Six Armenians, One a Priest, Rounded Up at New York.

A GREAT ARMY HOSPITAL.

Washington, July 29 .- The plans for

he establishment of a large army gen-

eral hospital and medical station in the

District of Columbia, beyond the Sol

hospital building is now under construc-

about six months. It is intended to re-

move to this place the army medica

chool, which is now accommodated in

reservation. There will also be estab

lished two companies of the hospita

corps for the purpose of instruction and

lemonstration. There will be a post-

graduate school for the benefit not only

of the newly appointed assistant sur

geons, but for older officers who desire

some line of scientific investigation. This

Jury's Verdict a Surprise,

Discussion of the verdict in the Haywood case was widespread today, the ousensus of opinion being that the jury one its duty as it saw it, and t should not be criticised. The editorial comment of the local papers is to this effect, the Daily Statesman saving: "The Statesman, in common with the creat mass of people, regrets that the trial of Wm. D. Haywood for the murder of former Governor Frank Steumenberg esulted as it did. The verdict came as great surprise, as it had not been suposed that such conclusion would reached, even the defense according to best information obtainable hoping for othing more than a hung jury. "But the ease has been decided by on Idaho jury under the facts as they ound them and the law as laid down y the court, and it is the duty of all, in all cases fairly and fully submited to our constituted tribunals of jusice, to accept the result in that spirit of loyalty to our courts which is a necessary attitude of mind on the part of the citizens of the republic if our rights are to be protected and peace and ader and good will are to reign."

Ore was taken from five miles with arrests soon. small crews. No trouble was reported during the day. At all mines working armed deputies were watchful for the least sign of disturbance.

Deputies Called "Armed Thugs."

Denver, July 29 .- James Kerwin, acting seretary of the Western Federation of Miners, received the following tele tion and is expected to be finished in gram today from Acting President C E. Mahoney, now in charge of the Minnesota iron workers' strike."

"Conditions over the range look favorable, Very few men are working, Armed thugs in the employ of the steel trust seek to create violence." At the federation headquarters it is

said that 20,000 men are on strike.

NEGRO VOTER WILL SOON BE DISFRANCHISED IN GEORGIA, to take up some special study or pursue

The lack of success of the recruiting ship Wolverine in getting men for the U. S. navy continued all the way on her trip on Lake Superior to Duluth. The cruise has been most disappointing in erally held to be unlikely that there the number of men enlisted. This is doubtless to be ascribed to the demand for men on shore, and the good wages and opportunities offered. When labor is in big demand at the highest recorded rates of pay, Uncle Sam's \$13 for the army or \$16 for the navy cannot be made to look very attractive, no matter how skillful a recruiting officer may be in throwing an inviting glamour ratified, on both sides. Before we about army or navy life. The fault for the comparatively meager success of the Wolverine's recruiting trip does not lie with its officers. They have done their work well enough. The blame is to be attributed to circumstances beyond their control.

The Haywood trial is ended with the acquital of the accused. The prosecution expresses dissatisfaction with the out come, and will push the other cases. The verdict, however, will doubtless be accepted as fair by the vast majority of people. The jurymen were of a good average of intelligence and apparently wanted to do what was right. The court was impartial and open minded in its conduct of the case. There was a heavy weight of evidence against Haywood, but much of it-the story of Orchard in particular-was unsatisfactory evidence. Probably most people who have \$4,000,000. The sinking fund of a milfollowed the case believe that Haywood lion dollars a year and the expenses of is in some degree guilty of the things he is charged with, but not as guilty as a flat verdict to that effect in the case just concluded would have pronounced him to be. The outcome-the whole conduct of the trial-confounds those hot headed critics who insisted that the accused could not get a fair trial. Incidentally the proceedings have aroused a general horror of strike violence, mak-

family appeared to use either of the very highly of him to The Mining Jourbright steady boy who had a good future. his right. The boy was well liked by his employer and the trade and was generally liked in Hancock, where he had lived all his life. He was the only son of his parents. Story of the Tragedy.

Many conflicting stories and opinions were abroad yesterday concerning the shooting and the incidents of the sham battle in which young Lukkanen lost his life. The Mining Journal reporter was present and secured all the facts as far kanen's body as that a militiaman acas could be, though how the boy was shot is a matter of conjecture. The Houghton Light Infantry, the

Hancock Naval Reserve and the Calumet Engineers assembled Sunday morning at the Calumet armory and marched out to the links of the old Calumet Golf club, near Swedetown. Here the morning was spent in company drill in extended order and in battalion drill under to the organizations, deplore the fact command of Captain Heckel of Houghton. Lunch was served at noon and a plan was framed for a sham battle in help but have an effect detrimental to the afternoon to complete the maneuvers. The Engineers had thrown up intrenchments during their morning drill, ting into good condition, are growing and they were selected to defend the club house, which was to be the objective of the battle. The Houghton and Hancock companies marched back over

the hills and into the woods for a dis tance of about a mile. A crowd of fully 2,000 people had Justice Olivier Will Listen to the Cases

gathered to witness the sham battle. The three companies were supplied with about twenty rounds of blank ammunition each. After this was issued in

hearing the court cound decline whereast as alleged in the bill, our purchase of shares as above related was contrary to produced from the Osceola lode 6,892,548 intersection of the Knowlton shaft and only a few rods to the south of the

Mineral Range railroad track. About a dozen men are employed, and the work s progressing without interruption. A pit four or five feet in width has been opened nearly across the formation. The clay overburden varys from a few inches to several feet in thickness. On the hanging wall side the lode has been stripped for some little distance and a five bunch of copper is being taken out by blasting. The lode carries copper clear to the surface and all along the pit an be found unmistakable evidence of its richness. Work has been started on pening a second pit at a distance of a ndred feet or so from the first one. This is for the purpose of securing the lip and stike of the lode. The location f the shaft has not yet been determined. ut as soon as the explorations have een carried far enough to assure the anagement of the character of the lode, evelopment work will begin and will e pushed vigorously.

ugh a

Captain Richard Warne,

The work at the Lake is attracting much attention and the property has been visited by a number of min ing men and others who are keeping lose tab on affairs in that locality perations are being continued in the Knowlton shaft of the Lake property Drifting is underway at the third level and some excellent rock is being taken out and considerable heavy copper is being found.

Unwatering White Pine.

The old shaft on the White Pine prop rty, which is held under option by the alumet & Heela, is to be unwatered. Diamond drill explorations are being coninned on the property, two outfits being used. A large number of holes have been put down, and it is reported that some of the cores show the rock to be very highly mineralized.

The Davis-Daly company already has xpended about \$400,000 in development uk, the policy being confined wholly the opening up of the various proprties rather than to any development ore reserves.

NOTES OF COPPER NEWS.

The Butte & Bacorn company has mpleted the cutting of a station at the 000-foot level and has started to crossut north and south. The progress of the work is being watched with great nterest, as mines are in practically a new district.

It is estimated that the Copper Queen und Calumet & Arizona smolters at Bisce will require 3,000 tons more ore laily than is now being treated, after he new furnaces new being installed are blown in. By Nov. 1, at least a third more men will be required in the Warren district.

"I should think ill of any man who did not wish to leave his children a little better off materially than himself."-Theodore Roosevelt.

Study the lives of our successful men and in almost every case will be revealed the history of a poor boy whose father could only afford to give him an ordinary education. He starts out on his career knowing that no one will leave him a fortune-he must make his own way. He sees that MONEY IS POWER-WEALTH the FACTOR of the age. He begins by saving a portion of his earnings; he deposits in a safe bank and watches the amount grow until he soon has enough to take advantage of some good investment. The rest is easy. This Bank receives deposits of \$1 upwards and pays 3 per cent interest, compounded semi-annually.

September opened at 39 to 1/4; highst, 40; lowest, 39; closing, 39%@ 3/4. Receipts and shipments were as fol-Receipts. Shipments. flour, barrels 16,000 10,000 Wheat, bushels 84,000 24,000 613,000 Corn, bushels 198,000 Dats, bushels123,000 257,000 Wheat Summary.

Paine, Webber & Co. said yesterday ncerning the wheat market: "After making an advance of 21/2 from the low point Saturday, the market reacted a fraction more than one cent today. Perhaps the chief difficulty in the way of a bull market today was the inliference of the Northwest market to the numerous black rust reports coming a from Minnesota and the Dakotas. here is no doubt that black rust exists n the spring wheat country. It is now question as to whether or not it is to pread and become injurious to the crop

This will be determined entirely by th veather in the near future. Today the up shows conditionsdecidedly against he development and spread of the black rust. This fact alone was important in causing profit-taking and a moderate selling pressure on the late decline, after the market had shown decided strength during the morning on fresh black rust

reports. Aside from the question of rust damage to the spring crop the news is said today: of a good supporting character for wheat. New York reported foreign-

is prepared for a record quarterly show

New York Central was subject to ru mors of a bad showing of earnings to the last quarter. Reports of rust in th spring wheat region were of some affect on stocks. The call money market felthe influence of the growing demand up on the bank resources, and the rise in the call loan rate contributed to th late weakness of the stock market.

Paine, Webber & Co, telegraphed from New York vesterday as follows: "The feeling at the close today rather pessimistic and the case with which prices receded has caused consid erable apprehension, although it is gen erally known that the trading is mostly professional. The weakness in coppemetal and lower quotations for consol were disquieting, and the former caused considerable pressure on Amalgamated copper, especially in view of the fact that metal prices were reduced one-half cent on the New York metal exchange Saturday's bank statement not being a favorable as expected has caused con siderable doubt as to the probability o easier money in the near future. In fact it would seem that the tendency would be to gradually harden, in view of the crop moving period. The professional

will perhaps sell the market to a stand still, and the creation of a short inter est will undoubtedly be made the basi of a future rally."

Owing to the reduction in the price of opper and the comparatively light sales f the metal to consumers, there natur-Ity arises some question as to the mount of the next dividend on Quincy nining shares. Directors are scheduled o meet for action in about a fortnight, and the principal factor which will inuence the next dividend will be the quantity of copper sold up to the time f the meeting, and covering the past three months. A director states that the board is committed to the declaration of quarterly dividends of \$4.50, "if earned." The present price of 22@23 cents for lake copper is not of primary importance as governing the amount of the next dividend, the main consideration being he quantity which has been sold at high prices.

For the six months ended June 30, the ompany sold its entire output at an verage of close to 24 cents per the highest price being 26 cents in March. This director believes the company will receive an average price of 23 cents for ing interests in the company are figuring on a copper production this year of at least 20,000,000 pounds, compared with 16.194.838 pounds, in 1906. Basing the cos tat 11 cents per pound including contruction, earnings per share may be estimated as follows:

221/2e. Pounds. 20,000,000 \$20.90 \$16.35 \$12.71 8,000,000 ., 18.81 14.71 11.43 While the company has on its payoll approximately 2.000 names, company is employing regularly 1,700 nen. The amount of rock hoisted now mounts to 4,000 tons a day.

In 1904 there were four shipping mines—La world's richest silver district. In ***************** Last week five Cobalt and Larder Lake Rose, Tretheway, Nipussing and McKinapanics were incorporated, with a ley-Darragh-the output being 150 tons ore, valued at \$136.218. In 1905, in The Nova Scotia is reported as having dition to the above mentioned comany, the Kerr Lake, the Victoria, Buff ala, Lawson, White Silver, University, atts, Temiskaming and Hudson's Bay, iclet, Drummond and O'Brien mines hipped ore, the total ontput amounting 2,144 tons, valued at \$1,468,524. In 906 many other properties sent out ore. he shipments totalling 5,120 tons valued t \$3,900,000. These figures include the chait and arsenice values in the ore, for chich, in many instances, little or nothng was paid to the shipper. In consid ring the above figures it must be noted hat they represent only the ore shipped. the actual production of the camp was such greater, as large quantities of ore were stored on several properties. Ore, cplorer of London, has made an ex- which, in any other camp would be conidered high grade, is thrown on the umps at Cobalt on account of the high freight rates to the smelters, making it and north of the Height of Land is re- unprofitable to ship. The great bulk of te ore goes to the smelters in the vicinry of petroleum, which was flowing out ity of New York City. The impossibilty of sampling the ore with any degree of accuracy makes it impossible to put any check on the smelters, and at present the shipper can take only what he smelter is willing to give him for the ore. The camp needs a custom sampling works on the ground. Thousands of tons of low grade ore now on the dump ould be then shipped at a profit to the The record of the first six whers. onths of 1907 shows shipments of A suit has been entered by the Flor-8,431 tons of ore, valued at \$4,900,000, as igainst 5,150 tons for the whole of 1906 valued at \$3,900,000. It is considered rather remarkable that the Nipissing ompany, with 840 acres to draw from has shipped less ore this year than the oniagas company with but forty acres, This is because the directors of the Nip-The issing have given instructions to General Manager Drummond to ship only sufficient ore to pay operating and developnent cost, and pay dividends at the rate of 15 cents per annum. He is carrying ut these instructions and is able to Latest reports from Cobalt state that make sufficient shipments from developnumber of the union men have gone ment work to meet the directors' reack to work while others have left the quirements. The reason that the direcunp for good. Not more than about tors have taken this conservative atciancial sceretary all assessments and dues eight or nine hundred strikers are at tude is larger because of the unfavorpresent living in the camp. As for the able underground developments in what ining companies which signed the ownwas known as the "bonanza vein 49." ers' schedule, they are apparently per but which is no longer in bonanza. It sistent in their determination not will be recalled that this vein when disrecognize the union or the Western Fed-eration of Miners.
