Mesnard street, from Division street to Altamont street.  
Special Assessment Roll No. 82, confirmed by the common council October 16th, 1906, for the grading of Adams street, from Genesee street to Craig street.  
Special Assessment Roll No. 86, confirmed by the common council July 25th, 1906, for the construction of a sewer in Rock street, from the center of Fifth street to the center of Seventh street, and in Seventh street from center of Rock street to manhole in sewer in Range avenue.  
Special Assessment Roll No. 91, confirmed by the common council October 1st, 1906, for the construction of a sewer in Ridge street from sewer in Front street to a point 150 feet east of the east line of Third street.  
Special Assessment Roll No. 93, confirmed by the common council November 19th, 1906, for the grading of Waldo street from the west line of Presque Isle avenue to the west line of Fitch avenue.  
Special Concrete Sidewalk Assessment Roll No. 1, confirmed by the common council January 6th, 1902.  
Special Concrete Sidewalk Assessment Roll No. 7, confirmed by the common council November 18th, 1904.  
Special Concrete Sidewalk Assessment Roll No. 10, confirmed by the common council September 30th, 1906.  
Special Concrete Sidewalk Assessment Roll No. 11, confirmed by the common council November 19th, 1906.  
Special Sidewalk Assessment Roll No. 5, confirmed by the common council September 4th, 1906, for the repair and expense of the construction and repair of sidewalks in front of private lots and parcels of land.  
The council then, on motion, adjourned.  
HARRY L. SIEGEL,  
Recorder pro tem.  
A MEMORABLE DAY.

One of the days we remember with pleasure, as well as with profit to our health, is the one on which we became acquainted with Dr. King's New Life Pills, the painless purifiers that cure headaches and indigestion, and keep the bowels right. 25c, at the Stafford Drug Co.

Charles Anderson and family and Mrs. Swanson left yesterday morning for Duland, Sweden, where they will visit relations for a few months.  
Albert Perrin, of West Branch, was here yesterday on a business mission. W. G. Phillips of Chisnet also was in the city, as was S. O. Clinton, of Baraga.  
During the months of July and August, excursions will be held at St. Peter's cathedral, at 6:45, 7:30, 9 and 10:30 o'clock, the first named being an addition to the usual order of services.  
Ralph Moore, a former resident of Marquette, for the past several years located in Duluth, will be wedded next week to Miss Brewer, a popular Duluth girl.  
The funeral of the late Mrs. Helen Crow will be held at 9 o'clock Monday morning from St. Peter's cathedral. Interment will be in the old Catholic cemetery.  
Mrs. H. F. Lyster, Henry Lyster and Mrs. S. M. Rutherford, of Detroit, arrived in the city yesterday and will go to the Huron Mountain club for a few weeks' outing.  
Mrs. James MacPherran, of Sterling, Ill., who has been visiting her son, E. W. MacPherran, 515 Spruce street, for the past ten days, left for her home last evening.  
A new boiler for the fog horn is being installed in the light house at St. Ignace Rock. The device is being built for the purpose of unloading cargoes of supplies.  
The dance given last night by the Spongers club in honor of two Marquette boys who are members of the crew of the U. S. S. Wolverine was largely attended. An enjoyable evening was spent.  
Mrs. A. C. Anderson is in receipt of a postal from her daughter, who is visiting in Colorado, telling her that on a recent occasion, while on Pike's Peak, the thermometer registered 34 degrees above zero, and a blinding snow storm prevailed.  
The seventeenth annual excursions, via the D. S. S. & A. railway to the Shrine of St. Anne de Beaupre will start today, concluding July 16th. In past years many Marquette people have taken advantage of the reduced rates and to journey to the historic shrine.  
Amos Saladin, the piano agent, advertises his new line of interior players on the last page of today's issue of The Mining Journal. He is agent for three makes of these instruments, and his announcement will be found of interest.  
Announcement has been made of the engagement of Miss Bessie Merritt, daughter of D. H. Merritt, and Page Laughlin of Pittsburg, Pa., a resident for a time of Marquette some years ago. It is understood that the wedding will take place the latter part of the summer. Miss Merritt is now visiting in the east.  
The Marquette ball team leaves this morning for Escanaba to play games in that city this afternoon and tomorrow against the strong nine which the Delta county sent has on the diamond. This season, twelve men, including two substitutes, will make the trip. Jeauson is expected to pitch today, and Selentius tomorrow. The Marquette boys figure on at least breaking even on the series.  
The Chicago, Milwaukee & St. Paul railway has put on an extra sleeping car to run daily between Marquette and Chicago, affording Chicago travelers out of Marquette through sleeping car service without charge. The car will be one of their standard, electric lighted cars, the people of this vicinity getting the same high grade service that is in effect from the copper country. The Milwaukee sleeper will continue as heretofore except that Milwaukee passengers will transfer with this car at Champlain.

**Excursion to Birch**—It is expected that a large number of Marquette county people will participate in the excursion to Birch given tomorrow under auspices of the A. O. H. Very low rates of fares have been made for the round trip—\$1.25 from Ishpeming and Negaunee and seventy-five cents from city city—and the train schedule is so arranged that practically the entire day will be spent in the new lumbering town. The departure from Ishpeming will be made at 7:45 a. m., from Negaunee at 7:53 and from Marquette at 8:50. The train will leave Birch on the return trip at 7:30 p. m. The Marquette "Hayseed" band will accompany the excursionists, and refreshments will be served on the grounds at Birch.

**Had Unusual Experience**—Robert Davenport and Fred Kroeger, members of the Standard Rock crew, had an unusual experience this week while endeavoring to get to Marquette in a sailboat. At 11 o'clock Thursday morning they started for Marquette in a medium sized sailboat. The wind was very light. They had a good view of Granite Rock, which is twelve miles from Marquette, until about 8 o'clock Thursday night, but soon after a light fog arose and they lost sight of it. It was not until 3:30 yesterday morning that the island was again sighted. The wind turned favorable and the boat sailed about at a good speed, succeeding in reaching Marquette at 8:29 at 7:30 p. m. The trip is usually made in five hours, but on this occasion twenty-one hours were required to make the trip.

**Measure Meets With Censure of True Sportsmen All Over the State—May Be Other Unexpected Bills.**  
It is learned that a number of bills slipped through the legislature making radical changes in some of the provisions of the game and fish laws. How many bills there are and to what extent they change the old statutes no one appears to know precisely, as the work of compiling the laws in the secretary of state's office will not be finished until next week. Two important changes have, however, just been discovered.  
The open season for duck shooting in the spring has been extended from March 2 to April 25, instead of March 15 to April 10. Snipe are now protected in the spring—they may be shot under the new law.  
The trout fishing season opens April 15 instead of May 1, and closes August 15 instead of September 1.  
It is presumed that these laws were given immediate effect, although that is not surely known. If so, the trout fishing season for this year is shortened fifteen days.  
Bills Sneaked Through.  
Both of these bills were slipped through, apparently, without any of the sportsmen or sporting organizations of the state being aware of their purpose. It was presumed that the new Michigan Game and Fish association had its eye on the attempt to lengthen the spring duck killing season, and indeed was trying to have the spring butchery abolished altogether. If the association was on guard, it certainly was very cleverly fooled. The bill amending the law to permit the spring shooters to kill ducks and all kinds of snipe and other water fowl on their way to their breeding grounds was introduced in February, reported out in March, and passed the house early in May, ayes 53, nays none. It was soon after slipped through the senate.  
The Saginaw Courier-Herald received a hint that Rep. Woodruff of Detroit would attempt to push such a bill, and in a vigorous editorial called attention to the contemplated outrage, urging the sportsmen opposed to spring butchery to take action at once. Assurance from men who are against spring shooting that any attempt of the kind had already been anticipated and would certainly be blocked were given, but they were evidently caught napping. While the real sportsmen of the state who refuse to kill birds about to nest and rear their young were trying to get the spring shooting law abolished entirely,

**Spring Shooting Season Extended**  
VICIOUS GAME BILL, SNEAKED THROUGH THE LEGISLATURE, HAS COME TO LIGHT.  
**MEANS A SLAUGHTER OF FOWL**

**Island Taken Up**—An island of 2.65 acres extent in Gun Lake, Berry county, was subject to entry at the Marquette land office on the 11th. Two applicants for entry appeared, and consequently bids for the right to enter were asked. The highest bidder was Wallace England, who took the island on homestead entry.

**Entertainment Well Attended**—The K. of C. dance and entertainment given at the Fraternity Hall Thursday evening was a success. The entertainment was particularly pleasing and the readings by Miss Murray were well received by the audience. The floor was in good condition for dancing and the eighty couples present thoroughly enjoyed themselves.

**Concerts at Presque Isle**—The Ishpeming city band, the new organization led by Frank Trombley and having some twenty-five members, will be heard in concert at Presque Isle tomorrow afternoon and evening. The afternoon program will be given from 2:30 to 5:30 and the evening program from 7 to 8:30. The evening program is a new feature, the concerts in previous years having been confined to the afternoons.  
**Electrical Show**—The light and power commission has arranged an attractive booth in the north store of the Marshall block for the demonstration of electrical cooking apparatus by Miss Lyons, who was sent here by the General Electric company. A full line of utensils is shown. There were some callers yesterday afternoon, but the demonstration will only fairly begin today, when it is expected it will be visited by many housewives. Besides the electrical cooking apparatus many other electrical appliances are shown, and the ladies will find a visit to the display interesting and profitable.

**Excursion to Birch**—It is expected that a large number of Marquette county people will participate in the excursion to Birch given tomorrow under auspices of the A. O. H. Very low rates of fares have been made for the round trip—\$1.25 from Ishpeming and Negaunee and seventy-five cents from city city—and the train schedule is so arranged that practically the entire day will be spent in the new lumbering town. Nester Block Washington St.

the butchers, headed by Woodruff, were sneaking a measure through actually extending the season twenty-eight days and including snipe in the list.  
**Bloody Slaughter Sure.**  
This law will largely increase the killing of waterfowl, and thousands of birds will be slain where before but few fell to the guns of the spring hunters, for the reason that during the later part of the season the birds will be much more plentiful and the weather propitious for hunting them. The Woodruff bill is the most shameful piece of game legislation ever enacted by the legislature. It was devised by Woodruff in the house and smuggled through by Travers in the senate for the benefit of their constituents along the Detroit river and the Lake Erie marshes—men who would shoot a setting hen on her nest if hens were getting scarce.

After he discovered that the law had gone through, Ex-Senator Baird informed Governor Warner of its purpose and asked him to veto it, but it seems that he signed it, asserts the Saginaw Courier-Herald. Mr. Baird also discovered and blocked an attempt to abolish the office of county game warden in Saginaw county.  
**The New Trout Season.**  
Game Warden Pierce has only just announced the discovery of the trout fishing law, so that the history of that piece of legislation is at present unknown. The early opening (April 15) comes at a time when the weather is usually abominable in Michigan, cold, wet, snow, ice and high streams. While the trout will take live bait at this time, the fly fishermen generally find it pretty difficult to beguile the fish with all their skill in casting the artificial lure. Trout seem to know that the middle of April, when ice is still in many of the streams, is too early for flies to come sailing over the water.  
There is an argument in favor of cutting off fifteen days at the latter end of the season. Trout are fall spawners and many of them are getting ready by the end of August for the year's procreative work.

**L. G. KAUFMAN IS THE NEW PRESIDENT**  
HONORED BY MICHIGAN BANKERS' ASSOCIATION—MARQUETTE WILL ENTERTAIN MEMBERS IN 1908.  
Marquette received abundant recognition from the Michigan Bankers' association, which has been holding its annual session in Detroit this week. A Marquette banking man, Louis G. Kaufman, vice president and manager of the First National, was honored with the presidency, and in addition Marquette was chosen as the place for holding the session of 1908, the invitation being extended to the association by the Hon. Peter White, who is one of the charter members, and being accepted unanimously.  
President Kaufman has been an officer of the association the past few years, and has been an active and interested member. His elevation to the presidency was expected this year, and was a pleasing honor and compliment. The other officers of the association are as follows: First vice president, H. G. Harman, president First National Exchange bank, Port Huron, Mich.; second vice president, Samuel Garland, cashier Traverse City State bank, Traverse City, Mich.; treasurer, A. A. Anderson, cashier Hastings City bank, Hastings, Mich.; secretary, Col. Fred E. Farnsworth, Detroit; members of executive council for two years, Charles M. Spinning, vice president Jackson State Savings bank, Jackson, Mich.; William B. McLaughlin, cashier Houghton National bank, Houghton, Mich.; John Ryan, vice president and cashier State Bank of F. W. Hubbard & Co., Bad Axe, Mich.; Her-

COUNCIL'S ACTION VETOED.

Mayor Does Not Think City Should Build Cemetery Walk.

Mayor Roberts yesterday vetoed the council's action relative to the construction of a sidewalk for Bessomer street north to the Ishpeming cemetery. Following are his reasons:  
First: That if the city builds this sidewalk at its own expense, it should first condemn by proper proceedings, and acquire the streets upon which such walk should be constructed, so that in the future the city would have a basis to protect its rights, with reference to such improvement. See paragraph 51 Section 12, city charter.

Second: That inasmuch as the city compels the small property holders to build sidewalks in front of their properties, upon such lines and of such material as stipulated by the council at their (the small property holders') own expense, that it would also be equitable and just that the large property holders (in this case the iron mining companies) should also bear the expense of such improvements upon their lands.

Third: That the same procedure should be followed in all others, that there shall be no discrimination in favor of either small or large property holders. Since the building of such sidewalk has been deemed by the council, a public necessity, that the proper procedure would be to instruct the adjacent or abutting property holders to proceed to construct said walk as per specifications laid down by the city, and on failure to do so in a given time, the city shall proceed with the work and charge the expense of same to the abutting property holders, and on failure to make payment to the city for same, it shall be collected in the tax levy against said land, as per paragraphs 66 and 67 of Section 17 and 18 of the city charter.

Fourth: That if the city sets a precedent in this case by assuming its own expense, in a short time it will have to do likewise in building a sidewalk from the Lake Superior office south to the Salisbury school, also from the corner of East Division and Fourth streets out to what is termed the end of the Cleveland sidewalk. Such walks would cost several thousand dollars; and believing it is right to enforce the provisions of our charter without discrimination is the chief reason for my vetoing the said resolution.

WILL IMPROVE SCHOOL.

Rev. J. A. Keul, pastor of St. John's church, is making preparations for several improvements at the parochial school on East Pearl street. A concrete walk is to be put in on the Pearl and Front street sites and the foundation is to be repaired. Other improvements, including an overhauling of some of the school rooms, will be made. The work contemplated will be completed before the opening of school in September. It is expected that the attendance next year will exceed that of last and that some of the rooms will be crowded. The enrollment last year was over 400.

FERRERS.

ANDERSON-COOLEY NUPTIALS.

Marriage of Ishpeming Young Man to Wisconsin Girl Occurred at Fredonia.

The following account of the marriage of Douglass Anderson, oldest son of C. L. Anderson, to Miss Maybelle Florence Cooley of Fredonia, Wis., which occurred Tuesday at 11:30 o'clock, is from the Port Washington Pilot:

"A pretty and unique wedding at the home of Mr. and Mrs. C. F. Cooley of Fredonia, Wis., took place on Tuesday, July 9th, the occasion being the marriage of their daughter, Maybelle Florence, to Mr. Leslie Douglass Anderson of Salt Lake City, Utah. At the appointed hour, 11:30 a. m., the bridal party, unattended, arranged themselves upon the lawn, where the guests were already assembled, and waiting, and there under the shade of the trees their vows were spoken; their wedding march, not the strains of Mendelssohn or Lohengrin, but simply the song of birds and the rustle of leaves. The Rev. H. A. Atkinson, pastor of the First Congregational church of Springfield, O., and old friend of the bride's family, performed the marriage service. The bride was attired simply in white and carried a bouquet of lilies of the valley. After receiving the congratulations of their friends, the bride and groom, their respective parents and the clergyman, repaired to the dining room and partook of the luncheon specially prepared for them, while the guests informally grouped upon the lawn were served by the bride's chosen friends. An out-of-door effect was given to the house by a tasteful arrangement of wild ferns, asparagus, daisies and roses. The decorations of the parlor were green and white, while the pink roses gave a touch of color to the dining room.

"The out-of-town guests were: Mr. and Mrs. C. L. Anderson, parents of the groom, Ishpeming, Mich.; Mr. C. E. Bridge, Anderson, brother of the groom, who came specially for the occasion from Jamestown, Va.; Miss Ada Anderson, sister of the groom, from Ypsilanti, Mich.; Mr. C. E. Cooley of Detroit, Ark.; Mr. G. D. Cooley and family of Texarkana, Ark.; and Mr. R. L. Cooley and family of Milwaukee, brothers of the bride; Mr. A. A. Patch, Miss Nina Patch and Miss Margaret Farney of Milwaukee; Mrs. F. D. O'Neill of Wickliffe, Ky., and Ed. Race of Oshkosh. The guests were all relatives or very intimate friends of the contracting parties.

"Mr. and Mrs. Anderson will be at home after August 1 in Salt Lake City, where the groom is employed in the capacity of assistant chief engineer by the United States Smelting & Refining company."

COMPANY I IN CAMP.

Company I, Michigan National Guard, will take a "hike" north of the city, leaving headquarters this evening, and remaining in camp at the Deer Lake grove until Sunday evening at 8 o'clock. The company will go out in two parties, the first leaving the armory at 7:30, and the second at 10:30 o'clock. Tomorrow target practice will be conducted and special attention will be given to order drill, also practice on guard duty. The Ishpeming company will attend the encampment at Ludington this year, leaving here about August 14.

GREAT PIANO DAYS

The closing out sale of the entire stock of Kimball, Whitney, Arion and other fine Upright Pianos.

Beautiful Cases in Mahogany, French Burl Walnut and Quarter Sawn English Oak, exquisite in tone, touch and workmanship.

Our fifth Special sale has been a great success. We have placed more than Sixty Instruments, making more than Four Hundred sales on this range, and now the remaining new and used pianos and organs are to be closed out and the store surrendered to the landlord. We are selling large new \$300.00 Mahogany Pianos for \$168.00. They have a very easy touch, round full musical tone and are warranted for a lifetime.

If you ever expect to own a piano or organ, now is your time. One thing is sure, every instrument in this store will go into a home on this range, and every family will get a bargain, and when the last one is sold the sale will stop with a snap, and your chance is gone. We are making sales every day to people who never would have bought if they had not come in and looked over the instruments.

Terms of payment arranged to suit everybody. Store open evening until 9:30 o'clock.

Write to Us

If you live out of town and we will send you full particulars and catalogue by return mail. The instrument you select will be sent to you on approval, subject to RETURN AT OUR EXPENSE. When you write, mention price you desire to pay.

A. E. WHITNEY, General Agent, Kimball Piano and Organ Factories.

**IS PLAYING GILT EDGED BALL.**

The Negaunee baseball fans, who fol-  
low the work of the larger league teams,  
are much interested in the playing of  
"Billy" Barabeau, who is doing star  
work with the Toledo team. Barabeau is  
personally known to a great many in  
this county, as he resided at Marquette  
for a time. On one occasion when a  
match game was played between Ish-  
peming and Negaunee teams he was  
called in to hold down second base for  
the Negaunee team. He is now playing  
shortstop. In most of the games the  
Toledo team has played this season Bar-  
abeau is mentioned as having done the  
feature work. He also is said to have  
assisted with more double plays than  
any other man in either league.

**INDIANS BOWL GOOD SCORE.**

Two league bowling contests were  
pulled off Thursday evening at Orr &  
Tompkins alleys, the Indians defeating  
the Lee Wagons and the Ravens the Green  
Sox. The scores were as follows:

Indians—  
Mitchell ..... 199 220 156 575  
Willman ..... 128 148 159 435

Totals ..... 327 368 315 1010

**LOCAL LACONICS.**

C. M. Sullivan of Duluth is in the city.  
N. Stein of Baraga was a Negaunee  
visitor yesterday.

Ground was broken yesterday for the  
foundation for the Odd Fellows block.

Hugo Muck is expected home within a  
day or two from Wisconsin, with a car-  
load of horses.

Joseph Riley and wife of Chicago are  
in the city visiting his mother. Mr.  
Riley was raised in Negaunee.

Dr. Austin O'Leary is here from the  
Mesaba range, on a visit to his parents,  
Mr. and Mrs. John O'Leary.

Negaunee will be well represented at  
the picnic to be given tomorrow at Birch

under direction of the Iibernians of  
Marquette. The round trip fare from  
this city will be \$1.25.

Miss Mary Brown is in the city visit-  
ing at the home of W. M. Sterling. Miss  
Brown is now a resident of Chicago.

Mrs. Henry Pascoe, an old and well-  
known resident of this city, was tend-  
ered a social surprise by friends Wed-  
nesday.

Mrs. C. Scanlon has returned to her  
home in Chicago, after a visit with her  
sister-in-law, Mrs. William Scanlon, in  
this city.

Mrs. Louise Mattson and daughter,  
who visited Henry Basmusson and fam-  
ily here, have returned to their home in  
Minneapolis.

R. G. Jackson will leave today for  
Jackson, Mich., to attend the quarterly  
meeting of the board of control of the  
Odd Fellows home, of which he is a  
member.

Captain James H. Rough is inspecting  
lead and zinc properties in Wisconsin  
this week. While in the Cuba City dis-  
trict he will pay particular attention to  
the Baxter, Pine Tree and Vandeventer

properties, in which many Negaunee and  
Ishpeming people are interested.

The South Shore's new water tank, lo-  
cated between the Union station and the  
bridge, is in commission. The structure  
is completed, but it has not yet been  
painted.

Miss Mabel Jackson left Thursday  
evening for Chippewa Falls, Wis., on a  
visit to relatives. From there she will  
go to Duluth and Hibbing to spend a  
few weeks.

The members of the Ladies' Aid so-  
ciety of the Presbyterian church extend  
an invitation to their friends to attend  
their pantry sale this afternoon at the  
church parlors.

Rev. W. B. Coombe, pastor of the  
Mitchell Methodist church, will deliver  
the principal address to the Sons of St.  
George of the upper peninsula at the re-  
union to be held in Ishpeming a week  
from today.

The funeral of the late Joseph Ben-  
dette, who was killed at the Princeton  
mine, was held yesterday afternoon from  
St. Paul's church under auspices of the  
Negaunee Italian society. A number of

Italians came up from Princeton yester-  
day morning to attend the obsequies.

The Misses Elliot and Wells of this  
city will serve golf tea at the club  
house this afternoon from 3 to 5 o'clock.

The compressor at the Hartford mine  
was started up yesterday, after two  
days' illness on account of a break  
down.

A number of the Negaunee mining  
men plan to attend the annual meeting  
of the Lake Superior Mining Institute,  
to be held on the Mesaba range. They  
will leave here on the 23rd.

James A. Kirkwood left last evening  
for Iron Mountain, after a few days' vis-  
it in Negaunee. Mrs. Kirkwood has  
been at Iron Mountain for some days  
past, visiting her mother, Mrs. Rundle.

The baseball game between the Busi-  
ness Men's mine and a team composed of  
city officials and employes was post-  
poned Thursday on account of bad  
weather until yesterday afternoon. The  
score was 25 to 13 in favor of the Busi-  
ness men. Mitchell, Thoren and Lar-  
son did the battery work for the city  
team and Levine and Roberts filled the  
points for the Business Men.

THE CONTENTED SHIP. THAT'S WHAT ROOSEVELT WANTS IN THE NAVY.

It is Generally the Most Efficient—Men Now from Good, Substantial Stock—Junior Officers a Fine Body of Men—New Move for Retirement Intended to Bring About a Steady Flow of Promotions—Voluntary Retirement Unusually Sufficient—Unhappy Ship Against Officer's Record—Survival of Fittest in Army and Navy.

Washington, July 12.—When President Roosevelt made an address at the Georgia building at the Jamestown exposition on the day set apart for that city of contentment as well as efficiency in the navy. It is a subject in which the president is deeply interested. It is one in which he earnestly desires the officers of the navy to take an interest. "The day has come," said the president to a cluster at the White House one day last spring, "when the really efficient ship must be also a fairly contented ship. The happy ship is not always the efficient ship, but it is generally the case that the most efficient ship has a reasonably contented ship's company."

It was while Mr. Moody was secretary of the navy that the officers received from the secretary's office a confidential letter calling their attention to the fact that the navy of today was very different from the navy of 1860. From that of fifty or even fifteen years ago. He reminded them that the class of men who enlisted today were in most instances from good, substantial stock; they came from the industrial, even greater numbers than from the military. They came from the farm and not from the street. And this change in the personnel of the enlisted force calls for a decided change in the method of handling them. Time was when the navy—it was in the days of the old navy—was some of as tough a set of men as could be found in the country. It was too often the practice of police magistrates to abuse the navy by using it as a sort of reform school, and it is only in recent years that the department has in large measure succeeded in breaking this practice of giving a criminal the alternative of serving a jail sentence or enlisting in the navy. Even the most narrow and antiquated of the country's communities are waking up to the change that has come to the enlisted personnel of the navy, and certainly the great body of the American people approved the president's recent announcement that he did not believe there was a finer body of men in the world than the junior officers and men of the American navy.

Discontent in a ship's company has usually come from the failure of the officers in the commanding grades to realize that the men of their command were not of the class they were accustomed to deal with in the days of the old navy. It is a mistake to teach an old dog new tricks, and a "sea dog" has no exception. These thoughts on the attitude of the officers to the enlisted men are not entirely in the light of the report of the so-called "plucking" board. This is a board made up of five rear admirals which reports on the conduct of the officers in the light of the provisions of Section 9 of the personnel bill. That section provides for a certain number of retirements each year. When these retirements fall below that number the law requires the selection out of a certain number of officers to make up the retired number. The object of this section was to bring about a steady flow of promotion and prevent stagnation in the lower grades. This year the retirements were insufficient to meet the provisions of the law, and it was necessary to compel the retirement of fifteen officers and place them on the retired list. Of this number five were to be captains, four commanders, four lieutenant commanders and two lieutenants. Hitherto the applications of these officers for retirement mutually retired have been granted, and the board has thus been relieved of the disagreeable duty of recommending any of their fellow officers for compulsory retirement.

It was a disagreeable duty that devolved on the board, which Rear Admiral Robley D. Evans was president. The general approval with which the service has received the board's recommendations must be regarded as evidence that the board performed its duty faithfully and well and is deserving of very high praise. These officers were commanders and naval officers in Washington generally declare that its selections were wise. In the lower grades the compulsory retirements were in several instances for physical disability. This was true of two lieutenants retired and of at least one of the lieutenant commanders, who lost a leg several years ago. Speaking generally, the navy cannot but be reminded that in the future the captain who is unable to get along with his officers and men, whose ship is always known as an "unhappy ship," who appears constitutionally unfit to command, even though he be in other ways a markedly efficient officer, will experience an anxious time each year as the time for the meeting of the plucking board comes round. An "unhappy" ship goes against the officer's record, and with the officer who is not disposed to regard seriously the responsibility of his office. Drinking to excess must be put down in the navy, if the service is to reach its highest point of efficiency. So also with inactivity. The day has passed when an officer's letters do his work and he is content to drift until he serves out his allotted time—the officer can no longer regard the navy as a sinecure. Of course, it will happen from time to time that the navy will lose the services of a really efficient officer; perhaps there are some officers retired in the year whom many officers in the service will feel are more efficient than some who are left. But this is always true with any form of selection: it is true in civil life, as it is true in military life. And yet selections this year, even though the board may have made some mistakes, it is generally believed will prove an excellent and much-needed tonic to the navy. The progressive officers in the service look forward to the adoption of some form of selection by which the best men in the navy may go to the front, may rise more rapidly than the brother officers whose intentions may be as good but whose achievements are not.

With such a government as ours of course it is hard to hedge a system of selection around with those safeguards that will keep it free from favoritism or political influence. For this reason a majority of officers are in favor of "selection out" rather than "selection up." Selection out means the retirement from

the several grades of those whose services can best be spared; selection up—the promotion of the most efficient officers in their respective grades. It is easy to see that the determination of the most unit is less difficult than the determination of the most fit. Many an officer has not distinguished himself only because he has never had an opportunity; for example, all officers cannot command a war fleet. On the other hand every officer has an opportunity to perform faithfully and well the duty assigned to him, whether that duty be important or unimportant. Failure to perform the assigned duty to the best of one's ability, may not furnish ground for a court-martial, but it would make an excellent corner stone for a system of selection out, which an increasingly large number of officers are realizing is the great reform needed in the navy today.

TIME-SAVER AT PANAMA. New Machine Reduces by 9 Cents a Foot Cost of Operation.

Washington, July 12.—"I am convinced that American pluck and American inventive genius will prove important factors in the construction of the Panama canal, and together will overcome many obstacles which might otherwise prove insurmountable. The track-shifting machine recently invented by W. G. Bierd is a striking instance of the inventive genius which is being exerted in the canal zone." This statement was made by Secretary Taft after his last visit to the canal zone.

Mr. Bierd, who is manager of the Panama railway, is now in Washington. Speaking of conditions on the isthmus, he said recently: "Existing conditions on the isthmus are satisfactory in every respect. There is a spirit of enthusiasm and cooperation among the men which is always at the command of the chief engineer, and which augurs well for the progress of the work. The men are well paid, well housed and well fed. They are contented and happy, and they are all doing their best. What more could be desired?"

With regard to the reported spirit of militancy, Mr. Bierd said: "That spirit does not exist on the isthmus. It is not what it was confidently expected, and the conditions which you say are reported to exist are those which were generally looked for when Chief Engineer Stevens resigned. But everyone has been pleasantly disappointed. Colonel Goethals is thoroughly democratic. He has already won the good will of every man on the isthmus. He welcomes suggestions and gives kindly consideration to complaints. He has preserved, as far as any man could, the organization built up by Mr. Stevens, and it is doing a good work as it did before Mr. Stevens resigned."

Mr. Bierd said concerning the reported falling off in excavation: "There was a falling off in May. But there are several good reasons for that. When Mr. Stevens took hold he said: 'It will take me two years to complete my equipment and organization. It won't pay to make the dirt fly until that is done. But, once completed, I will have it fly in earnest.' When it was completed every man went to work with a will to make a record, and the result was the extraordinary excavation recorded for March and April. But the men were making a report. They could not keep it up. It was too much like the extra spurt you get of your horse as you come down the home stretch. Had John Stevens remained at the helm the men could not have kept up the pace at which they were going, and he was too good a housekeeper to permit them to. 'Then in May came the inevitable strike of the steam shovel men, which did not amount to much, but it amounted to enough to make it impossible to attain a high record for that month. Finally the rainy season set in May and that hampered the work somewhat, as it necessarily must. But all this talk about the men being disheartened, having no more reserve force and no enthusiasm is nonsense, pure and simple."

The track shifting machine to which Secretary Taft referred and which Mr. Bierd invented has proved a great success. It is already here for use on the isthmus and another building. Five more will be built in the United States and shipped there, so that there may always be nine at work, with probably one in reserve or laid up for repairs. This machine consists of a sort of double crane rigged up on a flat car. It is technically described as a double drum hoisting engine, horizontal beam and vertical wheel. It shifts the whole track at once, instead of the old operation of prying up the rails with screwjacks, shifting the ties and then spiking the rails down again. The Bierd machine will shift track at a cost of 75 cent a lineal foot, as against 85 cents by the old method. The calculation is based on the cost of labor on the isthmus. When it is appreciated that the construction of the canal is chiefly a problem of railroading, continual shifting of tracks for the disposal and transfer of excavated material and continual alteration of the grades or levels as the excavation proceeds, the value of this saving can be appreciated.

I will mail you free, to prove merit, samples of My Dr. Shoop's Restorative, and my book on either Dyspepsia, the Heart or The Kidneys. Troubles of the Stomach, Heart or Kidneys, are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment, and not the cause. Weak Stomach nerves—the inside nerves—mean Stomach weakness, always. And the Heart, and Kidneys as well, have their controlling or inside nerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy even claims to treat the "inside nerves." Also for bloating, biliousness, and breath or complexion, use Dr. Shoop's Restorative. Write me today for sample and free book. Dr. Shoop, Racine, Wis. The Restorative is sold by The Stafford Drug Co.

IRRA W. KELLEY, of Mansfield, Pa., writes: "I was in poor health for two years from kidney and bladder trouble, and spent considerable money consulting physicians without obtaining any marked benefit, but was cured by Foley's Kidney Cure, and I decide to add my testimony that it may be the cause of the restoration of the health of others." Refuse substitutes. Sold by The Stafford Drug Co.

LUMBER INDUSTRY GIANTIC.

Government Bulletin Shows Enormous Extent of America's Timber Interests.

Washington, July 12.—Bulletin 77, just published by the bureau of the census, contains a statistical report on lumber and timber products by Jasper E. Wheeler, expert chief of the division of manufactures, and an article on the timber regions of the United States by Henry Gannett, geographer of the United States geological survey. The figures given for the lumber and timber industry as a whole show an increase of 112 per cent, with a combined capital of \$517,224,128; were manufacturing lumber and timber products at the census of 1905. These establishments employed on the average 604,526 wage earners, and they paid \$183,421,310 in wages, including materials costing \$183,786,210, and manufactured products valued at \$590,022,090. The establishments were widely distributed, for in 1905 lumber and timber products were manufactured on a commercial scale in every state and territory except North Dakota. In nine states the production of lumber was the principal industry and in twelve it was second in importance. The six leading states in the industry with the value of products manufactured each were in 1905: Washington, \$49,572,912; Wisconsin, \$41,395,706; Michigan, \$40,596,335; Louisiana, \$35,192,577; Minnesota, \$34,183,369; and Pennsylvania, \$31,642,390.

Total of 145,596 Workers. In 1905 returns were received from 12,494 logging camps with a combined capital of \$90,454,094. These camps employed on the average 146,596 wage earners, paid \$64,983,795 in wages, consumed materials costing \$80,412,828, and manufactured products valued at \$236,131,048. Of the total number of logging camps, 11,644, or 93.2 per cent, were conducted by milling establishments; and 850, or 6.8 per cent, were operated independently. The independent logging camps reported 78 per cent of the total number of wage earners, 78 per cent of the wages, 90 per cent of the cost of materials, and 86 per cent of the value of products. While it is thus apparent that the bulk of the logging industry is carried on in connection with sawmills, the independent camps on an average employ much larger. These independent camps follow closely the centers of heaviest lumber production.

In the amount of production, which can most accurately be measured by the number of thousand feet of saw logs produced, Washington ranked first, Louisiana second, Wisconsin third, Pennsylvania fourth, and Arkansas fifth. In the value of products, however, the five leading states were Wisconsin, Washington, Michigan, Minnesota and Pennsylvania.

Rapid Growth in South.

A comparison of the figures for 1903 with those for 1900 shows that growth in the industry since 1900 has been most rapid in the southern states and in certain of the Pacific coast states, while a substantial and with respect to most of the items, uniform decline characterizes the lake states as a group. The average value of logs, saw logs and mill logs is relatively declining in the lake states is also clearly indicated, and this is due, of course, to the practical exhaustion in those states of merchantable timber in continuous bodies.

Throughout the country the average log stumpage is increasing. The average value per thousand feet, board measure, for the United States increased from \$2.18 in 1900 to \$2.89 in 1905, a rise of 41 cents, or 18.8 per cent. This advance in the cost of stumpage added \$11,472,115 to the total cost of logs, and increased the value of lumber proportionately. The increase is due not so much to a present shortage in the supply of lumber material in the country as to the fact that the available supply of log stumpage is rapidly being brought up and withdrawn from the market.

Over 18,000 Sawmills.

At the census of 1905 the number of sawmills reported was 18,277 and their combined capital was \$381,021,184. They furnished employment on the average to 223,674 wage earners, paid \$100,310,801 in wages, consumed materials costing \$293,985,101, and manufactured products to the value of \$491,524,662.

In this industry Wisconsin ranked first according to the value of products, Washington second, Michigan third, Louisiana fourth, and Pennsylvania fifth. In 1900 Wisconsin was second, Washington sixth, Michigan first, Louisiana eleventh, and Pennsylvania third. A classification of the mills according to the quantity of lumber cut indicates that between 1900 and 1905 the capacity of the average mill materially increased. Mills cutting 1,000,000 feet or more annually formed 33.3 per cent of the total number in 1905, as contrasted with 20.6 per cent in 1900.

The principal products of the sawmills, with their values, were as follows: Rough lumber, \$455,708,084; shingles, \$24,009,610; hoops, \$3,159,973; staves, \$10,082,641; headings, \$7,436,259; and laths, \$5,435,968. The number of planing mills reported in 1905 was 9,186, and their combined capital was \$222,294,184. They employed 132,070 wage earners, paid \$66,424,446 in wages, consumed materials costing \$273,276,381, and manufactured products valued at \$404,650,282. In the value of products of this industry New York ranked first, Wisconsin second, Pennsylvania third, Minnesota fourth, and Illinois fifth. The high rank of New York in the planing mill industry is due almost entirely to the magnitude of the operations of its independent mills. Illinois is also important because of its large number of independent mills, as are also Ohio and Massachusetts.

MORE PAY FOR OFFICERS.

Indirect Increase in the Military Service of the Government.

Washington, July 12.—An apparently innocent military order recently issued by the war and navy departments makes public the information that congress at the last session, by indirect means, increased the pay of officers of the army, the navy, the marine corps and the revenue cutter service. Whether this increase was allowed by accident or design is not known, but the impression prevails that the majority of the members of the two houses of congress knew nothing of the matter in the way of the increase carried through this increase, the benefit of which goes almost entirely to those officers on "detached" duty; that is to say, the men who have the good berth in the various military departments in Washington and elsewhere, whose pay happens to be government barracks or quarters. This increase in pay comes to the officers in the shape of increased quarters which they are permitted to commute, where the government does not permit. By the act of April 12, 1902, the pay for each month of the year is increased in a little provision that provides for the lighting and heating of their quarters, the policy of the government up to the enactment of this law having been that military officers should provide their own heat and light.

A provision in the naval appropriation bill gives to all naval officers the same allowances that are given to army officers holding the same or equivalent rank. This, of course, includes the Marine Corps. By the act of April 12, 1902, the revenue cutter law was put upon a military footing, the rank of the officers being stipulated in the act. Section 3 of that act provides that commissioned officers of the revenue cutter service shall receive the same pay and allowances as the corresponding rank in the navy, hereafter to be provided by law for officers of corresponding rank in the army, including longevity pay. This puts that service on all fours with the army.

As everybody in Washington understands there are very few army or navy officers on duty in the government property. There are a very few at the navy yard, the marine barracks and at the arsenal. Those quartered at Fort Myer are the officers attached to the troops stationed there. The vast majority of army and navy officers live in private houses, in apartments, or in Washington hotels, and these are the men who are benefited, not those in the field.

Under this new law the quarters allowed the lieutenant general jump from four to ten rooms; major generals, from six to nine rooms; brigadier generals, from five to eight rooms; colonels, from five to seven rooms; lieutenant colonels, from four to six rooms; majors, from three to four rooms; captains, from three to four rooms; and lieutenants, from two to three rooms. Second lieutenants remain at two rooms, as in the original law.

These quarters allowed by law are commuted into money where officers are on detached duty in government posts. This item means a corresponding increase in the shape of additional rent money over that already furnished by law the following sums, bearing in mind that it includes not only army officers but all officers of every arm of the service having a corresponding rank: lieutenant general, \$576 a year; major general, \$432; brigadier general, \$432; colonel, \$288; lieutenant colonel, \$288; major, captain and first lieutenant, \$144 each. Second lieutenants must be satisfied with two rooms allowed under the old law.

Upper Peninsula Child Swallowed a Dollar.

Henry, the thirteen-month-old child of Pasquale Calari, who lives on Luke's farm, Powder mill location, while playing with a silver dollar, swallowed it, and for twenty hours the child remained in the baby's stomach before it was forced out, says an Iron Mountain dispatch. The child is none the worse for its experience. When the infant first took the money into its stomach it turned somewhat black in the face, but apparently suffered little pain.

New Man at the Helm.

J. E. Chickholm, for many years general freight and passenger agent for the Manistique Railway company, secretary and treasurer of the Marais Lumber company, and paymaster and representative of the Manistique Lumbering company, with headquarters at Grand Marais, has resigned the several positions and retired from active business. In the many years of service, dating back prior to the building of the railroad through to Grand Marais, Mr. Chickholm has supervised the office work of the several companies in a most capable manner. He has been in the business since very young and has now reached the time in life when he believes it opportune to rest by the way and enjoy the reward of his work. He is succeeded in the several positions by Charles H. Tanner, a young man who has been connected with the companies in different capacities for the past ten years, and whose strict attention to duty and a faculty for "making good" has been promoted from time to time. All the concerns mentioned are controlled by the Alger-Smith interests.

Indians' Rights at Stake.

An important test case involving the treaty rights of the Chippewa Indians has been docketed for a hearing at Red Cliff, Wis., July 22. Charged with illegal fishing, in defiance of the laws of the Badger commonwealth, the son of Chief Morris of the Red Cliff band of Indians is the defendant. Through his attorney, Morris claims the right to fish and hunt anywhere in the ceded Chippewa lands in northern Wisconsin, from Duluth to the Montreal river at Ironwood. He has never received an allotment, but his attorney claims that this makes no difference. Counsel asserts that when the Chippewas ceded this land, they retained the privileges of fishing and hunting until the president of the United States abrogates that right, which has never been done. Under this treaty claim, it is proposed in this case to claim that any Chippewa Indian is immune from prosecution as long as he does not go outside of the ceded Chippewa lands. From the standpoint of the state, a thorough investigation of the law is said to have been made at Madison, and the attorney general's office will not only prosecute this case to the utmost, but will prosecute all other Indians who violate the game laws, until this case is settled. Attorney General Gilbert is said to have been in correspondence with Washington, and is in full record, it is said, with the federal authorities.

It is admitted that the treaty gives the Indians a strong prima facie standing on their rights. Congress passed an act making delinquent Indians citizens of the United States and reserving for them their tribal property rights, but the courts have not decided whether or not hunting and fishing are property rights. "I see that the waters of Lake Michigan kept rising and falling about two feet the other day," said Captain Herbert Vrooman at Duluth. "I have often seen this phenomenon on Lake Erie but never on Lake Superior. The water of this lake is much the same all the year around, and there is always a good stage from Duluth to the Soo. The temperature of this lake is also amazingly equal, and I attribute these facts largely to the number of springs that feed it. At Stannard Rock, east of Keweenaw

We pay express charges both ways on orders amounting to \$5.00 or over, one way on \$3.00 to any point in the United States.

as soon as they can arrange for it, in the meantime a shaft will be sunk at the intersecting point by hand work.

R. J. Hantmaker, of Buffalo, who has returned from a personal examination of the Jumbo mine, and of general conditions in the Colfax field, says: "Up to June 22nd the actual shipments of ore from the Colfax camp, since the 1st of January, amounted to 5729 tons, exactly 600 tons more than the total shipments for 1906. In addition to these shipments the La Rose Mine has contracted with the American company for 190,000 tons of ore to be delivered as rapidly as possible. If the shipments to the remainder of this year outside of the La Rose are even no larger than the shipments to date, the production of the camp will be upwards of \$15,000,000 for the year. Inasmuch as during the past six months ore has accumulated, owing to bad roads, and is now going forward in much larger volume, and inasmuch as several mines are putting in contracting plants of their own, it seems altogether probable that the output of the Colfax camp will this year be \$20,000,000 as against \$3,000,000 for 1906. More important than all the foregoing is the result of development work only, practically no stopping having yet been done. As to the general stock situation, a combination of mismanagement of certain mines and manipulation by professional brokers of certain stocks has resulted in a very heavy slump in the market on some half dozen prominent Colfax stocks from the boom figures of last fall. Even if the boom carried prices too high it is equally certain that they are too low now and events seem to be shaping themselves for a tremendous advance in a very few days. It is important that all the ore being mined, practically no stopping having yet been done. ### SOON TO LET CONTRACT.

Officers of Vandeventer Company Will Meet Mill Men in Few Days.

J. H. Quinn, Captain F. E. Keese and O. D. McClure, representing the Vandeventer company, expect to go to Cuba City, Wis., within a few days to meet A. W. Gramis of Joplin, Mo., for the purpose of closing a contract for a fifty-ton concentrating mill. The plans and specifications were approved Monday evening last, and the three men mentioned were delegated to close the contract. Mr. Gramis has advised the officers that he will have the mill ready for operation in less than three months after the contract is signed. He is now working a crew of about fifteen men putting in the Pine Tree plant and it is his intention to transfer this crew to the Vandeventer. It is expected that the Pine Tree mill will be ready for commission before the first of September.

Superintendent Fox reports that the deposit in the southeast drift had thickened several inches from the time he left until he had returned, but that the thickness of the northeast drift was about the same. Another report is expected today, in which additional information as to the length of the drift, amount of ore in stock, etc. will be received.

### MORGAN'S COMEDIANS.

#### Soo Evening News Says Their Plays Are Far Above the Average.

The advance sale of seats for the opening performance of Morgan's Comedians at the Ishpeeming theater Monday evening will begin this morning at 9 o'clock. The opening play will be a Southwestern comedy drama, "In Dixie Land." The Soo Evening News of June 29 had this announcement of the company's return engagement in that city: "The return engagement of Morgan's Comedians signifies the very favorable impression this organization created among local theater-goers during their appearance here during the first part of May. Their plays were far above the average, their specialties were strong and the company themselves were a class of people that make friends in all the cities they visit."

"On Tuesday, July 2, they return to Sault Ste. Marie with an entire new repertoire of plays as well as specialties. Miss Hila Morgan still heads the company and her support on this engagement will be some stronger than it was during their last appearance. Monroe Hopkins, that funny fellow who made our people forget their troubles, is still playing the comical roles in the new plays." The prices will be 10, 20 and 30 cents. Ladies free tickets may be secured previous to 6 p. m., Monday.

### DAILY STREET PARADE.

#### Strawberry Hill Youngsters Attracting Attention With Their Turnouts.

The Strawberry Hill children who brought a street procession through the business section of the city Wednesday, repeating the performance Thursday and yesterday, each time bringing out new floats and other novelties, are making a bit. In yesterday's procession there were several floats, and three or four youngsters made up as clowns did stunts on the streets. The most attractive feature of yesterday's display was an imitation of Sallustiana's Fourth of July float, and another was prepared somewhat after the one representing the Carpenter-Cook company. In the center of the platform was a half watermelon, two little coons occupying seats, and diving into it with their fists. Another float represented the Grand Union Tea company. In the cart were three little girls dressed as Japs, seated under a canopy appropriately decorated. Another float was an attempted imitation of that put out by L. W. Atkins & Co. and two or three others, representing nothing in particular, brought up the rear. The parade was passing through the street solicitors for the organizers passed their hats among the people, soliciting funds to pay for the half watermelon. Another parade is promised for today. One of the principal features will be an imitation of Brastrand's locomotive.

### FINE MINES IN UTAH.

#### Former Mayor of Ishpeeming Favorably Impressed With Them.

George R. Persons, who arrived here Thursday from a month's visit to Utah and other western states, was very favorably impressed with some of the Utah mining properties. He was very courteously treated by the mining men and obtained much information concerning the ore and the workings of certain properties in which he was especially interested. As a mining district Utah has wonderful possibilities, Mr. Persons said yesterday. He was much pleased with the excellent showing at the Columbus Consolidated, the South Columbus and the Utah Consolidated. The latter, he said, is by far the largest property in Utah and he declared that the corporations' lands have been only partially developed. He said that there was absolutely no foundation to the report that there was no ore below the 800-foot level in the Highland Boy shaft of this property. Mr. Persons stood at the shaft and saw the skips come up loaded with rich ore from the level referred to and was advised by the management that there was any quantity of the mineral in that part of the mine.

From the Columbus Consolidated Mr. Persons and his brother were driven to the opposite side of the canyon in a four-horse team by Tony Jacobson, general superintendent of the Columbus Consolidated and South Columbus properties, where they saw copper ore being mined from a mountain 3,000 feet high with steam shovels after blasting. The Utah Copper company is operating at the base of the mountain at the Boston Consolidated mine at its top. A railway extends to the top of the mountain and the product is shipped thirty miles to the smelter at Gardfield.

Mr. Persons said that the mining districts of Utah are simply marvelous and that a few years will see some wonder-

ful properties in the state. He saw some very rich copper ores at a number of properties, but none looked any better to him than the Columbus Consolidated, where he saw lead ore that averages 50 per cent mineral. Mr. Jacobson advised him that fifty tons of this quality is being shipped daily to the smelters and that a similar quantity of it has been going out for several months past.

### ON PECULIAR MISSION.

#### Woman Sent from Norway to Locate Former Residents of That Country.

According to information recently received here there are about 900 natives of Norway residing in the United States whose relatives abroad cannot locate them. It has been decided in the old country to send a representative to America to get as much information as possible concerning former residents of that country, and to try and induce them to enter into correspondence with their relatives and friends abroad. Mrs. Gustav Thingblad of Christiania, Norway, is now on her way to this country, with that purpose, and it is said that the Lake Superior region will be the first place she will visit. She may find it necessary to interview the head of every Norwegian family in this country before getting all the information she is after. It is her purpose to report in detail the conditions of the Norwegians who meet in the United States, giving their addresses and other particulars so that their relatives and friends at home may know just how they are getting along.

It is said that many of the aged people in Norway are sorely in need of financial assistance, being no longer capable of caring for themselves, and are desirous of having their relatives in this country aid them, if that is possible. Most of the Norwegians in Ishpeeming are old residents of the city. Some of them have been here for over thirty-five years and the majority of their blood relations are located in this country, but the parents of others are still in Norway. In some parts of the Northwest, particularly the farming districts of Minnesota, many new comers from Norway have located during the past few years.

### PRIEST FOR ITALIANS.

Rev. Francis Piazza is to be Rev. J. A. Keul's assistant at St. John's church. He will work among the Italians of Ishpeeming, Nequamee and Princeton, conducting masses at intervals at each place. Special masses will be conducted at St. John's church at 10 o'clock Sunday morning for the Italians, and Rev. Piazza, as well as Father Keul, will preach.

### FROM HOPKINS' CURB LETTER.

"The copper share market opened unchanged to fractionally higher. The trading, however, was light, showing no pronounced tendency either way. The selling in the past few days seems to have terminated. These who got frightened at the reduction in the metal seem to have thought the matter over and have taken a savor view of the situation. The New York market showed a stronger tendency at the beginning and the coppers were inclined to follow suit."

The day's prevailing prices were:

American	8.50	8.87 1/2
Warren	7.75	
Shattuck	29.50	
Superior & Pittsburg	16.75	17.12 1/2

### HOW IT SPREADS.

The first package of Dr. Leonard's Hens-Roid (the infallible Pile cure) was put out went to a small town in Nebraska. It cured a case of Piles that was considered hopeless.

The news spread and although this was only two years ago the demand prompted Dr. J. S. Leonard, of Lincoln, Neb., the discoverer, to prepare it for general use. Now it is being sent to all parts of the world.

It will cure any case of Piles. There is a month's treatment in each box. Sold for \$1.00, with absolute guarantee.

It is for sale by The People's Pharmacy, Marquette, Mich., or by Dr. Leonard Co., Niagara Falls, N. Y.

**JOHN WILKINS HOLZ JEFFERSON MOIR G. B. BURMAN TESTIFIES AFTER FOUR YEARS.**  
G. B. Burmans, of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick dust sediment, and pain and symptoms of kidney disease disappeared. I am glad to say that I have never had a return of any of those symptoms during the four years that have elapsed and I am evidently cured to stay. Cured, and heartily recommend Foley's Kidney-Cure to any one suffering from kidney or bladder trouble." Sold by The Stafford Drug Co.

Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for Piles, and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-copper glass jars 50 cents. Sold by The Stafford Drug Co.

### ISHPEMING IN BRIEF.

Francis Harper of Chicago is in the city visiting relatives.  
W. R. Roberts, a Chicago engineer, is in the city on business.  
Mrs. William Shea and two children of Houghton are visiting in the city.  
Charles Levine and T. H. Wallace were down from Champion yesterday.  
Carl Lehman and wife of West Ridge street are rejoicing over the birth of a son.

Mrs. H. S. Thompson and children of Beaton will spend next week at Island Lake.  
Dr. A. G. Greenwell and C. T. Chase, of the United States navy, were here yesterday.  
J. R. Collins, who is home from Washington, was accompanied by his wife and two children.

Miss Inga Midtling of the Winthrop and Gustaf Gunnerson of Duluth have been licensed to wed.  
Thomas S. Deo of the brokerage firm of Payne, Webber & Co., of Boston, was in the city yesterday.  
Miss Elliott and Miss Ruth Wells will serve golf tea at the club house this afternoon, from 3 to 5 o'clock.  
Attorney Jurmo, of Calumet, has located in Ishpeeming, taking the offices recently vacated by A. J. Moilanen, in the Anderson block.

Olaf A. Holmberg of Marquette street has been accepted for service in Uncle Sam's navy, he having taken the examination this week.

The Misses Amanda and Helen Anderson gave a concert at the Lyceum last evening and they will be heard in a concert in Escanaba tonight.

The outside concrete walls for the new high school building were completed yesterday. The center walls and pillars will be finished within a few days.

Mrs. E. C. Cooley and daughter, Miss Winifred, have returned from Mt. Clemens, where the latter received treatment for rheumatism. Her health is much improved.

The Epworth league of the Swedish Methodist church will conduct a picnic at Cleveland Park next Thursday. The Sunday school will hold its picnic on the 27th.

Mrs. Robert H. Shields and sons, Nathan and Robert, of Houghton, are visiting Mr. and Mrs. W. M. Argall at their home on North Fifth street for a few days.

Special services will be conducted tomorrow evening at the Salvation Army barracks. Mrs. McKinley of Superior, Wis., and Mrs. Johnson, of this city, will direct the meeting.

John Brigham, son of Ed. Brigham, formerly of this city, now a Chicago and Northwestern railway official, with headquarters in Chicago, spent yesterday with Ishpeeming friends.

Albert Anderson, of the concrete contracting firm of Anderson & Kilbride, is in the city, with the board of supervisors, and after being filled will be hoisted to the surface. Arriving at the top, the bucket will be dumped automatically, its contents falling on a belt running in a horizontal direction, and revolving continually. The ore will be carried on this belt directly over the railroad cars and will be dropped into them as the belt revolves. This completes the moving of the ore from the stopes where it is mined to the mouth of the pocket, and from there what is known as a pocket the apex of which will be flush with the line of the shaft. At the apex of the V there will be a chute. What is known as a skip, being nothing more than a large bucket, will be lowered from the surface to the mouth of the pocket, and after being filled will be hoisted to the surface. Arriving at the top, the bucket will be dumped automatically, its contents falling on a belt running in a horizontal direction, and revolving continually. The ore will be carried on this belt directly over the railroad cars and will be dropped into them as the belt revolves. ### GRAND LODGE MAY PAY 50 OR 60 PERCENT

OFFICIALS OF THE A. O. U. W. ARE BUSY WINDING UP AFFAIRS OF THE ORGANIZATION.

### SUPREME LODGE MUST HELP

Otherwise People With Claims Against the Order Will Get Practically Nothing—Decline of Grafton Lodge.

Officers of the Grand Lodge of Michigan, A. O. U. W., are at work straightening up the affairs of the order, which at a meeting on Tuesday decided to surrender its charter, says the Detroit Free Press.

Undoubtedly some time this week they will be ready to file a petition in the circuit court for the dissolution of the grand lodge, this course having been preferred to going into bankruptcy.

A receiver will be appointed and an effort will be made to pay the outstanding death claims. The \$100,000 which is due the estates of deceased members is divided among 111 claims.

Fred C. Wetmore, past grand master workman of the lodge, said that it is doubtful if more than 50 per cent will be paid on these claims. It is possible, however, that 60 per cent will be paid.

In assuring the claimants that at least 50 per cent will be paid the officers are basing their calculation on the belief that the grand lodge will get about \$80,000 from the supreme lodge as its share of the fifteen cents per month per capita assessment on all the members in the country.

This special assessment was made with the idea of helping some of the grand lodges in paying their death claims. Some of this money probably will be payable next June, after the meeting of the supreme lodge. Part of the assets of the grand lodge consist of the June and July assessments for this year.

Mr. Wetmore said that the members of the order in Michigan will have until September to change membership to the supreme lodge at no increase in rates. He said that the members in making this change will be much more secure than they have been in the last few years, as the supreme lodge is in a position to meet all claims promptly. The A. O. U. W. is growing in strength in many of the western states.

Michigan is one of four grand lodges to surrender their charters within a year, Ohio, Indiana and Wisconsin having preceded Michigan in taking that action.

The members of the board of trustees, to whom was intrusted the work of winding up the order, is as follows: Fred C. Wetmore, Josiah C. Thomas, Henry Kohlhepp, Albert E. Tomlinson, George Latham and W. Warne Wilson.

In its lifetime the grand lodge of Michigan paid out \$8,000,000 in death claims.

Grafton Lodge. The history of Grafton lodge, the Marquette branch of the order, during the past few years has been the history, in miniature, of the grand lodge, or state organization. Grafton lodge was some three or four years ago the strongest fraternal society in the county. Just before the Workmen began to get into deep water the grand lodge carried on a contest for members, in which the subordinate lodges were offered prizes for the best showing. Grafton lodge carried off honors in this contest and sent its membership up to about 500. Then the grand lodge began to find the rate problem a vexatious one. It was seen that the existing rates were not high enough to take care of the increasing number of death claims. The grand lodge struggled with the problem in successive years, and finally readjusted the schedule, sending up the rates for the old men. This dissatisfied the old members, but had no other apparent result, for it did not avail to close up the yawning gap between assets and claims payable.

The membership of Grafton lodge struck the downgrade. Members, old and young, fell away from it by dozens, with a rapidly accelerating movement, until at a recent session it is stated that there were only twenty-eight on the roll, compared with nearly twenty times that number some three years ago. According to reports those of the small membership left will be able to continue their insurance, by an arrangement to be made by the supreme lodge, the national organization, but it is said that many of them will give up the order entirely.

SEVEN MARQUETTE MEN ENLIST. Recruiting Officer Kern Meets With Much Success Here. Charles Kern, recruiting officer on board the U. S. S. Wolverine, concluded his work in this city yesterday. He enlisted the following men from this port: Roy Rydholm, E. S. Kern, C. C. Kimball, F. J. Quarters, W. H. Clark, C. E. Brown and William Jamsey. Mr. Kern last evening said: "I can candidly say that I did not expect to meet with as much success as has been accomplished during the few days of recruiting here. The times are good, and labor is well employed. Working against such opposition, I hardly expected to secure as many recruits as has proved the case." The young men who enlisted here enter the navy in the capacity of apprentice seamen for a period of four years. The Wolverine will leave this morning at 8 o'clock for Houghton, where a week's recruiting will be done.

### GRANDS OPENS TODAY.

Moving Picture Show in New Theater in Greenwald Block.

The Grand, Lawton and Joyce's new electrical theater in the Greenwald block, will open today, with afternoon and evening performances. The program of pictures is "House Furnishing Made Easy," "The Stolen Bride" and "The Curfew Will Not Ring Tonight." The illustrated songs will be "Clover Blossoms," sung by Herbert Barrett, Calumet's popular baritone, and "Wait 'Till the Sun Shines, Nellie," sung by James Ryan, a sweet voiced tenor. The Marquette Grand is a fine little house. The room is of good size, has been thoroughly renovated and is decorated in excellent taste. The front, which was put in at a heavy expense, has caused much admiring comment the past few days. It is not gaudy or garish, but is pure white, with neat lettering making a few dignified announcements. The entrance and exit doors are provided with brass foot and hand plates. There is a brass rail in front of the box office and the windows of the office are lettered with gold. The front is brilliantly lighted, and adds to the appearance of the street. Lawton and Joyce will present only moral pictures, such as all classes of people may see without least offense. The concert, which will be conducted in the most exciting manner.

### "WHITEY" PEVERETTE IS STILL AT LARGE

NO WORD HEARD FROM HIM YET—TERDAY—HE LOOSENEED HIS SHACKLES RIGHT UNDER OFFICERS' EYES.

No word was received yesterday regarding the whereabouts of Albert Peverette, the convict who escaped from two officers of the Ionia asylum for criminals near the entrance to the Marquette prison at midnight Thursday, and the Ionia men left for their home yesterday afternoon, after spreading the news of the escape among the police officers in the neighboring counties and taking other steps for the apprehension of the fleeing prisoner.

The Ionia officers were in consultation with Marshal Manning yesterday regarding the case, and had his cooperation in their efforts to apprehend the fugitive. They were much downcast at the escape. Superintendent Grant in particular being out of spirits at the occurrence. Peverette's legs were shackled, but he was not handcuffed. Indeed because he had lost a hand he could not wear handcuffs, and the precaution of handcuffing him to one of the officers was omitted.

It was the opinion of the Ionia officers and of the local police yesterday that Peverette loosened the shackles on the road to the prison. They were secure when he left the train, as he walked about the station. On the road out he complained of the cold, and thrust his hands under the lap robe which was being used by both him and the officers. It is thought that he released the shackles shortly after he did this. That it was an easy trick to do this was shown yesterday, when the locks of the shackles were sprung open by inserting a bit of wire at the keyhole.

Peverette had been wearing the shackles at Ionia before he was taken north, and on the trip up he boasted to the officers that he had never been clattered up with them when he was left alone; that as soon as the guards were out of sight he sprung the locks and took them off. The officers paid no attention to this talk, thinking that it was empty boasting. The issue proves that it was probably very well based.

Superintendent Grant's companion, whose revolver "broke" when he drew it with the intention of trying a pot shot at Peverette, yesterday told the Marquette officers that he wasn't sure that it was loaded; that he hadn't found any shells. It is possible that Peverette's escape was aided by confederates. His associations with criminals are very intimate, and it is not at all improbable that he had help.

Whether he will be retaken is problematical, though sooner or later he will doubtless be apprehended again. On account of his missing hand, he is an easy man to identify, and will doubtless be identified many times before he gets out of the peninsula. However, not every man would tackle the job of arresting him, because of the reputation he bears. But he is not armed, and could probably be taken with impunity by a man with the requisite nerve.

HARLAN STOCK COMPANY. Is to Open a Week's Engagement Monday Night.

The Rita W. Harlan Stock company is an organization not known of north of the straits, but from which excellent reports are had from lower Michigan cities where it has appeared. It charges the same scale of prices as the Mack-Leone company, and is said to be of about the same rank. It promises a good line of plays. Its opening bill here will be "The Atone ment." Of the company and play the Traverse City Evening Record said: "As an emotional actress, Rita W. Harlan has few superiors. Her interpretations are so true that they cannot help but strike a responsive chord in her audience, and there was no one in the Grand last evening but that was genuinely sorry when the last act of 'The Atone ment' had been reached, although the piece is composed of five acts. Miss Harlan's summary is not a common 'stock aggregation' but is composed of people of merit, for example, Thomas F. Swift in the old man character. Mr. Swift's picture of senile gallantry was the comedy element, and the criticism was all flattering. Duncan Penwarden as the villain handled his part well, as did all the other members of the cast. The company was chosen for excellence rather than numbers, and the effect is fully apparent. Tonight 'Friends' will be given, and the company should have even a larger house than it did last night."

### SACRED CONCERT.

Lovers of Music Promised Treat at Methodist Church Sunday Evening.

The members of the choir of the Methodist church, assisted by Miss Retallie and Miss Barry, have prepared a fine musical program to take the place of the usual evening service tomorrow. The following are the special numbers: Quartet, "O Holy Father"; Moderato Misses Chase, Berg, Barry and Richardson. Trio, "Praise Ye the Lord"; Giesbel Mrs. Thompson and Misses Berg and Richardson. Violin solo, "Cavatina"; Raif Miss Edith Barry. Duet, "Hark! Hark! My Soul"; Shelley Misses Chase and Berg. Solo, "Come Unto Me Ye Weary"; Patton Miss Elora Retallie. Quartet, "Aldie With Me"; Parks Misses Chase, Berg, Barry and Richardson.

### SMITH-FLINT NUPTIALS.

Miss Nellie Smith, of Marquette, and A. H. Flint, of Montreal, were united in marriage at the Episcopal church parlors, Wednesday evening at 8:30 o'clock, in the presence of a small gathering of intimate friends. Rev. Bates Burt officiating. Miss Smith is a popular young lady and has many friends. Mr. Flint, who represents the Underwood Typewriter company, is well known here, having made Marquette his headquarters for some months. A supper was served for the bridal couple and a gathering of friends at the residence of Mrs. G. E. Watts, a sister of the bride. Mr. and Mrs. Flint will make their residence in the city, living on the corner of Hewitt avenue and Fourth streets.

### SUNDAY AT THE CHURCHES.

First church of Christ, Scientist—Service Sunday at 10:30 a. m. Subject, Sacrament. Felix Hall, Opera House block.

Methodist—In the morning the Sabbath school will give the annual children's day entertainment; in the evening the organist and choir, assisted by Miss Retallie and Miss Barry, will render a very helpful program of sacred music. A cordial invitation is extended to the public to attend both of these services.

At the Baptist church at 10:30 o'clock tomorrow morning the pastor, Rev. C. H. Maxson, will deliver a sermon on the theme, "Non-Resistance," a study in the Sermon on the Mount. At the evening service, at 7:30, the first of a series of talks on "Vacation Scriptures" will be given on the subject, "White Sulphur Springs and the Allegiances."

Hotel Williams, Grand Island, Muncie, Michigan, has opened its third year with a large number of reservations for the whole season. Local and out-of-town people are arranging to spend the summer on the island, which indicates the popularity of this resort.

It's a sure thing that we hold the winning hand in every Spring suit we show, because we play Quality to the limit and back it with winning cards: Style, Fit, Finish and Fine Tailoring. We're showing the biggest variety of good fabrics ever seen in town; we'd like to show you our Mid-summer Worsteds in blue or gray fashions dictum for Mid-summer wear. You will appreciate the good points the more when you learn the low prices we ask.

Your Footwear ought to be a matter of considerable importance. Good fitting Shoes helps to one's contentment with life. Ours do fit right. Shoes or Oxfords \$3.50 and \$4.00. Bench work grades \$5.00 to \$6.00.
