

SWOOPING DOWN UPON THE FRENCH

Proclaimed Sultan by the Revolutionary Soldiers, Brother of the Moroccan Monarch Puts Big Army in Motion.

Marching at the Head of Fifteen Thousand Fanatical Warriors of the Desert, He Races to Join the Forces Already Besieging Casa Blanca, and the Fiercest Battle of All, It Is Feared, Is Near at Hand for General Drude's Tired Troops.

San Sebastian, Spain, Aug. 22.—The Spanish consul at Mogador, Morocco, has confirmed by telegraph the report of the proclamation by the rebels of Mulai Ilag, the sultan's brother, as sultan.

Fierce Battle Imminent. Tangier, Morocco, Aug. 22.—Fifteen thousand infuriated Moors, under the leadership of Mulai Haig, brother of the sultan, and himself yesterday proclaimed sultan by the revolutionary soldiers, are marching upon Casa Blanca.

Fearing that the bloodiest battle of the present French occupation of Morocco is only a matter of hours, the French government has ordered additional reinforcements to proceed post-haste to the beleaguered city.

Upon telegraphic orders from the French government a battalion of Algerian sharpshooters and half a squadron of cavalry embarked today from Oran, Algeria, prepared to make the quickest possible trip to Casa Blanca. Even if these additional fighting men reach the city before the Moors there is little hope that a most sanguine conflict will be averted.

Three new columns of warring tribesmen swelled the ranks of fanatics before this city yesterday, and the discouraged French troops decided that their present force would be inadequate to put down any determined attack which the Moors might make. The soldiers are worn out with their long vigil, and it was their evident discouragement which led General Drude to ask further reinforcements.

Reckless Courage Shown. Casa Blanca, Aug. 22.—Twelve Frenchmen were wounded during the fighting of yesterday morning. They include Captain Detalles, of the foreign legion. A battery of 75-millimeter guns was disembarked from a transport and used shrapnel with tremendous effect upon the enemy. The Arabs again showed reckless courage. They would ride close to the French entrenchments and fire persistently until dispersed by the fire from the cruiser Gloire. The cruiser Gueydon has bombarded the port of Fidalah, north of Casa Blanca.

Sultan's Troops Defeated. Tangier, Aug. 22.—The government troops under the command of El Merani, uncle of the sultan, have been defeated by the Knass tribesmen. El Merani has retreated in the direction of Algezar. El Merani's defeat means there is danger of the tribes looting Algezar. Three days ago Raisuli, who is holding "Caid Sir Harry Maclean prisoner, was not more than eight miles from El Merani's headquarters.

NOT RELISHED IN GERMANY. French Occupation of Morocco Promises to Be of Long Duration.

Berlin, Aug. 22.—The attention of the German government is fixed upon the events at Casa Blanca more than upon any other subject in Germany's external relations. The presumption of course is that the French government will observe its declarations at the beginning of the operations and will remain in Morocco only long enough to restore order. Yet the indications are that France's definition of that period will depend on developments in the situation, and it may be a long one. Dispatches from the German embassies at Madrid and Paris report that negotiations have been begun between France and Spain looking to hastening the organization of the internal Moroccan police.

RESENTED BY FILIPINOS. Suppression of the Katipunan Flag Ordered by the Government.

Manila, Aug. 22.—The government has given orders for the suppression of the Katipunan flag in the Philippines, and to stop the sale of Katipunan emblems. The Katipunan flag is a white flag with a red triangle at the top, and the letters "K" and "A" in black on a white background. It is a symbol of the Katipunan movement, which is a secret society that has been active in the Philippines since 1892. The government has ordered that the flag be destroyed, and that anyone who is caught with it be punished. The Katipunan members are angry at this order, and they are planning to resist it.

GERMAN EMPRESS HURT. Injuring Leg, Playing Tennis, She Will Be In Bed for Weeks.

Wilhelmslohe, Aug. 22.—Empress Augusta Victoria fell in the park yesterday while playing tennis. She injured her leg and will be confined to her bed for some weeks.

WARSHIPS HOMEWARD BOUND. Washington, Aug. 22.—The four armored cruisers of Admiral Dayton's squadron, the West Virginia, Colorado, Maryland and Pennsylvania, which have been coaling in the Japanese port of Yokohama for four or five days, are now homeward bound by way of Honolulu.

DRUG ON THE MARKET

New York City Bonds Unsaleable at 4 per Cent. Rate Is Increased to 4 1/2.

New York, Aug. 22.—Owing to the present stringency in the money market the city of New York was obliged today to raise the rate of interest on the bonds it now has for sale from 4 to 4 1/2 per cent.

The mayor issued an order to the heads of all city departments requesting them to limit the expenditures of their departments to the lowest point consistent with efficient administration.

Stock Exchange Firm Assigns. The failure of Mills Bros. & Co., members of the Stock exchange, was announced today. The firm was not prominent.

H. Snowdon Marshall, personal counsel for Richard A. Canfield, said that Mills Bros. were indebted to Canfield in the sum of \$91,000. He said the firm had been doing business for Canfield for some time.

Pope Affairs to Be Probed. Chicago, Aug. 22.—The affairs of the Pope Manufacturing company, which recently went into the hands of a friendly receiver, are to be investigated by a committee of creditors representing \$2,000,000 of the firm's indebtedness. This was decided here today at a conference of these creditors at the company.

LICQUOR SOLD NAVAL CADETS. Authorities at Annapolis Join Hands to Put Stop to the Practice.

Annapolis, Md., Aug. 22.—The recent report to the naval authorities by the Wainwright board on the conditions surrounding candidates for the naval academy and midshipmen while in Annapolis was the subject of a conference between Mayor Gordon H. Claude of Annapolis and Superintendent C. J. Badger of the academy today. Captain Badger said that certain places in Annapolis were understood to permit the sale of liquor to midshipmen as well as candidates. The authorities will work together to break up this custom.

CANAL WORK NOT TO SUFFER. President Has Authority to Over-Rule the Appropriations, It Is Decried.

Washington, Aug. 22.—A careful examination of the law governing the construction of the Panama canal has satisfied acting Secretary of War Oliver that the president is authorized to grant the request of the admiralty to suspend the law for permission to create a deficiency of \$8,000,000 during the current fiscal year to meet the requirements of the engineer department for an enlarged scale of operations. The president has been so advised.

WRITES ROOSEVELT. Practically Assured New Court of Arbitration Will Be Created.

The Hague, Aug. 22.—The text of the American proposition for the establishment of a permanent court of arbitration has been completed in an agreement with Germany and Great Britain, and will come up for discussion Aug. 28. The redrafting of the American proposition regarding the collection of contractual debts according to the observations made during the debate has practically been finished. The only important alteration from the original text is the elimination of the words "implying the use of naval and military forces" where it says "it is agreed that there shall be no recourse to coercive measures implying the use of naval or military forces for the collection of said contractual debts."

Fisheries Dispute to Be Arbitrated. Ottawa, Ont., Aug. 22.—The fisheries difference between Canada and the United States in reference to the Magdalen Islands will probably be submitted to the Hague tribunal jointly with the New Foundland case. Some members of the government here suggest submitting all of Canada's differences with foreign powers hereafter to The Hague.

EUROPEANS FALL VICTIMS. Serious Epidemic of Cholera Breaks Out at Shanghai, China.

Shanghai, Aug. 22.—Cholera has broken out among the Chinese here. Several Europeans have succumbed to the disease.

War Declared on Yellow Fever. Washington, Aug. 22.—Complying with Secretary Taft's directions, Governor Magdon of Cuba has taken vigorous measures to combat and eradicate the yellow fever which has appeared among the soldiers and civilians at Ciego de Avila.

WILHELM AT NEWPORT. Swedish Prince Is Guest of Mrs. Stuyvesant Fish at Dinner.

Newport, R. I., Aug. 22.—The Swedish armored cruiser Fylgia with Prince Wilhelm of Sweden on board arrived here today from Jamestown, Va. The prince was entertained at dinner by Mrs. Stuyvesant Fish tonight and later attended a dance given by Mrs. Edward J. Herwind.

PURE FODD BILL FOR BRITONS. London, Aug. 22.—The pure food bill which was adopted in the house of commons Aug. 16 passed its second reading in the house of lords today by a unanimous vote.

RUSSIAN COURTS-MARTIAL BUSY. Riga, Aug. 22.—During July the court-martials in the Baltic provinces condemned twenty-six persons to death and sent thirty-one to exile.

MISSISSIPPI FIGHT CLOSE. Memphis, Tenn., Aug. 22.—The second primary election for the Democratic gubernatorial nomination was held in Mississippi today, the contest being between E. F. Noel of Holmes county and Earl Brewer of Choctaw county. Early reports from twenty-four towns in north Mississippi gave Noel a lead of 208 votes.

MISSING VIOLINIST SAFE. Berne, Switzerland, Aug. 22.—Francis Rea MacMillan, the American violinist reported lost on Mount Blanc, is safe.

DISASTROUS FIRE AT CINCINNATI

Entire Block of Buildings Is Destroyed, Entailing a Loss Estimated at Somewhat More Than a Million Dollars.

At Pittsburg, Pa., Flames Originating from Explosions of Gasoline in Two Clothes Pressing Establishments Lick Up \$250,000 Worth of Property and for a Time Threaten the Entire East End Section of the City—Eight Large Structures Wiped Out.

Cincinnati, Friday, Aug. 23.—Fire that started at 9 o'clock last night destroyed the entire block at Hunt and Broadway streets, entailing a loss it is estimated probably exceeds one million dollars. The fire, it is said, started in the Eagle White Lead plant and spread to the adjoining buildings.

At 1:30 o'clock this morning the following buildings had been destroyed: B. H. Kregler Grocery company's warehouse, Morrison & Snodgrass' planing mill and the plants of the Acta Smelting company, D. E. Williams Valve company, Roberts Lumber company, Krohler Printing company, and Bardick Wagon company.

Heavy Loss at Pittsburg. Pittsburg, Aug. 22.—Two fires due to explosions of gasoline in clothes pressing establishments today caused damage estimated at \$250,000 and for time threatened the entire east end section of the city.

The first fire broke out shortly before noon in the plant of the Club Pressing & Cleaning company. The three-story brick building was destroyed, and fourteen employees were rescued from the windows by firemen.

The second fire was more serious, and before it was controlled seven buildings were wiped out. The blaze started in the Enterprise Pressing company's shop, and spread with great rapidity. The flames leaped fifty feet in the air. Between the burning block and the handsome East Liberty market house only a narrow lot intervened. This building escaped, however. Four firemen were hurt.

AMERICAN PLAN ACCEPTED. Practically Assured New Court of Arbitration Will Be Created.

The Hague, Aug. 22.—The text of the American proposition for the establishment of a permanent court of arbitration has been completed in an agreement with Germany and Great Britain, and will come up for discussion Aug. 28. The redrafting of the American proposition regarding the collection of contractual debts according to the observations made during the debate has practically been finished. The only important alteration from the original text is the elimination of the words "implying the use of naval and military forces" where it says "it is agreed that there shall be no recourse to coercive measures implying the use of naval or military forces for the collection of said contractual debts."

Fisheries Dispute to Be Arbitrated. Ottawa, Ont., Aug. 22.—The fisheries difference between Canada and the United States in reference to the Magdalen Islands will probably be submitted to the Hague tribunal jointly with the New Foundland case. Some members of the government here suggest submitting all of Canada's differences with foreign powers hereafter to The Hague.

EUROPEANS FALL VICTIMS. Serious Epidemic of Cholera Breaks Out at Shanghai, China.

Shanghai, Aug. 22.—Cholera has broken out among the Chinese here. Several Europeans have succumbed to the disease.

War Declared on Yellow Fever. Washington, Aug. 22.—Complying with Secretary Taft's directions, Governor Magdon of Cuba has taken vigorous measures to combat and eradicate the yellow fever which has appeared among the soldiers and civilians at Ciego de Avila.

WILHELM AT NEWPORT. Swedish Prince Is Guest of Mrs. Stuyvesant Fish at Dinner.

Newport, R. I., Aug. 22.—The Swedish armored cruiser Fylgia with Prince Wilhelm of Sweden on board arrived here today from Jamestown, Va. The prince was entertained at dinner by Mrs. Stuyvesant Fish tonight and later attended a dance given by Mrs. Edward J. Herwind.

PURE FODD BILL FOR BRITONS. London, Aug. 22.—The pure food bill which was adopted in the house of commons Aug. 16 passed its second reading in the house of lords today by a unanimous vote.

RUSSIAN COURTS-MARTIAL BUSY. Riga, Aug. 22.—During July the court-martials in the Baltic provinces condemned twenty-six persons to death and sent thirty-one to exile.

MISSING VIOLINIST SAFE. Berne, Switzerland, Aug. 22.—Francis Rea MacMillan, the American violinist reported lost on Mount Blanc, is safe.

WEATHER FORECAST

Washington, Aug. 22.—The following is the weather bureau's forecast for Upper Michigan: Showers, possibly thunder squalls, Friday and Saturday; increasing south winds.

MANY LIVES IMPERILED

Dastardly Attempt Near Cripple Creek, Colorado, to Blow Up a Passenger Train.

Cripple Creek, Colo., Aug. 22.—An attempt was made today to blow up the incoming Short Line passenger train with dynamite at St. Peter's Dome, midway between Cripple Creek and Colorado Springs. Every window in the last car was broken, and M. J. McCarthy of Victor, deputy state mine inspector, had his hand cut. A similar attempt was made to blow up the same train at Dunfield yesterday.

DICK CHAMPION OF ARMY.

Washington, Aug. 22.—Senator Dick of Ohio, who has come to be regarded as the champion in the United States senate of the organized militia of the country, has also extended his interest to the regular army. Within a day or two he has been in Washington in consultation with officers of the army and navy in respect to the proposed increase of pay in these branches of the service.

BAD AUTOMOBILE ACCIDENT.

Hagerstown, Md., Aug. 22.—Mrs. W. Cyrus of New Jersey is in a hospital at Chambersburg, possibly fatally injured as a result of the overturning of an automobile in which she was riding about three miles west of Chambersburg this afternoon. Albert Kaufman of Carlisle, Pa., the chauffeur, was also badly injured. The automobile went over an embankment.

APPROVED BY THE PRESIDENT.

Oyster Bay, N. Y., Aug. 22.—President Roosevelt today approved the sentence of dismissal from the navy of Chaplain Jones, who was tried recently by court-martial for financial irregularities.

INSANE CONVICTS RISE IN REVOLT

Clinton Prison at Dannemora, New York, Is the Scene of the Worst Outbreak in the History of the Institution.

At a Given Signal, Inmates Slam Steel Doors in the Faces of the Guards and Try Desperately to Escape Through the Windows—Is Hours Before the Uprising Is Quelled, and Then Only After One Man Is Killed and Several Are Seriously Wounded.

Dannemora, N. Y., Aug. 22.—One of the worst outbreaks among the insane prisoners in the history of Clinton prison occurred last night. As a result Isaac Dubois, one of the inmates, is dead, shot through the heart by a guard.

The insane prisoners were being marshaled for bed when at a given signal they rushed into the two lower dormitories and slammed the doors in the faces of the guards. Having locked the doors they proceeded to set about making their escape by smashing doors and sawing bars. Some of the less violently insane helped the jailors.

Seeing that the struggling convicts could not be reached through the steel doors, the guards turned on them from the windows streams of water. This kept them at bay, but did not subdue them. The guards were obliged to use rifles and pistols, and it was midnight before the uprising was quelled. Beside Dubois, who was killed, several other prisoners were seriously wounded.

DAUGHTER ACCUSES FATHER.

Revolt Story Related in Court by a Wisconsin Girl. La Crosse, Wis., Aug. 22.—Immediately after the death of his wife, according to sworn testimony in court today, Nicholas Weirich, aged fifty-five years, attempted to outrage his daughter, Christine, aged sixteen years. The girl appeared in court and, weeping bitterly, told the story of her father's behavior.

THREE MAY BE DEAD.

Five Men Entombed by Fall of Rock in a Pennsylvania Mine. Wilkesbarre, Pa., Aug. 22.—Five men were entombed today by a fall of a rock in No. 14 tunnel of the mine at Port Blanchard, near here, operated by the Erie Coal company. Michael Naughton, one of the men caught in the fall, after several hours' effort crawled from under the debris badly injured. Late tonight a rescue party reached John E. Eastice and brought him to the surface. He was not injured, but was completely exhausted. He begged them to hurry back and save the others. He fears they are dead.

MAN IS FEARFULLY BURNED.

Hurtled Into Cinder Pit by Fellow Workmen, Charles Davis Is Dying. Washington, Pa., Aug. 22.—Joseph Jack and Charles Davis, employees of the Standard Tin Plate company at Conowingo, quarreled in the mill today and the result is that Davis is not expected to recover from the burns he received. Jack, who is of powerful physique, seized his antagonist and carried him bodily to a cinder pit, where he hurled the man into the mass of red-hot cinders.

AUTOMOBILE KILLED PEASANT.

Chauffeur from New York to Be Tried in Switzerland for Manslaughter. Berne, Aug. 22.—Ernest Stahl, the chauffeur for Heinrich Conrad, director of the Metropolitan Opera House, New York, who ran down and killed a peasant with his automobile near Lachen, Switzerland, Aug. 6, was released today in \$1,000 bail after his employer had settled all claims for indemnity arising from the accident. Stahl will be tried on the charge of manslaughter.

AGONIZING DEATHS FOR THREE.

Man, Wife and Baby Perish in Flames in Indiana. Rochester, Ind., Aug. 22.—While the woman was kindling a fire in the cook stove at the family home near Mentone today, Mrs. Charles Webster's clothes caught fire. She ran into the bedroom where her husband and two-year-old baby girl were sleeping. All three were hurled to death and the house was destroyed.

BRIGHT LIGHT SEEN IN SKY.

Balls of Fire Follow Unusual Sight at Fitchburg, Mass. Fitchburg, Mass., Aug. 22.—A flash of light of intense brightness, followed by a great ball of fire and many lesser ones, formed in, and to these brilliant atmospheric displays ever seen in this vicinity. The light, with blinding force, appeared in the heavens about three this morning. The brilliant sheet of light seemed to open, and from within it fell a great ball of fire, disappearing below the horizon. Smaller globes of flame followed. [Not a sound accompanied the phenomenon.]

MAN'S FIGHT AT NEW LONDON.

New London, Conn., Aug. 22.—Richard Mansfield, accompanied by Mrs. Mansfield, his brother and a trained nurse, reached his summer home in this city this afternoon.

SOUGHT BY THE POLICE

Washington Bank Clerk Is Missing, Also \$11,000 Worth of Railroad Securities.

Washington, Aug. 22.—Edwin H. Potts, until a few days ago a trusted employe of the American National bank, is missing, and the police are looking for him on a charge of having stolen \$11,000 in certificates of Erie railroad stock. A warrant has been issued for his arrest.

MAIL CAR THIEVES GOT LITTLE.

Not More Than a Thousand or Two Stolen from Burlington Train. Chicago, Aug. 22.—Postoffice Inspector Kimball today after investigating the recent theft of two mail pouches on a Chicago, Burlington & Quincy train said that if \$250,000 had been stolen it must have been currency sent from Denver banks to New York. The inspector doubted very much, he said, that such an amount had been taken. He said there was no means of knowing whether the pouches contained \$250,000 or \$2,500, but the amount, whatever it was, must have been hoisted for New York.

NO BANK MAIL IN THE POUCHES.

Washington, Aug. 22.—A dispatch received here today from the postoffice inspector in charge at Denver, stating that there was no bank mail in the pouches of registered matter stolen Sunday night, supposedly from a fast train on the Burlington road. One of the pouches was empty, one had mail for distribution at Chicago for smaller cities north, south and east and the third had matter for Omaha and smaller cities in that vicinity. The officials of the postoffice department believe that the loss will not be more than \$1,000 or \$2,000.

BANK OFFICIALS ACCUSED.

Accepted Deposits, It Is Charged, Knowing Crash Was Sure. Portland, Ore., Aug. 22.—Warrants were issued by the district attorney today for the arrest of the officers and directors of the Oregon Trust & Savings bank, which closed its doors yesterday, a receiver having been appointed. The charge is accepting deposits after they were fully aware of the bank's unstable condition.

WAGONS DESERTED.

Strikers Leave Them in the Streets. Demanding Shorter Hours and an Increase in Pay, Beef Packing House Teamsters Walk Out in New York City. New York, Aug. 22.—The drivers and stablemen employed at the wholesale beef packing houses went on a strike tonight. They demand a uniform working week of six to five hours, an increase in wages. Both the independent companies and the so-called trust are affected.

APPEALS TO THE GOVERNOR.

Western Union's Mississippi Superintendent Asks Protection for Offices. Jackson, Miss., Aug. 22.—Superintendent Terhune of the Western Union Telegraph company appealed to Governor Vardaman today to furnish protection for the offices at Holly Springs, Grenada and Greenwood, stating that the operators have been forced to quit work at the two offices first named and the citizens of Greenwood are offering threats and indignities to the manager at that place. The governor replied that Superintendent Terhune should appeal to the courts, and if they are unable to enforce the law he will adopt special measures for protection.

HORNET STINGS TONGUE; WESTERN MAN NEARLY DIES.

Spokane, Wash., Aug. 22.—What physicians and apirists declare is one of the rare cases on record is that presented by Charles Thyre, a laborer at Troy, Idaho, east of Spokane, who was stung on the tongue by a yellow jacket hornet while eating his noonday meal. The hornet flew into his mouth and rammed the stinger home before the man could close his mouth. His tongue began to swell and by the time he reached town it nearly choked him. He could not speak or indicate in any way what the matter was, but finally blinnet and ice were applied and he told what had happened. The man's tongue was covered its entire length with a water blister. The physicians say he will recover.

SECRETARY TAFT IN KENTUCKY

War Department Head Opens the Republican State Campaign at Lexington—Is Convinced Race Problem Will Solve Itself.

Dixie's Lack of Representation in Councils of Nation He Declares Due to the Fact One Single Issue Has Made It the Tail of the Democratic Party—Appeals to the South to Line Up With the G. O. P. in Support of Principles He Believes It Favors.

Lexington, Ky., Aug. 22.—With a discussion of the race problem, general politics, issues from the Southern standpoint and an appeal to the Northern and other Southerners to come to the aid of the Republican party in support of those principles which he believed they favored, Secretary of War Wm. H. Taft today opened the Republican state campaign in this city.

Calling attention to what he called the South's lack of representation in the councils of the nation, he declared that this was true because one single issue has made it the tail of the Democratic party so that however small the Northern vote that he does not understand the difficulties of it, and that if he can't take it up with sympathy with the attitude of the white men of the South he had better not take it up at all.

"On the other hand, he is liable to encounter the criticism of the colored man who, with a natural sensitiveness and interest in his race and remembering the wrongs and oppression to which his race has been in times past subjected, resents on the part of the Northern man any attitude which does not involve condemnation of the attitude of the Southern white man or which manifests the slightest consideration for his view.

"I am not pessimistic with respect to the race question, and for his plain speaking it is working itself out, and I am convinced that nothing has so much contributed to its gradual solution as the Thirteenth, Fourteenth and Fifteenth amendments."

Mr. Taft discussed the problems confronting the country in the West Indies, and in the Philippines more briefly, especially considering the opinions of Mr. Bryan in connection with the administration of affairs in the Far East.

Tom W. Lawson Also Spoke. Marshallfield, Mass., Aug. 22.—In an address delivered at the Marshallfield fair today Congressman Samuel W. McColl discussed what he termed the tendency of the times to centralize all power at Washington, and urged strongly adherence to representative government. Thomas W. Lawson, president of the fair association, also spoke.

RONAPARTE ATTACKED BY ARMY OF CRANKS. All Sorts of Letters Come Because of His Plain Speaking.

Washington, Aug. 22.—Attorney General Bonaparte is now getting his share of crank army letters. His battle-cries upon the streets, and for his plain speaking he is being flooded with all sorts of letters from folks with a surplus of wheels. Some of the cranks are disorganizing the strike and sending telegrams. Most of the correspondents suggest that Mr. Bonaparte is trying to depress the market for his own purposes. Some suggest he has made a big fortune by being "short."

"Wire me when you cover your secret short interests," is one despatch sent by some one signing himself "A. Recker."

Newspaper clippings are being sent by the basketful. Some are so excited they send only empty envelopes. A San Francisco man has asked to be named receiver of the local tobacco trust. Many applications for appointments as receivers are coming in, and to these the reply goes that it is premature to consider resigners until the courts have acted.

Through it all Mr. Bonaparte appears happy and in high spirits.

BRIGHT LIGHT SEEN IN SKY.

Balls of Fire Follow Unusual Sight at Fitchburg, Mass. Fitchburg, Mass., Aug. 22.—A flash of light of intense brightness, followed by a great ball of fire and many lesser ones, formed in, and to these brilliant atmospheric displays ever seen in this vicinity. The light, with blinding force, appeared in the heavens about three this morning. The brilliant sheet of light seemed to open, and from within it fell a great ball of fire, disappearing below the horizon. Smaller globes of flame followed. [Not a sound accompanied the phenomenon.]

The sky was clear at the time and the stars were shining. The city electric lights on the streets were so packed by the light that they were apparently extinguished, and those who observed it were blinded by its power.

Many persons in the city were awakened by the sudden change of night into bright daylight.

MAN'S FIGHT AT NEW LONDON.

New London, Conn., Aug. 22.—Richard Mansfield, accompanied by Mrs. Mansfield, his brother and a trained nurse, reached his summer home in this city this afternoon.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

Well, what's the price of hay, anyway?

The people must rule, says Roosevelt. That's why Governor Warner wants the 40 per cent provision struck out of the present lunco primary election law.

There is no necessity for any of our prominent men doing any taking as long as we have so many manufacturers of fake interviews to put words into their mouths.

With a Republican and a Democratic newspaper and a water power canal that won't work one would think that the Soo had troubles enough, without trying to annex the firemen's tournament.

By the way, who is going to be our candidate for lieutenant governor? Let it be some genial dispositioned gentleman who can get a lot of fun out of just running for office.

The burning local question of the day is whether the council will get the water board or the water board will get the council. Meanwhile the open season for crossroads draws on apace.

The public that has read the addresses of the president and Secretary Taft is inclined to the opinion that the speakers must have read each other's addresses before they were delivered. At least there is no doubt about their being fully in accord with one another.

From the Soo a question is raised about Marquette's claim of the amateur baseball championship of the U. P. Any Soo aggregation that disputes it can doubtless get a game for the asking, and if the Marquette team is driven to the tall timber it will cheerfully surrender all claim to that distinction.

By general consent Senator Foraker's prompt pulling over of Secretary Taft's speech proves one thing—that the senator is agin' the secretary even to the last ditch, and that he is not going to allow any apprehension about retaining his present office to prevent him from having his free and frank say. Foraker's political courage and independence is a thing we can all admire, whether or not we chance to agree with him.

For further illumination of an attentive public The Mining Journal suggests that some other of the "rustics" make a census of North Marquette residents, name, street number, color and previous condition of servitude, together with the important information whether they would buy city water if it were delivered at their doors. Definite, detailed, up-to-date information on this subject would be interesting, in view of the contradictory statements that have been made regarding it.

The melodramatic appeal of some ninety alleged New York workmen to Governor Hughes, setting forth that they were "compelled" to work in the Mesaba mines as strikebreakers, after conditions had been misrepresented to them, would seem to show the fine Italian hand of Mr. Patriella, the press agent of the now badly enfeebled strike. A little more detailed information as to how these ninety presumably alibi-ed men are "compelled" to work when they don't want to might throw some light on the situation.

It is reported that the postal department will be appealed to in an effort to prevent Cal Houk from serving as a delegate to the constitutional convention, for which position he was nominated in the Thirty-second senatorial district lately. Mr. Houk is the postmaster at Ironwood, and the way the thing will be put up to the postal department is that he cannot well run his postoffice and help run the constitutional convention for a period of months. We should say it all depends on his deputy. If the deputy is good enough man Mr. Houk could doubtless help make the new constitution without any bad results at the Ironwood postoffice. However, it is just as likely as not that the stupid postal department will take a narrow minded view of the situation.

SUPERIOR TRUST COMPANY HANCOCK MICHIGAN Capital - - \$150,000 This company is under the supervision of the state banking department and is authorized by the law to act as executor, administrator, guardian, assignee, receiver or trustee.

Marquette has the tournament. It has it by two votes over the Soo, the ballot standing 22 to 20. The announcement that Marquette has the tournament will be the first intimation to a good many people here that the city wanted it. However, now that it has the meeting there will be no doubt that it will receive the Upper Peninsula Firemen's association with whole-hearted hospitality, and give its members and other visitors a few days full of lively entertainment. Marquette made a big success of the tournament of the association held in this city some years ago, and will doubtless next year come up to, if it does not surpass, that effort.

The municipal lighting plant is ship-shape again. The overhauling of the new wheel puts it in better condition than it has been at any previous time. While full tests have not yet been made, no doubt is expressed by the experts who have observed what the wheel has done since it has been put in operation again that it will develop the promised 1,200 horsepower, or a gain of fully a fourth over the horsepower previously available. This gain will enable the commission to satisfactorily take care of its old business and accept new business—such time as its proposed new plant has been installed. The overhauling of the wheel was a good stroke of business—one besides which the inconvenience that patrons of the plant had to put up with while the work was in progress is of little moment.

AGAIN THE PARCELS POST. Postmaster General Meyer's announcement that "with the consent of congress" the postoffice department will institute a post parcel service and establish postal savings banks does not make it certain that the government will embark upon these enterprises either immediately or in the future. It means, however, that the opponents of those projects will have to make a vigorous campaign. The chief opponents of the parcels post are not the express companies, notwithstanding the attempt of the projectors to make the people think so. By far the strongest opponents are the small retail merchants all over the country. A parcels post system which would enable the mail order houses in the large cities to deliver to customers in a city 200 miles away a package of groceries or dry goods as cheaply as a merchant in the purchaser's city can deliver a similar package with his own horse and wagon must certainly result to the disadvantage of the local merchant. Therefore he fears that the tendency of the system would be to concentrate the cash business in the hands of a few big firms in the very large cities and to leave for the local dealer only the customers who buy on credit. Naturally the small dealers are going to fight Postmaster Meyer's project and they will have a good many arguments on their side.

Nor is the argument at all one sided on the postal savings bank question. Such banks would be safe, and they would often be convenient, but there are objections to them. The money would be taken away from the town in which it was deposited and either be held by the federal government for its own use or invested in some kind of securities like bonds. It would not be available for local enterprises. The postal banks, therefore, would in many cases be detrimental to the welfare of the town no matter how beneficial to the individual depositors. There will also be, therefore, strong and well grounded opposition to this part of the postmaster general's plan. All of this has been said before and probably Secretary Meyer has some answer to it. If his answer is satisfactory he may get his plan adopted, but unless it is satisfactory and convincing he is not likely to.

SOMETHING OF A BREAK. Telephone mistakes may have their serious sides. A man who wanted to communicate with another named Jones looked in the directory and picked up a number. Presently came through the receiver a soft, feminine "Halloo," and he asked: "Who is that?" "This is Mrs. Jones." "Have you any idea where your husband is?" "I could not understand why she rang so sharply until he looked in the book again and discovered that he had called up the residence of a widow—Human Life.

READ ALL THIS. You Never Know the Moment When This Information May Prove of Infinite Value. It is worth considerable to any citizen of Marquette to know how to be cured of painful, annoying and itching piles. Know then that Doan's Ointment is a positive remedy for all itches of the skin, for piles, eczema, etc. One application relieves and soothes. Read this testimony of its merit: David Reichel, carpenter, of 115 Baraga St., Marquette, Mich., says: "For ten years I had itching hemorrhoids and though I tried remedy after remedy nothing brought me any relief. The itching was a continual torment. I could not sit still nor rest, and there was a continual desire to rub the inflamed parts. Someone advised me to try Doan's Ointment and I got a box at the Stafford Drug Co. It seemed as if the first application stopped the itching and I continued its use until my trouble was gone. Since then I have considered Doan's Ointment the greatest remedy of its kind on the market." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

tered out the entire national guard. It is said that the sentiment of the national guard is generally favorable to the enacting of an entire new military bill without delay, and that its members are hopeful that the governor will change his mind and present the whole subject to the special session.

According to the reports from Washington instead of continuing their stiff necked opposition to the administration the railroad corporations are preparing to line up with the powers that be, not only as a matter of wisdom, but for safety's sake. It is not that the railroads want additional restrictions placed upon them, but the restrictions imposed by a single authority are easier to comply with than the restrictions devised by as many different authorities as there are states in the Union. The railroads have resisted the extension of federal control over them, but what the state legislatures have done and what state officials are doing makes federal control seem like happy relief, and it is predicted that when congress meets again the railroads will be urging legislation instead of trying to prevent it. This attitude on the part of the railroads may be looked upon as indicative of the progress of reform. Instead of being arrogant and rampant the railroads are becoming humble. Had they been a little more submissive in the first place they would have been saved much of what they are now suffering.

AGAIN THE PARCELS POST. Postmaster General Meyer's announcement that "with the consent of congress" the postoffice department will institute a post parcel service and establish postal savings banks does not make it certain that the government will embark upon these enterprises either immediately or in the future. It means, however, that the opponents of those projects will have to make a vigorous campaign.

The chief opponents of the parcels post are not the express companies, notwithstanding the attempt of the projectors to make the people think so. By far the strongest opponents are the small retail merchants all over the country. A parcels post system which would enable the mail order houses in the large cities to deliver to customers in a city 200 miles away a package of groceries or dry goods as cheaply as a merchant in the purchaser's city can deliver a similar package with his own horse and wagon must certainly result to the disadvantage of the local merchant. Therefore he fears that the tendency of the system would be to concentrate the cash business in the hands of a few big firms in the very large cities and to leave for the local dealer only the customers who buy on credit. Naturally the small dealers are going to fight Postmaster Meyer's project and they will have a good many arguments on their side.

Nor is the argument at all one sided on the postal savings bank question. Such banks would be safe, and they would often be convenient, but there are objections to them. The money would be taken away from the town in which it was deposited and either be held by the federal government for its own use or invested in some kind of securities like bonds. It would not be available for local enterprises. The postal banks, therefore, would in many cases be detrimental to the welfare of the town no matter how beneficial to the individual depositors. There will also be, therefore, strong and well grounded opposition to this part of the postmaster general's plan.

All of this has been said before and probably Secretary Meyer has some answer to it. If his answer is satisfactory he may get his plan adopted, but unless it is satisfactory and convincing he is not likely to.

MARQUETTE COMMON COUNCIL PROCEEDINGS. (Official.) Marquette, Mich., Aug. 13th, 1907. An adjourned regular session of the common council was called to order at 8 o'clock p. m. by the mayor, the Hon. John Robertson.

Present—Aldermen: Asire, Campbell, Donovan, Downey, Ekstrom, Peters and Schauer. Records of sessions of July 1st and Aug. 15th approved. The following was presented: To the Common Council of the City of Marquette, Mich., Aug. 13th, 1907.

JOHN ROBERTSON, Mayor. Moved by Alderman Schauer, supported by Alderman Campbell, that the said appointment be confirmed. Moved by Alderman Asire, supported by Alderman Ekstrom, that the rules be suspended, and that said appointment be confirmed. Carried unanimously.

Notice to Property Owners. Take notice, That at a regular session of the common council of the city of Marquette, held Monday, Aug. 20th, 1907, the following preamble and resolution was unanimously adopted: Whereas, The Lake Shore Engine Works has purchased and is the owner of lots 83 to 109 and 117 to 129 and 145 to 175, all inclusive, in Ely Park addition and the land adjoining said plat to the west of said lots and have petitioned the common council to vacate the following streets and alleys, viz:

Resolved, That the vacation and abandonment of the above named portions of streets and alleys be and the same is hereby declared to be a necessary public improvement, and that the common council deems it advisable to grant the petition of said Lake Shore Engine Works, and to vacate and abandon said portion of streets and alleys, and be it further Resolved, That the third (3rd) day of September, A. D. 1907, at 8 o'clock p. m., be fixed as a time at which said common council will meet at its usual meeting place in the city hall at Marquette, Michigan, for the purpose of finally considering and disposing of said petition, and to hear objections, if any, from all parties interested in said proposed public improvement, and Resolved, That the recorder is hereby instructed to cause this resolution with proper heading, to be published in the official paper of the city for three successive weeks, the first publication to be made within five days from the adoption of this resolution.

Resolved, That the recorder is hereby instructed to cause this resolution with proper heading, to be published in the official paper of the city for three successive weeks, the first publication to be made within five days from the adoption of this resolution.

HARRY L. SIEGEL, Recorder Pro Tem. Some dealers are invariably out of what you ask for and offer you a substitute which they claim is just as good. This dealer is working for his own profit. Go to the honest dealer, who will sell you what you ask for and not try to sell a substitute in order to make a larger profit. DARANTELLA 10c Havana Cigars, 10c

A. P. Shepro, deputy of the Modern Brotherhood of America, is visiting the local lodge. He is organizing a lodge at Birch.

Miss Edith Stack and friend, Mrs. J. C. Haegele and Earl, of Chicago, are visiting Mrs. H. Herlick, Miss Stack's sister.

Mr. and Mrs. Glenn Wood of Phoenix, Arizona, are in the city, guests at the home of W. D. Rainey, 742 West Bluff street.

Miss Catherine Monroe of Chicago, is visiting friends and relatives in this city. Miss Monroe was formerly a Marquette resident.

J. L. Ferguson of Chicago, assistant general passenger agent of the Chicago & Northwestern road, visited friends in the city yesterday.

The Ishpeming band gave an impromptu concert on Front street yesterday morning. The band was on its way to the Masonic picnic.

Frank Dushane and family, and a party of friends have returned home from Gordon, where they have been resorting for the last three weeks.

The Misses Jessie Gregg and Florence Lovejoy, who have been the guests of Dr. and Mrs. E. L. Drake, have returned to their homes in Ann Arbor.

James Russell arrived home last evening from a week's trip west. He visited the Kimberly-Whitely mines at Kokomo, Cal., during his absence.

Miss Selina Barber of Cheboygan, who has been visiting for the past week at the home of her uncle, William Barber, left yesterday morning to join a camping party at Laketon before leaving for New Jersey.

Mr. and Mrs. James Rose, Mrs. Jacobs and Edward Delano, who went to the zoo to attend the wedding of Edward Powell to Miss Leona May Bush, have returned. The ceremony was performed at noon Wednesday and was attended by about two hundred guests.

Hotel Wedding—George Tweed and Miss Margaret Elmer were married quietly in the office of Justice of the Peace Byrne Wednesday. Both of them are employees of the Hotel Marquette.

Go to Washington—Miss Edith Blythe, who for some years has been a teacher in the city's schools, left Wednesday night for Spokane Falls, Wash., where she will have charge of the primary department in one of the largest schools in that city.

Planning Initiation—The Knights of Columbus will hold an initiation Sunday, Sept. 1. On that date a class of sixty candidates will be enrolled as members of the order. Members from Ishpeming, Negaunee and other neighboring cities will participate.

Was Only a Coon—Custodian Bob Hume of Presque Isle relates that he trailed the animal said to be a wild cat, which was seen by a party of young women at Presque Isle recently, and he declares that it is only a coon and is harmless. The animal was not molested.

Labor Day Celebration—The Carpenters and Joiners of America, L. No. 358, are issuing invitations for the Labor Day celebration to be held in this city. Merchants are invited to represent their business by floats in the parade, which will form on Baraga avenue at 9:30 o'clock a. m.

Den's Line-Up—Following is the line-up of the Den team which is to play the favorites at the new fair grounds tomorrow: McGuire, catcher; Osgood, pitcher; Hanley, shortstop; Neault, first base; McKee, second base; Primeau, third base; Riopelle, left field; Brown, right field; Weiser, center field.

Seek Diamond Thieves Here—It is believed that the men who robbed the jewelry store of H. A. Kamps Co., in Appleton, Wis., on Aug. 19 last, and escaped with \$1,000 worth of diamonds and other jewelry, are in the upper peninsula, and the Marquette police have been asked to watch for them. The communication was signed by F. W. Hoefler, chief of police at Appleton, and Michael Leckery, sheriff, and includes a description of the men wanted.

Tuneful Music—The music of Richard Carl's "The Mayor of Tokio," which will be presented tonight at the opera house by W. F. Peters and is unusually

pretty. Among the numbers that have become popular and which may be heard whenever an orchestra plays popular music are: "Pity My Pitiful Plight," "Silver Sea of Love," "Tokio," "When the Ocean Breezes Blow," "I Like You," and "Foolishness." The company is a very large and well balanced organization numbering seventy people with a chorus christened by a Boston critic, "The Blue Ribbon chorus of America."

Hearing Postponed—Gust Perkoniowski, the man who attempted suicide at Kenton when he was arrested upon a charge of having stolen \$90 from his former employer, Gust Johnson, a saloon keeper on Baraga avenue, was unable to appear in court yesterday. His preliminary hearing was postponed until this morning and will take place before Justice of the Peace Byrne. A friend of the prisoner, Fred Hill, was arrested with him at Birch and is involved in the charge. The wound in Perkoniowski's throat is healing and it is now said that he will recover.

All About Cement—Probably not many people would associate cement with fence posts, but in a book which is being issued by F. B. Spear & Sons to their cement customers, cement fence posts are only one of the many new uses to which cement is now being put. The book is neatly printed on gloss paper, and shows many handsome cuts. Here are some of the things made of cement described in the book: Barn foundations, watering troughs, water storage tanks, clothes posts, chicken houses, ice houses, shower baths and lockers, dairy houses, and many other things. The book is published by the Atlas Portland Cement company of New York, and is called "Concrete Construction about the House and on the Farm."

Recognized the Order—S. F. Byrne, who arrived home this week from Norfolk, Va., where he attended the national convention of the Knights of Columbus as one of the delegates from Michigan, says that one of the most important developments of general interest at the convention was the recognition of the order by Manager Falconio, the apostolic delegate to the United States. Heretofore the Vatican has held aloof from the order. It has not disapproved of it, but has not given it cordial recognition. However, the appearance of Manager Falconio at the national convention, before which he spoke, constitutes a full recognition of the order, as he is the accredited representative of the pope in this country. The Knights had nearly a week of sessions, but the delegates went for the most part busy with technical business. The attendance on Knights of Columbus day at the Jamestown exposition was the largest up to that date since the exposition was opened, and ran over 30,000 people.

**COMIC OPERA TONIGHT.**  
 Favorable Comment Follows Production on Its Tour of the Upper Peninsula.

"The Mayor of Tokio" to be played at the opera house tonight comes from Calumet. Favorable comment has followed the production throughout its tour of the upper peninsula.

With both scenes laid in the ancient city of Tokio, Japan, a Russian spy and the remnants of an American comic opera company, there is plenty of local

and many amusing situations in the opera.

The music, which is by W. F. Peters, is said to be unusually tuneful with more catchy numbers than often fall to the lot of present day comic opera.

Among the numbers that have achieved the most popularity are: "Pity My Pitiful Plight," "When the Ocean Breezes Blow," "The Silver Sea of Love," "Foolishness," "Tokio," and "I Like You."

This merry bit of tuneful nonsense will be presented here with practically the same company that made the long New York and Chicago runs last season, but a new and costly dress of scenery and costumes has been given the production for the current year.

**NOW IS THE TIME**

To make an investment which is sure to give you a large profit. The Grand Traverse & Arizona Mining company will sell a limited number of shares of its capital stock to secure money for larger machinery and to increase its development. All statements guaranteed. Look in the window of The Stafford Drug Co. store and see some specimens taken from the mines of this company. Call or write F. E. Withey, 421 Pine street. (8-22-14)

**HUCKLEBERRY PICKERS.**

Commencing Monday, August 26th, the M. & S. E. railway will put into effect a 25 cent rate for the round trip from Marquette to Eagle's Nest, (near Harlow's mill) and Eagle Mills, tickets on sale week days only, good for return day of sale.

Train for Eagle's Nest leaves Marquette at 9:20 a. m., arrives at Eagle Mills 9:36 a. m. Returning leaves Eagle Mills 4:49 p. m., arrives at Marquette 5:20 p. m.

Train for Eagle Mills leaves Marquette at 9 a. m., arrives at Eagle Mills 9:36 a. m. Returning leaves Eagle Mills 4:49 p. m., arrives at Marquette 5:20 p. m.

These rates will give pickers a cheap rate to the huckleberry patches at Harlow's mill and Eagle Mills. (8-3-14)

**Ormsbee & Atkins**

We meet competition by selling a little better clothing than the other fellow.

Economy is easily cultivated here.

Our Clothing is always made in the best way.

# Fair Dealing

It is said of Jones—"I don't believe it. Jones wouldn't do a thing like that." It is said of Smith—"Get it down in black and white or you'll be figured out of something at the end of the deal," and yet the acts of both these men are within the so-called "letter of the law."

"Selfishness makes a bitter old age."

"Sharp dealing turns our friends away from us."

"Money-friends wear masks."

These old-fashioned sayings hold good against Trusts, Corporations, Banks and Firms just as surely as they do against a man or a woman.

**Honesty is the best policy, but he who is honest for policy's sake alone is NOT AN HONEST MAN.**

Have you seen our booklet "Banking by Mail?" If not, we'd like to have you write us for it. We want to deal with you, and DEAL FAIRLY with you.

Marquette, Michigan.

### MARKETS

#### IMPROVEMENT IN STOCKS.

Trading Continues Very Dull But Is Productive of Higher Prices.

New York, Aug. 22.—Following an early period of irregularity, today's stock market moved to a generally higher level. The business was once more in diminished volume, however, and the operations favored strongly of professional manipulation. Apart from unauthenticated rumors of treasury relief during the coming week, and a shading in foreign exchange, there was little in the day's doings to account for the market's improvement, although the failure of the Bank of England to advance its rate of discount was accepted as an indication of better conditions abroad.

In local financial circles the discussion of the recent addresses of President Roosevelt and Secretary Taft continued, but it seemed to be the general opinion that these speeches no longer exercised much market influence. Scarcely more than languid interest was shown regarding the speech which Mr. Taft was scheduled to make at Lexington later in the day. On the whole a better feeling prevailed as to the future of the market. This sentiment was based in part on the absence of pressure to sell stocks, and the belief that all ordinary commercial and industrial failures have been discounted.

The traction shares were an exception to the general recovery. Pressure against the Interborough Metropolitan issues resulted in marked declines in both the common and preferred stocks, and the organization of the whole system. Another element in price of copper was made by the local metal exchange, but the copper shares held well above yesterday's closing quotations. Advances from the principal industrial centers, reported on a changed condition in the steel and iron trade, with practically no reduction in the demand for finished materials. Consumers were chary about making commitments, however, in the belief that prices were going lower in the fall.

During the late session of the exchange the movement became irregular again, the prices sagging somewhat on realizing for profits. The final hour developed increased dullness, but on a renewal of short covering the market advanced up and closed at general net gains. A notable feature of the close was a further decline in Third Avenue stock, which suffered a net loss of 8 1/2 points.

In the money market the feature today was an advance in thirty day rates to 6 per cent. For the longer period, however, the rates were unchanged, and the scarcity continued. The stagnant conditions in the bond movement found further reflection in the advance in the interest rate on New York city's securities from 4 to 4 1/2 per cent, the increase applying to all revenue bonds.

Thus far this week the banks have lost about \$1,000,000 to the sub-treasury, and the outlook for a favorable exchange on Saturday is hardly promising. Bonds were irregular. Total sales at par value were \$922,000. United States bonds were unchanged.

Closing prices were:

U.S. Steel	81	M. Pac.	67
G.P.	25 1/2	St. P.	32
Rep. St.	25 1/2	Am. Loco.	25
Spokane	25 1/2	C. & N.	25 1/2
N. Y. C.	11 1/2	N. P.	11 1/2
Rock Island	10 1/2	E. & W.	10 1/2
P. E.	10 1/2	Wabash	10 1/2
N. & W.	10 1/2	M. & K.	10 1/2
U. P.	10 1/2	Gen. Inv.	45 1/2
W. & A.	10 1/2	U. S. S.	12 1/2

Paine, Webber & Co. telegraphed from New York yesterday as follows:

"The market enjoyed a substantial rally today although the same was not held entirely until the close, it served to indicate that, at least temporarily, the worst is over. There is a gradual restoration of confidence in the copper metal situation and although the buying is on a very small scale the low prices quoted by the metal selling agency are not thought to indicate true conditions, as competent authorities state that very little metal is obtainable under 20 cents. The market is likely to drift into dullness, pending developments calculated to stimulate activity either way. The recovery has been rather rapid, but still when compared with the decline it is rather insignificant. There is still a large short interest in the market and for this reason we are inclined to favor purchases on the breaks for quick profits, but do not expect a sustained upward movement to materialize until the monetary situation improves."

### CHICAGO GRAIN MARKETS.

Chicago, Aug. 22.—Higher temperatures in the Northwest caused a sharp slump in wheat prices on the local exchange today, the September delivery closing at a net loss of 1/2c. Corn was down 3/4c, and oats were 1/2c lower.

The sentiment in the wheat market was bearish all day, and the closing quotations showed declines of 1 1/2c to 2c compared with yesterday's figures. Several leading bulls were free sellers, and there was considerable selling by small holders. The chief weakening influence was the rise in temperature. The market was also bearishly affected by conflicting reports concerning damage by frost to wheat in the Northwest and by a falling off in the export demand due to the 4 cents advance in wheat prices here yesterday.

Warmer weather and the slump in wheat were responsible for a decline of 1 cent in cables, which followed only a slight advance in the offerings from the country were more liberal because of the recent advance in prices, and this fact induced some of today's selling. The market closed weak.

### What Summary.

Paine, Webber & Co.'s Chicago correspondent said yesterday concerning the wheat market:

"The traders discovered that the bull campaign was at an end, for the present at least, this morning, for several good reasons. Cables did not follow only an advance of yesterday. The weather was warmer over the northwest this morning, as predicted. Realizing sales of wheat were on a large scale by those who bought holdings lower down. The export demand naturally let up, because the advance in prices on this side was too swift. It was in anticipation of some of these influences that we suggested taking profits on long wheat around top prices late yesterday and around the opening this morning. The market had about 2 1/2 cents reaction at the low point today. There was some tendency toward recovery on the last trade, but 'everybody wanted to know' had probably found out definitely by this time that the frost in the North, Dakota and the damage done to wheat in the Canadian northwest. The fact that some people who were sending the worst frost damage reports today were also sending some selling orders in wheat called trade to the rescue. The reports are not burdensome anywhere. There was a sale of 45,000 No. 2 hard wheat here for shipment. It is probable that the market will have a sagging tendency until it is helped by a renewal of good export buying or until actual damage is established in the spring wheat country."

### How Railroads Gained.

"Cutting off passes was alone worth millions to the railroads. Positive prohibition of rebates and discriminations was worth still other millions. In fact, there is scarcely a provision of the Hepburn law which is not a gain to the railroads from engaging in any other kind of business, that was not in some sense an advantage to the railroads. The great trouble about the legislation is not in its details, but basis, involving an important principle and policy. The bodies of Harris and Nowland were easily removed from the smoking ruins and it was found that both of these men were alive and conscious. Nowland pleaded with his rescuers to put him out of his misery, as he was suffering intense pain. The bodies of Harris and Nowland were taken to an improvised hospital, a half a mile from the mill, and the search for the body of Phillips was continued. The remains were finally found in the very bottom of the mill. All the flesh had been burned from the body. Nowland, when dying, joked with the men who were caring for him. He had been employed as a powder maker for years and he said he had expected just such a fate one time or another. Harris talked with the officials of the county and offered to sign a statement concerning the way in which the explosion took place.

### Explosion Suspicious.

Coroner Investigating Powder Mill Disaster in Wisconsin.

Kenosha, Wis., Aug. 22.—As was bulletined in this dispatch yesterday, the second explosion within seven months occurred yesterday at the big powder making plant of the Lullin-Rand Powder company in the town of Pleasant Prairie, west of this city, and death exacted a toll of two lives, while one other man is burned so gravely that he can not live. The head of a match concealed in one of the cakes of unfinished powder, either by design or accident, is supposed to have been the cause of the explosion. The dead, Norman Phillips, 30 years old, married, powder maker and employed by the powder trust for many years. Instantly killed in the explosion and he was buried to a crisp. Remains brought to the morgue in Kenosha.

### Elkins Law Enough.

"But while he seeks to disparage the Elkins law, yet he admits that all prosecutions down until this time, have been under it—because these prosecutions were for offenses committed prior to the Hepburn rate law—and then says that criminal prosecutions will continue to be under the Elkins law, but as amended by the new rate bill.

"In more than 100 prosecutions the Elkins law, as originally enacted, has been found to be defective, and an inexpensive remedy, in the form of the Elkins law by the provisions of the Hepburn rate law has been invoked in any of these proceedings and nothing contained in the Hepburn rate law has been utilized to suggest the government in any of its prosecutions of civil proceedings under the Elkins law.

"The secretary also seeks to create the impression that the railroads unitedly opposed the passage of the Hepburn rate law and that they spent a large amount of money and made great efforts to defeat it.

"But, however, this may be, I do not think any senator was governed by what he thought any railroad wanted, but only by what, in his judgment, the best interests of our common country required.

"It was, however, manifest to all before the bill passed that the railroads would have some compensating advantages and that to most of the railroads, the measure would probably prove to be in some respects of great advantage instead of a detriment.

### TAKES ISSUE WITH TAFT.

Senator Foraker's Latest Discussion of the Hepburn Rate Bill.

Georgetown, O., Aug. 22.—In his first address after the Columbus speech of Secretary of War Taft, United States Senator Foraker, before the Chautauque assembly, characteristically discussed his fellow townsmen's opinions, with which he differed in many particulars. Quoting freely from a speech made by the secretary of war and from his own remarks in the debates in congress, Senator Foraker expressed his opinion on the various public questions discussed by Mr. Taft. In the course of his speech he said:

"The provisions of the Hepburn rate bill which are now before the senate, except the ratemaking provision, were incorporated into that bill by the senate. Most of them, with my active assistance, and some of them upon my own motion.

**Changes Forbidden in Committee.**

"The bill, as it came from the house, was a very imperfect measure. The interstate commerce committee of the senate recognized this fact but a majority of the committee acting under instructions that should never have been given, refused to allow any amendments whatever to be made in the committee, and it was with great difficulty and only after a parliamentary contest upon almost every point that the amendments that were finally adopted were made in the open senate."

### German and French Steamship Lines Change Decisions.

Washington, Aug. 22.—As a result of Second Assistant Postmaster General John T. McCleary's trip to England, Germany and France, taken at the instigation of the postmaster general, the German steamship lines have reconsidered their proposal to discontinue the ocean post service on their ships and Mr. McCleary has negotiated an agreement with France which will result in the installation of ocean post service on the French lines.

Ocean post service consists of the sorting and distributing of mail en route aboard ship by special mail service clerks taking charge of the distribution. Mr. McCleary returned to Washington yesterday. He feels certain that the proposition he made will be ratified by the postmaster general of America, France and Germany.

Some time ago the German government informed Washington that the German steamship lines, the North German Lloyd and the Hamburg American, had found the Berlin authorities that the ocean post service would be discontinued. The reason given was that the recompense based on the amount of mail handled at the installation of the service, was now inadequate.

Under the original contracts it was specified that the steamship companies should, by giving six months' notice terminate the service. It was when the German government served this notice that Mr. McCleary went abroad to take the matter up.

The ocean post service has been handled by the two German lines and by the American and White Star line between

### Call's Argument Frustrated.

"His answer to the objection that if congress have the power to make rates, it can not delegate the same, seems to me mere assertion and speculation, based on false premises.

"I have contended that so far as I have yet been informed there has been no lowering of rates since the Hepburn law was passed, whereby the shippers of Ohio have been benefited, except only such as would have been made in all probability if the Hepburn law had never been passed. On the contrary, everywhere I go I am told by shippers that since the Hepburn rate law was passed the majority of their rates have been advanced. Very few, if any, have been lowered.

"When the Elkins bill had passed the senate and came up for consideration in that committee, Chairman Knapp and Commissioner Pifer appeared in support of the measure.

**Not a Railroad Measure.**

"I have no recollection of any railroad man or the representatives of any railroad appearing before either the senate committee or sub-committee. It may be that some one or more did appear, that would be quite natural, for the legislation was of the highest importance to

### ESCORT SAYS SUICIDE.

"Queen of Chinatown" Shot and Killed at San Diego, Cal.

San Diego, Cal., Aug. 22.—Viola Brackett, known throughout southern California as "the Queen of Chinatown" because of her marriage to a wealthy Chinese, was shot and killed today while with Howard Woolcott, the nephew of a banker at Los Angeles, after the shooting the woman was stabbed twice in the neck. Woolcott says that the woman shot at him, and then committed suicide.

### EATS HIS SHIRT IN HIS CELL.

Denied Spaghetti, Prisoner Seeks Consolation in Alarming Way.

New York, Aug. 22.—Frank Scarello, who lives at 1009 First avenue, today convinced that strips of a shirt are a very good substitute for spaghetti. He was arrested at Ninety-eighth street and Second avenue, for making an earnest effort to climb up the side of the gas tank located at that point. He told the policeman that he wanted to show the people how he climbed the Alps when he was at home in Italy. He was put in a cell of the 104th street station to cool his mountain-climbing ardor.

When Patrolman Kilgus, Katz, and O'Rourke went into the cell to get the prisoner and take him to court for arraignment they found Scarello crouching in a corner and groaning in great pain. He was also shirtless, and when he was asked what was the matter with him he replied: "I much da seecka man."

On the floor were buttons from the shirt and in a corner were other portions of the garment, but fully half of it had disappeared.

"Where's the rest of your shirt?" demanded the policeman.

"I eat da shirt," replied Scarello with another groan.

"What in the name of all that's beautiful did you eat your shirt for?" asked the policeman.

"You locka me in da jail," wailed Scarello, "I no getta da spaghetti. I eat da shirt."

The policeman compelled him to put on the sleeves and as much of the shirt as could be found and thus he was taken to court.

### SARATOGA TO BE SOLD.

One of Perry's Ships Which Went to Japan in 1853.

Washington, Aug. 22.—The famous old sloop of war Saratoga has been stricken from the official list of naval vessels and ordered to be sold. She was built at the navy yard at Kittery, Me., in 1842, was rigged and carried twenty guns. She is 147 1/2 feet long, 36 feet 1 inch beam and has a displacement of 1,125 tons.

The Saratoga was named after the eighteen gun sloop-of-war Saratoga, which served gallantly in the first war with Great Britain. The original Saratoga sailed from Philadelphia in October, 1780, in command of Captain James Young, and several hundred miles out from Delaware Bay captured three British sailing vessels. The Saratoga put crews aboard and started back to port. On the way she was captured by the British sloop-of-war Intruder. The Saratoga was forced to abandon her prizes and they were retaken by the British man-of-war, The Saratoga, however, escaped, but foundered in a heavy gale the next day.

The first duty of the new Saratoga in 1842, shortly after her launching, was off the African coast, where she was the flagship of a fleet of three ships under command of Captain Matthew Galbraith Perry, which was engaged in suppressing the slave trade. In the same year the Saratoga served in the blockading fleet on the eastern coast of Mexico. She then was sent to the Orient, where, in 1853, she joined the fleet of Commodore Perry and went to Japan to deliver a letter from the president of the United States to the emperor of Japan, inviting that country to enter into commerce and friendly intercourse with the United States. She again returned to Japan in 1854, when the treaty of amity and commerce was signed. In the Civil war the Saratoga was cruising off the African coast. For many years she has been out of commission at Philadelphia.

### SCORES ANTI-CANTEEN LAW.

Army Report Says It Is Conducive to Lack of Discipline.

Washington, Aug. 22.—The annual report of Acting Judge Advocate General Porter shows that there was a decrease of 683 in the number of court-martial in the army during the last fiscal year. The total number was 3913, including thirty-two officers, twenty-nine sergeants and twenty-two privates. The enlisted men by far the greater number of court-martial trials were on account of desertion, there being no less than 1101 cases, and 732 cases of absence without leave. Four officers were punished by sentence as against fourteen last year.

The report dwells upon the evil results following the passage of the anti-canteen act, which, it is said, "has undoubtedly caused the location near military reservations of resorts for the sale of intoxicating liquors, which panders to the appetites and passions of these enlisted men, who, largely by reason of the prohibition in question, frequent the same. The resorts are beyond control of the military authorities, and their presence is highly detrimental to military discipline—if such legislation (prohibiting saloons within one and an eighth miles of a military post) were followed in all states, the effect would undoubtedly be conducive to military discipline and reduce the number of court-martial trials for offenses due to drunkenness."

Attention is called to continuance of the practice of selling clothing issued to enlisted men in spite of the efforts of the military authorities, and it is suggested that the limit of punishment should be increased and provision made for taking up the uniform clothing of a soldier upon his discharge at an approved value, thus emphasizing the fact that the war department regards the uniform clothing issued to a soldier as the property of the United States and in the same sense as his horse, arms or accoutrements.

### MORGAN ORDERS CATTLE KILLED.

Six of Financier's Prize Herd Found Afflicted With Consumption.

Highlands Falls, N. Y., Aug. 22.—Tuberculosis has been discovered in the fine dairy herd owned by J. Pierpont Morgan, and one-third of the high-bred milk cows have been killed, on orders called by Mr. Morgan.

The herd was composed entirely of cows of notable pedigree, and they were kept with the greatest care in stables of the most modern sort, the utmost attention being paid to proper ventilation and to all the sanitary conditions that are supposed to protect cows from tuberculosis.

Recently one of the cows required the attention of a veterinarian, and its condition aroused his suspicions, though the animal showed none of the outward signs of tuberculosis. He applied the tuberculin test and the cow reacted, showing unmistakably that it had consumption.

At the suggestion of the veterinarian Mrs. Morgan ordered that the entire herd be tested. The result was the disclosure of tuberculosis in six of the nineteen expensive cows.

Mr. Morgan, Jr., communicated by cable with his father, with the result that orders were received to kill the diseased cows.

Post-mortem examinations in each case proved the correctness of the fears. In none of the animals was the disease far advanced, but the tuberculosis was sufficiently developed to make the use of the milk of the herd dangerous.

The discovery of tuberculosis in a herd that has had the very best of care has attracted the attention of the state department of agriculture. State Veterinarian H. D. Gill, after examining the conditions at the Morgan farm, said that there was absolutely no reason for the disease, so far as he could discover, and that these cases served to illustrate the extreme susceptibility of cows to tuberculosis and the urgent necessity for regular testing of all milk kine and for putting an embargo upon the importation into the state of any except tuberculin tested cows.

Dr. Gill pointed out that Dr. Schroeder, the federal expert, had proved that milk drawn from a healthy cow in a herd that had tuberculosis animals might easily be infected, and he hoped that the example of Mr. Morgan in having his cows tested and in promptly sacrificing the diseased animals would be followed by all owners of dairy herds.

### TO HOLD INTERNATIONAL FISHERIES CONFERENCE.

CANADA FURNISHES 86 PER CENT OF OUR FISH SUPPLY AND WANTS LAW FOR HONEST FISHING—MATTER OF PRIME IMPORTANCE.

"The Society of American Fisheries has just closed its annual session at Erie, Pa., where a resolution was unanimously passed directing the executive committee of the society to communicate with the governors and heads of the fish commissions in the several states bordering on the lakes, with President Roosevelt, the governor general of the Dominion and the lieutenant governor of the Province of Ontario, with a view of inducing each of them to appoint delegates to attend an informal inter-state conference at some convenient early date. The resolution was unanimous in some respects to be taken immediately to bring about more cordial and fairer relations between the two governments relative to the fishing industry. Efforts along this line have been made spasmodically in the past with practically no results. The situation has changed, however, and in the opinion of the members the occasion is ripe for some definite action.

"A well written paper, bearing on the question from a Canadian standpoint, was read at the Erie session by A. Kelly Evans, of Toronto, under the title, 'The International Problem of the Proper Regulation of the Fisheries of the Great Lakes.' Mr. Evans maintained that it was absolutely necessary to regulate the size of the fish, to control the results of the catch to prevent a possible prohibition of exports of the food varieties. Canada is now contributing 86 per cent of the lake fish consumed in the United States, he said, and if this supply were cut off it would be a severe blow to this country. It is a well known fact that the lake fisheries of Canada are practically controlled at the present day by capitalists from the United States. Vast quantities of food fish far below the legal size are sent over to the United States, and this is what causes most of the trouble in Canada. They have laws regulating this feature, but it is perfectly obvious that their intent is defeated by this practice of the American fish companies. Mr. Evans stated that unless some action as outlined by the resolution was taken, the Dominion authorities would pass a law prohibiting exports of fish, altogether.

"When the proposed international law is passed by the two governments it will benefit Michigan more than any other state. Michigan has a greater fresh water line than any other state and its fishing industry is by no means to be ignored, although it is practically in the hands of the fish companies. The law would benefit us because it would bring about a regulation law covering the commercial fishing of all the states that border on the great lakes. As it is now Wisconsin has one law covering the size of fish, the length of the season, the net, the length of the season, etc., while the laws of Michigan are different in many particulars.

"Another fact is that the United States government propagates and plants 97 percent of the commercial fish that are from year to year placed in the great lakes. Why, then, should Michigan protect and enforce the laws covering the commercial fishing in these lakes? The United States government could do it and would do it if the commercial law were passed, and this game warden's department would thus be relieved of a great problem and one that it has never been able to properly handle. Its efforts could then be extended to the inland lakes and streams and game supervision. It is, of course, true that the state obtains for the use of the game warden a considerable sum of money as fishing license from the commercial fisherman, but this amount and more is expended annually by the department in watching the commercial fisherman and enforcing the somewhat lax and misdirected laws that cover commercial fishing in the waters contiguous to this state.

"The wholesale slaughter of our commercial fish has so reduced the supply in our great lakes that the 'poor man's food' in our cities, especially, has the price gone up so that now the average family can hardly afford the luxury once a week. The whitefish has disappeared to such an extent that it is no longer offered for sale in the large cities of the state.

"This is a question that every man, woman and child should be interested in, for if some proper effective legislation is not passed and federal supervision is not had we will be in time deprived of one of our greatest food supplies."

**BIBLE INSTITUTES IN THE PENINSULA**

**EIGHTEEN MEETINGS WILL BE HELD UNDER THE AUSPICES OF MICHIGAN SUNDAY SCHOOL ASSOCIATION.**

A series of Bible School institutes is to be conducted in the upper peninsula under auspices of the Michigan Sunday School association. H. A. Dowling of Detroit, general secretary of the Wayne County Sunday School association, who is said to be one of the most effective men in that particular line of work in the state, will conduct the sessions, and is to be assisted in the several cities and towns he visits by the resident pastors and local Sunday school workers.

Mr. Dowling is to visit eighteen different cities and towns, and he expects to conduct an afternoon and evening session in each place. He is to deliver three addresses a day, besides participating in discussions relative to Sunday school work. The session will be open to the public. The pastors of the several churches have been asked to advertise Mr. Dowling's coming as widely as possible.

At some meeting in each county institute officers will be chosen for county associations, and there will be general discussions of plans for carrying on the work in the county organizations. The members of Sunday school societies of churches other than where the meetings are to be held are asked to take notes on the work of the institute and report the same to their local societies. The institute meetings are for all Bible school workers and if the attendance is as large as the several sessions anticipate much good will be accomplished.

The dates on which Mr. Dowling will visit each of the upper peninsula towns with the churches where the meetings are to be held, are as follows:

Sunday, Aug. 18, Sault Ste. Marie, Presbyterian church.  
Monday, Aug. 19, Newberry, Methodist church.  
Tuesday, Aug. 20th, Munising, Methodist Episcopal church.  
Thursday, Aug. 22, Manistique, Presbyterian church.  
Friday, Aug. 23, Escanaba, Baptist church.  
Sunday, Aug. 25, Marquette, Baptist church.  
Monday, Aug. 26, Negaunee, Presbyterian church.  
Tuesday, Aug. 27, Ishpeming, Methodist Episcopal church.  
Wednesday, Aug. 28, Houghton, Presbyterian church.  
Thursday, Aug. 29, Calumet, Congregational church.  
Friday, Aug. 30, Laurium, Methodist Episcopal church.  
Sunday, Sept. 1, Hancock, Methodist Episcopal church.  
Tuesday, Sept. 3, Allouez, Presbyterian church.  
Wednesday, Sept. 4, Mass City, Methodist Episcopal church.  
Thursday, Sept. 5, Ironwood, Baptist church.  
Friday, Sept. 6, Crystal Falls.  
Saturday, Sept. 7, Iron Mountain, Methodist Episcopal church.  
Sunday, Sept. 8, Menominee, Congregational church.

The program for the afternoon sessions will be:

2:00—Fifteen minutes with the Word by the pastor.  
2:15—Round Table: "Strong and Weak Points of Organization"  
2:30—Address: "The Four-Fold Function of the Bible School," by H. A. Dowling.  
3:00—Address: "The Missionary Movement in the Bible School."  
3:15—Address: "The Home Department—Its Practical Value."

**AFTER JUNK DEALERS.**  
Officers Have Found Goods in Possession of Several Parties.

Charles Schwartzberg, a Negaunee junk dealer, in whose possession Marshal Lehman recently found a brass reducer which had been stolen from the city steam roller, is to have a hearing tomorrow morning in Judge Andrews' court. Schwartzberg has engaged Attorney A. J. Jurma to defend him, and unless the prosecution secures stronger evidence than it now has the defendant will probably be found not guilty. He claims to have found the reducer in an old pit at one of the mines near the city and he will produce witnesses to testify to this effect. The fact that the article was found in his possession is not positive evidence that he stole it.

Marshal Lehman and some of the other officers have been working for some time past to locate goods stolen from the mining companies and others. As stated in a recent issue, a number of articles that were of considerable value have been found in the possession of junk dealers or of parties who have been selling goods to them, but the evidence necessary to convict has been lacking. An effort is to be made to break up the practice of stealing brasses and iron. The junk dealers, as a rule, keep goods brought them and ask no questions as to where they came from. During the past week four search warrants have been issued and considerable stuff has been rounded up, though many articles sought have not been found.

The junk dealers of both cities have regular customers among boys and others who pick up stuff for them. It has been known for some time past that many of these agents, so called, have not been confining their sales to worthless iron which they have picked up, but many valuable articles have passed between them and the dealers. According to the officers there are perhaps fifty people in the city who in one way or another handle junk, ninety per cent of which passes through the hands of the dealer. There is one dealer in Ishpeming, who refuses to purchase anything he thinks has been stolen and he has aided the officers a number of times in rounding up goods that the police were in search of.

**FIREMEN WILL PICNIC.**  
The members of the Ishpeming fire department expect to have a fine outing Sunday. At a recent meeting a committee was appointed to complete arrangements for a picnic, but the members are not to know where it is to be held until they have reached their destination. A program of sports has been arranged and every member of the department will be expected to participate in the games. A big spread is to be a feature. The baseball game between the City team and the Marquette team arranged for next Sunday has been declared off because of the fact that the firemen playing with the local team desire to attend the picnic. The party will start out early Sunday morning, remaining in the woods all day.

**MARRIED AT CRYSTAL FALLS.**  
Peter J. Fahey and Alice M. Cronin of this city were married Wednesday at Crystal Falls, where Mr. Fahey has been employed at one of the mines for some months past. The announcement of the wedding was considerable of a surprise to the friends of the bride and groom in Ishpeming. They will be at home at Crystal Falls after October 1.

**"SALOMY JANE" TONIGHT.**

Elaborate New York Production Will Be Seen at Ishpeming Theatre.

There are poetry and strength and depth and stirring appeal to Paul Armstrong's play "Salomy Jane," which Liebler & Co. bring to the Ishpeming theatre tonight direct from its season's tremendously successful New York run. There are girliness and vigor and heroic womanhood and soft loving in the heroine. There are romance and great darts of mystery about The Man, whose name is never learned, but who seems specially designed for the career of such a Salomy as Mr. Armstrong has created. Salomy is lovable even when she is fierce, but it is the Salomy of the softer graces of the moonbeams—standing asking, sublimely unconscious of all conventional irregularities, the name of her lover—that is loved best and longest. Small wonder is it that this fragrant idol of the California redwoods swept New York as with a breath of nature, and gave Liebler & Co. the most truly genuine success the native American stage has yet recorded.

Jessie Izett, who will be seen in the title role of "Salomy Jane," is well known in the western territory. A western girl by birth it is but a few years since she removed to the East and there found a niche for her talents. While west of the Mississippi river Miss Izett was chiefly known for her remarkable talents in emotional leading roles. Her work in the principal role of "From Iron" was highly commended, and her portrayal of the leading feminine part in "Nathan Hale" still lives as one of the best pieces of work in that line. Last year she achieved very considerable distinction with Isabel Irving in "Susan in Search of a Husband." Miss Izett gained her experience in the valuable school of the stock company, and she has been a member of several of the famous organizations of this type that have become known for splendid players they have turned out. She has two starring tours to her credit and she has supported a number of the best actors and actresses of the day in some of their best efforts of the drama.

**FROM HOPKINS' CURB LETTER.**  
The copper share market opened slightly higher and continued to advance, showing decided strength over the past week. North Butte, Greene-Cameau, Superior & Pittsburg, Trinity, Copper Range, Balaklala and others were strong. We believe the bottom of this decline has been reached and advise the purchase of all coppers at present prices. Spot and futures opened lower in London, but this had no effect on our market, probably due to the fact that many believe the metal deadlock will soon be broken and large sales reported at 18 cents. This will not hinder the producing companies from paying present dividends and stocks being cheap there seems to be nothing to prevent this rally going further.

The prevailing prices were:

	Bid.	Asked.
American	8.87 1/2	9.12 1/2
Warren	7.25	7.75
Denn-Mining	9.37 1/2	9.62 1/2

**LARGER QUARTERS.**

The building being remodelled by the Oliver Iron Mining company, to be used as a warehouse, will soon be ready for occupancy. It has been placed on a new foundation at a point just north of the old machine shop. The building was formerly used as a tool and pipe shop. The present warehouse is far too small and the new building will not be any too large, though there is ample space nearby for an addition, when one becomes necessary. The old machine shop vacated some months ago has been remodelled into a carpenter shop. The ground north of the shop buildings is to be leveled and a large platform has been erected for the unloading of cars containing supplies.

## ISHPEMING

HEAVY CONSUMERS OF FUEL.

Marquette County People Burn Unusually Large Quantity of Wood.

"There is a larger quantity of wood consumed in Marquette county in proportion to the population than in any other county of the upper peninsula," said an Ishpeming fuel dealer yesterday, discussing the recent advance in the price of hardwood. "I don't know of a place in this country where wood is as generally used for heating houses as it is here. The time is not far distant when there will be considerably less wood and more coal consumed than now, as the latter is the more economical at the prices prevailing. There are a great many homes in Ishpeming where a coal stove has never been used, but it would not surprise me if most of the wood burners are cast aside the coming winter, as I am satisfied that wood will be no cheaper than it is now and there is a possibility of its going higher, because of the difficulty the dealers are having in securing it. Only those who are engaged in the business know anything about the difficulty and expense the dealers are put to in getting wood. There are many buyers in the district and if the dealers are not constantly on the alert the jobbers do not wait for them. I have known several instances where it has taken from three to six months to secure delivery of wood that was really wanted and promised in a hurry.

"While the price of wood is higher now than ever before in this region the people really have no reason to complain, when all things are considered. The jobbers are having much difficulty in getting out wood. In many districts where wood is as easy to obtain as here coal is more largely used. Take for instance at the head of the lakes; those who use wood largely burn refuse from the mill, and others use soft coal. There is no place in the upper peninsula or on Lake Michigan where coal is furnished at as low a figure as here, when the freight rates are taken into account. At most of the lake ports the better quality anthracite is selling at \$7.75 per ton, and in Ishpeming and Negaunee it retails at \$7.85, while the freight rate from Marquette to this city is thirty-five cents per ton. At Marquette coal is at present selling at \$7.50. I know of many points much more favorably located than Ishpeming, and where the freight rates are lower, where coal is selling at from \$8 to \$8.25 per ton."

### CALLING IN FUNDS.

C. G. Goodsell, associate secretary of the Ishpeming branch of the Young Men's Christian association, has sent letters to all subscribers of the building fund who have not yet paid up the full amount of their donation, asking them to remit at once. It is announced that the monthly payments for the contractors' work are now due. The excavating

has been completed and the building of the foundation will be started very soon by Thomas M. Solar of Antigo, Wis., who has the contract for the construction work.

### ISHPEMING IN BRIEF.

The home of John Treloar, 418 High street, has been gladdened by the arrival of a daughter.

Mr. and Mrs. Fred Lessor of 420 East Division street are rejoicing over the birth of a son.

The Misses E. Francis and Flora Eddy are visiting friends at Princeton for a week or ten days.

H. E. Stuart, commercial agent of the Chicago, Milwaukee & St. Paul Railway company, was in the city yesterday.

Mrs. A. Cosette and Mrs. Blanchard of Escanaba are in the city visiting the former's brother, Peter Mercier, and family.

The Misses Maud Luicks and Jennie Olson of the Winthrop left Wednesday evening on the Junata for a ten days' trip on the lakes.

The members of the Ishpeming fire department, who attended the tournament at Ontonagon this week, are expected home today.

The horse race at Union Park this afternoon between animals owned by three Negaunee men will be attended by a number of Ishpeming people.

Mrs. J. A. Wills and son John arrived in the city yesterday from Rockford, Ill., where they spent the past few months. The family will again locate here.

The contract price of the new buildings to be erected at the Newberry asylum, mentioned in yesterday's issue of The Mining Journal, is about \$80,000 instead of \$20,000.

The management of the City baseball team is endeavoring to close negotiations for a game with the Iron Mountain nine at the Monominee range town a week from next Sunday.

Robert Lyons, who a few months ago gave up his position at the state capital to accept a place in the Oliver Iron Mining company's office at Coleraine, Minn., is here on a ten days' visit to his relatives.

Fred H. Baisky, who is to again locate in Ishpeming, arrived in the city yesterday. He has not yet secured a dwelling and it may be some time before he will find a suitable place, as desirable houses are very scarce.

William Veran of Negaunee and his son William, of Joliet, Ills., were in the city yesterday. It is about fourteen years since young Mr. Veran left Negaunee to locate in Illinois. He is accompanied to his old home by his wife and son. They are to spend ten days or two weeks there.

"Salomy Jane" at the Ishpeming theater tonight, is a play that can be unhesitatingly recommended as a superior attraction. Its reception at Marquette was most cordial and it delighted a critical audience. In the copper country it was commented on as being among the best attractions ever looked at the Calumet and Keweenaw theaters. It is a skillfully written drama, telling a

### OFFICIAL INTERVIEWED ON DEPOT QUESTION

MAYOR WINTER AND OTHER NEGAUNEE MEN CONFERRED WITH NORTHWESTERN COMPANY'S ASSISTANT GENERAL PASSENGER AGENT.

Mayor J. H. Winter and other prominent passenger agents of the Northwestern system, was in the city. A delegation of Negaunee men, headed by Mayor Winter, called on him and made known the city's wants in the way of a passenger station. They advised Mr. Ferguson that the leading interests of the town and the people generally have been asking for a depot for years past and they said they sincerely hoped that the officials of the company will soon give the matter serious attention.

The first gun was fired Wednesday afternoon when J. L. Ferguson, assistant passenger agent of the Northwestern system, was in the city. A delegation of Negaunee men, headed by Mayor Winter, called on him and made known the city's wants in the way of a passenger station. They advised Mr. Ferguson that the leading interests of the town and the people generally have been asking for a depot for years past and they said they sincerely hoped that the officials of the company will soon give the matter serious attention.

Mr. Ferguson said that the erection of passenger depots was not directly his business, but he asserted that he was always pleased to aid in establishing suitable stations along the company's line, as good buildings, he declared, aid the passenger business. The request for a depot, he said, would have to be made to the general manager of the system, but he promised to call the latter's attention to the interview he had had with the Negaunee delegation and to aid in every way possible to secure the improvement for this city.

The Negaunee men called Mr. Ferguson's attention to the large amount of business contributed to the Northwestern company by the people of this city, both passenger and freight business, and he agreed that the station is an important one. Attention was also called to the fact that the Negaunee men had from this point for many years past.

Now that a start has been made in an effort to secure a new station the proposition will receive more serious attention than ever before. The delegation which called on Mr. Ferguson felt greatly encouraged as a result of their interview with him, and it is likely that the matter will soon be brought before the general manager.

There are several desirable locations in the business district for a depot, but the one Mayor Winter has in mind. It is at the south end of Marquette street, where there are now several undesirable buildings which could well be removed. There is ample space there for a structure of good size and a more convenient point could not be secured. If a depot is erected at that point the Northwestern company would be obliged to change its tracks, entering at the Pioneer avenue crossing, and extending west to the diamond crossing, doing away with the heavy grade running from the point south of the old Pioneer furnace site to the union station. This grade has been a source of considerable expense to the company, and frequently, especially in winter, time is lost in ascending it.

The conclusion has been reached that the provision as to the government receivership is not mandatory, and hence will not be enforced. This is in direct contrast to the treatment received by St. Louis.

The changed policy toward Jamestown is due in part to the fact that the Jamestown exposition has not been a paying institution and is tied up by obligations and debts of all sorts. A government receivership would be most welcome to the Jamestown management. It would give an opportunity to unload on the government a responsibility under which the exposition officers have been staggering to an unknown end. Some members of the town who have learned the details of the situation propose a congressional inquiry into the management of the Jamestown exposition. It is hinted that not even the government's participation has been above reproach.

"What shall we have for breakfast?" "Why Cudahy's Peacock Ham and Eggs of course; they are always acceptable, especially at this season of the year." (11-27-e-o-d)

TUXEDO CLUB CIGAR 10c

### DOING CONSIDERABLE WORK.

Marquette County Gas & Electric Co. Has Laid Over 3,000 Feet of Main.

The men in charge of the improvements being made by the Marquette County Gas & Electric company are pushing operations with vigor, with a view to getting in all of the mains needed before winter sets in. For a time after the work was started the company found it impossible to secure all the men desired, but a sufficient number have been employed for some six or eight weeks past. Over 3,000 feet of main has been laid in Negaunee in the past three months. Lincoln, Cherry and Clark streets and Healy avenue have been provided with mains and many of the residents of these streets are having their homes connected for the service. Many stoves have been sold, also water heaters. The demand for the latter has been unusually good for three or four weeks past, ever since the heater was demonstrated at the company's office in Ishpeming.

The proportionate increase in the gas business is no greater in Negaunee than in Ishpeming, where crews are also employed putting in additional mains and connecting the homes for stoves and light. A force of over fifty men has been employed in this department all season and from present indications the crew will not be reduced for at least two or three months, as much new business is in sight. The gas is of an excellent quality, much better than it was during the first few months the present plant was in operation.

### FOOLED WILLIAMSON.

Negaunee Friends of Young Groom Had Spies on Duty Wednesday.

"Our friend John B. Williamson, as well as the other members of his party, were much astonished to find a quartet of his most intimate friends in Marquette to greet him Wednesday evening, immediately after his marriage to Miss Anna Erickson," said one of the men who went down from here. Several things occurred Tuesday and Wednesday to arouse the suspicions of Williamson's friends. On Wednesday both he and Nelson were around as usual, but early in the afternoon neither could be found. Boys were hired to keep on the lookout for the hack in which they were driven to Marquette, and one of their number saw it at a time when the blinds were not drawn, recognizing the members of the party. The bills, which were distributed in Marquette, were gotten out hurriedly and the quartet of Negaunee men went down on the 5 o'clock train.

An effort was made to secure the grips, but Williamson was accompanied by a relative of the bride from Ishpeming who guarded them. There were two other newly married couples on the boat, who got on at Houghton, but Mr. and Mrs. Williamson were the main attraction at Marquette. Bills were distributed on the boat and practically all of the passengers were aware of their presence and many of them gave the newly married pair a very cordial greeting.

### A. O. H. REUNION.

Posters advertising the Hibernian reunion to be conducted at Marquette a week from Saturday, the 31st, have been displayed in Negaunee. The invitation to attend has been accepted by the Negaunee division and it is expected that there will be a large turnout from this city. The Ishpeming division has also planned to attend and to participate in the parade, which will be the principal feature of the morning program. An interesting entertainment has been arranged at the fair grounds and it is expected that there will be four bands in attendance. M. C. Scully is to be marshal of the day. Special rates of fare will be granted by the South Shore road and tickets will be good on all regular trains.

### OFFER IN NEW MEXICO.

Captain A. Andrews, of the Negaunee mine, has left for Silver City, New Mexico, where he will inspect a number of mining properties. He has an offer to take charge of mines there and his visit at this time is to look over the properties.

### LOCAL LACONICS.

Harry Bendig of Marquette called on his patrons in Negaunee yesterday.

Joe Eisenstein has returned from a visit to West Baden, Ind., where he spent a week or more.

Charles Markety has returned from Utah and other points in the west, after an absence of eight months.

A number of Negaunee theatergoers

will attend the production of "Salomy Jane" at Ishpeming theater this evening.

Miss Rose Erchling returned to her home in Marquette Wednesday evening after a few days' visit with her sister, Mrs. Harry Jackson.

John, the seven-year-old son of Fred Pleau, died Wednesday evening. The funeral will be held this afternoon at 2 o'clock from St. Paul's church.

Architect J. D. Chubb of Chicago, who drew the plans for the Negaunee high school, also the Old Fellows block, arrived here yesterday to remain a few days.

Levine Bros. are receiving their holiday line of imported china. They have purchased a larger line of high grade goods for the approaching season than they have ever before carried.

Walter Evers is home from the Armour institution, Chicago, on a week's visit. He will be a member of the senior class next year. The Armour institute instructs exclusively in mechanical work. There were over 1,000 students in attendance last year.

C. A. Phillips, manager of the sales department of the Twin City Pressed Brick company of St. Paul, was a Negaunee visitor yesterday. Mr. Phillips has submitted figures for pressed brick to some of the contractors who have bid on the new high school job.

John Luxten, Ed Basset and John Moyné, who arrived here from England Tuesday, have already secured work, the former at the Maas mine, and the two latter in the Negaunee mine. All are miners, though this will be their first experience in iron mines, they having been employed in tin properties in their native place.

Little Miss Rhea Buzzo, daughter of Herbert Buzzo, celebrated her fifth birthday yesterday, and in honor of the occasion she was the hostess at a pretty social party held at the Buzzo home on Clark street. Some twenty-five of the little lady's friends were present, and a jolly good time was had. Various pastimes whiled away several happy hours, and the company was regaled with dainty refreshments.

Mrs. C. W. Taylor, who submitted to a serious operation Wednesday, was reported as feeling very well yesterday and her chances for recovery are good. Mrs. Taylor's condition had been precarious for some time and she has been an invalid ever since last January. The operation was performed by Dr. C. O. Teinhaus, of Milwaukee, assisted by Dr. W. S. Pictette of Ishpeming and Dr. Obrenbit of Negaunee.

H. A. Dowling of Detroit, general secretary of Wayne County Sunday School association, will conduct a bible institute next Sunday afternoon and evening at the Presbyterian church in this city. The afternoon meeting will open at 2 o'clock with a fifteen minute talk by the Negaunee pastor. Mr. Dowling will be heard in two addresses in the afternoon, the first being entitled, "The Fourfold Benefits of the Bible School," and the second, "Advanced Methods of Bible School Work." The meetings will be open to the members of the congregation and their friends.

### HOME FOR DRAMATIC ART.

New York's New Theater to Cost a Million and Three-Quarters.

New York, Aug. 22.—Art circles have been much interested in the announcement of the plans for the monumental building of the "New Theater," which is to be erected as a school and theater for the development and production of American dramatic art. Those interested in the stimulation of dramatic art in this country have liberally endowed the New Theater with funds. The plans for the New Theater, which have just been filed, show that the theater and school will occupy the block on Central Park West between Sixty-second and Sixty-third streets. The theater will have a great colonnade front facing Central Park. Five entrances will open upon a vestibule with two grand staircases leading to a second-story foyer as in the Continental opera houses. The structure will be of light colored decorative stone of Italian renaissance design, and will be seven stories in height in its main part with an eleven-story extension in the rear. There will be two galleries in addition to the parquette and, exclusive of the boxes, the theater will have a seating capacity of 2,500. The boxes are to be arranged in the rear of the auditorium for special decorative effect, and forty-six of them are to be reserved as the personal property of the forty-six founders. The New Theater is to be fitted with a special dramatic and musical school, with its own separate concert hall and stage and a dozen school-rooms. A main garden will occupy the roof over the auditorium. The cost of the New Theater is stated at \$1,700,000.

### SCHOOL BUILDING.

Republic, Mich. The board of education of Republic, Mich., (Peter W. Pascoe, Sec'y.), will receive sealed proposals until August 26, 1907, for the erection and completion of a High and Grade school building at Republic, Mich. Plans, specifications and instructions to bidders, are now on file at Republic, also at the offices of the architects.

The right to reject any or all bids is reserved.

## "SALOMY JANE"

5 MONTHS IN NEW YORK

5 MONTHS IN NEW YORK

By Paul Armstrong, author of "The Heir to the Hoorah," based upon incidents in Bret Harte's California Idyl of the same name. Liebler & Co., Mgrs.

With one of the most magnificent productions ever seen, and an extraordinary cast of the best players.

PRICES: 25c to \$1.50 :: Special rates of fare on South Shore Line from points west of Ishpeming

News and Notes of Upper Peninsula

Drowned in the West—

News is received from Washington of the drowning in a small lake of Hans Paulson, a former Upper Michigan man, and a companion. Paulson was aged forty-five and leaves wife and six children living on a farm in southern Alger county. He was formerly in the retail liquor business at Marquette and Au Train. He left for the West three years ago.

Basement Above Ground—

Architect Chubb's sketch of the new school house calls for a plain brick building, 65 by 90 feet in size, reports a Rapid River correspondent. The basement will be placed on top of the ground. Its walls will be of stone, and in height will be eleven feet. It will be a sixty-five-foot gymnasium, a kindergarten room, a room for the heating plant, and unfinished space for two more rooms. The two upper floors will be divided into school rooms.

Has Enough of Africa—

L. B. Sutton, a mining man well known in Upper Michigan, has left the Lake Superior region again. He was located on the Menominee range for a number of years, at one time as head engineer at the Chapin mine, and later he was manager for the Minnesota Iron company. He went to South Africa eight years ago to take charge of gold mines for English capitalists and was there during the Boer war. He concluded early in the year that he had had enough of Africa and decided to return to the United States to remain permanently.

Gets a Better Position—

W. E. Straight, a well-known timber cruiser, who for the past eight years has been a resident of Munising, has moved to Park Ridge, Ill., one of the suburbs of and thirteen miles distant from Chicago. He has been employed as timber cruiser by Clark, Poole & Co., bankers, of Chicago, for the past two years, and has been promoted by the firm to a position of greater responsibility and trust. About the first of September Mr. Straight will go south, working for a time in the states of Arkansas and Mississippi, and will then go to the Pacific coast.

U. S. A. Post for Mackinac—

An earnest effort is to be made by Senator Wm. Allen Smith to have Fort Mackinac, on the island that the city returned to the general government and restored to its original state as a United States army post. He has enlisted the co-operation of Speaker Cannon and other statesmen, with whom he recently spent some days at the noted summer resort on the Straits of Mackinac. It is intended to have two companies of artillery stationed on the island. The fort was abandoned during President Cleveland's administration, at the time the late Daniel Lamont was secretary of war.

Its County Roads Famous—

Senator Fuller of Escanaba is an automobilist of considerable enthusiasm, says the Marquette Eagle-Star. He made the trip from Escanaba to Menominee in record breaking time, and he reports that the piece of county road between the Delta county line and the city of Menominee is the best in this portion of the country. Menominee county's good roads are famous, he declares. A Philadelphia man who made an automobile trip from Menominee to Escanaba told Mr. Fuller that the piece of road mentioned was the best he had encountered in all his long journey from Philadelphia.

Fish Laws Violated—

The fish laws are certainly violated with impunity by someone, asserts the Manistique Pioneer-Tribune. Indian lake is frequently dynamited, and its shores are lined with decaying fish. Recently Abe Hughes ran across a net in Carr creek and confiscated it, also the fishing outfit that the owners left in their haste to get away. True sportsmen should combine and make it hot for such wanton violators. Indian lake is sufficiently large to supply sport and fish for everyone partial to such diversions, but it is a notorious fact that the fish are very scarce in that body of water.

Improvement Work Halted—

According to advice from the Soo the city fathers have aroused themselves to the belief that it is time to call a halt in the matter of ordering public improvements, for the time being at least. No arguments are offered in favor of this action—first that the city is not in condition financially to stand for anything more than such improvements as are absolutely necessary, and secondly that the board of public works already has more work assigned it than it can get through with before the middle of another season. The policy of the council regarding newly proposed improvements from now on will evidently be to give attention to those only which are considered absolutely necessary. Improvements will be made whenever it is thought that they will likely be the means of saving the city from damage suits or wherever public convenience absolutely demands them.

Immigrants Chopping Wood—

The shortage of labor which has hampered operations in the woods of Upper Michigan is being relieved in part by the dispatch direct from the coast of immigrants secured as the men have landed from the steamships which have conveyed them to this country. Large numbers of Hungarians are being employed by wood-chopping concerns, and lately Austrians have been arriving in considerable force. Many Finns have been established in colonies during recent years, and they form an important element in the supply of timber for the iron companies' charcoal kilns. Lumbering in the eastern half of the peninsula has been much retarded all year because of lack of labor, and the summer cut has fallen materially below expectations. One sawmill has been compelled to suspend operations entirely, and others are working short-handed.

Joins the U. S. Navy—

Announcement has been received in Escanaba that W. J. Hatton, Jr., who left the city several days ago for Cheboygan, Mich., to enter a competitive examination for the position of machinist in the United States navy, passed at the head of the class of applicants. As the result of his high standing Hatton was made foreman of a number of recruits who have left Sheboygan for Norfolk, Va., where they will report at headquarters and be assigned to their work. Mr. Hatton will enter the navy as a second class machinist and will remain in the service for a term of four years.

Pioneer to Remove—

Levi W. Trenary, after whom the flourishing little town of Trenary, in southern Alger county, is named, is closing up his business affairs preparatory to moving to Ann Arbor this week. Mr. Trenary, with two or three other well-known citizens of what is now known as Mathias township, arrived in Alger county over twenty years ago when the district was almost an unbroken wilderness. He cleared up a good farm and lived to see a flourishing little community grow up around it. Mr. Trenary has been supervisor of his township and has taken an active interest in politics.

Will Bore Another Well—

Oil not having been encountered in the first well put down by the Chippewa Oil & Gas company, this at Pickford, arrangements are making to start a second well in the vicinity area being secured. A depth of 1,500 feet has been attained at Pickford, and while drilling has temporarily been suspended, pending the arrival and installation of heavier casing, it is the intention to sink the well 1,000 feet further. The well is spouting like a geyser, but it is water that is gushing forth. The water is strongly mineralized, and there has been some talk of putting it to commercial use.

Widow Brings Suit—

Suit has been commenced in Menominee circuit court by Jennie Adams, widow of Gust Adams, who was murdered at Nathan, seven years ago, against the bondsmen of John Adams, administrator of the estate. It appears that shortly after the murder of Gust Adams the case was brought up in probate court and John Adams, a brother of the deceased, was appointed administrator. The estate amounted to \$2,800, but only half of the amount was paid to the widow, the remainder being paid to attorneys, administrators and others. Suit was brought in circuit court and a portion of the remainder of the estate was recovered. There still remains \$100 unaccounted for and this suit is brought to recover that amount. John Adams, the administrator, is now in Washington.

Loses Its Army—

The old opera house has been leased to other parties by the A. Booth company and the military company, which has occupied the building for army purposes during the past two years, will vacate, says the Manistique Pioneer-Tribune. The company should be made allied with the Michigan National Guard. There is certainly much good material in the city from which to organize a first-class detachment. When the Spanish American war broke out a full company offered its services to the nation from Manistique alone. The experiences of that campaign and the constant drilling under competent masters during the past two years have resulted in the attainment by the present company a great degree of proficiency. Manistique cannot afford to allow the organization to disband.

Lake Superior "Tides"—

It is a mistaken notion that Lake Superior—greatest of inland seas—is a stationary body of water; that is, that it retains the same level year in and year out. On the contrary there is more or less fluctuation all the time, while occasionally the movement of the so-called "tides" is sufficiently great to be startling. Captain A. F. Peterman, of the tug Silver Spray, who is well acquainted with the whims of Lake Su-

perior, says that he cannot recall a time when the difference between the rise and fall of the tide was so great as was the case at Munising a few months ago. In the morning, after a downpour of rain, the lake receded three feet. Captain Peterman's tug was tied up at a dock where there is, under normal conditions, eleven feet of water. Yet soon after the storm the tug, which draws eight feet of water, rested on bottom. Later in the day the tide rose gradually until it reached a point three feet above the normal. This within the space of a few hours the lake rose and fell no less than six feet.

Pumping Capacity Inadequate—

The board of public works of Manistique has made a move in the right direction by asking the city council to purchase a pump having twice the capacity of the one at present in use. It has been demonstrated upon several occasions that the pump installed with the water works last year is inadequate. The Manistique, Marquette & Au Train railroad company has entered into an agreement with the city to use 7,000 gallons of water daily for its locomotives, for which it will pay \$10 per month. The water will be drawn from a hydrant until the location for the new roundhouse is fixed.

Newberry Youngster's Adventure—

Ethel Hawkins, eleven-year-old sister of Mrs. John Whitty of Newberry, created some excitement and no little worry to her people the other evening when it was supposed she was lost in the woods. It appears that the youngster had secured permission to go berrying at a neighbor's place. While picking in the neighbor's home she found the nest of the party had departed, and, not to be cheated, the young miss started out alone. When night came she did not return and no one could be found as to what direction she had taken. Mr. Whitty spent the entire night scouring the country in search of the child. In the morning the tension was relieved by a message received over the telephone that the little lady was safe at the wood camp about eight miles north of town and had been there all night.

Road Contract Awarded—

A year from now, if all goes well, there will be an automobile road from Munising to Munising Junction, a distance of four and one-half miles, says the Munising News. At a meeting of the board of county road commissioners, a contract for grading a new county road was let to George Coates of Munising. The contract price is thirty cents per cubic yard and there will be approximately 40,000 cubic yards in the job. Mr. Coates will begin work at once but owing to the lateness of the season the road will not be completed until the summer of 1908. The road will be constructed in accordance with the requirements of the state in order to claim the reward offered by the commonwealth for highways built as it directs. The road will pass through a beautiful and picturesque country.

Indian Doctor Hiked—

Last week a traveling fakir, calling himself an Indian doctor, pitched his tent in Gladstone and set his nets, reports the Delta. Dr. Bjorkman, on behalf of his profession and the public, made a complaint for violation of the law and justice against the warlike. On the hearing, by advice of Mr. Nordblad, who appeared for the people, the prisoner was discharged on condition that he quit town at once. He did so. The quack doctor is much more detrimental to the county than a common burglar or thief. He is a cunning and avaricious man, and he is usually neglected. The intelligent citizen will not interfere because he is busy, and the "doctor" does not trouble him, so the fakir lifts his nets, pockets his plunder and goes on his rounds and victims new. The story is as old as the Father of History and as new as the morning newspaper.

Body Guard for Governor—

When Governor Warner visits the Menominee county fair Sept. 12, he will be accompanied by a bodyguard composed of officers both of the United States army and the state National Guard. In a letter received by Chairman A. W. Blom the list was received and preparations are now being made for entertaining the executive. The bodyguard will be composed of an officer from the regular army, Lieutenant James O'Connor, of the signal corps; Colonel Robert J. Bates, of the Third Infantry, and two members of the governor's military staff. The officers will be dressed in full uniform and will be constantly with the governor during the afternoon. The selection of judges to decide the military drills and contests between the Menominee, Marinette and Ontonagon companies has also been made. The committee selected is composed of Colonel Robert J. Bates, of Michigan, Major Wallace T. Green, of Wisconsin, and Lieutenant James O'Connor of the United States army. The committee will decide the winner of the cup to be presented to the best company. Besides the governor, number of other distinguished state, national and army officers will be present. The drills promise to be the finest and most interesting ever witnessed in Menominee.

Western Miners Plan Invasion—

Having organized a number of local unions on the Mesaba range, the Western Federation of Miners is planning to gather into its fold the Michigan and Wisconsin districts of the Lake Superior iron region, writes an orange correspondent. Undaunted by the dismal failure of its strike in the Minnesota fields, it proposes a similar effort in the Michigan and Wisconsin districts. The advance guard of organizers has put in an appearance in the person of one John Kolu, a Finn. Sent out to spy the land, some missionary work has been done by this emissary at Crystal Falls, Ironwood, Ishpeming and Ontonagon, but it cannot be said that he has accomplished much. He has found the miners busily employed at the highest wages in the history of the industry—so busy, in fact, that only a mere handful of the more curious have had the time to turn out to hear what he had to say—and he has found the workers contented with their lot.

From what could be gathered from Kolu's statements, it appears to be the intention to set up a few organizations on each of the ranges this coming fall and winter, and to follow this with the presentation of demands upon the mining companies next spring. However, it is a situation that is not productive of anxiety to the operating concerns. It can be stated, too, that any such program as ascribed to the Western Federation is doomed in advance of its formal pronouncement. The mining companies do not believe that many of their men could be induced to affiliate with the Denver organization. This number would comprise few skilled or contract workers and would be made up almost entirely of foreigners. Indeed, the socialist tendencies of their native lands. In the second place, no recognition whatever would be accorded the unions. The open-shop principle was long ago established on the old ranges of the Lake Superior iron region, just as it is in the copper country, where 17,000 miners are at work, and it was established as a permanent fixture. In the third place, the mining companies will listen to no dictation whatever as to how they shall conduct their business affairs. They will adhere to this policy even if necessary to close their mines and keep them closed indefinitely. One does not lose its value if left in the ground, and it would not be the companies that in the long run would lose financially.

Practical Uses of Corn Starch. You cannot have a more practical and useful food article in your kitchen than the genuine KINGSFORD'S OSWEGO CORN STARCH. —the standard of quality for over half a century. For making dainty and wholesome desserts it is unequalled; but its more practical use consists in helping you in your cooking and baking. Learn how it will wonderfully improve the quality of bread, pastries, jellies, soups, gravies, and many other everyday dishes, by consulting our ORIGINAL RECIPES AND COOKING HELPS. Prepared by two famous cooks. Yours free. The genuine Kingsford's Oswego Corn Starch is uniform and of purest quality, unadulterated as a food. Made for over fifty years in Oswego, N. Y. All grocers, in pound packages—10c. T. KINGSFORD & SON, Oswego, N. Y. NATIONAL STARCH COMPANY, Successors.

NAVY TO WATCH BUILDERS. Defects in Warship Construction Discovered, Inspection Is Tightened.

Washington, Aug. 22.—Unless American shipbuilders are more careful of the quality of workmanship in the construction of naval vessels, the government may be forced to return to government inspection of warships. Evidences of careless work in the construction of some of our largest battleships recently received by the government has caused the navy department to increase its inspection of naval vessels. The government inspectors at more than one ship yard. It is, of course, a reflection on our inspecting officers that these defects were not discovered before the ships left the yards, and yet it must be remembered that in any system of inspection, however rigid, the responsibility of the part of the contractor must be assumed. So complicated is the building of a warship and so distributed the responsibility of selecting materials for the same, that if a contractor or one of his foremen set out to "do" the government, the inspectors, however competent and alert, are lucky if they detect the thief. For that in plain language is the class of criminal to which such dishonest persons belong. Inferior material or defects in construction, particularly if they have been so cleverly introduced as to escape the watchful eye of the inspector, may endanger the lives of an entire ship's crew in an emergency, so that the thief in the end becomes a murderer. It is not necessary to mention disturbing facts which have been known to the navy department for some time. It is fortunate for the good name of American shipbuilders that a majority of the yards engaged in contract work with the government enjoy the confidence of the department, and even when defects in construction have been unearthed before or after the ships have been turned over to the government, naval officers in most instances are inclined to believe that they have been due to ignorance of the necessity of the navy, and not to any intention to defraud. But this only means that all American shipbuilders must be more careful in the selection of their workmen, especially their foremen. In the last instance, the government must hold the contractors responsible for defects.

The establishment of an admiralty list of shipbuilders of the kind kept on file in the British admiralty has been suggested to the navy department as a preventive against this trouble. In the British navy an admiralty list of competent shipbuilders is maintained, and only companies on that list are permitted to bid for contracts for warships. Where defective workmanship is discovered the shipbuilder responsible for it is stricken off the list, and he generally has a hard time getting back on the secretary of the navy recently had a list of American shipbuilders prepared in the order of their trustworthiness, and it would doubtless cause a sensation if congress should call for this list at the next session. So far as the delay in warship construction is concerned, it is something to be said on the side of the contractors. The custom of making changes in our warship designs has gone so far as to constitute a nuisance and a menace. A naval officer will go to Europe on a pleasure trip and return with a host of ideas, picked up here and there, and with the prestige of a trip across the seas is too frequently able to have a change introduced in a battleship already under construction which will mean considerable increase in cost to the government, and what is more expensive in the long run, great delay in the completion of the ship.

The country will never have the proper centralization of responsibility in the navy department until congress authorizes the creation of a general staff. The present organization of the department depends for its efficiency of administration upon a strong secretary of the navy, and these have been exceedingly scarce during late years. The navy portfolio during the present administration has been used as a kindergarten for the cabinet, or rather it has been abused for this purpose, and as a result the navy and the country have suffered. The contest between the various bureaus continues and has been aggravated to a great extent by the admission of some of the cabinet members to the cabinet, or rather it has been abused for this purpose, and as a result the navy and the country have suffered. The contest between the various bureaus continues and has been aggravated to a great extent by the admission of some of the cabinet members to the cabinet, or rather it has been abused for this purpose, and as a result the navy and the country have suffered.

Resolved, That it is the expression of the people of this city that the presence of the said agitator is detrimental to the interests of the business men and laborers of this district, and that he be requested to leave this city on the first outgoing train. The citizens of this district will not tolerate sanquary or allow agitators to stir up strife among the people.

It was stated by Kolu that it was not the intention of the Western Federation to wage industrial war against the independent mine owners. The Steel Corporation, alone, he said, was the object of its efforts. However the fact remains that during the recent strike troubles on the Mesaba no favor was shown. The "independents" were affected along with the "trust."

Diarrhoea. When you want a quick cure without any loss of time, and one that is followed by no bad results, use Chamberlain's Colic, Cholera and Diarrhoea Remedy. "Let us have some Cudahy's Paacock bacon and calves liver for supper Mama" say young and old. (11-27-07) It never fails and is pleasant to take. It is equally valuable for children. Famous for its cures over a large part of the civilized world.

PLAN TO PREVENT THE WATERING OF STOCKS.

New York Commission Adopts Rules Calculated to Check Abuses. New York, Aug. 22.—Drastic measures to prevent stock watering in lighting and transit companies have been adopted by the public service commission. These new rules will be made effective on the constitution, one of which practically makes it impossible for another merger of public service companies by laying down the most rigid rules regarding the holding of the stock of another company by any public service company.

After prescribing that applications for the issue of new stock, bonds, and notes shall be accompanied by all certificates of the company's organization, the rules provides that the application shall also contain:

A sworn statement in detail of the financial condition of the company, giving the amount and kinds of the capital stock of the standing and the rate and amount of dividends declared thereupon during the last five years; the outstanding indebtedness, whether secured or unsecured, and if secured by mortgage or pledge, a copy of the instrument shall be annexed to the petition, a description of the road, and, in general terms, of its equipment, and a statement of the cost of its existing property.

Stocks Held by Other Companies. "It shall contain a statement of the amount, if any, of its stock held by other corporations, their names and the amount held by each."

Must Describe Property Desired. "A statement in detail of the property which is to be acquired, with its value; a detailed description of the construction, completion, extension, or improvement of facilities; an estimate made by the holder of its cost; a statement of the character of improvement of its service proposed and of the reasons why the service should be maintained from its capital; if it proposed to discharge or refund its obligations; a statement of the nature and amount of such obligations, including their par value and the amount for which they were actually sold and the application of the proceeds."

Stocks Used in Other Enterprises. "A statement showing whether any of the outstanding stocks or bonds or other obligations of the company have been issued or used in capitalizing any franchise or any right to own, operate, or enjoy any franchise or any contract for consolidation or lease, and if so, the amount thereof and the franchise, right, contract, or lease so capitalized."

CONFERENCE ON SANITATION. Next International Meeting to Be Held in Mexico City.

Mexico City, Mexico, Aug. 22.—The International Sanitary congress will hold its next convention in this city during the first week of December. The congress is subsidiary to or rather the outgrowth of the Pan-American congress, which adopted a resolution at its session held here in 1902 providing for the creation of the international sanitary congress. The substance of this resolution was that before the expiration of that year the delegates from the several Pan-American countries should assemble to discuss sanitary affairs. In response to that resolution the first international sanitary congress was held at Washington on Dec. 5 of the same year. The second convention was called to meet at Santiago, Chile, but for some reason a meeting did not take place. The next convention was held at Washington in October, 1905. Delegates were present from Mexico and many of the Central and South American countries. A treaty on international sanitary police was signed and has since been ratified by the governments of the United States, Chile, Cuba, Costa Rica, Nicaragua, and some of the other countries of Central and South America.

One of the things provided in this treaty is that the local authorities of any state or sub-division of any country cannot impose a quarantine against another country. Mexico has long been the past from quarantines placed against her by Texas, and it was intended that this provision should put a stop to this practice. Another object sought to be obtained by the treaty was uniformity of quarantine regulations of the different countries. The various provisions of the treaty have been rigidly observed, especially by Mexico. It is claimed that under its enforcement the sanitary policing of the various tropical countries has been greatly improved and that in some countries, Mexico particularly, yellow fever has been practically eliminated. The whole coast of the Gulf of Mexico, including an extension of more than 5000 miles, is protected by the same sanitary regulations. The arrangements for the coming convention to be held here are in charge of the Superior Board of Health. An interesting program is being prepared. Papers will be read on epidemic diseases, such as cholera, plague, yellow fever, malaria, cholera, beri-beri and trachoma. The

best measures and methods for the extinction of these diseases will be discussed. An exhaustive report will be made on the sanitary condition of the several parts of the different countries. Reports will be made of prospective sanitary improvements, such as sewer systems, drainage works, etc., in the different cities. Each delegate will be asked to suggest some practical sanitary regulation directed to prevent the transmission of tuberculosis on trains or ships where healthy and sick persons travel together.

SHORT TALKS BY L. T. COOPER. SLEEPLESSNESS.

Do you know what makes people lay awake and toss and roll about at night? Do you know there are various causes. I tell you it's stomach trouble. I know it because I've seen thousands of cases and watched them grow. A stomach that is over-crowded with undigested, decaying food matter effects every organ of the human body. It causes nervousness, headaches, constipation, impure blood, poor circulation and dulls the mind. It makes one restless and uneasy. When your stomach is working right you feel right. You sleep well and you eat well.

People come to me day after day and tell me they can't rest after eat'g. They have a dull headache. At night they go to bed simply because they are exhausted. They catch a few cat naps and get up in the morning feeling as worn out as they did before. I have recommended Cooper's New Discovery, a regular diet, regular habits and invariably these same people come to me afterwards and tell me they feel much better because they eat well and sleep well. Herewith is a sample. A letter I received from Mrs. Geo. Weisel, 1121 Providence Road, Scranton, Pa., suffered for three years from stomach trouble, inactive liver and rheumatism. Everything I ate disagreed with me and I lay awake night after night. I had no pleasure in life and could scarcely do my work about the house. I heard from a neighbor of Cooper's New Discovery and I bought two bottles of it. It helped me right away. Now I have a good appetite and never suffer from indigestion. I sleep well and awake refreshed. I want to thank you from the bottom of my heart for what this medicine has done for me.

The Cooper medicines have a larger sale than any medicine on the market. Our customers speak highly of them. The People's Drug Store, W. J. Hebbard, Prop., Ishpeming, Mich.

S.S.S. HEALS OLD SORES. An old sore or ulcer is only a symptom, an outlet for the impurities and poisons which are in the blood, and as long as this vital fluid remains in this impure, contaminated state the place will never heal. The application of salves, washes, powders, etc., may cause the spot to scab over, but a fresh outpouring of diseased matter from the blood starts it again, and thus it goes on, gradually growing worse and slowly affecting the entire health of the sufferer. There are many ways in which the blood becomes contaminated and poisoned. A long spell of sickness breeds disease germs in the system, the failure of the eliminative members to remove the refuse and waste matter of the body, the excessive use of mineral medicines in certain diseases, all infect the blood with morbid matter and germs which sooner or later is manifested by a sore that refuses to heal. Persons with inherited blood taint are very apt to be afflicted with sores and ulcers. The taint may be dormant during young, vigorous life, but when middle age is reached or passed and the natural energies begin to grow weaker, the tissues in some weak point break down and a chronic sore is formed and kept open by the constant drainage of impure matter from the blood. If the cause is not removed the sore will continue to grow worse by eating deeper into the flesh, festering, discharging, and slowly undermining the constitution. S. S. S. heals old sores by going down to the very bottom of the trouble, driving out the impurities and building up the entire circulation. When S. S. S. has removed the cause the blood becomes rich and healthy, the sore begins to heal, new flesh is formed, and soon the place is cured. Do not depend on external applications, which do not reach the blood, but begin in the use of S. S. S. and remove of the cause, and then the sore must heal. Book on Sores and Ulcers and medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

Mining News

IRON ZONE AT BUTTE.

One who is said to be among the leading mining engineers of this country, an authority whose word carries weight for the investment of millions, is quoted as follows: "I note that the Amalgamated interests are now denying that there is any such thing in Butte as the iron zone. They probably take this position now because it does not give their present positions. The chief geologist for the Amalgamated, Mr. Winchell, went on the stand in the new famous Michael Davitt second case in Helena, at the time of the Helene litigation, as did R. W. Raymond, Clarence King, Professor Shayer and other engineers and geologists and denied the theory of the "reposition of the copper. It is indisputable and the knowledge of it by the iron miners as well as engineers, notwithstanding Mr. Winchell and the Amalgamated experts, that the veins in Butte do go down into the iron zone and that many of the properties were there abandoned. "I personally know of several properties in Butte that have never yet come into copper ore again, for instance the famous 'Windless' vein of the Larus below the 1200-foot level was small tight hard iron pyrites in quartz and would not pay at all. It was crossed by the 1700-foot level and actually cut through without it being recognized. In point of fact in the Larus, there were only about four veins all parallel at a depth of 1000-feet, but below that many others, not known at all above, came in and were the big producers below that level, so that at the 1700-foot of the Larus there were twenty-eight veins numbered from many of which ore was being taken. The big blue vein of the Larus did not extend above the 1000-foot level and at that point bent over to the north and faded away into the bedding of the granite. "The vein in the East Butte is another case in point and I have no doubt but that many of the so-called 'Cora bodies' in the level of the Amalgamated mines are actually new veins having a depth or 'vein' apex. I know that the Parrot vein went into irony still at the 1600-foot level and was still in it 200 feet below that. The Cora vein into it at the 1600-foot level and Heinze made no attempt to go through it, as he was about to sell. How in the face of these underground developments in Butte, which have demonstrated in practically all the mines that an iron zone runs through the camp, it is stated that this theory is a fallacy is beyond my comprehension."

CENTENNIAL.

The recent slump in copper prices has depressed Centennial to within a few dollars of what it sold at when the company had only one shaft and when the proposition that the Kearsarge lode's rich chute, which has been the mainstay of the Wolverine, North Kearsarge and other properties traversed it at depth, was more or less theoretical. This proposition, which was advanced at a meeting held by those whose knowledge of Lake mining conditions lends authority to their opinion, and it is considered practically certain that the property will be on a basis that will insure dividends possibly within six months and certainly within a year. At the low prices that have been reached the stock seems a big bargain for those that have the patience to buy and wait the accomplishment of the destiny that has been in preparation for the past three years. Most of the shareholders of the property have their stock at much higher prices and most of what has come into the market has come from margined accounts that were cleaned out by reason of the recent general slump. Such stock was sacrificed for what it would bring, and the market

ECZEMA NEARLY REACHED EYES

Disease Spread Over Whole Body—Face Was in Awful Condition—Itched So That Baby Could Not Sleep—Doctors and Home Remedies Failed—Mother in Despair.

CURED IN THREE WEEKS BY CUTICURA REMEDIES

"I take great pleasure in dropping you a line to tell you what a Godsend Cuticura Remedies were for my baby. My little one was suffering from that terrible torture, eczema. It came out in time to save my baby from death with all the different things, but could see no improvement. Finally I got discouraged, and was just about to give up all hope of his ever getting cured, when I read about the wonderful Cuticura Remedies, and gave him Cuticura Ointment, and saw an improvement in three days, and in three weeks his skin was as clear as it could be. That was six or seven months ago, and I have not seen any return of the disease since. I should have written long ago, but I waited to see if it would return. I shall recommend the use of Cuticura from one end of the world to the other. Mrs. Maggie Smith, 314 W. Crocker St., Akron, O., July 24 and Aug. 11, 1906.

lower eyelids and I was just about sick for fear it would get into his eyes before I got it stopped. He cried and scratched all the time and could not sleep night or day from scratching. I took him to the best doctors, and one of them said that he would keep the disease on his face all his life if I had depended on the doctors. I guess my boy would have been laid at rest by this time. My friends told me to try many kinds of remedies, and I pestered the child to death with all the different things, but could see no improvement. Finally I got discouraged, and was just about to give up all hope of his ever getting cured, when I read about the wonderful Cuticura Remedies, and gave him Cuticura Ointment, and saw an improvement in three days, and in three weeks his skin was as clear as it could be. That was six or seven months ago, and I have not seen any return of the disease since. I should have written long ago, but I waited to see if it would return. I shall recommend the use of Cuticura from one end of the world to the other. Mrs. Maggie Smith, 314 W. Crocker St., Akron, O., July 24 and Aug. 11, 1906.

has been worse for the reason that the Calumet & Hecla, which owns the leading interest in the property, is kept out of the market by reason of the pending suits in the Osceola property. The old shareholders of Centennial have never lost faith in the property and they are selling no stock. They know what conditions are and believe that when a recovery in the market does come that the property will be among the first to recover. The policy of the Calumet & Hecla management which is now directing local operations does not differ from the general policy that President Fay has always pursued, excepting only that having practically unlimited financial resources work is being pushed with greater vigor to the ultimate result than was possible when the management had to keep the bread and butter problem always before it. Shaft 4 is now being used entirely for the opening up of the ground north, and no advance has been made in the amount of rock extension, that in the Osceola property. The fact that the Calumet & Hecla will be able to get better results ultimately by opening up thoroughly the ground that previous operations had merely explored. One-half the capacity roughly of shaft 1 is being also used in development work, both in sinking and extending the shafts and drifts at the 30th and 31st levels.

This work is bound to tell in the end and the purpose of General Manager MacNaughton is to have enough ground opened to permit the Centennial to run three heads of stamps in the Centennial mill just as soon as the additions can be completed and the additional machinery installed. The new compressor is now in thorough working order and these give the company more than double the drill capacity that it formerly had. The entire increased drill capacity has been turned into the development work in the Osceola property, so that the added operations as yet make no showing in the monthly tables of production which the company issues. Since the betterment of ore at the 24th level has first been a factor in the company's operation Centennial has always better than paid for. Before the Calumet & Hecla entered into the situation at all the property had solved all its most difficult problems. The big debt that was incurred by the purchase of the Ardenian mill was wiped out by the sale of half the mill to the Allouez, and the money had been accumulated as a result of better copper prices and higher copper values remained as an asset in the treasury. The coming in of Calumet & Hecla simply meant a freer arm to carry out the plans of the management since it can afford to neglect earnings and turn all its energy to opening up the property in the shortest time.—The Statist.

VICTORIA.

James P. Graves, treasurer of the Victoria Copper Mining company, issues the following statement: Four of the directors of the Victoria Copper Mining company met at the mine last week. It was held in an electric building to fight the buildings and to purchase two electric locomotives to be used underground in the long drifts and crosscuts where trammers object to working. The difficulty in getting trammers in the most serious matter the management has had to contend with during the last year or three months, considerable time being lost by the stamp mill each week on that account. All the mines in Michigan are short of men, but as Victoria is further away from a town, village or railway station than any of the other prominent mines, it is more difficult to get men to work there. It is expected that after the crops are harvested enough men can be found to keep the mill supplied with rock and do the extensive development work.

The mill is working very well indeed. The management was changed some months ago and several improvements have been made, as a result the mill is now stamping 350 tons of rock per day and could probably stamp 400 tons if trammers to supply the rock could be had, while a year ago the same head could stamp only 275 tons of rock. Four new veltay tables have been put in the mill recently in place of eight jigs and more copper is now being saved; the loss of copper in the tailings is only one-tenth of 1 per cent. The new cylinder for the stamp which is expected to increase the capacity to 700 tons per day was not delivered until last week, although the contract called for its delivery Jan. 20. The stopes in the mine look as well as they have at any time.

There are ten known lodes on the property south, between the present workings and the eastern sandstone; a crosscut south from the nineteenth level is being made to test these lodes. It is planned to go long now and has cut three lodes, but they did not carry copper in commercial values where encountered. No diamond drill work has been done, as it will be much more satisfactory in looking for veins and other lodes to run a tunnel north, and this has been started from the south side of the bluff, 285 feet below the collar of the shaft, and is now in between sixty and seventy feet. If the Butte lode is on the property it should be about the same form but in any event, the tunnel will be used to prove up all the lodes until it meets the line of the crosscut south from the nineteenth level.

BUTTE & BACORN.

The Butte & Bacorn Mining company has crossed two veins at the 1000-foot level. In the crosscut the veins do not carry ore in commercial quantities but the veins are so much better than they were found to be at the 600-foot level that the management is satisfied now that the Butte & Bacorn will develop into a copper producer, and that it is only a matter of depth and development that will give it a new lease of life. One of the veins penetrated is sixty-three feet wide and the other twenty-eight feet. The veins assay in copper, gold and lead. Several more veins will be cut by the north crosscut from the summit shaft, and it is the intention of the management to drift on the veins to ascertain their value. He thinks it possible that commercial ore will be found in the two veins already cut at the 1000-foot level. If the crosscuts and drifts at sinking will be resumed and carried 500 feet deeper, making the shaft 1,500 feet deep, a depth which mining men generally have set as the point at which commercial ore would be found.

The Butte & Bacorn has filed for record in the county clerk a financial statement showing a capitalization of \$5,000,000, with assets of \$100,000, including twenty-five mining claims. Its chief assets are its prospects of developing a big mine. Half a dozen other new

companies, owning ground in the Butte & Bacorn district, are awaiting the results of the Butte & Bacorn development work.

EAST BUTTE.

The East Butte Mining company is cutting a station at the 900-foot mark on shaft No. 1, and it is expected that the rich vein of ore cut at the 800-foot level will soon be opened in the station, says a Butte correspondent. If the vein is satisfactory at the 900-foot level it may be developed at that point and mining done on it. But whether that is done or not, the shaft sinking will continue, and will be resumed as soon as the station is finished. There has been no limit placed to the depth to which the shaft will be taken to the 1200-foot or 1500-foot level without cessation of the work.

In other parts of the mine the development work is making good progress. From the 400-foot level of the No. 1 (Yankee Bay) shaft, the south crosscut has penetrated the Yankee Bay vein which has a width of sixty feet. The crosscut is in only about half way. The entire vein is good concentrating ore, but eight feet of it gives an average assay of 4.5 per cent copper, which is considered a good grade of ore for that depth. The crosscut between the No. 1 and No. 11 shafts will soon be connected. All the mining that is done in the East Butte ground is done by lessees above the 400-foot level, and what ore is taken out of the 400-foot level is sent to the American company in the course of development work. According to Manager Wall the gross earnings of the lessees during July were \$50,000 which, however, included the shipment of concentrates and the output of the prospecting plants. The company gets a royalty of 25 per cent of the gross.

The company does not intend to do any extensive mining on its own account for some time, its purpose being to open up and block out all the ore it is possible to open, so that a close estimate can be made from measurements as to the quantity that can be figured on to furnish a supply to a big concentrating and smelting plant, which eastern financial interests are intending to build. The plan has long been in mind of the big interests back of the East Butte, and it is said that it will be built just as soon as the ore in sight in the mines will justify it.

One of the precipitating plants of the company has been ordered to be completed since the recent big cloudburst in the hills east of Butte, and the smaller of the two plants, along with the plants of a dozen or more other precipitating concerns along Silver Bow creek, was covered with sand and mud, and the water to the extent of thousands of dollars was done to the different plants. The owners are now busily engaged in cleaning them up, preparatory to starting over again. The large plant of the East Butte company was not damaged, and has been running continuously.

LEWISOHNS IN CANANA.

Important news from Cananea comes in the announcement that the Cananea Nevada property of Lindsay & Talbot has been sold to the Lewisohns. That the Lewisohns were after this property and that they would acquire it in the event of satisfactory findings by their engineers and experts was reported some weeks ago, at the time the first of the experts went in to make examination. He was followed by two other experts who checked over the work of each other and rendered report which there is no doubt now was very satisfactory. A year ago the Lewisohns were at the America property of Lindsay & Talbot, but let it slip into the hands of Colonel W. C. Greene, who later turned it into the Cananea Nevada organization.

On the Cananea Nevada deal the Lewisohns permitted the smaller mining concerns after once taking the property under consideration. In the manner of its development into a highly attractive property it bids fair to repeat the performance of the America. This statement is based on the new strike reported when the shaft went into a body of ore of good commercial grade, said to average better than 6 per cent. The shafts and drifts from it have had low grade ore from the surface down, a 2 per cent average having been obtained in the streaks which came into the ledge matter. From the beginning Mr. Talbot has expressed large confidence that the property would at least make a big low grade proposition.

Cananea Nevada contains something over 1200 concessions, located on the other side of the granite core at the north of Greene-Cananea holdings in the immediate Cananea camp. Demonstration of a mine on the Cananea Nevada will mean a great deal to the camp in general and to a large amount of territory held under denouncement by Cananea people on the north of the granite. A rush was made into this territory last spring, when Cananea Nevada development commenced with favorable results in that section. The work done in these denouncements is very similar in general surface conditions. Numerous veins cut across the country nearly all yielding values at grass roots. Should the section prove up as the findings of Cananea Nevada now appear to give ground for expectation, there will be a big camp there.

UNITED COPPER.

Under the direction of J. L. Mahn, of the United Zinc company, successor of the Montana Electric company, the old Alta concentrator at Corbin is being remodelled for the purpose of making an extensive test of a new process for the reduction of base ores, especially those containing zinc, says a Butte correspondent. The company is in a switch joint with the management of the property, MacGinniss, of Butte, is said to be the moving spirit, and with him are associated F. Augustus Heinze and James Breen. An extensive run is to be made on ores from the Corbin and Connet mines, and some of the Butte ores will also be used for experimental purposes. The process is known as the chlorination process. In the last stages of the process the various metals are reduced to their original metallic form, gold and silver being saved as bullion, separately, and lead and zinc as separate masses. The tests have proved so highly satisfactory that the company has decided to build an extensive plant in addition to the one about to be operated at Corbin. The new plant will be located in Butte, on the site now occupied by the old Lexington mill, and it is said that the plans and specifications for the new plant have been prepared. The plant will be erected at a cost of \$1,000,000.

The Butte & Bacorn has filed for record in the county clerk a financial statement showing a capitalization of \$5,000,000, with assets of \$100,000, including twenty-five mining claims. Its chief assets are its prospects of developing a big mine. Half a dozen other new

Paint which has only 50 per cent. of White Lead in it is only 50 per cent. paint. Yet adulterated white leads and paints sell for very little less than Southern Pure White Lead which is 100 per cent. paint, guaranteed by responsible manufacturers. Look for the Dutch Boy Painter on the keg. For sale by first class dealers. Send for Free Book, "A Talk on Paints," which is a valuable information on the paint subject. NATIONAL LEAD COMPANY, 1510 State Street, Chicago, Ill.

OLD DOMINION. It is estimated that the Old Dominion company will this month produce 3,500,000 pounds of copper of which 2,500,000 pounds will come from the Old Dominion mines proper. This company sells its product as fast as it is produced to the American Metal company at the ruling quotations based on the Engineering & Mining Journal's published prices, and it makes no difference to the Old Dominion company whether the American Metal company disposes of the copper or not, it gets its money. The Old Dominion will this month receive about 19 cents per pound for its copper. President Charles S. Smith has left Boston upon a periodical visit to the property. The investment value of Old Dominion stock is worth \$28 per share, its present price, with the property shut down. People appear to forget that rising \$4,000,000 of new money has gone into this property in the last few years, its former value of \$10 per share would leave a value of but \$4,000,000 for the mines, and there is twice this value on 15-cent copper in the ore body opened on the thirteenth and fourteenth levels, and in the west country portion of the mine, to say nothing of the upper levels of the property which have yet many years of life. Phelps, Dodge & Co. and other prominent interests in the company were anxious to underwrite without commission the new issue of \$2,000,000 of stock, but they were entitled to as stockholders, yet now the stock is thirty points below the price.

BOOSTS AMALGAMATED.

Viewed from every investment standpoint, there is no copper stock on the board in such strong financial position as Amalgamated, asserts the Boston News Bureau. It can earn its present \$8 dividends should copper go to 15 cents per pound, and its treasuries as well as those of its sub-companies were never richer in cash. Directors have refused to follow the example of some of the smaller mining companies in the payment of large dividends made possible by 20-cent copper, and although Amalgamated for a long time has been earning 85¢ per share the directors have voting to the 48 rate. The investment value of Amalgamated is therefore today stronger than ever before without taking into consideration the great improvement in the underground situation. In the appended table are given the present rate of dividends and the net earnings per share for fifty stocks, with the red metal selling at 14 1/2 to 18 cents per pound based on 1906 production.

Table with 2 columns: Stock Name and Price. Includes Calumet & Hecla, Cor. & Ariz., Wolverine, Grandby, Osceola, Amalgamated, North Butte, Quincy, Copper Range, Mohawk, Anaconda, American Condition, Shamrock, Tamarae.

FINNISH GLEE CLUB.

The Finnish Glee club of Calumet has decided to give a public concert on Thanksgiving Day, and is already in rehearsal under the direction of Professor Mustonen of Calumet, the most successful choral master in the copper country. An oratorio by Greig, a Finnish composer, will be the feature of the event. A. Lundblad, John Kivivirta, C. O. Jankola and August Nyström will be the soloists. The concert will be given in the theater. In addition to the oratorio there will be songs by Greig and a string quartet.

NOTES OF COPPER NEWS.

Owing to a strike and other minor troubles, the Arizona Copper company output at Clifton was considerably reduced for July, amounting to but 1,400,000 pounds against a normal production of about 2,500,000 pounds. Winslow officials are considering plans for building a steam mill on the site of the 1906 mill. The location chosen is at the mine and has many advantages over any other lake site, principally on account of the saving in operating expenses and haulage. The Butte miners in a special election endorsed the Western Federation resolutions which in effect repudiate the company with the mining companies en-

tered into a few months ago for five years. Less than 500 out of a membership of 800 voted.

The North Butte, Extension Mining company has struck a considerable flow of water in the shaft it is sinking on the Black Crow and has installed additional pumping machinery. The shaft is 170 feet deep and the supposition is that it is not far from a vein.

According to written contracts the Butte miners have thirty days' grace before returning to \$3.50 per day wage after copper drops below eighteen cents, and wages must be continuously below that for thirty days, so the question of wages will not arise for another month.

Within a fortnight the Boston Consolidated company's big Garfield mill will be placed in commission. Practically all the machinery is now installed and the plant is about ready to be turned over to the company. The mill will have an initial capacity of 3,000 tons per day.

Manager Cameron of the Butte Central reports that development on the upper levels is disclosing large bodies of high grade ore and that the mine will be capable, in a few weeks, of carrying out of development expenses, including the cost of sinking.

The Colonel Sellers shaft of the Butte & New York Copper company is now down 535 feet and will be down 600 by the end of the month. The Mountain View Spur of the Great Northern railroad has been completed and runs to within half a mile of the offices of the company. The new spur was put in by the mine at a cost of \$800 and the Great Northern has agreed to furnish as many cars as are required as soon as shipments are begun.

Development work at the Raven property is progressing rapidly. The shaft has passed the 200-foot mark, and if nothing happens to impede headway, the 900-foot mark will be reached by the first of September. While sinking is in progress, the company is drifting east on the 790, and may strike a shoot of high-grade ore at any time, for most of the good shoots are east of the north and south line of the shaft in that section.

The Victoria is now stamping 550 tons of rock a day, and could stamp 600 tons easily if a sufficient number of men could be had, while a year ago the same head could stamp only 275 tons of rock as a result of many improvements at the mill, the loss of copper in the tailings is now only 1-16 of 1 per cent. In exploring for the Baltic lode the company has started a tunnel north from the south side of the bluff 285 feet below the collar of the shaft, and is now in over sixty feet.

D. C. Jackling, manager of the Utah Copper company, states that the company is suffering from lack of cars to transport the ore to the smelter. At present, with only a quarter of the company's mill capacity in operation, it is found necessary to draw on the reserve of ore to make ends meet. To place the entire plant in operation would swamp the railroad. The railroad has placed orders for about 100 new cars, which were to have been delivered between May and July, but none have been received so far, and there is no assurance as to when they can be sent from the manufacturer.

The miner from the Victoria will soon be hauled to the mine over the main shaft, says the Ontonagon Herald. A hoisting apparatus is being constructed for the purpose of hauling the mineral into the empty rock cars. This will eliminate not a little of the work of getting Victoria mineral to the railroad. In the past it has been hauled by teams direct from the mill to the St. Paul siding at Rockland. There is a heavy grade between the mill and the mine and in addition to cutting this out will make the team haulage about a mile less. Work at the mine and mill is running along smoothly. More men could be used to advantage and will be added as soon as they can be secured.

The transportation problem for Bingham continues to be a most serious one and if existing conditions continue very much longer the result will be that the mining companies of the camp will provide their own means of getting their ore to places of reduction. It is believed that E. Augustus Heinze will build his own road to move the output of the Bingham mines which he has identified to the smelter to be erected on the south end of the Great Salt Lake.

Sinking has been resumed at the Colusa-Leonard Copper company shaft, east of Meaderville. A powerful pump has been placed at the 600-foot station, and into a tank on that level water is being pumped from the bottom of the shaft and from the 200 to the surface. The shaft is now considerably more than 700 feet in depth and proceeding at a rapid rate. Stringers are cut now and then showing mineralization. There is considerable water in the shaft as depth increases, and the result will be that the miners have been placed for a Nordberg first-motion engine, the present hoist being too slow for great depth. The new hoist, which is expected to be delivered toward the close of the year, will be capable of sinking to a depth of 2000 feet, and will lift 10,000 pounds from that depth. The recently installed air compressor is working smoothly.

The likelihood of a strike among the miners of Bingham seems to be passing, says a Salt Lake dispatch. There is now believed to be little danger of trouble during the present year. The explanation of the operators that, owing to the unsettled state of the copper market, the probability of a fuel shortage during the coming winter, and the lack of adequate railroad facilities to get ore to market, they will not consider any change in the present wage schedule has had a good effect. On top of this came the dropping of 300 men from the payroll of the Boston Consolidated company, which serves as a demonstration as to what would happen if the union pushed the case too far. The fact has been made clear to the miners that the mine of the camp would be closed rather than consider any wage advance with conditions as they are. No more strike talk is anticipated right away.

The machinists are still out on a strike and the mining companies appear to be getting along well without them, reports a Butte correspondent. The operators and boss are doing the pipe work in the mines and the miners repair the machine drills. They have also been doing some repair work on the engines and have installed an engine on the 1906 level of the McKinley mine, all of which work was formerly done by the machinists. The miners have not sympathy for the machinists in their strike. The machinists have been getting \$4.50 a day and demanded \$5. The mining companies offered them \$4.75, which they refused to accept. By striking they thought they would tie up min-

ing operations. The only work that has been interrupted by the strike is some surface work, like the installation of the new engine at the Framway mine, but ten days' work will complete that, and the company will not want to use the engine and hoist for several months yet.

A mining man, who has recently visited the Yerington, Nev., district, says that there is a lot of excellent copper ore in the Yerington camp, although there are many excellent prospects there. Metallurgical conditions are very bad, and all the ore must be smelted, as there are too many garnets and similar minerals to permit of concentrating the process. DeLamar is talking for the Biestone of a big magnetic separation process mill, Heinze's engineers, Messrs. Wilson, Frank and Bellinger, have been examining and sampling this property which DeLamar has offered for sale for \$10,000,000. DeLamar claims that by the magnetic separation process he can save 95 per cent of the copper values, but many metallurgists claim that he cannot save better than 80 per cent to 85 per cent, and that the costs make the process unprofitable. Every ounce of the ore will have to be roasted, using fuel to do it, and then, in that country of blazing heat, the roasted ore will have to be cooled. Moreover, the ore will probably have to be crushed before roasting, and the smelting for the camp will have to be done at some good distance from the mines, as the Yerington valley is an agricultural one, and the question of smoke and fumes would make smelting in the valley prohibitory.

On the Tretwey property a diamond drill is working on the hill immediately overlooking the town. The drill is now down in for 500 feet, and in addition to several calcite veins, a silver-bearing vein has been located.

At the Coniagas the management reports one hundred and ten men at work and a double shift steadily maintained. Five drills are in operation, and the mine is maintaining its leadership as a shipper. In the month of July it sent out over seven hundred tons of ore.

The Cobalt Nipigon is a new syndicate that has a large body of ore, and recently acquired the Canadian Pacific-Cobalt, where twenty-six men are kept at work. They are working near the line between Lorraine and Coleman and several good discoveries are reported.

The Green-Mehan Mining company has decided to discontinue shipping for some time and to sink shaft No. 1 below the 110-foot level. This will be followed by extensive drifting and crosscuts, to determine the extent and value of the ore bodies.

At the O'Brien the richness of the main vein and its extent has been proved at a distance of over 300 feet from the main shaft, it is asserted. Superintendent Culbert has a large gang of men engaged in surface prospecting. An enlarged plant will be installed at this mine this fall.

At the Nipissing over three hundred men are working and ten machine men are now operating drills. These ten men are training their helpers, and in this way and with any outside men that may be brought in the management hopes to wear out the strikers.

Germany is reported to be affording an increasing market for Cobalt ore. The Nipissing mine has arranged for the sale of its cobalt in that country, and a large income will be derived from this source. The Tretwey mine has also large quantities of the ore, high in this metal and low in silver, and the company will probably look to Germany to purchase it.

The Silver Bird mine has two 35-horse power boilers, a steam hoist, steam hoist and two steam drills, with other modern machinery installed. On two of the veins of this property a shaft has been sunk twenty-five to thirty feet and at the 125-foot level of the main shaft drifting and crosscutting is still being carried on. The company has twenty-two men at work.

The King Edward mine has started work again with a staff of about thirty-five men. It was one of the mines showing an uncompromising front to the union and was on the list of properties signing the mine owners' schedule. It has been shut down, as far as mining operations go, since the beginning of the strike and it now recommences work on union hours and the union schedule.

The new finds on the McKinley-Darag are proving to be as good as the most sanguine had hoped. A Cobalt correspondent says, an assay was taken from six tons of ore from the open cut on the No. 7 or Kendall vein, and it gave no less than 12,000 ounces of silver to the ton, besides a good percentage of nicotite. The concentrating plant of this mine is now all on the ground, and will be working this week, the first concentrator to go into commission in the camp.

A report from Cochrane Cobalt mine reads: "Shaft No. 1 is now down forty feet. The vein has been traced down this week, showing much improvement and is carrying more mineral and a good deal of silver-bearing ore. Two men are now cobbling and sacking ore which will carry excellent silver values. Everything looks well on the property at present. The vein is improving in width and is at present fully twenty-four inches wide. A new shaft-hole is in the course of construction on this vein. In regard to surface work the new stable buildings have been completed, and additional accommodations for men have been provided."

It is reported that the Cobalt Central Mining company will shortly acquire about nineteen additional properties. It is claimed that no increase in the capital stock will be made, as the properties will be paid for out of the treasury. On this mine a large amount of ore is ready for treatment and it is believed that the concentration plant, which is about completed, will handle the ore so economically that there will be a considerable margin of profits, applicable for dividends. The machinery for the property has arrived at the mine and it is now being installed. Of the 1,427 tons of ore shipped from the Cobalt properties during the month of July more than 700 tons, or 50 per cent, were supplied by the Coniagas

mine, which retains its place as the leader in the shipments of the district. Nipissing, Butte and La Rose. In this order, were the only others that last month sent more than 100 tons to smelters for roiling. Of the 1,427 tons shipped, 165 tons, or 11.59 per cent, were smelted in Canada; nineteen tons, or 1.33 per cent, were sent to England, and the remainder, or 87.08 per cent, came to the United States for treatment.

President Kent of the Foster Cobalt company has issued the following statement: "The report of the engineers submitted to shareholders in June was secured from the best available engineers and was most carefully and conscientiously prepared. Recent developments have shown values in excess of the predictions of the report. Vein No. 6 has lengthened and broadened, and in the well rock also good values are being shown. Vein No. 3, which had rich surface showing, has continued very strong to a depth of fifteen feet in an open cut, and at the seventy-foot level rich ore is found, indicating an ore body of great extent and value. Vein No. 8, at its junction with No. 15, both at surface and at seventy-foot level is also showing very strong. A car of No. 1 ore just reported has produced a net value of \$28,500."

In the Red Rock district in Biecke township, where the Green-Mehan mine is the best known, a number of rich strikes have been made at the North Cobalt, the Cobalt Contact and the Red Rock. Barring the Green-Mehan the strike has not effected any of these mines in the district, and the main effect of the union scale of wages, even before the strike was declared. On the North Cobalt work is being carried out on a small scale, sixteen men being kept busy all the time taking out rich ore while the Red Rock is doing the main work of ore from the No. 1 extension, which is practically an open cut. This ore is said to assay 10,785 1/2 ounces to the ton. On the Cobalt Contact an 18-inch vein of silver and argente has been located, about 100 feet from the main shaft, and on this vein the company has already sunk about ten feet, with the result that ore has been taken out running from 9,000 ounces to 12,000 ounces to the ton.

Often The Kidneys Are Weakened by Over-Work.

Unhealthy Kidneys Make Impure Blood. It used to be considered that only urinary and bladder troubles were to be traced to the kidneys, but modern science proves that nearly all diseases have their beginning in the disorder of these most important organs. The kidneys filter and purify the blood—that is their work.

Therefore, when your kidneys are weak or out of order, you can understand how quickly your entire body is affected and how every organ seems to fail to do its duty. If you are sick or "feel badly," begin taking the great Kidney Remedy, Dr. Kilmer's Swamp-Root, because as soon as your kidneys are well they will help all the other organs to health. A trial will convince anyone.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and trustworthy Swamp-Root, the great Kidney Remedy, is soon realized. It stands the highest for its wonderful cures of the most distressing cases, and is sold on its merits by all druggists in fifty-cent bottles, and one-dollar size bottles. You may have a sample bottle of Swamp-Root, by mail free, also a pamphlet telling you how to find it. Dr. Kilmer's Swamp-Root, the great Kidney Remedy, is soon realized. # WATER WHEEL ABOUT TO FALL TO PIECES

EXPERTS SAY THAT OLD MECHANISM WOULD NOT HAVE LASTED THIRTY DAYS LONGER.

## 1,200 HORSE POWER CAPACITY

Within the Seventeen Years' History of Electric Plant, Three Wheels Have Been Installed.

It is said by experts who examined the recent work done at the city's electric light plant that the old water wheel could not possibly have lasted thirty days longer. The old wheel was completely worn out and it is now understood that it continued to run as long as it did.

Worked 87,600 Hours. The old wheel has done twenty-four hours work a day for the past ten years, something like a straight run of 87,600 hours, and when it was removed, the mechanism was almost wholly destroyed by the force of the water that had played against it so long.

Within the plant's history for the past seventeen years, three water wheels have been installed. The first wheel, the one installed when the plant was erected in 1890, lasted seven years. It was capable of developing 300 horse power and was operated by a fall of twenty feet of water. The second wheel installed in 1896 was of the same size as the first one, 22 inches in diameter, but the fall of the water was greatly increased by the force of the water that had played against it so long.

Improvements. The new wheel has a number of improvements over the one taken out. The blades are of a new shape and the gates are newly patented ones, far superior to the old ones. They allow the water to strike the blades of the wheel through twelve nozzles instead of six as formerly.

When the work was first begun it was estimated that it would take seventy-two hours to install the new wheel. The reason the work was not completed in the time estimated, was because an error of a sixteenth of an inch was made by mechanics here who bored five holes for a coupling. It was found that the coupling would not exactly fit and ten hours were consumed in boring five holes in the proper places in the coupling. The wheel was ordered from the Dayton Globe Iron Works and was to have been installed June 1 last. A strike at Dayton in the plant of the company which made the wheel, delayed its delivery until about ten days ago.

Try-Out Saturday. Wednesday night, several hours after the power had been turned on, the wheel was forced up to a point where it developed 1,000 horse power. On Saturday night, when most of the lights through the city will be on, it will be forced to its full capacity, 1,200 horse power.

George Clark, the man sent from Cleveland to superintend the work of installing the wheel and others experienced in the work, said that no further delay of any sort will arise. Clark is to return to Dayton today.

## FIREMEN ELECT OFFICERS.

Fourteenth Convention of Firemen's Association to Be Held Here.

Marquette is to have the fourteenth annual convention of the Upper Peninsula Firemen's Association to be held in 1908. The city won the choice by a close margin and only defeated Sault Ste. Marie, which made a strong bid for the meeting, by two votes. The vote was as follows: Marquette, 22; Sault Ste. Marie, 1. It will be the second time that the convention has been held in Marquette. The former meeting was held here in 1899.

## New Officers.

The annual convention of the association was held in the fire hall. The officers elected are as follows: President—W. L. Mason, L'Anse-au-Loup; Vice President—John R. McDonald, Hubbard; Secretary—T. J. Flynn, Negaunee; Treasurer—G. J. Murray, Michigan; Surgeon—Dr. J. W. Moore, Atlantic. The latter office was created by the adoption of a resolution. The surgeon is to serve at annual tournaments without pay and is not a member of the executive committee. The elections were all made by unanimous choice of the convention.

The out-door program opened with the parade in which fifteen departments and three bands participated. It was headed by Village President James P. Corgan, mounted, and the order of the departments in the pageant was as follows: Calumet & Hecla band, Sault Ste. Marie, Bessemer, Michigan-Negaunee, Tamarack band, Red Jacket, Laurium, Hubbard, Redridge Juvenile band, Atlantic, Hancock, Houghton, Hurontown, L'Anse-au-Loup, Ewen, Ontonagon.

## NEEDLES AND SHUTTLES.

Sewing machine needles and shuttles to fit any make of machine. For sale by MISS B. B. DESJARDINS, (8-15-19) 509 No. Third St.

## THE BEST SHINGLES.

We manufacture the best shingles made. Our extra "A" cedar shingles are what you want. Let us give you an estimate on your building material. F. W. SAMBROOK & SON, (8-5-14)

## TRY

the National Barber shop for first-class, quick service. (8-8-14) F. REESE, Prop.

## INDUCEMENTS TO TRAVELERS.

Excursions to Be Held By South Shore Next Month at Low Rates.

A number of excursions are to be run by the South Shore next month and low rates have been announced. On Sept. 9, 12, 16, 21, excursions will leave the city for Detroit, Toledo, Cleveland and Buffalo. The round trip rates are as follows: Detroit, \$7; Toledo, \$7.50; Cleveland, \$8.50; Buffalo, \$9. Tickets sold for trains leaving Sept. 9 and 12 are good returning up to and including October 4. Tickets sold for trains leaving Sept. 16 and 21 are good returning up to and including October 11.

The above excursions are part by rail and part by water. The South Shore trains leaving Marquette will connect with boats of the Detroit & Cleveland line at St. Ignace. The rates are for transportation only and do not include meals and berths.

Another excursion announced is to the G. A. R. national encampment to be held at Saratoga, N. Y., Sept. 5, 6, 7. Tickets will be sold at one fare for the round trip good returning up to and including Sept. 17.

On Labor Day excursion trains will be run from Marquette to Ishpeming and Negaunee and the round trip rate will be 50 cents.

During the County Fair the round trip from all points on the South Shore to Marquette will be a fare and one fifth.

## MORE THAN 300 AT LODGE CELEBRATION

FEATURE OF MASONIC PICNIC WAS GAME OF INDOOR BASEBALL PLAYED OUTDOORS.

More than three hundred persons attended the celebration of the fiftieth anniversary of the Masonic lodge in Marquette yesterday at Presque Isle, and there were about a hundred and fifty couples at the dance and reception held in the hall last night.

In the morning special cars carried the merry-makers to the grounds. Tables were formed in a hollow square and the Ishpeming band played while the lunch was being eaten. Later the band played at the pavilion for the dancers and the music was also greatly enjoyed by the others and by those who sought amusement in row boats, launches and automobiles had been provided and were kept busy during the day.

## Old Register Exhibited.

Twenty-five years ago the twenty-fifth anniversary of the order was held at Presque Isle and the old register used then was on exhibition and was studied with interest by many who had attended the preceding event. There are about 150 names on the old register and over three hundred signed their names to the new one which was provided yesterday.

Unquestionably, the event of the day yesterday was the contest between the Hollow Bats and the Mullers—an indoor baseball game played outdoors. Following is the line-up of the two teams: Hollow Bats—E. H. Foster, catcher; Dan W. Rowland, pitcher; H. B. Bell, center field; Ames A. Maywood, shortstop; John H. O'Meara, first base; Wm. Noon, second base; W. W. Osband, third base; W. D. Reaney, left field; W. G. Cooper, right field.

Mullers—Ed. Mitchell, catcher; John Lewis, pitcher; Neil Cork, center field; A. H. Palmer, shortstop; P. J. Delf, first base; M. A. Breed, second base; William McClelland, third base; John Murray, left field; W. A. Brown, right field. The score of the game when it was called at the close of the third inning on account of darkness was 41 to 39 in favor, it is said, of the Hollow Bats.

Considerable comment was made when it was discovered that the Hollow Bats had imported Mr. Foster, a star catcher of the Pennsylvania State league.

## WILL DEDICATE NEW CHURCH IN DECEMBER

BISHOP EIS TO PRESIDE BUT DETAILS OF PROGRAM HAVE NOT YET BEEN ARRANGED.

It has been announced that the dedication of the new French Catholic church will take place December 1 next. On that date all the work on the new structure will be completed and the church will be ready for occupancy.

## Marquette Port List.

D. S. S. & A. docks: Arrived—Corbett, L. S. & Co.; docked—Robbins, Cadillac, Andaste, Cleared—Gratwick, Ishpeming, Buffalo; Ingois, Cleveland. The Pioneer, Chittanooga and Portage are at the coal docks. The Jeremiah Godfrey is loading lumber at the upper harbor.

## OF COURSE

You visit The Stafford Drug Co. store. Look at and examine the specimens of ore in the window. You can buy a limited number of shares of stock of the company from whose property these ores were taken. Every statement as to the company or its property is guaranteed. F. E. Widhey, 421 Pine street, (8-22-14)

## AT PRESTON'S RESTAURANT

Regular dinner served every day. Neat and prompt service with all orders. Open all night. 315 South Front street, (8-21-14)

## STOP THE LEAKS.

Now is the time that is our business. The best shingles for the best money. Consolidated Fuel & Lumber Co. Both 'Phones, (8-27-14)

## TOO LATE TO CLASSIFY.

FOUND—A pair of spectacles. Owner may have same by calling at Mining Journal office and paying for this ad. (8-23-14)

## TYPHOID EPIDEMIC ON BIG LAKE BOAT

STEAMER NORTH WEST WHICH SKIPPED MARQUETTE DELAYED AT BUFFALO SEVERAL HOURS BY QUARANTINE.

The North West which was due to arrive in Marquette from Buffalo Wednesday night at 6 o'clock skipped the port and it is now said that typhoid has broken out on the big vessel. It was at first reported that the delay had been caused by the storm of last Sunday, but it now appears that the real reason is the one given in the following dispatch:

Duluth, Aug. 21.—The big lake liner North West of the Northern Steamship company, finally steamed into port at 5:30 this morning having been delayed nearly ten hours at Buffalo under quarantine by the health officers. The cause of the delay was not very well understood here last night and many friends and relatives of passengers on the boat spent a night of anxiety fearing some calamity had befallen the ship.

On her last trip down the lakes a epidemic of typhoid fever developed among the passengers and crew, and at every port along the route, which she touched, the North West dropped a few patients. Impure drinking water was given as the cause of the epidemic.

Although there were at least twenty-three cases of typhoid, most of them were taken off the boat along the route and only five or six got off at Buffalo.

As soon as the steamer reached Buffalo six health inspectors inspected the kitchen and plumbing on the boat. The kitchen was found in a condition not satisfactory, but Dr. Weiler, who was in charge of the inspection, says that he doesn't think the kitchen had anything to do with the typhoid. The plumbing passed inspection all right.

At first the health inspectors insisted that the water tanks and pipes must be thoroughly cleaned before the boat started on her trip up the lakes, but it was afterwards agreed that if sterilized water be served aboard she might sail and the cleaning will be done later.

The inspectors believe that the tanks had been filled too close to port and that contaminated water was thus taken in.

The North West did not leave Buffalo until 4 o'clock Sunday morning and before the passengers were taken aboard, she was thoroughly fumigated from stem to stern.

The steamer remained in Duluth for about three hours in order to take on passengers for the down trip, and cleared from the harbor at about 8:30.

## MISS O'REILLY LEADS.

Second Night of the French Catholic Church Bazaar Well Attended.

Miss Fannie O'Reilly, the young woman chosen to represent St. Peter's parish in the popularity contest at the French bazaar held in the evening last night, the first night of the contest, but her advantage is not great and supporters of Miss Leah Pelletier, who represents the parish of the French Catholic church, say that it will soon be overcome. When the bazaar was turned out at Fraternal Hall last night, Miss O'Reilly had 300 votes and Miss Pelletier was credited with 250.

The attendance at the bazaar last night was as great as it was the opening night and the money given early in the evening by the Dames Auxilieres was thoroughly enjoyed by a large number. No supper is to be served tonight but one will be given Saturday night by Mrs. Longtime, whose reputation as a cook is well known. A distinguished guest at the bazaar last night was Peter White.

Tomorrow afternoon will be devoted to the children, and besides the fish pond and like amusements, special attractions have been made ready for them.

So far the bazaar has been wholly successful and it is believed that the ladies will accomplish the project of raising sufficient funds to complete the building of the new church. It is hoped that \$5,000 will be raised.

## 300 CANAL PASSAGES.

Boats Locked Through, Bound for Ports on Lake Superior.

Sault Ste. Marie, Mich., Aug. 22.—[Special.]—The upbound boats passing the locks at the last town on the lake were the following: Cole, 8:40 p. m.; Plimmer, Ottawa, 9:20; Vail, Goulet Bros., 9:40; Buckley, Phoenix, 11; So-cap, 11:40; Wm. Mills, 12:30 a. m.; Simola, 6:40; Wood, 7:20; Philip Mineh, King, Gawn, Tontonia, 9:30; Poe, Anstee, Robbins, 10; Coralia, Nasenyth, Maruaba, Malla, 10:20; Osborne, 10:40; Merida, 11:20; Ball Bros., Warren, Cahoon; Friant, Cambria, Dan Hanna, Corsica, Hestlock, noon; Cadillac 12:40 p. m.; Briton, Gates, Wells, 1:30; Lake Shore, Amasa, Stone, Schuchman, Dove, Whitney, 2; Buffalo, 2:40; Garry, Pestigo, 3:20; Eldernon, 3:40; Walaha, Scottish, Hero, 4; Sonoma, Frick, Townsend, 4:40; Majestic, 6; Northern Light, Holland, Keith, Exlie, 7; Tacoma, 8.

## Now Is the Time to Enter.

The fall term in both day and night school begins Sept. 2, 1907.

Special Low Rate to All Who Enter Sept. 2.

I have put in new equipment throughout. I am an experienced teacher. I will engage none but experienced teachers, and will secure the services of as many as are needed.

Do you want a good position? I can secure one for every worthy graduate.

Would you like to be a good penman? I am an expert teacher of business penmanship; let me prove it to you.

I offer three courses: Commercial, Shorthand, and Shorthand-Commercial.

## To Young Men and Women Who Live Outside the City

I offer a course by correspondence. You may come to Marquette to finish the course and have all the work you have done by correspondence count toward graduation. The tuition you pay on the correspondence course will be applied on the resident course. I will place a standard typewriter in your home for your exclusive use if you take the course in typewriting.
